ENER 245 CLIMA 113 CODEC 1117

NOTE

From:	General Secretariat of the Council
To:	Permanent Representatives Committee
No. Cion doc.:	ST 15090/1/16 REV1 + ADD1REV1
Subject:	Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on the Governance of the Energy Union, amending Directive 94/22/EC, Directive 98/70/EC, Directive 2009/31/EC, Regulation (EC) No 663/2009, Regulation (EC) No 715/2009, Directive 2009/73/EC, Council Directive 2009/119/EC, Directive 2010/31/EU, Directive 2012/27/EU, Directive 2013/30/EU and Council Directive (EU) 2015/652 and repealing Regulation (EU) No 525/2013 Analysis of the final compromise text with a view to agreement

1. The fourth and final informal trilogue on the draft Governance Regulation was held on 19-20 June 2018, and an informal agreement was reached on the basis of the text as reflected in Annex. On 20 June, the Presidency debriefed COREPER on the outcome of the trilogue.

10307/18 AT/ns

DGE 2B EN

- 2. The Permanent Representatives Committee is invited to:
 - endorse the annexed compromise text as agreed in the trilogue ¹, and
 - mandate the Presidency to inform the European Parliament that, should the European Parliament adopt its position at first reading, in accordance with Article 294 paragraph 3 of the Treaty, in the form set out in the compromise package contained in the Annex to this document (subject to revision by the legal linguists of both institutions), the Council would, in accordance with Article 294, paragraph 4 of the Treaty, approve the European Parliament's position and the act shall be adopted in the wording which corresponds to the European Parliament's position.

Delegations are invited to note:

Highlighted bold text (normal or *italics*) indicates new text (that was in the trilogue meeting document) as compared to the Coreper document 9566/18.

All changes compared to the 19 June trilogue meeting document are indicated in **blue underlined bold text**. This includes some alignments with EED, RED and EPBD.

Where the fourth column is unmarked, or marked "Maintain Council GA", the agreed text is always identical to the Council General Agreement position as reflected in the third column.

10307/18 AT/ns EN

DGE 2B

Note: please note that due to ongoing final last-minute consultations on the required alignments with the final EED text, it is possible that minor changes may still occur in Annexes II and VII part 2. In case this occurs, these changes will be reflected in a corrigendum.

Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on the Governance of the Energy Union, amending Directive 94/22/EC, Directive 98/70/EC, Directive 2009/31/EC, Regulation (EC) No 663/2009, Regulation (EC) No 715/2009, Directive 2009/73/EC, Council Directive 2009/119/EC, Directive 2010/31/EU, Directive 2012/27/EU, Directive 2013/30/EU and Council Directive (EU) 2015/652 and repealing Regulation (EU) No 525/2013

(2) The European Energy Union should cover five key dimensions: energy security; the internal energy market; energy efficiency; decarbonisation; and research, innovation and competitiveness.		(2) The European Energy Union should cover five key dimensions: energy security; the internal energy market; energy efficiency; decarbonisation; and research, innovation and competitiveness.		

Union with an ambitious climate policy at its core is to give Union consumers, both households and businesses, secure, sustainable, competitive and affordable energy, which requires a fundamental transformation of Europe's energy system. That objective can only be achieved through coordinated action, combining both legislative and non-legislative acts at Union and national level.

AM₃

The goal of a resilient Energy Union with an ambitious climate policy at its core is to give Union consumers, both households and businesses, secure, sustainable, competitive and affordable energy, and to foster research and innovation by means of attracting investments, which requires a fundamental transformation of Europe's energy system. That objective can only be achieved through coordinated action, combining both legislative and nonlegislative acts at Union, macroregional, regional, national, and local level.

The goal of a resilient Energy Union with an ambitious climate policy at its core is to give Union consumers, both households and businesses, secure, sustainable, competitive and affordable energy, which requires a fundamental transformation of Europe's energy system. This transformation of the energy system is also closely linked to the need to preserve, protect and improve the quality of the environment and to promote the prudent and rational utilisation of natural resources, notably through the promotion of energy efficiency and energy savings and the development of new and renewable forms of energy. That goal [] can only be achieved through coordinated action, combining both legislative and non-legislative acts at Union and national level.

	innovation, investments and growth. AM 5		Accept in part:
(4) The Commission's proposal was developed in parallel to and is adopted together with a series of initiatives in sectorial energy policy, notably with regard to renewable energy, energy efficiency and market design. Those initiatives form a package under the overarching theme of energy efficiency first, the Union's global leadership in renewables, and a fair deal for energy consumers.	(4) The Commission's proposal was developed in parallel to and is adopted together with a series of initiatives in sectorial energy policy, notably with regard to renewable energy, energy efficiency (including on the energy performance of buildings) and market design. Those initiatives form a package under the overarching theme of energy efficiency first, the Union's global leadership in renewables, and a fair deal for energy consumers, including by addressing energy poverty and promoting fair competition on the internal market.	(4) The Commission's proposal was developed in parallel to and is adopted together with a series of initiatives in sectorial energy policy, notably with regard to renewable energy, energy efficiency and market design. Those initiatives form a package under the overarching theme of energy efficiency first, the Union's global leadership in renewables, and a fair deal for energy consumers.	(4) The Commission's proposal was developed in parallel to and is adopted together with a series of initiatives in sectorial energy policy, notably with regard to renewable energy, energy efficiency (including on the energy performance of buildings) and market design. Those initiatives form a package under the overarching theme of energy efficiency first, the Union's global leadership in renewables, and a fair deal for energy consumers, including by addressing energy poverty and promoting fair competition on the internal market.

The European Council agreed on 24 October 2014 on the 2030 Framework for Energy and Climate for the Union based on four key targets: at least 40% cut in economy wide greenhouse gas ("GHG") emissions, at least 27% improvement in energy efficiency with a view to a level of 30%, at least 27% for the share of renewable energy consumed in the Union, and at least 15% for electricity interconnection. It specified that the target for renewable energy is binding at Union level and that it will be fulfilled through Member States' contributions guided by the need to deliver collectively the Union target.

AM 6

- The European Council *proposed* (5) on 24 October 2014 a 2030 Framework for Energy and Climate for the Union based on four key targets: at least 40% cut in economy wide greenhouse gas ("GHG") emissions, at least 27% improvement in energy efficiency with a view to a level of 30%, at least 27% for the share of renewable energy consumed in the Union, and at least 15% for electricity interconnection. It specified that the target for renewable energy is binding at Union level and that it will be fulfilled through Member States' contributions guided by the need to deliver collectively the Union target. However, this Regulation reflects the targets agreed upon in the sectoral legislation.
- The European Council agreed on 24 October 2014 on the 2030 Framework for Energy and Climate for the Union based on four key EU level targets: at least 40% cut in economy wide greenhouse gas ("GHG") emissions, an indicative target of at least 27% improvement in energy efficiency, to be reviewed by 2020 with a view to a level of 30%, at least 27% for the share of renewable energy consumed in the Union, and at least 15% for electricity interconnection. It specified that the target for renewable energy is binding at Union level and that it will be fulfilled through Member States' contributions guided by the need to deliver collectively the Union target.
- Accept in part:
- (5) The European Council **concluded** on 24 October 2014 on *a* 2030 Framework for Energy and Climate for the Union based on four key EU level targets: at least 40% cut in economy wide greenhouse gas ("GHG") emissions, an indicative target of at least 27% improvement in energy efficiency, to be reviewed by 2020 with a view to a level of 30%, at least 27% for the share of renewable energy consumed in the Union, and at least 15% for electricity interconnection. It specified that the target for renewable energy is binding at Union level and that it will be fulfilled through Member States' contributions guided by the need to deliver collectively the Union target. The recast of Directive 2009/28/EC introduced a new, binding, renewable energy target for the EU for 2030 of 32%, including a review clause by 2023 for an upward revision of the EU level target, while Directive 2018/XX amending Directive 2012/27/EU set the Unionlevel target for improvement in energy efficiency in 2030 to at least

32.5%, including a review clause by

2023.

The European Council also concluded on 24 October 2014* that a reliable and transparent governance system, without any unnecessary administrative burden, should be developed to help ensure that the Union meets its energy policy goals, with the necessary flexibility for Member States and fully respecting their freedom to determine their energy mix. It emphasized that such governance system should build on existing building blocks, such as national climate programmes, national plans for renewable energy and energy efficiency as well as the need to streamline and bring together separate planning and reporting strands. It also agreed to step up the role and rights of consumers, transparency and predictability for investors, inter alia by systematic monitoring of key indicators for an affordable, safe, competitive, secure and sustainable energy system and to facilitate coordination of national energy policies and foster regional cooperation between Member States.

AM 13

The European Council also concluded on 24 October 2014¹⁴ that a reliable and transparent governance system, without any unnecessary administrative burden and with sufficient flexibility for Member *States*, should be developed to help ensure that the Union meets its energy policy goals, while fully respecting **Member States**' freedom to determine their energy mix. It emphasized that such governance system should build on existing building blocks, such as national climate programmes, national plans for renewable energy and energy efficiency as well as the need to streamline and bring together separate planning and reporting strands. It also agreed to step up the role and rights of consumers, transparency and predictability for investors, inter alia by systematic monitoring of key indicators for an affordable, safe, competitive, secure and sustainable energy system and to facilitate coordination of national climate and energy policies and foster regional cooperation between Member States.

The European Council also concluded on 24 October 20146 that a reliable and transparent governance system, without any unnecessary administrative burden, should be developed to help ensure that the Union meets its energy policy goals, with the necessary flexibility for Member States and fully respecting their freedom to determine their energy mix. It emphasized that such governance system should build on existing building blocks, such as national climate programmes, national plans for renewable energy and energy efficiency as well as the need to streamline and bring together separate planning and reporting strands. It also agreed to step up the role and rights of consumers, transparency and predictability for investors, inter alia by systematic monitoring of key indicators for an affordable, safe, competitive, secure and sustainable energy system and to facilitate coordination of national energy policies and foster regional cooperation between Member States.

⁷ Communication State of the Energy Union 2015 of 18.11.2015, COM(2015)572 final.

(10) The Conclusions of the Council of 26 November 20158 recognised that the Governance of the Energy Union will be an essential tool for the efficient and effective construction of the Energy Union and the achievement of its objectives. They underlined that the governance system should be based on the principles of integration of strategic planning and reporting on the implementation of climate and energy policies and coordination between actors responsible for energy and climate policy, at Union, regional and national level. They also underlined that the Governance should ensure that the agreed energy and climate targets for 2030 are met and that the Governance would monitor the Union's collective progress towards the achievement of the policy objectives across the five dimensions of the Energy Union.

10307/18 AT/ns 16
ANNEX DGE 2B **EN**

(11) The European Parliament's resolution "Towards a European Energy Union" of 15 December 2015* called for the Governance framework for the Energy Union to be ambitious, reliable, transparent, democratic and fully inclusive of the European Parliament and to ensure that the 2030 climate and energy targets are achieved.	(11) The European Parliament's resolution "Towards a European Energy Union" of 15 December 20159 called for the Governance framework for the Energy Union to be ambitious, reliable, transparent, democratic and fully inclusive of the European Parliament and to ensure that the 2030 climate and energy targets are achieved.	
	(11a) The European Council has repeatedly stressed the need to take urgent measures in order to ensure the achievement of a minimum target of 10% of electricity interconnections. The European Council of 23 and 24 October 2014 decided that the European Commission supported by the Member States will take urgent measures in order to ensure the achievement of a minimum target of 10% of electricity interconnections, as a matter of urgency, and no later than 2020 at least for Member States which have not yet attained a minimum level of integration in the internal energy market. The recent Commission 'Communication on strengthening Europe's energy networks' assesses progress towards achieving the 10% interconnection target and suggests ways to operationalise the 15% interconnection target.	

European Parliament resolution of 15 December 2015 on "Towards a European Energy Union" (2015/2113(INI)). COM(2017) 718 final 9

(12) Therefore, the main objective of the Energy Union Governance should be to enable the achievement of the objectives of the Energy Union and in particular the targets of the 2030 Framework for Climate and Energy. This Regulation is therefore linked to sectorial legislation implementing the 2030 targets for energy and climate. While Member States need flexibility to choose policies that are bestmatched to their national energy mix and preferences, that flexibility should be compatible with further market integration, increased competition, the attainment of climate and energy objectives and the gradual shift towards a low-carbon economy.

AM 15

(12) Therefore, the main objective of the Energy Union Governance should be to enable the achievement of the objectives of the Energy Union and in particular the targets of the 2030 Framework for Climate and Energy, in the field of GHG emissions reduction, renewable energy sources and energy efficiency. This Regulation is therefore linked to sectorial legislation implementing the 2030 targets for energy and climate. While Member States need flexibility to choose policies that are best-matched to their national energy mix and preferences, that flexibility should be compatible with further market integration, increased competition, the attainment of climate and energy objectives and the gradual shift towards a *sustainable* low-carbon economy based on a highly energy-efficient, renewablesbased energy system. A mandatory template for the long-term climate and energy strategies should be introduced to ensure their quality and comparability.

(12) Therefore, the main objective of the Energy Union Governance should be to enable the achievement of the objectives of the Energy Union and in particular the targets of the 2030 Framework for Climate and Energy. These objectives and targets stem from the Union policy on energy and from the need to preserve, protect and improve the quality of the environment and to promote the prudent and rational utilisation of natural resources, as provided for under the EU Treaties. Neither of these indissociably linked objectives can be regarded as secondary to the other. This Regulation is therefore linked to sectorial legislation implementing the 2030 targets for energy and climate. While Member States need flexibility to choose policies that are best-matched to their national energy mix and preferences, that flexibility should be compatible with further market integration, increased competition, the attainment of climate and energy objectives and the gradual shift towards a low-carbon economy.

(12) Therefore, the main objective of the Energy Union Governance should be to enable the achievement of the objectives of the Energy Union and in particular the targets of the 2030 Framework for Climate and Energy, in the field of GHG emissions reduction, renewable energy sources and energy efficiency. These objectives and targets stem from the Union policy on energy and from the need to preserve, protect and improve the quality of the environment and to promote the prudent and rational utilisation of natural resources, as provided for under the EU Treaties. Neither of these indissociably linked objectives can be regarded as secondary to the other. This Regulation is therefore linked to sectorial legislation implementing the 2030 targets for energy and climate. While Member States need flexibility to choose policies that are bestmatched to their national energy mix and preferences, that flexibility should be compatible with further market integration, increased competition, the attainment of climate and energy objectives and the gradual shift towards a *sustainable* low-carbon economy.

(13) The transition to a low-carbon economy requires changes in investment behaviour and incentives across the entire policy spectrum. Achieving greenhouse gas emission reductions requires a boost to efficiency and innovation in the European economy and in particular should also lead to improvements of air quality.	transition to a sustainable, low-carbon economy requires substantial changes in investment behaviour, particularly regarding public and private investment, and incentives across the entire policy spectrum as well as regional market reform. Achieving greenhouse gas emission reductions requires a boost to efficiency and innovation in the European economy and in particular should also create sustainable jobs and lead to improvements of air quality. AM 17 Recital 13 a (new) (13a) The Union and the Member States should undertake concrete actions by which to ban energy subsidies, at least for fossil fuels, in order to comply with the international commitments of the G-7 and the G-20 and in the Paris Agreement.	(13) The transition to a low-carbon economy requires changes in investment behaviour and incentives across the entire policy spectrum. Achieving greenhouse gas emission reductions requires a boost to efficiency and innovation in the European economy and in particular should also lead to improvements of air quality.	(13) A socially acceptable and just transition to a sustainable, low-carbon economy requires changes in investment behaviour, as regards both public and private investment, and incentives across the entire policy spectrum, taking into consideration citizens and regions which could be adversely impacted by the transition to a low-carbon economy. Achieving greenhouse gas emission reductions requires a boost to efficiency and innovation in the European economy and in particular should also create sustainable jobs, including in hightech sectors, and lead to improvements of air quality and public health. Recital 13 a (new) (13a) In view of international commitments undertaken in the Paris Agreement, Member States should report on actions that they undertake to phase out energy subsidies, [] in particular for fossil fuels. When reporting, Member States may choose to base themselves on existing definitions for fossil fuels used internationally.

(18) The integrated national energy and climate plans should cover tenyear periods and provide an overview of the current energy system and policy situation. They should set out national objectives for each of the five key dimensions of the Energy Union and corresponding policies and measures to meet those objectives and have an analytical basis. The national plans covering the first period from 2021 to 2030 should pay particular attention to the 2030 targets for greenhouse gas emission reductions, renewable energy, energy efficiency and electricity interconnection. Member States should aim to ensure that the national plans are consistent with and contribute to achieving the Sustainable Development Goals.

AM 23

(18) The integrated national energy and climate plans should cover tenyear periods and provide an overview of the current energy system and policy situation. They should set out national targets or objectives for each of the five key dimensions of the Energy Union and corresponding policies and measures to meet those objectives and have an analytical basis. The national plans covering the first period from 2021 to 2030 should pay particular attention to the 2030 targets for greenhouse gas emission reductions, renewable energy, energy efficiency and electricity interconnection. Member States should aim to ensure that the national plans are consistent with and contribute to achieving the Sustainable Development Goals.

and climate plans should cover tenyear periods and provide an overview of the current energy system and policy situation. They should set out national objectives for each of the five key dimensions of the Energy Union and corresponding policies and measures to meet those objectives and have an analytical basis. The national plans covering the first period from 2021 to 2030 should pay particular attention to the 2030 targets for greenhouse gas emission reductions, renewable energy, energy efficiency and electricity interconnection. Member States should aim to ensure that the national plans are consistent with and contribute to achieving the Sustainable Development Goals. In setting out the national plans, Member States may build upon existing national strategies or plans. For the first draft national plan and national plan, a different deadline is

provided as compared to subsequent plans, in order to provide Member States with adequate preparation time for their first plans after the adoption of this Regulation.

Nevertheless, the Member States are encouraged to provide their first draft national plans as early as possible in 2018, in order to allow

(18) The integrated national energy

Maintain Council GA

	proper preparations, in particular for the facilitative dialogue to be convened under the Paris Agreement in 2018.	
Recital 18 a (new) (18a) When preparing their integrated national energy and climate plan, Member States should assess the number of households in energy poverty, taking into account the necessary domestic energy services needed to guarantee basic standards of living in the relevant national context, which they may not be able to afford due to a combination of low income, high energy expenditure and poor energy efficiency of their households. Member States should outline existing and planned policies and measures addressing energy poverty and, where necessary, include a national objective to reduce the number of households in energy poverty. The Commission should adopt a common methodology for Member States to define energy poverty and each Member State should define households in energy poverty in accordance with their specific national circumstances.		(18a) When preparing their integrated national energy and climate plan, Member States should assess the number of households in energy poverty, taking into account the necessary domestic energy services needed to guarantee basic standards of living in the relevant national context, existing social policy and other relevant policies, as well as Commission indicative guidance on relevant indicators, including geographical dispersion, that are based on a common approach for energy poverty []. In the event that a Member State finds that it has a significant number of households in energy poverty, it should include in its plan a national indicative objective to reduce energy poverty. [] Note: cf. Art. 3(3)(e) and Art. 21a (new)

Regional cooperation in elaborating and finalising national plans as well as in the subsequent implementation of national plans should be essential to improve effectiveness and efficiency of measures and foster market integration and energy security.

Accept in part

(21) Regional cooperation is key to ensure an effective achievement of the objectives of the Energy Union in a cost-optimal manner. The Commission should facilitate such cooperation between the Member **States**. Member States should get the opportunity to comment on other Member States' plans before they are finalised to avoid inconsistencies and potential negative impacts on other Member States and ensure that common objectives are met collectively. Regional cooperation in elaborating and finalising national plans as well as in the subsequent implementation of national plans should be essential to improve effectiveness and efficiency of measures and foster market integration and energy security.

Note: see also AM 114 (Art. 11):

(21 bis) Where cooperating in the framework of this Regulation, Member States should take into consideration existing regional cooperation fora, such as the Baltic Energy Market Interconnection Plan (BEMIP), Central and South-Eastern Europe Connectivity (CESEC), Central-West Regional Energy Market (CWREM), the North Seas Countries' Offshore Grid Initiative (NSCOGI), the Pentalateral Energy Forum, Interconnections for South-West Europe and the Euro-Mediterranean Partnership.

Member States are encouraged to envisage cooperation with Energy Community contracting parties, with members of the European Economic Area and, if they consider it appropriate, with other relevant third countries.

Moreover, the Commission may, with a view to promoting market integration, cost-efficient policies, effective cooperation, partnerships and consultations, identify further opportunities for regional cooperation covering one or several of the five dimensions of the Energy Union in line with the provisions of this Regulation, with a long-term vision and based on existing market conditions.

(21ter) The Commission may undertake discussions with relevant third countries in order to explore the possibility to extend towards them the application of provisions established under this Regulation, notably those related to regional cooperation.

Note: see AM 211 and 212

(22) National plans should be stable to ensure transparency and predictability of national policies and measures in order to ensure investor certainty. Updates of national plans should however be foreseen once during the ten-year period covered to give Member States the opportunity to adapt to significant changing circumstances. For the plans covering the period from 2021 to 2030, Member States should be able to update their plans by 1 January 2024. Targets, objectives and contributions should only be modified to reflect an increased overall ambition in particular as regards the 2030 targets for energy and climate. As part of the updates, Member States should make efforts to mitigate any adverse environmental impacts that become apparent as part of the integrated reporting.

AM 30

(22) National plans should be stable to ensure transparency and predictability of national policies and measures in order to ensure investment certainty. The regular submission of national plans over ten-year rolling periods give Member States the opportunity to adapt to significant changing circumstances. Targets and objectives should only be modified to reflect an increased overall ambition in particular as regards the targets for energy and climate. As part of *those* plans. Member States should make efforts to mitigate any adverse environmental impacts that become apparent as part of the integrated reporting.

(22) National plans should be stable to ensure transparency and predictability of national policies and measures in order to ensure investor certainty. (23) Stable long-term low emission strategies are crucial to contribute towards economic transformation, jobs, growth and the achievement of broader sustainable development goals, as well as to move in a fair and cost-effective manner towards the long-term goal set by the Paris Agreement. Furthermore, Parties to the Paris Agreement are invited to communicate, by 2020, their mid-century, long-term low greenhouse gas emission development strategies.

AM 31

(23) Stable long-term *climate and energy* strategies are crucial to contribute towards economic transformation, jobs, growth and the achievement of broader sustainable development goals, as well as to move in a fair and cost-effective manner towards the long-term goal set by the Paris Agreement. Furthermore, Parties to the Paris Agreement are invited to communicate, by 2020, their midcentury, long-term low greenhouse gas emission development strategies.

(23) Stable long-term low emission strategies are crucial to contribute towards economic transformation, jobs, growth and the achievement of broader sustainable development goals, as well as to move in a fair and cost-effective manner towards the long-term goal set by the Paris Agreement. Furthermore, Parties to the Paris Agreement are invited to communicate, by 2020, their mid-century, long-term low greenhouse gas emission development strategies.

(23) Stable long-term strategies are crucial to contribute towards economic transformation, jobs, growth and the achievement of broader sustainable development goals, as well as to move in a fair and cost-effective manner towards the long-term goal set by the Paris Agreement. Furthermore, Parties to the Paris Agreement are invited to communicate, by 2020, their mid-century, long-term low greenhouse gas emission development strategies. **In this context, the European Council invited on 22** March 2018 the Commission to present by the first quarter of 2019 a proposal for a Strategy for longterm EU greenhouse gas emissions reduction in accordance with the Paris Agreement, taking into account the national plans.

AM 32 Recital 23 a (new)

(23a) Member States should develop long-term climate and energy strategies for 2050 and beyond identifying the necessary transformations in different sectors that are necessary to shift to a renewable energy system and achieve the goals of the Paris Agreement. The strategies should be consistent with the Union's fair share of remaining global carbon budget and should be developed in an open and transparent manner and with the full involvement of relevant stakeholders. The integrated national energy and climate plans should be based on the long-term climate and energy strategies and consistent with them.

(23a) Member States should develop long-term [] strategies with a perspective of at least 30 years contributing to the fulfilments of the Member States' commitments under the UNFCCC and the Paris Agreement, in the context of the objective of the Paris Agreement of holding the increase in the global average temperature to well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels and achievement of longterm greenhouse gas emission reductions and enhancements of removals by sinks in all sectors in line with the Union's objective. Member States should develop their strategies in an open and transparent manner and should ensure effective opportunities for the public to participate in their preparation. The integrated national energy and climate plans and the long-term strategies should be consistent with each other.

Note: see AM 122

AM 33

Recital 23 b (new)

(23b) The land use, land use change and forestry (LULUCF) sector is highly exposed and very vulnerable to climate change. At the same time, the sector has huge potential to provide for long-term climate benefits and to contribute significantly to the achievement of Union and international long-term climate goals. It can contribute to climate change mitigation in several ways, in particular by reducing emissions, maintaining and enhancing sinks and carbon stocks, and providing biomaterials that can substitute fossil or carbon-intensive materials. In order for measures aiming in particular at increasing carbon sequestration to be effective, the sustainable resource management and long-term stability and adaptability of carbon pools is essential. Long-term strategies are essential to allow for sustainable investments in the long run.

Whereas recommendations have no binding force, as set out in Article 288 of the TFEU, Member States should **nevertheless** take **due** [] account of such recommendations and explain in subsequent progress reports how this has been done []. With regard to renewable energy the Commission assessment shall be

subsequent progress reports and explain in subsequent objective critera. Whereas the analysis of based on the objective critera. how they have been progress reports how they have the Commission underlying its implemented. been implemented. assessments may contain quantitative elements, the Commission recommendations should remain qualitative in nature and not include quantitative levels of national ambition for the year 2030. If the Commission If the Commission issues a issues a recommendation on a Member recommendation on a Member State's draft State's draft national plan, it should do national plan, it should do so as quickly as possible, having regard to, on the one hand, so as quickly as possible, having regard to, on the one hand, the need for the the need for the Commission to add up Commission to add up certain quantified certain quantified planned contributions of planned contributions of all Member all Member States in order to assess States in order to assess ambition at ambition at Union level, and on the other hand, the need to provide adequate time for Union level, and on the other hand, the need to provide adequate time for the the Member State concerned to take due Member State concerned to take due consideration of the Commission's consideration of the Commission's recommendations before finalising its national plan, and the need to avoid the recommendations before finalising its risk of delay of the Member State's national national plan, and the need to avoid the risk of delay of the Member State's plan. national plan.

(34bis) **Cost-effective deployment of** renewable energy is one of the [] key objective criteria [] for assessing Member States' contributions. The cost structure of deploying renewable energy is complex and varies significantly between Member States. It includes not only simply the costs of support schemes, but, inter alia, the connection costs of installations, system backup, providing system security and costs that need to be borne when complying with environmental restrictions. Thus when comparing Member States based on this criterion, all costs related to deployment, whether they are borne by the Member State, final consumers or project developers, should be accounted for. The Commission's recommendations on the **Member States' renewable ambitions** should be based on a methodology that takes into account various objective criteria affecting the renewable energy development. Thus, the methodology for evaluating the renewable energy ambition of the Member States should indicate the relative effort made by the Member States, while also taking into consideration relevant circumstances affecting the renewable energy development. The methodology should include data originating from independent quantitative and/or qualitative data sources.

(34bis) Cost-effective deployment of renewable energy is one of the [] key objective criteria [] for assessing Member States' contributions. The cost structure of deploying renewable energy is complex and varies significantly between Member States. It includes not only simply the costs of support schemes, but, inter alia, the connection costs of installations, system backup, providing system security and costs that need to be borne when complying with environmental restrictions. Thus when comparing Member States based on this criterion, all costs related to deployment, whether they are borne by the Member State, final consumers or project developers, should be accounted for. The Commission's recommendations on the Member States' renewable ambitions should be based on a formula set out in this Regulation which is based on objective criteria []. Thus, the [] assessment of the renewable energy ambition of the Member States should indicate the relative effort made by the Member States, while also taking into consideration relevant circumstances affecting the renewable energy development. The assessment should also include data originating from independent quantitative and/or qualitative data sources.

(35) Should the ambition of integrated national energy and climate plans or their updates be insufficient for the collective achievement of the Energy Union objectives and, for the first period, in particular the 2030 targets for renewable energy and energy efficiency, the Commission should take measures at Union level in order to ensure the collective achievement of these objectives and targets (thereby closing any 'ambition gap'). Should progress made by the Union towards these objectives and targets be insufficient for their delivery, the Commission should, in addition to issuing recommendations, take measures at Union level or Member States should take additional measures in order to ensure achievement of these objectives and targets (thereby closing any 'delivery gap'). Such measures should take into account early ambitious contributions made by Member States to the 2030 targets for renewable energy and energy efficiency when sharing the effort for collective target achievement. In the area of renewable energy, such measures can also include financial contributions by Member States to a financing platform managed by the Commission, which would be

AM 44

(35) Should the ambition *and the* targets, policies and measures described in the integrated national energy and climate plans be insufficient for the collective achievement of the Energy Union objectives and, for the first period, in particular the 2030 targets for renewable energy and energy efficiency, the Commission should take measures at Union level in order to ensure the collective achievement of these objectives and targets and Member States should review upwards their national targets in the field of renewable energy sources by 31 December 2020 (thereby closing any 'ambition gap'). Should progress made by the Union towards these objectives and targets be insufficient for their delivery, the Commission may, in addition to issuing recommendations, take measures at Union level or request additional measures from Member States in order to ensure their achievement (thereby closing any 'delivery gap').

Such measures should take into account early ambitious *efforts* made by Member States to the 2030 targets

(35) Should the ambition of integrated national energy and climate plans or their updates be insufficient for the collective achievement of the Energy Union objectives and, for the first period, in particular the 2030 targets for renewable energy and energy efficiency, the Commission should take measures at Union level in order to ensure the collective achievement of these objectives and targets (thereby closing any 'ambition gap'). Should progress made by the Union towards these objectives and targets be insufficient for their delivery, the Commission should, in addition to issuing recommendations, l propose measures and make use of relevant empowerments at Union level or Member States should take additional measures in order to ensure achievement of these objectives and targets (thereby closing any 'delivery gap'). Such measures should take into account early ambitious contributions made by Member States to the 2030 target[] for [] energy efficiency when sharing the effort for collective target achievement. Such measures should also take into account early efforts made by Member States to the 2030

(35) Should the ambition of integrated national energy and climate plans or their updates be insufficient for the collective achievement of the Energy Union objectives and, for the first period, in particular the 2030 targets for renewable energy and energy efficiency, the Commission should take measures at Union level in order to ensure the collective achievement of these objectives and targets (thereby closing any 'ambition gap'). Should progress made by the Union towards these objectives and targets be insufficient for their delivery, the Commission should, in addition to issuing recommendations, [propose measures and make use of relevant empowerments at Union level or Member States should take additional measures in order to ensure achievement of these objectives and targets (thereby closing any 'delivery gap').

Such measures should also take into account early efforts made by Member States to the 2030 target for renewable energy by reaching in or before 2020 a share of energy from renewable sources above its national

used to contribute to renewable energy projects across the Union. Member States' national renewable energy targets for 2020 should serve as baseline shares of renewable energy from 2021 onwards. In the area of energy efficiency, additional measures can in particular aim at improving the energy efficiency of products, buildings and transport.

for renewable energy and energy efficiency when sharing the effort for collective target achievement.

In the area of renewable energy, such measures can also include *voluntary* financial contributions by Member States to a financing platform managed by the Commission, which would be used to contribute to renewable energy projects across the Union, *including those of Energy Union interest*.

Member States' national renewable energy targets for 2020 should serve as baseline shares of renewable energy from 2021 onwards *and should be maintained throughout the period*. In the area of energy efficiency, additional measures can in particular aim at improving the energy efficiency of products, buildings and transport.

target for renewable energy by reaching in or before 2020 a share of energy from renewable sources above its national binding target, or by making early progress in the period 2005-2020 or in the implementation of its contribution to the Union's binding target of at least 27% of renewable energy in 2030.

In the area of renewable energy, such measures can also include voluntary financial contributions by Member States to a financing mechanism managed by the Commission, which would be used to contribute to the most cost-efficient renewable energy projects across the Union, thus providing the Member State with the option to contribute to the EU target achievement at the lowest possible cost. []. In the area of energy efficiency, additional measures can in particular aim at improving the energy efficiency of products, buildings and transport.

binding target, or by making early progress towards its national binding 2020 target [] or in the implementation of its contribution to the Union's binding target of at least 32% of renewable energy in 2030. In the area of renewable energy, such measures can also include voluntary financial contributions by Member States to an EU renewable energy financing mechanism managed by the Commission, which would be used to contribute to the most cost-efficient renewable energy projects across the Union, thus providing the Member State with the option to contribute to the EU target achievement at the lowest possible cost. []. **Member States' national renewable** energy targets for 2020 should serve as baseline shares of renewable energy from 2021 onwards and should be maintained throughout the *period*. In the area of energy efficiency, additional measures can in particular aim at improving the energy efficiency of products, buildings and transport.

(35bis) Member States' national
renewable energy targets for 2020 as
set out in Annex I of [recast of
Directive 2009/28/EC as proposed by
COM(2016) 767] should serve as the
starting point for their national
indicative trajectory for the period 2021 to 2030, unless a Member State
voluntarily decides to set an higher
starting point. In addition, they
should constitute for this period a
mandatory baseline share that forms
equally part of [recast of Directive
2009/28/EC as proposed by
COM(2016) 767]. Consequently, in
this period the share of energy from
renewable sources in each Member
State's gross final consumption of
energy should not be lower than its
baseline share.
(35ter) If a Member State does
not maintain its baseline share as
measured over a one-year period, it
should, within one year, take
additional measures to cover this
gap to its baseline scenario. Where a
Member State has effectively taken
such necessary measures and
fulfilled its obligation to cover the
gap, it should be deemed to comply
with the mandatory requirements of
its base-line scenario as from the
moment in time when the gap in
question occurred and both under
this Regulation and under [recast of
Directive 2009/28/EC as proposed by
COM(2016) 767].

(35quater) In order to enable adequate monitoring and early corrective action by Member States and the Commission, and in order to avoid the 'free rider' effect, the indicative trajectories of all Member States (and, as a result, also the indicative trajectory of the Union) should reach, in 2023, [] 2025 and 2027 at least certain minimum percentages of the total increase in renewable energy foreseen for 2030, as set out in this Regulation. The achievement of these 'reference points' in 2023, [] 2025 and 2027 will be assessed by the Commission on the basis of, inter alia, the Member States' integrated national energy and climate progress reports that Member States should present in 2025, [] 2027 and 2029, respectively. If the indicative reference points of the Union are not met. Member **States below their reference points** should cover the gap [] by implementing additional measures [

(35quater) In order to enable adequate monitoring and early corrective action by Member States and the Commission, and in order to avoid the 'free rider' effect, the indicative trajectories of all Member States (and, as a result, also the indicative trajectory of the Union) should reach, in 2022, 2025 and 2027 at least certain minimum percentages of the total increase in renewable energy foreseen for 2030, as set out in this Regulation. The achievement of these 'reference points' in 2022, 2025 and 2027 will be assessed by the Commission on the basis of, inter alia, the Member States' integrated national energy and climate progress reports that **Member States should present [].** Member States below their reference points should explain in their next progress report how they will cover the gap. If the indicative reference points of the Union are not met, Member States below their reference points should cover the gap by implementing additional measures.

CHAPTER 2 INTEGRATED NATIONAL ENERGY AND CLIMATE PLANS

Article 3 **Integrated national energy and climate plans**

AM 59

- By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the tenyear period immediately following the end of the period covered by the previous plan.
- By 1 January 2019 and every ten years thereafter, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 and Annex I. The first plan shall cover the period from 2021 to 2030. The following plans shall cover the tenyear period immediately following the end of the period covered by the previous plan.
- By [] 31 December 2019, and subsequently by 1 January 2029 and every ten years thereafter*), each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2. The content of the plans is further specified in [] Annex I. The first plan shall cover the period from 2021 to 2030, bearing in mind the longer term perspective. The following plans shall cover the tenyear period immediately following the end of the period covered by the previous plan.
- By [] 31 December 2019, and subsequently by 1 January 2029 and every ten years thereafter ³⁴, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 [] and Annex I. The first plan shall cover the period from 2021 to 2030, bearing in mind the longer term perspective. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.

- The integrated national energy and climate plans shall consist of the following main sections:
- The integrated national energy and climate plans shall consist of the following main sections:
- The integrated national energy and climate plans shall consist of the following main sections:

34 Explanatory note: "I January 2029 and every ten years thereafter" is in effect identical to the Commission proposal, which is carefully aligned with the Paris Agreement cycle. The amendments in this first sentence merely enable a later presentation of the *first* plan. This also applies to Art. 9(1). See also recital 18 of Council GA.

(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;	(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of: (1) an executive summary, (2) a description of the consultation and involvement of local authorities, civil society, business, the social partners and citizens and their results, (3) a description of macro-regional and regional cooperation with other Member States in preparing the plan;	(a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the public consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;	Maintain Council GA
(b) a description of the national objectives, targets and contributions for each of the five dimensions of the Energy Union;	(b) a description of the national objectives <i>and</i> targets for each of the five dimensions of the Energy Union;	(b) a description of [] national objectives, targets and contributions [] relating to the [] dimensions of the Energy Union, as set out in Article 4 and Annex I;	Maintain Council GA
(c) a description of the policies and measures foreseen to meet the corresponding objectives, targets and contributions set out under point (b);	(c) a description of the <i>planned</i> policies, measures <i>and investment strategies</i> foreseen to meet the corresponding objectives <i>and</i> targets set out under point (b);	(c) a description of the policies and measures foreseen in relation to [] the corresponding objectives, targets and contributions set out under point (b);	(c) a description of the <i>planned</i> policies and measures [] foreseen in relation to the corresponding objectives, targets and contributions set out under point (b) as well as a general overview of the investments needed to meet the corresponding objectives and targets/contributions; Note: text provisionally agreed at technical level

	Article 3(2)(d)			
(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives referred to in point (b) with already existing (implemented and adopted) policies and measures;	(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives and targets referred to in point (b) with already existing (implemented and adopted) policies and measures and a description of the regulatory and non-regulatory barriers and hurdles to delivering the targets and objectives;	(d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives referred to in point (b) with already existing (implemented and adopted) policies and measures;	Accept in part, with changes: (d) a description of the current situation of the five dimensions of the Energy Union including with regard to the energy system and greenhouse gas emissions and removals as well as projections with regard to the objectives referred to in point (b) with already existing (implemented and adopted) policies and measures; (da) if applicable, a description of the regulatory and non-regulatory barriers and hurdles to delivering the targets, contributions or [] objectives related to renewable energy and	
(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b);	(e) an assessment of the impacts of individual and aggregated planned policies and measures to meet the targets and objectives referred to in Articles 1, 4, 13a and 14 and on environmental, including air quality and nature protection, health, macroeconomic, and social impacts; (ea) an assessment of the impacts of the planned policies and measures on competitiveness linked to the five dimensions of the Energy Union;	(e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b), including their consistency with the long term greenhouse gas emission reduction objectives under the Paris Agreement and the long term low emissions strategies as referred to in Article 14;	energy efficiency; (e) an assessment of the impacts of the planned policies and measures to meet the objectives referred to in point (b), including their consistency with the long term greenhouse gas emission reduction objectives under the Paris Agreement and the long term strategies as referred to in Article 14; Accept with changes (ea) a general assessment of the impacts of the planned policies and measures on competitiveness linked to the five dimensions of the Energy Union;	

	(eb) an assessment of the potential impacts of climate in the Member State, including direct and indirect impacts, and resilience strategies to manage the climate impacts, such as national adaptation plans;		Maintain Council GA
	(ec) following the development of an investment strategy, an estimation of the public and private investment necessary to implement the planned policies and measures;		Maintain Council GA Note: provisionally agreed at technical level - (see (c) above)
(f) an annex, drawn up in accordance with the requirements and structure laid down in Annex II to this Regulation, setting out the Member State's methodologies and policy measures for achieving the energy savings requirement in accordance with Article 7 to Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761] and Annex V thereto.	(f) an annex, drawn up in accordance with the requirements and structure laid down in Annex II to this Regulation, setting out the Member State's methodologies and policy measures for achieving the energy savings requirement in accordance with Article 7 to Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761] and Annex V thereto.	(f) an annex, drawn up in accordance with the requirements and structure laid down in Annex II to this Regulation, setting out the Member State's methodologies and policy measures for achieving the energy savings requirement in accordance with Article 7 to Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761] and Annex V thereto.	
3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant.	3. When preparing the national plans referred in paragraph 1, Member States shall:	3. When preparing the national plans referred to in paragraph 1, Member States shall take into account the interlinkages between the five dimensions of the Energy Union and they shall use consistent data and assumptions across the five dimensions where relevant. (2) with respect to renewable		(2) with respect to renewable	
energy:		energy:	
i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with a linear trajectory for that contribution from 2021 onwards;	i. with a view to achieving the Union's binding target of at least 35 % renewable energy in 2030 as referred to in [Article 3] of [recast of Directive 2009/28/EC as proposed by COM(2016) 767],	i. with a view to achieving the Union's binding target of at least 27% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with an indicative [] trajectory for that contribution from 2021 onwards. By 2023, the indicative trajectory shall reach a reference point of at least 24% [] of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target, and its contribution to the 2030 target. By 2025, the indicative trajectory shall reach a reference point of at least 40% of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target and its contribution to the 2030 target. By 2027, the	i. with a view to achieving the Union's binding target of at least 32% renewable energy in 2030 as referred to in Article 3 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767], a contribution to this target in terms of the Member State's share of energy from renewable sources in gross final consumption of energy in 2030, with an indicative [] trajectory for that contribution from 2021 onwards. By 2022, the indicative trajectory shall reach a reference point of at least 18% [] of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target, and its contribution to the 2030 target. By 2025, the indicative trajectory shall reach a reference point of at least 43% of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target and its contribution to the 2030 target. By 2027, the indicative trajectory shall reach a reference point of at least 65% of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target and its contribution to the 2030 target. By 2027, the indicative trajectory shall reach a reference point of at least 65% of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target and its contribution

indicative trajectory shall reach a reference point of at least 60% of the total increase in the share of energy from renewable sources between that Member State's binding 2020 national target and its contribution to the 2030 target. By 2030, the indicative trajectory shall reach at least the Member State's planned contribution. If a Member State expects to surpass its binding 2020 national target, its indicative trajectory may start at the level it is projected to achieve. The Member States' indicative trajectories, taken together, shall add up to the Union reference points in 2023, [] 2025 and 2027 and to the Union's binding target of at least 27% renewable energy in 2030. Separately from its contribution to the Union target and its indicative trajectory for the purposes of this Regulation, a Member State shall be free to indicate higher ambitions for national policy purposes;

to the 2030 target. By 2030, the indicative trajectory shall reach at least the Member State's planned contribution. If a Member State expects to surpass its binding 2020 national target, its indicative trajectory may start at the level it is projected to achieve. The Member States' indicative trajectories, taken together, shall add up to the Union reference points in 2022, 2025 and 2027 and to the Union's binding target of at least 32% renewable energy in 2030. Separately from its contribution to the Union target and its indicative trajectory for the purposes of this Regulation, a Member State shall be free to indicate higher ambitions for national policy purposes;

AM 291 Article 4 – para 1 – point a – point 2 – point i a (new) ia. the Member State's national target of energy from renewable sources in gross final consumption of energy in 2030 established pursuant to Article 3 and Annex Ia to Directive (EU)/ [recast of Directive 2009/28/EC as proposed by COM(2016) 767], with a progressive trajectory ensuring a regular deployment of renewable energy from 2021 onwards as set out in Annex Ia to this Regulation;	Maintain Council GA
Article	4(a)(2)
AM 292 Article 4 – para 1 – point a – point 2 – point i b (new) ib. The trajectory referred to in paragraph ia shall:	
(i) start from the share of energy from renewable sources in 2020 as set out in the third column of the table in part A of Annex I to Directive (EU)/ [recast of Directive 2009/28/EC as proposed by COM(2016) 767]. If a Member State surpasses its binding 2020 national target, its trajectory may start at the level achieved in 2020;	Maintain Council GA Last sentence accepted, with changes, in Council text paragraph 2(i) above

(ii) consist of a minimum of three reference points calculated as an average of the two or three preceding years as set out in Annex Ia;	Maintain Council GA Cf. Council text paragraph 2(i) above (three reference points)
(iii) reach at least its 2030 national target;	(inree rejerence points)
AM 67 Article 4 – para 1 – point a – point 2 – point i c (new) ic. The Member State's trajectory referred to in points ia and ib, taken together, shall add up to the Union's binding linear trajectory and shall reach the Union's binding target of at least 35 % energy from renewable sources in gross final consumption of energy in 2030;	Maintain Council GA Cf. Council text paragraph 2(i) above (MS trajectories shall add up to the Union's binding target) The issue of the Union trajectory is also reflected in Art. 25(2) of the Council GA whereby the EU trajectory matches the national reference points.
AM 68 Article 4 – para 1 – point a – point 2 – point i d (new) id. the Member State's trajectories for the overall share of renewable energy in final energy consumption from 2031 onwards shall be consistent with the long-term climate and energy strategies.	Maintain Council GA (cf. AM 32)

Article 4(a)(2)			
ii. trajectories for the sectorial share of renewable energy in final energy consumption from 2021 to 2030 in the heating and cooling, electricity, and transport sectors;	AM 69 and 287 ii. the Member State's indicative trajectories for the sectorial share of renewable energy in final energy consumption from 2021 to 2030 in the heating and cooling, electricity, and transport sectors;		Maintain Council GA
iii. trajectories by renewable energy technology that the Member State plans to use to achieve the overall and sectorial trajectories for renewable energy from 2021 to 2030 including total expected gross final energy consumption per technology and sector in Mtoe and total planned installed capacity per technology and sector in MW;	iii. <i>indicative</i> trajectories by renewable energy technology that the Member State plans to use to achieve the overall and sectorial trajectories for renewable energy from 2021 to 2030 including total expected gross final energy consumption per technology and sector in Mtoe, total planned installed capacity per technology and sector <i>including repowering</i> in MW;		Maintain Council GA

	Article 4(a)(2)				
	AM 71 Article 4 – para 1 – point a – point 2 – point iii a (new) iiia. the Member State's share of, as well as objectives and trajectories for energy from renewable energy produced by cities, renewable energy communities and self-consumers from 2021 to 2030, including expected gross final energy consumption in Mtoe.		Note: the substance of AM 71 is very similar to the requirement of Annex I, part 1, Section A, point 2.1.2(vi) of the Council GA (with the addition of "if available" and the deletion of "shares")		
(b) as regards the dimension "Energy Efficiency": (1) the indicative national energy efficiency contribution to achieving the Union's binding energy efficiency target of 30% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity.	AM 73 (1) the binding national energy efficiency target to achieving the Union's binding energy efficiency target of 40% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity, with a linear trajectory for that target from 2021 onwards.	(b) as regards the dimension "Energy Efficiency": (1) the indicative national energy efficiency contribution to achieving the Union's [] energy efficiency target of 30% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity.	(1) the indicative national energy efficiency contribution to achieving the Union's [] energy efficiency targets of at least 32.5% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity.		
Member States shall express their contribution in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that	Member States shall express their energy efficiency targets in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030. 	3a. Member States shall make available to the public the draft plans referred to in paragraph 1.		3a. In the context of the public consultation as referred to in Article 10, Member States shall make available to the public the draft plans referred to in paragraph 1.

Article 10 **Public consultation**

Without prejudice to any other Union law requirements, Member States shall ensure that the public is given early and effective opportunities to participate in the preparation of draft plans referred to in Article 9 and attach to the submission of their draft integrated national energy and climate plan to the Commission a summary of the public's views. In so far as the provisions of Directive 2001/42/EC are applicable, consultations undertaken in accordance with that Directive shall be deemed to satisfy also the obligations to consult the public under this Regulation.

AM 108

Without prejudice to any other Union law requirements, Member States shall ensure that the public is given early and effective opportunities to participate in the preparation of draft plans referred to in Article 9, of longterm strategies referred to in Article 14, when all options are open and effective public consultation can take place.

Without prejudice to any other Union law requirements, Member States shall ensure that the public is given early and effective opportunities to participate in the preparation of the draft plan [] or, well before its adoption, of the final plan[] and attach to the submission of their draft I or final integrated national energy and climate plan to the Commission a summary of the public's views or provisional views. In so far as the provisions of Directive 2001/42/EC are applicable ³⁶, consultations undertaken on the draft in accordance with that Directive shall be deemed to satisfy also the obligations to consult the public under this Regulation.

Without prejudice to any other Union law requirements, Member States shall ensure that the public is given early and effective opportunities to participate in the preparation of the draft plans - [] as regards the plans for the 2021-2030 period, in the preparation of the final plans well before their adoption - as well as of the long-term strategies referred to in Article 14. Member States shall [] attach to the submission of [] such documents to the Commission a summary of the public's views or provisional views. In so far as the provisions of Directive 2001/42/EC are applicable ³⁷, consultations undertaken on the draft in accordance with that Directive shall be deemed to satisfy also the obligations to consult the public under this Regulation.

³⁶ Explanatory note: Art. 6 (1) of Directive 2001/42/EC (SEA - Strategic Environmental Assessment Directive) on the assessment of the effects of certain plans and programmes on the environment requires consultations to be carried out on the *draft* plans or programmes. The Commission underlined that to the extent that a public consultation under Directive 2001/42/EC has taken place, the request for public consultation in the meaning of Article 10 is fulfilled.

³⁷ Explanatory note: Art. 6 (1) of Directive 2001/42/EC (SEA - Strategic Environmental Assessment Directive) on the assessment of the effects of certain plans and programmes on the environment requires consultations to be carried out on the draft plans or programmes. The Commission underlined that to the extent that a public consultation under Directive 2001/42/EC has taken place, the request for public consultation in the meaning of Article 10 is fulfilled.

AM 109 Article 10 – para 1 a (new) 1a. Member States shall set reasonable timeframes allowing sufficient time for the public to be informed and to prepare and participate effectively in the different stages of planning process. Member States shall take due account of equal participation and ensure that the public is informed, whether by public notices or other appropriate means, such as electronic media where available, of all practical arrangements related to their participation and that they can access all relevant documents.	1a. Member States shall set reasonable timeframes allowing sufficient time for the public to be informed, to participate and express its views. Member States shall ensure that the public is informed. Note: see also new compromise recital 20bis
AM 110 Article 10 – para 1 b (new) 1b. Member States shall include in the submission of their draft and final integrated national energy and climate plan and of their long-term strategies to the Commission a summary of the public's views and the way they have been taken into consideration.	Maintain Council GA (Accepted in part in first subparagraph above (in COM proposal and Council GA text)) Note: already broadly covered also in Annex I Part 1, Section A, 1.3
AM 111 Article 10 – para 1 c (new) 1c. In so far as the provisions of Directive 2001/42/EC are applicable, consultations undertaken in accordance with that Directive shall be deemed to satisfy also the obligations to consult the public under this Regulation. Those projections and assessments should include descriptions of the models and methodological approaches used, definitions and underlying assumptions.

Article 17

Integrated reporting on national adaptation actions, financial and technology support provided to developing countries, auctioning revenue

1. By 15 March 2021, and every two years thereafter, Member States shall report to the Commission information on their national climate change adaptation planning and strategies, outlining their implemented or planned actions to facilitate adaptation to climate change, including the information specified in Part 1 of Annex VI.

- 1. By 15 March 2021, and every two years thereafter, Member States shall report to the Commission information on their national climate change adaptation planning and strategies, outlining their implemented [] and planned actions to facilitate adaptation to climate change including the information specified in Part 1 of Annex VI [] in accordance with the reporting requirements agreed upon under the UNFCCC and the Paris Agreement.
- 1. By 15 March 2021, and every two years thereafter, Member States shall report to the Commission information on their national climate change adaptation planning and strategies, outlining their implemented [] and planned actions to facilitate adaptation to climate change including the information specified in Part 1 of Annex VI [] and in accordance with the reporting requirements agreed upon under the UNFCCC and the Paris Agreement.

 Note: text provisionally agreed at technical level

2. By 15 March 2021 and every year thereafter (year X), Member States shall report to the Commission information on:	2. By [] 31 July 2021 and every year thereafter (year X), Member States shall report to the Commission information on [] the use of revenues generated by the Member State by auctioning allowances pursuant to Article 10(1) and Article 3d(1) or (2) of Directive 2003/87/EC including the information specified in Part 3 of Annex VI. []	Note: text provisionally agreed at technical level
(a) support to developing countries, including the information specified in Part 2 of Annex VI;	2bis. by 30 September 2021 and every year thereafter (year X), Member States shall report to the Commission information on support to developing countries, including the information specified in Part 2 of Annex VI and in accordance with the relevant reporting requirements agreed upon under the UNFCCC and the Paris Agreement.	Note: text provisionally agreed at technical level
(b) the use of revenues generated by the Member State by auctioning allowances pursuant to Article 10(1) and Article 3d(1) or (2) of Directive 2003/87/EC including the information specified in Part 3 of Annex VI. 3. Member States shall make available to the public the reports submitted to the Commission pursuant to this Article.	3. Member States shall make available to the public the reports submitted to the Commission pursuant to this Article, with the exception of the information specified in Annex VI Part 2(b).	Note: the EP expressed concern on the text of the Council GA. The Presidency proposes to maintain the Council GA here and to insert a compromise text in Annex VI part 2 point (a).

4. The Commission shall adopt implementing acts to set out the structure, format and submission processes for Member States' reporting of information pursuant to this Article. Those implementing acts shall be adopted in accordance with the procedure referred to in Article 37(3).	4. The Commission, assisted by the Climate Change Committee referred to in Article 37(1)(b), shall adopt implementing acts to set out the structure, format and submission processes for Member States' reporting of information pursuant to this Article. Those implementing acts shall be adopted in accordance with the procedure referred to in Article 37(3).	4. The Commission, assisted by the Climate Change Committee referred to in Article 37(1)(a), shall adopt implementing acts to set out the structure, format and submission processes for Member States' reporting of information pursuant to this Article. Those implementing acts shall be adopted in accordance with the procedure referred to in Article 37(3).

Article 27

Response to insufficient ambition of integrated national energy and climate plans and insufficient progress towards the Union's energy and climate targets and objectives

AM 309

Article 27 – para -1 (new)

-1. If, on the basis of the assessment of the draft integrated national energy and climate plans pursuant to Article 9, the Commission concludes that Member States' targets are insufficient for the collective achievement of the Union's 2030 binding overall targets for renewable energy sources and energy efficiency, it may request Member States whose targets it deems to be insufficient to increase their level of ambition in order to ensure the relevant level of collective ambition.

If, on the basis of its assessment of the draft integrated national energy and climate plans pursuant to Article 9 or its assessment of the draft updates of the final plans pursuant to Article 13, the Commission concludes that the targets, objectives and contributions of the Member States are insufficient for the collective achievement of the Energy Union objectives and in particular, for the first ten-year period, for the Union's binding 2030 target for renewable energy, it may issue non-quantitative recommendations requesting [] **Member States whose contributions** it deems insufficient to increase their ambition in their draft integrated national energy and climate plans and their draft updates in order to ensure a sufficient level of collective ambition.

If, on the basis of its assessment of the draft integrated national energy and climate plans pursuant to Article 9 or its assessment of the draft updates of the final plans pursuant to Article 13, and as part of the iterative process, the Commission concludes that the targets, objectives and contributions of the Member States are insufficient for the collective achievement of the Energy Union objectives and in particular, for the first ten-year period, for the Union's binding 2030 target for renewable energy and the Union's 2030 target for energy efficiency, it shall - as regards the Union's target for renewable energy - and may - as regards the other Energy Union objectives - issue recommendations to Member States whose contributions it deems insufficient to increase their ambition [] in order to ensure a sufficient level of collective ambition.

AM 310

Article 27 – para -1 a (new) -1a. In the area of renewable energy, the Commission shall use the circumstances listed in Article 5(1) as the objective criteria for its assessment referred to in Article 12. Member States with a target below that resulting from applying the formula set out in Annex Ia shall increase their target accordingly.

In the area of renewable energy, the Commission shall use the relevant circumstances listed in Article 5 (1) (d) (i) - (v) as the objective criteria for its assessment, whilst having due regard to any relevant circumstances affecting renewable energy deployment as indicated by the Member State in accordance with Article 5(1)(d). The Commission, assisted by the Energy Union **Committee referred to in** Article 37(1)(a), shall adopt implementing acts to establish the relevant methodology in close consultation with Member **States based on these objective** criteria. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 37(3).

(Accepted in part, with changes, in Council GA text)

(1a) If a gap between the Union's 2030 target and the collective contributions of Member States occurs in the area of renewable energy, the Commission shall base its assessment on the formula set out in Annex Ia of this Regulation which is based on [] the objective criteria listed in Article 5(1)(d)(i) - (iv), whilst having due regard to relevant circumstances affecting renewable energy deployment as indicated by the Member State in accordance with Article 5(1)(d).

If a gap between the Union's 2030 target and the sum of the national targets occurs in the area of energy efficiency, the Commission shall evaluate notably the relevant circumstances listed in Article 6(2), information provided by Member States in their integrated national energy and climate plans, results from modelling exercises in relation to future trends in energy consumption and other complementary analysis as appropriate

Without prejudice to the other provisions of this Article, and for the sole purpose of assessing whether a gap between the Union's 2030 target and the collective contributions of Member States occurs, the Commission shall, in its assessment, assume [] a national contribution of the Member States which did not submit their draft integrated national energy and climate plans in accordance with Article 9(1) []. In its assumption, in the area of renewable energy, the Commission shall take into account the Member State's national binding target for 2020 [] as set out in Annex I of [RED], results from modeling exercises on renewable energy development and the results from

the formula set out in Annex Ia. In the area of energy efficiency, it shall take into account [] modelling exercises in relation to future trends in energy consumption and other complementary analysis as appropriate.

In its assessment of the renewable energy contributions, based on the formula set out in Annex Ia, the Commission shall take into consideration any potential negative impacts on the security of supply and grid stability in small or isolated energy systems or in Member States/systems where there may be significant implications due to the change of synchronous area.

In its assessment of the energy efficiency contributions, the Commission shall take into consideration the potential impact on electricity system operation and grid stability in Member States where there may be significant implications due to the change of synchronous area.

Article 27(1)

If, on the basis of its assessment of the integrated national energy and climate plans and their updates pursuant to Article 12, the Commission concludes that the targets, objectives and contributions of the national plans or their updates are insufficient for the collective achievement of the Energy Union objectives and, in particular, for the first ten-years period, for the Union's 2030 targets for renewable energy and energy efficiency, it shall take measures at Union level in order to ensure the collective achievement of those objectives and targets. With regard to renewable energy, such measures shall take into consideration the level of ambition of contributions to the Union's 2030 target by Member States set out in the national plans and their updates.

1. If, on the basis of its assessment of the integrated national energy and climate plans pursuant to Article 12, the Commission concludes that the targets *and* objectives of the national plans are insufficient, it shall take measures at Union level in order to ensure the achievement of those objectives and targets.

AM 176

With regard to renewable energy, without prejudice to other measures, Member States' national 2030 target shall be revised pursuant to Article 3(2) and Annex Ia to Directive (EU) .../... [RED recast] by 31 December 2020.

1bis. If, on the basis of its assessment of the integrated national energy and climate plans and their updates pursuant to Article 12, the Commission concludes that the targets, objectives and contributions of the national plans or their updates are insufficient for the collective achievement of the Energy Union objectives and, in particular, for the first ten-years period, for the Union's 2030 targets for renewable energy and energy efficiency, it shall propose [] measures and make use of relevant empowerments at Union level in order to ensure the collective achievement of those objectives and targets. With regard to renewable energy such measures shall take into consideration the level of ambition of contributions to the Union's 2030 target by Member States set out in the national plans and their updates.

Maintain Council GA

If, on the basis of its assessment pursuant to Article 25(1)(b), the Commission concludes that insufficient progress is made by a Member State towards meeting the targets, objectives and contributions or implementing the policies and measures set out in its integrated national climate and energy plan, it shall issue recommendations to the Member State concerned pursuant to Article 28. In issuing such recommendations, the Commission shall take into consideration ambitious early efforts by Member States to contribute to the Union's 2030 target for renewable energy.

AM 177

2. If on the basis of its assessment pursuant to Article 25(1)(b), the Commission concludes that insufficient progress is made by a Member State towards meeting *their trajectories*, targets *and* objectives or implementing the policies and measures set out its integrated national climate and energy plan, it shall issue recommendations to the Member State concerned pursuant to Article 28.

2. If, on the basis of its assessment pursuant to Article 25(1)(b), the Commission concludes that insufficient progress is made by a Member State towards meeting the targets, objectives and contributions or implementing the policies and measures set out in its integrated national climate and energy plan, it shall issue recommendations to the Member State concerned pursuant to Article 28

2. If, on the basis of its assessment pursuant to Article 25(1)(b), the Commission concludes that insufficient progress is made by a Member State towards meeting [their reference points for renewable energy,] their [] targets, objectives and contributions, their reference points for renewable energy, or in implementing the policies and measures set out in its integrated national climate and energy plan, it shall issue recommendations to the Member State concerned pursuant to Article 28.

2bis. In issuing the [] recommendations in the area of renewable energy, the Commission shall take into consideration the relevant circumstances as referred to in Article 5 (1) (d). The Commission shall also take into consideration renewable energy projects for which a final investment decision has been taken or that have been awarded support under the relevant support scheme, provided that these projects will become operational in the period 2021-2030 and will have a significant impact on a Member State's national contribution.

In issuing the [2bis.] recommendations in the area of renewable energy according to paragraph 2, the Commission shall take into consideration the relevant circumstances indicated by the Member State in accordance with [] Article 5 (1) (d). The Commission shall also take into consideration renewable energy projects for which a final investment decision has been taken [], provided that these projects will become operational in the period 2021-2030 and will have a significant impact on a Member State's national contribution).

indicated by the Member State in accordance with Article 6(2).
--

Article 27(3)

- If, on the basis of its aggregate assessment of Member States' integrated national energy and climate progress reports pursuant to Article 25(1)(a), and supported by other information sources, as appropriate, the Commission concludes that the Union is at risk of not meeting the objectives of the Energy Union and, in particular, for the first ten-years period, the targets of the Union's 2030 Framework for Climate and Energy, it may issue recommendations to all Member States pursuant to Article 28 to mitigate such risk. The Commission shall, as appropriate, take measures at Union level in addition to the recommendations in order to ensure, in particular, the achievement of the Union's 2030 targets for renewable energy and energy efficiency. With regard to renewable energy, such measures shall take into consideration ambitious early efforts by Member States to contribute to the Union's 2030 target.
- **AM 178** If, on the basis of its assessment of Member States' integrated national energy and climate progress reports or supported by other information sources, as appropriate, pursuant to Article 25 the Commission concludes that the Union is at risk of not meeting the objectives of the Energy Union and, in particular, for the first ten-years period, the targets of the Union's 2030 Framework for Climate and Energy, it shall issue recommendations to all Member States pursuant to Article 28 to mitigate such risk. In issuing such recommendations, the Commission shall take into consideration the Member State's level of ambition to the Union's 2030 targets. The Commission shall, as appropriate, take measures at Union level in addition to the recommendations in order to ensure in particular the achievement of the Union's 2030 targets for renewable energy and energy efficiency. Such measures shall take into consideration ambitious early efforts, in particular those from 2021 onwards by Member States to contribute to the Union's 2030 targets, the level of compliance by Member States with their national targets and trajectories as well as any contribution to the financial platform pursuant to paragraph 4(c).
- If, on the basis of its aggregate assessment of Member States' integrated national energy and climate progress reports pursuant to Article 25(1)(a), and supported by other information sources, as appropriate, the Commission concludes that the Union is at risk of not meeting the objectives of the Energy Union and, in particular, for the first ten-years period, the targets of the Union's 2030 Framework for Climate and Energy, it may issue recommendations to all Member States pursuant to Article 28 to mitigate such risk. The Commission shall, as appropriate, [] propose measures and make use of relevant **empowerments** at Union level in addition to the recommendations in order to ensure, in particular, the achievement of the Union's 2030 targets for renewable energy and energy efficiency. [] EU measures shall be taken only if the national measures foreseen in paragraph 4 are not sufficient to achieve the EU renewable energy targets.
- If, on the basis of its aggregate assessment of Member States' integrated national energy and climate progress reports pursuant to Article 25(1)(a), and supported by other information sources, as appropriate, the Commission concludes that the Union is at risk of not meeting the objectives of the Energy Union and, in particular, for the first ten-years period, the targets of the Union's 2030 Framework for Climate and Energy, it may issue recommendations to all Member States pursuant to Article 28 to mitigate such risk.
- In the area of renewable energy, the Commission shall [] assess if the national measures foreseen in paragraph 4 are sufficient to achieve the EU renewable energy targets and, [] in case of insufficient national measures, shall, as appropriate, [] propose measures and make use of relevant empowerments at Union level in addition to the recommendations in order to ensure, in particular, the achievement of the Union's 2030 target [] for renewable energy [and energy efficiency].

In the area of energy efficiency,

	the Commission shall as appropriate, propose measures and make use of relevant empowerments at Union level in addition to the recommendations in order to ensure, in particular, the achievement of the Union's 2030 target for renewable energy and energy efficiency. Note: the last sentence had to be split, in order to correct the confusion between energy efficiency and renewables.

Such measures shall take into account the Commission's considerations as set out in paragraph 2bis. Member States concerned shall present these measures as part of the progress report referred in Article 15.

The Commission shall, as appropriate, take measures at Unio	4)(d) (continued)	Maintain Council GA
level in addition to measures at national level in order to ensure the achievement of the Union's binding linear trajectory and the Union's 20 binding target for renewable energy	30	Note: already addressed in paragraph 3 first subparagraph "COM shall propose measures(etc.)"
If a Member State does not maintain the baseline share of energy from renewable sources in its gross final consumption of energy set out in Article 3(3) of [recast of Directive 2009/28/EC as proposed by COM(2016) 767] from 2021 onwards, the Member State concerned shall ensure that any gap to the baseline share is covered by making a financial contribution to the financing platform referred to in point (c) of the first subparagraph. For the purposes of this subparagraph and point (c) of the first subparagraph, Member States may use their revenues from annual emission allowances under Directive 2003/87/EC.	4bis. From 1 January 2021 onwards, the share of energy from renewable sources in each Member State's gross final consumption of energy shall not be lower than a baseline share [] that is equal to its mandatory national overall target for the share of energy from renewable sources in 2020 set out in Article 3(3) of [recast of Directive 2009/28/EC as proposed by COM(2016) 767]. If a Member State does not maintain its baseline share as measured over a one-year period, the Member State concerned shall take, within one year, additional measures such as those as set out in points (a) to (d) of paragraph 4 sufficient to cover the gap within two years. Member States fulfilling the obligation to cover the gap to the baseline [] shall be deemed to be in	4bis. From 1 January 2021 onwards, the share of energy from renewable sources in each Member State's gross final consumption of energy shall not be lower than a baseline share [] that is equal to its mandatory national overall target for the share of energy from renewable sources in 2020 set out in Article 3(3) of [recast of Directive 2009/28/EC as proposed by COM(2016) 767]. If a Member State does not maintain its baseline share as measured over a one-year period, the Member State concerned shall take, within one year, additional measures such as those as set out in points (a) to (d) of paragraph 4 sufficient to cover the gap within [] one year. Member States fulfilling the obligation to cover the gap to the baseline [] shall be deemed to be in

out in the first sentence of the first subparagraph of paragraph 4bis an in Article 3(3) of [recast of Directive 2009/28/EC as proposed by COM(2016) 767] throughout the period where the gap occurred. For the purposes of [] point (c) of the first subparagraph of paragraph 4,	
Member States may use their revenue from annual emission allowances under Directive 2003/87/EC.	
The financing mechanism referred to in point 4(c) of this Article shall tender support for new renewable energy project in or connected to the Union. Such project shall respect the relevant law in force in the hosting Member State. Member States shall retain the right to decide whether, and if so, under which conditions, they allow installations located on their territor to receive support from the financing mechanism. Support may be provided into alia in the form of a premium paid on top of market prices, and support shall be allocated to projects bidding for the lowes cost or premium. Every year, renewable energy generated by installations financed by the financing mechanism shall be statistically attributed to the participating Member States, reflecting their relative financial contribution.	y r

Article 27(4ter)			
			4ter. When a Member State's [] share of energy from renewable sources falls below one or more of its national reference points in 2022, 2025 and 2027 as referred to in Article 4(a)(2)(i), it shall include in the next integrated report to the Commission pursuant to Article 15 an explanation on how it will cover the gap compared to its national reference points.
The Commission is empowered to adopt delegated acts in accordance with Article 36 to set out any necessary provisions for the establishment and functioning of the financing platform referred to in point (c).		4ter. The Commission, assisted by the Energy Union Committee referred to in Article 37(1)(a), [] shall adopt implementing [] acts [] to set out [] the necessary provisions for the establishment and functioning of the financing mechanism [] referred to in point 4(c), in particular:	Note: replaced with new compromise Article 27bis below
		 the methodology for the calculation of the maximum level of the premium for each tender; the tender design to be applied, including conditions for delivery and 	
		associated penalties; - the methodology for calculating the financial contributions of Member States and the resulting (statistical) benefits for the contributing Member States ('distribution key'); - minimum requirements for	
		Member States' participation, having regard to the need to ensure both continuity of the mechanism by means of a sufficient duration of the

If the reference to paragraph "5" remains deleted, the sentence should be deleted either here or there.	
		(6) If, in the area of interconnections, the Commission concludes, based on its assessment pursuant to Article 25(1) and (4), in the year 2025 that progress is insufficient, the Commission shall cooperate with concerned Member States by the year 2026 aiming at addressing the circumstances encountered.	Note: EP accepts	

EU renewable energy financing mechanism

- 1. By 1 January 2021, the Commission shall establish the EU renewable energy financing mechanism referred to in paragraph 4(c) of Article 27 to tender support for new renewable energy projects in the Union with the aim of covering a gap to the indicative Union trajectory. Support may be provided inter alia in the form of a premium on top of market prices, and shall be allocated to projects bidding for the lowest cost or premium.
- 2. Without prejudice to paragraph 1, the financing mechanism shall contribute to the enabling framework pursuant to Article 3(4) of [recast of Directive 2009/28/EC as proposed by COM(2016) 767] with the aim of supporting renewable energy deployment across the Union irrespectively of a gap to the indicative Union trajectory. To this end:
 - i. payments from Member States referred to in Article 27 may be complemented by additional sources, such as Union funds, private sector contributions or additional payments by Member States in order to contribute to the achievement of the Union target.
 - ii. The financing mechanism may, inter alia, provide support in the form of low-interest loans, grants, or a mix of both and may support, inter alia, joint projects according to Article 9 and Member States' participation in joint projects according to Article 11 of [recast of Directive 2009/28/EC as proposed by COM(2016) 767].
- 3. Member States shall retain the right to decide whether, and if so, under which conditions, they allow installations located on their territory to receive support from the financing mechanism.
- 4. The Commission, assisted by the Energy Union Committee referred to in Article 37(1)(b) is empowered to adopt implementing acts in accordance with the examination procedure referred to in Article 37(3) [] to set out the necessary provisions for the establishment and functioning of the financing mechanism, in particular:
 - i. the methodology for the calculation of the maximum level of the premium for each tender;
 - ii. the tender design to be applied, including conditions for delivery and associated penalties;
 - iii. the methodology for the calculation of the payments of Member States and the resulting statistical benefits for the contributing Member States;
 - iv. minimum requirements for Member States' participation, having regard to the need to ensure both continuity of the mechanism by means of a sufficient duration of the Member State payment, as well as the maximum amount of flexibility for Member States' participation.
 - v. provisions ensuring the participation and/or approval of hosting Member States, and where necessary provisions relating to additional system cost charges.
- 5. Every year, renewable energy generated by installations financed by the financing mechanism shall be statistically attributed to the participating Member States, reflecting their relative payments. Projects supported by this financing mechanism that are financed by other sources than Member States payments shall not count towards Member States' national contributions but towards the EU binding target pursuant to Article 3(1) of [recast of Directive 2009/28/EC as proposed by COM(2016) 767]]

2. This Committee replaces the committee established by Article 8 of Decision 93/389/EEC, Article 9 of Decision 280/2004/EC and Article 26 of Regulation (EU) No 525/2013. References to the committee set up pursuant to those legal acts shall be	AM 203 2. Notwithstanding paragraph 1 of this Article, as regards the implementation of Articles 15, 17, 23, 31 and 32 of this Regulation, the Commission shall be assisted by the Climate Change Committee established by Article 26 of	2. The Climate Change Committee [] reinstates the committee established by Article 8 of Decision 93/389/EEC, Article 9 of Decision 280/2004/EC and Article 26 of Regulation (EU) No 525/2013. References to the committee set up	Note: see above
construed as references to the committee established by this Regulation.	Regulation (EU) No 525/2013.	pursuant to those legal acts shall be construed as references to the committee established by this Regulation.	

	2bis. The Committees shall hold joint meetings where the topic warrants this, to discuss common actions, ensure consistency of policies and aim at maximising synergies between sectors.	2bis. When a Committee referred to in paragraph 1 considers horizontal issues and common actions, it shall inform the other Committee referred to in paragraph 1 in order to ensure consistency of policies and to maximise synergies between sectors.
		2ter. Each Member State shall appoint its representative(s) for the Climate Change Committee and for the Energy Union Committee.
		The representative(s) of the Energy Union Committee shall be invited to the meetings of the Climate Change Committee, and vice-versa.
3. Where reference is made to this article, Article 5 of Regulation (EU)	 3. Where reference is made to this article, Article 5 of Regulation (EU)	3. Where reference is made to this article, Article 5 of Regulation (EU)
No 182/2011 shall apply.	No 182/2011 shall apply.	No 182/2011 shall apply.

Article 38 Review

The Commission shall report to the European Parliament and to the Council by 28 February 2026 and every five years thereafter on the operation of this Regulation, its contribution to the Governance of the Energy Union and the conformity of the planning, reporting and monitoring provisions of this Regulation with other Union legislation or future decisions relating to the UNFCCC and the Paris Agreement. The Commission may make proposals if appropriate.

AM 204

Within six months of the facilitative dialogue to be convened under the UNFCCC in 2018 to take stock of the collective efforts of Parties in relation to progress towards the global longterm goal, and within six months of the global stocktake in 2023 and subsequent global stocktakes thereafter. the Commission shall report to the European Parliament and to the Council on the operation and implementation of this Regulation, its contribution to the Governance of the Energy Union and the conformity of the planning, reporting and monitoring provisions of this Regulation with other Union legislation or future decisions relating to the UNFCCC and the adequacy of its contribution to the goals of Paris Agreement. The *reports shall be* accompanied by proposals to enhance the Union's climate and energy action as appropriate.

The Commission shall report to the European Parliament and to the Council by 28 February 2026 and every five years thereafter on the operation of this Regulation, its contribution to the Governance of the Energy Union and Climate Action, the progress towards the achievement of the 2030 climate and energy targets and additional Energy Union objectives, and the long-term objectives of the Paris Agreement. In addition the Commission shall report on [] the conformity of the planning, reporting and monitoring provisions of this Regulation with other Union legislation or future decisions relating to the UNFCCC and the Paris Agreement. The Commission may make proposals if appropriate.

The Commission shall report to the European Parliament and to the Council within six months of each global stocktake agreed under Article 14 of the Paris Agreement [] on the operation of this Regulation, its contribution to the Governance of the Energy Union [], its contribution to the long-term goals of the Paris Agreement, [] progress towards the achievement of the 2030 climate and energy targets, [] additional Energy Union objectives and the conformity of the planning, reporting and monitoring provisions of this Regulation with other Union legislation or future decisions relating to the UNFCCC and the Paris Agreement. The Commission may make proposals if appropriate.

AM 205 Article 38 – paragraph 1 a (new) Within six months after the Union submits a new or revised Nationally Determined Contribution (NDC) under the Paris Agreement, the Commission shall, as appropriate, submit the necessary legislative proposals to amend the relevant		Note: will be dropped by the EP as compromise for the withdrawal of para 2 by the Council.
Union legal acts.	The Commission shall examine the impact of any changes with regard to the change in the IPCC guidelines or UNFCCC methodologies used for National Greenhouse Gas Inventories that leads to a difference of more than 1% in a Member State's total greenhouse gas emissions relevant for [Article 4 of the ESR], and may revise Member States' annual emissions allocations as estimated according to [Article 4 of the ESR].	Note: will be dropped as compromise for the withdrawal of AM 205 by the EP.

If applicable, other objectives and targets, including sector targets and adaptation goals	ii. If applicable, other national objectives and targets consistent with existing long-term low emission strategies. If applicable, other objectives and targets, including sector targets []	Accepted in part with changes: ii. If applicable, other national objectives and targets consistent with the Paris Agreement and the existing long-term strategies. If applicable for the contribution to the overall Union commitment of reducing the greenhouse gas emmissions, other objectives and targets, including sector targets and adaptation goals, if available.
2.1.2. Renewable energy (2030 Framework target)		2.1.2. Renewable energy []	
i. The Member State's planned share of energy from renewable sources in gross final consumption of energy in 2030 as its national contribution to achieve the binding EU-level target of at least 27% in 2030	i. The Member State's <i>national</i> target for energy from renewable sources in gross final consumption of energy in 2030	i. The elements set out in Article 4(a)(2) []	Maintain Council GA
ii. A linear trajectory for the overall share of renewable energy in gross final energy consumption from 2021 to 2030		[]	
iii. Trajectories for the sectorial share of renewable energy in final energy consumption from 2021 to 2030 in the electricity, heating and cooling, and transport sectors	AM 221 iii. The Member State's trajectories for the sectorial share of renewable energy in final energy consumption from 2021 to 2030 in the electricity, heating and cooling, and transport (disaggregated between road, rail and air) sector	iii. Estimated trajectories [] for the sectorial share of renewable energy in final energy consumption from 2021 to 2030 in the electricity, heating and cooling, and transport sectors	Maintain Council GA

Annex I Part I Section A Part 2.1.2 (continued)

- iv. Trajectories by renewable energy technology that the Member State projects to use to achieve the overall and sectorial trajectories for renewable energy from 2021 to 2030 including expected total gross final energy consumption per technology and sector in Mtoe and total planned installed capacity (divided by new capacity and repowering) per technology and sector in MW
- AM 222
 iv. Trajectories by renewable energy technology that the Member State projects to use to achieve the overall and sectorial trajectories for renewable energy from 2021 to 2030 including expected total gross final energy consumption per technology and sector in Mtoe and total *net* planned installed capacity (divided by new capacity and repowering) per technology and sector in MW
- iv. [] assessed contributions [] by renewable energy technology that the Member State projects to use to achieve the overall and sectorial trajectories for renewable energy from 2021 to 2030 including expected total gross final energy consumption per technology and sector in Mtoe and total planned installed capacity (divided by new capacity and repowering) per technology and sector in MW
- iv. estimated trajectories [] by renewable energy technology that the Member State projects to use to achieve the overall and sectorial trajectories for renewable energy from 2021 to 2030 including expected total gross final energy consumption per technology and sector in Mtoe and total planned installed capacity (divided by new capacity and repowering) per technology and sector in MW

- v. Trajectories on bioenergy demand, disaggregated between heat, electricity and transport, and on biomass supply, by feedstocks and origin (distinguishing between domestic production and imports). For forest biomass, an assessment of its source and impact on the LULUCF sink
- AM 223
 v. *The Member State's* trajectories on bioenergy demand, disaggregated between heat, electricity and transport, and on biomass supply by feedstocks, domestic production vs imports. For forest biomass, an assessment of its source and impact on the LULUCF sink
- v. [] If available, estimated trajectories on bioenergy demand, disaggregated between heat, electricity and transport, and on biomass supply, by feedstocks and origin (distinguishing between domestic production and imports). For forest biomass, an assessment of its source and impact on the LULUCF sink, if available.
- Note: aligned with Art. 18(3)

 v. [] Estimated trajectories on bioenergy demand, disaggregated between heat, electricity and transport, and on biomass supply, by feedstocks and origin (distinguishing between domestic production and imports). For forest biomass, an assessment of its source and impact on the LULUCF sink []

	AM 224 Annex I – part 1 – section A – para 2 – point 2.1 – point 2.1.2 – point v a (new) va. The Member State's share of as well as trajectories and objectives for energy from renewable sources produced by cities, energy communities and self-consumers in 2030 and renewable energy trajectories from 2021 to 2030 including expected total gross final energy consumption	Maintain Council GA (cf. AM 71) Note: see (vi) below ('cities, energy communities and self-consumers') Note: EP maintains its amendment
vi. If applicable, other national trajectories and objectives, including long-term or sectorial ones (e.g. share of advanced biofuels, share of renewable energy in district heating, renewable energy use in buildings, renewable energy produced by cities, energy communities and self-consumers)	AM 225 vi. If applicable, other national trajectories and objectives, including long-term or sectorial ones (e.g. share of renewable energy in district heating, renewable energy use in buildings, energy recovered from the sludge acquired through the treatment of wastewater)	vi. If applicable [], other national trajectories and objectives, including long-term or sectorial ones (e.g. [], share of renewable energy in district heating, renewable energy use in buildings, renewable energy produced by cities, energy communities and self-consumers, energy recovered from the sludge acquired through the treatment of wastewater) (cf. AM 132)

Annex I Part I Section A Part 2.2				
2.2. Dimension Energy efficiency		2.2.	Dimension Energy efficiency [
(2030 Framework target)]		
i. The indicative national energy efficiency contribution to achieving the Union's binding energy efficiency target of 30% in 2030 as referred to in Article 1(1) and Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], based on either primary or final energy consumption, primary or final energy savings, or energy intensity; expressed in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that contribution from 2021 onwards; including the underlying methodology and the conversion factors used	i. The Member State's binding target for energy efficiency in 2030 as referred to in Article 1(1), Article 3(4) of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761], expressed in terms of absolute level of primary energy consumption and final energy consumption in 2020 and 2030, with a linear trajectory for that target from 2021 onwards; including the underlying methodology and the conversion factors used	i. Tl 4(b)	ne elements set out in Article	Maintain Council GA
ii. Cumulative amount of energy savings to be achieved over the period 2021-2030 under Article 7 on energy saving obligations of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761],	ii. Cumulative amount of additional energy savings to be achieved over the period 2021-2030 and following periods under Article 7 on energy saving obligations of Directive 2012/27/EU [version as amended in accordance with proposal COM(2016)761],	[]		Maintain Council GA To be negotiated in EED

iii. Objectives for the long-term renovation of the national stock of residential and commercial buildings (both public and private)	iii. Objectives for 2030 and 2040 for the long-term renovation of the national stock of residential and non-residential buildings (both public and private), in line with the 2050 goal of a nearly zero energy and decarbonised building stock		(iii) The indicative milestones for 2030, 2040 and 2050, the domestically established measurable progress indicators and their contributions to the Union's energy efficiency targets as included in the roadmaps set out in the long-term renovation strategies for the national stock of residential and non-residential buildings, both public and private, in accordance with Article 2a of Directive 2010/31/EU on the Energy Performance of Buildings [as amended by Directive 2018/844/EU]
iv. The total floor area to be renovated or equivalent annual energy savings to be achieved from 2021 to 2030 under Article 5 on the exemplary role of public bodies' buildings of Directive 2012/27/EU,	AM 229 iv. The total floor area to be renovated <i>and corresponding energy savings</i> or equivalent annual energy savings to be achieved from 2021 to 2030 under Article 5 on the exemplary role of public bodies' buildings of Directive 2012/27/EU	[]	Maintain Council GA
v. If applicable, other national objectives, including long-term targets or strategies and sectorial targets. National objectives in areas such as energy efficiency in the transport sector and with regard to heating and cooling		v. If applicable, other national objectives, including long-term targets or strategies and sectorial targets, and national objectives in areas such as energy efficiency in the transport sector and with regard to heating and cooling	

Annex I Part I Section A Part 2.3			
2.3. Dimension Energy security		2.3. Dimension Energy security	
i. National objectives with regard to increasing the diversification of energy sources and supply from third countries, storage and demand response	i. National objectives with regard to increasing the diversification of energy sources and supply from third countries, <i>the uptake of energy savings measures</i> , storage and demand response	i. The elements set out in Article 4(c) []	Maintain Council GA
		i bis. Where appropriate, national objectives with regard to increasing: the diversification of energy sources and supply from third countries; storage; and demand response;	cf. AM 80 i bis. [] National objectives with regard to increasing: the diversification of energy sources and supply from third countries; []*), for the purpose of increasing the resilience of regional and national energy systems;
			Note: "storage and demand response" moved to (iv) below at EP request.
ii. National objectives with regard to reducing energy import dependency from third countries	ii. National objectives with regard to reducing energy import dependency dependency from fossil fuels (oil, coal and gas) and, if applicable, other fuels from third countries	ii. If applicable, national objectives with regard to reducing energy import dependency from third countries	ii. If applicable, national objectives with regard to reducing energy import dependency from third countries, for the purpose of increasing the resilience of regional and national energy systems;

iii. National objectives with regard to readiness to cope with constrained or interrupted supply of an energy source (including gas and electricity) and, where appropriate, a timeframe for when the objectives shall be met ⁴⁶		iii. []	
iv. National objectives with regard to deployment of domestic energy sources (notably renewable energy)	iv. National objectives with regard to increasing the flexibility of the national energy system	iv. If applicable, national objectives with regard to deployment of national domestic energy sources []	iv. [] National objectives with regard to increasing the flexibility of the national energy system, in particular by means of deploying [][] domestic energy sources, demand response and energy storage. Note: aligned with Art. 20(d) Note: demand response and storage moved from (i bis) above at EP request.
2.4. Dimension Internal energy market		2.4. Dimension Internal energy market	•
2.4.1. Electricity interconnectivity (2030 Framework target)		2.4.1. Electricity interconnectivity []	
i. The level of electricity interconnectivity that the Member State aims for in 2030 in relation to the October 2014 European Council objective	AM 233 i. The level of electricity interconnectivity that the Member State aims for in 2030 of at least 15 %, taking into account the 2020 interconnection target of 10 %	i. The element set out in Article 4(d)	i. The level of electricity interconnectivity that the Member State aims for in 2030 in consideration of the electricity interconnection target for 2030 of at least 15%, with a strategy with the level from 2021 onwards defined in

⁴⁶ Consistency shall be ensured with the preventive action and emergency plans under Regulation [as proposed by COM(2016) 52] concerning measures to safeguard the security of gas supply and repealing Regulation (EU) No 994/2010, as well as the risk preparedness plans under Regulation [as proposed by COM(2016) 862] on risk-preparedness in the electricity sector and repealing Directive 2005/89/EC.

	close cooperation with affected Member States, taking into account the 2020 interconnection target of 10% and the following indicators of the urgency of action:
	(1) Price differential in the wholesale market exceeding an indicative threshold of 2€/MWh between Member States, regions or bidding zones; (2) Nominal transmission capacity of interconnectors below 30% of their peak load; (3) Nominal transmission capacity of interconnectors below 30% of installed renewable generation.
	Each new interconnector shall be subject to a socioeconomic and environmental cost-benefit analysis and implemented only if the potential benefits outweigh the costs;

Annex I Part I Section A Part 2.4.2.				
2.4.2. Energy transmission infrastructure		2.4.2. Energy transmission infrastructure		
i. Key national objectives for electricity and gas transmission infrastructure that are necessary for the achievement of objectives and targets under any of the dimensions of the Energy Union strategy	i. Key national objectives for electricity and gas transmission <i>and distribution</i> infrastructure <i>and its modernisation</i> that are necessary for the achievement of objectives and targets under any of the dimensions of the Energy Union <i>listed in point 2</i>	i. Key [] electricity and gas transmission infrastructure projects that are necessary for the achievement of objectives and targets []	i. Key [] electricity and gas transmission [[and distribution]] infrastructure projects, and, where relevant, modernisation projects, that are necessary for the achievement of objectives and targets under the five dimensions of the Energy Union Strategy.*) [] *) Note: aligned with Art. 4(d)(2)	
ii. If applicable, main infrastructure projects envisaged other than Projects of Common Interest (PCIs) ⁴⁷		ii. If applicable, main infrastructure projects envisaged other than Projects of Common Interest (PCIs)		

⁴⁷

In accordance with Regulation (EU) No 347/2013 of the European Parliament and of the Council of 17 April 2013 on guidelines for trans-European energy infrastructure and repealing Decision No 1364/2006/EC and amending Regulations (EC) No 713/2009, (EC) No 714/2009 and (EC) No 715/2009 (OJ L 115, 25.4.2013, p. 39).

Annex I Part I Section A Part 2.4.3			
2.4.3. Market integration		2.4.3. Market integration	
i. National objectives related to other aspects of the internal energy market such as market integration and coupling, including a timeframe for when the objectives shall be met	i. National objectives related to other aspects of the internal energy market such as increasing system flexibility, market integration and coupling, smart grids, aggregation, demand response, storage, distributed generation, mechanisms for dispatching, re-dispatching and curtailment, real-time price signals, including a timeframe for when the objectives should be met;	i. National objectives related to other aspects of the internal energy market such as market integration and coupling, including a timeframe for when the objectives shall be met	i. National objectives related to other aspects of the internal energy market such as <i>increasing system</i> flexibility, in particular related to [the promotion of competitively determined electricity prices in line with relevant sectoral legislation]*), market integration and coupling, aimed at increasing the tradeable capacity of existing interconnectors, smart grids, aggregation, demand response, storage, distributed generation, mechanisms for dispatching, redispatching and curtailment, and real-time price signals [], including a timeframe for when the objectives shall be met; *) Note: drafting to be aligned with Art. 4(d)(3); Council aims not to prejudge the outcome of discussions in the context of the Electricity Market Design. ⁶³ See Part 2 for a detailed list of parameters and variables to be reported in Section B of the Plan.

Current situation shall reflect the date of submission of the national plan (or latest available date). Existing policies and measures encompass implemented and adopted policies and measures. Adopted policies and measures are those for which an official government decision has been made by the date of submission of the national plan and there is a clear commitment to proceed with implementation. Implemented policies and measures are those for which one or more of the following applies at the date of submission of the national plan or progress report: directly applicable European legislation or national legislation is in force, one or more voluntary agreements have been established, financial resources have been allocated, human resources have been mobilised.

The selection of exogenous factors may be based on the assumptions made in the EU Reference Scenario 2016 or other subsequent policy scenarios for the same variables. Besides, Member States specific results of the EU Reference Scenario 2016 as well as results of subsequent policy scenarios may also be a useful source of information when developing national projections with existing policies and measures and impact assessments.

For the plan covering the period from 2021 to 2030: for each parameter/variable in the list, trends over the years 2005-2040 (2005-2050 where appropriate) including for the year 2030 in five year intervals shall be reported both in section 4 and 5. Parameter based on exogenous assumptions vs. modelling output shall be indicated.

As far as possible, reported data and projections shall build on and be consistent with EUROSTAT data and methodology used for reporting European statistics in respective sectorial legislations, as European statistics are the primary source of statistical data used for reporting and monitoring, in accordance with Regulation (EC) No 223/2009 on European statistics.

Note: all projections are to be performed on the basis of constant prices (2016 prices used as base year)

The Commission will provide recommendations for key parameters for projections, at least covering oil, gas, and coal import prices as well as EU ETS carbon prices.

Annex I a (new)	
Annex Ia	
NATIONAL TRAJECTORIES FOR	
THE SHARE OF ENERGY FROM	
RENEWABLE SOURCES IN	
GROSS FINAL CONSUMPTION OF	
ENERGY BETWEEN 2020 AND	
2030	
The trajectory referred to in the	
second subparagraph of Article	
4(a)(2) shall consist of the following	
reference points:	
S2020 + 0.20 (S2030 – S2020), as an	
average for the period 2021 to 2022;	
S2020 + 0.45 (S2030 – S2020), as an	
average for the period 2023 to 2025;	
and	
S2020 + 0.70 (S2030 – S2020), as an	
average for the period 2025 to 2027;	
where:	
S2020 = the target for that Member	
State in 2020 pursuant to Article 3	
and Annex I - part A of Directive/	
[recast of Directive 2009/28/EC as	
proposed by COM(2016)767]	
and	
S2030 = the target for that Member	
State in 2030.	

⁸¹ In order to be able to achieve the national objectives set out in this Annex, it is underlined that the State aid guidelines for environmental protection recognise the continued need for national mechanisms of support for the promotion of energy from renewable sources.

ANNEX II

NOTIFICATION OF MEMBER STATES' MEASURES AND METHODOLOGIES TO IMPLEMENT ARTICLE 7 OF DIRECTIVE 2012/27/EU [VERSION AS AMENDED IN ACCORDANCE WITH PROPOSAL COM(2016)761]

A Member State may request derogation from point c to apply a different methodology than specified in Part 3 of this Annex if the methodology improvement required could not be achieved in time for the improvement to be taken into account in the greenhouse gas inventories of the period from 2021 to 2030, or the cost of the methodology improvement would be disproportionately high compared to the benefits of applying such methodology to improve accounting for emissions and removals due to the low significance of the emissions and removals from the carbon pools concerned. Member States wishing to benefit from the derogation shall submit a reasoned request to the Commission by 31 December 2020, indicating the timeline by when the methodology improvement could be implemented and/or the alternative methodology proposed, and an assessment of the potential impacts on the accuracy of accounting. The Commission may request additional information to be submitted within a reasonable time period specified. Where the Commission considers that the request is justified, it shall grant the derogation. If the request is rejected, the Commission shall give reasons for its decision.
