ANNEX

ANNEX

to the

COMMISSION REGULATION (EU) .../...

**on reference points for action for non-allowed pharmacologically active substances
present in food of animal origin and repealing Decision 2005/34/EC.**

ANNEX

Reference points for action (RPA)

Substance	RPA (µg/kg)	Other provisions
Chloramphenicol	0.15	
Malachite green	0.5	0.5 µg/kg for the sum of malachite green and leucomalachite green
Nitrofurans and their metabolites	0.5 ¹	0.5 µg/kg for each of the metabolites of furazolidone (AOZ or 3-amino-2-oxazolidinone), furaltadone (AMTZ or 3-amino-5-methylmorpholino-2-oxazolidinone), nitrofurantoin (AHD or 1-aminohydantoin), nitrofurazone (SEM or semicarbazide) and nifursol (DNSH or 3,5-dinitrosalicylic acid hydrazide)

¹ Due to the natural occurrence of SEM in crayfish at levels above the RPA, only levels of AOZ, AMTZ, AHD and DNSH above the RPA are a clear indication of the illegal use of nitrofurans and their metabolites. The RPA of 0.5 µg/kg for SEM in crayfish shall only be applied, when the illegal use of nitrofurazone on crayfish has been established.
