Subject: Position of the Council at first reading with a view to the adoption of a

– Draft Statement of the Council's reasons

On page 7, point (d):

"(d) Climate neutrality

The Council text lays down clear requirements for technical screening criteria which the Commission will have to respect when developing those criteria through delegated acts. Those requirements, inter alia, recognise the principle of technical neutrality in the establishment of technical screening criteria and provide that technical screening criteria will ensure that power generation activities which use solid fossil fuels do not qualify as environmentally sustainable economic activities. Furthermore, the Council text lays down requirements for transitional and enabling activities."
