#### **INFORMATION NOTE**

---

From:	General Secretariat of the Council
To:	Permanent Representatives Committee/Council
Subject:	Proposal for a Directive of the European Parliament and of the Council on the approximation of the laws, regulations and administrative provisions of the Member States as regards the accessibility requirements for products and services – Outcome of the European Parliament's proceedings (Strasbourg, 11 to 14 September 2017)

---

#### **I. INTRODUCTION**

The Rapporteur, Morten LØKKEGAARD (ALDE, DK), presented a report consisting of 221 amendments (amendments 1-221) to the proposal for a Directive, on behalf of the Committee on Internal Market and Consumer Protection. For the plenary, a further 141 amendments (amendments 222-362) were tabled.

## **II. VOTE**

When it voted on 14 September 2017, the plenary adopted a large number of amendments, the text of which is annexed to this note.

At the end of the vote, the proposal was referred back to the Committee on Internal Market and Consumer Protection, pursuant to Rule 59(4)(4) of the European Parliament's Rules of Procedure, thereby not bringing the Parliament's first reading to a close and opening the possibility for interinstitutional negotiations with the Council.

(2) The demand for accessible products and services is high and the number of **citizens** with disabilities **and/or functional limitations** will increase significantly with the ageing of the **European** Union's population. An environment where products and services are more accessible allows for a more inclusive society and facilitates independent living.

##### *Amendment*

(2) The demand for accessible products and services is high and the number of **persons with functional limitations, including persons** with disabilities **within the meaning of Article 1 of the United Nations Convention on the Rights of Persons with Disabilities (“the Convention”)**, will increase significantly with the ageing of the Union's population. An environment where products and services are more accessible allows for a more inclusive society and **is a prerequisite** for independent living.

##### *Amendment*

**(2a) “Universal accessibility”, “design for all” and “gender-perspective” should be ensured in products, tools, devices and services in order for them to be commonly used by persons with disabilities.**

## Amendment 5

### Proposal for a directive Recital 3

#### *Text proposed by the Commission*

(3) The disparities between the laws and administrative measures adopted by the Member States in relation to accessibility of products and services for persons with functional limitations including persons with disabilities create barriers to ***the*** free movement ***of such products and services*** and distort effective competition in the internal market. Economic operators, in particular small and medium-sized enterprises (SMEs), are particularly affected by those barriers.

#### *Amendment*

(3) The disparities between the laws and administrative measures adopted by the Member States in relation to ***the*** accessibility of ***some*** products and services for persons with functional limitations, including persons with disabilities, create barriers to ***their*** free movement and distort effective competition in the internal market. ***For other products, disparities are likely to increase due to the entry into force of the Convention.*** Economic operators, in particular small and medium-sized enterprises (SMEs), are particularly affected by those barriers.

## Amendment 6

### Proposal for a directive Recital 5

#### *Text proposed by the Commission*

(5) Consumers of accessible products and recipients of accessible services are faced with high prices due to limited competition among suppliers. Fragmentation among national regulations reduces potential benefits from sharing experiences with national and international peers in responding to societal and technological developments.

#### *Amendment*

(5) Consumers of accessible products, ***and in particular of assistive technologies,*** and recipients of accessible services are faced with high prices due to limited competition among suppliers. Fragmentation among national regulations reduces potential benefits from sharing experiences with national and international peers in responding to societal and technological developments.

## Recital 6

### *Text proposed by the Commission*

(6) The approximation of national measures at Union level is therefore necessary for the proper functioning of the internal market in order to put an end to fragmentation in the market of accessible products and services, to create economies of scale, to facilitate cross-border trade and ***mobility***, as well as to help economic operators to concentrate resources on innovation instead of using those resources for ***complying with*** fragmented ***legal requirements across the Union***.

### *Amendment*

(6) The approximation of national measures at Union level is therefore necessary for the proper functioning of the internal market in order to put an end to fragmentation in the market of accessible products and services, to create economies of scale, to facilitate cross-border trade, ***freedom of movement of products and services, and free movement of persons, including persons with disabilities***, as well as to help economic operators to concentrate resources on innovation instead of using those resources for ***covering expenses arising from*** fragmented ***legislation***.

## Amendment 8

### Proposal for a directive Recital 8 a (new)

### *Text proposed by the Commission*

### *Amendment*

***(8a) Article 10 of the Treaty on the Functioning of the European Union (TFEU) requires the Union to combat discrimination based on disability when defining and implementing its policies and activities. Article 19 TFEU gives the Union the power to adopt legal acts to combat such discrimination.***

## Amendment 9

### Proposal for a directive Recital 9

*Text proposed by the Commission*

(9) This Directive respects the fundamental rights and observes the principles recognised in particular by the Charter of Fundamental Rights of the European Union. In particular, this Directive seeks to ensure full respect for the rights of persons with disabilities to benefit from measures designed to ensure their independence, social and occupational integration and participation in the life of the community and to promote the application of *Article* 26 of the Charter of Fundamental Rights of the European Union.

*Amendment*

(9) This Directive respects the fundamental rights and observes the principles recognised in particular by the Charter of Fundamental Rights of the European Union. In particular, this Directive seeks to ensure full respect for the rights of persons with disabilities, ***and older persons***, to benefit from measures designed to ensure their independence, social and occupational integration and participation in the life of the community and to promote the application of ***Articles 21, 25 and*** 26 of the Charter of Fundamental Rights of the European Union.

**Amendment 250**  
**Proposal for a directive**  
**Recital 9 a (new)**

*Text proposed by the Commission*

*Amendment*

***(9a) Better accessibility to products and services will improve the lives not only of persons with disabilities but also of persons with other permanent or temporary functional limitations, such as elderly persons, pregnant women and persons travelling with luggage. Therefore, it is essential that this Directive includes persons with disabilities as well as persons with temporary or permanent functional limitations, in order to ensure genuine benefits and an independent life for a wider portion of society.***

**Amendment 11**  
**Proposal for a directive**  
**Recital 9 b (new)**

***(9b) The prevalence of disability in the Union is higher among women than among men. Women with disabilities are faced with multiple forms of discrimination and face substantial obstacles to the proper enjoyment of their basic rights and freedoms. These include physical, emotional, sexual, economic and institutional violence. They also include discrimination in access to education and employment, which can lead to social isolation and psychological trauma. Women are also disproportionately affected by disability as carers of family members with disabilities and experience discrimination by association more frequently than men. In view of the above, action is needed to ensure equal treatment and positive measures and policies for women with disabilities and mothers of children with disabilities is a fundamental human right and an ethical obligation.***

## **Amendment 12**

### **Proposal for a directive Recital 10**

(10) The overall aim of the 'Digital Single Market Strategy', is to deliver sustainable economic and social benefits from a connected digital single market. Union consumers still do not enjoy the full benefits of prices and choice that the single market can offer, because cross-border online transactions are still very limited. Fragmentation also limits demand for cross-border e-commerce transactions.

(10) The overall aim of the 'Digital Single Market Strategy', is to deliver sustainable economic and social benefits from a connected digital single market, ***facilitating trade and promoting employment within the Union.*** Union consumers still do not enjoy the full benefits of prices and choice that the single market can offer, because cross-border online transactions are still very limited.

There is also a need for concerted action to make sure that new electronic content is also fully available to persons with disabilities. It is therefore necessary to harmonise accessibility requirements across the digital single market and to ensure that all Union citizens regardless of their abilities can enjoy its benefits.

Fragmentation also limits demand for cross-border e-commerce transactions. That training should cover issues such as information provision, advice and advertising.***

## Amendment 21

### Proposal for a directive Recital 18

#### *Text proposed by the Commission*

(18) It is necessary to introduce the accessibility requirements in the least burdensome manner for the economic operators and the Member States, notably by only including in the scope the products and services which have been thoroughly selected.

#### *Amendment*

(18) ***On the one hand***, it is necessary to introduce the accessibility requirements in the ***most effective and*** least burdensome manner for the economic operators and the Member States, notably by only including in the scope the products and services which have been thoroughly selected ***and which are placed on the market after the date of application of this Directive. On the other hand, it is necessary to enable economic operators to implement the accessibility requirements set out in this Directive efficiently, in particular by taking into account the lifetime of self-service terminals, ticketing machines and check-in machines. Also, the specific position of SMEs in the internal market should be taken into account. Additionally, microenterprises, due to their size, resources and nature, should not be required to comply with the accessibility requirements set out in this Directive or be obliged to use the procedure laid down in Article 12 in order to be exempted from the obligations of this Directive.***

*Amendment*

*(24b) It is not, however, appropriate for this Directive to change the compulsory or voluntary nature of the provisions in those other legislative acts of the Union such as Article 67 of Directive 2014/24/EU on contract award criteria, which contracting authorities can use to determine the most economically advantageous tender. If they are deemed to be linked to the subject matter of the procurement in question, it is possible for potential social aspects to be included. This Directive should therefore ensure that, when accessibility requirements are used in accordance with those other legislative acts of the Union, those requirements are the same across the Union.*

### **Proposal for a directive Recital 25**

*Text proposed by the Commission*

(25) Accessibility should be achieved by the removal and prevention of barriers, preferably through a universal design or "design for all" approach. Accessibility should not exclude the provision of reasonable accommodation when requested by national or Union law.

*Amendment*

(25) Accessibility should be achieved by the removal and prevention of barriers, preferably through a universal design or "design for all" approach. ***According to the Convention, that approach "means the design of products, environments, programmes and services to be usable by all people, to the greatest extent possible, without the need for adaptation or specialized design". In line with the Convention, "'Universal design' is not to exclude assistive devices for particular groups of persons with disabilities where this is needed"***. *Amendment*

**(40) *In the absence of harmonised standards and where needed for market harmonisation purposes, the Commission should be able adopt implementing acts establishing common technical specifications for the accessibility requirements set in this Directive.***

**(40) *European standards should be market-driven, take into account the public interest, as well as the policy objectives clearly stated in the Commission's request to one or more European standardisation organisations to draft harmonised standards, and be based on consensus. Recourse to technical specifications should therefore only be a last resort. The Commission should be able to adopt technical specifications for instance when the standardisation process is blocked due to a lack of consensus between stakeholders, creating undue delays in the establishment of a requirement which would, without the adoption of an appropriate standard, be impossible to implement, such as interoperability. The Commission should leave enough time between the adoption of a request to one or more European standardisation organisations to draft harmonised standards and the adoption of a technical specification related to the same accessibility requirement. The Commission should not be allowed to adopt a technical specification if it has not previously tried to have the accessibility requirements covered through the European standardisation system. The Commission should not use the procedure for adoption of technical specifications to circumvent the European standardisation system.***

*concerning the identification of economic operators and the criteria to be used when assessing whether compliance with an obligation under this Directive would impose a disproportionate burden, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission to define the period during which economic operators have to be able to identify any economic operator who has supplied them with a product or to whom they have supplied a product and to further specify the criteria that are to be taken into account for all products and services covered by this Directive when assessing whether the burden is to be considered disproportionate, without modifying those criteria. That period should be specified in proportion to the life cycle of the product. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making<sup>1a</sup>. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.*

***(a) Usage without vision***

***Where the product provides visual modes of operation, it shall provide at least one***

*mode of operation that does not require vision.*

**(b) Usage with limited vision**

*Where the product provides visual modes of operation, it shall provide at least one mode of operation that enables users to operate the product with limited vision; which can be achieved for instance via features related to flexible contrast and brightness, flexible magnification without loss of content or functionalities, flexible ways to separate and control foreground from background visual elements and flexible control over the field of vision required.*

**(c) Usage without perception of colour**

*Where the product provides visual modes of operation, it shall provide at least one mode of operation that does not require user perception of colour.*

**(d) Usage without hearing**

*Where the product provides auditory modes of operation, it shall provide at least one mode of operation that does not require hearing.*

**(e) Usage with limited hearing**

*Where the product provides auditory modes of operation, it shall provide at least one mode of operation with enhanced audio features; which can be achieved for instance for user control of volume and flexible ways to separate and control foreground from background sound where voice and background are available as separate audio streams.*

**(f) Usage without vocal capability**

*Where the product requires vocal input from users, it shall provide at least one mode of operation that does not require them to generate vocal output. Vocal output includes any orally-generated sounds like speech, whistles or clicks.*

**(g) Usage with limited manipulation or strength**

*Where the product requires manual*

*actions, it shall provide at least one mode of operation that enables users to make use of the product through alternative actions not requiring fine motor control and manipulation, hand strength or operation of more than one control at the same time.*

**(h) Usage with limited reach**

*Where the products are freestanding or installed, the operational elements shall be within reach of all users.*

**(i) Minimising the risk of triggering photosensitive seizures**

*Where the product provides visual modes of operation, it shall avoid modes of operation that are known to trigger photosensitive seizures.*

**(j) Usage with limited cognition**

*The product shall provide at least one mode of operation incorporating features that make it simpler and easier to use.*

**(k) Privacy**

*Where the product incorporates features that are provided for accessibility, it shall provide at least one mode of operation that maintains privacy when using those product features that are provided for accessibility.*
