Annex 9

Detailed mapping of Existing Emergency Instruments and Responses

Emergency instrument/measure	Status	Responsible DGs/bodies	Main features of possible use for SMEI	Crisis Definition	Triggering and De-triggering	(Non-)Regulatory Instruments
COORDINATION AND INFORMATION EXCHANGE						
1 Integrated Political Crisis Response (IPCR) Mechanism	Council Implementing Decision Existing mechanism	Council	<p>The integrated political crisis response (IPCR) arrangements support rapid and coordinated decision-making at EU political level for major and complex crises, including acts of terrorism. Through this mechanism, the presidency of the Council coordinates the political response to the crisis by bringing together EU institutions, affected member states and other key actors.</p> <p>Why IPCR is not sufficient for SM crisis impacts (governance, coordination and response)</p> <ul style="list-style-type: none"> - It does not allow for technical level discussion, analysis and fact-finding, needs to be requested to intervene by any Member State concerned 	<p>Crisis: Article 3(a)*: “‘Crisis’ means a situation of such a wide-ranging impact or political significance, that it requires timely policy coordination and response at Union political level”.</p> <p>2 Cumulative Elements:</p> <p>1) Wide-ranging impact or political significance + 2) Requirement of timely policy coordination & response at Union level</p>	<p>Two Modes: (Article 2(1)(2),(b))*:</p> <ul style="list-style-type: none"> • Information sharing mode (pre-stage) to establish the situation & prepare for possible full activation • Full activation mode to prepare response measures <p>Activation: (Article 4)*:</p> <ul style="list-style-type: none"> • Article 4(1)*: Presidency takes IPCR activation decision (initiative by Member States possible) • Article 4(2)*: Triggering upon invocation of solidarity clause (Article 222 TFEU) – still formal adoption by Presidency • Article 4(5)*: “The decision to activate the IPCR in <u>information sharing mode</u> may also be taken by agreement of the GSC, the Commission services and the EEAS, in consultation with the Presidency” 	*Council Implementing Decision (EU) 2018/1993 of 11 December 2018 on the EU Integrated Political Crisis Response Arrangements L 320/28] EUR-Lex - 32018D1993 - EN - EUR-Lex (europa.eu)

						<p>Switching between modes:</p> <ul style="list-style-type: none"> • Article 4(6)*: the Presidency may decide at any point to escalate or de-escalate the operation from one mode of activation to the other (exception: solidarity clause invocation requires full mode) <p>Deactivation: (Article 5):*</p> <ul style="list-style-type: none"> • Decision taken by Presidency after consultation with Member States, Commission and the HR (no deactivation when solidarity clause is invoked) 	
2	European Alliance Against Coronavirus	Ad-hoc group	GROW	An open forum joining social and industrial clusters with many other private and public agents and institutions created by European Clusters Alliance – daily meetings at the height of the crisis. Participation of up to 1100 experts daily. Direct feedback from industry to the Commission.	--	--	--
3	EU Rapid Alert Function	Ad-hoc solution Regulations	GROW	Objective is to detect, analyse, and report disruptions in value and supply chains. During its functioning, 84 disruptions were identified and reported and remedial actions proposed.	No specific definition of a disruption. Specifications in “Procedure for Handling Rapid Alerts Arising from Quality Defects” as part of the “Compilation of Community Procedures on Inspections and Exchange of Information” – published by EMEA in agreement with the European	Form of “activation” of network: Member states send alert notifications to the Commission without undue delay , at the latest within 48 hours after the (product) risk has been reported to them. The Commission then transmits alert notifications	*Commission Regulation (EU) No 16/2011 of 10 January 2011 laying down implementing measures for the Rapid alert system for food and feed (RASFF) Commission Regulation (EU) No

					<p>Commission with regard to defective medicinal products:</p> <ul style="list-style-type: none"> There it states that only alerts shall be transmitted “whose urgency and seriousness cannot permit any delay in transmission”. (p. 3, No. 3.1) – cf. also: “when urgent action is required to protect public health and animal health” (p. 3, No. 1) Further clarification: professional assessment of the “seriousness of the defect, its potential for causing harm” to patients, animals, consumers, operators, environment and “the likely distribution of the affected batch(es)” required Classification in different classes of defects (potentially life threatening, etc.) 	<p>to all members of the network within 24 hours (upon verification) – border rejection notifications are transmitted without undue delay (cf. Articles 3, 5)*</p>	<p>16/2011 of 10 January 2011 laying down implementing measures for the Rapid alert system for food and feed Text (europa.eu)</p> <p>Cf. also Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety EUR-Lex - 32002R0178 - EN - EUR-Lex (europa.eu)</p>
4	EU Rapid Alert system Function	Existing mechanism: European Union Rapid Information System (Safety Gate/RAPEX)	DG JUST	Rapid exchange of information between Member States about dangerous products.	<p>No specific definition of a disruption, but explains the emergency situation posed by a dangerous consumer product: Art 12 (1) of the GPSD: “Where a Member State adopts or decides to adopt, recommend or agree with producers and distributors, whether on a compulsory or voluntary basis, measures or actions to prevent, restrict or impose specific conditions on the possible</p>	<p>Form of “activation” of network: Member states send alert notifications about dangerous products to the Commission. The Commission verifies, validates and transmits alert notifications to all Members of the network. Deadlines are set up by the “RAPEX Guidelines”*.</p>	<p>Directive 2001/95/EC of the European Parliament and of the Council of 3 December 2001 on general product safety (GPSD) and *Commission Implementing Decision (EU) 2019/417 of 8 November 2018 laying down guidelines for the management of the European Union Rapid</p>

					marketing or use, within its own territory, of products by reason of a serious risk, it shall immediately notify the Commission thereof through RAPEX. “ Where, in addition, a product poses a life-threatening risk and/or there have been fatal accidents, and in other cases where a RAPEX notification requires emergency action by all Member States, the notifying Member State submits to the Commission a ‘ Notification requiring emergency action ’.		Information System ‘RAPEX’ established under Article 12 of Directive 2001/95/EC or general product safety and its notification system.

HEALTH, VACCINATION AND RELATED PRODUCTION CAPACITY

1	EU Vaccines Strategy and Joint Vaccine Procurement	Communi- cation	SANTE	<p>15 October 2020 - Commission has presented key elements to be taken into consideration by Member States for their COVID-19 vaccination strategies, in particular to ensure:</p> <ul style="list-style-type: none"> • Capacity of vaccination services to deliver COVID-19 vaccines, including skilled workforce and medical and protective equipment • Easy and affordable access to vaccines for target populations and priority groups • Deployment of vaccines with different characteristics and storage and transport needs, in particular in terms of cold chain, cooled transport and storage capacity • Clear communication on the benefits, risks and importance of COVID-19 vaccines to build public trust 	<p>No definition. However, the instrument is a reaction to the specific current crisis (pandemic) – cf. reference to the scale of the current COVID-19 crisis (cf. pp. 1, 9) and to the exceptional state of a “public health emergency” (p. 8)*.</p> <ul style="list-style-type: none"> • Cf. “The Commission is therefore proposing a Regulation to derogate temporarily - only for the period during which COVID-19 is regarded as a public health emergency - from certain provisions of the GMO Directive for clinical trials with COVID-19 vaccines (and also COVID-19 treatments) that contain or consist of GMOs. This proposed derogation will apply to the operations necessary for the clinical trial phase and for compassionate or emergency use in the context of COVID-19” (p. 8*). 	*Communication from the Commission to the European Parliament, the European Council, the Council and the European Investment Bank – EU Strategy for COVID-19 vaccines communication-eu-strategy-vaccines-covid19_en.pdf (europa.eu)
---	---	--------------------	-------	---	---	---

				Coherent with joint procurement of vaccines via (advanced) purchase agreements and fair distribution of available vaccines to the MS.			
2	European Health Union	Legislative proposal	SANTE	<p>11 November 2020 – Publication of a set of proposals to strengthen the EU's health security framework, coordination, and to reinforce the crisis preparedness and response role of key EU agencies. In particular:</p> <ul style="list-style-type: none">• New Regulation on serious cross-border threats to health (National pandemic preparedness plans, recommendations, reporting and auditing; integrated surveillance system at EU level; data reporting by MS; declaration of emergency situation; improved joint procurement for medicinal counter-measures and stockpiling)• With this stronger and more comprehensive legal framework, the Union can react rapidly and trigger the implementation of preparedness and response measures to cross-border threats to health across the EU• Reinforce ECDC’s mandate (epidemiological surveillance; preparedness and response planning, reporting and auditing; risk management; capacity to mobilise and deploy EU Health Task Force to assist local response in Member States; network of EU reference laboratories)• Reinforce EMA’s mandate (monitoring and mitigating the risk of shortages of critical medicines and medical devices;	<p>Public health emergency: Article 2(1)(e)*: in order for the Regulation to apply, the threats need to fall under the categories of serious cross-border threats to health set out in (a) – (d): threats of biological/ chemical/ environmental/ climate/ unknown origin.</p>	<p>Recognition of emergency situations: Article 23(1):* “The Commission may, based on the expert opinion of the Advisory Committee referred to in Article 24, formally recognise a public health emergency at Union level; including pandemic situations where the serious cross-border threat to health in question endangers public health at the Union level.”</p> <p>2 Cumulative Elements for recognition: 1) Serious cross-border threat to health + 2) Endangerment of public health at Union level</p> <ul style="list-style-type: none">• Prior liaising with the WHO (Article 23(3)*)• Adoption by means of implementing acts• Examination procedure in Article 27(2)*• Exception (Article 23(4), subpara. 3*): for cases where this is duly justified on imperative grounds of urgency related to the severity of a serious cross-border threat to health or due to the rapidity of	<p>*Proposal for a Regulation of the European Parliament and of the Council on serious cross-border threats to health and repealing Decision No 1082/2013/EU EUR-Lex - 52020PC0727 - EN - EUR-Lex (europa.eu)</p>

				scientific advice on medicines; coordinating studies and clinical trials to monitor the effectiveness and safety of vaccines)		<p>its spread among Member States – more expeditious procedure: immediately applicable implementing acts to recognise a public health emergency</p> <ul style="list-style-type: none"> • “The new rules will enable the activation of EU emergency response mechanisms, in close coordination with the World Health Organization (WHO), without making it contingent upon the WHO’s own declaration of a Public Health Emergency of International Concern (PHEIC).” (cf. No. 3, p. 7**) • Enabling effect of measures following the recognition (Article 25*) (recitals 18, 19*) <p>Termination: Article 23(2)*: termination as soon as one of the applicable conditions is no longer met.</p>	<p>**Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions – Building a European Health Union: Reinforcing the EU’s resilience for cross-border health threats communication-european-health-union-resilience_en.pdf (europa.eu))</p>
3	HERA Incubator and HERA	Preparedness plan and a plan for a possible future authority	SANTE/ GROW	17 February 2021 - The EU is setting up a European bio-defence preparedness plan “HERA Incubator” against COVID-19 variants to bring together researchers, biotech companies, manufacturers, regulators and public authorities to monitor	HERA: Public health emergency: Article 2(2)*: “‘Public health emergency’ means a public health emergency at Union level recognised by the Commission in accordance with	<p>HERA: Activation:</p> <ul style="list-style-type: none"> • Recognition of a public health emergency required (cf. Article 2(2)*) 	*Proposal for a Council Regulation on a framework of measures for ensuring the supply of crisis-relevant medical countermeasures in the

			<p>variants, exchange data and cooperate on adapting vaccines. The plan will focus on:</p> <ul style="list-style-type: none"> • Detecting, analysing and adapting to virus variants; • Speeding up regulatory approval of vaccines, providing guidance on data requirements and facilitating the certification of new or repurposed manufacturing infrastructures; • Supporting the speedy mass production of adapted or novel COVID-19 vaccines • Support for EU countries to carry out more testing and genome sequencing by developing specialised tests for new variants, with at least €75 million in EU funding and prepare for adapting vaccine and vaccine production capacity • “EU FAB” project: a network of single or multi-user, single or multi-technology emergency response production capacity for vaccine and medicine manufacturing at European level; • VACCELERATE, a clinical trials network making cooperation and data exchange during clinical trials on COVID-19 vaccines much smoother 	<p>Article 23 of Regulation (EU) No.../...[the SCBTH Regulation”, i.e. Regulation (EU) No .../... of the European Parliament and of the Council of ... on serious cross-border threats to health and repealing Decision No 1082/2013/EU].</p> <p>“Europe needs to be better prepared to anticipate and address jointly the ongoing and increasing risks, not only of pandemics but also of man-made threats such as bioterrorism.”**</p>	<ul style="list-style-type: none"> • Article 3(1): upon proposal of the Commission, the Council “may adopt a regulation activating the emergency framework where appropriate to the economic situation.” • Article 3(3)*: Duration of the activation is limited to 6 months, but renewable (Article 4* procedure) • Funding: Activation of emergency funding, Article 13*: “Where this measure is activated, emergency support under Regulation (EU) 2016/369 is activated to finance expenditure necessary to address the public health emergency [...]” “In the event of a public health emergency at Union level, in order to ensure the necessary flexibility and rapidity in implementation, the Council could also trigger financing through the Emergency Support Instrument (ESI), demonstrated in the past to be both flexible and fast. During the COVID-19 crisis, the ESI27 proved efficient and effective in ensuring rapid and flexible funding, 	<p>event of a public health emergency at Union level hera_2021_propcouncil-eg_medical-countermeasures_en.pdf (europa.eu)</p> <p>**Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions – Introducing HERA, the European Health Emergency preparedness and Response Authority, the next step towards completing the European Health Union hera_2021_comm_en.pdf (europa.eu)</p>
--	--	--	---	---	---	--

				<p>The HERA Incubator will lay the foundations for a possible future fully-fledged bio-preparedness authority, the European Health Emergency Preparedness and Response Authority (HERA). An EU authority for bio-preparedness could remediate structural gaps in the EU's health preparedness and response capacities with regard to biomedical development, production and surge capacity development. It could also provide a horizon scanning function, focusing on emerging biomedical technologies that can be scaled-up for real-world application during times of crisis. The authority would engage with industry, science, academia and clinical research organisation networks, with the aim of</p>	<p>HERA Incubator: No crisis definition***</p>	<p>essential in times of urgency” (p. 13, No. 6.3**)</p> <ul style="list-style-type: none"> • “The Council activation of the emergency framework will also specify which of the [...] emergency measures, appropriate to the economic situation, should be implemented” (p. 9, No. 4)** • Two phases: "preparedness phase" and "crisis phase". In the “crisis phase”, HERA will be able to draw on stronger powers for swift decision-making and implementation of emergency measures. (p. 2, No. 2**) 	<p>***Communication from the Commission to the European Parliament, the European Council and the Council HERA Incubator: Anticipating together the threat of COVID-19 variants COM/2021/78 final EUR-Lex - 52021DC0078 - EN - EUR-Lex (europa.eu)</p>

				implementing successful public-private cooperation.			
4	Emergency Assistance on Cross-Border Cooperation in Healthcare	Communication	DG Health and Food Safety	Reaction to the call of several Member States for emergency assistance from the EU and other EU Member States. A coordinated approach in cross-border healthcare is envisioned.	No definition. However, the instrument is a reaction to the specific current crisis – cf. name of initiative “related to the COVID-19 crisis”; reference to “public health emergency”; “exceptional emergency situations” existing and justifying a more coordinated approach etc. (cf. No. 1, 9)*		*Communication from the Commission – Guidelines on EU Emergency Assistance on Cross-Border Cooperation in Healthcare related to the COVID-19 crisis EUR-Lex - 52020XC0403(02) - EN - EUR-Lex (europa.eu)
5	COVAX Facility and Vaccine Sharing Mechanism	Global initiative	TRADE/INTPA	18 September 2020 - Commission confirmed its participation in the COVAX Facility for equitable access to affordable COVID-19 vaccines. COVAX is the vaccines pillar of the Access to COVID-19 Tools (ACT) Accelerator, a global collaboration between governments, scientists, businesses, civil society, philanthropists and global health organisations to accelerate the development, production, and equitable access to COVID-19 tests, treatments, and vaccines. EU supports the global recovery with a total of €500 million plus vaccine donations. The Commission has also set up an EU vaccine sharing mechanism to structure the provision of vaccines shared by Member States with partner countries.	--	--	--
6	Task Force for Industrial Scale-up of COVID-19	Ad hoc Task Force	GROW	The Commission set up the Task Force for Industrial Scale-up of COVID-19 vaccine production in February 2021, following an	--	--	--

	Vaccines			<p>announcement in the Commission's communication on the European bio-defence preparedness plan against COVID-19 variants called 'HERA Incubator'.</p> <p>The Task Force, operating under Commissioner Breton's responsibility, ramps up production capacity for vaccines in Europe and acts as a one-stop shop for manufacturers in need of support. The Task Force's work consists in particular of:</p> <ul style="list-style-type: none"> • Mapping European vaccine production capacities throughout the supply chain • Identifying, addressing and eliminating production bottlenecks, in terms of capacity and supply chain issues • Promoting partnerships through matchmaking events for vaccine and therapeutics production • Ensuring sufficient long-term manufacturing capacity in Europe via the 'EU-Fab' project, as a future asset of Europe's Health Emergency Response Agency (HERA) 			
7	Coronavirus Response in Relation to Personal Protective Equipment	Commission Recommendation (13 March 2020) accompanied by guidance, followed by the introduction of temporary measures adjusting the PPE export	GROW	<p>The Commission published guidance for manufacturers to help economic operators to assess whether they can convert their existing facilities to produce protective equipment. It details applicable EU legal frameworks and steps that manufacturers need to take to place their products on the EU market.</p>	<p>No definition. However, the instrument is a reaction to the specific current crisis (pandemic):</p> <ul style="list-style-type: none"> • Reference to the current COVID-19 global outbreak/the context of the COVID-19 threat/adequate protection in the COVID-19 outbreak/current health crisis (recital 1, 8; recommendation 1, 8)* • Instrument follows the objective of protecting health and safety of the EU citizens (recital 2)* and, thus, is triggered where these are at risk: cf. protection "against harmful biological agents" & "risks that may cause 'very serious consequences such as death or irreversible damage to health'" (recital 11)* 		<p>*Commission recommendation (EU) 2020/403 of 13 March 2020 on conformity assessment and market surveillance procedures within the context of the COVID-19 threat EUR-Lex - 32020H0403 - EN - EUR-Lex (europa.eu)</p>

		authorisation scheme for 30 days		<p>On 13 March 2020, the Commission issued a recommendation to speed up the uptake of new products not based on harmonised standards, without compromising on our health and safety standards and without undue delays.</p> <p>The recommendations:</p> <ul style="list-style-type: none"> • Notified bodies should prioritise and swiftly make conformity assessments for all new requests by economic operators. • For protective equipment products not following harmonised standards, bodies should take WHO recommendations as reference for their technical assessment. • Market surveillance authorities may authorise products for the EU market without finalised conformity assessment procedures if the equipment ensures an adequate level of health and safety in line with EU law requirements. • In exceptional cases, purchases organised by EU countries for healthcare workers may skip necessary conformity assessment procedures for equipment, provided that the EU countries' authorities have ensured adequate safety levels. 		
8	Extra-EU Export Authorisation Mechanism of Covid-19 Vaccines and their Active Substances	Commission Regulation	SANTE/TRADE	<p>The objective is to increase the transparency of vaccine exports from the EU and to ensure timely access to COVID-19 vaccines for EU citizens in accordance with contractual agreements. This mechanism aims at preventing exports from companies with whom the EU has concluded</p>	<p>Grounds for refusal of export authorisation:</p> <ul style="list-style-type: none"> • Article 1(7)*: Threat to the execution of APAs (Advance Purchased Agreements) concluded by the EU with vaccine manufacturers (in view of the volume of exports or any other relevant circumstances) – Threat to the security of continuous supply of the vaccines necessary for the 	<p>*Commission Implementing Regulation (EU) 2021/442 of 11 March 2021 making the exportation of certain products subject to the production of an export</p>

				Advance Purchased Agreements (APAs), where they threaten the execution of those APAs as well as to preserve the security of the EU's supply chains – while taking into account the principles of reciprocity and proportionality.	execution of the APAs within the EU (cf. Recital 4)* Temporary instrument: the COVID-19 vaccines export transparency and authorisation mechanism has been extended until 31 December 2021.	authorisation L_2021085EN.01019001.xml (europa.eu)
9	Joint Procurements for Medicinal Counter Measures	Legislative Proposal	SANTE	This option does already exist in a COM decision, but will be revamped for the SANTE cross-border health proposal. Has been used for example to jointly procure a therapeutics medicine as well as syringes.	See above for triggering mechanism (column European Health Union).*	*Proposal for a Regulation of the European Parliament and of the Council on serious cross-border threats to health and repealing Decision No 1082/2013/EU EUR-Lex - 52020PC0727 - EN - EUR-Lex (europa.eu)
10	A New European Pandemic Information Gathering System & New European Chief Epidemiologist & European Health Data Space	Proposal announced in the Lessons Learnt Communication	SANTE/ ECDC	At European level, a new European pandemic information gathering system, building on the existing Early Warning and Response System and an upgrade of the European Surveillance System, should be set up to manage and exchange data in real time and integrated into the new global system. This should focus on Member States providing timely information, ranging from early signals of potential threats – whether pandemics, bioterrorism or anything in between – to concrete data on cases, exposures, risk factors, health outcomes and healthcare capacity. As part of this, connecting public health authorities would allow coordinated management of stockpiles and hospital beds, and rapid workforce redeployments. It would allow up-to-date screening of the situation to be shared, drawing on innovative sources of data like the wastewater	The focus is on providing “timely information” to Member States – this is done via “early signals of potential threats – whether pandemics, bioterrorism or anything in between ” (p. 5/6).*	*Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions – Drawing the early lessons from the COVID-19 pandemic (Lesson 1, p. 5/6) communication150621.pdf (europa.eu)

				monitoring now being put in place. It will also allow swifter and more effective contact tracing, as well as enable patient records and data to follow patients across borders. This should also be integrated into the broader initiative to create a European Health Data Space. Seamlessly linking clinical and public health data, such as through the secure sharing of electronic health records, allows a real-time snapshot of the epidemiological situation and response capacity.*		
11	A Framework for the Activation of an EU Pandemic State of Emergency	Proposal announced in the Lessons Learnt Communication		“A striking feature of the pandemic was the increasing use of different emergency tools needed in response to the crisis. These include the use of the Emergency Support Instrument, the Advance Purchase Agreements used to purchase vaccines, or the use of the Union Civil Protection Mechanism for emergency response and repatriations. While these instruments were successfully deployed, the pandemic highlighted the importance to have fast, functioning and flexible temporary and exceptional measures ready to be activated, to allow the EU to react as quickly as it is needed. With speed being of the essence, the pandemic showed the need for a more systematic approach to these instruments. This requires a clear and decisive political decision on when to trigger crisis response, as well as a toolbox to be deployed for such situations.” This “could also ensure a more coordinated approach to information-sharing and decision-making on public health measures.”*	Lessons Learnt Communication discusses the automatic activation of the Emergency Support Instrument to allow surge funding , or other mechanisms to allow swift support for the research, development, manufacturing and procurement of essential countermeasures. It points to the need of a political decision on when to trigger a crisis response (Lesson 4, p. 7).*	*Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions – Drawing the early lessons from the COVID-19 pandemic (Lesson 4, p. 7) communication150621.pdf (europa.eu) Supplementary Regulation: Council Regulation (EU) 2020/521 of 14 April 2020 activating the emergency support under Regulation (EU) 2016/369, and amending its provisions taking into account the COVID- 19 outbreak EUR-Lex - 32020R0521 - EN -

						EUR-Lex (europa.eu)
12	Short-term EU Health Preparedness for COVID-19 Outbreaks	Communi- cation		“The EU must ensure that it is ready for possible resurgences of COVID-19 cases. This requires short-term and strongly coordinated action to strengthen key areas of preparedness and response. Early detection of cases and a rapid response to prevent further spread, combined with specific measures to protect the most vulnerable in [...] societ[y], are [...] [the] best shot to avoid having to reinstate large-scale restrictions such as lockdowns. Building on the ongoing work in the Member States, the Commission and EU Agencies, this Communication has set out the necessary actions to be taken.”*	No definition. However, the instrument is a reaction to the specific current crisis (pandemic) (cf. title for COVID-19 outbreaks).*	*Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions – Short-term EU health preparedness for COVID-19 outbreaks EUR-Lex - 52020DC0318 - EN - EUR-Lex (europa.eu)

IMMEDIATE DISASTER RESPONSE AND CRITICAL INFRASTRUCTURE

1	Union Civil Protection Mechanism (UCPM)	Based on a number of legal acts, including a Decision 1313/2013 from 2013 and as amended by a Regulation from 2021/2021/836	ECHO	<p>The Mechanism aims to strengthen cooperation between the EU Member States and 6 Participating States on civil protection to improve prevention, preparedness and response to disasters (Article 1(1)*). When an emergency overwhelms the response capabilities of a country in Europe and beyond, it can request assistance through the Mechanism. The European Commission plays a key role in coordinating the disaster response worldwide, contributing to at least 75% of the transport and/or operational costs of deployments.</p> <p>The UCPM, among other things, provides a 24/7 Emergency Response Coordination Centre with 24/7 operational realtime monitoring of</p>	<p>Disaster: Article 4(1)*: "Disaster" means any situation which has or may have a severe impact on people, the environment, or property, including cultural heritage".</p> <p>Scope/Triggering of civil protection mechanisms by – Article 1(2)*: “The protection to be ensured by the Union Mechanism shall cover primarily people, but also the environment and property, including cultural heritage, against all kinds of natural and man-made disasters, including the consequences of acts of terrorism, technological, radiological or environmental</p>	Triggering of civil protection actions/mechanisms to assist in the response to immediate adverse consequences of a disaster inside or outside the EU (cf. In the case of the consequences of acts of terrorism or radiological disasters, the Union Mechanism may cover only preparedness and response actions.”		and of the Council of 20 May 2021 EUR-Lex - 32021R0836 - EN - EUR-Lex (europa.eu) Consolidated version: EUR-Lex - 02013D1313-20210101 - EN - EUR-Lex (europa.eu)
2	RescEU	See above	ECHO	RescEU has the objective of enhancing both the protection of citizens from disasters and the management of emerging risks. In addition, rescEU establishes a new European reserve of resources (the ‘rescEU reserve’) which includes a fleet of firefighting planes and helicopters, medical evacuation planes, as well as a stockpile of medical equipment and field hospitals that can respond to health emergencies, and chemical, biological, radiological, and nuclear incidents.	Falls under the umbrella of the EU Civil Protection Mechanism. ➔ Key triggering mechanism of “ disaster ” (Article 4(1)*). Article 12*: triggered “where overall existing capacities at national level and those pre-committed by Member States to the European Civil Protection Pool are not [...] able to ensure an effective response to the various kinds of disasters referred to in Article 1(2)”.* Article 12(3b)*: “In duly justified cases of urgency , the Commission may acquire, rent, lease or otherwise contract capacities determined by means of implementing acts adopted in accordance with the urgency procedure referred to in Article 33(3)” (urgency procedure in Article 31*). – Urgency is not defined.		*Decision No 1313/2013/EU of the European Parliament and of the Council of 17 December 2013 on a Union Civil Protection Mechanism, latest amendment by Regulation (EU) 2021/836 of the European Parliament and of the Council of 20 May 2021 (see above: EU Civil Protection Mechanism)
3	Humanitarian Air Bridge	See above	ECHO	The European Union Humanitarian Air Bridge is an integrated set of services enabling the delivery of humanitarian and other aid to countries affected by COVID-19 and/or facing fragile humanitarian	The Humanitarian Air Bridge is an anticipatory or preventative approach that is meant to “help bolster the resilience of communities, including forcibly displaced groups, in regions vulnerable to climate-related and other hazards .” It builds on the submission of sufficiently reliable information via early warning systems including indicators or other criteria to trigger		*Communication from the Commission to the European Parliament and the Council on the EU’s humanitarian action: new challenges,

				<p>contexts. The air bridge carries medical equipment, and humanitarian cargo and staff. It provides humanitarian assistance for the most vulnerable populations, including where the pandemic imposes constraints on transport and logistics.</p> <p>The air bridge flights are fully funded by the European Union. They are operated in coordination with Member States and humanitarian organisations sending the material, and in cooperation with the receiving country. The Humanitarian Air Bridge is a temporary initiative operated on a needs-based approach.</p>	<p>action (cf. No. 3.3, p. 10).*</p> <p>The Communication further clarifies in a footnote that – given the anticipatory nature of the envisioned humanitarian responses – “anticipatory action involves pre-planning early actions based on which funding can be disbursed quickly before a natural or human-induced disaster takes place or any other trigger for action is reached. It is also relevant for other types of anticipated emergencies, not only those linked to climate change” (cf. No. 3.3, Fn. 43, p. 10).*</p>	<p>same principles hacommunication2021.pdf (europa.eu)</p>
4	European Civil Protection Pool (ECPP)	See above	ECHO	<p>Part of the EU’s approach to health disasters.</p> <p>The European Civil Protection Pool (ECPP) of voluntary pre-committed response capacities in the Member States, established for a large field of response capacities, needed in the response to natural and man-made disasters, The European Medical Corps is one part of the ECPP, established under the EU Civil Protection Mechanism. It enables quick medical assistance and public health expertise from all EU Member States and Participating States to a health emergency inside and outside the EU. The deployment is coordinated by the EU’s Emergency Response Coordination Centre, the operational hub of the EU Civil Protection Mechanism. The European Medical Corps gathers all medical response capacities committed by Member States to the European Civil Protection Pool. Following a request</p>	<p>(Health) disaster: no separate definition, but:</p> <ul style="list-style-type: none"> ➔ Key triggering mechanism of “disaster” (Article 4(1)*). ➔ European Civil Protection Pool (ECPP) article 11 (UCPM). 	<p>*Decision No 1313/2013/EU of the European Parliament and of the Council of 17 December 2013 on a Union Civil Protection Mechanism, latest amendment by Regulation (EU) 2021/836 of the European Parliament and of the Council of 20 May 2021 (see above: EU Civil Protection Mechanism)</p>

				<p>for European assistance, medical capacities can be drawn from this Pool and from other Member States' response capacities.</p> <p>The European Medical Corps was set up in response to the acute shortage of trained medical teams during the Ebola crisis in West Africa in 2014. It continues to coordinate an effective European response in health emergencies under the EU Civil Protection Mechanism.</p> <p>Medical capacities available via the emergency response mechanisms are, i.a.: emergency medical teams (EMT), mobile biosafety laboratories, medical evacuation capacities.</p>			
5	EU Solidarity Corps	Regulation		<p>“Given the significant increase in global humanitarian needs and with a view to enhancing the promotion of solidarity and the visibility of humanitarian aid among Union citizens, there is a need to develop solidarity between Member States and with third countries affected by man-made or natural disasters” (cf. Recital 2)*</p> <p>“The European Solidarity Corps Programme (the ‘Programme’) provides a single entry point for solidarity activities throughout the Union and beyond” (cf. Recital 16)*</p> <p>The European Solidarity Corps helps young people take part in projects that benefit communities, either abroad or in their own country. Funding for projects is provided in the form of grants to organisations.</p>	--	--	<p>*Regulation (EU) 2021/888 of the European Parliament and of the Council of 20 May 2021 establishing the European Solidarity Corps Programme and repealing Regulations (EU) 2018/1475 and (EU) No 375/2014 Regulation (EU) 2021/ of the European Parliament and of the Council of 20 May 2021 establishing the European Solidarity Corps Programme and repealing Regulations (EU) 2018/1475 and (EU) No 375/2014 (europa.eu)</p>

6	The Seveso Directive Technological Disaster Risk Reduction	Directive	ENV	The Directive applies to more than 12 000 industrial establishments in the European Union where dangerous substances are used or stored in large quantities, mainly in the chemical and petrochemical industry, as well as in fuel wholesale and storage (incl. LPG and LNG) sectors.	<p>Major accident: Article 3(13)*: “‘major accident’ means an occurrence such as a major emission, fire, or explosion resulting from uncontrolled developments in the course of the operation of any establishment covered by this Directive, and leading to serious danger to human health or the environment, immediate or delayed, inside or outside the establishment, and involving one or more dangerous substances”</p> <p>3 Cumulative Elements: 1) Major emission, fire, or explosion resulting from uncontrolled developments in the course of the operation of an establishment + 2) Leading to serious danger to human health or the environment + 3) Involving one or more dangerous substances</p>	In particular, the “major accident” definition triggers information obligations as well as specific action obligations by the operators of establishments or installations (Article 16, 3(8), (9)*). It also triggers information obligations by the respective Member States (Article 18*). Moreover, the competent Member State authorities are required to take specific action (Article 17*).	*Directive 2012/18/EU of the European Parliament and of the Council of 4 July 2012 on the control of major-accident hazards involving dangerous substances, amending and subsequently repealing Council Directive 96/82/EC Directive 2012/18/EU of the European Parliament and of the Council of 4 July 2012 on the control of major-accident hazards involving dangerous substances, amending and subsequently repealing Council Directive 96/82/EC Text (europa.eu)
7	Proposal for a Directive to Enhance the Resilience of Critical Entities Providing Essential Services in the EU	Proposal for a Directive	Migration & Home Affairs	With this proposal, the Commission intends to create an all-hazards framework to support Member States in ensuring that critical entities are able to prevent, resist, absorb and recover from disruptive incidents , no matter if they are caused by natural hazards, accidents, terrorism, insider threats, or public health emergencies like the one the world faces today. The proposal covers ten sectors, namely energy, transport, banking, financial market	<p>Incident: Article 2(3)*: “‘Incident’” means any event having the potential to disrupt, or that disrupts, the operations of the critical entity.”</p> <p>1 Element: • Potential to disrupt the operations of a critical entity.</p>	The question of whether an incident would have a significant disruptive effect on the provision of the service of an entity is set out as a relevant criterion in classifying an entity as “critical” (Article 5(2)(c)*).	*Proposal for a Directive of the European Parliament and of the Council on the resilience of critical entities 15122020 proposal directive resilience critical entities com-2020-829_en.pdf (europa.eu)

			<p>infrastructures, health, drinking water, waste water, digital infrastructure, public administration and space. The proposal sets up a physical resilience framework with minimum harmonisation rules, allowing for flexibility to reflect national specificities.</p> <p>Noteworthy provisions include:</p> <ul style="list-style-type: none"> • Member States would be obligated to, among other things, have a strategy for ensuring the resilience of critical entities, carry out a national risk assessment and, on this basis, identify critical entities. • Critical entities are those that provide services in the internal market that are essential for the maintenance of vital societal functions or economic activities in those 10 sectors • Critical entities would be required to carry out risk assessments of their own, take appropriate technical and organisational measures (to prevent, resist, absorb and recover from disruptive incidents) in order to boost resilience, and report disruptive incidents to national authorities. • Critical entities providing services to or in at least one-third of Member States would be subject to specific oversight, including advisory missions organised by the Commission. • The Commission would offer different forms of support to Member States and critical entities, a Union-level risk overview, best practices, methodologies, cross-border 	<p>Significant disruptive effect</p> <p>Article 6*: List of relevant criteria in the classification exercise, i.a. number of users relying on service, dependency of other sectors on the service, market share of the entity etc.</p> <ul style="list-style-type: none"> • Commission may adopt guidelines to facilitate the application of the relevant criteria for the classification of a “significant disruptive effect” (after consultation of a Critical Entities Resilience Group). 	<p>Article 13*: Incident notification requirement for entities that is triggered by “incidents that significantly disrupt or have the potential to significantly disrupt their operations”</p>

9	Repair and Prepare for the Next Generation	Communi-cation		This Communication focuses on the “anatomy” of the economic crisis, the impact (e.g. recession) of the crisis and the way forward “to repair damage from the crisis and prepare a better future for the next generation.”*	No definition.*		<p>*Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions – Europe’s moment: Repair and Prepare for the Next Generation EUR-Lex - 52020DC0456 - EN - EUR-Lex (europa.eu)</p>

FREE MOVEMENT OF PERSONS, GOODS AND SERVICES						
1	Border Management Measures to Protect Health and Ensure Availability of Goods	Guidelines		These guidelines set out principles for an integrated approach to an effective border management to protect health while preserving the integrity of the Single Market. Disruptions to the free movement of persons, and the delivery of goods and essential services across Europe are meant to be avoided.	No definition. However, the Guidelines are a reaction to the specific current health crisis (pandemic) – cf. reference in title to “COVID-19 crisis”. Guidelines also refer to the “green lanes” system.*	*COVID-19 Guidelines for border management measures to protect health and ensure the availability of goods and essential services EUR-Lex - 52020XC0316(03) - EN - EUR-Lex (europa.eu)
2	‘Green Lanes’ System and the Forthcoming Transport Mobility Contingency Plan	Communication and a planned Communication	MOVE	The Commission adopted in particular the ‘Green Lanes’ system, in response to the freight traffic halted at internal borders in March 2020 and upgraded it based on the experiences gained over time in October 2020. The aim was to ensure that EU-wide supply chains continued to operate in all circumstances. In line with the Green Lanes principles, Member States were requested to designate all the relevant internal border-crossing points on the trans-European transport network (TEN-T) as ‘green lane’ border crossings, open to all freight vehicles irrespective of the goods they carry. Crossing the border, including any checks and health screening, should not take more than 15 minutes and restrictions such as mandatory quarantine or testing of transport workers should be waived, without prejudice to the need for national authorities to take proportionate and specifically adapted measures to minimise the risk of contagion.	Green Lanes: No definition.*	*Communication from the Commission on the implementation of the Green Lanes under the Guidelines for border management measures to protect health and ensure the availability of goods and essential services EUR-Lex - 52020XC0324(01) - EN - EUR-Lex (europa.eu) (cf. also Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions – Sustainable and Smart Mobility Strategy – putting European transport on track for

				<p>The Green Lanes system should now be consolidated in a framework which can be activated in response to any new crisis. The Commission intends to put forward a Contingency plan to this effect by the end of 2021. As regards the transport and mobility aspects, this initiative will draw lessons from the current pandemic and address the needs of the European freight and passenger transport in the event of a pandemic. It will focus on ensuring free movement of transport workers and freight transport and providing clarity to the passenger transport. It will aim at better preparing the EU transport system for pandemic-like events and preserving the integrity of the Single Market. The plan is structured around 10 action points. Under each action point there are specific actions that are being proposed.</p>	<p>Transport & Mobility Contingency plan: The draft includes a passage on possible “triggering events” for the contingency measures: “the triggering event includes any accident or other events capable of causing lasting and severe disruption to the EU transport system. Such disruption could come from a wide range of events such natural disasters, pandemic outbreaks, terrorist attacks, Kessler effect, cyber-attacks, including ransomware, military conflicts, bridge or tunnel collapse or power outages.” (p. 8, para. 3.2**)</p> <p>1 Element:</p> <ul style="list-style-type: none"> • Any accident or other events capable of causing lasting and severe disruption to the EU transport system (usually originating from one of the listed events) <p>Factors with the ability to severely disrupt the EU transport and mobility system include:</p> <ul style="list-style-type: none"> • “Climate change and other environmental challenges, [...] digital hyperconnectivity and technological transformations.”, targeted disruptions of “telecommunication infrastructure, including 3G/4G/5G infrastructure (e.g. repeaters, repeater bridges or cell towers) or other components of the telecommunications network (e.g. relays or cables)”, “floods” etc. (p. 6, para. 3.1).** 	<p>the future EUR-Lex - 52020DC0789 - EN - EUR-Lex (europa.eu)</p> <p>**Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions – Learning from the COVID-19 crisis – A contingency plan for transport (not public yet)</p>
3	COVID-19 Clearing House for Medical Equipment (CCH)	Ad hoc group	SG	<p>COVID-19 Clearing House for medical equipment (CCH) was established by the SG to ensure availability of goods.</p> <p>A first ad hoc action was the setting up on 1 April 2020 of the COVID-19 Clearing House for medical equipment (CCH), which facilitated the matching of demand and supply at European level of essential medical equipment to fight the COVID-19</p>	No definition of a state of crisis.	—

				pandemic.		
4	Council Recommendation on Coordinated Approach to the Restriction of Free Movement	Council Recommendation	JUST HOME	<p>On 13 October 2020, the Council adopted a recommendation on a coordinated approach to the restriction of free movement in response to the COVID-19 pandemic, which was updated on 1 February 2021 and on 14 June 2021. This recommendation establishes common criteria and a common framework for possible measures for travellers.</p> <p>The Council Recommendation suggests as a best practice not to impose either quarantine or testing requirements on transport workers/service providers and cross-border commuters.</p>	No definition. However, the instrument is a reaction to the specific current crisis (pandemic) (cf. title "in response to the COVID-19 pandemic").*	<p>*Council Recommendation (EU) 2020/1475 of 13 October 2020 on a coordinated approach to the restriction of free movement in response to the COVID-19 pandemic; updated by Council Recommendation (EU) 2021/119 of 1 February 2021</p> <p>EUR-Lex - 32020H1475 - EN - EUR-Lex (europa.eu)</p> <p>Amendment: EUR-Lex - 32021H0119 - EN - EUR-Lex (europa.eu)</p>
5	Free Movement of Workers, Posted Workers, Service Providers	Communications	EMPL	<p>The guidelines issued on 30 March 2020 identify a range of workers and service providers that exercise critical occupations, and for which continued free movement in the EU is deemed essential. The list provided in these guidelines is not exhaustive. The Commission urged Member States to establish specific burden free and fast procedures to ensure a smooth passage for such workers, including proportionate health screening.</p> <p>Beyond these specific categories of workers, the guidelines also clarify that Member States should allow frontier workers in general to continue crossing borders if work in the sector concerned is still allowed in the host Member State. Member States should treat cross-border workers and national workers in the</p>	<p>See above No. 3 column.*</p> <p>&</p> <p>No definition. 				<p>same manner.</p> <p>As regards seasonal workers, particularly in the agricultural sector, Member States were asked to exchange information on their different needs at technical level and to establish specific procedures to ensure a smooth passage for such workers, in order to respond to labour shortages as a result of the crisis.</p> <p>On 16 July 2020, the European Commission issued guidelines on seasonal workers in the EU in the context of the COVID-19 outbreak. These guidelines complement the Commission Guidelines concerning the exercise of the free movement of workers during the COVID-19 outbreak published on 30 March.</p>	<p>No definition. However, the instrument is a reaction to the specific current crisis (pandemic) (cf. title “in the context of the COVID-19 outbreak”).***</p>	<p>the Commission – Guidelines concerning the exercise of the free movement of workers during COVID-19 outbreak 2020-2051-Communication-free-movement_EN.pdf (lgseeds.es)</p> <p>***Communication from the Commission – Guidelines on seasonal workers in the EU in the context of the COVID-19 outbreak guidelines on seasonal workers in the eu in the context of the covid-19 outbreak_en.pdf (europa.eu)</p>
6	<p>Schengen Strategy and Foreseen Revision of Schengen Border Code as Regards Border Closures</p>	<p>Communication; planned proposal for a regulation and changes in Practical Handbook for Border Guards</p>	HOME	<p>The Commission intends to put forward a new proposal for an amendment of the Schengen Borders Code by the end of this year. The new proposal will need to address the lessons learned from the COVID-19 crisis and build on discussions related to the 2017 proposal, in particular as regards the preservation of Member States’ possibility to reintroduce internal border controls while reasserting the principle that this should only be as a measure of last resort, to be used in case of threats. To deal with any future Schengen-wide challenges, a revised Schengen Borders Code would address situations where a serious threat, including a threat to public health, such as that created by the COVID-19 pandemic, would arise. In such instances, it is important to</p>	<p>Revised Schengen Border Code:*</p> <p>Article 25: “General framework for the temporary reintroduction or prolongation of border control at internal borders</p> <ol style="list-style-type: none"> Where, in the area without internal border controls, there is a serious threat to public policy or internal security in a Member State, that Member State may exceptionally reintroduce border controls at all or specific parts of its internal borders. <p>A serious threat to public policy or internal security may be considered to arise from, in particular:</p> <ol style="list-style-type: none"> activities relating to terrorism or organised crime; large scale public health emergencies; a situation characterised by large scale unauthorised movements of third-country nationals between the Member States, putting at risk the overall functioning of the area without internal border control; large scale or high profile international events such as sporting, trade or political events. 	<p>*Amendment Schengen Border Code: Proposal for a Regulation of the European Parliament and of the Council amending Regulation (EU) 2016/399 on a Union Code on the rules governing the movement of persons across borders EUR-Lex - 52021PC0891 - EN - EUR-Lex (europa.eu)</p> <p>& Communication from the Commission to the European Parliament and the Council - A strategy towards a fully functioning and</p>

			<p>ensure coordination and close cooperation at Union level with the necessary safeguards so that reintroducing border checks at internal borders remains a measure of last resort. In this way, the Commission and the Member States would be able to have an overview of the circumstances giving rise to the need for reintroduced border controls. The revised Code would also address the need for coordination of measures restricting travel into the EU, drawing notably from the experiences in response to the serious threat to public health posed by the pandemic where there have been divergences in the implementation of Council Recommendation (EU) 2020/912 by Member States, and allowing for a flexible framework to respond to crises.</p> <p>To be better prepared for future crises and for the case that border control at internal borders should again become unavoidable, despite the measures being put in place, the Commission will codify the pertinent mitigating measures from the guidelines and recommendations developed in relation to COVID-19 in the Practical Handbook for Border Guards, which should become a first point of reference for border guards in a crisis situation. It would also ensure the free movement of professionals and provide safeguards for cross-border posting of workers at the time of crisis (including transport and health workers).</p> <p>At the beginning of 2021, the Commission published an inception</p>	<p>Previous Schengen Border Code:</p> <p>Threat to public health: Article 2(21)**: “Threat to public health’ means any disease with epidemic potential as defined by the International Health Regulations of the World Health Organization and other infectious diseases or contagious parasitic diseases if they are the subject of protection provisions applying to nationals of the Member States.”</p> <ul style="list-style-type: none"> Under the Schengen Borders Code and national law adopted in order to ensure coordinated action to fight COVID-19, it is possible to refuse entry to non-resident third-country nationals where they present relevant symptoms or have been particularly exposed to risk of infection and are considered to be a threat to public health.* Threats to public policy, internal security, public health or the international relations of any of the Member States allow for a rejection of third-country nationals at the borders (Article 6, 8(2), subpara. 3, (3)(vi), Recital 6**). 	<p>resilient Schengen area 02062021_strategy_to_wards_fully_functionin_g_and_resilient_scheng_en_area_com-2021-277_en(9).pdf (emnbelgium.be)</p> <p>**Previous Version: Regulation (EU) 2016/399 of the European Parliament and of the Council of 9 March 2016 on a Union Code on the rules governing the movement of persons across borders (Schengen Borders Code) EUR-Lex - 32016R0399 - EN - EUR-Lex (europa.eu)</p>

The information is updated frequently and available in 24 languages.			
10	EU Digital COVID Certificate	Regulation	JUST/ CNECT	<p>The EU Digital COVID Certificate (formerly called Digital Green Certificate) facilitates safe free movement during the COVID-19 pandemic within the EU. It serves as proof that a person was vaccinated against COVID-19, received a negative test result or recovered from COVID-19. The certificate can be used across all EU Member States as well as in Iceland, Liechtenstein and Norway. Contacts are also ongoing to enable its use with Switzerland. The Commission is working to make sure that the certificates can be compatible with systems in other countries outside the EU.</p> <p>The EU Digital COVID Certificate system covers three different types of COVID-19 certificates: a vaccination certificate, a test certificate, and a certificate of recovery. The EU Certificate can be issued and used in all EU Member States to facilitate free movement during the COVID-19 pandemic. All EU citizens and their family members, as well as non-EU nationals legally staying or residing in the Member States and who have the right to travel to other Member States, would be eligible to receive such certificates free of charge. The EU certificate only includes a</p>	<p>System in place for current pandemic crisis – not envisioned to be triggered by specific future state of crisis.</p> <p>Recital 59*: “Specific power of Commission to adopt delegated acts – “In order to take into account the scientific progress in containing the COVID-19 pandemic, or to ensure interoperability with international standards, the power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission to amend this Regulation by modifying or removing the data fields to be included in the EU Digital COVID Certificate regarding the identity of the holder, information about the COVID-19 vaccine, the test for SARS-CoV-2 infection, past SARS-CoV-2 infection and the certificate metadata, by adding data fields regarding information about the COVID-19 vaccine, the test for SARS-CoV-2 infection, past SARS-CoV-2 infection and certificate metadata and by amending the number of days after which a certificate of recovery is to be issued.”</p> <p>– Special rules under urgency procedure.</p> <p>(Cf. Articles 5(2), (4), 6(2), (4), 7(1), (2), (4), (6), (7), 13).*</p>	<p>*Regulation (EU) 2021/953 of the European Parliament and of the Council of 14 June 2021 on a framework for the issuance, verification and acceptance of interoperable COVID-19 vaccination, test and recovery certificates (EU Digital COVID Certificate) to facilitate free movement during the COVID-19 pandemic</p> <p>EUR-Lex - 32021R0953 - EN - EUR-Lex (europa.eu)</p>	

				<p>minimum set of information necessary to confirm and verify the holder's vaccination, testing or recovery status. Being vaccinated will not be a pre-condition to travel. All EU citizens have a fundamental right to free movement in the EU and this applies regardless of whether they are vaccinated or not.</p> <p>The regulation also provides for the legal ground to process the personal data necessary to issue such certificates and to process the information necessary to verify and confirm the authenticity and validity of such certificates in full compliance with Regulation (EU) 2016/679 (cf. Article 1, subpara. 2*).</p>		
11	EU Passenger Locator Form	Commission Implementing Decision		<p>Digital solution: Passenger Locator Forms help Member States undertake risk assessment of arrivals and enable contact tracing. The Council has agreed to work towards a common digital European Passenger Locator Form which would help both the swift processing of the information and improve data exchange between Member States.</p>	No definition. DIGITAL INITIATIVES						
1	Fighting Disinformation – Communications, Action Plan and Code of Practice	In particular: Joint Communication accompanied by actions		Close contact with social media platforms regarding measures to promote authoritative content and limit disinformation.*	No particular triggering mechanism is established. Instead, these instruments initiate a more fundamental process of involving platforms through co-regulation and voluntary commitments in restructuring their public forums. The objective is to create a “safe cyberspace” whilst protecting the fundamental right to freedom of expression (Article 10 European Convention on Human Rights (ECHR), Article 11 EU	*Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of

				<p>Charter of Fundamental Rights). The measures aim to equip the big tech companies and their forums of exchange more reliably against the threat of the spread of mis-/disinformation (“Fake News”) and the almost automatic amplification and magnification of a (false) message across cyberspace. Tools to combat i.a. infodemics focus on transparency mechanisms and involve fact-checking processes, changes in the platforms’ architecture/code etc.</p>	<p>the Regions – Tackling online disinformation: a European Approach (April 2018) EUR-Lex - 52018DC0236 - EN - EUR-Lex (europa.eu)</p> <p>& Action Plan Against Disinformation (December 2018) eu-communication-disinformation-euco-05122018_en.pdf (europa.eu)</p> <p>& **Joint Communication to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions – Tackling COVID-19 disinformation – Getting the facts right (June 2020) communication-tackling-covid-19-disinformation-getting-facts-right_en.pdf (europa.eu)</p> <p>& EU Code of Practice on Disinformation (October 2018) Code of Practice on Disinformation Shaping Europe’s digital future (europa.eu)</p>
				<p>Responding to the problem of “infodemics”. As defined by the WHO “infodemics are an excessive amount of information about a problem, which makes it difficult to identify a solution. They can spread misinformation, disinformation and rumours during a health emergency. Infodemics can hamper an effective public health response and create confusion and distrust among people.”</p> <p>This initiative, thus, aims to tackle this problem, which could “create confusion and distrust and undermine an effective public health response.”**</p>	

				<p>The fight against mis-/disinformation has also been emphasised by the Lessons Learnt communication: “A more coordinated and sophisticated approach to misinformation and disinformation should be developed.” (Lesson 10, p. 13)****</p>		<p>***& Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions – European Commission Guidance on Strengthening the Code of Practice on Disinformation (May 2021) https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=COM:2021:262:FIN</p> <p>****Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee of the Regions – Drawing the early lessons from the COVID-19 pandemic communication150621.pdf (europa.eu)</p>
2	Data Act	Act	CNECT/G1	<p>The Covid-19 crisis has shown the essential role of data use for crisis management and for informed decision-making by governments. With its European strategy for data, published on 19 February 2020, the Commission has formulated a vision for the data economy. It will work</p>	<p>The proposal of the Data Act is not public yet.</p> <p>Article 2 Definitions:* (11) “‘public emergency’ refers to exceptional situations negatively affecting a major part of a Member State(s) population or their fundamental rights, with a risk of serious and lasting repercussions on living conditions and the economic stability of the</p>	<p>*Proposal for a Regulation of the European Parliament and of the Council on ensuring fairness in the allocation of value across the data economy (Data Act)</p>

			<p>towards the creation of a Single Market for data, where data flows between countries and sectors, where data is available for use in full respect of European values and rules, and where there are fair, practical and clear rules for access and use of the data. The Data Strategy also underlined that the EU should ensure an open, but assertive approach towards international data flows, based on European values. The strategy announces the adoption of a horizontal legislative initiative, which would complement the proposal for a Regulation on European Data Governance*, already adopted by the Commission. This initiative will aim to increase access to and further use of data, so that more public and private actors can benefit from techniques such as Big Data and machine learning.</p> <p>This Act is also meant to promote and facilitate data-sharing between government and businesses as well as between businesses (B2B) if this data serves the public interest.**</p>	<p>Member State(s).
