Statement by the Czech Republic

"The Czech Republic welcomes and supports the objective of this directive to contribute to faster growth of the Digital Single Market, for the benefit of both consumers and businesses. We also believe that with a targeted full harmonisation approach we could eliminate the key contract law-related obstacles to cross-border supply of digital content. The Czech Republic has participated in the negotiations on the proposal in an active and constructive manner and we are pleased that some problems have been resolved to reach a balanced compromise. Nevertheless, we consider that some key elements of the proposal are unclear and only lead to legal uncertainty. Moreover, by accepting these provisions we would lower the level of consumer protection guaranteed by national law. In particular, we express our disappointment with regard to the ambiguous interpretation of the definition of "embedded digital content" (Article 2, para 12) as it is not clear what rules should apply to what digital content. We also regret that the wording of Article 5 has changed at the last stage of negotiation and the text was watered down.

Moreover, the Czech Republic is not satisfied that the principle of full harmonization, which we have supported in the long term, could not be maintained in Article 9a. Nevertheless, to compensate the minimum harmonization in Article 9a, we were of the opinion that at least the time limit for reversal burden of proof should be 2 years, i.e. the same length as the time limit for the supplier's liability for non-conformity.

---

<sup>1</sup> Exceptionally, in the presence of the Schengen Associated States.

Finally, as we were pleading to maintain the level of protection for the Czech consumers we regret that our proposal for the recital concerning Article 12 para 2 was not accepted to ensure for the consumer legal certainty when establishing for us so problematic “reasonable time” for bringing the digital content and service into conformity by the supplier."

#### Statement by Portugal

"Portugal reserves the right to seek improvement in the future interinstitutional negotiations with the European Parliament and expects that trilogue will lead to a more ambitious directive in favour of consumer protection within the European Union, notably in the provisions concerning the reversal of burden of proof on the supplier.

The compromise proposed by the Presidency in one year maximum harmonisation, is not in alignment with the two years minimum harmonisation set out for the time limit of the liability of the supplier (legal guarantee), thus unjustifiably hindering the protection of our consumers in relation to typically very complex digital content or digital services.

It is not reasonable to expect consumers can fully understand that digital content or services and even less for them to be able to prove when non-conformity occurs after one year from one-off supplies.

In the case of Portugal, the maximum harmonisation of one year for the reversal of burden of proof and the lack of alignment with the proposed two-year time limit for the responsibility of the supplier (legal guarantee) will represent a strong setback for consumer protection."

**Joint statement by Poland and Hungary**

"The Republic of Poland and Hungary are fully aware of the necessity of a response to the threat of climate change in line with the Paris Agreement, which requires revision of the Directive 2003/87/EC ('ETS revision'). Nevertheless, we would like to draw attention to the need of transparency of the process of adopting measures aimed at achieving the abovementioned goal. Thus, it is important to properly reflect the course of the discussion that accompanied the adoption of a general approach to the ETS revision, which took place at the 3522nd meeting of the Council of the European Union (Environment) held in Brussels on 28 February 2017.

It should be noted that, during the discussion on the agenda of the abovementioned meeting, we reminded that on 3rd June 2016 Poland had requested the ETS revision to be adopted in accordance with the qualified majority as defined in Article 3(3) of the Protocol No. 36 on transitional arrangements to the Treaty on the Functioning of the European Union ('Protocol').

In addition, it should be recorded, that the Council voted on two different compromise texts. The first compromise text was opposed by 11 Member States (HU, PL, RO, BG, LV, LT, CY, HR, NL, LU, CZ) accounting for 22,09% of the population of the Union and representing 114 votes. The second compromise text was opposed by 9 Member States (HU, PL, RO, BG, LV, LT, CY, HR and IT) accounting for 28,56% of the population of the Union and representing 114 votes. Poland asked whether these Member States form blocking minority in accordance with Article 3(3) of the Protocol. Presidency following the advice of the Legal Service of the Council stated that the formal vote on the proposal will take place after 31 March 2017.

We emphasise that according to the Article 3(2) of the Protocol, "between 1 November 2014 and 31 March 2017, when an act is to be adopted by qualified majority, a member of the Council may request that it be adopted in accordance with the qualified majority as defined in paragraph 3 [of this Article]". The timeframe established in Article 3(2) refers solely to the request of a Member State to apply to a specific legislative proposal the pre-Lisbon method of qualified majority voting calculation.

If the request was timely made, the old method should be consistently applied throughout the legislative process. Therefore pre-Lisbon rules apply even if the final vote takes place after 31 March 2017. Otherwise, the method ultimately used would depend solely on the date on which the vote is scheduled, and this being beyond the control of a requesting member state.

We would like to emphasize that adoption of a general approach is a significant phase of the legislative procedure and establishes the mandate for the Presidency to negotiate with the Parliament. Thus, it is important to adopt such an act in the proper procedure. Since Poland made a request in application of the Article 3 (2) of the Protocol in due time, general approach should be adopted in accordance with the rules of voting determined therein. This would ensure higher transparency and the proper context for Member States to accept responsibility for the legislation adopted."

#### Statement by Poland

"Assessment of HP 14 based on calculation method is not appropriate as it may lead to either overestimation or underestimation of hazardous waste stream. Consequently, it could negatively influence transition to circular economy, as well as achievement of targets in waste management as regards application of waste hierarchy and cause problems with availability of facilities for hazardous waste treatment (insufficient capacity).

Thus, Poland is of the opinion that this issue should be addressed by an expert group and new proposal for assessing HP 14 property should be developed. The method should be cost-effective, practical and not lead to overestimation of some waste stream."

#### Statement by Austria

"We support the main goal, that is "to extend the application of the Union criminal law provisions that apply to illicit drug trafficking to new psychoactive substances posing severe public health and, where applicable, social risks" (recital 7).

However, we think that not all provisions of Framework Decision 2004/757/JHA should apply to new psychoactive substances.

Among the conduct described in sub-paragraphs (a), (c) and (d) of Art. 2 paragraph 1 of FD 2004/757, we think that Member States should be given the discretion if the conduct described under (c) – possession or purchase – should be criminalized or not. As the Directive contains minimum standards, any Member State is free to go further – but Member States should not be obliged, by virtue of Union Law, to criminalize such behaviour.

Such a more limited approach of the Union legislator would be in line with the principle of subsidiarity in general and also with the conditions foreseen by the Treaties for legislating in criminal law:

"The European Parliament and the Council may, by means of directives adopted in accordance with the ordinary legislative procedure, establish minimum rules concerning the definition of criminal offences and sanctions in the areas of particularly serious crime with a cross-border dimension resulting from the nature or impact of such offences or from a special need to combat them on a common basis." (Art. 83 paragraph 1 TFEU)

We think that the possession or purchase of new psychoactive substances in itself do not fulfil the cited (highlighted) criteria of the Treaty".
