# Europe 2020 Employment Performance Monitor Draft

In line with the EPSCO Council's commitment to put its expertise on employment and labour market policies at the service of the European Council for a successful implementation of the Europe 2020 Strategy, the Employment Committee was mandated<sup>1</sup> to produce an "Employment Performance Monitor" (EPM), which could be used to identify at a glance the main employment challenges for the European Union and for each Member State.

Like the June 2014 version<sup>2</sup> of the EPM, the 2015 June version is based on the findings of the Europe 2020 Joint Assessment Framework (JAF). The JAF is an indicator-based assessment system prepared jointly by the Employment Committee, the Social Protection Committee (SPC) and the Commission, covering general and specific policy areas under the Employment Guidelines, with the objective to identify key challenges in these areas and support Member States in establishing their priorities. The JAF comprises two main elements:

- Monitoring and assessment of main challenges under the Employment Guidelines through a three-step methodology including a quantitative and qualitative assessment
- Quantitative monitoring of progress towards the EU headline and related national targets.

The "EPM" presented here reflects the results of both JAF components for the employment policies' area. The three parts of the Monitor aim at providing a good overview results both at country level and across all Member States. These results could also be useful for macroeconomic surveillance.

This 2015 June version of the EPM also includes the updated benchmarking<sup>3</sup> of the Europe 2020 headline targets relating to the labour market and the main indicators for the development at

<sup>2</sup> Council Doc. 10763/1/14 Rev 1

<sup>&</sup>lt;sup>1</sup> See Council Doc. 14478/10

<sup>&</sup>lt;sup>3</sup> As mentioned in the "Communication: Towards a job-rich recovery" COM(2012) 173 final, section 3.3: "...The Commission proposes: to reinforce coordination ad multilateral surveillance in the area of employment policies by: -

the labour market. The benchmarking tool is used as an integrated tool in the analysis of the key challenges. Also the EPM includes a table with the main indicators from the ten policy areas giving the level, the y-o-y changes and the changes for the three recent years for each Member State. This will serve as additional information in the process to depict the areas with positive and negative development. As can be seen from this description, the Employment Performance Monitor is continuously under development and revision in order to improve and assure it is updated to the latest needs and developments.

The graphs on "the progress towards the EU-28 respectively national employment rate headline target" have been updated with the data from the latest Economic spring 2015 forecast from the Commission<sup>4</sup>. The table on the "national employment rate targets compared to current and projected 2020 employment rates (all age group 20-64)" has been updated with the available 2015 and 2016 forecast from the Commission Economic spring forecast.

The benchmark tables and graphs are included in the Annex C of the EPM.

The table on "Key indicators on labour market performance" contains indicators for all Joint Assessment Framework Policy Areas. In order to efficiently use the benchmark a column for each country shows the benchmark level. The figures which are in bold signify that the country is among the 5 highest performers for that specific indicator and those that are in italic signify that the country is among the 5 lowest performers for that specific indicator.

The EPM is based on the latest available yearly data<sup>5</sup>. It is continuously under development and revision in order to improve and assure it is updated to the latest needs and developments.

The Joint Assessment Framework results, and hence the Employment Performance Monitor, respect the role of national parliaments and social partners and differences in national systems, such as the systems for wage formation.

publishing together with the draft Joint Employment Report and on an annual basis, a benchmarking system with selected employment indicators"

<sup>&</sup>lt;sup>4</sup> Economic Forecast spring 2015

<sup>&</sup>lt;sup>5</sup> Labour Force Survey (LFS): latest available yearly data is for 2014

Percentage of adult population participating in education and training					6.7					40.5	10.7	
Course Courses deschara (Inl	bour market statistics, nation	6.2 d	7.1	6.6	6.7	7.1			9.0	10.5 b	10.7	

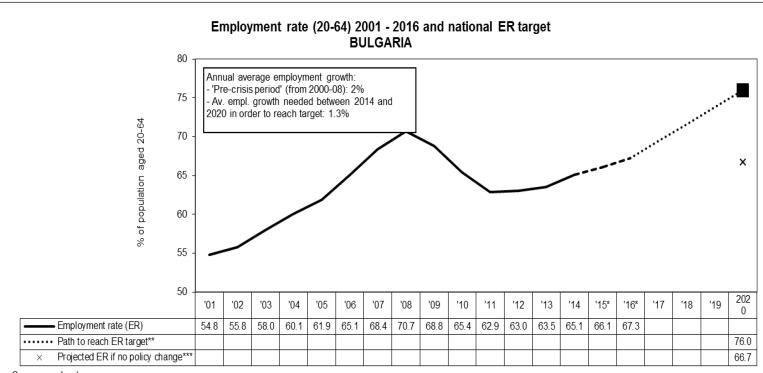

Source: Eurostat database (labour market statistics, national accounts), National Reform Programmes
Notes: b - break in series, p - provisional, c - confidental, e - estimated, n - not siginificant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, ":" - not available
Additional note: the benchmark is normalised in the following way: average of highest 5-2100, average of lowest 5-0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers

# 3. Key employment challenges Belgium, June 2015

Employment policy area	Key employment challenge	Particularly good labour market outcome
Increase     labour market     participation	Participation is low for older workers. Duration of working life is below the EU average, particularly for men. Low labour market participation of people with a migrant background.	
2. Enhancing labour market functioning; combating segmentation	Risk of labour market segmentation, especially for the young, with job tenure for the 15-24 shorter than the EU average.	
3. Active labour market policies	Average long-term unemployment incidence despite significant investment in ALMP.	
4. Adequate and employment oriented social security systems	Unemployment traps significantly higher than the EU average for some types of households.	At-risk of In-work poverty below the EU average.
5. Work-life balance	Significant differentiation in the uptake of early child education and care (ECEC).	
6. Job creation	Tax wedge on labour costs significantly higher than the EU average.	
7. Gender equality	Inactivity trap for second couple member and low-wage trap for second earner significantly higher than the EU average.	
8. Improving skill supply and productivity; Lifelong learning	Participation in LLL is below average. Transitions in labour status and pay level below the EU average.	
9. Improving education and training systems	Significant and longstanding educational inequalities linked to socio-economic and migrant background	
10. Wage setting mechanisms and labour cost developments	Closing entirely the labour cost gap and avoiding the emergence of new gaps in the future.

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers

# 3. Key employment challenges Bulgaria, June 2015

Employment Policy Area	Key Employment Challenge	Particularly Good labour market outcome
Increase labour market participation	Employment rate is low, in particular for men, younger workers and low-skilled.  The youth NEET is significantly higher than the EU-average (some positive developments for men).  The duration of working life is below EU average with men being significantly below.	
2. Enhancing labour market functioning; combating segmentation	Share of newly employed young and hiring rate below EU average.	
3. Active labour market policies	Long-term unemployment high and ALMP spending and activation is low.	
4. Adequate and employment oriented social security systems	Unemployment trap higher than the EU-average.	Low wage traps lower and net replacement rates after 6 months higher than the EU average.
5. Work-life balance	Uptake of childcare low, with positive developments.	
6. Job creation	Employment growth still significantly negative on 3 years despite a fragile reversal in 2014, and low job vacancy rate.	
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Lifelong learning and adult education participation below EU average.  Negative developments regarding youth with at least upper secondary education.	
	Limited labour market relevance of education and training, including work-based learning.  Low transitions in labour status and pay level.	
9. Improving education and training systems	Weak link between the education system and the labour market needs, with low spending on education. Early and tertiary education lower than EU average, with negative developments as regards early leavers.	
10. Wage setting mechanisms and labour cost developments	Unit labour costs have increased significantly.

3. Key employment challenges Czech Republic, June 2015

Employment Policy Area	hallenges Czech Republic, Jun Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	Employment rate of low-skilled is low.	Employment of non-EU nationals is high.
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies	Insufficient monitoring of efficiency and effectiveness of the public employment service.	
Adequate and employment oriented social security systems		The at-risk of poverty rate and the in-work poverty are low.
5. Work-life balance	Negative labour market impact of parenthood is high with very strong employment impact of motherhood.  Female inactivity due to lack of care services and a relatively long parental leave is high.  The uptake of childcare is low, especially for children below 3 years old.	
6. Job creation		
7. Gender equality	Gender employment gap is high. Gender pay gap is high.	
8. Improving skill supply and productivity; Lifelong learning		The share of well-educated adult population (adults and youth with at least upper secondary education) is high.
9. Improving education and training systems		Tertiary education attainment of 30-36 strongly increases over recent years. Low number of early leavers from education and training (18-24).
10. Wage setting mechanisms and labour cost developments

3. Key employment challenges Denmark, June 2015

<b>Employment</b>	Key employment challenge	Particularly Good labour market
policy area		outcome
Increase labour market participation	The labour market potential of immigrants from outside the EU remains underutilised.	Rate of young NEETs (15-24) is significantly better than EU average.
2. Enhancing labour market functioning; combating segmentation		Share of long term unemployed in total unemployment, hiring rate, share of newly employed and share of temporary employees due to education/training (men) are significantly better than the EU average.
3. Active labour market policies		
4. Adequate and employment oriented social security systems	Unemployment trap and low-wage-trap (tax rate on low wage earners) are higher than EU average.  Inactivity trap and low wage trap for second member of a couple is significantly higher than the EU-average.	Share of long-term unemployed in total unemployment is significantly better than the EU average.  In-work poverty risk is significantly better than EU-average.  Net replacement rate (12 months, for all
		family types) is significantly better than EU-average.
5. Work-life balance	Employment impact of parenthood showing some negative developments.	Childcare (3 to mandatory school) above 30 hours is significantly above EU average.  Rate of inactivity and part/time work due to family responsibility is significantly better than EU-average.
6. Job creation		
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Youth attainment level (20-24) is lower than EU average.	Both public spending (% GDP) on human resources, the share of participants in lifelong learning (25-64) and share of inactive in education or training are significantly better than EU-average.
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers

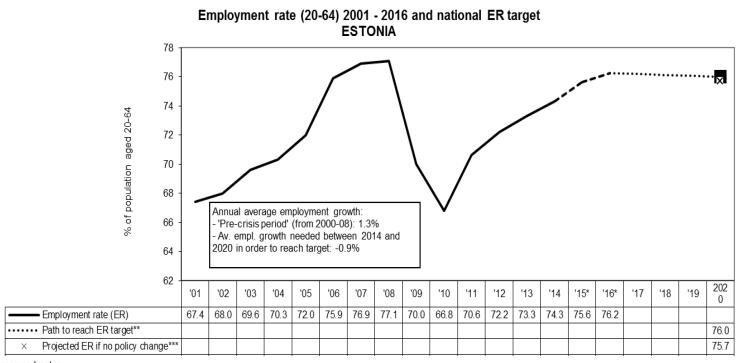

\*In the case of Germany, the national target on tertiary education includes post-secondary education (ISCED 4)

3. Key employment challenges Germany, June 2015

	challenges Germany, June 2015	Doutlander word lake
Employment policy	Key employment challenge	Particularly good labour
area		market outcome
Increase labour market participation		Employment rate is high in particular for men and older workers.  Unemployment ratio for young and NEET rates are at very low levels.
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies	Activation of LTU is stagnating.	
4. Adequate and employment oriented social security systems	High at risk of poverty especially for unemployed.  High tax wedge in particular for low-wage and 2 <sup>nd</sup> income earners.	
5. Work-life balance	Part-time work due to family responsibilities is higher than the EU-average in particular for women.  Negative employment impact of parenthood.	
6. Job creation		High number of vacancies.
7. Gender equality	Persistently high gender pay gap.	
8. Improving skill supply and productivity; Lifelong learning	Skills supply bottlenecks for high-skilled workers.	
9. Improving education and training systems	Despite better results in PISA 2012 low education attainments of people with social economic disadvantage and migrant background persists.	ESL rate decreased to below the national target of 10%.
10. Wage setting mechanisms and labour cost developments

3. Key employment challenges Ireland, June 2015

Employment policy	Ment challenges ireland, June 2015  Key employment challenge	Particularly good
area	Rey employment challenge	labour market outcome
Increase labour market participation	Employment for low-skilled is below the EU average. Youth unemployment (15-24) and NEET rates above EU average but showing improvements.	
2. Enhancing labour market functioning; combating segmentation		
3. Active labour market policies	Long-term unemployment is high but showing improvements.  Adjustments of the employment services in terms of effectiveness and capacity to address particular challenges of specific groups of unemployed, including long-term unemployed.	
Adequate and employment oriented social security systems	Disincentives to work for certain categories of population.	In-work poverty risk low.
5. Work-life balance	Inactivity due to personal and family responsibilities is higher than EU average.  Availability of affordable and quality child care and its possible impact on full labour market participation, in particular of females  Child care >30 hours a week (3 - mandatory school) lower than the EU average.	Child care <30 hours a week (3 - mandatory school) higher than the EU average.
6. Job creation		
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Lifelong learning participation significantly below EU average.  Provision of appropriate re-skilling and up-skilling opportunities to ensure the education and training system provides the types of skills required by the economy.	Completion of tertiary education (25-64) significantly above EU average.
9. Improving education and training systems	Participation in VET below EU average.	Population with tertiary educational attainment is the highest in EU.  Below EU average and decreasing ESL rate.
10. Wage setting mechanisms and labour cost developments

Carrage Francisco de database de la Constantina del Constantina de la Constantina del Constantina de la Constantina de l	hour market statistics, nation	-1	lastana I Dafama	D								

Source: Eurostat database (labour market statistics, national accounts), National Reform Programmes

Notes: b - break in series, p - provisional, c - confidental, e - estimated, n - not significant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, "." - not available

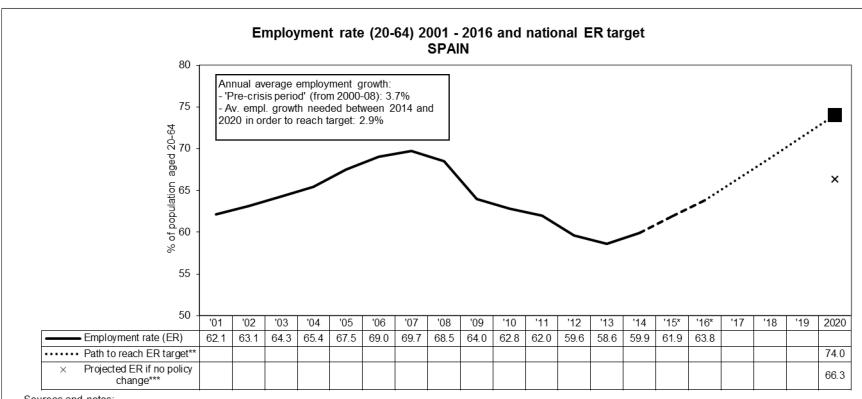

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nimbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers.

3. Key employment challenges Greece, June 2015

3. Key employment of	Doution leady accel laborer	
Employment policy area	Key employment challenge	Particularly good labour market outcome
Increase labour market participation	Employment is significantly below the EU average in general but especially for women, older people and youth.  High incidence of young NEET.	
Enhancing labour market functioning; combating segmentation		
3. Active labour market policies	Long-term unemployment is high.  Need to further enhance the capacity of the Public Employment Service OAED to deliver better designed ALMPs.	
Adequate and employment oriented social security systems	At risk of in-work poverty is higher than the EU-average.  At-risk-of-poverty rate of the unemployed around the EU average but showing a significantly negative development.  Lack of a nation-wide employment-oriented	
	guaranteed minimum income scheme (GMI) and need to address the shortcomings of the unemployment insurance scheme.	
5. Work-life balance	Uptake of childcare above 30 hours is low.	
6. Job creation	Employment growth below EU average.	
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Very low participation in LLL.  Need to further increase the connection of Vocational Education and Training, Apprenticeships and Life Long Learning to the labour market needs.	
9. Improving education and training systems	Promotion of an evaluation culture at all levels and sectors of education.	
10. Wage setting mechanisms and labour cost developments

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nimbers in bold: the country is among the 5 highest performers for this indicator. The numbers in Italic: the country is among the lowest 5 performers

3. Key employment challenges France, June 2015

	challenges France, June 2015	
Employment policy area	Key employment challenge	Particularly good labour market outcome
Increase labour market participation	Relatively high unemployment among lower educated young (ISCED 0-2).  Low employment rate for people aged (60-64).  Low employment rate of non-EU nationals.	Employment rate of people aged 50-59 is above the EU average and increasing.
2. Enhancing labour market functioning; combating segmentation	Transition between temporary and permanent contracts is below the EU average.  Continuous increase of very short-term contracts in new hires.  Involuntary temporary employment is higher than the EU average.	
Active labour market policies		
4. Adequate and employment oriented social security systems		At-risk of poverty for unemployed low.
5. Work-life balance		
6. Job creation	Tax rate at 67% of average wage remains high compared to EU average, but decreasing.	
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Implement recent life-long learning reforms to tackle unbalanced access to training depending of the size of the company, the level of qualification or status on the labour market.	High share of adult population with tertiary education.
9. Improving education and training systems	Widening educational and skills inequalities at young and adult ages.	
10. Wage setting mechanisms and labour cost developments	Insufficient adjustment of wages to inflation and productivity.

3. Key employment challenges Italy, June 2015

Employment Policy Area	Key employment challenge	Particularly good labour market outcome
Increase labour market participation	Low employment rate for women.	Employment rate of older workers and duration of
	Increasing and very high youth unemployment rate; very high NEETs, rate, many of them inactive.	working life have increased though still lower than EU
	Increasing but still low duration of working life, especially for women.	average.
2. Enhancing labour	Still segmented labour market with high share of involuntary	
market functioning; combating segmentation	temporary work, especially for young people. Measures adopted on the promotion of permanent contracts potentially leading to improvements.	
Active labour market policies	High long-term unemployment, especially among young people,	
policies	Public Employment Services performance showing huge regional disparities. A stronger link with the enterprises and a coordinated upscaling of staff capacities needed to improve quality of services nationwide	
Adequate and	At risk of in-work poverty high.	Net replacement rates after 6
employment oriented social security systems	Further efforts needed to streamline social assistance and extend its coverage.	months of unemployment show some improvement.
5. Work-life balance	Uptake of childcare for age 0-3 (less than 30h per week) is below the EU average.	Uptake of childcare for age 3 to mandatory school age of 30 hours and more is significantly better than EU average.
6. Job creation	High, although recently decreased, tax wedge on labour cost.	
7. Gender equality	Gender employment gap persist higher than the EU average but shows some positive developments. The low wage trap for second earner income is high.	Gender pay gap is below the EU average.
8. Improving skill supply and productivity; Lifelong	Educational attainment level low, in particular for tertiary education.	
learning	Lifelong learning and public spending on human resources low.	
	Allocation and rewarding of labour not reflecting skills	
9. Improving education and training systems	High share of early school leavers but some positive developments.	
	Low share of population aged 30-34 with tertiary education, though increasing.	
10. Wage setting mechanisms and LC developments	Productivity evolution still unsatisfactory.

Notes: b - break in series, p - provisional, c - confidental, e - estimated, n - not significant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, "." - not available

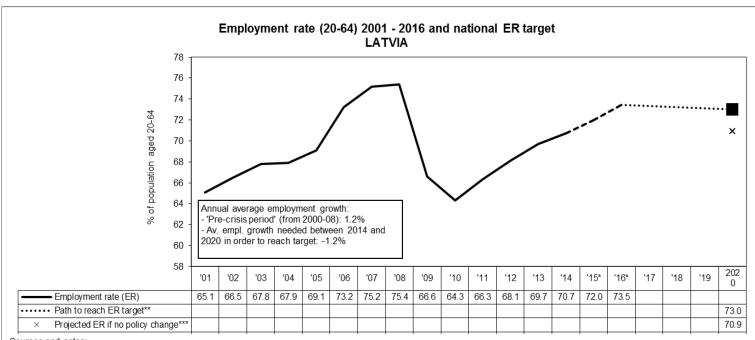

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in Italic: the country is among the lowest 5 performers.

3. Key employment challenges Cyprus, June 2015

Employment Policy Area	Key Employment Challenge	Particularly Good Outcome
Increase labour     market participation	Youth Unemployment and NEETs are higher than the EU-average.	
	Employment rate deteriorating.	
	Insufficient capacity of PES to deal with increasing unemployment and the need to implement the Youth Guarantee.	
<ol><li>Enhancing labour market functioning;</li></ol>	Involuntary temporary employment is higher than the EU-average, especially for women.	
combating segmentation	Insufficient capacity of the labour inspection to tackle undeclared work.	
3. Active labour market Policies	Long-term unemployment rate is increasing.	
4. Adequate and employment oriented social security systems		The risk of poverty for unemployed is lower than the EU-average.
- Systems		Transitions by pay levels significantly better than EU-average.
5. Work-life balance	High inactivity or part-time work due to lack of care facilities.	
6. Job creation	Uptake of childcare (0-3) below 30 hours below the EU average.  Overall employment significantly worse than EU-average.	
7. Gender equality	High gender employment gaps among older workers.	Employment gender gap 20-29 significantly better than EU-average.
8. Improving skill supply and	Decreasing level of lifelong learning.	High public spending on education.
productivity; Lifelong learning		Share of adult population (aged 25-64) having attained high (tertiary) education significantly higher than EU average.
9. Improving	Early education is low.	Tertiary education for 30-34 is better than
education and training systems	Very low participation and lack of effectiveness of Vocational Education and Training to meet the needs of the labour market	EU-average.

3. Key employment challenges Latvia, June 2015

Employment policy	Key employment challenge	Particularly good labour
area		market outcome
Increase labour market participation	Duration of working life for men below the EU average.	Employment rate for youth, women and older workers is above the EU average and show positive developments in recent years.
		Youth unemployment decreased considerably in recent years, and has fallen below EU average.
Enhancing labour		Low charo of involuntary
market functioning; combating segmentation		Low share of involuntary temporary contracts. Satisfactory transition rates to permanent employment indicate low levels of segmentation.
Active labour market policies	Low ALMP participation (activation support) and expenditure on ALMPs as % of GDP but show some positive developments	To the second se
4. Adequate and employment oriented	Unemployment trap shows some positive development but remains high.	
social security systems	Net replacement rate after 6 months of unemployment is below the EU average for all household compositions, but shows some positive development.	
	Low coverage and adequacy of social assistance benefits and insufficient social and labour market reintegration measures for the benefit recipients.	
5. Work-life balance	Uptake of childcare for age 0-3 and for age 3 to mandatory	
	school age (less than 30h per week) is below the EU average but increasing.	
6. Job creation	Tax wedge on low wage earners is higher than the EU-average.	
7. Gender equality	arorago.	
8. Improving skill supply and productivity; Lifelong	Insufficient provision of career guidance in schools.	High labour productivity growth over 3 years
learning	Lifelong learning below average, with negative trends.	over 5 years
9. Improving education and training systems	Insufficient labour market relevance of vocational education and training, but shows positive developments.	
	On higher education: inadequate public funding system, low levels of internationalisation and lack of internationally-approved accreditation system.	
10. Wage setting mechanisms and labour cost developments

3. Key employment challenges Lithuania, June 2015

Employment Policy Area	Key Employment Challenges	Particularly good labour market outcome
Increase labour     market participation	Employment rate for low-skilled improved but still considerably below the EU average.	Unemployment rates for total population and youth show positive developments.
	Rapid shrinking working age population.	Employment rates for older workers and women are higher than the EU average.
2. Enhancing labour market functioning; combating segmentation	Modernisation of employment protection legislation.	
3. Active labour market policies	ALMP participation (activation support) and expenditure are low.	
Adequate and employment oriented social security systems	Net replacement rate of one earner couple, two children, after 6 months of unemployment low.  Coverage and adequacy of unemployment benefits.	
5. Work-life balance	Low provision of early childhood care.	
6. Job creation	Tax wedge for low income earners above average	
7. Gender equality		Low employment impact of parenthood.
8. Improving skill supply and productivity; Lifelong learning	Labour market relevance of education.  Lifelong learning (25-64) is persistently below the EU average.	High shares of tertiary educated.
9. Improving education and training systems	Participation in VET secondary education is low.  Basic skills; early childhood care.	Low share of early school leavers.
10. Wage setting mechanisms and labour cost developments

Notes: b - break in series, p - provisional, c - confidental, e - estimated, n - not significant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, "-" - not available

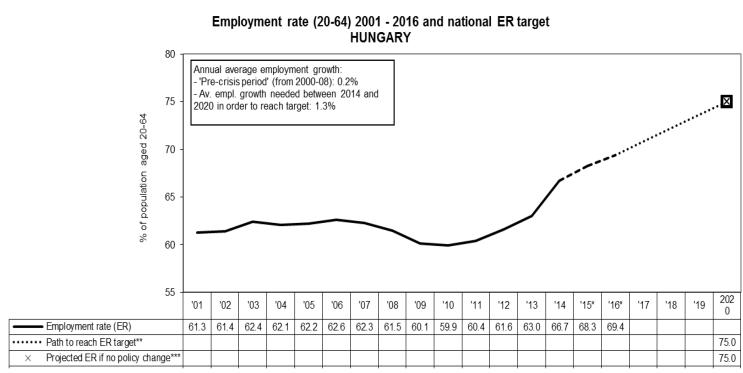

Additional note: the benchmark is moralised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nimbers in bold: the country is among the 5 highest performers for this indicator. The numbers in Italic: the country is among the lowest 5 performers

3. Key employment challenges Luxembourg, June 2015

	ent challenges Luxembourg, June 20	
Employment policy area	Key employment challenge	Particularly good labour market outcome
Increase     labour market     participation	Low employment rate of older workers yet increasing over the last years.	Employment rate of women is increasing.
2. Enhancing labour market functioning; combating segmentation	Low duration of working life with improving trend.	
3. Active labour market policies	Activation policies not yet [entirely] sufficient.	
4. Adequate and employment oriented social security systems	In-work at risk of poverty rate remains high. Financial disincentives to work.	
5. Work-life balance		
6. Job creation		High employment growth over 3 years.
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning		
9. Improving education and training systems	Educational outcomes remain unsatisfactory for children of people with migrant background.	The share of the population with tertiary education is significantly above EU-average.  Very low NEET levels.
10. Wage setting mechanisms and labour cost developments	Unit labour cost rising faster than the average of the EU15 since 2000.  Labour productivity growth relatively unsatisfactory over last 3 years

3. Key employment challenges Hungary, June 2015

3. Key employment	challenges Hungary, June 2015	
	Key Employment Challenge	Particularly Good labour market Outcome
Increase labour market participation	Low employment rates for low skilled and for older workers.  NEET rates, after peaking in 2013, show significant improvement in 2014.	Employment rates showing a significantly positive development.
2. Enhancing labour market functioning; combating segmentation		
3. Active labour market policies		
Adequate and employment	Net replacement rate after 6 months below the EU average.	
oriented social security systems	Short duration of unemployment benefits.	
5. Work-life balance	Low offer of childcare aged 0-3, but positive developments in increasing childcare facilities in recent years. High employment impact of parenthood on females.	
6. Job creation	High tax wedge particularly for low income earners but with targeted tax reliefs.	Employment growth showing a positive development.
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Low lifelong learning participation.	High share of adult population (25-64) with at least upper secondary education.
9. Improving education and training systems	Early school leavers rate is slightly above the EU-average and shows some negative overall trend in the last 3 years, despite the improvement in 2014.	
	Tertiary education below EU average but shows positive development.	
	Need to further improve the quality of public education and tackle the low educational attainment of students from vulnerable groups and promote inclusive mainstream education for vulnerable groups, in particular Roma.	
10. Wage setting mechanisms and		
labour cost developments

3. Key employment challenges Malta, June 2015

	t Challenges Marta, June 2015	<b>B</b>
Employment policy area	Key employment challenge	Particularly good labour market outcome
Increase labour market participation	The female employment rate remains low despite considerable improvements.  The employment rate for older workers remains below the EU average, in particular for female workers, despite small improvements.  Despite positive developments the duration of working life is still low.  Low employment rate of persons with disabilities.	Employment rate of youth is significantly better than EU-average. Strong increase in female employment.
2. Enhancing labour market functioning; combating segmentation		Rate of involuntary temporary contracts is low.
3. Active labour market policies	Participation in ALMP (activation support) is low, but the trend is positive.	Overall unemployment levels consistently below EU average.
4. Adequate and employment oriented social security systems		
5. Work-life balance	Insufficient flexible working arrangements in the private sector.	Considerable increase in the offer of child care.
6. Job creation		Overall employment growth in the last few years has been higher than EU average.
7. Gender equality	Despite positive developments the gender employment gap is persisting.  Increasing labour force participation of the 2nd couple member is a persisting challenge.	Gender pay gap is much narrower than the EU average.
8. Improving skill supply and productivity; Lifelong learning	Educational attainment is very low but positive developments are recorded.	
	Participation in Life long learning remains low.  Participation of inactive in education or training is low.	
	Labour market relevance of education.	
	Teaching skills/quality of teaching need to be more effective to address early school leaving and basic skills attainment.	
9. Improving education and training systems	Early school leavers remains strongly above the EU level.  The tertiary educational attainment for the age group 30-34 is significantly below EU level but increasing.	
10. Wage setting mechanisms and labour cost developments

Notes: b - b reak in series, p - provisional, c - confidental, e - estimated, n - not significant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, ":" - not available

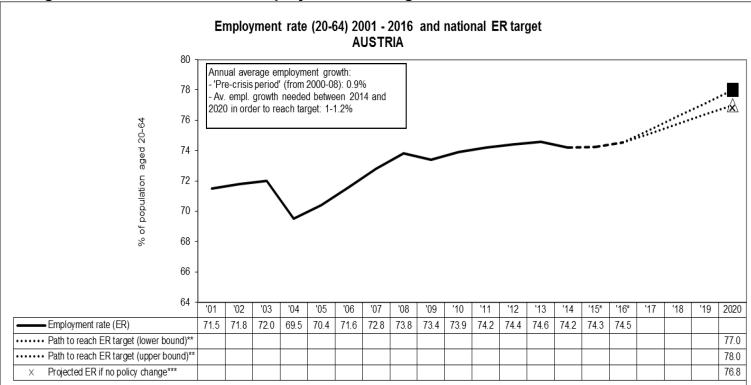

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers

3. Key employment challenges The Netherlands, June 2015

Employment	Key employment challenge	Particularly good labour market
policy area		outcome
Increase labour market participation	Low labour market participation and weak labour market outcomes for people with a non-EU migrant background.  Low labour market participation of people with a labour disability.	High youth employment rate (age group 20-29).  Low NEET rate.  High employment rate of older workers (55-64) and high duration of working life.  High activity rate for women.
2. Enhancing labour market functioning; combating segmentation	Labour market segmentation, with high share of temporary employees and low transition rates towards permanent employment.	
3. Active labour market policies		
4. Adequate and employment oriented social security systems	High inactivity and low wage traps, in particular for second earners.  Fiscal disincentives to work.	At risk of poverty rate is significantly lower than EU average.  High impact of social transfers in protecting the unemployed.  High level of transitions by pay level
5. Work-life balance		
6. Job creation		
7. Gender equality	High share of part-time work, especially for women, yet on a decreasing trend.	
8. Improving skill supply and productivity; Lifelong learning		
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments

3. Key employment challenges Austria, June 2015

Employment	Key Employment	Particularly Good Outcome
policy area	Challenge	
Increase labour market Participation	Low employment rates among older people but increasing trend.	Very good labour market performance and very low unemployment rate. Very low rate of NEETS (15-24). Very good performance on youth employment rates and very low youth unemployment rate.
2. Enhancing labour market functioning; combating segmentation		Very low share of involuntary temporary workers.
Active labour market policies		Very low rates of long-term unemployed relative to the total unemployment.
4. Adequate and employment oriented social security systems	High low wage trap for second earners.	Low long term unemployment.
5. Work-life balance	High part-time work due to family responsibilities. Low uptake of childcare above 30 hours.	
6. Job creation	High tax wedge on low wage earners.	High number of vacancies per 1000 unemployed.
7. Gender equality	High gender pay gap.	
8. Improving skill supply and productivity; Lifelong learning		
9. Improving education and training systems	Low achievers in reading.	Participation in VET secondary education is significantly higher than the EU average.
10. Wage setting mechanisms and labour cost developments

# 3. Key employment challenges Poland, June 2015

Employment policy area	Key employment challenge	Particularly good labour market outcome
Increase labour market participation	Despite significant recent improvements, low employment rate of women, low-skilled, older workers and youth.	
2. Enhancing labour market functioning; combating segmentation 3. Active labour market policies	High share of employees in temporary employment.  Despite recent amendments in the labour law, need of a comprehensive and coherent reform of the labour code addressing segmentation.  Adjustments of the PES to address particular challenges of specific groups of unemployed, in particular of the youth.	
4. Adequate and employment oriented social security systems  5. Work-life balance	High level of in-work poverty, but decreasing.  Low replacement rate for selected households after 12 months of unemployment.  Low provision of care facilities for children.	
6. Job creation		
7. Gender equality	High gender employment gap in particular among young (20-29) and older (55-64) workers.	
8. Improving skill supply and productivity; Lifelong learning	Low participation in lifelong learning activities.  The system of vocational education and training needs adjustments to the labour market requirements.	
9. Improving education and training systems 10. Wage setting mechanisms and labour cost developments	Quality of general and higher education and market relevance – mismatch between the skills and jobs on the Polish labour market.	Low level of early school leavers. Tertiary education attainment above the EU average.

Notes: b - break in series, p - provisional, c - confidental, e - estimated, n - not significant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, "." - not available

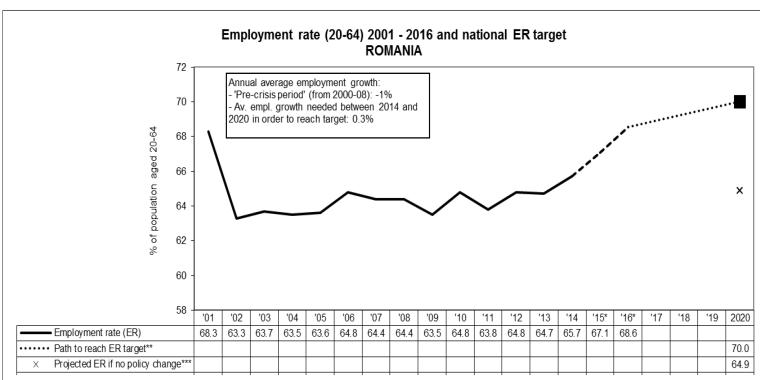

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers.

3. Key employment challenges Portugal, June 2015

Employment policy	challenges Portugal, June 2015  Key employment challenge	Particularly
area	rtey employment challenge	good labour market outcome
Increase labour market participation	Employment rate for older workers lower than the EU average, but showing some recent positive development. Decreasing duration of working life, but still above the EU average (either for men and women).  Youth unemployment rate and ratio are above the EU average.	
2. Enhancing labour market functioning; combating segmentation	Segmented labour market with a high incidence of involuntary temporary contracts.	
3. Active labour market policies	Long-term unemployment is higher than the EU-average. Need to further increase the capacity of the PES.	
4. Adequate and employment oriented social security systems		
5. Work-life balance		High take-up of childcare above 30 hours a week.
6. Job creation	Low job vacancy rate.	
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	Adult population with upper secondary and tertiary education below the EU average but showing positive developments Skills mismatch between labour demand and supply.	
9. Improving education and training systems	High rate of early school leavers but with recent improvement.  Tertiary education (30-36) is below the EU-average.	
10. Wage setting mechanisms and labour cost developments

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nmbers in bold: the country is among the 5 highest performers for this indicator. The numbers in italic: the country is among the lowest 5 performers

# 3. Key employment challenges Slovenia, June 2015

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
1. Increase	Low employment rates for low-skilled.	
labour market	Very low employment rates of older workers.	
participation	NEET rate below the EU average but slightly increasing. Short duration of working life.	
2. Enhancing	Involuntary temporary work for young people around EU	Some positive developments in decreasing
labour market	average but showing negative development.	share of employees in temporary work.
functioning;	Labour market segmentation, affecting particularly the young.	
combating	Labour market segmentation, affecting particularly the young.	
segmentation		
3. Active labour	High long term unemployment rate.	
market policies	Persistently low spending on ALMP and low participation of older workers and low skilled workers.	
4. Adequate	The unemployment trap is higher than the EU average.	
and employment		
oriented social	In-work poverty risk still below EU average but increasing.	
security systems	in-work poverty risk still below to average but increasing.	
5. Work-life		Employment impact of parenthood is
balance		significantly below the EU average.
		Good provision of childcare.
6. Job creation		Some positive development in the trends of newly self-employed.
7. Gender		Slovenia is performing very well in relation
equality		to gender pay gap.
		Low influence of care responsibilities on
8. Improving skill	Employment rate for low skilled (20-64) is below the EU	labour market participation of women.
supply and	average.	
productivity;		
Lifelong learning	Participation in lifelong learning around EU average but showing some negative developments.	
9. Improving		Early school leaving rate is one of the
education and		lowest in the EU.
training systems		High attainment levels in tertiary education.
		Higher annual expenditure in higher
		education per capita.
10. Wage	Adaptation of minimum wages that are not in line with productivity development.	Alignment of unit labour cost to productivity developments in recent years.
setting	productivity development.	developments in recent years.
mechanisms		
and labour cost		
developments

3. Key employment challenges Slovakia, June 2015

Employment Policy	Key Employment Challenge	Particularly Good labour
Area		market outcome
Increase labour market participation	Employment is low for all groups in particular youth and low-skilled.	
2. Enhancing labour market functioning; combating segmentation	Regional disparities – relatively low internal labour mobility.	
3. Active labour market policies	Long-term unemployment significantly higher than the EU-average.	
4. Adequate and employment oriented social security systems	Net replacement rates, in particular for households with more children and low work intensity below the EU average.	
5. Work-life balance	High inactivity due to family responsibility.  Childcare uptake is lower than the EU-average and for children below 3 extremely low.	
6. Job creation		
7. Gender equality	Gender employment gap is higher than the EU-average especially for young women. Employment impact of parenthood on women is among the highest in the EU high. Gender pay gap is high.	
8. Improving skill supply and productivity; Lifelong learning	Participation in lifelong learning is below the EU average. Participation of unemployed in education and training is lower than the EU average.	
9. Improving education and training systems	Spending on education is low.	Low level of early school leavers from education and training.
10. Wage setting mechanisms and labour cost developments

# 3. Key employment challenges Finland, June 2015

Employment policy area	Key employment challenge	Particularly Good labour market outcome
Increase     labour market participation	Youth unemployment ratio high.  Increasing trend for youth NEET (15-24).  Decreasing trend for the employment rate of older workers (55-64).	
2. Enhancing labour market functioning; combating segmentation	Comparatively short job tenures for youth (15-24).	
Active labour market policies	Long-term unemployment is increasing.	
4. Adequate and employment oriented social security systems		Low in-work poverty risk.
5. Work-life balance		
6. Job creation		
7. Gender equality		Comparatively small gender employment gap.
8. Improving skill supply and productivity; Lifelong learning		
9. Improving education and training systems		High share of well-educated adult population.
10. Wage setting mechanisms and labour cost developments	Wage increases (although more moderate recently) exceed productivity growth.

Notes: b - break in series, p - provisional, c - confidential, e - estimated, n - not significant, f - forecast, s - Eurostat estimate, z - not applicable, u - unreliable, "" - not available

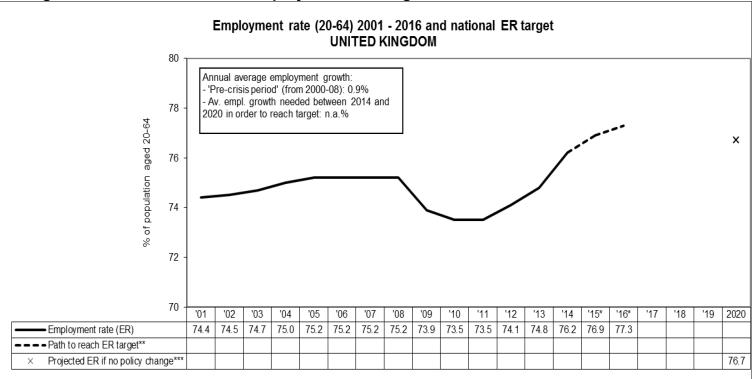

Additional note: the benchmark is normalised in the following way: average of highest 5=100, average of lowest 5=0. The interpretation of the benchmark is that it gives the relative distance to the highest 5 performers by subtracting that benchmark for a given country and indicator from the benchmark of the highest 5 performers, thus a 100. Nimbers in bold: the country is among the 5 highest performers for this indicator. The numbers in Italic: the country is among the lowest 5 performers.

# 3. Key employment challenges Sweden, June 2015

Employment policy	Key employment challenge	Particularly good labour
area		market outcome
Increase labour market participation	Youth unemployment ratio higher than EU average.	Very high employment rate especially for women as well as for the older population. Long duration of working life for men and women.
2. Enhancing labour market functioning; combating segmentation		Hiring rate and newly employed, including youth, significantly better than EU average. Share of long-term unemployment significantly better than EU average.
Active labour market policies		ALMP expenditure as % of GDP significantly higher than EU average.
Adequate and employment oriented social security systems		
5. Work-life balance		Uptake of childcare significantly higher than the EU average for the 0-3 age category.
6. Job creation	Tax wedge on labour costs higher than the EU average.	
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning		Participation in lifelong learning and adult education are significantly better than the EU average for employed as well as for unemployed/inactive.
9. Improving education and training systems	Share of low-achievers in reading, science and mathematics around the EU average, but showing significantly negative developments.  Deterioration of education outcomes and equity.	Annual expenditure in tertiary significantly higher than EU average.  Females with tertiary education significantly higher than EU average.
10. Wage setting mechanisms and labour cost developments

3. Key employment challenges United Kingdom, June 2015

	ment challenges United Kingdom, June 20	
Employment	Key employment challenge	Particularly Good labour
policy area		market outcome
1. Increase labour market participation	Youth unemployment, although below the EU average, is considerably higher than the overall unemployment rate.	High employment rate, including for women.
2. Enhancing labour market functioning; combating segmentation		High transition rates from temporary to permanent employment.
Active labour market policies		
4. Adequate and employment oriented social security systems	Comparatively low transitions by pay level.	
5. Work-life balance	High employment impact of parenthood.  High inactivity and part-time work due to lack of suitable care services for children and other dependants.	
6. Job creation		Strong employment growth with a high number of vacancies.
7. Gender equality		
8. Improving skill supply and productivity; Lifelong learning	High number of young people leaving school with poor basic skills.	
9. Improving education and training systems	Number of early school leavers is slightly above the EU average.	The share of the population with tertiary education is higher than EU average.
10. Wage setting mechanisms and labour cost developments

Sources: DG EMPL calculations on the basis of Eurostat database (labour market statistics)

These indicators gives for each EU member state the difference between the level for an indicator to the agreed headline target, to the EU average in 2014 and the national targets.

Note: In the case of Germany, the inclusion of post-secondary education for Germany (ISCED 4) gives levels of respectively 44.5% for the rate of tertiary education or equivalent in 2013 (national data sources), thus changing the difference to the EU and national targets for this headline target. The national targets are given as an average in the countries with an upper and lower level are defined (AT, CY, IE, IT). There is no available information in the case of UK

# **Annex C. Benchmarking June 2015**

The aim of the benchmarking tool is:

- 1. To facilitate the monitoring of the development towards a selected number of indicators which show developments in the labour, including the headline targets.
- 2. To help creating a momentum and apply peer pressure to improve performance in Member States.

For this reason it was decided to use the 5 best performing countries as the benchmark to analyse the main development at the labour market in EU and in the MS - alerting about the countries with the main challenges in the various areas in the labour market. Using the best performers means that the best performers might be different from indicator to indicator as some countries might be best performers for some indicators but not others. This means that the group of 5 best performers will not be the same all the time. This also applies to the use of the tool from one year to the other as the best performing countries change from one year to another.

The benchmarking is a normalised index where the average of the 5 best performers is set to 100 and the average of the lowest 5 is set to 0 for each of the chosen indicators. For each EU Member States and each indicator, normalised indices are calculated corresponding to the level of the indicator in the MS. These indices demonstrate the relative distance between the MS's level and the average of the best 5 performers.

Mathematical the normalised index for each MS and each indicator is calculated as:

$$\left(\frac{\text{Level of the indicator in MS} - \text{average of the lowest 5 performers}}{\text{average of the best 5 performers}}\right) * 100$$

From the formula it can be shown that the benchmark index of the average of the best 5 performers equals to 100 and the corresponding index for the average of the lowest 5 performers equals to zero. Naturally, in the group of the 5 best performers, there will be MS with a level above the average of the group and correspondingly, within the group of the lowest 5 performers there will be MS with levels below the average of the group. Due to the definition of the benchmark, this implies that some MS who belong in the group of the highest 5 will have a benchmark index of above 100 and some MS who belong to the group of the lowest 5 will have a benchmark index of below 0.

Sources: DG EMPL calculations on the basis of Eurostat database (labour market statistics, national accounts)

Note: For the indicators at this page, the interpretation of the benchmark is on the growth rates. The good outcomes (thus the highest performers) are increasing employment growth and increasing labour productivity growth but decreasing or slow increase in unit labour cost.

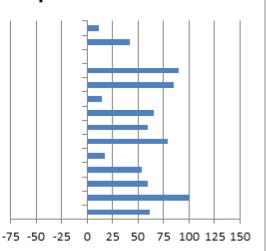

# Country charts for the benchmark 20148

<sup>&</sup>lt;sup>8</sup> The charts demonstrate the benchmark indices for each MS and each indicator. The index for the best 5 performers has been set to 100 and for the lowest 5 performers is set to 0. The bars show the relative distance of a MS's level to the best 5 performers that is the distance between zero and 100 (the right hand side of the chart). Values above 100 can exist for MS in the group of the best 5 performers in which the level of the indicator is above the average of the best 5 performers. Values below zero can exist for MS in the group of the lowest 5 performers in which the level of the indicator is below the average of the lowest 5 performers
