Subject: Proposal for a Council Directive amending Directive 2006/112/EC on the common system of value added tax as regards the temporary application of a generalised reverse charge mechanism in relation to supplies of goods and services above a certain threshold

- Presidency compromise

---

Delegations will find in the Annex the Presidency compromise on the abovementioned Commission proposal.

Proposal for a

**COUNCIL DIRECTIVE**

**amending Directive 2006/112/EC on the common system of value added tax as regards the temporary application of a generalised reverse charge mechanism in relation to supplies of goods and services above a certain threshold**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 113 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Parliament,

Having regard to the opinion of the European Economic and Social Committee,

Acting in accordance with a special legislative procedure,

Whereas:

- (1) In its VAT Action Plan<sup>1</sup>, the Commission announced its intentions to come forward with a proposal for a definitive value added tax (VAT) regime for cross-border business-to-business trade between Member States on the basis of the taxation of cross-border supplies of goods and services.
- (2) Given the current level of VAT fraud and the fact that not all Member States are equally affected by this fraud, and given the fact that it will take several years for the definitive VAT regime to be implemented, some urgent and specific measures may be necessary.
- (3) In this context, certain Member States have asked to be allowed to implement a temporary generalised reverse charge mechanism (hereinafter 'GRCM') with a certain threshold per invoice which would derogate from one of the general principles of the current VAT system, as regards the fractionated payment system, in order to address endemic carousel fraud. Carousel fraud finds notably its root in the current exemption for intra-community supplies that allows for goods to be obtained VAT-free. A number of traders engage subsequently in tax fraud by not paying to the tax authorities the VAT received from their customers. Those customers, however, being in receipt of valid invoices, remain entitled to a tax deduction. The same goods can be supplied several times by including again exempt intra-community supplies. Similar carousel fraud can also occur when services are supplied. By designating the taxable person to whom the goods or services are supplied as the person liable for the VAT, the derogation would remove the opportunity to engage in that form of tax fraud.
- (4) In order to limit the risk of fraud shifting between Member States, all Member States that fulfil certain criteria as regards their fraud level, in particular in relation to carousel fraud, and who are able to establish that other control measures are not sufficient to combat that fraud, should be allowed to use a GRCM.

---

<sup>1</sup> Communication from the Commission to the European Parliament, the Council and the European Economic and Social Committee on an action plan on VAT - Towards a single EU VAT area - Time to decide (COM(2016)148 final of 7.4.2016).

- (5) In addition, also bordering Member States that encounter a serious risk of shift of fraud to their territory, because of the authorisation of that mechanism in another Member State, should be allowed to use the GRCM, where other control measures would be insufficient to combat that risk of fraud.
- (6) If Member States choose to apply the GRCM, they should apply it to all supplies of goods and services above a defined threshold per invoice. The GRCM should not be restricted to any specific sector.
- (7) Member States choosing to apply the GRCM should introduce specific electronic reporting obligations on taxable persons so as to ensure the effective functioning and monitoring of the application of the GRCM. They should detect and prevent all new forms of tax fraud.
- (8) In order to be able to assess whether the introduction of the GRCM in one Member State does not result in fraud shifting towards other Member States and to be able to assess the degree of possible disturbances to the functioning of the internal market, it is appropriate to provide a specific obligation to exchange information between Member States that apply the GRCM and the other Member States. All exchanges of information are subject to applicable personal data protection and confidentiality provisions. Those provisions provide exemptions and restrictions for safeguarding the interests of the Member States or of the Union in the area of taxation.
- (9) In order to assess the effect of the application of the GRCM on fraudulent activities in a transparent manner, pre-defined evaluation criteria should be established by those Member States as to enable an assessment of the level of fraud before and after the application of the GRCM.
- (10) The decisions authorising the application of the GRCM would have a budgetary impact which for one or more Member States could be significant. Accordingly, the power to adopt the individual decision authorising the application of the GRCM should be conferred on the Council.

- (11) Member States choosing to apply the GRCM should request the Commission to authorise the application of the GRCM and provide relevant information in order to enable the Commission to assess that request. Where necessary, the Commission should be able to request additional information.
- (12) Given the unexpected effects that such a GRCM might have on the functioning of the internal market because of the possible shift of fraud to other Member States that do not apply it, the Council should be able, as a safeguard measure, to repeal all implementing decisions approving the application of the GRCM. In view of the need to react quickly in a situation where considerable negative impact on the internal market is established, reversed unanimity voting should be used.
- (13) In view of the uncertain effects that such a mechanism might have, it should be limited in time.
- (14) To closely monitor the impact on the internal market, all Member States should, in case the GRCM is used at least in one Member State, present reports to the Commission as to enable an assessment of the impact on the fraud, the compliance costs for businesses and a shift in fraudulent activities due to the application of the GRCM.
- (15) Directive 2006/112/EC should therefore be amended accordingly,

HAS ADOPTED THIS DIRECTIVE:

*Article 1*

The following Article 199c is inserted in Directive 2006/112/EC:

*"Article 199c*

1. Until 30 June 2022 a Member State may, as a Generalised Reverse Charge Mechanism (GRCM), provide that the person liable for payment of VAT is the taxable person to whom all supplies of goods and services are made above a threshold of EUR 10 000 per invoice, by derogation from Article 193.

A Member State wishing to introduce the GRCM shall comply with the following conditions:

- (a) it had, according to the method and figures in the 2016 final report dated 23rd August 2016 on the VAT gap published by the Commission, a VAT gap in 2014, expressed as a percentage of the VAT Total Tax Liability, of at least 5 percentage points above the Community median VAT gap; and
- (b) it has a carousel fraud level within its total VAT gap of more than 25%; and
- (c) it establishes that other control measures are not sufficient to combat carousel fraud on its territory.

The Member State shall attach to the request referred to in paragraph 4 the calculation of the VAT gap according to the method and figures available in the latest report on the VAT gap published by the Commission.

- 2. Until 30 June 2022, a Member State may provide that the person liable for payment of VAT is the taxable person to whom supplies of goods and services are made above a threshold of EUR 10 000 per invoice where this Member State:
  - (a) has a common border with a Member State that is authorised to apply the GRCM; and
  - (b) shall provide the Commission with information that a serious risk of shift of fraud towards its territory exists because of the authorisation of the GRCM to that Member State; and
  - (c) establishes that other control measures are not sufficient to combat fraud on its territory.
- 3. Member States that apply the GRCM shall establish appropriate and effective electronic reporting obligations on all taxable persons and, in particular, on taxable persons who supply or receive the goods or services to which this mechanism applies.

4. Member States wishing to apply the GRCM shall submit a request to the Commission and provide the following information:
  - (a) a detailed justification that the conditions referred to in paragraph 1 or 2 are fulfilled; and
  - (b) the starting date of the application of the GRCM and the period to be covered by it; and
  - (c) actions to be taken to inform taxable persons of the introduction of the application of the GRCM; and
  - (d) a detailed description of the accompanying measures referred to in paragraph 3.

If the Commission considers it does not have all the necessary information, it shall request additional information within one month of receipt of the request. The requesting Member State shall submit the required information within a month of receipt of the notification.

5. Where the Commission considers that the request complies with the requirements referred to in paragraph 4, it shall, no later than three months after it has received all the necessary information, submit a proposal to the Council. The Council, acting unanimously on such proposal from the Commission, may authorise the requesting Member State to apply the GRCM. Where the Commission considers that the request does not comply with such requirements, it shall, within the same deadline, communicate its reasons to the requesting Member State and to the Council.
6. In case of considerable negative impact on the internal market, the Commission shall propose the repeal of all the implementing decisions referred to in paragraph 5, at the earliest six months after the entry into force of the first implementing decision authorising a Member State to apply the GRCM. Such repeal shall be deemed to be adopted by the Council unless the Council decides by unanimity to reject the Commission's proposal within 30 days of the Commission's adoption thereof.

Considerable negative impact shall be considered established, where the following conditions are fulfilled:

- (a) at least one Member State, not applying the GRCM referred to in paragraphs 1 and 2, informs the Commission of an increase of VAT fraud on its territory due to the GRCM; and
- (b) the Commission establishes, including on the basis of the information provided by the Member States referred to in point (a), that such increase is directly linked with the application of such a mechanism in one or several Member States.

7. Member States applying the GRCM shall submit in electronic format to all Member States:

- (a) the names of the persons who, in the twelve months preceding the date of application of the GRCM, have been subject to proceedings, whether criminal or administrative, for VAT fraud; and
- (b) the names of the persons, including in the case of legal persons the names of their directors, whose VAT registration in that Member State is terminated after the introduction of the GRCM; and
- (c) the names of the persons, including in the case of legal persons the names of their directors, who have failed to submit a VAT return for two consecutive tax periods after the introduction of the GRCM.

The information in (a) and (b) above shall be submitted no later than 3 months after the introduction of GRCM and shall be updated every three months thereafter. The information in (c) shall be submitted no later than nine months from the introduction of GRCM and shall be updated every three months thereafter.

Member States applying the GRCM shall submit an interim report to the Commission no later than one year after the start of application of the GRCM. This report shall provide a detailed assessment of the effectiveness of the GRCM. Three months after the end of the application of the GRCM, Member States applying the mechanism shall submit a final report on its overall impact.

8. Member States not applying the mechanism shall submit an interim report to the Commission as regards the impact in its territory of other Member States applying the GRCM no later than 30 June 2019, insofar the GRCM will have been applied for at least one year in one Member State by that date.

If at least one Member State applies the GRCM, Member States not applying the mechanism shall submit a final report to the Commission as regards the impact in its territory of other Member States having applied the GRCM no later than 30 September 2022.

9. In the reports referred to in paragraph 7, Member States shall assess the impact of the application of the GRCM on the basis of the following evaluation criteria:

- (a) the evolution of the VAT gap;
- (b) the evolution of the VAT fraud, notably carousel fraud and fraud at the retail level;
- (c) the evolution of the administrative burdens on taxable persons;
- (d) the evolution of administrative costs for the tax administration.

10. In the reports referred to in paragraph 8, Member States shall assess the impact of the application of the GRCM on the basis of the following evaluation criteria:

- (a) the evolution of the VAT fraud, notably carousel fraud and fraud at the retail level;
- (b) shift of fraud from Member States applying or having applied the GRCM."

*Article 2*

This Directive shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply until 30 September 2022.

*Article 3*

This Directive is addressed to the Member States.

Done at Brussels,

*For the Council*

*The President*
