NOTE
From: Presidency
To: Council
No. prev. doc.: 8834/18
No. Cion doc.: 12183/17
Subject: Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on ENISA, the "EU Cybersecurity Agency", and repealing Regulation (EU) 526/2013, and on Information and Communication Technology cybersecurity certification ("Cybersecurity Act")
- General approach
1. INTRODUCTION

1. On 13 September 2017, in the context of its Digital Single Market Strategy, the Commission adopted and transmitted to the Council and to the European Parliament the above-mentioned proposal\textsuperscript{1} with Article 114 TFEU as a legal basis. As a part of the so-called ‘Cybersecurity package’, this proposal aims at a high level of cybersecurity, cyber resilience and trust within the Union with a view to ensuring the proper functioning of the internal market.

2. The proposed Regulation lays down the objectives, tasks and organisational aspects of ENISA – the EU Cybersecurity Agency and creates a framework for the establishment of European cybersecurity certification schemes for the purpose of ensuring an adequate level of cybersecurity of ICT products and services in the Union. The Commission’s proposal is accompanied by an impact assessment which explores a specific set of eight policy options, covering the review of the ENISA and the ICT cybersecurity certification.

3. The proposed Regulation contains two major strands:

- a permanent mandate for the Agency with a delineated scope in view of the needs under the new policy priorities and instruments, and a renewed set of tasks and functions for the Agency, to allow effective and efficient support to Member States, EU institutions and other stakeholders’ efforts in view of ensuring a secure cyberspace;

- a European cybersecurity certification framework for ICT products and services and rules governing European cybersecurity certification schemes allowing certificates issued under those schemes to be valid and recognised across all Member States and addressing the current market fragmentation.

\textsuperscript{1} Doc. 12183/17; 12183/1/17 REV 1; 12183/2/17 REV 2.
4. In October 2017, the European Council called for the Commission's cybersecurity proposals to be developed in a holistic way, delivered timely and examined without delay, on the basis of an action plan to be set up by the Council.

6. In the European Parliament, Ms. Angelika NIEBLER (ITRE, EPP) has been appointed as a rapporteur. The ITRE Committee vote on its report is scheduled on 19 June 2018.

7. The European Economic and Social Committee adopted its opinion on 14 February 2018.

II. WORK WITHIN THE COUNCIL

8. The Commission presented this proposal and its impact assessment to the Horizontal Working Party on Cyber Issues (hereinafter referred to as the ‘Working Party’) on 26 September 2017, followed by an examination of the impact assessment in the Working Party on 20 October 2017. The subsequent discussions were centered on the Agency’s operational capacity and the scope of interaction with the national competent authorities, as well as on the impact of the certification framework on the market and the business competitiveness. In general, both the impact assessment and the proposal received a positive response from delegations.

---

2 EUO 14/17, para 11.
3 Doc. 15748/17.
4 Doc. 14435/17.
5 Doc. 12211/17.
9. The discussion of the proposal itself by the Working Party started in November 2017 under the Estonian Presidency and continued under the Bulgarian Presidency. There were 12 meetings held on this proposal which resulted in eight consecutive revised versions of the proposal with a view to agreeing on a general approach at the forthcoming TTE (Telecom) Council to be held on 8 June 2018.

10. The outcome of the discussions in the Working Party held on 14-15 May 2018, as well as the revised Presidency compromise text appears in the Annex to this note. The recitals have been adapted to reflect the changes in the substantive provisions. All changes compared to the Commission proposal are indicated in bold or strikethrough. The changes compared to the latest Working Party document 8834/18 are indicated in bold underlined and all deletions are in bold underline strikethrough.

III. CONCLUSION

11. The Presidency’s compromise text, as set out in the Annex, reflects efforts of the Presidency and Member States to strike a proper balance in the text.

12. On 25 May 2018, the Permanent Representatives Committee reached agreement on the Presidency compromise text subject to amendments in Articles 19(5) and 48(5) as set out in annex.

13. The Council is therefore invited to adopt a general approach at its meeting on 8 June 2018 and mandate the Presidency to enter into negotiations with the representatives of the European Parliament and the European Commission on this file.
Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

on ENISA, the "EU Cybersecurity European Union Agency for Cybersecurity", and repealing Regulation (EU) 526/2013, and on Information and Communication Technology cybersecurity certification (''Cybersecurity Act'')

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee\(^6\),

Having regard to the opinion of the Committee of the Regions\(^7\),

Acting in accordance with the ordinary legislative procedure,

\(^6\) OJ C , p.
\(^7\) OJ C , p.
Whereas:

(1) Network and information systems and telecommunications networks and services play a vital role for society and have become the backbone of economic growth. Information and communications technology underpins the complex systems which support societal activities, keep our economies running in key sectors such as health, energy, finance and transport, and in particular support the functioning of the internal market.

(2) The use of network and information systems by citizens, businesses and governments across the Union is now pervasive. Digitisation and connectivity are becoming core features in an ever growing number of products and services and with the advent of the Internet of Things (IoT) millions, if not billions, of connected digital devices are expected to be deployed across the EU during the next decade. While an increasing number of devices are connected to the Internet, security and resilience are not sufficiently built in by design, leading to insufficient cybersecurity. In this context, the limited use of certification leads to insufficient information for organisational and individual users about the cybersecurity features of ICT products and services, undermining trust in digital solutions.

(3) Increased digitisation and connectivity lead to increased cybersecurity risks, thus making society at large more vulnerable to cyber threats and exacerbating dangers faced by individuals, including vulnerable persons such as children. In order to mitigate this risk to society, all necessary actions need to be taken to improve cybersecurity in the EU to better protect network and information systems, telecommunication networks, digital products, services and devices used by citizens, governments and business – from SMEs to operators of critical infrastructures – from cyber threats.
(4) Cyber-attacks are on the increase and a connected economy and society that is more vulnerable to cyber threats and attacks requires stronger defences. However, while cyber-attacks are often cross-border, policy responses by cybersecurity authorities and law enforcement competences are predominantly national. Large-scale cyber incidents could disrupt the provision of essential services across the EU. This requires effective EU level response and crisis management, building upon dedicated policies and wider instruments for European solidarity and mutual assistance. Moreover, a regular assessment of the state of cybersecurity and resilience in the Union, based on reliable Union data, as well as systematic forecast of future developments, challenges and threats, both at Union and global level, is therefore important for policy makers, industry and users.

(5) In light of the increased cybersecurity challenges faced by the Union, there is a need for a comprehensive set of measures that would build on previous Union action and foster mutually reinforcing objectives. These include the need to further increase capabilities and preparedness of Member States and businesses, as well as to improve cooperation and coordination across Member States and EU institutions, agencies and bodies. Furthermore, given the borderless nature of cyber threats, there is a need to increase capabilities at Union level that could complement the action of Member States, in particular in the case of large scale cross-border cyber incidents and crises. Additional efforts are also needed to increase awareness of citizens and businesses on cybersecurity issues. Moreover, the trust in the digital single market should be further improved by offering transparent information on the level of security of ICT products and services. This can be facilitated by EU-wide certification providing common cybersecurity requirements and evaluation criteria across national markets and sectors.

---

The Union has already taken important steps to ensure cybersecurity and increase trust in digital technologies. In 2013, an EU Cybersecurity Strategy was adopted to guide the Union's policy response to cybersecurity threats and risks. In its effort to better protect Europeans online, in 2016 the Union adopted the first legislative act in the area of cybersecurity, the Directive (EU) 2016/1148 concerning measures for a high common level of security of network and information systems across the Union (the "NIS Directive"). The NIS Directive put in place requirements concerning national capabilities in the area of cybersecurity, established the first mechanisms to enhance strategic and operational cooperation between Member States, and introduced obligations concerning security measures and incident notifications across sectors which are vital for economy and society such as energy, transport, water, banking, financial market infrastructures, healthcare, digital infrastructure as well as key digital service providers (search engines, cloud computing services and online marketplaces). A key role was attributed to ENISA in supporting implementation of this Directive. In addition, effective fight against cybercrime is an important priority in the European Agenda on Security, contributing to the overall aim of achieving a high level of cybersecurity.

It is recognised that, since the adoption of the 2013 EU Cybersecurity Strategy and the last revision of the Agency's mandate, the overall policy context has changed significantly, also in relation to a more uncertain and less secure global environment. In this context and within the framework of the new Union cybersecurity policy, it is necessary to review the mandate of ENISA to define its role in the changed cybersecurity ecosystem and ensure it contributes effectively to the Union's response to cybersecurity challenges emanating from this radically transformed threat landscape, for which, as recognised by the evaluation of the Agency, the current mandate is not sufficient.
(9) The Agency established by this Regulation should succeed ENISA as established by Regulation (EU) No 526/2013. The Agency should carry out the tasks conferred on it by this Regulation and legal acts of the Union in the field of cybersecurity by, among other things, providing expertise and advice and acting as a Union centre of information and knowledge. It should promote the exchange of best practices between Member States and private stakeholders, offering policy suggestions to the European Commission and Member States, acting as a reference point for Union sectoral policy initiatives with regard to cybersecurity matters, fostering operational cooperation between the Member States and between the Member States and the European institutions, agencies and bodies.

(10) Within the framework of Decision 2004/97/EC, Euratom, adopted at the meeting of the European Council on 13 December 2003, the representatives of the Member States decided that ENISA would have its seat in a town in Greece to be determined by the Greek Government. The Agency’s host Member State should ensure the best possible conditions for the smooth and efficient operation of the Agency. It is imperative for the proper and efficient performance of its tasks, for staff recruitment and retention and to enhance the efficiency of networking activities that the Agency be based in an appropriate location, among other things providing appropriate transport connections and facilities for spouses and children accompanying members of staff of the Agency. The necessary arrangements should be laid down in an agreement between the Agency and the host Member State concluded after obtaining the approval of the Management Board of the Agency.

(11) Given the increasing cybersecurity challenges the Union is facing, the financial and human resources allocated to the Agency should be increased to reflect its enhanced role and tasks, and its critical position in the ecosystem of organisations defending the European digital ecosystem.
(12) The Agency should develop and maintain a high level of expertise and operate as a point of reference establishing trust and confidence in the single market by virtue of its independence, the quality of the advice it delivers and the information it disseminates, the transparency of its procedures and methods of operation, and its diligence in carrying out its tasks. The Agency should support proactively contribute to national and proactively contribute to Union efforts while carrying out its tasks in full cooperation with the Union institutions, bodies, offices and agencies and bodies and the Member States. In addition, the Agency should build on input from and cooperation with the private sector as well as other relevant stakeholders. A set of tasks should establish how the Agency is to accomplish its objectives while allowing flexibility in its operations.

(13) The Agency should assist the Commission by means of advice, opinions and analyses on all the Union matters related to policy and law development, update and review in the area of cybersecurity and its sector-specific aspects in order to enhance relevance of EU policies and law with cybersecurity dimension and enable consistency in their implementation at national level, including critical infrastructure protection and cyber resilience. The Agency should act as a reference point of advice and expertise for Union sector-specific policy and law initiatives where matters related to cybersecurity are involved.

(14) The underlying task of the Agency is to promote the consistent implementation of the relevant legal framework, in particular the effective implementation of the NIS Directive, which is essential in order to increase cyber resilience. In view of the fast evolving cybersecurity threat landscape, it is clear that Member States must be supported by more comprehensive, cross-policy approach to building cyber resilience.
(15) The Agency should assist the Member States and Union institutions, bodies, offices and agencies and bodies in their efforts to build and enhance capabilities and preparedness to prevent, detect and respond to cybersecurity problems threats and incidents and in relation to the security of network and information systems. In particular, the Agency should support the development and enhancement of national CSIRTs, with a view of achieving a high common level of their maturity in the Union. Activities carried out by ENISA relating to the operational capacities of Member States should be solely complementary to the own actions taken by Member States in order to fulfil their obligations arising from the NIS Directive and thus should not supersede them. The Agency should also assist with the development and update of Union and Member States strategies on the security of network and information systems, in particular on cybersecurity, promote their dissemination and track progress of their implementation. The Agency should also offer trainings and training material to public bodies, and where appropriate "train the trainers" with a view to assisting Member States in developing their own training capabilities.

(15a) The Agency should also assist with the development and update of Union and upon request, Member States strategies on the security of network and information systems, in particular on cybersecurity, promote their dissemination and follow their implementation. The Agency should also offer trainings and training material to public bodies, and where appropriate "train the trainers" with a view to assisting Member States in developing their own training capabilities.

(16) The Agency should assist the Cooperation Group established in the NIS Directive in the execution of its tasks, in particular by providing expertise, advice and facilitate the exchange of best practices, notably with regard to the identification of operators of essential services by Member States, including in relation to cross-border dependencies, regarding risks and incidents.
(17) With a view to stimulating cooperation between public and private sector and within the private sector, in particular the Agency should support information sharing in and between sectors, in particular in the sectors listed in Annex II of Directive (EU) 2016/1148, by providing best practices and guidance on available tools, procedure, as well as providing guidance on how to address regulatory issues related to information sharing, for example through facilitating the protection of the critical infrastructures, the Agency should facilitate the establishment of sectoral Information Sharing and Analysis Centres (ISACs) by providing best practices and guidance on available tools, procedure, as well as providing guidance on how to address regulatory issues related to information sharing.

(18) The Agency should aggregate and analyse voluntary shared national reports from CSIRTs and CERT-EU, for the purpose of assisting Member States in setting up common rules, procedures, language and terminology for exchange of information. The Agency should also involve the private sector, within the framework of the NIS Directive which laid down the grounds for voluntary technical information exchange at the operational level with the creation of within the CSIRTs Network.
(19) The Agency should contribute to an EU level response in case of large-scale cross-border cybersecurity incidents and crises. This function should be performed in accordance with its mandate pursuant to this Regulation and an approach to be agreed by Member States in the context of the Commission Recommendation on Coordinated Response to Large-Scale Cybersecurity Incidents and Crises. It could include gathering relevant information and acting as facilitator between the CSIRTs Network and the technical community as well as decision makers responsible for crisis management. Furthermore, the Agency could support the handling of incidents from a technical perspective by facilitating relevant technical exchange of solutions between Member States and by providing input into public communications. The Agency should support the process by testing modalities of such cooperation through yearly regular cybersecurity exercises.

(20) To perform its In supporting operational cooperation tasks, the Agency should make use of the available technical and operational expertise of CERT-EU through a structured cooperation, in close physical proximity. The structured cooperation will facilitate the necessary synergies and build-up of ENISA’s expertise. Where appropriate, dedicated arrangements between the two organisations should be established to define the practical implementation of such cooperation and avoid duplication of activities.
(21) In compliance with its operational tasks to support operational cooperation within the CSIRTs Network, the Agency should be able to provide support to Member States at their request, such as by providing advice on how to improve their capabilities to prevent, detect and respond to incidents, by assisting facilitating the technical handling of incidents having a significant or substantial impact, or by ensuring analyses of threats and incidents. Facilitating the technical handling of incidents having a significant or substantial impact should include in particular that ENISA supports the voluntary sharing of technical solutions between Member States or produces combined technical information - such as technical solutions voluntarily shared by the Member States. The Commission's Recommendation on Coordinated Response to Large-Scale Cybersecurity Incidents and Crises recommends that Member States cooperate in good faith and share amongst themselves and with ENISA information on large-scale cybersecurity incidents and crises without undue delay. Such information should further help ENISA in performing its operational tasks supporting operational cooperation.

(22) As part of the regular cooperation at technical level to support Union situational awareness, the Agency should on regular basis and in close cooperation with Member States prepare the EU Cybersecurity Technical Situation Report on incidents and threats, based on publicly available information, its own analysis and reports shared with it by Member States' CSIRTs (on a voluntary basis) or NIS Directive Single Points of Contact (both on a voluntary basis), European Cybercrime Centre (EC3) at Europol, CERT-EU and, where appropriate, European Union Intelligence Centre (INTCEN) at the European External Action Service (EEAS). The report should be made available to the relevant instances of the Council, the Commission, the High Representative of the Union for Foreign Affairs and Security Policy and the CSIRTs Network.
(23) **The support by the Agency to ex-post technical inquiries** into incidents with significant impact in more than one Member State supported or undertaken by the Agency upon request or with the agreement of the concerned Member States concerned should be focused on the prevention of future incidents and be carried out without prejudice to any judicial or administrative proceedings to apportion blame or liability. The Member States concerned should provide the necessary information in order to enable the Agency to effectively support the technical enquiry.

(24) The Member States concerned should provide the necessary information and assistance to the Agency, for the purposes of the enquiry without prejudice to Article 346 of the Treaty on the Functioning of the European Union or other public policy reasons.

(25) Member States may invite undertakings concerned by the incident to cooperate by providing necessary information and assistance to the Agency without prejudice to their right to protect commercially sensitive information.

(26) To understand better the challenges in the field of cybersecurity, and with a view to providing strategic long term advice to Member States and Union institutions, the Agency needs to analyse current and emerging risks. For that purpose, the Agency should, in cooperation with Member States and, as appropriate, with statistical bodies and others, collect relevant **publicly available or voluntary shared** information and perform analyses of emerging technologies and provide topic-specific assessments on expected societal, legal, economic and regulatory impacts of technological innovations on network and information security, in particular cybersecurity. The Agency should furthermore support Member States and Union institutions, agencies and bodies in identifying emerging trends and preventing problems related to cybersecurity **incidents**, by performing analyses of threats and incidents.
(27) In order to increase the resilience of the Union, the Agency should develop excellence on the subject of cybersecurity of infrastructures supporting in particular the sectors listed in Annex II of the NIS Directive and those used by the digital service providers listed in Annex III of that Directive, internet infrastructure and of the critical infrastructures, by providing advice, guidance and best practices. With a view to ensuring easier access to better structured information on cybersecurity risks and potential remedies, the Agency should develop and maintain the "information hub" of the Union, a one-stop-shop portal providing the public with information on cybersecurity deriving from the EU and national institutions, agencies and bodies.

(28) The Agency should contribute towards raising the awareness of the public about risks related to cybersecurity and provide guidance on good practices for individual users aimed at citizens and organisations. The Agency should also contribute to promote best practices and solutions at the level of individuals and organisations by collecting and analysing publicly available information regarding significant incidents, and by compiling reports with a view to providing guidance to businesses and citizens and improving the overall level of preparedness and resilience. The Agency should furthermore organise, in cooperation with the Member States and the Union institutions, bodies, offices and agencies and bodies, regular outreach and public education campaigns directed to end-users, aiming at promoting safer individual online behaviour and raising awareness of potential threats in cyberspace, including cybercrimes such as phishing attacks, botnets, financial and banking fraud, as well as promoting basic authentication and data protection advice. The Agency should play a central role in accelerating end-user awareness on security of devices.

(29) In order to support the businesses operating in the cybersecurity sector, as well as the users of cybersecurity solutions, the Agency should develop and maintain a "market observatory" by performing regular analyses and dissemination of the main trends in the cybersecurity market, both on the demand and supply side.
(30) To ensure that it fully achieves its objectives, the Agency should liaise with relevant institutions, agencies and bodies, including CERT-EU, European Cybercrime Centre (EC3) at Europol, European Defence Agency (EDA), European Agency for the operational management of large-scale IT systems (eu-LISA), European Aviation Safety Agency (EASA), European Global Navigation Satellite Systems Agency (GNSS Agency) and any other EU Agency that is involved in cybersecurity. It should also liaise with authorities dealing with data protection in order to exchange know-how and best practices and provide advice on cybersecurity aspects that might have an impact on their work. Representatives of national and Union law enforcement and data protection authorities should be eligible to be represented in the Agency’s Permanent Stakeholders Group. In liaising with law enforcement bodies regarding network and information security aspects that might have an impact on their work, the Agency should respect existing channels of information and established networks.

(31) The Agency, in its role as a Member which furthermore provides the Secretariat of the CSIRTs Network, should support Member State CSIRTs and the CERT-EU in operational cooperation further to all the relevant tasks of the CSIRTs Network, as defined by the NIS Directive. Furthermore, the Agency should promote and support cooperation between the relevant CSIRTs in the event of incidents, attacks or disruptions of networks or infrastructure managed or protected by the CSIRTs and involving or potentially involving at least two CERTs while taking due account of the Standard Operating Procedures of the CSIRTs Network.

(32) With a view to increasing Union preparedness in responding to cybersecurity incidents, the Agency should organise yearly regular cybersecurity exercises at Union level, and, at their request, support Member States and EU institutions, agencies and bodies in organising exercises.
(33) The Agency should further develop and maintain its expertise on cybersecurity certification with a view to supporting the Union policy in this field. The Agency should promote the uptake of cybersecurity certification within the Union, including by contributing to the establishment and maintenance of a cybersecurity certification framework at Union level, with a view to increasing transparency of cybersecurity assurance of ICT products and services and thus strengthening trust in the digital internal market.

(34) Efficient cybersecurity policies should be based on well-developed risk assessment methods, both in the public and private sector. Risk assessment methods are used at different levels with no common practice regarding how to apply them efficiently. Promoting and developing best practices for risk assessment and for interoperable risk management solutions in public- and private-sector organisations will increase the level of cybersecurity in the Union. To this end, the Agency should support cooperation between stakeholders at Union level, facilitating their efforts relating to the establishment and take-up of European and international standards for risk management and for measurable security of electronic products, systems, networks and services which, together with software, comprise the network and information systems.

(35) The Agency should encourage Member States and service providers to raise their general security standards so that all internet users can take the necessary steps to ensure their own personal cybersecurity. In particular, service providers and product manufacturers should withdraw or recycle products and services that do not meet cybersecurity standards. In cooperation with competent authorities, ENISA may disseminate information regarding the level of cybersecurity of the products and services offered in the internal market, and issue warnings targeting providers and manufacturers and requiring them to improve the security, including cybersecurity, of their products.
(36) The Agency should take full account of the ongoing research, development and technological assessment activities, in particular those carried out by the various Union research initiatives to advise the Union institutions, bodies, offices and agencies and where relevant, the Member States, at their request, on research needs in the area of network and information security, in particular cybersecurity. In order to identify the research needs and priorities, the Agency should also consult the relevant user groups.

(37) Cybersecurity problems-threats are global issues. There is a need for closer international cooperation to improve cybersecurity standards, including the definition of common norms of behaviour, and information sharing, promoting swifter international collaboration in response to, as well as a common global approach to, network and information security issues. To that end, the Agency should support further Union involvement and cooperation with third countries and international organisations by providing, where appropriate, the necessary expertise and analysis to the relevant Union institutions, bodies, offices and agencies.

(38) The Agency should be able to respond to ad hoc requests for advice and assistance by Member States and EU institutions, agencies and bodies falling within the Agency’s objectives.

(39) It is necessary to implement certain principles regarding the governance of the Agency in order to comply with the Joint Statement and Common Approach agreed upon in July 2012 by the Inter-Institutional Working Group on EU decentralised agencies, the purpose of which statement and approach is to streamline the activities of agencies and improve their performance. The Joint Statement and Common Approach should also be reflected, as appropriate, in the Agency’s Work Programmes, evaluations of the Agency, and the Agency’s reporting and administrative practice.
(40) The Management Board, composed of the Member States and the Commission, should define the general direction of the Agency’s operations and ensure that it carries out its tasks in accordance with this Regulation. The Management Board should be entrusted with the powers necessary to establish the budget, verify its execution, adopt the appropriate financial rules, establish transparent working procedures for decision making by the Agency, adopt the Agency’s Single Programming Document, adopt its own rules of procedure, appoint the Executive Director and decide on the extension of the Executive Director’s term of office and on the termination thereof.

(41) In order for the Agency to function properly and effectively, the Commission and the Member States should ensure that persons to be appointed to the Management Board have appropriate professional expertise and experience in functional areas. The Commission and the Member States should also make efforts to limit the turnover of their respective Representatives on the Management Board in order to ensure continuity in its work.
(42) The smooth functioning of the Agency requires that its Executive Director be appointed on grounds of merit and documented administrative and managerial skills, as well as competence and experience relevant for cybersecurity, and that the duties of the Executive Director be carried out with complete independence. The Executive Director should prepare a proposal for the Agency’s work programme, after prior consultation with the Commission, and take all necessary steps to ensure the proper execution of the work programme of the Agency. The Executive Director should prepare an annual report **including the implementation of the Agency's annual work programme** to be submitted to the Management Board, draw up a draft statement of estimates of revenue and expenditure for the Agency, and implement the budget. Furthermore, the Executive Director should have the option of setting up ad hoc Working Groups to address specific matters, in particular of a scientific, technical, legal or socioeconomic nature. The Executive Director should ensure that the ad hoc Working Groups’ members are selected according to the highest standards of expertise, taking due account of a representative balance, as appropriate according to the specific issues in question, between the public administrations of the Member States, the Union institutions and the private sector, including industry, users, and academic experts in network and information security.

(43) The Executive Board should contribute to the effective functioning of the Management Board. As part of its preparatory work related to Management Board decisions, it should examine in detail relevant information and explore available options and offer advice and solutions to prepare relevant decisions of the Management Board.
(44) The Agency should have a Permanent Stakeholders’ Group as an advisory body, to ensure regular dialogue with the private sector, consumers’ organisations and other relevant stakeholders. The Permanent Stakeholders’ Group, set up by the Management Board on a proposal by the Executive Director, should focus on issues relevant to stakeholders and bring them to the attention of the Agency. The composition of the Permanent Stakeholders Group and the tasks assigned to this Group, to be consulted in particular regarding the draft work programme, should ensure sufficient representation of stakeholders in the work of the Agency.

(45) The Agency should have in place rules regarding the prevention and the management of conflict of interest. The Agency should also apply the relevant Union provisions concerning public access to documents as set out in Regulation (EC) No 1049/2001 of the European Parliament and of the Council. Processing of personal data by the Agency should be subject to Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data. The Agency should comply with the provisions applicable to the Union institutions, and with national legislation regarding the handling of information, in particular sensitive non classified information and EU classified information.

---

(46) In order to guarantee the full autonomy and independence of the Agency and to enable it to perform additional and new tasks, including unforeseen emergency tasks, the Agency should be granted a sufficient and autonomous budget whose revenue comes primarily from a contribution from the Union and contributions from third countries participating in the Agency’s work. The majority of the Agency staff should be directly engaged in the operational implementation of the Agency’s mandate. The host Member State, or any other Member State, should be allowed to make voluntary contributions to the revenue of the Agency. The Union’s budgetary procedure should remain applicable as far as any subsidies chargeable to the general budget of the Union are concerned. Moreover, the Court of Auditors should audit the Agency’s accounts to ensure transparency and accountability.

(47) Conformity assessment is the process demonstrating whether specified requirements relating to a product, process, service, system, person or body have been fulfilled. For the purposes of this Regulation, certification should be considered as a type of conformity assessment regarding the cybersecurity features of a product, process, service, system, or a combination of those ("ICT products and services") by an independent third party, other than the product manufacturer or service provider. Certification cannot guarantee per se that certified ICT products and services are cyber secure. It is rather a procedure and technical methodology to attest that ICT products and services have been tested and that they comply with certain cybersecurity requirements laid down elsewhere, for example as specified in technical standards.
(48) Cybersecurity certification plays an important role in increasing trust and security in ICT products and services. The digital single market, and particularly the data economy and the Internet of Things, can only thrive if there is general public trust that such products and services provide a certain level of cybersecurity assurance. Connected and automated cars, electronic medical devices, industrial automation control systems or smart grids are only some examples of sectors in which certification is already widely used or is likely to be used in the near future. The sectors regulated by the NIS Directive are also sectors in which cybersecurity certification is critical.

(49) In the 2016 Communication "Strengthening Europe's Cyber Resilience System and Fostering a Competitive and Innovative Cybersecurity Industry", the Commission outlined the need for high-quality, affordable and interoperable cybersecurity products and solutions. The supply of ICT products and services within the single market remains very fragmented geographically. This is because the cybersecurity industry in Europe has developed largely on the basis of national governmental demand. In addition, the lack of interoperable solutions (technical standards), practices and EU-wide mechanisms of certification are among the other gaps affecting the single market in cybersecurity. On the one hand, this makes it difficult for European companies to compete at national, European and global level. On the other, it reduces the choice of viable and usable cybersecurity technologies that individuals and enterprises have access to. Similarly, in the Mid-Term Review on the implementation of the Digital Single Market Strategy, the Commission highlighted the need for safe connected products and systems, and indicated that the creation of a European ICT security framework setting rules on how to organise ICT security certification in the Union could both preserve trust in the internet and tackle the current fragmentation of the cybersecurity market.
Currently, the cybersecurity certification of ICT processes, products and services is used only to a limited extent. When it exists, it mostly occurs at Member State level or in the framework of industry driven schemes. In this context, a certificate issued by one national cybersecurity authority is not in principle recognised by other Member States. Companies thus may have to certify their products and services in several Member States where they operate, for example with a view to participating in national procurement procedures. Moreover, while new schemes are emerging, there seems to be no coherent and holistic approach with regard to horizontal cybersecurity issues, for instance in the field of the Internet of Things. Existing schemes present significant shortcomings and differences in terms of product coverage, levels of assurance, substantive criteria and actual utilisation.

Some efforts have been made in the past in order to lead to a mutual recognition of certificates in Europe. However, they have been only partly successful. The most important example in this regard is the Senior Officials Group – Information Systems Security (SOG-IS) Mutual Recognition Agreement (MRA). While it represents the most important model for cooperation and mutual recognition in the field of security certification, SOG-IS MRA presents some significant shortcomings related to its high costs and limited scope. So far only a few protection profiles on digital products have been developed, such as digital signature, digital tachograph and smart cards. Most importantly, SOG-IS includes only part of the Union Member States. This has limited the effectiveness of SOG-IS MRA from the point of view of the internal market.
(52) In view of the above, it is necessary to establish a European cybersecurity certification framework laying down the main horizontal requirements for European cybersecurity certification schemes to be developed and allowing certificates and EU statements of conformity for ICT products and services to be recognised and used in all Member States. The European framework should have a twofold purpose: on the one hand, it should help increase trust in ICT products and services that have been certified according to such schemes. On the other hand, it should avoid the multiplication of conflicting or overlapping national cybersecurity certifications and thus reduce costs for undertakings operating in the digital single market. The schemes should be non-discriminatory and based on international and/or European standards, unless those standards are ineffective or inappropriate to fulfil the EU’s legitimate objectives in that regard.

(53) The Commission should be empowered to adopt European cybersecurity certification schemes concerning specific groups of ICT processes, products and services. These schemes should be implemented and supervised by national cybersecurity certification supervisory authorities and certificates issued within these schemes should be valid and recognised throughout the Union. Certification schemes operated by the industry or other private organisations should fall outside the scope of the Regulation. However, the bodies operating such schemes may propose to the Commission to consider such schemes as a basis for approving them as a European scheme.
(54) The provisions of this Regulation should be without prejudice to Union legislation providing specific rules on certification of ICT products and services. In particular, the General Data Protection Regulation (GDPR) lays down provisions for the establishment of certification mechanisms and data protection seals and marks for the purpose of demonstrating compliance with that Regulation of processing operations by controllers and processors. Such certification mechanisms and data protection seals and marks should allow data subjects to quickly assess the level of data protection of relevant products and services. The present Regulation is without prejudice to the certification of data processing operations, including when such operations are embedded in products and services, under the GDPR.

(55) The purpose of European cybersecurity certification schemes should be to ensure that ICT processes, products and services certified under such a scheme comply with specified requirements. Such requirements concern the ability to resist, at a given level of assurance, actions that with the aim to compromise protect the availability, authenticity, integrity and confidentiality of stored or transmitted or processed data or the related functions of or services offered by, or accessible via those products, processes, services and systems throughout their life cycle within the meaning of this Regulation. It is not possible to set out in detail in this Regulation the cybersecurity requirements relating to all ICT processes, products and services. ICT processes, products and services and related cybersecurity needs are so diverse that it is very difficult to come up with general cybersecurity requirements valid across the board. It is, therefore necessary to adopt a broad and general notion of cybersecurity for the purpose of certification, complemented by a set of specific cybersecurity objectives that need to be taken into account when designing European cybersecurity certification schemes. The modalities with which such objectives will be achieved in specific ICT processes, products and services should then be further specified in detail at the level of the individual certification scheme adopted by the Commission, for example by reference to standards or technical specifications where no appropriate standards are available.
(55a) The technical specifications to be used in a European cybersecurity certification scheme should be identified by respecting the principles laid down in Annex II of Regulation (EU) 1025/2012. Some deviations from these principles could be however considered necessary in duly justified cases where those technical specifications are to be used in a European cybersecurity certification scheme referring to assurance level high. The reasons for such deviations need to be made publicly available.

(55b) The certified conformity assessment is the process of evaluating whether specified requirements relating to an ICT process, product or service have been fulfilled. This process is carried out by an independent third party, other than the product manufacturer or service provider. The process of issuing a certificate follows the process of successful evaluation of an ICT process, product or service. It should be considered as a confirmation that the respective evaluation has been properly carried out. Depending on the assurance level, the European cybersecurity scheme should provide whether the certificate is being issued by a private or public body. Conformity assessment and certification cannot guarantee per se that certified ICT products and services are cyber secure. It is rather a procedure and technical methodology to attest that ICT products and services have been tested and that they comply with certain cybersecurity requirements laid down elsewhere, for example as specified in technical standards.

(55c) The choice, by the users of certificates, of the appropriate level of certification and associated security requirements should be based on a risk analysis on the use of the ICT process, product or service. The level of assurance should be thus commensurate with the level of the risk associated with the intended use of an ICT process, product or service.
A European cybersecurity certification scheme could provide for a conformity assessment to be carried out under the sole responsibility of the manufacturer or provider of ICT products and services (conformity self-assessment). In such cases, it is sufficient that the manufacturer or provider carries out himself all checks in order to ensure the conformity of the ICT process, products or services with the certification scheme. This type of conformity assessment should be considered appropriate for low complexity ICT products and services (e.g. simple design and production mechanism) that present a low risk for the public interest. Moreover, only ICT products and services corresponding to assurance level basic could become subject to conformity self-assessment.

A European cybersecurity certification scheme could allow for both certification and conformity self-assessment of ICT products and services. In this case, the scheme should provide for clear and understandable means for consumers or other users to differentiate between products and services that are assessed under the responsibility of the manufacturer or provider and products and services that are certified by a third party.

The manufacturer or provider of ICT products and services carrying out a conformity self-assessment should draw up and sign the EU statement of conformity as part of the conformity assessment procedure. The EU statement of conformity is the document that states that particular ICT product or service complies with the requirements of the scheme. By drawing up and signing up of the EU statement of conformity, the manufacturer or provider assumes responsibility for the compliance of the ICT product or service with the legal requirements of the scheme. A copy of the EU statement of conformity should be submitted to the national cybersecurity certification authority and to ENISA.
(55g) The manufacturer or provider of ICT products and services should keep the EU statement of conformity and technical documentation of all relevant information relating to the conformity of the ICT products or services with a scheme at the disposal of the competent national cybersecurity certification authority for a period defined in the particular European cybersecurity certification scheme. The technical documentation should specify the applicable requirements and cover, as far as relevant for the assessment, the design, manufacture and operation of the ICT product or service. The technical documentation should be so compiled to enable the assessment of the conformity of an ICT product or service with the relevant requirements.

(55h) Member States and interested stakeholder organisations should be entitled to propose to the European Cybersecurity Certification Group the preparation of a candidate scheme. Interested stakeholder organisations are industry or consumer representatives' organisations, including representatives of SMEs organisations that have a valid interest in the development of a particular European cybersecurity certification scheme. Such proposals should be examined in light of the criteria developed by the European Cybersecurity Certification Group by virtue of guidelines based on the principles of transparency, openness, impartiality, consensus, effectiveness, relevance and coherence.
(56) The Commission and the Group should be empowered to request ENISA to prepare without undue delay candidate schemes for specific ICT processes, products or services. The Commission, based on the candidate scheme proposed by ENISA, should then be empowered to adopt the European cybersecurity certification scheme by means of implementing acts. Taking account of the general purpose and security objectives identified in this Regulation, European cybersecurity certification schemes adopted by the Commission should specify a minimum set of elements concerning the subject-matter, the scope and functioning of the individual scheme. These should include among others the scope and object of the cybersecurity certification, including the categories of ICT processes, products and services covered, the detailed specification of the cybersecurity requirements, for example by reference to standards or technical specifications, the specific evaluation criteria and evaluation methods, as well as the intended level of assurance: basic, substantial and/or high and the evaluation levels where applicable.

(56a) The assurance of a European certification scheme is the ground for confidence that an ICT process, product or service meets the security requirements of a specific European cybersecurity certification scheme. In order to ensure consistency of the framework on certified ICT processes, products and services, a European cybersecurity certification scheme could specify assurance levels for European cybersecurity certificates and EU statements of conformity issued under that scheme. Each certificate could refer to one of the assurance levels: basic, substantial or high, while the EU statement of conformity could only refer to the assurance level basic. The assurance levels provide a corresponding degree of efforts for the evaluation of-and is characterised with reference to technical specifications, standards and procedures related thereto, including technical controls, the purpose of which is to mitigate or prevent cybersecurity incidents. Each assurance level should be consistent among the different sectorial domain where certification is applied.
A European cybersecurity certification scheme may specify several evaluations levels depending on the rigour and depth of the evaluation methodology used which should correspond to one of the assurance levels and should be associated with an appropriate combination of assurance components. For all assurance levels, the ICT product or service should contain a number of secure functions, as defined by the scheme, which may include: secure out of the box configuration, signed code, secure update and exploit mitigations and full stack/heap memory protections. Those functions should have been developed and be maintained, using security focused development approaches and associated tools to ensure that effective mechanisms (both software and hardware) are reliably incorporated. For assurance level basic, the evaluation should be guided at least by the following assurance components: the evaluation should at least include a review of the technical documentations of the ICT product or service by the conformity assessment body. Where the certification includes ICT processes, subject to the technical review should also be the process used to design, develop and maintain an ICT product or service. In cases where a European cybersecurity certification scheme provides for a conformity self-assessment, it should be sufficient if the manufacturer or provider has carried out a self-assessment on the compliance of the ICT process, products or services with the certification scheme. For assurance level substantial, the evaluation should in addition to assurance level basic be guided at least by the verification of the conformity of security functionalities of the ICT product or service to its technical documentation. For assurance level high the evaluation should in addition to assurance level substantial be guided at least by an efficiency testing which assesses the resistance of the security functionalities of ICT product or service against those who perform elaborate cyber attacks having significant skills and resources.
(56c) When preparing a candidate scheme, ENISA should consult all relevant stakeholders, such as the European standardisation organisations, relevant national authorities, organisations based on mutual recognition agreements such as SOG-IS MRA, SMEs, consumer organisations as well as environmental and social stakeholders.

(56d) ENISA should maintain a website providing information on, and publicity of, European cybersecurity certification schemes which should include, amongst others, the requests for the preparation of a candidate European cybersecurity certification scheme as well as the feedback received in the consultation process carried out by ENISA in the preparation phase. Such website should also provide information about certificates and EU statements of conformity issued under this Regulation.

(57) Recourse to European cybersecurity certification and EU statement of conformity should remain voluntary, unless otherwise provided in Union or national legislation adopted in accordance with Union law. In the absence of harmonised legislation, Member States may adopt national technical regulations in accordance with Directive (EU) 2015/1535 providing for mandatory certification under a European cybersecurity certification scheme. Member States could also use the recourse to European cybersecurity certification in the context of public procurement and Directive 2014/214/EU. However, with a view to achieving the objectives of this Regulation and avoiding the fragmentation of the internal market, national cybersecurity certification schemes or procedures for the ICT products and services covered by a European cybersecurity certification scheme should cease to produce effects from the date established by the Commission by means of the implementing act. Moreover, Member States should not introduce new national certification schemes providing cybersecurity certification schemes for ICT products and services already covered by an existing European cybersecurity certification scheme.
(57a) With a view to achieving the objectives of this Regulation and avoiding the fragmentation of the internal market, national cybersecurity certification schemes or procedures for the ICT products and services covered by a European cybersecurity certification scheme should cease to produce effects from the date established by the Commission by means of the implementing act. Moreover, Member States should not introduce new national certification schemes providing cybersecurity certification schemes for ICT products and services already covered by an existing European cybersecurity certification scheme. However, Member States should not be prevented to adopt or maintain national certification schemes for national security purposes.

(58) Once a European cybersecurity certification scheme is adopted, manufacturers of ICT products or providers of ICT services should be able to submit an application for certification of their products or services to a conformity assessment body of their choice. Conformity assessment bodies should be accredited by an accreditation body if they comply with certain specified requirements set out in this Regulation. Accreditation should be issued for a maximum of five years and may be renewed on the same conditions provided that the conformity assessment body meets the requirements. Accreditation bodies should restrict, suspend or revoke an accreditation of a conformity assessment body where the conditions for the accreditation are not, or are no longer, met or where actions taken by a conformity assessment body infringe this Regulation.
It is necessary to require all Member States to designate one or more cybersecurity certification supervisory authorities to supervise compliance with obligations arising from this Regulation. If a Member State considers it appropriate, the tasks may be assigned also to already existing authorities. Member States should also be able to decide, upon mutual agreement with another Member State, to designate one or more supervisory authorities in the territory of that other Member State. The authority should in particular monitor and enforce the obligations of the manufacturer or provider of ICT products and services established in their respective territories relating to the EU statement of conformity, assist the national accreditation bodies in the monitoring and supervision of activities of conformity assessment bodies by providing them with expertise and relevant information, authorise conformity assessment bodies to carry out its tasks when they meet additional requirements set out in a scheme and monitor relevant developments in the field of cybersecurity certification of conformity assessment bodies and of certificates issued by conformity assessment bodies established in their territory with the requirements of this Regulation and of the relevant cybersecurity certification schemes. National cybersecurity certification supervisory authorities should handle complaints lodged by natural or legal persons in relation to certificates issued by them or certificates issued by conformity assessment bodies referring to assurance level high conformity assessment bodies established in their territories, investigate to the extent appropriate the subject matter of the complaint and inform the complainant of the progress and the outcome of the investigation within a reasonable time period. Moreover, they should cooperate with other national cybersecurity certification supervisory authorities or other public authority, including by sharing information on possible non-compliance of ICT products and services with the requirements of this Regulation or specific cybersecurity schemes.
(60) With a view to ensuring the consistent application of the European cybersecurity certification framework, a European Cybersecurity Certification Group (the 'Group') consisting of representatives of national cybersecurity certification supervisory authorities or other relevant national authorities should be established. The main tasks of the Group should be to advise and assist the Commission in its work to ensure a consistent implementation and application of the European cybersecurity certification framework; to assist and closely cooperate with the Agency in the preparation of candidate cybersecurity certification schemes; recommend that the Commission request the Agency to prepare a candidate European cybersecurity certification scheme; and to adopt opinions addressed to the Agency on candidate schemes and to the Commission relating to the maintenance and review of existing European cybersecurity certifications schemes.

(60a) The Group should facilitate the exchange of good practices and expertise between the national cybersecurity certification authorities responsible for the authorisation of conformity assessment bodies and the issuance of certificates. The Group should support the development of a peer review mechanism in the context of the preparation of a candidate scheme and its implementation for bodies issuing European cybersecurity certificates for high assurance level. Such peer reviews should in particular assess whether the bodies concerned have the appropriate expertise and carry out their tasks in a harmonised way. The results of the peer reviews should be made publicly available. These bodies may adopt appropriate measures to adapt their practices and expertise.

(61) In order to raise awareness and facilitate the acceptance of future EU cyber security schemes, the European Commission may issue general or sector-specific cyber security guidelines, e.g. on good cyber security practices or responsible cyber security behaviour highlighting the positive effect of the use of certified ICT products and services.
(61a) In order to further facilitate trade and recognising that ICT supply chains are global, mutual recognition agreements concerning certificates issued by schemes established under the European Cybersecurity Certification Framework, may be concluded by the Union in accordance with Article 218 TFEU. The Commission, taking into account the advice from ENISA and the European Cybersecurity Certification Group, may recommend the initiation of relevant negotiations. Each scheme should provide specific conditions for mutual recognition with third countries.

(62) The Agency’s support to cybersecurity certification should also include liaising with the Council Security Committee and the relevant national body, regarding the cryptographic approval of products to be used in classified networks.

(63) In order to specify further the criteria for the accreditation of conformity assessment bodies, the power to adopt acts in accordance with Article 290 of the Treaty on the Functioning of the European Union should be delegated to the Commission. The Commission should carry out appropriate consultations during its preparatory work, including at expert level. Those consultations should be conducted in accordance with the principles laid down in the Interinstitutional Agreement on Better Law-Making of 13 April 2016. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council should receive all documents at the same time as Member States’ experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.

(64) In order to ensure uniform conditions for the implementation of this Regulation, implementing powers should be conferred on the Commission when provided for by this Regulation. Those powers should be exercised in accordance with Regulation (EU) No 182/2011.
(65) The examination procedure should be used for the adoption of implementing acts on European cybersecurity certification schemes for ICT products and services; on modalities of carrying on carrying out inquiries by the Agency; as well as on the circumstances, formats and procedures of notifications of accredited conformity assessment bodies by the national cybersecurity certification supervisory authorities to the Commission.

(66) The Agency’s operations should be evaluated independently. The evaluation should have regard to the Agency achieving its objectives, its working practices and the relevance of its tasks. The evaluation should also assess the impact, effectiveness and efficiency of the European cybersecurity certification framework.

(67) Regulation (EU) No 526/2013 should be repealed.

(68) Since the objectives of this Regulation cannot be sufficiently achieved by the Member States but can rather be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective,

HAVE ADOPTED THIS REGULATION:
TITLE I
GENERAL PROVISIONS

Article 1
Subject matter and scope

1. With a view to ensuring the proper functioning of the internal market while aiming at a high level of cybersecurity, cyber resilience and trust within the Union, this Regulation:

   (a) lays down the objectives, tasks and organisational aspects of ENISA, the "EU Cybersecurity European Union Agency for Cybersecurity", hereinafter ‘the Agency’; and

   (b) lays down a framework for the establishment of European cybersecurity certification schemes for the purpose of ensuring an adequate level of cybersecurity of ICT processes, products and services in the Union. Such framework shall apply without prejudice to specific provisions regarding voluntary or mandatory certification in other Union acts.

2. This Regulation shall be without prejudice to the competences of the Member States regarding cybersecurity and in any case, without prejudice to activities concerning public security, defence, national security and the activities of the state in areas of criminal law.
Article 2

Definitions

For the purposes of this Regulation, the following definitions apply:

(1) ‘cybersecurity’ comprises all activities necessary to protect network and information systems, their users, and affected persons from cyber threats;

(2) ‘network and information system’ means a system within the meaning of point (1) of Article 4 of Directive (EU) 2016/1148;

(3) ‘national strategy on the security of network and information systems’ means a framework within the meaning of point (3) of Article 4 of Directive (EU) 2016/1148;

(4) ‘operator of essential services’ means a public or private entity as defined in point (4) of Article 4 of Directive (EU) 2016/1148;

(5) ‘digital service provider’ means any legal person that provides a digital service as defined in point (6) of Article 4 of Directive (EU) 2016/1148;

(6) ‘incident’ means any event as defined in point (7) of Article 4 of Directive (EU) 2016/1148;

(7) ‘incident handling’ means any procedure as defined in point (8) of Article 4 of Directive (EU) 2016/1148;

(8) ‘cyber threat’ means any potential circumstance or event that may damage, disrupt or otherwise adversely impact network and information systems, their users and affected persons;
‘European cybersecurity certification scheme’ means the comprehensive set of rules, technical requirements, standards and procedures defined at Union level applying to the certification or conformity assessment of Information and Communication Technology (ICT) processes, products and services falling under the scope of that specific scheme;

‘national cybersecurity certification scheme’ means a comprehensive set of rules, technical requirements, standards and procedures developed and adopted by a national public authority applying to the certification or conformity assessment of ICT processes, products and services falling under the scope of that specific scheme;

‘European cybersecurity certificate’ means a document issued by a conformity assessment body attesting that a given ICT process, product or service fulfils the has been evaluated for compliance with specific security requirements laid down in a European cybersecurity certification scheme;

‘ICT product and service’ means any element or group of elements of network and information systems;

‘ICT service’ means any service consisting fully or mainly in the transmission, storing, retrieving or processing of information by means of network and information systems;

‘ICT process’ means any set of activities performed to design, develop, deliver and maintain an ICT product or service;

‘accreditation’ means accreditation as defined in point (10), Article 2 of Regulation (EC) No 765/2008;
(13) ‘national accreditation body’ means a national accreditation body as defined in point (11), Article 2 of Regulation (EC) No 765/2008;

(14) ‘conformity assessment’ means conformity assessment as defined in point (12), Article 2 of Regulation (EC) No 765/2008;

(15) ‘conformity assessment body’ means conformity assessment body as defined in point (13), Article 2 of Regulation (EC) No 765/2008;

(16) ‘standard’ means a standard as defined in point (1) of Article 2 of Regulation (EU) No 1025/2012;

(16a) ‘technical specification’ means a document that prescribes technical requirements to be fulfilled by ICT process, product or service;

(16b) ‘assurance level’ means a ground for confidence that an ICT process, product or service meets the security requirements of a specific European cybersecurity certification scheme and states at what level it has been evaluated; the assurance level does not measure the security of an ICT process, product or service themselves.
TITLE II

ENISA – the "European Union Agency for Cybersecurity"

CHAPTER I

MANDATE AND OBJECTIVES AND TASKS

Article 3

Mandate

1. The Agency shall undertake the tasks assigned to it by this Regulation for the purpose of contributing to a high level of cybersecurity within across the Union in particular by supporting Member States and Union institutions, agencies and bodies in improving cybersecurity. The Agency shall act as a reference point of advice and expertise on cybersecurity for Union institutions, agencies and bodies.

2. The Agency shall carry out tasks conferred upon it by Union acts setting out measures for approximating the laws, regulations and administrative provisions of the Member States which are related to cybersecurity.

2a. When carrying out its tasks, the Agency shall act independently and take utmost account of the national expertise of Member States relevant authorities while avoiding duplication of activities.

3. The objectives and the tasks of the Agency shall be without prejudice to the competences of the Member States regarding cybersecurity, and in any case, without prejudice to activities concerning public security, defence, national security and the activities of the state in areas of criminal law.
Article 4

Objectives

1. The Agency shall be a centre of expertise on cybersecurity by virtue of its independence, the scientific and technical quality of the advice and assistance it delivers and the information it provides, the transparency of its operating procedures and methods of operation, and its diligence in carrying out its tasks.

2. The Agency shall assist the Union institutions, agencies and bodies, as well as Member States, in developing and implementing Union policies related to cybersecurity, including sectorial policies on cybersecurity.

3. The Agency shall support capacity building and preparedness across the Union, by assisting the Union institutions, agencies and bodies, as well as Member States and public and private stakeholders in order to increase the protection of their network and information systems, develop and improve cyber resilience and response capacities, and develop skills and competencies in the field of cybersecurity, and achieve cyber resilience.

4. The Agency shall promote cooperation and coordination at Union level among Member States, Union institutions, agencies and bodies, and relevant private and public stakeholders, including the private sector, on matters related to cybersecurity.

5. The Agency shall contribute to increasing cybersecurity capabilities at Union level in order to complement the action of assist Member States in preventing and responding to cyber threats, notably in the event of cross-border incidents.
6. The Agency shall promote the use of certification, with a view to avoiding fragmentation of certification schemes in the EU. In particular, the Agency shall contribute by contributing to the establishment and maintenance of a cybersecurity certification framework at Union level in accordance with Title III of this Regulation, with a view to increasing transparency of cybersecurity assurance of ICT products and services and thus strengthen trust in the digital internal market.

7. The Agency shall promote a high level of awareness of citizens and businesses on issues related to the cybersecurity.

**CHAPTER IA**

**TASKS**

Article 5

Tasks relating to the development and implementation of Union policy and law

The Agency shall contribute to the development and implementation of Union policy and law, by:

1. assisting and advising, in particular by providing its independent opinion and supplying preparatory work, on the development and review of Union policy and law in the area of cybersecurity, as well as sector-specific policy and law initiatives where matters related to cybersecurity are involved;

2. assisting Member States to implement consistently the Union policy and law regarding cybersecurity notably in relation to Directive (EU) 2016/1148, including by means of opinions, guidelines, advice and best practices on topics such as risk management, incident reporting and information sharing, as well as facilitating the exchange of best practices between competent authorities in this regard;
3. contributing to the work of the Cooperation Group pursuant to Article 11 of Directive (EU) 2016/1148, by providing its expertise and assistance;

4. supporting:

   (1) the development and implementation of Union policy in the area of electronic identity and trust services, in particular by providing advice and technical guidelines, as well as facilitating the exchange of best practices between competent authorities;

   (2) the promotion of an enhanced level of security of electronic communications, including by providing expertise and advice, as well as facilitating the exchange of best practices between competent authorities;

5. supporting the regular review of Union policy activities by providing an annual report on the state of implementation of the respective legal framework regarding:

   (a) Member States' incident notifications provided by the single point of contacts to the Cooperation Group pursuant to Article 10(3) of Directive (EU) 2016/1148;

   (b) notifications of breach of security and loss of integrity regarding the trust service providers, provided by the supervisory bodies to the Agency, pursuant to Article 19(3) of Regulation (EU) 910/2014;

   (c) notifications of breach of security incidents transmitted by the undertakings providing public communications networks or publicly available electronic communications services, provided by the competent authorities to Agency, pursuant to Article 40 of [Directive establishing the European Electronic Communications Code].
Article 6

Tasks relating to e-Capacity building

1. The Agency shall assist:

(a) Member States in their efforts to improve the prevention, detection and analysis, and the capacity to respond to, cybersecurity threats problems and incidents by providing them with the necessary knowledge and expertise;

(b) Union institutions, bodies, offices and agencies and bodies, in their efforts to improve the prevention, detection and analysis of and the capability to respond to cybersecurity threats problems and incidents in particular through appropriate support for the CERT for the Union institutions, agencies and bodies (CERT-EU);

(c) Member States, at their request, in developing national Computer Security Incident Response Teams (CSIRTs) pursuant to Article 9(5) of Directive (EU) 2016/1148;

(d) Member States, at their request, in developing national strategies on the security of network and information systems, pursuant to Article 7(2) of Directive (EU) 2016/1148; the Agency shall also promote dissemination and track progress of the implementation of those strategies across the Union in order to promote best practices;

(e) Union institutions in developing and reviewing Union strategies regarding cybersecurity, promoting their dissemination and tracking progress of their implementation;

(f) national and Union CSIRTs in raising the level of their capabilities, including by promoting dialogue and exchange of information, with a view to ensuring that, with regard to the state of the art, each CSIRT meets a common set of minimum capabilities and operates according to best practices;
(g) the Member States by organising **regular** yearly large-scale cybersecurity exercises at the Union level referred to in Article 7(6) and by making policy recommendations based on the evaluation process of the exercises and lessons learned from them;

(h) relevant public bodies by offering trainings regarding cybersecurity, where appropriate in cooperation with stakeholders;

(i) the Cooperation Group, in by exchanging of best practices, in particular with regard to the identification of operators of essential services by Member States, including in relation to cross-border dependencies, regarding risks and incidents, pursuant to Article 11(3)(i) of Directive (EU) 2016/1148.

2. The Agency shall support information sharing in and between sectors facilitate the establishment of and continuously support sectoral Information Sharing and Analysis Centres (ISACs), in particular in the sectors listed in Annex II of Directive (EU) 2016/1148, by providing best practices and guidance on available tools, procedure, as well as on how to address regulatory issues related to information sharing.

**Article 7**

*Tasks relating to Operational cooperation at Union level*

1. The Agency shall support operational cooperation among **Member States, Union institutions, agencies and competent public bodies**, and between stakeholders.
2. The Agency shall cooperate at operational level and establish synergies with Union institutions, bodies, offices and agencies and bodies, including the CERT-EU, those services dealing with cybercrime and supervisory authorities dealing with the protection of privacy and personal data, with a view to addressing issues of common concern, including:

(a) the exchange of know-how and best practices;
(b) the provision of advice and guidelines on relevant issues related to cybersecurity;
(c) the establishment, upon consultation of the Commission, of practical arrangements for the execution of specific tasks.

3. The Agency shall provide the secretariat of the CSIRTs network, pursuant to Article 12(2) of Directive (EU) 2016/1148 and in this capacity shall actively facilitate the information sharing and the cooperation among its members.

4. The Agency shall support contribute to the operational cooperation within the CSIRTs Network providing support to Member States - at their request, by:

(a) advising on how to improve their capabilities to prevent, detect and respond to incidents;
(b) providing, at their request, facilitating the technical handling assistance in case of incidents having a significant or substantial impact, including in particular by supporting the voluntary sharing of technical solutions between Member States;
(c) analysing vulnerabilities, artefacts and incidents;

(c a) providing support to ex-post technical inquiries of incidents having a significant or substantial impact pursuant to Directive (EU) 2016/1148.
In performing these tasks, the Agency and CERT-EU shall engage in a structured cooperation in order to benefit from synergies and avoid duplication of activities, in particular regarding operational aspects.

5. Upon a request by two or more Member States concerned, and with the sole purpose of providing advice for the prevention of future incidents, the Agency shall provide support to or carry out an ex-post technical enquiry following notifications by affected undertakings of incidents having a significant or substantial impact pursuant to Directive (EU) 2016/1148. The Agency shall also carry out such an enquiry upon a duly justified request from the Commission in agreement with the concerned Member States in case of such incidents affecting more than two Member States.

The scope of the enquiry and the procedure to be followed in conducting such enquiry shall be agreed by the concerned Member States and the Agency and is without prejudice to any on-going criminal investigation concerning the same incident. The enquiry shall be concluded by a final technical report compiled by the Agency in particular on the basis of information and comments provided by the concerned Member States and undertaking(s) and agreed with the concerned Member States. A summary of the report focussing on the recommendations for the prevention of future incidents will be shared with the CSIRTs network.
6. The Agency shall organise regular annual cybersecurity exercises at Union level, and support Member States and EU institutions, agencies and bodies in organising exercises following their request(s). **Such exercises at Union level may include technical, operational or strategic elements.** Annual exercises at Union level shall include technical, operational and strategic elements and help to prepare the cooperative response at the Union level to large-scale cross-border cybersecurity incidents. **Once every two years, a large-scale exercise shall be organised that will have all that elements.** The Agency shall also contribute to and help organise, where appropriate, sectoral cybersecurity exercises together with relevant ISACs and permit ISACs to organisations that may participate also in Union level cybersecurity exercises.

7. The Agency shall, **in close cooperation with Member States,** prepare a regular EU Cybersecurity Technical Situation Report on incidents and threats based on open source information, its own analysis, and reports shared by, among others: Member States' CSIRTs (on a voluntary basis) or NIS Directive Single Points of Contact (both on a voluntary basis in accordance with NIS Directive Article 14 (5)); European Cybercrime Centre (EC3) at Europol, CERT-EU.

8. The Agency shall contribute to develop a cooperative response, at Union and Member States level, to large-scale cross-border incidents or crises related to cybersecurity, mainly by:

   (a) aggregating reports from national sources shared on a voluntary basis with a view to contribute to establishing common situational awareness;

   (b) ensuring the efficient flow of information and the provision of escalation mechanisms between the CSIRTs Network and the technical and political decision-makers at Union level;
(c) supporting upon request of Member States, facilitating the technical handling of an incident or crisis, including in particular, facilitating by supporting the voluntary sharing of technical solutions between Member States;

(d) supporting EU institutions, agencies and bodies and, upon request, Member States in the public communication around the incident or crisis;

(e) supporting Member States, at their request, to testing the cooperation plans to respond to such incidents or crises.

Article 8

Tasks relating to the Market, cybersecurity certification, and standardisation

The Agency shall:

(a) support and promote the development and implementation of the Union policy on cybersecurity certification of ICT processes, products and services, as established in Title III of this Regulation, by:

(1) preparing candidate European cybersecurity certification schemes for ICT processes, products and services in cooperation with industry and in accordance with Article 44 of this Regulation;

(2) assisting the Commission in providing the secretariat to the European Cybersecurity Certification Group pursuant to Article 53 of this Regulation;

(3) compiling and publishing guidelines and developing good practices concerning the cybersecurity requirements of ICT products and services, in cooperation with national cybersecurity certification supervisory authorities and the industry;
(3a) recommending appropriate technical specifications for the use of the development of European cybersecurity certification schemes as referred in Article 47(1)(b) in cases where standards are not available;

(3b) contributing to a sufficient capacity building related to evaluation and certification processes by compiling and publishing guidelines as well as by providing support to Member States at their request;

(b) facilitate the establishment and take-up of European and international standards for risk management and for the security of ICT processes, products and services, as well as;

(ba) draw up, in collaboration with Member States, advice and guidelines regarding the technical areas related to the security requirements for operators of essential services and digital service providers, as well as regarding already existing standards, including Member States' national standards, pursuant to Article 19(2) of Directive (EU) 2016/1148;

(c) perform and disseminate regular analyses of the main trends in the cybersecurity market both on the demand and supply side, with a view of fostering the cybersecurity market in the Union.
Article 9

Tasks relating to Knowledge and information and awareness raising

The Agency shall:

(a) perform analyses of emerging technologies and provide topic-specific assessments on expected societal, legal, economic and regulatory impacts of technological innovations on cybersecurity;

(b) perform long-term strategic analyses of cybersecurity threats and incidents in order to identify emerging trends and help prevent problems related to cybersecurity incidents;

(c) provide, in cooperation with experts from Member States authorities, advice, guidance and best practices for the security of network and information systems, in particular for the security of the internet infrastructure and those infrastructures supporting the sectors listed in Annex II of Directive (EU) 2016/1148 and those used by the digital service providers listed in Annex III of that Directive;

(d) pool, organise and make available to the public, through a dedicated portal, information on cybersecurity, provided by the Union institutions, agencies and bodies and, on a voluntary basis, by Member States and private and public stakeholders;

(e) raise awareness of the public about cybersecurity risks, and provide guidance on good practices for individual users aimed at citizens and organisations;

(f) collect and analyse publicly available information regarding significant incidents and compiling reports with a view to providing guidance to businesses and citizens across the Union;

(g) organise, in cooperation with the Member States and Union institutions, bodies, offices and agencies regular outreach campaigns to increase cybersecurity and its visibility in the Union.
Article 9a
Awareness raising and education

The Agency shall:

(a) raise awareness of the public about cybersecurity risks, and provide guidance on good practices for individual users aimed at citizens and organisations;

(b) organise, in cooperation with the Member States, Union institutions, bodies, agencies and industry, regular outreach campaigns to increase cybersecurity and its visibility in the Union;

(c) assist Member States in their efforts to raise cybersecurity awareness and promote cybersecurity education;

(d) support closer coordination and exchange of best practices among Member States on cybersecurity education and awareness by facilitating creation and maintenance of a network of national education points of contact.

Article 10
Tasks relating to research and innovation

In relation to research and innovation, the Agency shall:

(a) advise the Union and the Member States on research needs and priorities in the area of cybersecurity, with a view to enabling effective responses to current and emerging risks and threats, including with respect to new and emerging information and communications technologies, and to using risk-prevention technologies effectively;

(b) participate, where the Commission has delegated the relevant powers to it, in the implementation phase of research and innovation funding programmes or as a beneficiary.
Article 11

Tasks relating to International cooperation

The Agency shall contribute to the Union’s efforts to cooperate with third countries and international organisations to promote international cooperation on issues related to cybersecurity, by:

(a) engaging, where appropriate, as an observer in the organisation of international exercises, and analysing and reporting to the Management Board on the outcome of such exercises;

(b) facilitating, upon the request of the Commission within the relevant international cooperation frameworks, the exchange of best practices between the relevant international organisations;

(c) providing, upon request, the Commission with expertise;

(ca) in collaboration with European Cybersecurity Certification Group established under Article 53 providing advice and support to the Commission on matters concerning agreements for mutual recognition of cybersecurity certificates with third countries.
CHAPTER II
ORGANISATION OF THE AGENCY

Article 12
Structure
The administrative and management structure of the Agency shall be composed of the following:

(a) a Management Board which shall exercise the functions set out in Article 14;
(b) an Executive Board which shall exercise the functions set out in Article 18;
(c) an Executive Director who shall exercise the responsibilities set out in Article 19; and
(d) a Permanent Stakeholders’ Group which shall exercise the functions set out in Article 20;
(da) a National Liaison Officers Network which shall exercise the functions set out in Article 20a.

SECTION 1
MANAGEMENT BOARD

Article 13
Composition of the Management Board
1. The Management Board shall be composed of one representative of each Member State, and two representatives appointed by the Commission. All representatives shall have voting rights.
2. Each member of the Management Board shall have an alternate member to represent the member in their absence.
3. Members of the Management Board and their alternates shall be appointed in light of their
knowledge in the field of cybersecurity, taking into account relevant managerial,
administrative and budgetary skills. The Commission and Member States shall make
efforts to limit the turnover of their representatives in the Management Board, in order to
ensure continuity of that Board’s work. The Commission and Member States shall aim to
achieve a balanced representation between men and women on the Management Board.

4. The term of office of members of the Management Board and of their alternates shall be
four years. That term shall be renewable.

Article 14
Functions of the Management Board

1. The Management Board shall:

(a) define the general direction of the operation of the Agency and shall also ensure that
the Agency works in accordance with the rules and principles laid down in this
Regulation. It shall also ensure consistency of the Agency’s work with activities
conducted by the Member States as well as at Union level;

(b) adopt the Agency’s draft single programming document referred to in Article 21,
before its submission to the Commission for its opinion;

(c) adopt, taking into account the Commission opinion, the Agency's single
programming document by a majority of two-thirds of members and in accordance
with Article 17;

(ca) supervise the implementation of the multiannual and annual programming
included in the single programming document;
(d) adopt, by a majority of two-thirds of members, the annual budget of the Agency and exercise other functions in respect of the Agency's budget pursuant to Chapter III;

(e) assess and adopt the consolidated annual report on the Agency’s activities and send both the report and its assessment by 1 July of the following year, to the European Parliament, the Council, the Commission and the Court of Auditors. The annual report shall include the accounts and describe how the Agency has met its performance indicators. The annual report shall be made public;

(f) adopt the financial rules applicable to the Agency in accordance with Article 29;

(g) adopt an anti-fraud strategy that is proportionate to the fraud risks having regard to a cost-benefit analysis of the measures to be implemented;

(h) adopt rules for the prevention and management of conflicts of interest in respect of its members;

(i) ensure adequate follow-up to the findings and recommendations resulting from investigations of the European Anti-fraud Office (OLAF) and the various internal or external audit reports and evaluations;

(j) adopt its rules of procedure;

(k) in accordance with paragraph 2, exercise, with respect to the staff of the Agency, the powers conferred by the Staff Regulations of Officials on the Appointing Authority and the Conditions of Employment of Other Servants of the European Union on the Authority Empowered to Conclude a Contract of Employment ("the appointing authority powers");
(l) adopt rules implementing the Staff Regulations and the Conditions of Employment of Other Servants in accordance with the procedure provided for in Article 110 of the Staff Regulations;

(m) appoint the Executive Director and where relevant extend his term of office or remove him from office in accordance with Article 33 of this Regulation;

(n) appoint an Accounting Officer, who may be the Commission's Accounting Officer, who shall be totally independent in the performance of his/her duties;

(o) take all decisions on the establishment of the Agency's internal structures and, where necessary, their modification, taking into consideration the Agency's activity needs and having regard to sound budgetary management;

(p) authorise the conclusion of working arrangements in accordance with Articles 7 and 39.

2. The Management Board shall adopt, in accordance with Article 110 of the Staff Regulations, a decision based on Article 2(1) of the Staff Regulations and on Article 6 of the Conditions of Employment of Other Servants, delegating relevant appointing authority powers to the Executive Director and defining the conditions under which this delegation of powers can be suspended. The Executive Director shall be authorised to sub-delegate those powers.

3. Where exceptional circumstances so require, the Management Board may by way of a decision temporarily suspend the delegation of the appointing authority powers to the Executive Director and those sub-delegated by the latter and exercise them itself or delegate them to one of its members or to a staff member other than the Executive Director.
Article 15
Chairperson of the Management Board

The Management Board shall elect by a majority of two-thirds of members its Chairperson and a Deputy Chairperson from among its members for a period of four years, which shall be renewable once. If, however, their membership of the Management Board ends at any time during their term of office, their term of office shall automatically expire on that date. The Deputy Chairperson shall *ex officio* replace the Chairperson if the latter is unable to attend to his or her duties.

Article 16
Meetings of the Management Board

1. Meetings of the Management Board shall be convened by its Chairperson.

2. The Management Board shall hold at least two ordinary meetings a year. It shall also hold extraordinary meetings at the request of the Chairperson, at the request of the Commission, or at the request of at least a third of its members.

3. The Executive Director shall take part, without voting rights, in the meetings of the Management Board.

4. Members of the Permanent Stakeholder Group may take part, upon invitation from the Chairperson, in the meetings of the Management Board, without voting rights.

5. The members of the Management Board and their alternates may, subject to its Rules of Procedure, be assisted at the meetings by advisers or experts.

6. The Agency shall provide the secretariat for the Management Board.
**Article 17**

**Voting rules of the Management Board**

1. The Management Board shall take its decisions by majority of its members.

2. A two-thirds majority of all Management Board members shall be required for the single programming document, the annual budget, the appointment, extension of the term of office or removal of the Executive Director.

3. Each member shall have one vote. In the absence of a member, their alternate shall be entitled to exercise the right to vote.

4. The Chairperson shall take part in the voting.

5. The Executive Director shall not take part in the voting.

6. The Management Board's rules of procedures shall establish more detailed voting arrangements, in particular the circumstances in which a member may act on behalf of another member.
SECTION 2
EXECUTIVE BOARD

Article 18

Executive Board

1. The Management Board shall be assisted by an Executive Board.

2. The Executive Board shall:

(a) prepare decisions to be adopted by the Management Board;

(b) ensure, together with the Management Board, the adequate follow-up to the findings and recommendations stemming from investigations of OLAF and the various internal or external audit reports and evaluations;

(c) without prejudice to the responsibilities of the Executive Director, as set out in Article 19, assist and advise the Executive Director in implementing the decisions of the Management Board on administrative and budgetary matters pursuant to Article 19.

3. The Executive Board shall be composed of five members appointed from among the members of the Management Board amongst whom the Chairperson of the Management Board, who may also chair the Executive Board, and one of the representatives of the Commission. The Executive Director shall take part in the meetings of the Executive Board, but shall not have the right to vote.

4. The term of office of the members of the Executive Board shall be four years. That term shall be renewable.

5. The Executive Board shall meet at least once every three months. The chairperson of the Executive Board shall convene additional meetings at the request of its members.
6. The Management Board shall lay down the rules of procedure of the Executive Board.

7. When necessary, because of urgency, the Executive Board may take certain provisional decisions on behalf of the Management Board, in particular on administrative management matters, including the suspension of the delegation of the appointing authority powers and budgetary matters.

SECTION 3
EXECUTIVE DIRECTOR

Article 19
Responsibilities of the Executive Director

1. The Agency shall be managed by its Executive Director, who shall be independent in the performance of his or her duties. The Executive Director shall be accountable to the Management Board.

2. The Executive Director shall report to the European Parliament on the performance of his or her duties when invited to do so. The Council may invite the Executive Director to report on the performance of his or her duties.
3. The Executive Director shall be responsible for:

(a) the day-to-day administration of the Agency;

(b) implementing the decisions adopted by the Management Board;

(c) preparing the draft single programming document and submitting it to the Management Board for approval before its submission to the Commission;

(d) implementing the single programming document and reporting to the Management Board thereon;

(e) preparing the consolidated annual report on the Agency’s activities including the implementation of the annual work programme and presenting it to the Management Board for assessment and adoption;

(f) preparing an action plan following-up on the conclusions of the retrospective evaluations and reporting on progress every two years to the Commission;

(g) preparing an action plan following-up conclusions of internal or external audit reports, as well as investigations by the European Ant-fraud Office (OLAF) and reporting on progress twice a year to the Commission and regularly to the Management Board;

(h) preparing draft financial rules applicable to the Agency;

(i) preparing the Agency's draft statement of estimates of revenue and expenditure and implementing its budget;
(j) protecting the financial interests of the Union by the application of preventive measures against fraud, corruption and any other illegal activities, by effective checks and, if irregularities are detected, by the recovery of the amounts wrongly paid and, where appropriate, by effective, proportionate and dissuasive administrative and financial penalties;

(k) preparing an anti-fraud strategy for the Agency and presenting it to the Management Board for approval;

(l) developing and maintaining contact with the business community and consumers’ organisations to ensure regular dialogue with relevant stakeholders;

(la) the regular exchange with Union institutions, agencies and bodies regarding their activities on cybersecurity to ensure coherence in the development and the implementation of EU policy;

(m) other tasks assigned to the Executive Director by this Regulation.

4. Where necessary and within the Agency’s mandate, and in accordance with the Agency's objectives and tasks, the Executive Director may set up ad hoc Working Groups composed of experts, including from the Member States’ competent authorities. The Management Board shall be informed in advance. The procedures regarding in particular the composition of the Working Groups, the appointment of the experts of the Working Groups by the Executive Director and the operation of the Working Groups shall be specified in the Agency’s internal rules of operation.
5. Where necessary, for the purpose of carrying out the Agency's tasks in an efficient and effective manner and based on an appropriate cost-benefit analysis, the Executive Director may decide to locate members of staff in one or more Member States to establish one or more local offices in one or more Member States. Before deciding to establish a local office the Executive Director shall seek the opinion of the Member State(s) concerned, including the Member State where the seat of the Agency is located, and obtain the prior consent of the Commission and the Management Board and the Member State(s) concerned. In cases of disagreement during the consultation process between the Executive Director and the Member States concerned, the issue shall be brought to the Council for discussion. The decision shall specify the scope of the activities to be carried out at the local office in a manner that avoids unnecessary costs and duplication of administrative functions of the Agency. An agreement with the Member State(s) concerned shall be reached, where appropriate or required. The number of the staff in all local offices shall be kept to a minimum and shall not exceed in total 40 % of the total number of the Agency’s staff located in the Member State where the seat of the Agency is located. The number of the staff in each local office shall not exceed 10 % of the total number of the Agency’s staff located in the Member State where the seat of the Agency is located.
SECTION 4
PERMANENT STAKEHOLDERS' GROUP

Article 20
Permanent Stakeholders’ Group

1. The Management Board, acting on a proposal by the Executive Director, shall set up a Permanent Stakeholders’ Group composed of recognised experts representing the relevant stakeholders, such as the ICT industry, providers of electronic communications networks or services available to the public, operators of essential services, consumer groups, academic experts in the cybersecurity, and representatives of competent authorities notified under [Directive establishing the European Electronic Communications Code] as well as of law enforcement and data protection supervisory authorities.

2. Procedures for the Permanent Stakeholders’ Group, in particular regarding the number, composition, and the appointment of its members by the Management Board, the proposal by the Executive Director and the operation of the Group, shall be specified in the Agency’s internal rules of operation and shall be made public.

3. The Permanent Stakeholders’ Group shall be chaired by the Executive Director or by any person the Executive Director appoints on a case-by-case basis.

4. The term of office of the Permanent Stakeholders’ Group’s members shall be two-and-a-half years. Members of the Management Board may not be members of the Permanent Stakeholders’ Group. Experts from the Commission and the Member States shall be entitled to be present at the meetings of the Permanent Stakeholders’ Group and to participate in its work. Representatives of other bodies deemed relevant by the Executive Director, who are not members of the Permanent Stakeholders’ Group, may be invited to attend the meetings of the Permanent Stakeholders’ Group and to participate in its work.
5. The Permanent Stakeholders’ Group shall advise the Agency in respect of the performance of its activities. It shall in particular advise the Executive Director on drawing up a proposal for the Agency’s work programme, and on ensuring communication with the relevant stakeholders on all issues related to the work programme.

5a. The Permanent Stakeholders’ Group shall on regular basis inform the Management Board of its activities.

SECTION 4A
NATIONAL LIAISON OFFICERS NETWORK

Article 20a
National Liaison Officers Network

1. The Management Board, acting on a proposal by the Executive Director, shall set up a National Liaison Officers Network composed of representatives of the Member States.

2. The National Liaison Officers Network shall compose of the representatives of all Member States. Each Member State shall appoint one representative. The meetings of the network may be held in different expert formats.

3. The National Liaison Officers Network shall in particular facilitate the exchange of information between ENISA and the Member States. It shall in particular support ENISA in disseminating its activities, findings and recommendations across the EU, to the relevant stakeholders.
4. National Liaison Officers shall act as focal points of contact on a national level to facilitate cooperation between ENISA and national experts in the context of ENISA work programme implementation.

5. While National Liaisons Officers should closely cooperate with the Management Board Representatives of their respective countries the Network itself shall not duplicate the work neither of the Management Board nor other EU fora.

6. Functions and procedures for the National Liaisons Officers Network, shall be specified in the Agency’s internal rules of operation and shall be made public.

SECTION 5
OPERATION

Article 21
Single Programming Document

1. The Agency shall carry out its operations in accordance with a single programming document containing its multiannual and annual programming, which shall include all of its planned activities.
2. Each year, the Executive Director shall draw up a draft single programming document containing multiannual and annual programming with the corresponding human and financial resources planning in accordance with Article 32 of Commission Delegated Regulation (EU) No 1271/2013\(^{14}\) and taking into account guidelines set by the Commission.

3. By 30 November each year, the Management Board shall adopt the single programming document referred to in paragraph 1 and forward it to the European Parliament, the Council and the Commission no later than 31 January of the following year, as well as any later updated version of that document.

4. The single programming document shall become definitive after final adoption of the general budget of the Union and, if necessary, shall be adjusted accordingly.

5. The annual work programme shall comprise detailed objectives and expected results including performance indicators. It shall also contain a description of the actions to be financed and an indication of the financial and human resources allocated to each action, in accordance with the principles of activity-based budgeting and management. The annual work programme shall be coherent with the multi-annual work programme referred to in paragraph 7. It shall clearly indicate tasks that have been added, changed or deleted in comparison with the previous financial year.

---

6. The Management Board shall amend the adopted annual work programme when a new task is given to the Agency. Any substantial amendment to the annual work programme shall be adopted by the same procedure as the initial annual work programme. The Management Board may delegate the power to make non-substantial amendments to the annual work programme to the Executive Director.

7. The multi-annual work programme shall set out overall strategic programming including objectives, expected results and performance indicators. It shall also set out resource programming including multi-annual budget and staff.

8. The resource programming shall be updated annually. The strategic programming shall be updated wherever appropriate and in particular where necessary to address the outcome of the evaluation referred to in Article 56.

Article 22

Declaration of interest

1. Members of the Management Board, the Executive Director and officials seconded by Member States on a temporary basis shall each make a declaration of commitments and a declaration indicating the absence or presence of any direct or indirect interest which might be considered prejudicial to their independence. The declarations shall be accurate and complete, made annually in writing and updated whenever necessary.

2. Members of the Management Board, the Executive Director, and external experts participating in ad hoc Working Groups shall each accurately and completely declare, at the latest at the start of each meeting, any interest which might be considered prejudicial to their independence in relation to the items on the agenda, and shall abstain from participating in the discussion of and voting upon such points.
3. The Agency shall lay down, in its internal rules of operation, the practical arrangements for the rules on declarations of interest referred to in paragraphs 1 and 2.

Article 23

Transparency

1. The Agency shall carry out its activities with a high level of transparency and in accordance with Article 25.

2. The Agency shall ensure that the public and any interested parties are given appropriate, objective, reliable and easily accessible information, in particular with regard to the results of its work. It shall also make public the declarations of interest made in accordance with Article 22.

3. The Management Board, acting on a proposal from the Executive Director, may authorise interested parties to observe the proceedings of some of the Agency’s activities.

4. The Agency shall lay down, in its internal rules of operation, the practical arrangements for implementing the transparency rules referred to in paragraphs 1 and 2.
Article 24

Confidentiality

1. Without prejudice to Article 25, the Agency shall not divulge to third parties information that it processes or receives in relation to which a reasoned request for confidential treatment, in whole or in part, has been made.

2. Members of the Management Board, the Executive Director, the members of the Permanent Stakeholders Group, external experts participating in ad hoc Working Groups, and members of the staff of the Agency including officials seconded by Member States on a temporary basis shall comply with the confidentiality requirements under Article 339 of the Treaty on the Functioning of the European Union (TFEU), even after their duties have ceased.

3. The Agency shall lay down, in its internal rules of operation, the practical arrangements for implementing the confidentiality rules referred to in paragraphs 1 and 2.

4. If required for the performance of the Agency’s tasks, the Management Board shall decide to allow the Agency to handle classified information. In that case the Management Board shall, in agreement with the Commission services, adopt internal rules of operation applying the security principles set out in Commission Decisions (EU, Euratom) 2015/443 and 2015/444. Those rules shall include provisions for the exchange, processing and storage of classified information.

---

Article 25
Access to documents

1. Regulation (EC) No 1049/2001 shall apply to documents held by the Agency.

2. The Management Board shall adopt arrangements for implementing Regulation (EC) No 1049/2001 within six months of the establishment of the Agency.

3. Decisions taken by the Agency pursuant to Article 8 of Regulation (EC) No 1049/2001 may be the subject of a complaint to the Ombudsman under Article 228 TFEU or of an action before the Court of Justice of the European Union under Article 263 TFEU.

CHAPTER III
ESTABLISHMENT AND STRUCTURE OF THE BUDGET

Article 26
Establishment of the budget

1. Each year, the Executive Director shall draw up a draft statement of estimates of the Agency’s revenue and expenditure for the following financial year, and shall forward it to the Management Board, together with a draft establishment plan. Revenue and expenditure shall be in balance.

2. Each year, the Management Board shall, on the basis of the draft statement of estimates of revenue and expenditure referred to in paragraph 1, produce a statement of estimates of revenue and expenditure for the Agency for the following financial year.

3. The Management Board shall, by 31 January each year, send the statement of estimates referred to in paragraph 2, which shall be part of the draft single programming document, to the Commission and the third countries with which the Union has concluded agreements in accordance with Article 39.
4. On the basis of that statement of estimates, the Commission shall enter in the draft budget of the Union the estimates it deems necessary for the establishment plan and the amount of the contribution to be charged to the general budget, which it shall submit to the European Parliament and the Council in accordance with Article 313 and 314 TFEU.

5. The European Parliament and the Council shall authorise the appropriations for the contribution to the Agency.

6. The European Parliament and the Council shall adopt the establishment plan for the Agency.

7. Together with the single programming document, the Management Board shall adopt the Agency’s budget. It shall become final following definitive adoption of the general budget of the Union. Where appropriate, the Management Board shall adjust the Agency’s budget and single programming document in accordance with the general budget of the Union.

Article 27

Structure of the budget

1. Without prejudice to other resources, the Agency's revenue shall be composed of:

(a) a contribution from the Union budget;

(b) revenue assigned to specific items of expenditure in accordance with its financial rules referred to in Article 29;

(c) Union funding in the form of delegation agreements or ad hoc grants in accordance with its financial rules referred to in Article 29 and with the provisions of the relevant instruments supporting the policies of the Union;
(d) contributions from third countries participating in the work of the Agency as provided for in Article 39;

(e) any voluntary contributions from Member States in money or in kind; Member States that provide voluntary contributions may not claim any specific right or service as a result thereof.

2. The expenditure of the Agency shall include staff, administrative and technical support, infrastructure and operational expenses, and expenses resulting from contracts entered into with third parties.

Article 28

Implementation of the budget

1. The Executive Director shall be responsible for the implementation of the Agency’s budget.

2. The Commission’s internal auditor shall exercise the same powers over the Agency as over Commission departments.

3. By 1 March following each financial year (1 March of year N + 1), the Agency’s accounting officer shall send the provisional accounts to the Commission’s accounting officer and to the Court of Auditors.

4. Upon receipts of the Court of Auditors’ observations on the Agency's provisional accounts, the Agency's accounting officer shall draw up the Agency's final accounts under his or her responsibility.
5. The Executive Director shall submit the final accounts to the Management Board for an opinion.

6. The Executive Director shall send, by 31 March of year N + 1, the report on the budgetary and financial management to the European Parliament, the Council, the Commission and the Court of Auditors.

7. The accounting officer shall, by 1 July of year N + 1, transmit the final accounts to the European Parliament, the Council, the accounting officer of the Commission and the Court of Auditors, together with the Management Board's opinion.

8. At the same date as the transmission of his or her final accounts, the accounting officer shall also send to the Court of Auditors a representation letter covering those final accounts, with a copy to the accounting officer of the Commission.

9. The Executive Director shall publish the final accounts by 15 November of the following year.

10. The Executive Director shall send the Court of Auditors a reply to its observations by 30 September of year N + 1 and shall also send a copy of that reply to the Management Board and to the Commission.

11. The Executive Director shall submit to the European Parliament, at the latter’s request, all the information necessary for the smooth application of the discharge procedure for the financial year in question, as laid down in Article 165(3) of the Financial Regulation.

12. The European Parliament, acting on a recommendation from the Council, shall, before 15 May of year N + 2, give a discharge to the Executive Director in respect of the implementation of the budget for the year N.
Article 29

Financial Rules

The financial rules applicable to the Agency shall be adopted by the Management Board after consulting the Commission. They shall not depart from Regulation (EU) 1271/2013 unless such a departure is specifically required for the Agency’s operation and the Commission has given its prior consent.

Article 30

Combating fraud

1. In order to facilitate the combating of fraud, corruption and other unlawful activities under Regulation (EC) 883/2013 of the European Parliament and of the Council\textsuperscript{17}, the Agency shall, within six months from the day it becomes operational, accede to the Interinstitutional Agreement of 25 May, 1999 concerning internal investigations by the European Anti-fraud Office (OLAF) and shall adopt the appropriate provisions applicable to all the employees of the Agency, using the template set out in the Annex to that Agreement.

2. The Court of Auditors shall have the power of audit, on the basis of documents and on the spot, over all grant beneficiaries, contractors and subcontractors who have received Union funds from the Agency.

3. OLAF may carry out investigations, including on-the-spot checks and inspections, in accordance with the provisions and procedures laid down in Regulation 883/2013 of the European Parliament and of the Council and Council Regulation (Euratom, EC) No 2185/96\(^\text{18}\) of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the Union’ financial interests against fraud and other irregularities with a view to establishing whether there has been fraud, corruption or any other illegal activity affecting the financial interests of the Union in connection with a grant or a contract funded by the Agency.

4. Without prejudice to paragraphs 1, 2 and 3, cooperation agreements with third countries and international organisations, contracts, grant agreements and grant decisions of the Agency shall contain provisions expressly empowering the Court of Auditors and OLAF to conduct such audits and investigations, according to their respective competences.

**CHAPTER IV**  
**AGENCY STAFF**

**Article 31**  
**General provisions**

The Staff Regulations and the Conditions of Employment of Other Servants and the rules adopted by agreement between the Union institutions for giving effect to those Staff Regulations shall apply to the staff of the Agency.

---

\(^{18}\) Council Regulation (Euratom, EC) No 2185/96 of 11 November 1996 concerning on-the-spot checks and inspections carried out by the Commission in order to protect the European Communities' financial interests against fraud and other irregularities (OJ L 292, 15.11.1996, p. 2).
**Article 32**

**Privileges and immunity**

Protocol No 7 on the Privileges and Immunities of the European Union annexed to the Treaty on European Union and to the TFEU shall apply to the Agency and its staff.

**Article 33**

**Executive Director**

1. The Executive Director shall be engaged as a temporary agent of the Agency under Article 2(a) of the Conditions of Employment of Other Servants.

2. The Executive Director shall be appointed by the Management Board from a list of candidates proposed by the Commission, following an open and transparent selection procedure.

3. For the purpose of concluding the contract of the Executive Director, the Agency shall be represented by the Chairperson of the Management Board.

4. Before appointment, the candidate selected by the Management Board shall be invited to make a statement before the relevant committee of the European Parliament and to answer Members’ questions.

5. The term of office of the Executive Director shall be **four** five years. By the end of that period, the Commission shall carry out an assessment which takes into account the evaluation of the performance of the Executive Director and the Agency’s future tasks and challenges.

6. The Management Board shall reach decisions on appointment, extension of the term of office or removal from office of the Executive Director on the basis of a two-thirds majority of its members with voting rights.
7. The Management Board may, acting on a proposal from the Commission which takes into account the assessment referred to in paragraph 5, extend once the term of office of the Executive Director for no more than four five years.

8. The Management Board shall inform the European Parliament about its intention to extend the Executive Director’s term of office. Within three months before any such extension, the Executive Director shall, if invited, make a statement before the relevant committee of the European Parliament and answer Members’ questions.

9. An Executive Director whose term of office has been extended may not participate in another selection procedure for the same post.

10. The Executive Director may be removed from office only by decision of the Management Board, acting on a proposal from the Commission.

**Article 34**

*Seconded national experts and other staff*

1. The Agency may make use of seconded national experts or other staff not employed by the Agency. The Staff Regulations and the Conditions of Employment of Other Servants shall not apply to such staff.

2. The Management Board shall adopt a decision laying down rules on the secondment to the agency of national experts.
CHAPTER V
GENERAL PROVISIONS

Article 35

Legal status of the Agency

1. The Agency shall be a body of the Union and shall have legal personality.

2. In each Member State, the Agency shall enjoy the most extensive legal capacity accorded to legal persons under national law. It may, in particular, acquire or dispose of movable and immovable property and may be a party to legal proceedings, or both.

3. The Agency shall be represented by its Executive Director.

Article 36

Liability of the Agency

1. The contractual liability of the Agency shall be governed by the law applicable to the contract in question.

2. The Court of Justice of the European Union shall have jurisdiction to give judgment pursuant to any arbitration clause contained in a contract concluded by the Agency.

3. In the case of non-contractual liability, the Agency shall, in accordance with the general principles common to the laws of the Member States, make good any damage caused by it or its servants in the performance of their duties.
4. The Court of Justice of the European Union shall have jurisdiction in any dispute relating to compensation for such damage.

5. The personal liability of its servants towards the Agency shall be governed by the relevant conditions applying to the staff of the Agency.

Article 37
Language arrangements

1. Council Regulation No 1 shall apply to the Agency. The Member States and the other bodies appointed by them may address the Agency and receive a reply in the official language of the institutions of the Union of their choice.

2. The translation services required for the functioning of the Agency shall be provided by the Translation Centre for the Bodies of the European Union.

Article 38
Protection of personal data

---

19 Regulation No 1 determining the languages to be used by the European Atomic Energy Community (OJ 17, 6.10.1958, p. 401).

Article 39

Cooperation with third countries and international organisations

1. In so far as is necessary in order to achieve the objectives set out in this Regulation, the Agency may cooperate with the competent authorities of third countries or with international organisations or both. To this end, the Agency may, subject to prior approval by the Commission, establish working arrangements with the authorities of third countries and international organisations. These arrangements shall not create legal obligations incumbent on the Union and its Member States.

2. The Agency shall be open to the participation of third countries that have entered into agreements with the Union to this effect. Under the relevant provisions of these agreements, arrangements shall be made specifying in particular the nature, extent and manner in which those countries will participate in the Agency’s work, including provisions relating to participation in the initiatives undertaken by the Agency, financial contributions and staff. As regards staff matters, those arrangements shall, in any event, comply with the Staff Regulations.

3. The Management Board shall adopt a strategy for relations with third countries or international organisations concerning matters for which the Agency is competent. The Commission shall ensure that the agency operates within its mandate and the existing institutional framework by concluding an appropriate working arrangement with the agency's Executive Director.
**Article 40**

*Security rules on the protection of classified and sensitive non-classified information*

In consultation with the Commission, the Agency shall adopt its security rules applying the security principles contained in the Commission’s security rules for protecting European Union Classified Information (EUCI) and sensitive non-classified information, as set out in Commission Decisions (EU, Euratom) 2015/443 and 2015/444. This shall cover, inter alia, provisions for the exchange, processing and storage of such information.

**Article 41**

*Headquarters Agreement and operating conditions*

1. The necessary arrangements concerning the accommodation to be provided for the Agency in the host Member State and the facilities to be made available by that Member State together with the specific rules applicable in the host Member State to the Executive Director, members of the Management Board, Agency staff and members of their families shall be laid down in a Headquarters Agreement between the Agency and Member State where the seat is located, concluded after obtaining the approval of the Management Board and no later than [2 years after the entry into force of this Regulation].

2. The Agency’s host Member State shall provide the best possible conditions to ensure the proper functioning of the Agency, including the accessibility of the location, the existence of adequate education facilities for the children of staff members, appropriate access to the labour market, social security and medical care for both children and spouses.

**Article 42**

*Administrative control*

The operations of the Agency shall be supervised by the Ombudsman in accordance with Article 228 TFEU.
TITLE III
CYBERSECURITY CERTIFICATION FRAMEWORK

Article 43

European cybersecurity certification framework schemes

1. The European cybersecurity certification framework is established in order to improve the conditions for the functioning of the internal market by increasing the level of cybersecurity within the Union. It sets governance that enables a harmonised approach at EU level of European cybersecurity certification schemes, in view of creating a digital single market for ICT processes, products and services.

2. The European cybersecurity certification framework defines a mechanism to establish European cybersecurity certification schemes and to attest that the ICT processes, products and services that have been evaluated in accordance with such schemes comply with specified security requirements as regards their ability to resist at a given level of assurance, actions that aim to compromise the availability, authenticity, integrity or confidentiality of stored or transmitted or processed data or the functions or services offered by, or accessible via, those products, processes, and services and systems throughout their life cycle.
Article 44

Preparation and adoption of a European cybersecurity certification scheme

1. Following a request from the Commission or the European Cybersecurity Certification Group (the 'Group') established under Article 53, ENISA shall prepare a candidate European cybersecurity certification scheme which meets the requirements set out in Articles 45, 46 and 47 of this Regulation. Member States or the European Cybersecurity Certification Group (the 'Group') established under Article 53 may propose the preparation of a candidate European cybersecurity certification scheme to the Commission.

1a. The preparation of a candidate European cybersecurity certification scheme may be proposed to the Group by Member States or interested stakeholder organisations. The Group shall assess such proposals against criteria defined by the Group by means of guidelines in accordance with Article 53(3)(ca) and may request ENISA to prepare a candidate European cybersecurity certification scheme.

2. When preparing candidate schemes referred to in paragraph 1 of this Article, ENISA shall consult all relevant stakeholders by transparent consultation processes and closely cooperate with the Group. The Group shall provide ENISA with the assistance and expert advice required by ENISA in relation to the preparation of the candidate scheme and adopt an opinion on the candidate scheme before its submission to the Commission, including by providing opinions where necessary. ENISA shall ensure that the candidate schemes are consistent with the applicable harmonised standard used for accreditation of the conformity assessment body.

3. ENISA shall take utmost account of the opinion of the Group before transmitting the candidate European cybersecurity certification scheme prepared in accordance with paragraph 2 of this Article to the Commission.
4. The Commission, based on the candidate scheme proposed by ENISA, may adopt implementing acts, in accordance with Article 55(2), providing for European cybersecurity certification schemes for ICT processes, products and services meeting the requirements of Articles 45, 46 and 47 of this Regulation.

5. ENISA shall maintain a dedicated website providing information on, and publicity of, European cybersecurity certification schemes.

**Article 44a**

**Maintenance of a European cybersecurity certification scheme**

1. The Agency shall maintain a dedicated website providing information on, and publicity of, European cybersecurity certification schemes, certificates and EU statements of conformity issued pursuant to Article 47a.

2. The Agency, in close cooperation with the Group, shall at least every 5 years review the adopted European cybersecurity certification schemes taking into account feedback received from interested parties. If considered necessary, the Commission or the Group may request the Agency to start the process of developing a revised candidate scheme in accordance with Article 44(2) and (3).

**Article 45**

**Security objectives of European cybersecurity certification schemes**

A European cybersecurity certification scheme shall be so designed as to achieve, as applicable, at least the following security objectives:

(a) protect data stored, transmitted or otherwise processed against accidental or unauthorised storage, processing, access or disclosure during the entire process, product or service lifecycle;
(b) protect data stored, transmitted or otherwise processed against accidental or unauthorised destruction, accidental loss or alteration or lack of availability during the entire process, product or service lifecycle;

(c) ensure that authorised persons, programmes or machines can access exclusively the data, services or functions to which their access rights refer;

(d) record which data, functions or services have been communicated–accessed, used or otherwise processed, at what times and by whom;

(e) ensure that it is possible to check which data, services or functions have been accessed, or used or otherwise processed, at what times and by whom;

(f) restore the availability and access to data, services and functions in a timely manner in the event of physical or technical incident;

(g) ensure that ICT processes, products and services are provided with up to date software and hardware that do not contain publicly known vulnerabilities, and are provided mechanisms for secure software updates;

(ga) ICT processes, products and services are developed, manufactured and supplied according to the security requirements stated in the particular scheme.

Article 46

Assurance levels of European cybersecurity certification schemes

1. A European cybersecurity certification scheme may specify one or more of the following assurance levels: basic, substantial and/or high, for ICT processes, products and services issued under that scheme. The level of assurance shall be commensurate with the level of the risk associated with the intended use of an ICT process, product or service.
2. The assurance levels basic, substantial and high shall meet the following criteria respectively. refer to a certificate or an EU statement of conformity issued in the context of a European cybersecurity certification scheme, which provides for each assurance level respective security requirements including security functionalities and the corresponding degree of effort for the evaluation of an ICT process, product or service. The certificate or the EU statement of conformity is characterised with reference to technical specifications, standards and procedures related thereto, including technical controls, the purpose of which is to decrease the risk of, or to prevent cybersecurity incidents as follows:

(a) a European cybersecurity certificate or EU statement of conformity that refers to assurance level “basic” provides assurance that the ICT processes, products and services meet the respective security requirements including security functionalities and they have been evaluated to a level which aims to minimise the known basic risks for cyber incidents and cyber attacks. The evaluation activities shall include at least a review of a technical documentation, or where not applicable they shall include substitute activities with equivalent effect shall refer to a certificate issued in the context of a European cybersecurity certification scheme, which provides a limited degree of confidence in the claimed or asserted cybersecurity qualities of an ICT product or service, and is characterised with reference to technical specifications, standards and procedures related thereto, including technical controls, the purpose of which is to decrease the risk of cybersecurity incidents;
(b) a European cybersecurity certificate that refers to assurance level “substantial” provides assurance that the ICT processes, products and services meet the respective security requirements including security functionalities and they have been evaluated to a level which aims to minimise known cyber risks, cyber incidents and cyber attacks carried out by actors with limited skills and resources. The evaluation activities shall include at least: reviewing the non-applicability of publicly known vulnerabilities and testing that the ICT processes, products or services correctly implement the necessary security functionality; or where not applicable they shall include substitute activities with equivalent effect—shall refer to a certificate issued in the context of a European cybersecurity certification scheme, which provides a substantial degree of confidence in the claimed or asserted cybersecurity qualities of an ICT product or service, and is characterised with reference to technical specifications, standards and procedures related thereto, including technical controls, the purpose of which is to decrease substantially the risk of cybersecurity incidents;
(c) A European cybersecurity certificate that refers to assurance level “high” provides assurance that the ICT processes, products and services meet the respective security requirements including security functionalities and they have been evaluated to a level which aims to minimise the risk of state-of-the-art cyber attacks carried out by actors with significant skills and resources. The evaluation activities shall include at least: reviewing the non-applicability of publicly known vulnerabilities, testing that the ICT processes, products or services correctly implement the necessary security functionality, at the state-of-the-art, and assessing their resistance to skilled attackers via penetration testing; or where not applicable they shall include substitute activities with equivalent effect.

shall refer to a certificate issued in the context of a European cybersecurity certification scheme, which provides a higher degree of confidence in the claimed or asserted cybersecurity qualities of an ICT product or service than certificates with the assurance level substantial, and is characterised with reference to technical specifications, standards and procedures related thereto, including technical controls, the purpose of which is to prevent cybersecurity incidents.

2a. A European cybersecurity certification scheme may specify several evaluation levels depending on the rigour and depth of the evaluation methodology. Each one of the evaluation levels shall correspond to one of the assurance levels and be defined by an appropriate combination of assurance components.
Article 47

Elements of European cybersecurity certification schemes

1. A European cybersecurity certification scheme shall include at least the following elements:

(a) subject-matter and scope of the certification scheme, including the type or categories of ICT processes, products and services covered as well as an elaboration of how the certification scheme suits the needs of the expected target groups;

(b) detailed specification of the cybersecurity requirements against which the specific ICT products and services are evaluated, for example by reference to Union or international, European or national standards followed in the evaluation. Where standards are not available, a reference shall be made to or technical specifications that meet the requirements of Annex II of Regulation 1025/2012 or, if such are not available, to technical specifications or other cybersecurity requirements defined in the scheme;

(c) where applicable, one or more assurance levels;

(ca) where applicable, specific or additional requirements applicable to conformity assessment bodies in order to guarantee their technical competence to evaluate the cybersecurity requirements;
(d) specific evaluation criteria and methods used, including types of evaluation, in order to demonstrate that the specific objectives referred to in Article 45 are achieved;

(e) where applicable, information to be supplied or otherwise be made available to the conformity assessment bodies by an applicant which is necessary for certification;

(f) where the scheme provides for marks or labels, the conditions under which such marks or labels may be used;

(g) where surveillance is part of the scheme, the rules for monitoring compliance with the requirements of the certificates or the EU statement of conformity, including mechanisms to demonstrate the continued compliance with the specified cybersecurity requirements;

(h) where applicable, conditions for granting and renewing a certificate, as well as maintaining, continuing, extending or reducing the scope of certification;

(i) rules concerning the consequences of non-conformity of certified or self-assessed ICT products and services with the certification requirements of the scheme;

(j) rules concerning how previously undetected cybersecurity vulnerabilities in ICT processes, products and services are to be reported and dealt with;

(k) where applicable, rules concerning the retention of records by conformity assessment bodies;

(l) identification of national or international cybersecurity certification schemes covering the same type or categories of ICT processes, products and services, security requirements and evaluation criteria and methods;

(m) the content of the issued certificate or the EU statement of conformity;
(ma) the period of the storage of the EU statement of conformity and the technical documentation of all relevant information by the manufacturer or provider of ICT products and services;

(mba) maximum period of validity of certificates;

(mcb) disclosure policy for granted, amended and withdrawn certificates;

(mdc) conditions for the mutual recognition of certification schemes with third countries;

(med) where applicable, rules concerning a peer review mechanism for the bodies issuing European cybersecurity certificates for high assurance levels pursuant to Article 48(4a).

2. The specified requirements of the scheme shall not contradict any applicable legal requirements, in particular requirements emanating from harmonised Union legislation.

3. Where a specific Union act so provides, certification or the EU statement of conformity under a European cybersecurity certification scheme may be used to demonstrate the presumption of conformity with requirements of that act.

4. In the absence of harmonised Union legislation, Member State law may also provide that a European cybersecurity certification scheme may be used for establishing the presumption of conformity with legal requirements.
Article 47a

Conformity self-assessment

1. A European cybersecurity certification scheme may allow for carrying out a conformity assessment under the sole responsibility of the manufacturer or provider of ICT products and services. Such conformity assessment shall be applicable only to ICT products and services of low risk corresponding to assurance level basic.

2. The manufacturer or provider of ICT products and services may issue an EU statement of conformity stating that the fulfilment of the requirements set out in the scheme has been demonstrated. By drawing up such a statement, the manufacturer or provider of ICT products and services shall assume responsibility for the compliance of the ICT product or service with the requirements set out in the scheme.

3. The manufacturer or provider of ICT products and services shall keep the EU statement of conformity and technical documentation of all relevant information relating to the conformity of the ICT products or services with a scheme at the disposal of the national cybersecurity certification authority referred to in Article 50(1) for a period defined in the corresponding European cybersecurity certification scheme. A copy of the EU statement of conformity shall be submitted to the national cybersecurity certification authority and to ENISA.

4. The issuing of EU statement of conformity is voluntary unless otherwise specified in the Union law or in Member States law.

5. The EU statement of conformity issued pursuant to this Article shall be recognised in all Member States.
Article 48

Cybersecurity certification

1. ICT processes, products and services that have been certified under a European cybersecurity certification scheme adopted pursuant to Article 44 shall be presumed to be compliant with the requirements of such scheme.

2. The certification shall be voluntary, unless otherwise specified in Union law or in Member States law.

3. A European cybersecurity certificate pursuant to this Article referring to assurance level basic or substantial shall be issued by the conformity assessment bodies referred to in Article 51 on the basis of criteria included in the European cybersecurity certification scheme, adopted pursuant to Article 44.

4. By way of derogation from paragraph 3, in duly justified cases a particular European cybersecurity certification scheme may provide that a European cybersecurity certificate resulting from that scheme can only be issued by a public body. Such public body shall be one of the following:

   (a) a national cybersecurity certification supervisory authority referred to in Article 50(1);

   (b) a public body that is accredited as conformity assessment body pursuant to Article 51(1) or

   (c) a body established under laws, statutory instruments, or other official administrative procedures of a Member State concerned and meeting the requirements for bodies certifying products, processes and services further to ISO/IEC 17065:2012.

4a. In cases where a European cybersecurity certification scheme pursuant to Article 44 requires an assurance level high, the certificate can only be issued by a national cybersecurity certification authority referred to in Article 50(1) or, under the following conditions, by a conformity assessment body referred to in Article 51:
(a) upon prior approval by the national cybersecurity certification authority for each individual certificate issued by a conformity assessment body; or

(b) upon prior general delegation of this task to a conformity assessment body by the national cybersecurity certification authority.

5. The natural or legal person which submits its ICT processes, products or services to the certification mechanism shall provide make available to the conformity assessment body referred to in Article 51 or the national cybersecurity certification authority referred to in Article 50, where this authority is the body issuing the certificate, with all information necessary to conduct the certification procedure.

5a. The holder of a certificate shall inform the body issuing the certificate about any later detected vulnerabilities or irregularities concerning the security of the certified ICT process, product or service that may have an impact on the requirements related to the certification. The body shall forward this information without undue delay to the national cybersecurity certification authority.

6. Certificates shall be issued for a maximum period of three years the period defined by the particular certification scheme and may be renewed, under the same conditions, provided that the relevant requirements continue to be met.

7. A European cybersecurity certificate issued pursuant to this Article shall be recognised in all Member States.
Article 49

National cybersecurity certification schemes and certificates

1. Without prejudice to paragraph 3, national cybersecurity certification schemes and the related procedures for the ICT processes, products and services covered by a European cybersecurity certification scheme shall cease to produce effects from the date established in the implementing act adopted pursuant Article 44(4). National cybersecurity certification schemes and the related procedures for the ICT processes, products and services not covered by a European cybersecurity certification scheme shall continue to exist.

2. Member States shall not introduce new national cybersecurity certification schemes for ICT processes, products and services covered by a European cybersecurity certification scheme in force.

3. Existing certificates issued under national cybersecurity certification schemes and covered by a European cybersecurity certification scheme shall remain valid until their expiry date.

Article 50

National cybersecurity certification supervisory authorities

1. Each Member State shall appoint designate one or more national cybersecurity certification supervisory authorities in its territory, or upon mutual agreement with another Member State, designate one or more authorities established in that other Member State to be responsible for the supervisory tasks in the designating Member State.

2. Each Member State shall inform the Commission of the identity of the authorities appointed designated and of the tasks assigned to them.
3. Without prejudice to Article 48(4)(a) and Article 48(4a), each national cybersecurity certification supervisory authority shall, in its organisation, funding decisions, legal structure and decision-making, be independent of the entities they supervise.

3a. Member States shall ensure that the activities of the national cybersecurity certification authority related to the issuance of certificates in accordance with Article 48(4)(a) and Article 48(4a) adhere to a strict separation of roles and responsibilities with the supervisory activities in this article and that both activities function independently from each other.

4. Member States shall ensure that national cybersecurity certification supervisory authorities have adequate resources to exercise their powers and to carry out, in an effective and efficient manner, the tasks assigned to them.

5. For the effective implementation of the regulation, it is appropriate that these authorities participate in the European Cybersecurity Certification Group established pursuant to Article 53 in an active, effective, efficient and secure manner.

6. National cybersecurity certification supervisory authorities shall:

(a) monitor and enforce the application of the provisions under this Title at national level and supervise compliance of the certificates that have been issued by conformity assessment bodies established in their respective territories with the requirements set out in this Title and in the corresponding European cybersecurity certification scheme;

(aa) monitor and enforce the obligations of the manufacturer or provider of ICT products and services established in their respective territories set out in Article 47a(2) and (3) and in the corresponding European cybersecurity certification scheme;
monitor and supervise the activities of conformity assessment bodies for the purpose of this Regulation, including in relation to the notification of conformity assessment bodies and the related tasks set out in Article 52 of this Regulation;

(ba) monitor and supervise the activities of the bodies referred to in Article 48(4);

(bb) authorise conformity assessment bodies referred to in Article 51(1b) and restrict, suspend or withdraw existing authorisation in cases of non-compliance with the requirements of this Regulation;

(c) handle complaints lodged by natural or legal persons in relation to certificates issued by conformity assessment bodies established in their territories the national cybersecurity certification authority or, in accordance with Article 48(4a) by conformity assessment bodies, investigate, to the extent appropriate, the subject matter of the complaint, and inform the complainant of the progress and the outcome of the investigation within a reasonable time period;

(d) cooperate with other national cybersecurity certification supervisory authorities or other public authorities, including by sharing information on possible non-compliance of ICT processes, products and services with the requirements of this Regulation or specific European cybersecurity certification schemes;

(e) monitor relevant developments in the field of cybersecurity certification.

7. Each national cybersecurity certification supervisory authority shall have at least the following powers:
(a) to request conformity assessment bodies, and European cybersecurity certificate holders and issuers of EU statement of conformity to provide any information it requires for the performance of its task;

(b) to carry out investigations, in the form of audits, of conformity assessment bodies, and European cybersecurity certificates' holders and issuers of EU statement of conformity, for the purpose of verifying compliance with the provisions under Title III;

(c) to take appropriate measures, in accordance with national law, in order to ensure that conformity assessment bodies, or certificate holders and issuers of EU statement of conformity comply with this Regulation or with a European cybersecurity certification scheme;

(d) to obtain access to any premises of conformity assessment bodies and European cybersecurity certificates' holders for the purpose of carrying out investigations in accordance with Union or Member State procedural law;

(e) to withdraw, in accordance with national law, certificates issued by the national cybersecurity certification authority or, in accordance with Article 48(4a) by conformity assessment bodies that are not compliant with this Regulation or a European cybersecurity certification scheme;

(f) to impose penalties, as provided for in Article 54, in accordance with national law, and to require the immediate cessation of the breaches of obligations set out in this Regulation.

8. National cybersecurity certification supervisory authorities shall cooperate amongst each other and the Commission and, in particular, exchange information, experiences and good practices as regards cybersecurity certification and technical issues concerning cybersecurity of ICT processes, products and services.
Article 51

Conformity assessment bodies

1. The conformity assessment bodies shall be accredited by the national accreditation body named pursuant to Regulation (EC) No 765/2008 only when they meet the requirements set out in the Annex to this Regulation.

1a. In cases where a European cybersecurity certificate is issued by a national cybersecurity certification authority pursuant to Article 48(4)(a) and Article 48(4a), the certification body of the national cybersecurity certification authority shall be accredited as conformity assessment body pursuant to paragraph 1 of this Article.

1b. Where applicable, the conformity assessment bodies shall be authorised by the national cybersecurity certification authority to carry out its tasks when they meet specific or additional requirements set out in the European certification scheme pursuant to Article 47(1)(ca).

2. Accreditation shall be issued for a maximum of five years and may be renewed on the same conditions provided that the conformity assessment body meets the requirements set out in this Article. Accreditation bodies shall take all appropriate measures within a reasonable timeframe to restrict, suspend or revoke an accreditation of a conformity assessment body pursuant to paragraph 1 of this Article where the conditions for the accreditation are not, or are no longer, met or where actions taken by a conformity assessment body infringe this Regulation.
**Article 52**

*Notification*

1. For each European cybersecurity certification scheme adopted pursuant to Article 44, national cybersecurity certification supervisory authorities shall notify the Commission of the accredited conformity assessment bodies accredited and where applicable, authorised pursuant to Article 51(1b) to issue certificates at specified assurance levels as referred to in Article 46 and, without undue delay, of any subsequent changes thereto.

2. One year after the entry into force of a European cybersecurity certification scheme, the Commission shall publish a list of notified conformity assessment bodies in the Official Journal.

3. If the Commission receives a notification after the expiry of the period referred to in paragraph 2, it shall publish in the Official Journal of the European Union the amendments to the list referred to in paragraph 2 within two months from the date of receipt of that notification.

4. A national cybersecurity certification supervisory authority may submit to the Commission a request to remove a conformity assessment body notified by that Member State from the list referred to in paragraph 2 of this Article. The Commission shall publish in the Official Journal of the European Union the corresponding amendments to the list within one month from the date of receipt of the national cybersecurity certification supervisory authority’s request.

5. The Commission may, by means of implementing acts, define the circumstances, formats and procedures of notifications referred to in paragraph 1 of this Article. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 55(2).
Article 53

European Cybersecurity Certification Group

1. The European Cybersecurity Certification Group (the 'Group') shall be established.

2. The Group shall be composed of representatives of national cybersecurity certification supervisory authorities or representatives of other relevant national authorities. The authorities shall be represented by the heads or by other high level representatives of national cybersecurity certification supervisory authorities. Any member of the Group may represent not more than one other Member State.

3. The Group shall have the following tasks:

   (a) to advise and assist the Commission in its work to ensure a consistent implementation and application of the present Title, in particular regarding cybersecurity certification policy issues, coordination of policy approaches, and the preparation of European cybersecurity certification schemes;

   (b) to assist, advise and cooperate with ENISA in relation to the preparation of a candidate scheme in accordance with Article 44 of this Regulation;

   (ba) to adopt an opinion on the candidate scheme pursuant to Article 44 of this Regulation;

   (c) to propose to the Commission that it requests the Agency to prepare a candidate European cybersecurity certification scheme in accordance with Article 44 of this Regulation;

   (ca) to develop and adopt guidelines on criteria for assessment of proposals for the preparation of a candidate scheme submitted to the Commission or the Group pursuant to Article 44(1a);

   (d) to adopt opinions addressed to the Commission relating to the maintenance and review of existing European cybersecurity certifications schemes;
(e) to examine the relevant developments in the field of cybersecurity certification and exchange good practices on cybersecurity certification schemes;

(f) to facilitate the cooperation between national cybersecurity certification supervisory authorities under this Title through capacity building, the exchange of information, in particular by establishing methods for the efficient exchange of information relating to all issues concerning cybersecurity certification;

(fa) to provide support to the implementation of the peer review mechanism in accordance with the rules established in a European cybersecurity certification scheme pursuant to Article 47(1)(md) of this Regulation.

4. The Commission shall chair the Group in the capacity of a moderator and provide the secretariat to it, with the assistance of ENISA as provided for in Article 8(a).

*Article 53a*

*Right to lodge a complaint with national cybersecurity certification supervisory authority*

1. Natural or legal persons shall have the right to lodge a complaint with the national cybersecurity certification authority in relation to a certificate issued by the same authority or, in accordance with Article 48(4a) by conformity assessment bodies.

2. The national cybersecurity certification authority with which the complaint has been lodged shall inform the complainant on the progress and outcome of the complaint including the possibility of a judicial remedy pursuant to Article 53b.
Article 53b

Right of an effective judicial remedy

1. Natural or legal persons shall have the right of an effective judicial remedy against a legally binding decision of a national cybersecurity certification authority concerning them.

2. Natural or legal persons shall have the right of an effective judicial remedy where the national cybersecurity certification authority does not handle a complaint.

3. Proceedings against a national cybersecurity certification authority shall be brought before the courts of the Member State where the authority is established.

Article 54

Penalties

Member States shall lay down the rules on penalties applicable to infringements of this Title and European cybersecurity certification schemes, and shall take all measures necessary to ensure that they are implemented. The penalties provided for shall be effective, proportionate and dissuasive. Member States shall [by …/without delay] notify the Commission of those rules and of those measures and shall notify it of any subsequent amendment affecting them.
TITLE IV
FINAL PROVISIONS

Article 55
Committee procedure

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.

2. Where reference is made to this paragraph, Article 5(4)(b) of Regulation (EU) No 182/2011 shall apply.

Article 56
Evaluation and review

1. Not later than five years after the date referred to in Article 58, and every five years thereafter, the Commission shall assess the impact, effectiveness and efficiency of the Agency and its working practices and the possible need to modify the mandate of the Agency and the financial implications of any such modification. The evaluation shall take into account any feedback made to the Agency in response to its activities. Where the Commission considers that the continuation of the Agency is no longer justified with regard to its assigned objectives, mandate and tasks, it may propose that this Regulation be amended with regard to the provisions related to the Agency.

2. The evaluation shall also assess the impact, effectiveness and efficiency of the provisions of Title III with regard to the objectives of ensuring an adequate level of cybersecurity of ICT products and services in the Union and improving the functioning of the internal market.
3. The Commission shall forward the evaluation report together with its conclusions to the European Parliament, the Council and the Management Board. The findings of the evaluation report shall be made public.

Article 57
Repeal and succession

1. Regulation (EC) No 526/2013 is repealed with effect from […].

2. References to Regulation (EC) No 526/2013 and to ENISA shall be construed as references to this Regulation and to the Agency.

3. The Agency succeeds the Agency that was established by Regulation (EC) No 526/2013 as regards all ownership, agreements, legal obligations, employment contracts, financial commitments and liabilities. All existing decisions of the Management Board and Executive Board remain valid, providing they are not in conflict with the provisions of this Regulation.

4. The Agency shall be established for an indefinite period of time starting from […]

5. The Executive Director appointed pursuant to Article 24(4) of Regulation (EC) No 526/2013 shall be the Executive Director of the Agency for the remaining part of his term of office.

6. The Members and their alternates of the Management Board appointed pursuant to Article 6 of Regulation (EC) No 526/2013 shall be the Members and their alternates of the Management Board of the Agency for the remaining part of their term of office.
Article 58

Entry into force

1. This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.

1a. This Regulation shall apply from […] except for the Articles 50, 51, 52, 53a, 53b and 54 which shall apply from [24 months after the date of its publication in the Official Journal of the European Union].

2. This Regulation shall be binding in its entirety and directly applicable in all Member States.

REQUIREMENTS TO BE MET BY CONFORMITY ASSESSMENT BODIES

Conformity assessment bodies that wish to be accredited shall meet the following requirements:

1. A conformity assessment body shall be established under national law and have legal personality.

2. A conformity assessment body shall be a third-party body independent of the organisation or the ICT products or services it assesses.

3. A body belonging to a business association or professional federation representing undertakings involved in the design, manufacturing, provision, assembly, use or maintenance of ICT products or services which it assesses, may, on condition that its independence and the absence of any conflict of interest are demonstrated, be considered a conformity assessment body.

4. A conformity assessment body, its top-level management and the personnel responsible for carrying out the conformity assessment tasks shall neither be the designer, manufacturer, supplier, installer, purchaser, owner, user or maintainer of the ICT product or service which is assessed, nor shall it be the authorised representative of any of those parties. This shall not preclude the use of assessed products that are necessary for the operations of the conformity assessment body or the use of such products for personal purposes.

5. A conformity assessment body, its top-level management and the personnel responsible for carrying out the conformity assessment tasks shall not be directly involved in the design, manufacture or construction, the marketing, installation, use or maintenance of those ICT products or services, or represent the parties engaged in those activities. They shall not engage in any activity that may conflict with their independence of judgement or integrity in relation to conformity assessment activities for which they are notified. This shall apply, in particular, to consultancy services.
6. Conformity assessment bodies shall ensure that the activities of their subsidiaries or subcontractors do not affect the confidentiality, objectivity or impartiality of their conformity assessment activities.

7. Conformity assessment bodies and their personnel shall carry out the conformity assessment activities with the highest degree of professional integrity and the requisite technical competence in the specific field and shall be free from all pressures and inducements, including of a financial nature, which might influence their judgement or the results of their conformity assessment activities, especially as regards persons or groups of persons with an interest in the results of those activities.

8. A conformity assessment body shall be capable of carrying out all the conformity assessment tasks assigned to it under this Regulation, whether those tasks are carried out by the conformity assessment body itself or on its behalf and under its responsibility.

9. At all times and for each conformity assessment procedure and each kind, category or sub-category of ICT products or services, a conformity assessment body shall have at its disposal the necessary:

(a) personnel with technical knowledge and sufficient and appropriate experience to perform the conformity assessment tasks;

(b) descriptions of procedures in accordance with which conformity assessment is carried out, ensuring the transparency of those procedures and the possibility of reproducing them. It shall have in place appropriate policies and procedures that distinguish between tasks that it carries out as a notified body and other activities;

(c) procedures for the performance of activities which take due account of the size of an undertaking, the sector in which it operates, its structure, the degree of complexity of the ICT product or service technology in question and the mass or serial nature of the production process.
10. A conformity assessment body shall have the means necessary to perform the technical and administrative tasks connected with the conformity assessment activities in an appropriate manner, and shall have access to all necessary equipment and facilities.

11. The personnel responsible for carrying out conformity assessment activities shall have the following:

(a) sound technical and vocational training covering all the conformity assessment activities;

(b) satisfactory knowledge of the requirements of the assessments they carry out and adequate authority to carry out those assessments;

(c) appropriate knowledge and understanding of the applicable requirements and testing standards;

(d) the ability to draw up certificates, records and reports demonstrating that assessments have been carried out.

12. The impartiality of the conformity assessment bodies, of their top-level management and of the assessment personnel shall be guaranteed.

13. The remuneration of the top-level management and of the assessment personnel of a conformity assessment body shall not depend on the number of assessments carried out or on the results of those assessments.

14. Conformity assessment bodies shall take out liability insurance unless liability is assumed by the State in accordance with national law, or the Member State itself is directly responsible for the conformity assessment.
15. The personnel of a conformity assessment body shall observe professional secrecy with regard to all information obtained in carrying out their tasks under this Regulation or pursuant to any provision of national law giving effect to it, except in relation to the competent authorities of the Member States in which its activities are carried out.

16. Conformity assessment bodies shall meet the requirements of the relevant standard that is harmonised under Regulation (EC) 765/2008 for the accreditation of conformity assessment bodies performing certification of processes, products or services—EN ISO/IEC 17065:2012.

17. Conformity assessment bodies shall ensure that testing laboratories used for conformity assessment purposes meet the requirements of the relevant standard that is harmonised under Regulation (EC) 765/2008 for the accreditation of laboratories performing testing—EN ISO/IEC 17025:2005.
