ANNEX

SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

1. Description of Reforms and Investments

A. COMPONENT A: ‘RESILIENCE AND COMPETITIVENESS OF THE ECONOMY’

This component of the Polish Recovery and Resilience plan contributes to addressing several challenges related to the resilience and competitiveness of the Polish economy. The first overarching challenge is linked to the investment climate and business environment, which have been hindered in recent years by regulatory deficiencies, burdensome administrative requirements and procedures, and frequent changes to key laws. Second, Poland has yet to increase its innovation capacity to upgrade its growth model from cost-competitiveness towards sustainability and higher value-added activities. Total Research and Development (R&D) expenditure remains low at 1,4% of GDP vs. 2,3% in the EU in 2020. Although business expenditure on R&D has more than quadrupled in the past ten years, it remains below the EU average. Third, the digital transformation and other economic transitions require efforts to improve the labour market relevance of skills and modernisation of vocational education and training. Fourth, women, older people, persons with disabilities, and those with lower qualifications participate in the labour market much less than in many other EU countries. This results from several factors, including a limited access to childcare and long-term care, as well as a low statutory and effective retirement age. Moreover, labour market flexibility is limited by special pension regimes and a lack of flexibility in working-time arrangements. Finally, the share of temporary employment contracts remains high, even though it has been consistently declining.

The main objective of the component is to boost investment, increase productivity, and enhance the competitiveness and resilience of the Polish economy. To that end, the component aims at the following: i) strengthen the sustainability and adequacy of the fiscal framework; ii) reduce regulatory and administrative burden to businesses and entrepreneurs; iii) support the digital and green transition and the resilience of key sectors of the economy, including the agri-food sector; iv) improve the innovation ecosystem; v) foster the labour market relevance of skills and improve lifelong learning; vi) increase labour market participation and increase the effective retirement age; vii) improve access to and the quality of childcare for children below the age of 3 and viii) increase the effectiveness of public employment services.

The component addresses the following Country-Specific Recommendations issued for Poland in the framework of the European Semester in 2019 and 2020, notably: Country Specific Recommendations 3, 2019 and 4, 2020 related to improving the investment climate and regulatory environment, in particular by strengthening the role of public consultations in the legislative process. The component further addresses: Country-Specific Recommendations 1, 2019 and 1, 2020 regarding improving the efficiency of public spending and the budgetary process as well as supporting through public measures the economic recovery; Country-Specific Recommendation 2, 2019 related to the adequacy of future pension benefits and the sustainability of the pension system, in particular by taking measures to increase the effective retirement age, as well as to take steps to increase labour market participation, including by improving access to childcare and long-term care, and remove remaining obstacles to more

permanent types of employment, and finally through measures to increase the labour market relevance of skills and improve lifelong learning; Country-Specific Recommendation 3, 2019 by strengthening the innovative capacity of the economy, including by supporting research institutions and their closer collaboration with business.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C 58/01).

A.1. Description of the reforms and investments for non-repayable financial support

Sub-component A1 – Reducing the impact of COVID-19 on businesses

A1.1 Reform of the fiscal framework

The overarching objective of the reform is to increase the transparency and efficiency of public spending. To that end, the reform aims at: (i) enabling a more efficient management of public funds; (ii) enhancing the accountability in the management of public funds; (iii) increasing the sustainability of public finances and preventing an unsustainable increase of expenditure.

The reform shall consist of the implementation of two legislative measures. First, the Act on Public Finances shall be amended by including a new classification system, a new model of budget management and a redefined medium-term budgetary framework. A new budgetary system shall be established as a result of the amendment. Secondly, the Act on Public Finances shall be amended by extending the scope of the Stabilising Expenditure Rule to more units of general government, specifically special-purpose funds.

The implementation of the reform shall be completed by 31 March 2025.

A1.2 Reduce regulatory and administrative burden

The overarching objective of the reform is to reduce the administrative and regulatory burden affecting businesses in Poland, as well as to foster private investment, particularly in SMEs. To that end, the reform aims at (i) simplifying administrative and legal procedures, (ii) minimising legal requirements for businesses and entrepreneurs, (iii) speeding up decision-making, (iv) providing the right conditions for businesses to invest, especially in less developed regions; and (v) facilitating the communication between citizens and businesses with public authorities.

The reform shall consist of two legislative packages. The first one ('Legal shield': *Tarcza prawna*) shall introduce the following legal provisions: (i) make electronic procedures the dominant channel for dealing with at least eight administrative and legal procedures, including submissions of declarations by tourist operators and entrepreneurs to the Insurance Guarantee Fund; (ii) simplify administrative procedures, in particular related to the seafarer's professions and trade and commerce of alcoholic beverages; (iii) reduce the use of the two-instance procedure in at least ten procedures related in particular to geological resources; (iv) limit the number of documents and formalities required in administrative procedures in, for example, spatial planning and construction processes; and (v) prolong the deadlines for

certain administrative procedures, for instance, for registering a car bought in another Member State.

The second legislative package shall amend the ‘Investment Zone Act’ (*‘Polska Strefa Inwestycji’*) to increase the number of areas defined as ‘special economic zones’ in Poland and create a new model for granting financial support to businesses undertaking activities in special economic zones, mainly in the form of tax breaks and subsidies for the purchasing of investment land.

The implementation of the reform shall be completed by 31 December 2023.

A1.2.1 Investments for enterprises in products, services and competences of employees and staff related to the diversification of activities

The overarching objective of this investment is to support the resilience of SMEs and micro-enterprises in the sectors most affected by the COVID-19 pandemic in Poland, namely in the sectors of HoReCa, tourism and culture. To that end, the investments shall aim to encourage the upscaling and diversification of the activities carried out by SMEs and micro-enterprises in these sectors.

The investment shall consist of the implementation of the following three types of activities:

- Investments in the design and production of their goods and services, such as: (i) purchase of machinery and equipment necessary to launch new products / services; (ii) construction works, including the construction of new production lines; (iii) investments related to the green transition, particularly to encourage waste prevention by design, recycling/reuse of waste and to implement renewable energy solutions;
- Consulting services for the implementation of projects;
- Upskilling/reskilling employees by providing training in the field of new IT solutions, new technologies, customer needs analysis, information / data management, as well as risk-management.

The measure shall ensure a balanced implementation of all the types of projects described, considering both the specific needs of beneficiaries and the objectives of the RRF Regulation.

The implementation of the investment shall be completed by 30 June 2026.

A1.2.2 Support for the preparation of investment sites for investments of key importance for the economy

The overarching objective of this investment is to expand the number of investment sites in Poland, i.e. areas zoned and built for the purpose of industrial and business development. To that end, the investment shall build at least 4200 hectares of investment areas.

The investments shall consist of (i) land consolidation and – in exceptional cases – land acquisition, (ii) the construction of necessary infrastructure, including the construction of facilities for businesses to carry out their activities, (iii) the construction of utilities infrastructure, namely water, gas and energy connections, (iv) as well as the provision of technical support to regional and local authorities. The investment shall largely take place in medium-sized cities lagging behind in terms of economic development.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan

in accordance with the DNSH Technical Guidance (2021/C 58/01). This includes, inter alia, that:

- at least 70% (by weight) of the non-hazardous construction and demolition generated on the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol¹.
- The construction of transmission and distribution infrastructure of gaseous fuels shall, at the time of construction, enable the transport of renewable and low-carbon gases.
- The construction of new buildings shall be in compliance with the Near Zero-Energy Buildings, as set out in the Energy Performance of Buildings Directive (*Directive 2018/844/EU*).
- The eligibility criteria for projects to be part of the investment sites shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use², (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³; (iii) activities related to waste landfills, incinerators⁴ and mechanical biological treatment plants⁵; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.
- Finally, the investment sites shall ensure that adequate safeguards are in place to avoid harm to the biodiversity objective. In particular, the establishment of the investment sites shall be carried out in full compliance with the EIA Directive (*Directive 2014/52/EU*), the Habitats Directive (*Directive 92/43/EEC*), and the Birds Directive (*Directive 2009/147/EC*).

The implementation of the investment shall be completed by 31 December 2025.

A1.3 Land-use planning reform

The overarching objective of the reform is to create a stable and predictable investment climate for the construction sector, as well as fight the uncontrolled spread of buildings into peri-urban areas, especially in the largest cities. To that end, the aim of the reform is to (i)

¹ European Commission (2018), 'Guidelines for the waste audits before demolition and renovation works of buildings'. Available at: https://ec.europa.eu/growth/content/eu-construction-and-demolition-waste-protocol-0_en (accessed November 2021).

² Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

³ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁴ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁵ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

streamline existing legislation and improve the legal framework for land-use planning at municipal level; (ii) create transparent and clear rules for land development at municipal level, in particular by providing access to clear, digital and reliable information on the development of land in municipalities; (iii) enhance the participation of stakeholders and social partners in the drafting of municipal general plans.

The reform shall consist of the adoption of a new law on spatial planning. Among others, the law shall: (i) introduce a requirement for all municipalities to prepare and adopt a long-term strategy related to land development in the municipality; (ii) introduce a requirement for all municipalities to prepare and adopt general spatial development plans, to be converted into local legislation, which shall lay down the general rules for building in the municipal area and be based on the municipality's long-term strategy related to land-development; (iii) introduce a requirement that obliges investors to carry out additional projects for the benefit of the municipality when building new development projects, with a view to, inter alia, reduce the development of housing without a sufficient provision of services; (iv) define the process in which stakeholders may participate in the drafting of strategies and general plans in municipalities.

The implementation of the reform shall be completed by 31 March 2023.

A1.3.1 Implementation of the land-use planning reform

The investment shall aim to support the implementation of the new spatial planning reform set out in reform A.1.3 of Component A. The investment aims to provide support to municipalities for the preparation of development strategies and general development plans with the objective that all municipalities in Poland adopt new general spatial development plans. The investment shall consist of three types of actions: (i) provision of technical support for the preparation of development plans; (ii) provision of educational material to municipalities (such as webinars and handbooks); (iii) provision of targeted training for planners involved in the development of general plans in municipalities, with a view to train at least 1700 staff.

The implementation of the investment shall be completed by 30 June 2026.

A1.4 Reform to improve the competitiveness and protection of producers/consumers in the agricultural sector

The overarching objective of the reform is to strengthen the position of consumers and producers in the agri-food supply chain with a view to enhance the investment and resilience of all actors in the agri-food sector, particularly SMEs and small producers. To that end, the reform aims at: (i) creating a set of principles and good practices in vertical relations in the agri-food supply-chain; (ii) improving the system of enforcement of contracts in the agri-food sector to prevent the exploitation of contractual advantages; and (iii) enhancing market transparency.

The reform shall consist of a new law to combat the unfair use of contractual advantages in the agri-food sector, which shall go beyond the Unfair Trading Practices Directive 2019/633. The reform shall consist of:

- i. In addition to the list of Unfair Trading Practices set out in the Directive 2019/633, the reform shall introduce an open definition of unfair trading practices. In particular, such additional trading practices shall be identified as unfair by the Office of Competition and Consumer Protection (UOKiK) if (i) they are contrary to the requirements of good

commercial conduct; (ii) and they materially distort or are likely to materially distort the interests of the other contract parties.

- ii. The reform shall protect all trading operators, including buyers of agricultural and food products.

The reform shall also include the drafting of a mid-term review of the new law, which shall include an assessment of whether the objectives have been achieved and identify avenues for action to tackle potential problems of implementation.

The implementation of the reform shall be completed by 30 June 2025.

A1.4.1 Investments to diversify and shorten the agricultural and food supply chain and build resilience of actors in the chain

The overarching objective of this investment is to enhance the competitiveness and resilience of the agri-food and fisheries sector in Poland. To that end, the investment aims to (i) support the green and digital transition in the agri-food and fisheries sector; (ii) shorten and build resilience on the agri-food and fishery and aquaculture supply chain, in particular by supporting local SMEs, small producers and fishermen; (iii) avoid food waste and address white spots and technical barriers related to food redistribution.

The investment shall consist of the following initiatives:

- Construction and modernisation of local storage and distribution centres, wholesale markets, local food markets and cooperatives, including the modernisation of logistics and ICT infrastructure.
- Support to SMEs and micro enterprises in agri-food processing, including in the fishery and aquaculture sector, which shall entail the purchase of machinery and equipment, including transport equipment, as well as the expansion and modernisation of plant infrastructure.
- Support to farmers and fishermen for the processing and marketing of agricultural and food products, including the construction and modernisation of infrastructure, and the purchase of new machinery and equipment for the processing, transport and storage of products. The support shall also include the organization of agri-food product sales on the internet along with the organization of deliveries.
- Support to charitable organisations in the agri-food sector for the modernisation of buildings, infrastructure, and equipment, including transport equipment. The support shall include the development of IT systems and digital applications.
- Support for agricultural producers to implement Agriculture 4.0 solutions. This includes the purchase of sensors, tables and digital equipment, as well as the purchase and maintenance of digital solutions, such as applications and software.
- Support to agricultural and fishery and aquaculture producers related to the green transition. This shall include the renovation of producers' infrastructure, including the replacement of roofs that contain materials harmful to health or the environment, the thermal modernisation of buildings, the replacement of electrical and ventilation systems with energy-efficient ones, as well as the replacement of pole carriers impregnated with creosote in hop plantations.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the

description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C 58/01).

This includes that:

- Trucks and other heavy-duty vehicles purchased shall only be zero-emission⁶, low-emission⁷, or LNG/CNG trucks running on biogas/biomethane. Special purpose vehicles shall comply with the same rules set out above. For those vehicles using biofuels, bioliquids and biomass fuels, the following conditions shall be met: (i) meets the sustainability and greenhouse gas emission savings criteria set out in Articles 29-31 and the rules on food and feed based biofuels set out in Article 26 of the Renewable Energy Directive (*Directive 2018/2001/EU (REDII)*), and related implementing and delegated acts; and (ii) provides assurance that exclusively REDII compliant biofuels, bioliquids and biomass fuels are used by the vehicles purchased under a scheme support by the RRF; and (iii) is complemented by ‘flanking measures’ that substantiate that the biofuels, bioliquids and biomass fuels share of the national mix is increased over time.
- All building renovations shall be done in compliance with the Energy Performance of Buildings Directive (*Directive 2018/844/EU*)
- Biogas energy production facilities shall meet the sustainability and greenhouse gas emission savings criteria set out in Articles 29-31 and the rules on food and feed-based biofuels set out in Article 26 of the Renewable Energy Directive (*Directive 2018/2001/EU(REDII)*), as well as related implementing and delegated acts.

The implementation of the investment shall be completed by 31 December 2025.

Sub-component A2 – Development of the National Innovation System: strengthening coordination, stimulating innovation capacity and cooperation between businesses and research organisations, including in environmental technologies

A2.1 Accelerating robotisation and digitalisation and innovation processes

The reform aims to strengthen demand for knowledge and innovation and their effective deployment in businesses, in the digital economy.

The reform shall consist of the introduction of tax system preferences for companies carrying out the digitisation process through investments in robotisation and digitalisation. The tax relief shall take the form of an extra tax cost deduction to support the purchase of robots.

The implementation of the reform shall be completed by 30 June 2022.

A2.1.1 Investments supporting robotisation and digitalisation in enterprises

The objective of this investment shall be to support projects involving the introduction of innovative solutions aimed at the digital transformation.

⁶ As defined in Article 3(11) of Regulation 2019/1242: a vehicle without a combustion engine, or with a combustion engine that emits less than 1 g CO₂/km.

⁷ As defined in Article 3(12) of Regulation (EU) 2019/1242: with CO₂ emissions of less than half of the reference CO₂ emissions of all vehicles in the vehicle sub-group; reference values differ depending on the type of truck.

The investment shall consist of the digitalisation of business processes, supporting the transition towards Industry 4.0 with a particular focus on robotisation and operational technologies. The investment shall support the use of cloud technologies and artificial intelligence in the integration and management of manufacturing and business processes; implementation of smart production lines, construction of smart factories; the deployment of modern digital technologies that support the transition towards reducing environmental emissions (in particular greenhouse gases) and reducing the use of natural resources and environmental impact of manufacturing and business processes.

The implementation of the investment shall be completed by 30 June 2026.

A2.2 Creating the conditions for the transition to a circular economy model

The objective of the reform shall be to create an appropriate legal framework for the functioning of trade in secondary raw materials. The reform shall introduce end-of-waste regulations for key industrial waste (with the greatest economic potential), and the implementation of a definition of secondary raw material, which would facilitate the circulation and use of waste as secondary raw materials.

The reform shall consist of a framework for the development of the secondary raw materials market to facilitate the management of these materials, which shall result in a reduction of the exploitation of natural resources deposits, replacing natural materials and products. The reform shall lead to a reduction of waste storage on waste heaps.

The implementation of the reform shall be completed by 30 June 2024.

A2.2.1 Investments in the deployment of environmental technologies and innovation, including those related to circular economy

The objective of this investment shall be to support the use of secondary raw materials, including by funding, inter alia, research & development (R&D) infrastructure to develop technologies for the use of waste as secondary raw materials, with the aim of creating a more efficient economy.

The investment shall consist of two actions. The first action shall support projects awarded to SMEs to develop and implement green technologies related to the circular economy, resulting in improved material management, increased energy efficiency and a shift in philosophy of companies towards zero waste.

The implementation of the action shall be completed by 31 March 2025.

Under the second action, projects supporting the development of technologies contributing to the creation of a market for secondary raw materials shall be financed.

The implementation of the action shall be completed by 30 September 2025.

The selection of beneficiaries shall be undertaken in line with specified selection criteria following the principles of non-discrimination and transparency. Projects shall concern to the development and implementation or application of green industry solutions that are expected to result in an increase in energy efficiency in production and operational processes or reduction of waste from production and operational processes or re-using or recycling of waste or reduction of GHG emissions from production and operational processes. In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C 58/01), the eligibility criteria contained in terms of reference for upcoming calls for

projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use⁸; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁹; (iii) activities related to waste landfills, incinerators¹⁰ and mechanical biological treatment plants¹¹; and (iv) activities where the long-term disposal of waste may cause harm to the environment.

A2.3 Providing the institutional and legal basis for the development of the unmanned aerial vehicles (UAVs)

The objective of the reform shall be to set up an entity to support the testing and implementation of new UAV-based solutions, in particular in urbanised areas.

The reform shall grant the Polish Air Navigation Services Agency the right to own equity in commercial companies and shall authorise it or its subsidiaries to conduct pilot projects supporting the implementation of business models and services based on UAVs. The Polish Air Navigation Services Agency shall also act as a provider of specialized services for UAVs within the planned network of competence centres.

The implementation of this reform shall be completed by 30 June 2023.

A2.3.1 Development and equipment of competence centres (specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an ecosystem of innovation

The objective of this investment is to establish an integrated system of competence centres and pilot projects and infrastructure for unmanned vehicles.

The investment shall consist of the implementation of local centres and infrastructure for unmanned vehicles. Local centres and/or infrastructures shall be implemented in ten locations. The key elements of the supported project shall be terrestrial infrastructure, local data and traffic management centres along with digital services and producers implemented.

The second element of the investment shall consist of testing and implementing unmanned vehicle services in pilot projects carried out in individual competence centres. Pilot projects shall be implemented as part of specialised programmes in the areas of autonomous traffic coordination, key infrastructure facilities (ports and energy infrastructure), public order services (security and civil protection) and urban mobility.

⁸ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

⁹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁰ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹¹ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

The implementation of the investment shall be completed by 30 June 2026.

A2.4 Strengthening cooperation mechanisms between science and industry

The reform shall consist of two actions. The objective of the first action is to allow universities and research institutes to become shareholders in companies. This is expected to lead to greater interdisciplinary and flexibility of technology transfer.

The first action under this reform shall consist of broadening the categories of entities with which universities shall be able to establish special purpose vehicles. These shall be research institutes, institutes of the Polish Academy of Sciences and institutes of the Łukasiewicz Research Network. The reform shall allow for creation of special purpose vehicles designed specifically for commercialization of R&D results.

The implementation of this reform was to be completed by 31 March 2022.

The second action under this reform shall establish, for the research institutes and subordinated units under the supervision of the Ministry of Agriculture and Rural Development, rules for the use of laboratories, research infrastructure and knowledge transfer within science-science and science-business cooperation. The rules for granting aid shall follow the principles of non-discrimination and transparency.

The implementation of this reform was to be completed by 31 March 2022.

A2.4.1 Investment in the development of research capacities

The objective of this investment is to ensure closer cooperation among research and innovation institutions as well as between scientific institutions and the business sector. It shall contribute to increasing high-quality R&D results with high commercialisation potential.

This investment shall consist of the funding of research infrastructure within the Łukasiewicz Research Network, the Polish Roadmap for Research Infrastructure and within the agri-food institutes and subordinated units under the supervision of the Ministry of Agriculture and Rural Development.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C 58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use¹²; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks¹³; (iii) activities related to waste landfills, incinerators¹⁴ and mechanical

¹² Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C 58/01).

¹³ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁴ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

biological treatment plants¹⁵; and (iv) activities where the long-term disposal of waste may cause harm to the environment.

The following R&D&I actions under this investment shall be considered compliant with the 'Do no significant harm' Technical Guidance (2021/C 58/01): (i) those R&D&I actions under this investment resulting in technologically neutral outcomes at the level of their application; (ii) those R&D&I actions under this investment supporting alternatives with low environmental impacts for which these exist; or (iii) those R&D&I actions under this investment that are primarily focused on developing alternatives with the lowest possible environmental impacts in the sector for those activities for which no technologically and economically feasible low-impact alternative exists.

The implementation of the investment shall be completed by 31 December 2025.

Sub-component A3 – Education for the modern economy

A3.1 Workforce for the modern economy: improving the matching of skills and qualifications with labour market requirements due to the introduction of new technologies in the economy and the green and digital transformation

The main aim of the reform is to prepare the workforce for the modern economy and to improve the matching of skills and qualifications with labour market requirements, linked to the introduction of new technologies in the economy and the green and digital transformation.

This reform shall aim at establishing Sectoral Skills Centres and amending relevant legislation to provide targeted upskilling and reskilling services. The objective of the reform shall include supporting the cooperation of employers with vocational education providers, contributing to the dissemination of innovative solutions, and supporting innovation in vocational training. Inclusion of persons with disabilities shall also be addressed. As such, the Skills Centres shall complement the existing offer of secondary and higher vocational education and training and lifelong learning.

The reform shall include an amendment of the Education Law and the Teachers Charter. This shall follow a review process in close cooperation with social partners, regional authorities, sectors and other stakeholders. The amendment of the Education Law shall foresee a development plan for the Skills Centres' Network, determine the place and role of Skills Centres in the education and training system, determine the conditions for the employment of staff in the Skills Centres, establish provisions for cyclical reviews to ensure supervision over their management and the sustainability after 2026, and adjust an existing governance system with tailored provisions on the governance of Skills Centres, including employers (including representatives of SMEs), social partners and other relevant stakeholders including regional and local authorities. It shall also include the establishment of financing arrangements (including after EU support ceases), training conditions, provisions for career guidance, and curricula, and it shall identify the types of training provided, the target groups, the types of qualifications and standards, quality assurance and verification mechanisms, and how the sectors shall be linked to the Skills Centres. The amendment to the Teachers' Charter shall

¹⁵ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

allow for the provision of continuous professional training by the Skills Centres to current vocational education teachers.

The reform shall also aim to adapt the coordination of vocational education and training, higher education and lifelong learning in the regions, with a view to creating sustainable and effective methods of cooperation and interaction between different stakeholders in the area of skills development that are part of the different governance structures (such as educational institutions, labour market institutions, enterprises and employers' organisations, and local authorities).

This shall be achieved through the entry into force of amendments to several legislative acts, after a review process of existing coordination mechanisms, and in close cooperation with local and regional authorities. The reform shall identify rights and responsibilities of regions in the coordination of skills policies and influence the upskilling offers of lifelong learning institutions based on operationalised implementation programmes for the (national) Integrated Skills Strategy 2030 at regional level. These amendments shall include the legal establishment of Regional Coordination Teams (one in each Polish 'voivodeship') coordinating vocational education and training policy, higher education and lifelong learning; a governance structure that incorporates responsibilities for regions and social partners; an obligation for adopting operationalised implementation programmes for the national Integrated Skills Strategy 2030 at regional level (one in each 'voivodeship'), and to update a programme every five years, and to ensure that the learning offer shall be adapted to the diagnosed skills needs. The amendments shall include provisions for the functioning of the Coordination Office (providing services for the Regional Coordination Teams), and an implementation plan for monitoring and evaluation.

The implementation of the reform shall be completed by 31 March 2025.

A3.1.1 Investments in modern vocational training, higher education and lifelong learning

The investment, linked to reform A3.1, shall aim at the actual creation and full functioning of the network of Sectoral Skills Centres to support the development of modern vocational training, higher education and lifelong learning. This shall include the creation of the Skills Centres and provision of vocational training courses and curricula, including for adults, students, young people, vocational education and training teachers, and employees. The investment shall not include the purchase of land.

For the provision of up- and re-skilling and training curricula in the Skills Centres, including certification of learning outcomes, 24 000 learners shall receive training in all Centres. Of these learners, at least 60% shall be adults (at least 25 years old – not including vocational education and training teachers); at least 20% of learners shall be young people (between 14 and 24 years old); at least 10% of learners shall be current vocational education and training teachers, who shall participate in the training in the first two years of operation of the Skills Centres (following the reform of the Teachers Act). Finally, each upskilling programme shall include at least a digital dimension and a green dimension, based on the best available knowledge and science. At least 90 sectoral organisations shall be included in the Skills Centres (for whom training shall be provided).

The investment shall also set up at least 14 functioning Regional Coordination Teams, with an overall objective to reach 16 Regional Coordination Teams (one for each 'voivodeship'). These Teams shall coordinate policy in vocational education and training and lifelong learning. The investment shall include support and development of coordination mechanisms

at central and regional level, as well as support for activities of the regional teams to perform their tasks.

In addition, with an overall objective to develop 16 operationalised implementation programmes at regional level (one for each 'voivodeship'), at least 14 operationalised implementation programmes at regional level shall be developed by the established Regional Coordination Teams for vocational education and training and lifelong learning. These shall be implementation programmes for the national Integrated Skills Strategy 2030 at regional level.

The implementation of the investment shall be completed by 30 June 2026.

Sub-component A4 – Increasing structural matching, efficiency and crisis resilience of the labour market

A4.1 Effective institutions for the labour market

The overarching objective of the reform is to increase the labour market participation with a view to contributing to higher productivity, crisis resilience and global competitiveness of the Polish economy. Another objective is to bring new flexibility and security in the Polish labour market. To that end, the reform aims at: (i) redesigning the way the public employment services operate and enhancing active labour market policies; (ii) easing the hiring process of foreign workers; (iii) easing recruitment procedures by implementing new provisions on electronic contracts; and (iv) exploring ways for enhancing the use of collective agreements and of a single labour contract.

The reform shall consist of new legislation on public employment services, on the employment of third country nationals, and on the electronic conclusion of certain job contracts. Moreover, the reform shall consist of an adoption of a new standards and performance framework on the functioning and coordination of the public employment services. A consultation process of social partners on the potential for collective agreements and a comprehensive study on the potential role of a single labour contract shall be conducted. Relevant legal changes, as identified in the consultation and in the study, shall be implemented.

The implementation of the reform shall be completed by 30 September 2024.

A4.1.1 Investment in support of labour market institution reform

The overarching objective of this investment is to increase the capacity of the public employment services to support the functioning of the labour market. To that end, the investment shall aim to digitise services and tools used by the public employment services, to train the staff of the public employment services, and to carry out an information campaign on the new services offered by the public employment services, also to their first-time future users.

The investments shall consist of (i) digitalisation of public employment services' processes and (ii) training courses for the public employment services' staff, (iii) developing new standards.

The implementation of the investment shall be completed by 30 June 2025.

A4.2 Reform to improve the labour market situation of parents by increasing access to high-quality childcare for children up to the age of three

The overarching objective of the reform is to ease the access to childcare facilities for children up to the age of three and to ensure high education and quality standards for childcare services. To that end, the aim of the reform is to (i) streamline the management of domestic and external funds for creation and functioning of the childcare facilities; (ii) implement a stable long-term domestic financing of the childcare services for children up to the age of three; as well as (iii) implement a set of binding minimum education and quality standards for childcare facilities.

The reform shall consist of the adoption of an amendment to the law on the care of children up to three years of age and of setting up a dedicated multi-annual programme for the creation and functioning of the childcare facilities. Among others, the amendment shall bring together the management of three distinct financing sources for the creation and functioning of childcare facilities: domestic financing, European Social Fund+ and the Recovery and Resilience Facility. The reform shall also consist of designing a relevant scheme and ensuring sufficient funds to set up a stable long-term domestic financing of childcare services for children up to the age of three. Finally, the reform shall consist of carrying out a strategic review of existing care and educational standards for children under three years of age, developing relevant educational guidance and supports for childcare facilities, and implementing relevant legal changes based on this review with a view to setting up a set of binding minimum education and quality standards for childcare facilities to ensure the high quality of education and care from an early age.

The implementation of the reform shall be completed by 30 June 2024.

A4.2.1 Support for childcare facilities for children up to three years of age (nurseries, children's clubs) under Maluch+

The overarching objective of this investment is to increase the availability of childcare facilities up to the age of three by subsidising the costs of construction of childcare facilities and setting up a financing management system of childcare facilities for children up to the age of three. To that end, the investment shall aim to (i) implement an IT system to manage the financing and creation of childcare facilities for children up to the age of three, and to (ii) create new places in childcare facilities (nurseries, children's clubs) for children up to three years of age.

The investment shall consist of a development and a rollout of an IT system to manage the financing and creation of childcare facilities for children up to the age of three. The system shall combine different sources of financing childcare (European funds, national financing from the central budget, local governments financing).

The investment shall also consist of the creation of 47500 new places in nurseries and children's clubs through the construction of new facilities and the refurbishment (renovations and adaptations) of existing ones. Exceptionally, if needed, this may include the purchase of real estate and infrastructure (the purchase of land or premises).

A clear delineation between the funding from the Recovery and Resilience Facility and other European funding shall be respected.

The implementation of the investment shall be completed by 30 June 2026.

A4.3 Implementation of the legal framework for the development of the social economy

The overarching objective of the reform is to increase the professional activity rate of people at risk of social exclusion and to support the deinstitutionalisation of social services. To that end, the aim of the reform is to define in the legislation a framework for the functioning of social economy actors.

The reform shall consist of an adoption of a law on the social economy. The law shall define the basic rules related to this sector, including in particular the principles of functioning and supporting a social enterprise, new modes of cooperation between social economy entities and the local government in the implementation of social services, as well as the principles of policy coordination in the field of social economy development.

The implementation of the reform shall be completed by 30 June 2022.

A4.3.1 Investment support programmes making it possible, in particular, to develop activities, increase participation in the provision of social services, improve the quality of reintegration into social economy entities

The overarching objective of this investment is to maximise the impact of social economy entities in terms of social and professional reintegration of people at risk of social exclusion and to support the deinstitutionalisation of social services. To that end, the investment shall aim to help entities to obtain a social enterprise status and to maintain jobs in social economy entities.

The investment shall consist of the preparation and implementation of programmes providing grants to eligible entities. The targets to measure the achievement of the investment shall be (i) to grant the social enterprise status to 1400 entities and (ii) to provide financial support to at least 1000 social entities.

The selection of beneficiaries shall be undertaken in line with specified selection criteria that shall respect the principles of non-discrimination and transparency.

The implementation of the investment shall be completed by 31 December 2025.

A4.4 Making forms of employment more flexible and introducing remote work

The overarching objective of the reform is to make it easier to reconcile family and professional responsibilities and help people from groups with lower labour participation rates to find regular employment. To that end, remote work and flexible forms of organisation of working time shall be enshrined in the Labour Code.

The reform shall consist of the adoption of an amendment to the Labour Code. The amendment shall allow remote work anytime, and not only in extraordinary circumstances, and implement flexible forms of working time arrangements. The amendment shall also define several operational arrangements of remote and flexible work, including: (i) the possibility to work remotely outside the place of employment, based on arrangements between the worker and the employer, (ii) a definition of rules on the work tools to be provided by the employer, and (iii) the creation of a framework for health and safety principles applicable to the remote work.

The implementation of the reform shall be completed by 30 September 2022.

A4.4.1 Investments related to equipping workers/companies to work remotely

The overarching objective of this investment is to increase the productivity of micro, small and medium enterprises. To that end, the investment shall aim to equip companies and to train their employees for remote work.

The investment shall consist of the implementation of programmes providing advice and grants to eligible entities to better equip them for remote working practices. The target to measure the achievement of the investment shall be the provision of advice on digitalisation to at least 3000 companies and, if found necessary as an outcome of such advice, with the purchase of software / licenses and digital upskilling for staff. If the beneficiary had previously performed the above analysis, the grant may be used for the purchase of software / licenses and digital upskilling of staff.

The selection of beneficiaries shall be done under specified selection criteria following the principles of non-discrimination and transparency.

The implementation of the investment shall be completed by 30 June 2025.

A4.5 Extend careers and promote working beyond the statutory retirement age

The overarching objective of the reform is to increase workers' ability and motivation to remain in the labour market beyond the retirement age. To that end, a tax incentive shall be implemented for those who reached the statutory retirement age but prefer to not retire and continue working. Within two years from the implementation of the tax incentive, a report to evaluate its effect on the effective retirement age shall be published.

The reform shall consist of the adoption of an amendment to the act on the personal income tax and of an evaluation of this measure. The amendment shall reduce as from 2023 the personal income tax for those who reached the statutory retirement age but do not want to retire and continue working. Workers falling into the first income tax bracket (PLN 85 528 in 2021) and earning no more than the average gross wage in the national economy in Poland shall be exempted from income tax. The personal income tax rate shall be reduced for other workers with higher earnings who reached the statutory retirement age but do not retire and continue working. Thanks to this tax incentive taxpayers shall earn additional amounts corresponding to the amount of unpaid income tax which is expected to incentivise them to extend their careers. Within two years from the introduction of the above measure, a report shall be completed to evaluate the effect of the amendments to the personal income tax on the effective retirement age. This shall analyse the impact on labour market participation, on the sustainability of the pension system, on public finances and on gender equality.

The implementation of the reform shall be completed by 31 December 2024.

A4.6 Increase labour market participation of certain groups by developing long-term care

The overarching objective of the reform is to increase the labour market participation of certain groups, in particular women, by developing the long-term care system in Poland. To that end, a strategic review of the long-term care system shall be performed and followed by relevant legislative changes.

The reform shall consist of the publication of an analysis of the long-term care system in Poland, followed by an amendment of relevant laws to implement the reform priorities as identified in this analysis. The analysis shall in particular explore the possible ways to integrate social and health long-term care, speed up the deinstitutionalisation of these services, put them under a single authority, reduce fragmentation of care provision, create a

stable system of adequate financing of the long-term care services, especially the community-based and home care, and introduce a quality framework on long-term care services (requirements for staff, equipment, admission of long-term care providers to the market). The analysis shall also explore ways to revise the care-related benefits to enable continuing working. The analysis shall be done in consultation with relevant stakeholders, including social partners dealing with long-term care provisions, and local authorities. The reform priorities as identified in the analysis shall be implemented by an amendment of relevant laws as a part of the reform.

The implementation of the reform shall be completed by 31 December 2024.

A4.7 Limit the segmentation of the labour market

The overarching objective of the reform is to limit the segmentation of the labour market and increase the social security of certain workers. To that end, all civil-law work contracts shall be made subject to social security contributions, with the exception of mandate contracts concluded with secondary school students and students until 26 years of age.

The reform shall be implemented through a legal act ensuring that employment based on civil-law contracts is subject to social security contributions: pension, disability, accident and occupational disease and sickness benefits. Moreover, the rule according to which social security contribution is paid on the basis of minimum wage for civil-law contracts shall be abolished.

The implementation of the reform shall be completed by 31 March 2023.

A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

A1 – BUSINESS ENVIRONMENT

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
A1G	A1.1 Reform of the fiscal framework	Milestone	Development of a Concept Note on the Standardised Chart of Accounts integrated with budget classification	Publication on the Ministry of Finance website				Q1	2022	Publication of the Concept Note on the Biuletyn Informacji Publicznej (public information website) of the Ministry of Finance. The Concept Note shall present the description and set up of the new classification system.
A2G	A1.1 Reform of the fiscal framework	Milestone	Entry into force of an amendment to the Act on Public Finances prepared by the Ministry of Finance implementing the new budgetary system, including the new classification system, the new model of budget management and the redefined medium-term budgetary framework	Provision in the amendment to the Act on Public Finances indicating its entry into force				Q1	2025	Entry into force of an amendment to the Act on Public Finances in order to implement the new budgetary system, including the new classification system, the new model of budget management and the redefined medium-term budgetary framework. The new classification system shall integrate the existing budgetary classification and performance classification and shall link it with the standard chart of accounts. Transactions shall be recorded on the same basis, which is expected to improve the quality of data in budgetary, financial and statistical reporting. The new system shall include a number of separate segments along with data coding structures in these segments, which shall address the information needs of various users of the system.
A3G	A1.1 Reform of the fiscal framework	Milestone	Entry into force of an amendment to the Act on Public Finances extending the scope of the stabilising expenditure rule (SER) to include state special purpose funds	Provision in the amendment to the Act on Public Finances indicating its entry into force				Q3	2021	Entry into force of an amendment to the Act on Public Finances to extend the scope of the stabilising expenditure rule (SER). The assumed effects of the changes include covering a larger number of units of the general government (state special purpose funds) within the scope of the

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										SER, which shall allow for increasing the transparency and efficiency of public finance management. The Ministry of Finance shall be responsible for the preparation of the amendment.
A4G	A1.1 Reform of the fiscal framework	Milestone	Review of the functioning of the stabilising expenditure rule in the years 2019-2023, with a view to: - assessing the effectiveness of the rule, including the application of the exit clause and the return clause - analysing the impact of changes in EU rules on the formula of the stabilising expenditure rule	Publication in the Biuletyn Informacji Publicznej of the Ministry of Finance website				Q1	2025	Publication of a review on the functioning of the stabilising expenditure rule (SER), with a special reference to its scope, after five years of its operation (2019-2023 review). The review shall be published on the Ministry of Finance website. The SER was introduced in 2013 as a tool supporting the conduct of fiscal policy. In 2018, the review of the functioning of the SER for the first five years was carried out. The next review shall cover the years 2019-2023. The analysis of the functioning of the SER shall allow for the preparation of recommendations, regarding among others meeting the targets and parameters of the SER formula and its scope.
A5G	A1.2 Further reducing regulatory and administrative burden	Milestone	Entry into force of a legislative package to reduce administrative burden to businesses and citizens	Provisions in the legislative package indicating its entry into force				Q2	2022	Entry into force of a legislative package that shall aim at eliminating legal barriers affecting the investment climate, in particular by: 1) Simplifying administrative and silent procedures in at least 12 procedures, in particular related to the seafarers professions and trade and commerce of alcoholic beverages; 2) Reducing the use of the two-instance procedure in at least 10 procedures, related in particular to geological resources; 3) Digitalising the way of dealing with requests in at least eight administrative procedures, related for example to the submission of declarations by tourist operators and entrepreneurs to the Insurance Guarantee Fund and the

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										submission of applications for social benefits by students as well as regarding the geodetic proceedings; 4) Introducing other rationalisations of administrative procedures (such as the limitation of the number of documents or fewer formalities to accomplish) related in particular to introducing a number of improvements in the spatial planning process, in the construction process and in the land consolidation process; 5) Prolonging the deadline for the accomplishment of obligations of entrepreneurs and natural persons towards the administration in some cases of administrative procedures, for example prolonging from 30 to 60 days the deadline for registering a car bought in other Member States or prolonging the deadline for the use of the touristic voucher from 31 March 2022 to 30 September 2022.
A6G	A1.2 Further reducing regulatory and administrative burden	Milestone	Entry into force of an amendment to the Investment Zone Act	Provision in the amendment to the Investment Zone Act indicating its entry into force				Q4	2023	Entry into force of an amendment to the Polish Investment Zone Act, which shall: 1) increase the area of special economic zones in Poland by 30%; 2) define a new model for granting financial support to businesses undertaking activities in special economic zones, in the form of tax breaks and subsidies for the purchase of investment land. The new law shall be fully in line with the DNSH Technical Guidance (2021/C 58/01).
A7G	A1.2.1 Investments for enterprises in products, services and competences of employees and staff related to the diversification of	Target	T1 - Number of SMEs and micro-enterprises in the HoReCa, culture and tourism sectors that have modernised their business activities		Number	0	2500	Q2	2024	At least 2500 SMEs and micro-enterprises in the HoReCa, culture and tourism sectors have completed projects aimed at modernising their business activities. The projects shall include the following three types of activities:

										relationships in the agricultural and food supply chain. This law goes beyond the Unfair Trading Practices Directive in the following ways: (a) While the Directive provides a closed list of Unfair Trading Practices, the new law shall, in addition to this list, introduce an open definition of unfair trading practices. In particular, such additional trading practices shall be identified as unfair by the Office of Competition and Consumer Protection (UOKiK) if (i) they are contrary to the requirements of good commercial conduct; (ii) and they materially distort or are likely to materially distort the interest of the other contract party; (b) While the Directive only protects suppliers of agricultural and food products, the new law shall protect all trading operators, including buyers of agricultural and food products. The reform shall allow the Office of Competition and Consumer Protection to investigate not only the cases submitted by market participants but to undertake its own investigations.
A19G	A1.4 Reform to improve the competitiveness and protection of producers/consumers in the agricultural sector	Milestone	Adoption of a mid-term review of the new law to fight against the unfair use of contractual advantages in the agricultural and food trade sector	Publication on the Office of Competition and Consumer Protection's website				Q2	2025	The review shall include an assessment of whether the objectives of the reform on unfair trade practices in the agri-food sector have been achieved and identify avenues for action to tackle potential problems of implementation.
A20G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Milestone	Adoption of criteria for the selection of beneficiaries for all the projects under this investment	Publication on the website of the Ministry of Agriculture and Rural Development and the Agency for				Q1	2022	Following a public consultation, adoption of the criteria for the selection of beneficiaries for all the projects under this investment. The selection criteria shall follow the principles of non-discrimination and transparency. The selection criteria shall give

				Restructuring and Modernisation of Agriculture the adoption of the criteria for the selection of beneficiaries						preference to the areas of: (i) digitalisation; (ii) job creation; (iii) environmental protection and sustainable food production practices; (iv) the circular economy, including actions related to preventing food waste. The application and verification process shall be carried out by the Agency for Restructuring and Modernisation of Agriculture (ARMA), in order to ensure consistency, transparency, and prevent double funding.
A21G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	Distribution and storage centres that have been built or modernised and wholesale markets that have been modernised		Number	0	72	Q4	2025	At least 72 distribution and storage centres and wholesale markets (including cooperatives) built or modernised. The objective is to create a set of independent distribution and storage centres at the local level to diversify and shorten the food supply chain as well as to encourage more sustainable production practices in the agri-food sector, especially by preventing food waste. The investment shall consist of: (i) Construction or modernisation of buildings and relevant infrastructure, such as storage, packaging, loading and sale facilities, social amenities, and laboratories. Furthermore, the investments shall include the purchase of solar panels, and the construction of heat recovery installations, biomass furnaces, and refrigerants with a reduced or neutral impact on the environment. Modernisation of buildings shall also include investments for the thermo-modernisation of buildings, the construction of waste treatment

	(specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an ecosystem of innovation		completed by local government or designated entity to operate locally							infrastructure for unmanned vehicles throughout the country shall enable the stable, sustainable and safe development of unmanned vehicle applications in various parts of the country, contributing to ensuring territorial cohesion and sustainable development of the country. The key elements of the infrastructure shall be terrestrial infrastructure, local data and traffic management centres along with digital services and producers implemented.
A35G	A2.3.1 Development and equipment of competence centres (specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an ecosystem of innovation	Target	T2 - Local centres and infrastructure for unmanned vehicles completed by local government or designated entity to operate locally		Number	3	10	Q2	2026	Local centres and/or infrastructure shall be implemented in seven additional locations (deployment). The implementation of the digital infrastructure for unmanned vehicles throughout the country shall enable the stable, sustainable and safe development of unmanned vehicle applications in various parts of the country, contributing to ensuring territorial cohesion and sustainable development of the country. The key elements of the infrastructure shall be terrestrial infrastructure, local data and traffic management centres along with digital services and producers implemented.
A36G	A2.3.1 Development and equipment of competence centres (specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an ecosystem of innovation	Target	Implemented unmanned vehicles services preceded by pilot projects		Number	0	2	Q2	2024	Unmanned vehicles services shall be tested and implemented in pilot projects carried out within individual competence centres. It is expected to implement at least two pilot projects as part of specialised programs in the following selected areas of application: - autonomous traffic coordination (with particular emphasis on ports and energy infrastructure) - public order services (security and civil protection)

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										The number of pilots carried out in individual packages shall depend on the area of application, the number of potential recipients (customers), technological complexity and regulatory conditions for a given application. Services implemented as part of pilot projects shall enable technology standardisation, gaining social acceptance for the use of unmanned vehicles. Unmanned vehicles services tested and implemented shall mean fully operational services based on hardware and software, and fulfilling business needs of the recipient (user). The selection of the projects and contractors shall be done under specified selection criteria following the principles of non-discrimination and transparency.
A37G	A2.3.1 Development and equipment of competence centres (specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an ecosystem of innovation	Target	Implemented unmanned vehicles services preceded by pilot projects		Number	2	4	Q2	2026	Two additional projects meeting the requirements set out for measure A36G.
A38G	A2.4 Strengthening cooperation mechanisms between science and industry	Milestone	Entry into force of an act amending the law on higher education and science with regard to the catalogue of entities that may create special purpose vehicles together with universities	Provision in the act amending the law on higher education and science indicating its entry into force				Q1	2022	The amending act shall allow for the creation of special purpose vehicles designed especially for the commercialisation of R&D results. This is expected to allow for greater interdisciplinary and flexibility of technology transfer.
A39G	A2.4 Strengthening	Milestone	Establishment of rules for	Document				Q1	2022	The rules for the use of laboratories and

	market situation of parents by increasing access to high-quality childcare for children up to the age of three		including educational guidelines and standards of care services for children under three years of age, ensuring high quality, including education and care	indicating the entry into force						<p>children up to three years of age allow access to high-quality and affordable early childhood education and care systems. The analysis shall be done taking into account the Council Recommendation of 22 May 2019 on High-Quality Early Childhood Education and Care Systems (2019/C 189/02) and shall be presented in a report to be published by the Ministry of Family and Social Policy.</p> <p>On the basis of the analysis, a framework for quality standards for childcare, including educational guidelines and standards of care services for children under three years of age shall be prepared, which shall then be publicly consulted and agreed on by the Ministry of Family and Social Policy with the stakeholders.</p> <p>Entry into force of an amendment of the Act of 4 February 2011 on the care of children up to three years of age shall make the framework binding for childcare providers, following the outcome of the consultations and the agreement of the Ministry of Family and Social Policy with the stakeholders.</p>
A58G	A4.2 Reform to improve the labour market situation of parents by increasing access to high-quality childcare for children up to the age of three	Milestone	Entry into force of an act amending the Act on the care of children up to three years of age ensuring a stable long-term domestic financing of the childcare services for children up to the age of three	Provision in the act amending the Act of 4 February 2011 on the care of children up to three years old indicating its entry into force				Q2	2024	Entry into force of an act amending the Act of 4 February 2011 on the care of children up to three years of age which shall ensure a stable long-term financing from national resources for creation and functioning of the childcare services for children up to the age of three.
A59G	A4.2 Reform to improve the labour market situation of parents by increasing access to childcare for children up to the age of three	Milestone	Entry into force of an act amending the Act on the care of children up to three years of age aimed at changing the organisation of the system of financing	Provision in the act amending the Act of 4 February 2011 on the care of children up to three years of age indicating its entry into force				Q2	2022	<p>Entry into force of an act amending the Act of 4 February 2011 on the care of children up to three years of age shall streamline the management of financing of the creation and functioning of the childcare facilities by:</p> <ul style="list-style-type: none"> - implementing a single coherent financing management system for the creation and

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
			care for children up to the age of three with a view to implementing a single coherent financing management system for creation and functioning of the childcare services for children up to the age of three							functioning of the childcare services for children up to the age of three; - bringing the management of funds coming from various financing sources under the Maluch+ programme.
A60G	A4.2.1 Support for childcare facilities for children up to three years of age (nurseries, children's clubs) under Maluch+	Milestone	Creation of an IT system to manage the financing and creation of childcare facilities for children up to the age of three, that shall combine different sources of financing childcare	Fully functioning IT system				Q2	2022	Creation and deployment of an operational IT system (or the expansion of one of the existing systems), which shall be used to support projects by the final recipients of the financial support, namely entities creating and running childcare institutions, at every stage of their implementation. The system shall be used by institutions supervising and implementing the reform as well.
A61G	A4.2.1 Support for childcare facilities for children up to three years of age (nurseries, children's clubs) under Maluch+	Target	Creation of new places in childcare facilities (nurseries, children's clubs) for children up to three years of age		Number	0	47 500	Q2	2026	The creation and development of infrastructure in the field of childcare up to three years of age shall consist of: - construction or renovation of nurseries and children's clubs (in accordance with the principles of universal design); - purchase of real estate and infrastructure (the purchase of land or premises). The target applies to nurseries and children's clubs. The target applies to construction of new facilities as well as to renovations and adaptations of existing facilities, for a total of at least 47 500 new childcare places.
A62G	A4.3 Implementation of the legal framework for social economy entities	Milestone	Entry into force of an act on the social economy	Provision in the act on the social economy indicating its entry into force				Q2	2022	Entry into force of an act on the social economy which shall regulate the basic issues related to this sector, including in particular: the definition of a social enterprise, the principles of functioning and supporting a social economy enterprise, new models of cooperation between social economy enterprises and the local government in the implementation of social services, as well as the

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										principles of policy coordination in the field of social economy development.
A63G	A4.3.1 Investment support programmes making it possible, in particular, to develop activities, increasing participation in the implementation of social services, improving the quality of integration into social economy entities	Target	Number of entities that obtained a social enterprise status		Number	0	1 400	Q2	2025	Granting a social enterprise status to 1 400 entities.
A64G	A4.3.1 Investment support programmes making it possible, in particular, to develop activities, increasing participation in the implementation of social services, improving the quality of integration into social economy entities	Target	Number of social economy entities, including social enterprises, covered by financial support		Number	0	1 000	Q4	2025	Provision of grants to at least 1 000 social economy entities, including social enterprises that shall lead to preserving jobs, increase of financial turnover or introducing the change in economic activity (expansion of the scale, form of the activity or industry change). Employment in entities receiving grants shall be maintained for at least 12 months following the date of the grant. The selection of beneficiaries shall be done under specified selection criteria following the principles of non-discrimination and transparency.
A65G	A4.4 Making forms of employment more flexible and introducing remote work	Milestone	Entry into force of the act amending the Labour Code introducing the permanent institution of remote work to the provisions of the Labour Code and flexible forms of working time arrangements	Provision in the act amending the Labour Code indicating its entry into force				Q3	2022	Entry into force of the act amending the Labour Code which shall help to better reconcile professional and private responsibilities, respond to the crisis, and provide support to help inactive people with lower economic activity in finding permanent employment. The reform shall consist in: - introducing the possibility of remote work (entirely or partially) outside the workplace on the basis of agreements between the employee and the employer made at the conclusion of the employment contract or during employment; - establishing rules on remote work in agreement between the employer and employees' representatives; - including specific cases in which remote work

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										could be performed at the employer's request (such as during extraordinary circumstances); - establishing an obligation for the employer to provide materials and tools necessary to perform remote work and/or the use of employees' private equipment; - implementing flexible forms of working time arrangements.
A66G	A4.4.1 Investments related to equipping workers/companies to work remotely	Target	Companies supported in the field of digitalisation		Number	0	3 000	Q2	2025	Provision of advice on digitalisation to at least 3 000 micro, small and medium enterprises and, if found necessary as an outcome of such advice, purchase of software / licenses and digital upskilling of staff. The measure shall consist of: a) pre-implementation analysis of the processes in the company which may be digitalised in the context of the remote work, which shall include software and system requirements, description of functionalities and development of the implementation road plan. A beneficiary shall dedicate maximum 20% of the support to this element. If the beneficiary had previously performed the above analysis, the grant may be used in full for the activities described in points b and c. b) training for employees and management in the field of the remote work (in particular work and management of the remote team, online sales, online communication with customers, supervision of the remote work, remote recruitment, planning and recording of working time, implementation of specialized IT tools). A beneficiary shall dedicate minimum 30% of the support to this element. c) purchase of licenses and software enabling remote communication and work among employees and clients. A company shall dedicate minimum 50% of the support to this element.
A67G	A4.5 Extend careers and promote working beyond the statutory	Milestone	Entry into force of the act amending the Act on personal income tax	Provision in the act amending the Act on personal income tax				Q4	2022	Entry into force of the act amending the Act on personal income tax which shall implement the following changes: personal income tax reduction

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
	retirement age		implementing from 2023 a personal income tax reduction for those who reached the retirement age but continue working	indicating its entry into force						shall be dedicated to taxpayers who reach the statutory retirement age and do not decide to retire but continue working. Those workers shall be exempted from income tax to a certain limit of income (no more than the first income tax bracket, PLN 85 528 in 2021, and no more than average gross wage in the national economy in Poland). The personal income tax rate of those above the first bracket shall be reduced. Thanks to this tax incentive taxpayers shall earn additional amounts corresponding to the amount of unpaid income tax which is expected to incentivise them to extend careers.
A68G	A4.5 Extend careers and promote working beyond the statutory retirement age	Milestone	Report to evaluate the impact of measures taken to raise the effective retirement age	Publication of the evaluation report by the Ministry of Family and Social Policy (MRiPS)				Q4	2024	The objective of this report is to evaluate the effect of the amendments to the personal income tax on effective retirement age within two years from their introduction. This shall analyse the impact on labour market participation, on sustainability of the pension system, on public finances and on gender equality.
A69G	A4.6 Increase labour market participation of certain groups by developing long-term care	Milestone	Strategic review of long-term care in Poland with a view to identifying reform priorities	Publication of the strategic analysis report by the Ministry of Family and Social Policy (MRiPS) and by the Ministry of Health				Q4	2023	Completion of an analysis of the long-term care system in Poland with a view to reforming it in the future and publication of a relevant report in the Biuletyn Informacji Publicznej of the Ministry of Family and Social Policy website and in the Biuletyn Informacji Publicznej of the Ministry of Health website. The analysis shall in particular explore the possible ways to: <ul style="list-style-type: none"> - integrate social and health long-term care, - speed up the deinstitutionalisation of these services, - put them under a single authority, - reduce the fragmentation of care provision, - revise the care-related benefits to enable undertaking employment, - create a stable system of adequate financing of the long-term care services, especially the community-based and home care, - introduce a quality framework on long-term care services (requirements for staff, equipment,

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										admission of long-term care providers to the market). The analysis shall be done in consultation with relevant stakeholders, including social partners dealing with long-term care provision, informal carers, persons receiving care, those who do not receive care but should receive it, and local authorities.
A70G	A4.6 Increase labour market participation of certain groups by developing long-term care	Milestone	Entry into force of a law amending relevant laws to implement the reform priorities as identified in the strategic review of long-term care in Poland (in line with milestone A69G)	Provision in the law amending relevant laws indicating its entry into force				Q4	2024	Entry into force of a law amending relevant laws which shall implement the reform priorities as identified in the strategic review of long-term care in Poland.
A71G	A4.7 Limit the segmentation of the labour market	Milestone	Entry into force of an act amending the Act on the social insurance system limiting labour market segmentation and increasing social protection of all those working on the basis of civil law contracts, by making those contracts subject to social security contributions	Provision in the act amending the Act on the social insurance system indicating its entry into force				Q1	2023	Entry into force of an act amending the Act on the social insurance system which shall: (i) ensure that all civil-law contracts are subject to social security contributions (pension, disability, accident and occupational disease, sickness benefits), regardless of the income earned, with the exception of contracts with students under 26 years of age; (ii) abolish the rule that social security contributions are paid on the basis of minimum wage for civil-law contracts.

A.3. Description of the reforms and investments for the loan

A2.5 Strengthening the potential of the cultural sector and cultural industries for economic development

The overarching objective of this reform is to conceive and create a framework for supporting the cultural and creative sectors (CCS) in the aftermath of the COVID-19 pandemic. The reform shall consist of the adoption of a policy paper to address the following issues: (i) identify key medium to long-term challenges in the CCS; (ii) ensure compliance with EU horizontal principles including gender equality and non-discrimination; (iii) identify the potential for green and digital tools and platforms to address these challenges; (iv) develop concepts for the cooperation and transfer of knowledge and skills between the CCS and with the sectors of science, education, technology and business with a focus on EU general principles including gender equality and non-discrimination (v) identify preferred options to provide public support for actions in the CCS.

The implementation of the reform shall be completed by 31 December 2022.

A2.5.1 A programme to support the activities of entities in the cultural and creative industries to stimulate their development

The objective of this investment is to prevent the long-term negative effects of the COVID-19 pandemic and encourage the green and digital transition in the cultural and creative sectors (CCS). To this end, the investment shall aim to provide financial support and technical assistance to cultural institutions, NGOs, artists, micro-enterprises and SMEs in the CCS.

The investment shall consist of two main elements. First, the investment shall create a grant programme to cultural institutions, NGOs, SMEs and microenterprises in the CCS to support the implementation of projects related to: (i) improving digital and green competences in the CCS; (ii) developing cultural/creative activities, such as concerts, performances and exhibitions including in virtual formats; (iii) creating educational programmes and workshops on architecture, design, and the creative arts to help artists and designers develop their green and digital skills; (iv) Building workshops to support cooperation and the exchange of knowledge and skills between the CCS and with the sectors of science, technology, and business; (v) developing new products and services that use disruptive technologies such as Artificial Intelligence, blockchain, and the Internet of Things in the CCS. EU general principles including gender equality and non-discrimination shall be considered in all projects.

Second, the investment shall create a fellowship programme to support creators, artists, animators, educators and researchers in the CCS. In particular, the fellowship programme shall provide financial assistance to: (i) provide courses for artists to develop their artistic and digital or green skills; (ii) provide individualised professional training to artists; (iii) create opportunities for artists to meet in virtual or physical formats with local, national and international art professionals through workshops and discussion series; (iv) create opportunities for artists to cooperate in virtual or physical formats with professionals in other sectors, including science, technology and business. Fellowships shall be given with respect to the EU general principles including gender equality and non-discrimination. The criteria for the selection of applications for scholarships to artists in the CCS, corresponding to one of the NACE sectors as defined by Eurostat, shall include: (a) a convincing artistic portfolio in the last 24 months; (b) a convincing artistic plan for the next 24 months.

The implementation of the investment shall be completed by 31 December 2024.

A2.5.2 Investment for the creation of a model support centre for creative industries

The overarching objective of this investment is to support cultural and creative industries, in particular SMEs, with a view to bring innovative solutions to the economy, including through the digitalisation of the cultural and creative sectors (CCS). To this end, the investment aims to create a support centre for cultural and creative industries, with a particular focus on design and architecture, science and business.

The investment shall consist of two main elements. First, the investment shall renovate a museum for creative industries in Krakow, with a view to setting up a model support centre for cultural and creative industries, especially covering design and architecture. The renovation of the museum shall integrate the highest standards in terms of energy efficiency and renovation materials with the most advanced technologies in terms of sustainability in line with the do no significant harm (DNSH) principle. The renovation works shall include, inter alia: (i) energy efficiency solutions; (ii) development of digital facilities open to SMEs in the cultural industries; (iii) demonstration of sustainability solutions for circular economy on building materials.

Second, the investment shall conclude ten cooperation agreements between clients of the creative industries and the support centre. In particular, the cooperation agreements shall specify the ways in which cooperation shall be strengthened between cultural institutions, universities, starting entrepreneurs and producers from the creative industries.

The implementation of the investment shall be completed by 30 June 2026.

A2.6 Reform - Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data

The objective of the reform is to increase the use of satellite data by public and private entities. A new law on space activities shall facilitate the use of satellite data by the public administration.

The law shall establish a national administrator of satellite data. It shall also be obliged to promote the use of satellite data by private companies, inter alia by organising trainings for all interested entities. The law shall also establish the rules and conditions for the performance of space activities and their supervision, liability for damage caused by a space object, as well as the rules for the operation of the National Register of Space Objects.

The implementation of the reform shall be completed by 30 September 2024.

A2.6.1 Investment - Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data

The investments aim to significantly increase the efficiency of the use of satellite Earth observation in Poland and ensure the efficient and continuous production and provision of processed Earth observation (EO) information, tailored to the user's needs. This is expected to improve the country's governance (decisions based on more specific and up-to-date information), bring about a significant digital transformation of the administration and create demand for Earth observation products, including an additional private and public demand for the already existing EU Copernicus system.

The investment shall consist of two investments. The first investment shall involve the establishment of the National Satellite Information System (NSIS) that shall deliver

monitoring services using data from satellite Earth observation. The first services shall be available for end users by 30 September 2023.

The second investment shall involve the launch of four satellites. Preparatory work that shall be conducted in line with standards of the European Cooperation for Space Standardization (ECSS Phase 0/A/B/C) shall be completed by 30 June 2023. The implementation of the investment shall be completed by 30 June 2026.

A.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

A2 – INNOVATION

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
A1L	A2.5 Strengthening the potential of the cultural sector and cultural industries for economic development	Milestone	Adoption of a policy paper for supporting green and digital actions in the cultural and creative sectors (CCS)	Publication of a policy paper				Q4	2022	<p>Following a public consultation, adoption by the Minister responsible for cultural affairs of a policy paper for supporting the cultural and creative sectors (CCS). In particular, the document shall address the following issues:</p> <ol style="list-style-type: none"> 1. Identifying key medium to long-term challenges in the CCS, including lessons learnt from the Covid-19 crisis; 2. Ensure compliance with EU general principles including gender equality and non-discrimination is addressed in the projects to be supported; 3. Identifying the potential for green and digital tools and platforms to address these challenges; 4. Developing concepts for the cooperation and transfer of knowledge and skills between the CCS and with the sectors of science, education, technology and business with a focus on EU general principles including gender equality and non-discrimination, green and digital. <p>Identifying preferred options to provide public support for actions in the CCS.</p>

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
A2L	A2.5.1 A program to support the activities of entities in the cultural and creative industries to stimulate their development	Milestone	Selection criteria for the support of projects in the cultural and creative sectors (CCS)	Publication of the selection criteria and setting-up of the independent selection committee				Q4	2022	<p>The Ministry of Culture and National Heritage shall adopt and publish the selection criteria to support SMEs, cultural institutions and NGOs in creating projects within the cultural and creative sectors (CCS).</p> <p>Furthermore, an independent selection committee with experts of various disciplines shall be set up, including representatives of independent CCS organisations and institutions. The selection committee shall decide on the provisions of grants and fellowships.</p> <p>The criteria for the selection of applications for project grants from cultural institutions, NGOs, SMEs and microenterprises in the CSS, corresponding to one of the NACE sectors as defined by Eurostat, shall:</p> <ul style="list-style-type: none"> a) give preference to projects that are likely to have a lasting impact in the digital and green transitions in the CCS; b) give preference to those beneficiaries that have a business plan on how the grants shall be used to finance the costs of the project; c) give preference to those beneficiaries that have a track record of activities or projects in the last 24 months related to the project proposal. <p>EU general principles including gender equality and non-discrimination shall be considered in all projects.</p>
A3L	A2.5.1 A program to support the activities of entities in the cultural and creative industries to stimulate their development	Target	Number of signed contracts for projects by cultural institutions, NGO's, SMEs and micro-enterprises operating in the cultural and creative sectors (CCS)		Number	0	2 710	Q4	2024	<p>The aim of this measure is to strengthen the cultural and creative sectors (CCS) by supporting the implementation of projects disseminating cultural achievements and increasing the presence of culture in social life by online tools and resources. Projects shall be selected through open calls for proposals.</p>

	infrastructure using satellite data									all interested entities.
A8L	A2.6.1 Investment - Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Target	Development of necessary infrastructure: the National Satellite Information System (NSIS) that shall provide monitoring services using data from satellite Earth Observation (EO)		Number	0	1	Q3	2023	The National Satellite Information System (NSIS) shall become operational. Launch of initial services in cooperation with users in two areas of Electronic Data Capture (EDC) applications of high importance for the economy and security of Poland, selected from the following areas: spatial management, crisis management, agriculture and forestry, water management, monitoring the Baltic environment.
A9L	A2.6.1 Investment - Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Milestone	Preparatory works for the launching of the first Polish satellite: ECSS Phase 0/A/B/C (Mission analysis/needs identification, Feasibility and Definition)	Publication of the reports				Q2	2023	The indicator refers to three published reports (the Mission Definition Review, the Preliminary Requirements Review, the Critical Design Review). The space segment shall include satellite platforms of micro and sensors enabling the acquisition of opto-electronic data, equipped, inter alia, with a compression module, and encrypted uplink/downlink radio links. Preparatory works shall be conducted in line with standards of the European Cooperation for Space Standardization (ECSS).
A10L	A2.6.1 Investment - Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Target	T1 - Launching of the first Polish satellite		Number	0	1	Q2	2025	Number of satellites launched, which consist of complete manufacturing, assembly and testing of flight hardware/software, including associated ground support, putting the first satellite into orbit.

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
A11L	A2.6.1 Investment - Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Target	T2 - Launching of the next three Polish satellites		Number	1	4	Q2	2026	The target refers to the number of satellites launched (in line with the requirements set out for the measure A10L above). Complete manufacturing, assembly and testing of flight hardware/software, including associated ground support, leading to the launch of the next three satellites into orbit.

B. COMPONENT B: ‘GREEN ENERGY AND ENERGY-INTENSITY REDUCTION’

The component of the Polish recovery and resilience plan aims at addressing several challenges that the Polish energy sector currently faces with respect to decarbonisation and air pollution. First, Poland’s dependence on coal is still much higher than in other Member States which makes the energy transition towards carbon neutrality challenging. Second, around 70% of single-family dwellings and many multi-family and public buildings do not meet energy efficiency standards. This in combination with a still widespread use of low-quality coal in individual heating systems leads to low air quality. Third, low retention levels and water shortages (including drinking water) in rural areas are a major problem.

The main objective of the component is to shift the energy mix towards low-carbon technologies by facilitating the deployment of renewables and increasing the use of alternative energy sources such as hydrogen and biogas. The component also aims to reduce energy consumption by advancing a deep renovation of buildings, including thermal modernisation; and by reducing the energy intensity of industry and services as well as households. Finally, the component shall also focus on reducing the human impact on the environment, in particular through investments in the neutralisation of threats and the rehabilitation of large-scale degraded areas and the Baltic Sea.

The component supports addressing the Country Specific Recommendations to focus investment-related economic policy on innovation, transport, notably on its sustainability, digital and energy infrastructure, healthcare and cleaner energy, taking into account regional disparities (Country Specific Recommendation 3 2019) and to focus investment on the green and digital transitions, in particular digital infrastructure, clean and efficient energy production and use and sustainable transport, which shall contribute to the gradual decarbonisation of the economy, including in coal regions (Country Specific Recommendation 3 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C 58/01). For all measures in this component involving infrastructure development, compliance with EU legislation shall be required to avoid harm to the biodiversity objective. This means specifically the EIA Directive (2011/92/EU) and, for sites/operations located in or near biodiversity-sensitive areas, Articles 6(3) and 12 of the Habitats Directive (92/43/EEC), and Article 5 of the Birds Directive (2009/147/EC).

B.1. Description of the reforms and investments for non-repayable financial support

B1.1 Clean Air and energy efficiency

The objective of the reform is to reduce greenhouse gas emissions from and increase the energy efficiency of selected economic sectors. It also aims at improving air quality by accelerating the process of replacing polluting sources of heat and power generation.

These objectives shall be achieved, firstly, through a set of measures optimising energy efficiency investment support, mainly as part of the Energy Efficiency Obligation Scheme. They shall include the facilitation of the use of Energy Performance Contracts in the public

sector, the possibility for entities covered by the Energy Efficiency Obligation Scheme to settle their energy saving obligations within the framework of so-called subsidy programmes, and the enabling of Energy Services Companies' participation in the Energy Efficiency Obligation Scheme. This shall be achieved through an amendment of the Energy Efficiency Act in conjunction with amendments of the law on supporting thermo-modernisation and renovations and on the central emission register of buildings; the law on financial support for the creation of residential premises for rent; the law on some types of housing support; and the law on renewable energy sources. These legal acts were to enter into force by 31 March 2022.

Secondly, the objectives of the 'Clean Air and energy efficiency' reform shall be achieved through the development of the Clean Air Priority Programme in line with long-term renovation strategy under the Energy Performance of Buildings Directive (2010/31/EU), which shall be the main vehicle for energy efficiency measures in buildings. The efficiency of the implementation of the current Clean Air Programme shall thus be increased by streamlining application procedures. It shall develop specific support targeted at lowest-income, low-income households and higher income ones, in the case of the latter, notably with the involvement of the banking sector providing loans combined with grants. These changes shall set the ground for deploying support under Investment B1.1.2 *"Replacement of heat sources and improvement of energy efficiency in residential buildings"* allowing significantly scaling up the rate of building renovations and heater replacement supported under that programme. The updates to the "Clean Air" Priority Programme shall be adopted by 31 March 2023.

The third element underpinning this reform shall be an update of the National Air Protection Programme. The programme shall define a comprehensive, long-term set of requirements and enabling conditions for regional and local authorities for ensuring an improvement of air quality. These authorities shall be mandated to take specific measures to lower the level of air pollutants emitted from household heating and transport when a given air polluting threshold is exceeded. Local and regional authorities shall be also allocated a specific budget for enforcing air protection rules, notably set as part of so-called 'anti-smog resolutions'. The updated National Air Protection Programme shall mandate the end of any public support for investments in new coal-fired heaters by 31 December 2021.

The fourth element of the reform shall be an Amended Regulation by the Minister of Climate and Environment setting standards for solid fuels. Further to the banning of low-quality coal for domestic heating enacted in 2018 this amendment shall also set minimum standards for solid fuels and ban producers from using misleading branding. This shall enter into force by 31 December 2022.

B1.1.1 Investment in heat sources in district heating systems

The objective of this investment is to modernise district heating and to lower its greenhouse gas emissions. A significant proportion of district heating operators in Poland need to be modernised, by replacing sources, in poor technical condition not compliant with the definition of an efficient district heating system. The need for heat source replacement is also linked to a low share of renewables in the heating system, currently at around 9,5%. The objective is thus to reduce the energy intensity and emissions of heat generation. Under this measure only investments in low-carbon installations and renewables shall be carried out. Support shall be given to installations using heat: energy from renewable sources; gaseous fuels in cogeneration excluding coal; heat pumps and geothermal sources and other technologies meeting DNSH requirements to replace coal in system heating. The use of fuel derived from waste shall not be allowed. The threshold of 250g of CO₂/kwh of energy

generated shall not be exceeded for natural gas-powered installations. Beneficiaries shall include entities whose objective is the production of heat for municipal and residential purposes. Projects shall be selected on the basis of an open competition, taking into account the following criteria: (i) readiness and maturity of the project for implementation; (ii) the degree of reduction of CO₂ and/or PM_{2,5} and PM₁₀ emissions as result of the project; (iii) use of renewable energy sources; (iv) location in areas with the highest annual PM_{2,5} and PM₁₀ emissions.

The implementation of the investment shall be completed by 30 June 2026.

B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings

The objective of this investment shall be to improve air quality, including to reduce particulate matter emissions by replacing emissions-intensive heat sources and improving the energy efficiency of single- and multi-family dwellings. The investment shall be channelled via the Clean Air Priority Programme whose upgrade in line with long-term renovation strategy under the Energy Performance of Buildings Directive is one of the key measures under Reform B1.1 as described above (and the Thermo-Modernisation and Renovation Fund with respect to multi-family housing). The programme shall build on the experience of the Clean Air Priority Programme. Investments shall consist of (i) the replacement of inefficient sources for space and water heating; and/or (ii) thermal modernisation of residential buildings; and/or (iii) renewables energy installations (mainly photovoltaic panels, solar collectors). The level of support shall be adjusted to the purchasing power of final recipients. Support shall be deployed in line with the DNSH principle. Actions under this investment shall lead, on average, to at least 30% primary energy savings as well as significant decrease in GHG emissions. They shall also produce significant environmental and public health benefits, notably thanks to pollution reduction and in particular in areas where the EU air quality standards set by Directive 2008/50/EU are exceeded or risk being exceeded.

The implementation of the investment shall be completed by 30 June 2026.

B1.1.3 Thermal modernization of schools

The objective of this investment shall be to improve the energy efficiency of schools and to replace emission-intensive heat sources with cleaner alternatives. Actions under this investment may comprise, *inter alia*, renewable energy sources and adaptation of the functions, installations, and technical building systems to the current requirements of the legislation in force; deep renovations; modernisation of the space and water heating systems; installation of efficient lighting. Investments supported under the RRF shall lead on average to at least 30% primary energy savings. Projects shall be selected on the basis of an open competition, taking into account the following criteria: (i) readiness – maturity of the project for implementation; (ii) the degree of reduction of CO₂ and/or PM_{2,5} and PM₁₀ emissions; (iii) the degree of reduction in primary energy consumption; (iv) use of RES.

Complementary actions may also comprise educational activities, raising awareness among teachers, students, and local communities of air pollution, climate change mitigation and the use of renewables.

The implementation of the investment shall be completed by 30 June 2026.

B1.1.4 Strengthening the energy efficiency of local social activity facilities

The objective of this investment shall be to improve the energy efficiency of local social activity facilities and to replace emission-intensive heat sources with cleaner alternatives. Actions under this investment may comprise, *inter alia*, renewable energy sources and adaptation of the functions, installations, and technical building systems to the current requirements of the legislation in force; deep renovations; modernisation of the space and water heating systems; installation of efficient lighting. Investments shall lead on average to at least 30% primary energy savings within the targeted buildings. Projects shall be selected on the basis of an open competition, taking into account the following criteria: (i) readiness – maturity of the project for implementation; (ii) the degree of reduction of CO₂ and/or PM_{2.5} and/or PM₁₀ emissions; (iii) the degree of reduction in primary energy consumption; (iv) use renewable energy sources.

The implementation of the investment shall be completed by 30 June 2026.

B2.1 Improving the conditions for the development of hydrogen technologies and other decarbonised gases

The objective of the reform is to develop a market for renewable and low-carbon hydrogen and other alternative fuels.

The measure consists of two actions. The first aims at creating a regulatory framework for the functioning of hydrogen as an alternative fuel for transport by introducing provisions for the construction, safe operation and upgrading of hydrogen stations as well as the authorities responsible for authorising the use of hydrogen stations and their necessary technical inspection. It shall also set out a system to monitor and control the quality of hydrogen fuels used for the propulsion of vehicles. The implementation of the action was to be completed by 30 December 2021.

The second action aims at establishing hydrogen infrastructure and markets design aimed at supporting the market uptake of renewable and low-carbon hydrogen, integration of hydrogen production in other energy markets as well as existing and dedicated infrastructure aimed at creating regulatory predictability for investors and supporting the uptake of renewable and low-carbon hydrogen. The reforms shall comply with the 'Do no significant harm' Technical Guidance (2021/C 58/01) ensuring that the reform shall not make the use and marketing of renewable hydrogen more difficult than other sources of hydrogen. The reform shall aim at developing renewable hydrogen or hydrogen produced from electrolyzers and is expected to promote low carbon hydrogen that complies with the EU hydrogen strategy.

The implementation of this action shall be completed by 31 December 2023.

B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport

The objective of the investment is to create a hydrogen industry in Poland and to increase the use of renewable and low-carbon hydrogen. The projects shall be part of an integrated policy approach that puts the priority on renewable hydrogen. The investment shall consist of several projects. All the projects shall comply with the 'Do no significant harm' Technical Guidance (2021/C 58/01).

The first project shall entail investments into hydrogen refuelling stations including hydrogen bunkering. The bunkering facilities shall be open to all sources of hydrogen, however the quantity of bunkered grey hydrogen shall decrease over time.

The second part of the project shall support the development, construction and implementation of innovative hydrogen-powered transport units. The investment shall focus

on advancing, testing, demonstrating and commercialising different types of hydrogen fuel cell transport units to support Poland's efforts to decarbonise mobility. Commercialization of innovative types of hydrogen powered transport units shall contribute to the decarbonisation of hard-to-abate transportation. It shall cover both constructing new units as well as retrofitting the existing ones. The transport units shall not be dedicated to the transport of fossil fuels.

The third project shall entail the development of capacity of low-carbon hydrogen production and renewable hydrogen production facilities, including electrolyzers, with associated infrastructure. The project shall comply with the life-cycle GHG emissions savings requirement of 73,4% for hydrogen, resulting in life-cycle GHG emissions lower than 3 tCO₂eq/tH₂) and 70% for hydrogen-based synthetic fuels, relative to a fossil fuel comparator of 94g CO₂e/MJ, resulting in 2.256 tCO₂eq/tH₂, in analogy to the approach set out in Article 25(2) of and Annex V to Directive (EU) 2018/2001. Life-cycle GHG emissions savings shall be calculated using the methodology referred to in Article 28(5) of Directive (EU) 2018/2001 or, alternatively, using ISO 14067:2018 or ISO 14064-1:2018. Projects shall be selected on the basis of an open competition, taking into account the readiness and maturity of the project for implementation.

The implementation of the investment shall be completed by 30 June 2026.

B2.2 Improving the conditions for the development of renewable energy sources

The objective of the reform is to improve the regulatory environment for distributed and prosumer energy, develop the supply chain for offshore wind energy, implement energy management systems, increase the installed capacity of renewable energy sources and increase the share of energy from renewable energy sources.

The reform shall consist of amendments to the Renewable Energy Act ("RES Act") such as introducing better conditions for the operation of energy clusters, implementation of collective models of energy prosumers, implementation of provisions on new renewable energy communities, introduction of provisions specifying the principles of operations for one of models of renewable energy community and the adoption of the principles of running a business for the biomethane sector. The amendment shall also extend the duration of the RES support scheme until 31 December 2027.

The implementation of the action shall be completed by 30 March 2023.

The reform shall also amend the Act on investments in onshore wind power to facilitate the possibility of onshore wind energy investments in municipalities wishing to locate such installations by giving the municipal authorities more power to determine the location of individual investments and to allow the plant to be located closer to residential buildings than the current minimum distance of 10 times the height of the installation.

The implementation of the action shall be completed by 30 June 2022.

The above reform shall be accompanied by the entry into force of a regulation providing a plan of renewables auctions per technology (including for new onshore wind farms). The plan shall set a budget and a volume of electricity that shall be available for each competitive auction for the period 2022-2027. The regulation shall be published by 30 September 2022.

Furthermore, Poland shall progressively increase the installed capacity of onshore wind farms and photovoltaic installations to contribute to the green transition. The installed onshore wind and photovoltaic capacity shall reach 23,5 GW by 30 June 2026.

With regards to the development of offshore wind farms, the reform shall introduce detailed rules for payment of the concession fee to the President of the Energy Regulatory Office extended to entities involved in electricity generation in offshore wind farms.

The implementation of this action shall be completed by 30 June 2022.

Furthermore, reform shall also regulate the types of cash flows to be taken into consideration in calculating the adjusted price and the detailed method of calculating the adjusted price.

The implementation of this action shall be completed by 31 December 2022.

B2.2.1 Development of transmission networks, smart electricity infrastructure

The objective of the investment is to extend and modernise transmission networks in several regions, including the extension of connections between northern and southern parts of the country.

The investment shall consist of the development of 400 kV transmission lines with the relevant stations and the implementation of the data hub and power quality analyser on the electricity market. This measure is expected to allow a further development of the distribution network and facilitate the integration of renewables, in particular, offshore and onshore wind energy in northern Poland, and the development of photovoltaics, into the electricity system. The modernisation of transmission lines shall also contribute to reducing energy losses, leading to an overall reduction of emissions.

The implementation of the data hub shall be completed by 31 December 2024 and the implementation of the investment in transmission lines shall be completed by 30 June 2026.

B2.2.2 RES installations operated by energy communities

The objective of the investment is to incentivise the development of local renewable energy sources carried out by energy communities (including energy clusters, energy cooperatives and other energy communities resulting from the implementation of RED II), grouped prosumers (collective and virtual prosumers), with a particular focus on the role of local governments (in particular municipalities and associations of municipalities) forming such local energy communities and communities.

The investment shall be implemented through a pre-investment and investment support programme covering existing energy communities or entities intending to establish such communities.

The pre-investment support programme shall consist of developing an optimal legal/organisational format and business model for launching or developing an energy community and preparing the necessary analyses and documentation for the preparation of the investment. This programme shall support, inter alia, local energy market development strategies; analyses of local energy demand and supply; inventories of local energy resources (infrastructures) and their potential (such as capacity to provide energy connections); feasibility studies, business plans, due diligence documents; technical documentation and construction projects.

The investment support programme shall consist of implementing the advanced technical and legal systems to promote energy services in the most advanced energy communities. As part of the investment support, the financing shall cover, inter alia, new technologies targeting renewables electricity production; complementary infrastructure for technologies other than electricity; associated infrastructure (such as network components and meters); energy storage facilities and IT software for energy community management and energy optimisation.

The implementation of the pre-investment support shall be completed by 30 March 2025 and of the investment shall be completed by 30 June 2026.

B2.2.3 Construction of offshore terminal infrastructure

The objective of this investment is to mitigate the risk of late implementation of offshore wind farm projects and to ensure proper operation and safety of offshore wind farms.

The investment shall consist of two projects. The first project shall entail the construction of a deep-water installation terminal, with an area of approx. 30 ha, which shall enable two installation units to be operated simultaneously. The second project shall entail the reconstruction of ports and access to them from the sea (including breakwaters). Two service terminals for offshore wind that constitute key infrastructure for the maintenance of offshore installations shall be carried out in the ports in Łeba and Ustka.

The implementation of the investment in offshore installation terminal shall be completed by 30 June 2025. The implementation of the investment in offshore service terminals in Łeba and Ustka shall be completed by 30 June 2026.

B3.1 Support of sustainable water and wastewater management in rural areas

The objective of the reform is to ensure that alternative water and wastewater management solutions, such as individual treatment plants or septic tanks, shall be properly monitored, maintained, and controlled to prevent deterioration.

The reform shall consist of introducing the obligation for municipalities to use instruments to prevent improper disposal of sewage and the mechanism of the so-called substitute performance, i.e. organising the emptying of septic tanks by the municipality applicable to property owners who have not concluded contracts for emptying septic tanks. It shall also introduce an obligation to carry out regular controls and introduce an effective enforcement mechanism.

The implementation of this action shall be completed by 30 June 2022.

The reform shall also establish territorial criteria for selecting beneficiaries of support for water supply or waste-water investments in rural areas. The selection criteria shall give priority to municipalities with the least ability to finance investments from their own resources and to projects with the greatest potential of mitigating existing negative environmental impacts.

The implementation of this action was to be completed by 31 December 2021.

B3.1.1 Investments in sustainable water and waste water management in rural areas

The objective of this investment is to increase the availability of water and sewerage infrastructure in rural areas with the biggest deficits and to improve the quality of life in rural areas through the development of water and sewerage infrastructure. The investment also aims to increase the investment potential of rural areas.

The investment shall consist of supporting new connections to water infrastructure, including the construction, extension or modernisation of water supply or wastewater disposal systems in rural areas and shall lead to an increase in rural population using the water supply and wastewater disposal infrastructure. Activities related to the promotion of rational water and waste-water management shall also be supported. As part of the investment, it shall be

possible to co-finance infrastructure using digital solutions, such as the installation/replacement of water meters for remote-reading equipment, and the creation of electronic systems for water and canal management. Alternative solutions for water supply and wastewater treatment infrastructure in rural areas (such as combining collective system with septic tanks, or individual plants) shall be considered.

The implementation of the investment shall be completed by 31 December 2025.

B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
B1G	B1.1 Clean air and energy efficiency	Milestone	Entry into force of an act amending the Energy Efficiency Act and associated legislative acts	Provision in the act amending the Energy Efficiency Act and the associated legislative acts indicating its entry into force				Q1	2022	Entry into force of an act amending the Energy Efficiency Act and the associated legislative acts (law on supporting thermo-modernisation and renovations and on the central emission register of buildings; the law on financial support for the creation of residential premises for rent; the law on some types of housing support; and the law on renewable energy sources) which shall enable entities covered by the Energy Efficiency Obligation Scheme to settle energy saving obligations within the framework of so-called subsidy programmes. It shall clarify the possibilities of using Energy Performance Contracts in the public sector. It shall enable Energy Services Companies to participate in the Energy Efficiency Obligation Schemes.
B2G	B1.1 Clean air and energy efficiency	Milestone	Update of the “Clean Air” Priority Programme	Adoption of amendments to the “Clean Air” Priority Programme by the National Fund for Environment Protection, including provisions for support targeted at (a) higher-income households notably with the involvement of the				Q1	2023	The National Fund for Environment Protection shall adopt amendments to the “Clean Air” Priority Programme in line with long-term renovation strategy under the Energy Performance of Buildings Directive, including dedicated support targeted at (a) higher-income households notably with the involvement of the banking sector providing loans combined with grants; (b) low-income households; (c) lowest-income households (in line with the applicable definitions under the “Clean Air” Priority Programme. By 31 March 2023, the provisions

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
				banking sector providing loans combined with grants; (b) low-income households; (c) lowest-income households.						providing targeted support to the mentioned groups shall be fully operational and recipients shall have access to this support.
B3G	B1.1 Clean air and energy efficiency	Milestone	Update of the National Air Protection Programme	Adoption of the updated National Air Protection Programme by the Minister of Climate and Environment				Q4	2021	The National Air Protection Program shall define new tasks to be implemented by 2025, 2030 and 2040 at the national, provincial and municipal levels: (1) Establishing standards for low-emission zones for municipalities where the permissible NO2 levels have been exceeded; (2) Commitment of 'voivodeships' to adopt anti-smog resolutions in towns where certain air quality standards are not respected; (3) financial support to regional and local authorities for the promotion of the implementation of activities specified in the anti-smog resolutions and the preparation of information points for residents applying for funding under the Clean Air Priority Program; (4) Introduction of the task consisting in strengthening the provisions on the control system for the enforcement of the implementation of tasks specified in anti-smog resolutions; (5) Exclusion of new coal-fired heaters from public support programmes as of 1 January 2022.

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
B4G	B1.1 Clean air and energy efficiency	Milestone	Entry into force of an amendment to the Regulation by the Minister of Climate and Environment on quality standards for solid fuels	Provision in the amendment to the Regulation on quality standards for solid fuel indicating its entry into force				Q4	2022	On the basis of recommendations on necessary or recommended legislative changes prepared by an inter-ministerial team and followed by a consultation of the proposals with NGO's and coal sector chambers, the amendment to the regulation on coal-based solid fuels shall enter into force by 31 December 2022. It shall ban producers of coal solid fuels from using misleading branding.
B5G	B1.1 Clean air and energy efficiency	Milestone	Entry into force of the regulation setting quality standards for biomass solid fuels	Provision in the Regulation on quality standards for biomass solid fuels indicating its entry into force				Q3	2023	The regulation shall set quality standards for biomass solid fuels, including wood pellets. The regulation shall ban producers of biomass solid fuels from using misleading branding.
B6G	B1.1.1 Investments in heat sources in district heating systems	Target	T1 - Heat sources in district heating systems		Number	0	45	Q4	2024	Number of heat sources under signed contracts meeting DNSH requirements. The supported technologies shall include natural-gas cogeneration units, RES (solar, geothermal, bioenergy), and heat pumps. The threshold of 250g of CO2/kWh of energy generated shall not be exceeded for any of the supported installations. In case of installations using bioenergy, compliance with Directive 2018/2001 RES shall be ensured. It shall also be ensured that biogas / biomethane operated by the pipeline meets the criteria of sustainable development and the reduction of greenhouse gas emissions (in accordance with the RES Directive).
B7G	B1.1.1 Investments in heat sources in district heating systems	Target	T2 - Heat sources in district heating systems		Number	45	90	Q2	2026	The target refers to the number of heat sources under signed contracts meeting the requirements set out for item B6G.
B8G	B1.1.2 Replacement	Target	T1 - Heat source		Number	0	250 000	Q3	2023	Number of installed heat sources

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
	of heat sources and improvement of energy efficiency in residential buildings		replacement in single-family buildings							fulfilling DNSH requirements (under signed contacts). Investments shall be supported under the Clean Air Priority Programme and the Thermo-modernisation Fund, in line with the long-term renovation strategy under the Energy Performance of Buildings Directive. It shall be ensured that the level of primary energy savings at the level of the programme is at least 30%. Support to gas-fired boilers shall be deployed in line with the Commission Technical Guidance on DNSH (2021/C58/021), in particular it shall lead to a significant decrease in GHG emissions and a significant improvement of the environment (notably due to pollution reduction) and public health. In addition, it shall be ensured gas-fired boilers represent not more than 40% of the overall number of heat source replacements under this measure.
B9G	B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings	Target	T2 - Heat source replacement in single-family buildings		Number	250 000	791 200	Q2	2026	Number of installed heat sources fulfilling requirements set out for item B8G.
B10G	B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings	Target	T1 - Thermo-modernisation and installation of renewable energy sources in residential buildings (single and multi-family buildings)		Number	0	244 952	Q3	2023	Number of thermo-modernised single-family houses and dwellings in multi-family houses fulfilling energy efficiency standards under supported projects. Investments shall be supported under the Clean Air Priority Programme and the Thermo-Modernisation and Renovation Fund. It shall be ensured that the level of primary energy savings at the level of the programme is at least 30%. Support shall be deployed in line with Commission Technical Guidance on DNSH (2021/C58/021). In particular, it shall be

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										ensured that at least 70% of building waste generated under the programme is reused or recycled.
B11G	B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings	Target	T2 - Thermo-modernisation and installation of renewable energy sources in residential buildings (single and multi-family buildings)		Number	244 952	700 390	Q2	2026	Number of thermo-modernised single-family houses and dwellings in multi-family houses fulfilling requirements set out for item B10G.
B12G	B1.1.3 Thermal modernisation of schools	Target	Modernized or exchanged heat sources fulfilling DNSH requirements in buildings of educational institutions (under signed contracts)		Number	0	90	Q2	2026	Number of replaced or modernised heat sources in buildings of educational institutions fulfilling DNSH requirements (under signed contracts). It shall be ensured that the level of primary energy savings at the level of the programme is at least 30%. Support to gas-fired boilers shall be deployed in line with Commission Technical Guidance on DNSH (2021/C58/021). In addition, it shall be ensured that gas-fired boilers represent not more than 20% of the overall number of heat source replacements under this measure.
B13G	B1.1.3 Thermal modernisation of schools	Target	Thermo-modernized buildings of educational institutions (under signed contracts)		Number	0	322	Q2	2026	Number of buildings of educational institutions supported for investments in energy modernisation and/or with application of modern installation solutions, including: renewable energy sources and adjustment of functions, installations and technical systems of the buildings to the current requirements of the applicable law. The implemented investments shall allow for energy savings at the level of the entire investment program of at least 30%.

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
B14G	B1.1.4 Strengthening the energy efficiency of local social activity facilities	Target	Social activity facilities with replaced inefficient solid fuel heat sources to modern heat sources fulfilling DNSH requirements		Number	0	21	Q2	2026	Number of social activity facilities that have replaced inefficient solid fuel heat sources with modern heat sources meeting DNSH requirements (under signed contracts). The implemented investments shall ensure energy savings at the level of the entire investment program of at least 30%. In addition, it shall be ensured that gas-fired boilers represent not more than 20% of the overall number of heat source replacements under this measure.
B15G	B1.1.4 Strengthening the energy efficiency of local social activity facilities	Target	Thermo-modernised facilities of social activity		Number	0	85	Q2	2026	Number of thermo-modernised community facilities (libraries and community centres). The implemented investments shall ensure energy savings at the level of the entire investment programme of at least 30%. Support to gas-fired boilers shall be deployed in line with Commission Technical Guidance on DNSH (2021/C58/021). In addition, it shall be ensured that gas-fired boilers represent not more than 20% of the overall number of heat source replacements under this measure.
B16G	B2.1 Improving the conditions for the development of hydrogen technologies and other decarbonised gases	Milestone	Entry into force of acts amending the legislative acts for hydrogen as an alternative fuel for transport	Provisions in the amending legislative acts indicating their entry into force				Q4	2021	1. Amendment to the Electromobility Act (January 11, 2018; Dz. U. z 2018 r. poz. 317) shall introduce the definitions for the hydrogen refuelling infrastructure; set the general safety and technical requirements for the refuelling stations (according to the Alternative Fuels Infrastructure Directive) and determine the procedures and competent authorities relevant for the inspection of this infrastructure. 2. Amendment to the Act on the system of monitoring and controlling quality of fuels (August 25, 2006; Dz.U. Nr 169, poz. 1200) shall introduce the notion of

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										hydrogen following the combined nomenclature CN 2804 10 00 code; sets the procedures of monitoring and controlling the quality of hydrogen; determines relevant authorities. The notion of hydrogen shall be in compliance with the 'Do no significant harm' Technical Guidance (2021/C 58/01). The reform shall not make the use and marketing of renewable hydrogen more difficult than other sources of hydrogen. The reform shall primarily aim at developing renewable hydrogen or hydrogen produced from electrolyzers.
B17G	B2.1 Improving the conditions for the development of hydrogen technologies and other decarbonised gases	Milestone	Entry into force of the law laying down rules for hydrogen	Provision in the law indicating its entry into force				Q4	2023	Entry into force of the law establishing hydrogen infrastructure and markets design aimed at supporting the market uptake of renewable and low-carbon hydrogen, integration of hydrogen production in other energy markets as well as existing and dedicated infrastructure aimed at creating regulatory predictability for investors and supporting the uptake of renewable and low-carbon hydrogen. The law shall be in compliance with the 'Do no significant harm' Technical Guidance (2021/C 58/01). The reform shall not make the use and marketing of renewable hydrogen more difficult than other sources of hydrogen. The reform shall primarily aim at developing renewable hydrogen or hydrogen produced from electrolyzers. The reform shall be in line with the EU hydrogen strategy.
B18G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Environmental permits issued for hydrogen refuelling stations		Number	0	10	Q3	2023	Number of environmental permits issued for hydrogen refuelling stations.

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
B19G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Entry into operation of hydrogen refuelling stations		Number	0	25	Q2	2026	Number of hydrogen refuelling stations including hydrogen bunkering open to the public as part of an integrated policy approach that puts the priority on renewable hydrogen and in compliance with the 'Do no significant harm' Technical Guidance (2021/C 58/01). The bunkering shall be open to all sources of hydrogen but the quantity of bunkered grey hydrogen shall decrease over time.
B20G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Research and innovation projects on innovative hydrogen powered transport units		Number	0	3	Q2	2026	Number of innovative projects into hydrogen powered transport units developed. The project shall support the development, construction and implementation as well as commercialisation of innovative hydrogen-powered transport units. The investment shall support and develop a Polish potential to become a provider of hydrogen-fuelled ships/trains/buses for sustainable transport. Apart from research and development, scaling-up of production shall be supported. The scope of investment includes a broad range of activities for advancing, testing, demonstrating and commercialising different types of hydrogen fuel cell transport units. It shall cover both constructing new units as well as retrofitting the existing ones. The projects shall comply with the 'Do no significant harm' Technical Guidance (2021/C 58/01). Transport units shall not be dedicated to the transport of fossil fuels.
B21G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Capacity of low-carbon and renewable hydrogen production facilities, including electrolyzers, with associated		Number	0	320	Q2	2026	Capacity of low-carbon and renewable hydrogen production facilities, including electrolyzers, with associated infrastructure (320 MW). The investment related to low-carbon and renewable hydrogen shall comply with the life-cycle GHG emissions

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
			infrastructure							savings requirement of 73,4% for hydrogen, resulting in life-cycle GHG emissions lower than 3 tCO ₂ eq/tH ₂) and 70% for hydrogen-based synthetic fuels, relative to a fossil fuel comparator of 94g CO ₂ e/MJ, resulting in 2.256 tCO ₂ eq/tH ₂ , in analogy to the approach set out in Article 25(2) of and Annex V to Directive (EU) 2018/2001. Life-cycle GHG emissions savings shall be calculated using the methodology referred to in Article 28(5) of Directive (EU) 2018/2001 or, alternatively, using ISO 14067:2018 or ISO 14064-1:2018.
B22G	B2.2 Improving the conditions for the development of renewable energy sources	Milestone	Entry into force of acts amending the legislative framework for renewable energy communities and biomethane: Amendments to the RES Act, Amendments of legislation concerning energy market, and entry into force of a Regulation to the RES Act	Provisions in the amending acts and in the regulation indicating their entry into force				Q1	2023	Adoption and entry into force of amending acts and regulation including: 1. Amendments to the Act of 20 February 2015 on renewable energy sources (RES Act) shall reformulate principles of operation for energy clusters (better conditions to establish such entities) by providing: rules, definitions or notions regarding: the scope, agreements, subject matter of energy cluster, registry of energy cluster or cooperation between individual members of the energy cluster and system operators. 2. Amendments to the RES Act shall implement collective models of energy prosumers. 3. Amendments of legislative acts concerning energy market shall implement provisions on new renewable energy communities, which shall ensure that final customers, in particular household

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										<p>customers, are entitled to participate in a renewable energy community in line with Directive (EU) 2018/2001 while maintaining their rights and/or obligations as final customers, and without being subject to unjustified or discriminatory conditions or procedures that would prevent their participation in a renewable energy community.</p> <p>4. Regulation to the RES Act regarding the principles of energy accounting for energy cooperatives shall introduce provisions specifying principles of operations for one of models of renewable energy community.</p> <p>5. Amendments to the RES Act –that shall lay down rules governing the running of a business for the biomethane sector.</p>
B23G	B2.2 Improving the conditions for the development of renewable energy sources	Milestone	Entry into force of an act amending the Act on investments in onshore wind farms	Provision in the act amending the Act on investments in onshore wind farms indicating its entry into force				Q2	2022	<p>Entry into force of an amending act which shall remove formal barriers to investments in onshore infrastructure. The amendment shall make the distance rule (minimum distance from windmill to residential building - 10 times windmill' height, 10H) more flexible by giving more power to determine minimum distances to municipalities as part of the spatial/zoning procedure and to regional environmental protection offices as part of the procedure for issuing decisions on environmental conditions.</p> <p>The general 10H distance rule shall be maintained, but the possibility of deviations from it shall be enabled and that more power to determine the location of wind farms shall be given to individual municipalities as part of the local planning</p>

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										procedure (zoning/spatial procedure). The local plan shall be able to define a shorter distance of the wind farm from the residential building, taking into account the range of the wind farms' impacts based on the environmental impact forecast made under such a plan.
B24G	B2.2 Improving the conditions for the development of renewable energy sources	Milestone	Entry into force of a regulation laying down a plan of renewables auctions for the years 2022 - 2027	Provision in the regulation indicating its entry into force				Q3	2022	Entry into force of a regulation laying down a plan of renewables auctions per technology (including for new onshore wind farms). The plan shall set a budget and a volume of electricity that shall be available through competitive auctions for the period 2022-2027.
B25G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T1 - Installed capacity of onshore wind and photovoltaic installations (in GW)		Number	11,2	18	Q4	2023	Total installed capacity (in GW) of onshore wind and photovoltaic installations.
B26G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T2 - Installed capacity of onshore wind and photovoltaic installations (in GW)		Number	18	20	Q4	2024	Total installed capacity (in GW) of onshore wind and photovoltaic installations.
B27G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T3 - Installed capacity of onshore wind and photovoltaic installations (in GW)		Number	20	23	Q4	2025	Total installed capacity (in GW) of onshore wind and photovoltaic installations.
B28G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T4 - Installed capacity of onshore wind and photovoltaic installations (in GW)		Number	23	23,5	Q2	2026	Total installed capacity (in GW) of onshore wind and photovoltaic installations.
B29G	B2.2 Improving the conditions for the development of renewable energy	Milestone	Entry into force of the implementing regulation following from the Act of 17	Provision in the regulation indicating its entry into force				Q2	2022	The following implementing regulation shall enter into force: Regulation of the Council of Ministers on the concession fee - Pursuant to Article

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
	sources		December 2020 on the promotion of electricity generation in offshore wind farms							34(2a) of the Energy Law, the obligation to pay the concession fee to the President of the Energy Regulatory Office also extended to energy enterprises performing economic activity in the field of electricity generation in offshore wind farms, referred to in the Act of 17 December 2020 on the promotion of electricity generation in offshore wind farms. In addition, in connection with the amendment of the Energy Law of 15 April 2021, an activity that shall also be covered by the concession fee is the storage of electricity.
B30G	B2.2 Improving the conditions for the development of renewable energy sources	Milestone	Entry into force of the implementing regulation following from the Act of 17 December 2020 on the promotion of electricity generation in offshore wind farms	Provision in the regulation indicating its entry into force				Q4	2022	Regulation of the Minister of Climate and Environment on the types of cash flows to be taken into consideration in calculating the adjusted price and the detailed method of calculating the adjusted price. The regulation shall specify the types of cash flows to be taken into account in calculating the adjusted price and the detailed method of calculating the adjusted price. During the process, such factors as investment aid, the date of granting investment aid and the rules of granting public aid in the area of environmental protection and energy shall be taken into account. The expected effect is to facilitate the above procedure for offshore wind farm investors.
B31G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Target	T1 - Length of newly built or modernised power transmission network (km)		Number	0	70	Q4	2024	Number of kilometres of newly built or modernised sections of power transmission network projects (400kV). The length of each section shall be calculated only once (regardless of whether it is a single or double-circuit line).
B32G	B2.2.1 Development of transmission networks, smart	Target	T2 - Length of newly built or modernised power transmission		Number	70	190	Q4	2025	Number of kilometres of newly built or modernised sections of power transmission network projects (400kV). The length of

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
	electricity infrastructure		network (km)							each section shall be calculated only once (regardless of whether it is a single or double-circuit line).
B33G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Target	T3 - Length of newly built or modernised power transmission network (km)		Number	190	320	Q2	2026	Number of kilometres of newly built or modernised sections of power transmission network projects (400kV). The length of each section shall be calculated only once (regardless of whether it is a single or double-circuit line).
B34G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Milestone	Implementation of the data hub on the electricity market (OIRE/CSIRE)	Entry into operation				Q4	2024	Entry into operation and installation of one data hub and power quality analyser on the electricity market (OIRE/CSIRE).
B35G	B2.2.2 RES installations operated by energy communities	Target	Entities supported within the pre-investment part		Number	0	139	Q1	2025	Number of grant agreements signed with beneficiaries that shall be selected via open, competitive and transparent call for proposals. The allocation of projects to the beneficiary entities shall ensure a balanced distribution between entities across the country, considering population and geographical coverage. As at the date of signing the grant agreements the beneficiaries shall belong to entities that are able to establish a renewable energy community as defined in Directive (EU) 2018/2001 (recast) on the promotion of the use of energy from renewable sources and other energy communities defined in Polish law (including energy clusters “ <i>klaster energii</i> ” and energy cooperatives “ <i>spółdzielnia energetyczna</i> ”).
B36G	B2.2.2 RES installations operated by energy communities	Target	Energy communities supported within the investment part		Number	0	10	Q4	2025	Number of grant agreements signed with renewable energy communities as defined in Directive (EU) 2018/2001 (recast) on the promotion of the use of energy from renewable sources and other energy communities defined in Polish law

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										(including energy clusters “ <i>klaster energii</i> ” and energy cooperatives “ <i>spółdzielnia energetyczna</i> ”). The beneficiary entities shall be selected via open, transparent and competitive calls for proposals. The allocation of projects to the beneficiary entities shall ensure a balanced distribution between entities across the country, considering population and geographical coverage.
B37G	B2.2.3 Construction of offshore terminal infrastructure	Milestone	Construction of an offshore installation terminal	Entry into operation				Q2	2025	Entry into operation of a new port pier. The total area of storage and operational-storage pavements shall be 33,6ha. Within the pre-assembly area the surface shall have a bearing capacity that equals 50T/m ² and a storage area of 20T/m ² . The ro-ro ramp shall also be built. The storage area of the terminal shall provide services for two independent offshore wind farm developers. The division of the outer pier shall have the possibility to implement two berths for jack-up vessels. The total length of the quays in the offshore wind terminal shall be over 1 000 meters. The offshore wind terminal located on the Outer Port pier shall have optimal hydro-technical and navigation conditions for offshore vessels. Port channel clearance shall ensure efficiency and safety of the ships’ navigation. The main channel shall be 280 meters wide in the narrowest point.
B38G	B2.2.3 Construction of offshore terminal infrastructure	Target	Construction of an offshore service terminal in Łeba and Ustka		Number	0	2	Q2	2026	Completion of the construction of two offshore service terminals (Ustka and Łeba). The investment in Ustka shall consist in the construction of an approach waterway track with a depth of 8 m, with the possibility of deepening to 9-9,5 m. The investment harbour basin shall be 12,7 ha. In addition, it is planned to rebuild the

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										eastern breakwater and build a new western breakwater approximately 1400 m long. The planned area of the terminal shall be approximately 14 ha, with the construction of a quay at the terminal with a length of approximately 400 m. The investment at Leba shall involve the construction of an approach waterway track with a depth of 3,5-4 m. An expert assessment of the condition of the structures along the track shall be carried out. In addition, a new eastern breakwater, at least 220 m long, shall be built to ensure a safe entrance to the port. A new harbour basin shall be built on land and a quay inside the basin with a length of about 260 m.
B39G	B3.1 Support sustainable water and wastewater management in rural areas	Milestone	Development of rules for the territorialisation of support for water supply or sewage investments RRP in rural areas	Adoption of guidelines by Minister of Agriculture and Rural Development.				Q4	2021	Adoption of territorial criteria for selecting beneficiaries. The selection criteria shall give priority to municipalities with the least ability to finance investments from their own resources. Voivodeship self-governments shall be involved in the process of defining the criteria for selecting beneficiaries.
B40G	B3.1 Support sustainable water and wastewater management in rural areas	Milestone	Entry into force of legal act establishing an obligation to carry out regular monitoring and control of appropriate individual systems	Provision in the legal act indicating its entry into force				Q2	2022	Entry into force of a legal act which shall introduce the obligation for communes to monitor and control the disposal of sewage and use instruments to prevent improper disposal, including the mechanism of so-called substitute performance, i.e. organising the emptying of septic tanks by the commune for property owners who have not concluded contracts for emptying septic tanks.
B41G	B3.1.1 Investments in wastewater treatment systems and water supply in rural areas	Target	Additional connections of rural population in scope of water infrastructure		Number	0	33 990	Q4	2025	Additional connections of rural population using the water supply and wastewater treatment infrastructure in communes that fully comply with the amended rules on wastewater disposal. Support shall be

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										<p>directed to areas whose investment capacity has been limited as a result of the COVID-19 pandemic outside agglomerations within the meaning of art. 86 of the Water Law Act and to wastewater treatment infrastructure projects with the greatest potential to reduce existing negative environmental impacts. The beneficiaries of the investment shall be selected through an open and transparent competition. Alternative solutions for water supply and wastewater treatment infrastructure in rural areas (such as combining collective systems with septic tanks, or individual plants) shall be considered. Water abstraction shall be avoided where the concerned water bodies (surface or ground waters) are, or projected (in the context of intensifying climate change) to be in less than good status or potential.</p>

B.3. Description of the reforms and investments for the loan

B1.2 Facilitating the energy saving obligation for energy companies

The objective of the reform is to simplify and broaden the Energy Efficiency Obligation scheme.

The reform shall be implemented by creating a standard set of reference values for different types of energy-saving measures. Such measures shall no longer need to be audited which shall facilitate the participation in the scheme of smaller entities. Another element of the reform shall be the inclusion in the Energy Efficiency Obligation scheme of fuel companies placing liquid fuels used for transport on the market. These companies shall implement energy efficiency improvement projects, cancel an appropriate number of white certificates, or pay a substitute fee under certain conditions. As a result, demand for white certificates is expected to increase, which shall increase the level of turnover in the market and meet the increased energy efficiency targets.

The implementation of the reform shall be completed by 30 June 2022.

B1.2.1 Energy efficiency and RES in companies – investments with the highest greenhouse gas reduction potential

The reform shall aim at reducing final energy consumption and greenhouse gas emissions of companies.

The implementation of green solutions in enterprises shall focus on improving industrial and energy processes in order to improve energy efficiency and reduce energy intensity, leading to a reduction - and a higher efficiency - of energy consumption, together with investments in renewable and low-carbon energy sources in enterprises. The investment shall, in particular, support (i) the construction, extension or modernisation of existing industrial and production installations, industrial equipment and electricity installations aimed at improving their energy efficiency; (ii) the construction and installation of own renewable energy sources in companies, including wind turbines, solar collectors, photovoltaic panels, geothermal systems, heat pumps; (iii) the construction of energy storage facilities in companies in connection with the production of energy from renewable sources; (iv) building/upgrading own (internal) low-carbon energy sources, including cogeneration; (v) increasing the share of low- or zero-emission fuels in manufacturing processes, respecting the highest emission standards; (vi) replacing low-energy heat sources using fuels (solid, liquid, gas) or electricity with more energy efficient sources; (vii) thermo-modernisation of buildings and facilities used in industrial processes. Projects shall be selected on the basis of an open competition, taking into account the following criteria: (i) readiness – maturity of the project for implementation; (ii) consistency with existing plans for climate neutrality; (iii) the degree of reduction of CO₂ and PM_{2,5} and PM₁₀ emissions; (iv) the degree of reduction in primary energy consumption.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C 58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use¹⁶; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant

¹⁶ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C 58/01).

benchmarks¹⁷; (iii) activities related to waste landfills, incinerators¹⁸ and mechanical biological treatment plants¹⁹; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 31 December 2023.

B2.3 Support for investment in offshore wind farms

The objective of the reform is to ensure the effective implementation and further development of offshore wind energy.

The reform shall consist of introducing detailed requirements for power output plant components and for offshore power station components as well as construction requirements for offshore power station components, while taking into account the safety and reliability of the offshore power output and power station assembly. A regulation shall enter into force laying down the maximum price per 1 MWh (expressed in PLN) that may be indicated in bids submitted by generators in an auction. The implementation of the reform shall be completed by 30 June 2024.

The objective of the reform is also to reduce the impact of the allocation constraints on the electricity market results. The reform shall consist of the implementation by the Transmission System Operator of an explicit procurement of balancing capacities (reserves) before the single day ahead coupling (SDAC) in line with the recommendation by the ACER proposing to decrease the level of allocation constraints applied. The implementation of the reform shall be completed by 31 December 2023.

The reform shall be accompanied by auctions for electricity generation from offshore wind farms. The auctions shall be organised by 31 December 2025.

B2.3.1 Construction of offshore wind farms

The implementation of offshore projects in the Baltic aims to contribute to gradually increasing the share of renewables and zero-emission sources in Poland's energy system.

The investment shall support projects related to the construction of offshore wind farms. Offshore wind farms shall contribute to stabilising the operation of the electricity grid by ensuring higher energy generation stability compared to other types of RES installations such as photovoltaics and onshore wind farms. The total rated capacity of offshore wind installations installed as a result of the investment shall be 1500 MW.

¹⁷ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁸ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁹ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

Beneficiaries shall be selected in an open, transparent and non-discriminatory call for proposals available to all projects participating in Phase I (support granted outside of the auction system), which shall be subject to evaluation. The support shall be granted to more than one beneficiary to enable effective competition on the offshore wind market. The criteria for project selection shall include maturity and readiness for completion of projects by 30 June 2026, implementation schedule and deadlines for achieving the assumed indicators, or installed capacity as a result of project implementation (MW).

The implementation of the investment shall be completed by 30 June 2026.

B2.4 Legal framework for the development of energy storage facilities

The objective of the reform is to remove existing legal barriers to the development of storage technologies and to create a stable legal environment for the operation of storage business.

The reform shall, inter alia, exempt electricity storage from the tariff obligation and remove double charging of network charges. It shall make the obligation to obtain a concession/entry in the register dependent on the total installed electricity storage capacity, irrespective of its capacity. The proposed tariffs framework for storage shall be non-discriminatory and cost-reflective.

The implementation of the reform was to be completed by 30 June 2021.

B2.4.1 Energy storage systems

The objective of the investment is to ensure continuity of supply to consumers and to increase the efficiency of the use of RES sources through investments in technologies facilitating the balancing of electricity in the electricity system.

The investment shall consist of the modernisation of the existing pumped hydroelectric energy storage. It shall involve adapting installations to current and future regulatory and market needs to ensure a viable operation of the power plant. It shall consist of the modernisation of upper reservoir (refurbishment of bituminous concrete upstream face), upper water intake and derivative tunnels and at least three out of four hydro-generators of the storage and pumped power station. The investment is expected to result in an increase in the availability and efficiency of the plant.

The investment shall also finance the purchase and installation of a back-up electricity storage facility with a capacity of 4-5 kWh each.

The implementation of the investment shall be completed by 30 June 2026.

B3.2 Support for environmental restoration and protection against hazardous substances

The objective of the reform is to reduce the negative environmental impact of large-scale degraded land and allow for coordinated neutralisation of threats in Polish marine areas.

The reform entails removing organisational and legal barriers to the comprehensive elimination of the negative environmental impact of large-scale post-industrial areas. It shall focus on four independent field components (different locations and scopes of works): 1) former "Tarnowskie Góry" Chemical Plant in Tarnowskie Góry; 2) former "Zachem" Chemical Plant in Bydgoszcz; 3) "Organika-Azot" Plant in Jaworzno; 4) former "Boruta" Dyes Industry Plant in Zgierz.

The legislation enacting these changes shall enter into force by 31 December 2022.

The second part of the reform shall consist of defining rules dedicated to hazardous materials sunk in the Baltic Sea aimed at increasing safety for human health and condition of the environment. It shall describe the competences of public authorities in the provisions of law; identify leading and cooperating entities in matters related to the deposition of hazardous materials in the maritime areas; develop a detailed action plan of public administration and supervised and subordinate units on the subject of hazardous materials deposited in marine areas, along with an indication of the entities responsible for the implementation of individual tasks; and introduce legal changes to enable monitoring, identification and possible extraction and disposal of hazardous materials.

The legislation enacting these changes shall enter into force by 30 September 2022.

B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea

The objective of the investment is to remove the threat to human health and life posed by large-scale brownfield sites, to minimise their negative impact on the natural environment and to recover them for re-use while respecting the polluter pays principle and the Environmental Liability Directive 2004/35/EC. The investment is also expected to contribute to addressing the risk arising from pollution and hazardous materials in Polish marine areas.

The investment shall consist of the development of research and studies leading to preparation of full investment documentation for pre-defined locations for which significant problems with the presence of pollutants or hazardous substances on a large-scale area exist. It shall entail the development of field research, studies and land inventory, as a preliminary but fundamental step leading to preparation of full investment documentation in next steps of the programme.

The implementation of the investment shall be completed by 30 June 2026.

The investment shall support land remediation and neutralisation of hazardous substances, preparation of land for investments by modernisation of hard infrastructure as well as buildings revitalisation in Huta Sendzimira.

The investment shall also support reconnaissance and measurement campaigns in the Baltic Sea as well as an analysis of the obtained data as a necessary step leading to the preparation of a complete documentation for neutralisation plans.

The implementation of the investment shall be completed by 31 December 2025.

B3.3 Support for the sustainable management of water resources in agriculture and rural areas

The objective of the reform is to improve the conditions for investment in rural areas in water management and resource efficiency. The reform shall contribute to increasing the resilience of agriculture to drought and flood prevention in agricultural areas; improving water efficiency by properly regulating water relations in agricultural areas and reducing run-off; and increasing water retention.

The reform shall consist of amendments to national legislation needed to improve the conditions for resilient water management in agriculture and rural areas. The amendments shall facilitate the preparation and implementation of investments regarding water retention and stopping its draining from agricultural lands, including in particular investments related to

the reconstruction and rebuilding of drainage devices so that they fulfil the function of retention and thus protect agricultural land against drought and limit the risk of floods.

The reform shall comply with the requirements laid down in the 'Do no significant harm' Technical Guidance (2021/C 58/01), in particular, it shall ensure compliance with the EU environmental legislation, including the EIA Directive (2011/92/EU) and the Water Framework Directive (2000/60/EC).

The amendments shall not lead to any deterioration of the level of compliance with EU environmental legislation, in particular with regards to investments that are considered significant or potentially significant investments pursuant to the Council of Ministers' regulation on projects likely to have a significant impact on the environment and investments in or affecting Natura 2000 areas. Moreover, the changes shall not alter the currently binding rules on water intake.

The implementation of the reform shall be completed by 30 June 2022.

B3.3.1 Investments in increasing the potential of sustainable water management in rural areas

The objective of the investment is to support investments in rural areas in improving water management and resource efficiency.

The investment shall contribute to increasing the resilience of agriculture to drought and flood prevention in agricultural areas; improving water efficiency by properly regulating water relations in agricultural areas and reducing run-off; and increasing water retention, provided their need and nature is justified appropriately. Priority shall be given to climate-change-resilient and nature-based solutions. Projects under this measure shall be subject to environmental impact assessment (EIA) and shall comply with the requirements laid down in the Technical Guidance on DNSH (2021/C 58/01). Compliance with the EU environmental legislation, including the EIA Directive (2011/92/EU) and the Water Framework Directive (2000/60/EC) shall be ensured. All investment projects financed under this component which require an EIA decision shall comply with Directive 2011/92/EU as amended by Directive 2014/52/EU. Specifically, all new projects that require an EIA shall be authorised under the Act on the provision of information on the environment and its protection, public participation in environmental protection and environmental impact assessment, as amended by the Act of 30 March 2021 amending that Act and certain other acts. Provisions of the 'Guidelines on remedial actions for projects co-financed by EU Funds affected by the infringement 2016/2046', as communicated to Poland on 23 February 2021 (ref. Ares(2021)1423319), shall be taken into account for the implementation of all investment projects for which an environmental decision or a construction or development permit was requested or issued before the entry into force of the Act of 30 March 2021. Only projects that do not lead to a deterioration of the status of surface waters and groundwater and do not prevent the improvement of the ecological status or potential of the affected water bodies shall be supported.

Any investment having negative effects on nature shall be excluded from the support. Where water is abstracted, a relevant permit must be granted by the relevant authority, ensuring that affected water bodies are in good ecological status and specifying conditions to avoid deterioration thereof, in accordance with the requirements of Directive 2000/60/EC and the technical Guidance on DNSH and evidenced by the latest relevant supporting data. Water abstraction shall be avoided where the concerned water bodies (surface or ground waters) are, or projected (in the context of intensifying climate change) to be in less than good status or potential. The measures shall also comply with the provisions of Directive 2009/147/EC on

the conservation of wild birds (Birds Directive) and Directive on the conservation of natural habitats and of wild fauna and flora 92/43/EEC (Habitats Directive).

The implementation of the investment shall be completed by 31 December 2025.

B3.4 Enabling framework for green transition investments in urban areas

The objective of the reform shall be to support the capacity of cities in prioritising, planning, executing and financing investment projects aimed at climate mitigation and adaptation in line with the European Green Deal. The reform and the associated investments shall notably aim at increasing the share of green areas in cities.

A set of legislative changes shall ensure that sustainability aspects are better integrated into the urban planning procedures and that stakeholders are properly consulted as part of those procedures. Moreover, it shall be ensured that local authorities receive appropriate capacity support to prioritise, plan and execute climate mitigation and adaptation projects. These regulatory and capacity-building elements shall be complemented by the establishment of a dedicated instrument aimed at providing financing for green transition investments in urban areas.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use²⁰; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²¹; (iii) activities related to waste landfills, incinerators²² and mechanical biological treatment plants²³; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The legislative changes aimed at facilitating green urban investments shall enter into force by 31 December 2023. The Green Urban Transition Fund shall be set up by 30 June 2022.

B3.4.1 Investments in a green transformation of cities

The objective of the investment shall be to mitigate the impact of cities on climate change and the health of their inhabitants by lowering greenhouse gas and other pollutant emissions. The

²⁰ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

²¹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²² This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²³ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

objective shall also be to adapt cities to increasing extreme weather conditions associated with climate change, such as drought, heat waves and flooding.

The first of these objectives shall be achieved through investment projects increasing the use of renewables as a source of energy in the city and increasing energy efficiency as well as the development of zero-emission transport infrastructure (pedestrian, cycling) integrated with collective transport, education, and awareness-raising among citizens about the need to transform cities towards climate neutrality in adapting to climate change. The second of these objectives shall be achieved through investment projects aimed at increasing biologically active surfaces in urban and functional areas and reducing soil sealing and nature-based urban investments with associated vegetation solutions.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use²⁴; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks²⁵; (iii) activities related to waste landfills, incinerators²⁶ and mechanical biological treatment plants²⁷; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

All the contracts for these investments shall be awarded by 31 December 2025. Relevant output and/or result indicators shall be set-up in order to monitor the implementation of these investments with respect to the objectives set out above.

B3.5 Reform of housing construction for people with low and average incomes, taking into account the higher energy efficiency of buildings

The objective of the reform shall be to increase the supply of energy-efficient housing for low- and average-income households.

That objective shall be achieved by increasing the rate of public co-financing for buildings that meet energy efficiency standards 20% more ambitious than the minimum energy efficiency standard in force in Poland (Nearly-Zero Energy Buildings standard, NZEB).

The reform shall be completed by 30 June 2022.

²⁴ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

²⁵ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²⁶ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²⁷ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

B3.5.1 Investment in energy-efficient housing for low- and average-income households

The objective of the investment shall be to increase the supply of energy-efficient housing for low- and average-income households.

The investments shall support the creation of dwellings forming part of the municipal housing stock, sheltered dwellings, accommodation facilities, shelters for the homeless, heating and temporary accommodation, and the participation of the municipality or an inter-municipal association in a project of another investor, consisting of the creation of dwellings for rent for low-income people who cannot afford an accommodation on the private market.

Investments shall be made to construct low-emission multi-apartment residential buildings using RES installations (including in particular photovoltaic panels, solar collectors) and other 'green' solutions that increase the energy efficiency of buildings. The energy consumption of supported buildings shall be 20% lower than the minimum energy performance standard (Nearly-zero Energy Building) for new buildings.

The investment shall be completed by 30 June 2026.

B.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
B1L	B1.2 Facilitating the implementation of the energy saving obligation for energy companies	Milestone	Entry into force of the implementing regulation to the Energy Efficiency Act	Provision in the implementing regulation to the Energy Efficiency Act indicating its entry into force				Q2	2022	Entry into force of the implementing regulation to the Energy Efficiency Act which shall establish an energy savings reference value for projects improving energy efficiency; and set out a methodology for calculating energy savings for projects in the transport sector.
B2L	B1.2.1 Energy efficiency and RES in companies – investments with the highest greenhouse gas reduction potential	Milestone	Financing instructions (including eligibility and selection criteria) for the support scheme targeting energy efficiency and RES in companies, including those covered by the EU Emissions Trading System	Publication of the support scheme				Q4	2022	The investment policy of the scheme shall include at least the following eligibility and project selection criteria: (i) the objective of the lowest price per tonne of the greenhouse gas saved; (ii) ensuring compliance with the EU and national environmental laws as well as the DNSH Technical Guidance (2021/C 58/01) of supported activities and companies and specifying decarbonisation targets, as further detailed in the operational agreement; (iii) supported ETS installations shall reduce their emissions below the benchmark relevant to the project bid.
B3L	B1.2.1 Energy efficiency and RES in companies – investments with the highest greenhouse gas reduction potential	Target	Award of all contracts for the implementation of energy efficiency and RES in enterprises		Number	0	43	Q4	2023	Number of contracts awarded to investment projects related to the improvement of industrial and energy processes to improve energy efficiency and reduce energy intensity, leading to the reduction and rationalisation of energy consumption with investments in renewable and low-carbon energy sources in enterprises. The scheme shall be deployed in line with its financing

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										instructions, as described under B2L. The scheme shall be rolled out through a non-discriminatory, transparent, and open process, open to all industrial sectors.
B4L	B2.3 Support for investment in offshore wind farms	Milestone	Entry into force of implementing regulations following from the Act on the promotion of electricity generation in offshore wind farms	Provisions in the regulations indicating their entry into force				Q2	2024	Two implementing regulations shall enter into force: 1. Regulation of the Minister of Climate and Environment on the requirements for the elements of a set of equipment for power evacuation and for the elements of offshore substations - Moreover, the regulation shall guarantee the appropriate quality of infrastructure in the context of its potential integration with the power grid in case of transferring the power outlets from offshore wind farms, as stipulated in Art. 58-60 of the Offshore Wind Act. 2. Regulation of the Minister of Climate and Environment on the maximum price in PLN per 1 MWh, which may be indicated in bids submitted in an auction by generators.
B5L	B2.3 Support for investment in offshore wind farms	Milestone	Organisation of auctions for electricity from offshore wind farms	Publication of auction results				Q4	2025	The Act of 17 December 2020 on the promotion of electricity generation in offshore wind farms (Journal of Laws of 2021, item 234) through Article 29 introduced the obligation for the President of the Energy Regulatory Office to hold an auction in 2025. The maximum total installed electrical capacity of offshore wind farms for which the right to cover the negative balance through the auction in 2025 may be granted is 2.5 GW.
B6L	B2.3 Support for investment in offshore wind farms	Milestone	Entry into force of an amendment of the Regulation on the	Provision in the amendment of the regulation indicating its				Q4	2023	As a part of the energy market reform, rules of the balancing market shall be amended to include explicit procurement

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
			detailed conditions for the operation of the power system which shall amend national balancing rules in order to reduce to the maximum possible extent the impact of the allocation constraints	entry into force						of reserves before the single day ahead coupling (SDAC). This solution was proposed by the ACER in the CORE CCM Methodology (ACER Decision 02/2019) as one of the possible solutions to reduce to the maximum possible extent the impact of the allocation constraints. In order to implement this reform, the minister responsible for energy shall amend the Regulation of the Minister of Economy of 4 May 2007 on the detailed conditions for the operation of the power system. Allocation constraints shall be monitored by the energy regulator pursuant to applicable EU rules. A study on the optimisation of proposed measures to limit allocation constraints in the Polish electricity system shall be carried out by the regulator and its recommendations are expected to be duly taken into account in further works.
B7L	B2.3.1 Construction of offshore wind farms	Milestone	Call for proposals of selected offshore wind farm projects	Publication of the results of the selection process				Q3	2022	Poland shall carry out an open, transparent, and non-discriminatory call for proposals available to all projects participating in Phase I (support granted outside of the auction system) which shall be subject to evaluation. The support shall be granted to more than one beneficiary to enable effective competition on the offshore wind market. The primary criteria for project selection shall include: - maturity and readiness for completion of projects by Q2 2026, - implementation schedule and deadlines for achieving the assumed indicators, - installed capacity as a result of project implementation (MW)

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
B8L	B2.3.1 Construction of offshore wind farms	Milestone	Commencement of construction works	Completion				Q4	2024	Commencement of construction works, which shall take place after the final investment decision (FID) is taken, after taking necessary approvals, the general contractor is selected, signing contracts with subcontractors and the contractors are issued a work start order (NTP).
B9L	B2.3.1 Construction of offshore wind farms	Target	Installed capacity of offshore wind farms (in MW)		Number	0	1 500	Q2	2026	Total rated capacity of offshore wind installations installed as a result of the investment. The indicator refers to the rated capacity potential of installed turbines in offshore wind farms.
B10L	B2.4 Legal framework for the development of energy storage facilities	Milestone	Entry into force of amendments of the Act on energy law with regards to energy storage	Provision in the amendments of the Act on energy law indicating its entry into force				Q2	2021	The amendments shall facilitate the development of electricity storage including, in particular, an exemption from tariff obligation, no double network charges, partial exemption from fees for connecting the storage to the grid, exemption from the obligations to present certificates of origin and from certain fees with regards to stored electricity. The proposed tariffs framework for storage shall be non-discriminatory and cost-reflective.
B11L	B2.4.1 Energy storage systems	Target	T1 - Residential energy storage facilities for energy prosumers installed		Number	0	10 000	Q2	2024	The indicator applies to the number of installed residential energy storage facilities with a minimum capacity of 4 kWh.
B12L	B2.4.1 Energy storage systems	Target	T2 - Residential energy storage facilities for energy prosumers installed		Number	10 000	28 000	Q2	2026	The indicator applies to the additional number of installed residential energy storage facilities with a minimum capacity of 4 kWh.
B13L	B2.4.1 Energy storage systems	Milestone	Modernisation of the electricity storage facility (storage and pumped power station)	Completion of the modernisation				Q2	2026	Completion of the modernisation of the existing electricity storage facility (storage and pumped power station) involving the modernisation of an upper reservoir, upper water intake and derivative tunnels and at least 3 out of 4

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										hydro-generators of the storage and pumped power station. The project shall lead to an increase in the availability and efficiency of power plants in generation and pump mode. The installed power (turbine mode) is expected to reach 540 MW.
B14L	B3.2 Support for environmental restoration and protection against hazardous substances	Milestone	Entry into force of a law to facilitate a comprehensive elimination of the negative environmental impact of large-scale post-industrial areas.	Provision in the law indicating its entry into force				Q4	2022	<p>Entry into force of a law aimed at increasing safety for human health and the condition of the environment. The law shall remove organisational and legal barriers occurring to the comprehensive elimination of the negative environmental impact of large-scale post-industrial areas.</p> <p>It is a form of pilotage for pre-defined locations.</p> <p>The law shall provide rules for four independent field components (different locations and scopes of works): 1) former "Tarnowskie Góry" Chemical Plant in Tarnowskie Góry; 2) former "Zachem" Chemical Plant in Bydgoszcz; 3) "Organika-Azot" Plant in Jaworzno; 4) former "Boruta" Dyes Industry Plant in Zgierz.</p> <p>The scope of the project includes the reconnaissance and inventory of the areas, preparation and assessment of the scale of problems related to reducing the environmental impact of large brownfield sites and the development of comprehensive investment documentation for these areas.</p>
B15L	B3.2 Support for environmental restoration and protection against hazardous substances	Milestone	Entry into force of a legal act dedicated to hazardous materials lingering in the Baltic Sea	Provision in the legal act indicating its entry into force				Q3	2022	Entry into force of a legal act aimed at increasing safety for human health and the condition of the environment, which shall provide:

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										<ul style="list-style-type: none"> - a precise description of the competences of public authorities in the provisions of law; - identification of leading and cooperating entities in matters related to the disposal of hazardous materials in the maritime areas of the Republic of Poland; - development of a detailed action plan of public administration and supervised and subordinate units on the subject of hazardous materials deposited in marine areas, along with an indication of the entities responsible for the implementation of individual tasks; - introducing legal changes to enable monitoring, identification and possible extraction and disposal of hazardous materials.
B16L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Documentation sets prepared for investments related to the negative environmental impact of selected large-scale brownfields and hazardous materials sunken on the bottom of the Baltic Sea		Number	0	9	Q2	2026	Full investment documentation sets for nine pre-defined locations - in land and sea as a different part of the programme - for which significant problems with the presence of pollutants or hazardous substances on a large-scale area exist.
B17L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Land areas for which field research related to the presence of pollutants and hazardous materials was carried out		Number	0	5	Q4	2024	Development of field research, studies, and land inventory, as a preliminary but fundamental step leading to preparation of full investment documentation in next steps of the programme.
B18L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield	Target	Locations in Polish sea areas (including wrecks) with performed inventory and field		Number	0	4	Q4	2025	Detailed reconnaissance and measurement campaigns in the sea as well as analysis of the obtained data as a necessary step leading to the preparation

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
	sites and the Baltic Sea		research related to the presence of hazardous materials							of complete documentation for neutralisation plans.
B19L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Area of remediated land (in hectares)		Number	0	160	Q4	2025	Remediation of Huta Sendzimira, where an investment part is planned. The indicator includes land remediation and the neutralisation of hazardous substances, preparation of land for investments by a modernisation of hard infrastructure (communication, road and track infrastructure).
B20L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Area of revitalised buildings (in square metres)		Number	0	17 000	Q4	2025	The indicator applies to the remediation of Huta Sendzimira, where an investment part is planned. The indicator includes the revitalisation of two historical buildings through a change of environmental and energy efficiency standards to the current ones - complying with legal and environmental requirements.
B21L	B3.3 Support for the sustainable management of water resources in agriculture and rural areas	Milestone	Entry into force of amendments to national legislation needed to improve the conditions for resilient water management in agriculture and rural areas	Provision in the amendments indicating the entry into force				Q2	2022	Entry into force of amendments that shall contribute to increasing the resilience of agriculture to drought and flood prevention in agricultural areas; improving water efficiency by properly regulating water relations in agricultural areas and reducing run-off; and increasing water retention. The amendments shall comply with the requirements set out in the 'Do no significant harm' Technical Guidance (2021/C 58/01), in particular, it shall ensure compliance with the EU environmental legislation, including the EIA Directive and the Water Framework Directive. The amendments shall not lead to any deterioration of the level of compliance

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										with EU environmental legislation with regards to investments that are considered significant or potentially significant investments pursuant to the Council of Ministers' regulation on projects likely to have a significant impact on the environment and investments in or affecting Natura 2000 areas. Moreover, the amendments shall not alter the currently binding rules on water intake.
B22L	B3.3.1 Investments in increasing the potential of sustainable water management in rural areas	Milestone	Adoption of selection criteria for call for proposals	Adoption of the criteria by the Ministry of Agriculture and Rural Development				Q2	2022	Investments shall be selected through dedicated calls, based on environmental criteria. The project shall contribute to increasing the resilience of agriculture to drought and flood prevention in agricultural areas; improving water efficiency by properly regulating water relations in agricultural areas and reducing run-off; and increasing water retention, provided their need and nature is justified appropriately. Priority shall be given to nature-based or other climate-change resilient solutions. Only projects that do not lead to a deterioration of the status of surface waters and groundwater and do not prevent the improvement of the ecological status or potential of the affected water bodies shall be supported.
B23L	B3.3.1 Investments in increasing the potential of sustainable water management in rural areas	Target	Area of agricultural land / forest (in hectares) benefitting from improved water retention		Number	0	2 500 000	Q4	2025	At least 2,5 mln hectares of agricultural land or forest demonstrably benefitting from improved water retention, through interventions improving the long-term resilience of the agriculture sector to climate change impacts, namely drought and floods, and supporting biodiversity. The investment shall comply with the

										<p>requirements laid down in the ‘Do no significant harm’ Technical Guidance (2021/C 58/01). In particular, it shall ensure compliance with the EU environmental legislation, including the EIA Directive (2014/52/EU) and the Water Framework Directive (2000/60/EC). All investment projects financed under this component which require an EIA decision shall comply with Directive 2011/92/EU as amended by Directive 2014/52/EU. Specifically, all new projects that require an EIA shall be authorised under the Act on the provision of information on the environment and its protection, public participation in environmental protection and environmental impact assessments, as amended by the Act of 30 March 2021 amending that Act and certain other acts. Provisions of the ‘Guidelines on remedial actions for projects co-financed by EU Funds affected by the infringement 2016/2046’, as communicated to Poland on 23 February 2021 (ref. Ares(2021)1423319), shall be taken into account for the implementation of all investment projects for which an environmental decision or a construction or development permit was requested or issued before the entry into force of the Act of 30 March 2021. Only projects that do not lead to a deterioration of the status of surface waters and groundwater and do not prevent the improvement of the ecological status or potential of the affected water bodies shall be supported.</p> <p>Where water is abstracted, a relevant</p>

										permit must be granted by the relevant authority, specifying conditions to avoid deterioration and ensure that affected water bodies are in good ecological status, in accordance with the requirements of Directive 2000/60/EC and evidenced by the latest relevant supporting data. Water abstraction shall be avoided where the concerned water bodies (surface or ground waters) are, or projected (in the context of intensifying climate change) to be in less than good status or potential. The measures shall also comply with the provisions of Directive 2009/147/EC on the conservation of wild birds (Birds Directive) and Directive on the conservation of natural habitats and of wild fauna and flora 92/43/EEC (Habitats Directive).
B24L	B3.4 Enabling framework for green transition investments in urban areas	Milestone	Entry into force of a law on sustainable urban development setting goals, directions, implementing rules and coordination mechanisms for the green transformation of cities	Provision in the law indicating its entry into force				Q4	2023	Entry into force of a law that shall aim at supporting the capacity of urban areas in investing in the green transition. It shall ensure that sustainability aspects are better integrated into urban planning procedures. It shall ensure that stakeholders are properly consulted as part of those procedures. It shall provide for capacity support to local governments to implement such projects.
B25L	B3.4 Enabling framework for green transition investments in urban areas	Milestone	Green Urban Transformation Instrument	Establishment of the Green Urban Transformation Instrument and adoption of its detailed rules and procedures in consultation with all stakeholders				Q2	2022	The milestone refers to the establishment of the Green Urban Transition Instrument to support (a) the green transformation of cities; and (b) investments in the green digitisation of cities, with adopted procedures. The Green Urban Transition Instrument shall be in line with the DNSH Technical Guidance (2021/C 58/01). In order to ensure that the

C. COMPONENT C: ‘DIGITAL TRANSFORMATION’

Component C of the Polish Recovery and Resilience Plan addresses a series of challenges. Firstly, the disparities between urban and rural areas in terms of connectivity and access to fast and reliable internet connection, both fixed and mobile; secondly, the need for a faster and safer use of digital services in the public sector; thirdly, the overall lack of a focused digital education and training strategy, which was clearly revealed by the insufficient digital skills and ICT equipment among students and teachers during the COVID-19 pandemic. Finally, the need to increase the cybersecurity of the public information system to promptly respond to cyberattacks and security incidents.

The component aims at accelerating the digitalisation process of the country through the digital transformation of the public sector, the economy and society. It consists of three sub-components, according to its specific objectives: improving access to high-speed internet (C1); developing and consolidating e-services, creating the conditions for the development of digital breakthrough technologies in the public sector, the economy and society, and improving communication between public institutions, citizens and business (C2); increasing security in cyberspace, securing data processing infrastructure and digitising security services infrastructure (C3).

The reforms and investments elaborated in the component contribute to address three Country Specific Recommendations identified for Poland in the past two years, on the need to focus investment-related economic policy on digital infrastructure (Country Specific Recommendation 3, 2019) and digital transition (Country Specific Recommendation 3, 2020); as well as on the need to improve digital skills and promote the digital transformation of both companies and public administration (Country Specific Recommendation 2, 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C 58/01).

This component is expected to promote the digital transition by developing Next Generation Access broadband infrastructure, enhancing the use of digital tools in the public sector and boosting e-competences in society (companies, public administration, teachers and students). It shall contribute to optimising cybersecurity, improving data processing efficiency and upgrading the infrastructure of state services responsible for security. Finally, the potential deployment of innovative next generation cloud solutions shall create stable and sustainable cloud infrastructures.

C.1. Description of the reforms and investments for non-repayable financial support

The component shall implement 3 reforms and 5 investments under the grant part.

C1.1 Facilitating the development of network infrastructure to ensure universal access to high-speed internet

This reform aims at guaranteeing universal access to high-speed internet and digital services throughout Poland, including the so-called ‘white spots’ where no high-capacity broadband infrastructure exists.

This objective shall be achieved firstly by removing legislative barriers to broadband investment and secondly by aligning national legislation with the EU-wide Connectivity Toolbox of 25 March 2021, a set of best practices to boost the deployment and roll-out of very high-capacity networks (VHCN). The legal changes envisage, inter alia, amendments to the Regulation on Telecom Infrastructure Inventory and to the Regulation on the Single Information Point (SIP) system.

The implementation of the reform shall be completed by 31 March 2023.

C1.1.1 Ensuring access to very high-speed internet in white spots

The goal of this investment, in line with the aforementioned reform, is to increase the number of households covered by fixed broadband network of 931,000 units focusing on white next-generation-access (NGA) areas, where no high-capacity broadband infrastructure currently exists and where the market is not likely to provide end-users in the near future with a network offering connectivity of 100 Mbps download speed, in order to reach at least 80% households with a capacity of 100 Mbps, with the possibility of increasing it to gigabit capacity. The investment is divided in 3 targets: the first one shall be to reach 100,000 households by December 2024, the second one shall encompass 400,000 households by December 2025 and the last one shall focus on the remaining 431,000 households by 30 June 2026.

To comply with DNSH conditions, a climate risk and vulnerability assessment shall be performed when required by relevant legislation and any necessary adaptation solutions implemented pursuant to this legislation.

For all infrastructure investments, at least 70% of construction and demolition waste shall be reused or recycled in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01)²⁸.

The implementation of the investment shall be completed by 30 June 2026.

C2.1 Scaling up digital applications in the public sphere, the economy and society

This broad reform encompasses various strands that promote the digitalisation of the Polish society, ranging from digital public services to digital education of citizens and workers.

Scaling up digital applications in the public sector shall be supported by legislative changes promoting electronic communication between public institutions, businesses and citizens. The first one consists of amending the Act of 17 February 2005 on computerisation of activities performed by public entities to digitise public administrative documents and processes. The second one shall amend the Act of 11 March 2004 on tax on goods and services with regard to

²⁸ In particular, the measure requires the economic operators carrying out the construction works to ensure that at least 70% (by weight) of the non-hazardous construction and demolition waste (excluding naturally occurring material referred to in category 17 05 04 in the European List of Waste established by Decision 2000/532/EC of 3 May 2000 replacing Decision 94/3/EC establishing a list of wastes pursuant to Article 1(a) of Council Directive 75/442/EEC on waste and Council Decision 94/904/EC establishing a list of hazardous waste pursuant to Article 1(4) of Council Directive 91/689/EEC on hazardous waste (notified under document number C(2000) 1147)) generated on the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol.

the use of structured invoice data issued in electronic format, introducing the obligation to issue and receive e-invoices through the National System of e-invoices.

As far as digital competences are concerned, the founding element underpinning their development shall be the creation and implementation of the Digital Competence Development Programme. The programme shall define a comprehensive, long-term set of requirements to support the development and monitoring of digital competences in formal, non-formal and informal education. The establishment and functioning of the Digital Competence Development Centre shall be clearly formulated in the programme. The document shall be produced using a multi-stakeholder approach.

In the field of education, the core element stimulating the digitalisation of education consists of defining minimum binding standards to equip schools with digital infrastructures. Mandatory guidelines shall be developed in cooperation with the local governments and in consultation with a wide group of stakeholders, and shall ensure a minimum level of Information and Computer Technology (ICT) equipment for every school in Poland.

The implementation of the reform shall be completed by 30 June 2024.

C2.1.1 Public e-services, IT solutions improving the functioning of administrations and economic sectors, and breakthrough technologies in the public sector, the economy and society

To increase the use of public e-services, the following packages shall be implemented under this investment:

- the development of e-services in public administration enabling citizens to deal with administrative matters online;
- the construction or development of IT systems for the public administration enabling civil servants to digitalise their activities;
- the digitalisation of the administrative procedures related to construction and spatial planning;
- the digitalisation of services and processes of the National Revenue Administration, including the implementation of the electronic circulation of invoices in business (national e-invoice system);
- the digitalisation of agriculture, including the implementation of geomatics and satellite monitoring in agriculture and the implementation of a digital farmland verification system;
- the implementation of test cooperation mechanisms to stimulate the development and dissemination of breakthrough technologies, for example via a portal integrating smart city services with applications based on Artificial Intelligence and Internet of Things.

In particular, 39 projects are expected to be developed in order to achieve, inter alia, the construction of nine new or expanded public data sharing and e-service platforms; the construction of 30 new or expanded public IT systems; the implementation of 65 new, modified or integrated public e-services; the provision, adaptation and expansion of 400 e-services, including API services on new or expanded platforms and finally the implementation of three test cooperation mechanisms to stimulate the use of breakthrough technologies. All new or upgraded e-services with graphical user interface are expected to have at least fourth level of maturity, that is full electronic case handling (transaction level in the five-stage maturity model).

The implementation of the investment shall be completed by 30 June 2026.

C2.1.2 Level playing field for schools with mobile multimedia devices – investments related to the fulfilment of minimum equipment standards

In line with the creation of minimum binding standards for ICT equipment, this investment shall supply all schools in Poland with state-of-the-art multimedia equipment, to be used by teachers and students. The objective is to enable the use of digital technologies in learning on an equal level in each primary and secondary school across Poland, and the goal is to provide portable computers with software to at least 90% of the teachers and to reach maximum six students per one laptop, for a total of at least 1 200 000 laptops.

To comply with DNSH conditions, the ICT equipment shall meet the energy related requirements and the material efficiency requirements set in accordance with Directive 2009/125/EC for servers and data storage, or computers and computer servers or electronic displays. In addition, the ICT equipment shall not contain the restricted substances listed in Annex II to Directive 2011/65/EU.

A waste management plan shall be in place to ensure maximal recycling at end of life of electrical and electronic equipment, including through contractual agreements with recycling partners, reflection in financial projections or official project documentation. At its end of life, the equipment shall undergo preparation for re-use, recovery or recycling operations, or proper treatment, including the removal of all fluids and a selective treatment in accordance with Annex VII to Directive 2012/19/EU.

The implementation of the investment shall be completed by 30 September 2025.

C2.1.3 E-competences

By training at least 380 000 people, Poland aims at increasing the overall level of digital competences in society and improving the country's digitalisation process. Among these, 40% shall be citizens in need of basic digital skills, 20% shall be public officials, 20% shall be people excluded and at risk of exclusion and the remaining 20% shall consist of educators and teachers receiving basic and intermediate level of training. This last category shall not encompass staff of kindergarten to support the loan investment in ICT devices and infrastructure, for which additional specialised trainings shall be foreseen.

As part of the investment, a Digital Competence Development Centre composed by experts, advisors and digital specialists supporting the implementation of digital policies shall be created within the office of the Minister responsible for digitalisation.

Moreover, a network of digital coordinators shall be established to support each municipality (*gmina*) in the organisation of the digitalisation process, for a total of at least 2 477 coordinators (on average one per municipality depending on elements such as size of the *gmina*, number of citizens, level of digital skills and demand for computer equipment).

The implementation of the investment shall be completed by 30 June 2026.

C3.1 Enhancing the cybersecurity of information systems, strengthening the data processing infrastructure and optimising the infrastructure of the law enforcement services

The reform shall focus on three specific objectives that allow for the implementation of information systems security solutions: (i) the development of the national cybersecurity system; (ii) the capacity to effectively prevent and respond to incidents; (iii) the creation of social awareness with regards to cybersecurity. These objectives shall be achieved through a

series of amendments to the National Cybersecurity System Act of 5 July 2018 and to the Cabinet Regulation of 11 September 2018 on essential services.

The implementation of the reform shall be completed by 31 December 2023.

C3.1.1 Cybersecurity – CyberPL, infrastructure of data processing and optimization of the infrastructure of law enforcement services

This investment consists of four different components: (i) cybersecurity; (ii) data processing infrastructure; (iii) optimisation of the infrastructure of the law enforcement services and (iv) cloud and edge computing solutions.

On (i) cybersecurity, 8 individual projects shall be realised with the purpose of:

- Establishing a network of 7 regional cybersecurity centres (RegioSOC);
- Establishing a network for a total of 7 sectoral computer security incident response teams (CSIRTs) in key sectors within the meaning of the NIS Directive: energy, transport, health, banking, financial market infrastructures, digital infrastructure and water supply;
- Connecting 385 national cybersecurity entities to an integrated cybersecurity management system;
- Creating a network of minimum 30 security operations centres (SOCs) for national security and modernising existing ones;
- Realising a programme for the requalification of 600 people on cybersecurity, including but not limited to current staff;
- Implementing a programme for the systemic strengthening of at least 30 entities using operational technology for industrial control systems;
- Support to 400 entities in the upgrade and expansion of cybersecurity infrastructures using information technology and operational technology as well as purchase of firewalls and cybersecurity systems;
- Creation of a network of cybersecurity first responders at voivodeship level to support public entities in incident handling and recovery and providing trainings for local and regional authorities on cybersecurity (at least 440 first responders and employees of local and regional authorities trained).

On (ii) data infrastructure, 3 standard data processing centres providing energy-efficient and scalable critical infrastructure shall be created to have accessible digital services and secure infrastructure for ICT systems. The centres shall comply with the European Code of Conduct on Data Centre Energy Efficiency, in particular with regards to the following areas:

- *3.2.8 Sustainable energy usage:* energy needed for the data centres shall be contracted from RES;
- *3.2.11 Alternative power generation technologies:* installation of renewable energy sources on the data centres facilities and use of hydrogen fuel cell technologies is planned;
- *3.3.2. Consider multiple levels of resilience:* the data centres are expected to strengthen the reliability of the power supply system by building new methods of back-up power supply e.g. gas turbines and hydrogen fuel cells.

To comply with DNSH conditions, an environmental risk and vulnerability assessment shall be performed for construction and renovation of data centres and any necessary adaptation solutions implemented. For all infrastructure investments, at least 70% of construction and demolition waste shall be reused or recycled in accordance with the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

(iii) The optimisation of infrastructure for state services responsible for security shall include 4 projects aimed at integrating different alert and warning systems and improve cooperation between State services, such as police, firefighters and local authorities.

Finally, on (iv) the deployment of cloud and edge computing solutions, Poland is expected to participate in the potential Important Project of Common European Interest (IPCEI) on Next Generation Cloud Infrastructure and Edge Services, to support the development and first industrial deployment of advanced R&D projects towards the future of data processing along the cloud to edge continuum.

The implementation of the investment shall be completed by 30 June 2026.

C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
C1G	C1.1 Facilitating the development of network infrastructure to ensure universal access to high-speed internet	Milestone	Framework prepared by the Chancellery of the Prime Minister to co-finance broadband projects in white Next Generation Access (NGA) areas, where no NGA network exists at present	Publication of the framework in the Chancellery of the Prime Minister and Digital Poland Project Centre websites				Q2	2022	Setting up of the framework as a basis of the following call for proposal. The framework shall include provisions to ensure full compliance with the 'Do no significant harm' Technical Guidance (2021/C58/01) of supported projects under this measure through the use of sustainability proofing, an exclusion list, and the requirement of compliance with the relevant EU and national environmental legislation.
C2G	C1.1 Facilitating the development of network infrastructure to ensure universal access to high-speed internet	Milestone	Amendment of the regulation of the Minister for Digitization on annual telecommunications infrastructure & services inventory	Provision in the amendment of the regulation indicating the entry into force				Q1	2023	Entry into force of the amendment of the regulation on national inventory of telecom infrastructure & services, to better identify the areas requiring additional support from public interventions.
C3G	C1.1 Facilitating the development of network infrastructure to ensure universal access to high-speed internet	Milestone	Amendment of the regulation on Single Information Point by the Prime Minister	Provision in the amendment of the regulation indicating its entry into force				Q4	2022	Entry into force of the amendment of the regulation on Single Information Point, to provide operators with wider scope of information on infrastructure which may be used in telecom investments, and to provide better suited planning tools.
C4G	C1.1.1 Ensuring access to very high-speed internet in white spots	Target	T1 - Additional households (residential premises) with broadband Internet access with a capacity of at least 100 Mb/s (with the possibility of increasing it to gigabit capacity)		Number	0	100 000	Q4	2024	At least additional 100 000 households in white Next Generation Access areas where the market is not likely to provide end-users in the near future with a network offering connectivity of 100 Mbps download speed, to be covered by broadband

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										internet access with a capacity of at least 100 Mbps (with the possibility of increasing it to gigabit capacity), in line with the objectives of the National Broadband Plan and the Commission Communication on the European Gigabit Society. The investment shall be carried out in full compliance with the DNSH Technical Guidance (2021/C 58/01), in particular with regard to requirements related to energy performance, waste management and environmental risk assessment.
C5G	C1.1.1 Ensuring access to very high-speed internet in white spots	Target	T2 - Additional households (residential premises) with broadband Internet access with a capacity of at least 100 Mb/s (with the possibility of increasing it to gigabit capacity)		Number	100 000	500 000	Q4	2025	At least additional 500 000 households cumulatively in white Next Generation Access areas where the market is not likely to provide end-users in the near future with a network offering connectivity of 100Mbps download speed, to be covered by broadband internet access with a capacity of at least 100 Mbps (with the possibility of increasing it to gigabit capacity), in line with the objectives of the National Broadband Plan and the Commission Communication on the European Gigabit Society. The investment shall be carried out in full compliance with the DNSH Technical Guidance (2021/C 58/01), in particular with regard to requirements related to energy performance, waste management and environmental risk assessment.
C6G	C1.1.1 Ensuring access to very high-speed internet in white spots	Target	T3 - Additional households (residential premises) with broadband Internet access with a capacity of at least		Number	500 000	931 000	Q2	2026	At least additional 931 000 households cumulatively in white Next Generation Access areas where the market is not likely to provide

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
			100 Mb/s (with the possibility of increasing it to gigabit capacity)							end-users in the near future with a network offering connectivity of 100 Mbps download speed, to be covered by broadband internet access with a capacity of at least 100 Mbps (with the possibility of increasing it to gigabit capacity), in line with the objectives of the National Broadband Plan and the Commission Communication on the European Gigabit Society. The investment shall be carried out in full compliance with the DNSH Technical Guidance (2021/C 58/01), in particular with regard to requirements related to energy performance, waste management and environmental risk assessment.
C7G	C2.1 Scaling up digital applications in the public sphere, the economy and society	Milestone	Amendment to the Act of 17 February 2005 on computerisation of the activities of entities performing public tasks – introducing default digital form of documents and electronic form of services and digitisation of administrative processes	Provision in the amendment to the act indicating the entry into force				Q4	2023	Entry into force of the amendment to the Act of 17 February 2005 on computerisation of the activities of entities performing public tasks. The Chancellery of the Prime Minister shall be responsible for the preparation and adoption of this act.
C8G	C2.1 Scaling up digital applications in the public sphere, the economy and society	Milestone	Amendment to the Act of 11 March 2004 on tax on goods and services (use of structured invoices) – introducing structured electronic invoices to the economic market and the obligation to issue and receive them through the National System of e-invoices	Provision in the amendment to the act indicating the entry into force				Q2	2024	Entry into force of the amendment to the Act of 11 March 2004 on tax on goods and services (use of structured invoices). The use of e-invoices shall be considered mandatory. The government body responsible for the preparation and adoption of this amended act shall be the Ministry of Finance.
C9G	C2.1 Scaling up digital	Milestone	Minimum binding	Adoption of				Q3	2022	Adoption of binding standards for

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
	applications in the public sphere, the economy and society		standards for equipping all schools with digital infrastructure to enable the use of digital technologies in learning on an equal level in each school	the standards by the Ministry of Education and Science (MES)						equipping schools with digital infrastructure that are expected to be mandatory for every school in order to achieve the same level of digital infrastructure. The development of the standards shall be consulted with a wide group of stakeholders and the local government. The Ministry of Education and Science shall be responsible for the preparation and adoption of this regulation.
C10G	C2.1 Scaling up digital applications in the public sphere, the economy and society	Milestone	Entry into force of the resolution of the Council of Ministers on the Digital Competence Development Programme to manage the development of digital competences and digital education of citizens and employees in various sectors. This includes the establishment of the Digital Competence Development Centre (DCDC)	Provision in the resolution of the Council of Ministers indicating its entry into force				Q3	2022	Entry into force of the resolution of the Council of Ministers on the Digital Competence Development Programme (which is a multiannual programme until 2030), including the implementation plan, evaluation and monitoring measures in accordance with the "Act on the principles of development policy". The Program shall be developed adopting a multi-stakeholder approach. The Programme shall, inter alia, establish the Digital Competence Development Centre (DCDC) and the policy for the development of digital competences.
C11G	C2.1.1 Public e-services, IT solutions improving the functioning of administrations and economic sectors, and breakthrough technologies in the public sector, the economy and society	Target	T1 - Projects that create new e-services and upgrade existing ones, improving the process of their creation or, through digitisation, improving the handling of processes		Number	0	6	Q3	2024	Number of completed projects that create new and develop existing e-services, improving the process of creating them or, through digitisation, improving the handling of processes. These projects shall lead to: - Completion of construction of new or expanded public data sharing platforms and e-service implementation platforms; - Completion of construction of new or expanded public IT systems; - Implementation of new, modified or integrated public e-services;

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										<ul style="list-style-type: none"> - Provision, adaptation and expansion of e-services, including Application Programming Interface (API) services on new or expanded platforms; - Implementation of test cooperation mechanisms to stimulate the use of breakthrough technologies. <p>All new or upgraded e-services with the graphical user interface shall have at least 4th level of maturity, that is full electronic case handling.</p>
C12G	C2.1.1 Public e-services, IT solutions improving the functioning of administrations and economic sectors, and breakthrough technologies in the public sector, the economy and society	Target	T2 - Projects that create new e-services and upgrade existing ones, improving the process of their creation or, through digitisation, improving the handling of processes		Number	6	39	Q2	2026	<p>Number of completed projects that create new and develop existing e-services, improving the process of creating them or, through digitisation, improving the handling of processes. C.3. Description of the reforms and investments for the loan

C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs

The reform shall improve the legislative environment for the development of mobile networks by removing existing barriers to 5G solutions in vertical industries and aligning national legislation with the EU Connectivity Toolbox. Regulatory changes shall focus on the topic of electromagnetic field (EMF) emissions and radio communication installation, while specific amendments shall be identified by the respective ministries for the following vertical sectors: health, logistic and transport, agriculture, industry, energy, smart cities, education and environmental protection.

The implementation of the reform shall be completed by 31 December 2023.

C1.2.1 Strengthening the potential of commercial investments in modern electronic communication networks

The goal of this investment is to improve telecom investors' access to repayable financial support to boost the deployment of 5G networks throughout market failure areas of the country, including remote areas with lower economic profitability. At least 4200 base stations shall be deployed in rural areas where market does not and is not likely to deliver in the near future sufficient quality of services to satisfy the identified end-users' needs. This target shall be understood as additional coverage achieved with RRF support and therefore shall not take into account households that are covered as the result of the 5G-spectrum auction. In addition, a new stationary monitoring system shall be built to ensure public access to data on the level of EMF emissions from radio-communication installations.

In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall require that only activities that comply with relevant EU and national environmental legislation shall be selected.

To comply with DNSH conditions, a climate risk and vulnerability assessment shall be performed when required by relevant legislation and any necessary adaptation solutions pursuant to this legislation shall be implemented. For all infrastructure investments, at least 70% of construction and demolition waste shall be reused or recycled in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01)²⁹.

The implementation of the investment shall be completed by 30 June 2026.

C2.2 Reform the foundations of digitalisation of the education system

²⁹ In particular, the measure requires the economic operators carrying out the construction works to ensure that at least 70% (by weight) of the non-hazardous construction and demolition waste (excluding naturally occurring material referred to in category 17 05 04 in the European List of Waste established by Decision 2000/532/EC of 3 May 2000 replacing Decision 94/3/EC establishing a list of wastes pursuant to Article 1(a) of Council Directive 75/442/EEC on waste and Council Decision 94/904/EC establishing a list of hazardous waste pursuant to Article 1(4) of Council Directive 91/689/EEC on hazardous waste (notified under document number C(2000) 1147)) generated on the construction site shall be prepared for re-use, recycling and other material recovery, including backfilling operations using waste to substitute other materials, in accordance with the waste hierarchy and the EU Construction and Demolition Waste Management Protocol.

The reform shall lay the foundation for the digitalisation of the education system via the adoption of the digitalisation policy for education, in order to prepare children and youth for the information society. The objectives of this strategic document shall focus on efficient and meaningful integration of new technologies in teaching, learning and assessment and shall be developed applying a participatory approach.

The implementation of the reform shall be completed by 30 September 2022.

C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system

This investment aims at increasing the level of digital ICT equipment and infrastructure in schools beyond the minimum standards.

The measure shall include:

- provision and modernisation of Local Area Network (LAN) connection to 100 000 classrooms;
- provision of IT-kit for remote teaching for 100 000 classrooms;
- provision of Artificial Intelligence (AI) and Science, Technology, Engineering and Mathematics (STEM) laboratories to 16 000 schools, both primary and secondary;
- digitalisation of the examination system, in particular re-organisation and upgrade of central and regional examination commissions, and digitalisation of the e IT Education Centre.

The LAN connection, the IT-kits for remote teaching and the AI and STEM laboratories shall be distributed equally among schools, based on population density and geographical coverage.

An open, fair and transparent procedure for the selection of entities providing network infrastructure or ITC equipment shall take place.

To comply with DNSH conditions, the ICT equipment shall meet the energy related requirements and the material efficiency requirements set in accordance with Directive 2009/125/EC for servers and data storage, or computers and computer servers or electronic displays. In addition, the ICT equipment shall not contain the restricted substances listed in Annex II to Directive 2011/65/EU.

A waste management plan shall be in place to ensure maximal recycling at end of life of electrical and electronic equipment, including through contractual agreements with recycling partners, reflection in financial projections or official project documentation. At its end of life, the equipment shall undergo preparation for re-use, recovery or recycling operations, or proper treatment, including the removal of all fluids and a selective treatment in accordance with Annex VII to Directive 2012/19/EU.

The implementation of the investment shall be completed by 31 December 2025.

C.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
C1L	C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs	Milestone	Amendment of the Regulation of 17 February 2020 on monitoring of electromagnetic field emission in the environment	Provision in amendment of the regulation indicating its entry into force				Q1	2022	Entry into force of an amendment of the Regulation of 17 February 2020 on the methodologies for measuring electromagnetic field emissions in the environment.
C2L	C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs	Milestone	Amendment of the Regulation of the Council of Ministers of 10 September 2019 on environmental impact assessment	Provision in the amendment of the regulation indicating its entry into force				Q1	2022	Entry into force of an amendment of the Regulation on projects that may have a significant impact on the environment, which shall exclude radio communication investments from the catalogue of projects requiring an environmental impact assessment.
C3L	C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs	Milestone	New legal act eliminating barriers to the implementation of the 5G network by vertical industries	Provision in the legal act indicating its entry into force				Q4	2023	Entry into force of the legal act that shall eliminate barriers to the implementation of solutions in the economy using connectivity in 5G networks.
C4L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communication networks	Milestone	Framework for financial products to strengthen commercial investments in modern electronic communication network	Publication of the framework by the Chancellery of the Prime Minister				Q4	2022	Publication of the framework on financial products as a basis of the proceeding of open-ended call for applications for investment loans. The Chancellery of the Prime Minister shall be responsible for the preparation and adoption of this framework. In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C58/01), the eligibility criteria contained in

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										terms of reference for upcoming calls for projects shall require that only activities that comply with relevant EU and national environmental legislation shall be selected.
C5L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communication networks	Milestone	Contracts awarded for the construction of 5G base stations	Notification of the award of the contracts				Q4	2023	Award of contracts based on open, transparent, non-discriminatory and competitive call for tenders for the construction of 5G base stations in rural areas. Each contract shall include the financial amount received by the selected entities and the scope of the investment, such as the number of additional base stations being deployed.
C6L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communication networks	Target	Construction of 5G base stations in rural areas		Number	0	4 200	Q2	2026	At least 4 200 base stations delivering 5G services shall be deployed in rural areas. This target shall be understood as providing additional coverage achieved with RRF support to coverage imposed on telecom operators as the result of the 5G-spectrum auction. The investment shall be carried out in full compliance with the DNSH Technical Guidance (2021/C 58/01), in particular with regard to requirements related to energy performance, waste management and environmental risk assessment.
C7L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communication networks	Target	Cities covered by the new stationary monitoring system of electromagnetic field emissions from radio communication installations		Number	0	50	Q2	2024	Number of cities where installations for continuous monitoring of electromagnetic field emissions shall be built, included in the stationary monitoring system of electromagnetic field emissions

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										emitted from radio communication installations. EMF monitoring system is envisaged to be financed solely in a non-returnable form. The investment shall be carried out in full compliance with the DNSH Technical Guidance (2021/C 58/01), in particular with regard to requirements related to energy performance, waste management and environmental risk assessment.
C8L	C2.2 Reform the foundations of digitalisation of the education system	Milestone	Adoption of a new digitalisation policy for education, constituting the basis for changes in the education system and implementation of investments in ICT and defining the directions of digitization of the education system process in the short and long term	Adoption of the policy				Q3	2022	Adoption by the Council of Ministers of a resolution on the policy of digitisation of the education area, having the nature of a program and strategic document, setting the framework for State policy and activities undertaken in the area of digitalisation of education in the short, medium and long term. This document shall constitute the basis for the activities of stakeholders and actors-participants and defines the tools for achieving a fully digitalised education system adapted to contemporary challenges of pre-school and general education environment. The policy shall include the implementation plan, evaluation and monitoring measures and it shall be developed applying a participatory approach.

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
C9L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Milestone	Public consultation on the framework defining the procedures for the distribution of ICT equipment and for the provision of infrastructure to schools	Report summarising the results of the public consultation and the following government response				Q3	2022	Public consultation involving different stakeholders and social partners on the framework for the distribution of ICT equipment (IT kit for remote teaching) and for the provision of infrastructure (LAN connection, STEM and AI laboratories) to schools. The results of the consultation shall be summarised in a report, containing the main comments from stakeholders and social partners and the government's follow-up to these comments.
C10L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Milestone	Framework defining the procedures for the distribution of ICT devices and for the provision of infrastructure to schools	Adoption by the Ministry of Education and Science				Q2	2023	The framework shall set out the minimum conditions for the distribution of ICT equipment and for the provision of infrastructure to the beneficiary schools, as resulting from the prior public consultation with different stakeholders and social partners. The framework shall set out clear criteria for the selection of beneficiary schools, reflecting the needs for ICT equipment and infrastructure, such as LAN connection and laboratories, and their potential impact on the educational performance of the schools. Taking into account the needs of the different beneficiary schools, the following call for tender on the provision of infrastructure and ICT equipment shall be equal, open, transparent and fair and shall ensure

	adequate ICT devices and infrastructure to improve the overall performance of education system		Engineering and Mathematics (STEM) laboratories set-up in schools							<p>Science, Technology, Engineering and Mathematics (STEM) laboratories.</p> <p>In particular, 4000 secondary schools shall be equipped with STEM laboratories, while 12000 schools shall be equipped with AI laboratories, of which 8000 primary schools and 4000 secondary schools.</p> <p>A sufficient number of qualified computer science teachers shall be foreseen to run activities with the use of AI and STEM laboratories.</p> <p>The supplies shall be allocated in a fair and transparent manner agreed with the local governments and shall not be repaid by the final recipients or the local governments to the Polish government in any form.</p>
C14L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Milestone	Digitalisation of the examination system	Report on the successful completion of the digitalisation of the examination system				Q4	2025	The examination system shall be reorganised and upgraded to allow for the possibility of conducting exams in a remote mode. The digitalisation of the current examination system shall include the reorganisation and upgrade of the central and the regional examination commissions and the IT Education Centre.

D. COMPONENT D: ‘EFFECTIVENESS, ACCESSIBILITY AND QUALITY OF THE HEALTH SYSTEM’

The component addresses several challenges that the Polish healthcare system currently faces. Shifting towards primary and ambulatory care is of particular importance, as healthcare spending is expected to grow considerably in the medium to long term, increasing the burden on public finances. The hospital sector is in an urgent need of reform complemented by targeted investments. Some hospitals run substantial debts and with low occupancy rates, while many medical procedures currently performed in hospitals could be done at lower levels of care and at lower costs. The primary care system is underfunded, understaffed and overstretching its services. At the same time, the hospital system suffers from chronic underfunding, especially in terms of human resources. Due to unfavourable conditions, such as low salaries, medical professions are not popular, and there has been a significant ‘brain drain’. The shortage in human resources places Poland in the lowest ranks compared with other Member States and makes it necessary to keep professionals working beyond their retirement ages. Access to care differs among regions. E-Health and modern management practices are underused.

The objectives of the component are multidimensional: to reform and support with investment the hospital sector in line with the need for rationalisation of the pyramid of the healthcare, to accelerate the digital transformation of health, to create supporting conditions for an increase in the number of medical staff, to support the development of research in the field of medical sciences and health sciences and to create an enabling environment for the development of medicines production in Poland.

The component contributes to addressing the Country Specific Recommendation to improve resilience, accessibility and effectiveness of the health system, including by providing sufficient resources and accelerating the deployment of e-health services (Country Specific Recommendation 1 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C 58/01).

D.1. Description of the reforms and investments for non-repayable financial support

D1.1 Improving the effectiveness, accessibility and quality of health services

The objective of the reform is to introduce comprehensive measures consisting in the restructuring of public hospitals. The reform is to ensure a lasting improvement in resilience, effectiveness, quality and accessibility of healthcare and long-term care, the financial situation of public hospitals, and the processes of supervision and management of these entities. The reform concerns the whole hospital sector providing health care services financed from public sources.

The reform shall also give grounds for actions for rationalisation of the pyramid of healthcare by, *inter alia*, introducing new provisions of the act on primary health care.

The hospital sector reform shall be introduced by a single new act, which, however, may introduce changes in existing acts, such as the act on medical activity or the act on health care services financed from public funds. The key provisions of the reform are the following:

- restructuring of the hospitals by consolidating, re-profiling and change of scope and structure of healthcare services provided by hospitals, on the basis of the national and regional transformation plans and the map of health needs, and updated hospital network accordingly;
- basis for actions for rationalisation of the pyramid of the healthcare by shifting certain health services from hospitals towards the lower levels of care (primary care, ambulatory care) with accordingly revised provisions for annual NFZ (National Fund for Health) financial plans; and
- changes in the hospital financing system ensuring effective and sustainable restructuring, including addressing hospital debt relief in a sustainable manner, based on transparent and evidence-based criteria and sound hospital financing system, incentivising proper care provision and increase of efficiency and care quality; and creating a professional system of supervision over hospitals, strengthening the management staff and incentivising the use of modern systems, tools and management methods in health care.

The hospital sector reform is to be complemented by the reforms of the National Oncological Network and National Cardiological Network, as well as the quality in health care and patient safety. The objective of these reforms is to improve access and quality of service of the oncological and cardiological care. The aim of the reform on the quality in health care and patient safety is to introduce systemic solutions on health care provisions quality standards and subsequent monitoring for sustainable results of the reform.

The reform shall also consist of a legislative package on the launch of national e-health services and their integration into existing/available eHealth systems at national and regional level.

The implementation of the reform shall be completed by 31 March 2026.

D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers

The objective of the investment is to support hospitals with investment needs resulting from the reform processes, including consolidation, re-profiling and transformation into long-term care entities. The due RRF investment intervention is to support hospitals only where investment needs have been identified and as a result of the reform processes under reform D.1.1. Medical entities eligible for support shall consist of hospitals within the meaning of the provisions of the Act on Medical Activity of 15 April 2011. The support shall cover only the scope of activities related to the provision of health services financed by the National Health Fund, and it shall not cover the commercial activities. The criteria for financial support shall be aligned with the reform's key fields of intervention, including: i) coverage (such as population covered, benefits covered and timely access to care), ii) equity (such as equity in financing, equity in delivery and use and equity in health outcomes), iii) efficiency, including operational activity (efficiency in outcomes delivery, efficiency in collection of funds), iv) quality of care and v) availability of resources (such as human resources and financial resources).

The main investment project categories shall consist of investment in new medical equipment and infrastructure and construction works.

The implementation of the investment shall be completed by 30 June 2026.

D1.1.2 Accelerating the digital transformation of health by further developing digital health services

The aim of the investment is to accelerate the digital transformation of health by introducing new digital health services and further developing existing digital services. The investment shall consist in launching new-e-services, including:

- a Patient Health Analysis tool supporting the analysis of the patient's health condition,
- a decision-making support tool for doctors based on AI algorithms and central repository of medical data integrated with other key healthcare systems, and
- a central repository of medical data integrated with other key healthcare systems.

A Security Operations Centre (SOC) at the e-Health Centre shall be also established. The Centre shall contribute to strengthening the IT resources of the e-Health Centre and adapting them to the growing needs in the field of cybersecurity.

The implementation of the investment shall be completed by 31 March 2026.

D2.1 Creating the right conditions for an increase in the number of medical staff

The objective of the reform is to contribute to improving the matching between needs and availability of medical professionals in Poland.

The reform shall consist of initiatives aimed at incentivising young people to take up and pursue medical studies and subsequently practise medicine in Poland. It comprises (i) the introduction of a scheme for granting loans to medical students, including financial incentives to practice in Poland after their studies end and (ii) the creation of second-cycle studies for medical emergency practitioners, which shall translate in increased qualifications and revenues for concerned professionals.

The reform shall also consist of the introduction of legislation to improve the attractiveness of medical professions and working conditions of medical professionals. This legislation shall increase the flexibility of post-graduate training, including by enabling doctors to be awarded a new certificate of professional competence in various specialised fields. It shall also increase the lowest basic salary for a wide range of medical professionals and reorganise the attribution of certain competences between doctors and specialised medical professionals, emergency medical professionals, nurses and other medical caregivers, after providing appropriate training.

The implementation of the reform shall be completed by 30 June 2026.

D2.1.1 Investments related to the modernisation and retrofitting of teaching facilities with a view to increasing admission limits for medical studies

The objective of the investment is to increase the capacity of medical teaching facilities and support students taking part in medical studies.

It shall consist of complementary sub-investments aiming to (i) create a temporary system of incentives to take up and continue studying in selected medical courses, (ii) modernise the teaching base for pre-clinical training, (iii) implement new learning arrangements based on digital technologies, (iv) adapt and improve the clinical base for teaching in central clinical hospitals, (v) implement training programmes and incentive schemes for teaching staff, (vi) modernise medical universities' libraries, student accommodation and IT systems, and (vii) digitise administrative processes for the management and governance of medical universities.

The implementation of the investment shall be completed by 30 June 2026.

D3.1 Increasing the efficiency and quality of the healthcare system by supporting Polish research and development potential in the field of medical sciences and health sciences

The objective of the reform is to contribute to improving the quality and efficiency of the healthcare system by supporting research and development in the medical and health fields.

The reform shall consist of new legislation in the field of clinical trials of medicinal products for human use, including a transparent system and reduced administrative and legal barriers. It shall also consist of designing and implementing a Strategic Plan for the development of the biomedical sector in Poland, based on an assessment of the needs of the Polish biomedical sector, of the existing barriers to its development and of areas with a potential competitive advantage.

The implementation of the reform shall be completed by 31 December 2022.

D3.1.1 Comprehensive development of research in the field of medical sciences and health sciences

The objective of the investment is to strengthen the resilience of the healthcare system by supporting research and development in the medical and health fields.

The investment shall consist of the following activities:

- Grant competitions to finance research and development activities with a focus on product innovations, such as on drugs, development of medical devices, especially for mobile use, as well as the development and implementation of ICT tools for medical and health purposes,
- Development of additional Clinical Research Support Centres tasked with research activities in the field of clinical trials, creation of an electronic communication platform for the Polish Clinical Research Network and of a search engine for clinical trials, as well as awareness raising activities in this field,
- Other supporting activities in the biomedical sector, including studies on the sector and support for universities and technological incubators, and
- Establishment of a Research and Analytical Centre within the National Institute of Public Health NIH – National Research Institute, primarily tasked with the monitoring of a large range of risks to human health and of the health situation and needs of the population. The related infrastructure shall also consist of laboratories with a broad range of biosecurity levels, including up to BSL-3+ level, as well as a campus to be used for training and education activities.

The implementation of the investment shall be completed by 30 June 2026.

D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
D1G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the Act on the modernisation and improvement of hospitals' efficiency	Provision in the Act indicating its entry into force				Q3	2022	Entry into force of the Act on the modernisation and improvement of hospitals' efficiency that shall provide for the following: - restructuring of the hospital sector by consolidating, re-profiling and changing the scope and structure of healthcare services provided by hospitals, on the basis of the national and regional transformation plans and the map of health needs on both national and regional levels, and updating the hospital network accordingly; - basis for actions for rationalisation of the pyramid of healthcare by shifting certain health services from hospitals towards the lower levels of care (primary care, ambulatory care) with accordingly revised provisions for annual NFZ (National Fund for Health) financial plans; - reforming of the hospital financing system to ensure an effective and sustainable restructuring, which includes addressing hospital debt relief in a sustainable manner, based on transparent and evidence-based criteria and incentivising proper care provision and increase of efficiency and care quality; - creating a professional system of supervision over hospitals, strengthening the management staff and incentivising the use of modern systems, tools and management methods in health care.

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
D2G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the Order of the President of the National Health Fund (NFZ) on strengthening primary care and coordinated care, followed by financial provisions (including amendments to contracts), allowing for national-wide implementation	Provision in the Order indicating the entry into force				Q3	2022	Entry into force of the Order of the President of the National Health Fund (NFZ) strengthening primary care and coordinated care, allowing for nation-wide implementation and covering: - preventive health care (task fee); - expected health outcomes and quality of care (incentives introduction); and - the chronic care disease management programme and care coordinator. The Order shall introduce financial arrangements providing for additional financial resources for the primary healthcare contracts, excluding night and holiday health care.
D3G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the Act on quality in health care and patient safety, together with necessary implementing regulations	Provision in the act indicating its entry into force				Q3	2022	Entry into force of the Act on quality in health care and patient safety that shall include provisions on the following elements: 1) authorisation: a system for assessing entities performing medical activities such as hospital services in the light of their compliance with the Ministry of Health and National Fund for Health requirements (so-called “basket requirements”); 2) accreditation: a framework for the external evaluation of the quality of health care and patient safety in hospitals 3) monitoring of adverse events: a framework for activities carried out by medical entities, in particular consisting of reporting of adverse events, conducting their systematic analysis and implementing conclusions from such analysis, with a view to prevent the occurrence of similar adverse events in the future; 4) medical registers: strengthening supervision over the keeping of medical registers and specifying

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										the rules for their creation and financing; 5) patients' experience: establishing a framework for measuring patients' experience in relation to NFZ contracting provisions; and 6) rehospitalisation: a framework for tracking and analysing 30 days re-admission rates connected to the NFZ contracting provisions (via implementing regulation).
D4G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the Act on the National Oncological Network establishing the rules for the operation of the network by introducing a new structure and a new model of cancer care management	Provision in the act indicating the entry into force				Q3	2022	Entry into force of the Act on National Oncological Network that shall ensure that all patients, regardless of their place of residence, receive oncological care based on the same diagnostic and therapeutic standards. The act shall focus on: - improving the organisation of the oncological care system by providing patients with access to the highest-quality diagnostic and therapeutic processes and comprehensive care along the entire "patient path" in the areas of primary care, specialised outpatient healthcare (AOS), hospital treatment and rehabilitation; - creating a new organizational structure and new model of cancer care management, including the monitoring centres; - improving the quality of life of patients during and after oncological treatment.
D5G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the Act on the National Cardiological Network establishing the rules for the operation of the network by introducing a new structure and a new model of	Provision in the act indicating the entry into force				Q1	2024	Entry into force of the Act on the National Cardiological Network that shall ensure that all patients, regardless of their place of residence, receive cardiological care based on the same diagnostic and therapeutic standards, i.e. uniformly defined paths, and that the system flexibly responds to their needs. The reform shall focus on: - improving the organisation of the cardiological care system by providing

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
			cardiological care management							patients with access to the highest-quality diagnostic and therapeutic processes and comprehensive care along the entire "patient path" in the areas of primary care, specialised outpatient healthcare (AOS), hospital treatment and rehabilitation; - creating a new organizational structure and new model of cardiological care management - improving the quality of life of patients during and after cardiological treatment.
D6G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of a legislative package pertaining to the launch of national e-health services and their integration into existing/available eHealth systems at national and regional level	Provision in the legislative package indicating the entry into force				Q1	2026	Entry into force of a legislative package that shall provide the appropriate legal and administrative environment for the launch of national e-health services (Patient Health Analysis Tools, decision-making support tool for doctors based on AI algorithms, central repository of medical data) and their integration into existing/available eHealth systems at national and regional level.
D7G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the regulation on the list of voivodeship monitoring centres for the oncological network	Provision in the regulation indicating the entry into force				Q1	2023	The regulation shall enter into force and provide for the establishment of voivodeship monitoring centres, which shall be medical entities selected from the oncological network in each of the 16 voivodeships, specialising in oncological care and providing comprehensive oncological treatment and monitoring.
D8G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Evaluation of the oncological care network	Publication of the report				Q2	2025	Report on the evaluation of the oncological care network, including: (i) oncological care assessment measures and (ii) quality indicators.
D9G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Milestone	Entry into force of a legal act on the list of precise criteria qualifying hospitals to specific categories to help define investment needs resulting from the	Provision in the legal act indicating the entry into force				Q4	2022	Entry into force of a legal act that shall establish the list of criteria on the basis of which hospitals shall be assigned to specific categories. These categories shall help define investment needs resulting from the hospitals modernisation and efficiency improving reform. The categorisation criteria shall be based on:

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
			reform							<ul style="list-style-type: none"> - coverage (such as the population covered; benefits covered; need for timely access to care); - equity (such as equity in financing; equity in delivery and use; equity in health outcomes); - efficiency, including operational activity (efficiency in outcomes delivery; efficiency in collection of funds); - quality of care; and - availability of resources (such as human resources and financial resources).
D10G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Milestone	First call for proposals for hospitals requesting financing	Publication of the first call for proposals				Q1	2023	<p>The first call for proposals for hospitals to finance acquisition or upgrade of equipment or infrastructure shall be launched. This call and all subsequent calls shall be based on the categorisation criteria and clear and transparent procedures.</p> <p>The medical equipment and infrastructure enhancement shall contribute to improving the quality of care, availability of resources and ensuring timely and comprehensive access to hospital care.</p> <p>The support shall cover only the scope of activities related to the provision of health services financed by the National Health Fund, and it shall not cover the commercial activities.</p>

They shall be located in the structure of smaller and local healthcare entities, having a pivotal role in providing professional support (from the hospital side) for Clinical research organizations and clinical trials sponsors (pharmaceutical companies) to foster negotiation, contracting and start of clinical trials (CT's).</p> <p>CTSC shall obtain funds for investments and institutional development. They shall be obliged to conduct training for medical staff and activities aiming to increase patient awareness in the field of CT's.</p> <p>Each grant agreement shall include the financial amount received and the details of the project.</p>

D.3. Description of the reforms and investments for the loan

D1.2 Increasing the efficiency, availability and quality of long-term care services of healthcare providers at district level

The objective of the reform is to support the transformation of district hospitals into long-term care and geriatric care units or centres. The reform shall be legally founded on a dedicated legislative act building on conclusions of a review of the potential for establishing long-term care and geriatric care units/centres in district hospitals in Poland. The reform shall also be in line with the Deinstitutionalisation Strategy prepared by the Ministry of Health (annex to the “Strategic framework on healthcare system development in Poland 2021-27 - Healthy Future”).

The implementation of the reform shall be completed by 30 September 2022.

D1.2.1 Development of long-term care by modernisation of medical entities’ infrastructure at district level

The investment shall support projects for necessary construction or renovation works and purchase of equipment for district hospitals establishing, within the transformation plans, long-term care and geriatric care units or centres. The investment contracts shall be attributed by transparent and clear provisions and in line with the objectives of reform D.1.2. The investment shall be made on the basis of quality assurance mechanisms for the integrated care services, addressing accessibility and affordability issues.

The implementation of the investment shall be completed by 30 June 2026.

D3.2 Creation of favourable conditions for the development of the medicines and medical devices sector

The objective of the reform is to introduce a regulatory framework facilitating attracting and increasing the production of medicines and active pharmaceutical ingredients (APIs) in Poland. This shall contribute to increasing Poland's medicines supply safety. The new framework shall reinforce the analytical framework for identification of the gaps and vulnerabilities of the APIs supply in Poland. It shall also support entrepreneurs deciding to produce the medicines subject to potential supply shortages in Poland.

The reform shall be linked to the implementation of the Pharmaceutical Strategy for Europe at Union level.

The implementation of the reform shall be completed by 30 June 2023.

D3.2.1 Developing the potential of the medicines and medical devices sector – investments linked to the production of API in Poland

The objective of the investment is to support projects in the field of API development. The support shall help development of APIs (including proprietary, biosimilar, and generic APIs), and related medical devices production lines, including with construction/extension of necessary infrastructure. At least 11 APIs shall be supported in this field.

The implementation of the investment shall be completed by 31 December 2023.

D.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
D1L	D1.2 Increasing the efficiency, availability and quality of long-term care services of healthcare providers at district level	Milestone	Review of the potential for establishing long-term care and geriatric care units/centres in district hospitals in Poland	Publication				Q2	2022	Publication of a review, as a part of the overall strategic analysis of long-term care in Poland foreseen under component A, on the potential for establishing long-term care and geriatric care units/centres in district hospitals (including transforming parts of district hospitals). The review shall in particular explore the possible ways to: - increase the availability of long-term health care services by addressing identified gaps in the provision of long-term care, in particular at a district level; - eliminate inequalities in access to long-term health care services; - improve working conditions for medical staff; and - improve quality of the long-term care.
D2L	D1.2 Increasing the efficiency, availability and quality of long-term care services of healthcare providers at district level	Milestone	Entry into force of a legislative act on the support for establishing long-term care and geriatric care units/centres in district hospitals, based on the results of the review	Provision in the legislative act indicating the entry into force				Q3	2022	Entry into force of a legislative act, based on the results of the review of the potential for establishing long-term care and geriatric care units/centres in district hospitals in Poland. The act shall specify how the support for establishing long-term care units and geriatric units and/or centres in district hospitals shall improve the provision of care, among others, to seniors at a local level. The legislative act shall be in line with the "Strategic framework on healthcare system development in Poland 2021-27 - Healthy Future".
D3L	D1.2.1 Development of long-term care by modernisation of	Milestone	List of district hospitals selected for the additional support	Publication of the list of selected				Q2	2023	A list of district hospitals selected for additional support for creation of long-term and geriatric beds shall be delivered.

E. COMPONENT E: GREEN, SMART MOBILITY

The component of the Polish Recovery and Resilience Plan primarily addresses the challenges of the Polish transport sector with respect to decarbonisation and air pollution. Since 1990 emissions of transport have increased by 214%, mainly due to a significant increase in road transport. Between 2005 and 2019 road traffic almost tripled, while in rail the corresponding increase was a mere 9%. The component seeks synergies between the decarbonisation and industrial agenda. Given the persistent high number of road fatalities in the country, another challenge addressed by the component is road safety. The component addresses also the exclusion of certain areas from a viable public transport offer.

The main objective of the component is thus to introduce reforms and investment to promote sustainable transport, via public urban transport, clean vehicles and the corresponding infrastructure, modal shift from road to railways, and intermodal transport. Competitiveness aspects are addressed through investment support to companies for developing zero-carbon transport technologies. Road safety is targeted through a comprehensive set of reforms and investment in increasing the safety of specific road sections. Investments in rural public transport aim at making such transport a viable alternative to cars and enhance economic and social cohesion and inclusion.

The component contributes to address the Country Specific Recommendation to focus investment-related economic policy on innovation, transport, notably on its sustainability, digital and energy infrastructure, healthcare and cleaner energy, taking into account regional disparities (Country Specific Recommendation 3 2019) and to focus investment on the green and digital transitions, in particular digital infrastructure, clean and efficient energy production and use and sustainable transport, which shall contribute to the gradual decarbonisation of the economy, including in coal regions (Country Specific Recommendation 3 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C 58/01). All investment projects financed under this component which require an environmental impact assessment (EIA) decision shall comply with Directive 2011/92/EU as amended by Directive 2014/52/EU. Specifically, all new projects that require an EIA shall be authorised under the *Act on the provision of information on the environment and its protection, public participation in environmental protection and environmental impact assessments, as amended by the Act of 30 March 2021 amending that Act and certain other acts*. Provisions of the ‘Guidelines on remedial actions for projects co-financed by EU Funds affected by the infringement 2016/2046’, as communicated to Poland on 23 February 2021 (ref. Ares(2021)1423319), shall be taken into account for the implementation of all investment projects for which an environmental decision or a construction or development permit was requested or issued before the entry into force of the Act of 30 March 2021.

E.1. Description of the reforms and investments for non-repayable financial support

E1.1 Increase in the use of environmentally friendly transport

The objective of the reform shall be to reduce emissions of greenhouse gases and air pollutants from transport and to increase the share of alternative fuels, through a wide range of regulatory and non-regulatory measures deployed as part of a comprehensive, long-term transport decarbonisation strategy.

Firstly, this objective of the reform shall be achieved by setting up an obligation for regional and local public authorities to exclusively purchase low and zero-emission buses in cities above 100,000 inhabitants as of 2025. This reform shall be completed by 31 December 2022.

Secondly, the use of environmentally friendly transport shall be encouraged through a set of measures supporting local authorities to set up and implement Sustainable Urban Mobility Plans ("SUMPs"). By 31 March 2023, an appropriately resourced administrative structure shall be set up to provide technical and financial support for the development of local SUMPs. Progress shall be monitored against a clearly defined target.

The third element of this reform shall consist of the introduction of a registration fee and ownership tax for emissions-related vehicles in line with the "polluter pays" principle by June 2026. The impact of this reform, in combination with other measures, on the take-up of clean vehicles shall be measured against a specific target for increasing the share of electric vehicles.

A specific target for the number of bus lines supported by the Public Bus Transport Fund shall also be set up to promote the availability of public transport.

The implementation of the reform shall be completed by 30 June 2026.

E1.1.1 Support for a low-carbon economy

The general objective of the investment shall be to contribute to the development of low- and zero-carbon economy by supporting industry for clean mobility and energy sectors. The specific objective of the investment shall be to increase the potential of selected sectors to develop zero- and low-carbon product solutions.

These objectives shall be pursued through the establishment of a dedicated financial instrument (Fund) for above-mentioned industrial projects. Supported products and technologies may notably include research and innovation processes, technology transfer and cooperation between enterprises focusing on the low carbon economy with focus on low and zero-emission innovative solutions in the field of sustainable mobility and zero-emission and low-emission energy sources. Beneficiaries shall primarily be SMEs and Mid-Caps. That fund, along with its investment strategy, shall be set up by 30 June 2022. The performance of the fund against its objectives shall be monitored through specific targets related to the production capacity of new zero-emission vehicles and the production and storage capacity of zero-emission/low-emission storage facilities annually produced as well as solutions for sustainable mobility and zero emission and low-emission energy sources (excluding Compressed Natural Gas and Liquefied Natural Gas). In order to ensure that the measure complies with the 'Do no significant harm' Technical Guidance (2021/C 58/01), the selection criteria of the financial instrument shall exclude the following list of activities: (i) activities

related to fossil fuels, including downstream use³⁰; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks³¹; (iii) activities related to waste landfills, incinerators³² and mechanical biological treatment plants³³; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 30 June 2022.

E1.1.2 Zero and low-emission collective transport (buses)

The investment aims at making public transport cleaner and increasing its attractiveness vis-à-vis private cars.

The investment shall consist of purchasing of 1738 clean buses for urban (zero-emission) and inter-urban (low-emission) transport by 31 March 2026.

The vehicles purchased shall enable collective transport in urban and extra-urban areas which have so far been excluded from transport. Due to technological considerations, zero-emission buses shall be used mainly for transport in cities (accessibility of charging infrastructure) and low-emission buses in suburban areas. Different types of technologies are envisaged to power zero- and low-emission buses (electric batteries, classical hybrids and plug-in, for gas: including LNG, LPG, CNG and EURO VI standard).

This shall lead to the uptake of alternative fuels technologies to accelerate the deployment of alternative fuels in other transport areas. The action shall support vehicles meeting all required and up-to-date standards for units using a given type of fuel and propulsion.

E2.1 Enhance the competitiveness of the railways sector

The upgrade of railways shall be carried out through a combination of reforms and investments. The reform shall aim at enhancing the resilience of railway operators and increasing the competitiveness and efficiency of railways sector in Poland's transport sector.

This shall be achieved by establishing priorities for intermodal transport and improving the capacity to plan and deploy railway transportation projects. It shall also be achieved by enabling infrastructure managers to reduce fees for the infrastructure access and compensate

³⁰ Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C 58/01).

³¹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the EU Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³² This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

³³ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

infrastructure managers for the reductions of those charges. The reform shall reduce costs for transport operators and ensure that capacity is maintained during a period of reduced demand for services, ensure that rail transport remains competitive and avoids a decline in the sector's share of transport during emergencies, epidemics or epidemic emergencies.

The reform shall be completed by 31 December 2022.

The viability of rail as compared to other transport modes shall also be enhanced by extending the road tolling system to an additional 1400 km of highways and expressways.

E2.1.1 Railways lines

The objective of this investment shall be to increase capacity and speed for both freight and passengers' transport.

The investment shall consist of the modernisation of 478 km of railways lines, including 300 km with TEN-T standards by 30 June 2026. The corresponding financial agreements shall be signed by 31 December 2024.

E2.1.2 Railways passenger rolling stock

The investment shall aim at increasing the attractiveness and viability of railway transport.

It shall be achieved through the purchasing of new rolling stock units for long-distance and regional use. Rolling stock shall be zero emission / electric and equipped with the European Rail Traffic Management System: 70 units for regional lines and 38 units for long-distance lines. The investment shall be completed by 30 June 2026. The corresponding financial agreements shall be signed by 30 September 2023.

E2.1.3 Intermodal projects

The investment shall aim at supporting inter-modal transport through appropriate investment.

The investment shall consist of increasing the capacity of intermodal trans-shipment terminals, focusing on rail-road terminals, and rolling stock. The corresponding financial agreements shall be signed by 31 December 2023. The impact of the investment shall be measured against a target formulated in terms of the relative increase in the trans-shipment capacity of terminals supported under the Recovery and Resilience Plan.

E2.2 Enhance transport safety

The reform shall aim at increasing transport safety, with a focus on the safety of vulnerable transport users.

The reform shall consist of a set of legislative changes introducing priority for pedestrians at crossings, uniform speed in built-up areas, and minimum distance between vehicles. These legislative changes were to enter into force by 31 December 2021. Progress of the reform shall be tracked against a road safety target on a relative decrease of fatalities and seriously injured people in line with EU and Member States' goals on road safety.

E2.2.1 Transport safety investments

The investment shall aim at increasing road transport safety.

That investment shall consist in the modernisation of 305 dangerous road black/hotspots, 90km length of ring roads constructed to remove safety black/hotspots, and 128 automatic road surveillance devices.

The investments shall be completed by 30 June 2026.

E2.2.2 Digitalisation of transport

The measure shall aim at making railways and public transport more attractive and efficient through the introduction of digital solutions.

The measure shall include the deployment of a new core module for ticketing system by 30 June 2026. That core module shall ensure the introduction of up-to-date solutions with access modules provided to all undertakings without fee, to allow passengers to benefit from a comprehensive ticket purchase system, open to all transport operators.

The measure shall include investments in:

- purchase and installation of 180 ERTMS on-board equipment;
- implementation of remote control on 35 rail traffic stations;
- modernisation of railway crossing systems in 45 locations;
- construction and renovation of local control centres and investments in traffic management;

to be completed by 30 June 2026 and the construction of SDIP (Dynamic Passenger Information System) and other systems in 55 locations by 31 March 2024.

E.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
E1G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Entry into force of a law setting an obligation to exclusively purchase low and zero-emission buses in cities above 100,000 inhabitants as of 2025	Provision in a law indicating its entry into force				Q4	2022	A law shall set an obligation to meet the threshold for low and zero emission buses in conducted tenders, in specific cases only the procurement of such types of vehicles shall be allowed. The law shall also impose a legal obligation on cities with more than 100 000 residents to award transport contracts only to entities using only zero-emission and low-emission buses (electric and hydrogen) as of 2025.
E2G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Measures to support the development of Sustainable Urban Mobility Plans (SUMP) and adoption of incentives for SUMPs' implementation providing technical and financial support to all functional urban areas by the Ministry of Infrastructure	Provision indicating the entry into force				Q1	2023	<p>Introducing measures to support development and implementation of Sustainable Urban Mobility Plans (SUMP), Those measures shall include:</p> <ul style="list-style-type: none"> - a new structure for SUMPs implementation support with a SUMP Steering Committee to stimulate the development and implementation of SUMP. - a SUMP competence centre within the Ministry of Infrastructure, which shall provide advisory and financial support to local government units. - the Plenipotentiary for SUMP in the Ministry of Infrastructure. <p>The new framework shall allow for the provision of adequate technical and financial support to entities interested in the preparation of the SUMP and shall improve the activities undertaken in this area by the central administration.</p>

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
E3G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Entry into force of a legal act introducing a registration fee for emissions-related vehicles in line with the "polluter pays" principle	Provision in the legal act indicating its entry into force				Q4	2024	A legal act shall introduce financial and fiscal measures stimulating demand for cleaner vehicles, including a higher registration fees for combustion vehicles, and enhancing measures on the accelerated depreciation of electric vehicles. The fee shall depend on CO2 and/or NOx emissions. Income from charges shall be used for the reduction of negative transport externalities and development of low-emission public transport in both urban and rural areas.
E4G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Entry into force of a legal act introducing an ownership tax for emissions-related vehicles in line with the "polluter pays" principle	Provision in the legal act indicating its entry into force				Q2	2026	An ownership tax for combustion vehicles shall be introduced and shall be correlated with CO2 and NOx emission of a vehicle. Income from the tax shall be used for the reduction of transport negative externalities and development of low-emission public transport in both urban and rural areas.
E5G	E1.1 Increase in the use of environmentally friendly transport	Target	Cities with new SUMP adopted		Number	0	30	Q2	2025	The quantitative target refers to the number of cities which adopt a new SUMP in line with the SUMP concept in the new EU Urban Mobility Framework Communication of 2021.
E6G	E1.1 Increase in the use of environmentally friendly transport	Target	Bus lines supported by the Public Bus Transport Fund		Number	0	4 500	Q4	2024	The target refers to the number of additional bus lines supported by Public Bus Transport Fund. The fund shall support public transport, which shall contribute to reducing individual transport and thus reducing the negative impact of transport on the environment. At the same time under call for proposals in the investment part, call for proposals shall be conducted for zero- and low-emission buses in line with DNSH.
E7G	E1.1 Increase in the use of environmentally friendly transport	Target	New zero-emission vehicles		% (Percentage)	0	100	Q2	2026	The goal is to increase the share by at least 100% of new zero-emission vehicles in the market (cars/buses and heavy-duty vehicles). As of the end of 2020, the number of electric vehicles registered in Poland was 10 041. Assuming the above number, it means that at the end of Q2 2026 the number of electric

E8G	E1.1.1 Support for a low-carbon economy	Milestone	Establishment of a financial instrument (Fund) for zero/low-emission mobility and energy	Approval and registration of the Fund, approval of the investment strategy by the Fund governing bodies				Q2	2022	<p>vehicles shall be at least 20 082.</p> <p>Establishment of the financial instrument ("Fund") to support the low-emission economy in Poland, including related investment strategy/policy. The latter shall be adopted by the governing bodies of the Fund, be in line with Commission's Guidance Note of 22 January 2021 related to financial instruments and including selection criteria to ensure compliance with the 'Do no significant harm' Technical Guidance (2021/C 58/01) of supported transactions under this measure through the use of sustainability proofing, an exclusion list, and the requirement of compliance with the relevant EU and national environmental legislation. In particular compliance of supported investments with Articles 6(3) and 12 of the Habitats Directive, and Article 5 of the Birds Directive shall be ensured and, where necessary, an Environmental Impact Assessment (EIA) or screening shall be carried out, in accordance with the EIA Directive. The Fund shall provide financial instruments (equity or debt) support for investment projects related to research and innovation processes, technology transfer and cooperation between enterprises focusing on the low carbon economy, resilience and adaptation to climate change, with focus on low and zero-emission innovative solutions in the field of sustainable mobility and zero-emission/low-emission energy sources (excluding Compressed Natural Gas and Liquefied Natural Gas), primarily implemented by SMEs and mid-caps. The management of the Fund shall be entrusted to a Fund manager selected via an open tender. The Fund Investment Committee shall be established and be responsible for approving projects of final recipients (investees) as</p>

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										proposed by the Fund manager based on market needs and in an open and market-conform way. The structure of the Fund shall enable to leverage private funds. The underlying legal acts shall ensure that any reflow (i.e. interests on the loan, return on equity, or principal repaid, minus associated costs) linked to these instruments shall be used for the same policy goals, including beyond 2026, or to repay the RRF loans.
E9G	E1.1.1 Support for a low-carbon economy	Milestone	Selection of financial intermediaries	Decision by the Fund's governing bodies				Q3	2022	Selection by the Fund manager of financial intermediaries that are entitled to deliver financial support from the Fund. The selection process shall follow an open and competitive procedure and lead to signature of contracts with the financial intermediaries, to support specific innovation and production capacity in zero-emission/low-emission mobility and energy sources (excluding Compressed Natural Gas and Liquefied Natural Gas), open to all types of enterprises with focus on SMEs and mid-caps. The contractual agreements signed with financial intermediaries shall specify the project eligibility criteria ensuring compliance with DNSH and the alignment with the applicable climate and digital tagging criteria of Annex VI of the RRF Regulation.
E10G	E1.1.1 Support for a low-carbon economy	Target	Production capacity of new zero-emission vehicles installed		Number	0	100 000	Q2	2026	The target refers to the annual production capacity of new zero-emission vehicles due to the investments supported by the Fund.
E11G	E1.1.1 Support for a low-carbon economy	Target	Production and storage capacity of zero-emission/low-emission storage and production of alternative fuels/energy		Number	0	1 000	Q2	2026	The target refers to the production and installed storage capacity (batteries) (in MW) of zero-emission energy sources annually produced (excluding Compressed Natural Gas and Liquefied Natural Gas) due to the investments supported by the Fund.
E12G	E1.1.1 Support for a low-	Target	SMEs and mid-caps supported by the specific		Number	0	150	Q4	2025	The target refers to the number of SMEs and mid-caps supported by the Fund and

E14G	E1.1.2 Zero and low-emission collective transport (buses)	Target	New zero-emission and low-emission vehicles in operation		Number	0	1 738	Q1	2026	<p>New zero-emission and low-emission buses delivered under contracts financed by this investment for public urban transport (zero-emission) and sub-urban/rural (low-emission) transport.</p> <p>Procurement of buses shall be done via open and competitive tenders.</p> <p>For zero - emission buses only electric and plug-in hybrid buses shall be supported. For low-emission buses, gas-fired: including LNG, LPG, CNG and meeting the EURO VI standard buses shall be supported. The number of low-emission buses shall not exceed 21% of the overall number of delivered buses.</p>
E15G	E2.1 Enhance the competitiveness of the railways sector	Milestone	Entry into force of an act amending the Rail Transport Act ensuring resilience of railway operators. Ministerial decision on establishing priorities for intermodal transport and on removals of bottlenecks to foster railways' capacity	Provision in the act amending the Rail Transport Act indicating its entry into force, and adoption of decision by Minister for Infrastructure on bottlenecks.				Q4	2022	<p>A legislative act amending the Rail Transport Act shall enable infrastructure managers to reduce fees for the infrastructure access and compensate infrastructure managers for the reductions of charges. The development of intermodal transport shall be fostered via the following measures: planning, coordination of programmes, innovation, investments, leading to increased intermodal capacity, along with the establishment of an intermodal unit in the Ministry of Infrastructure. The network status shall be analysed with emphasis on bottlenecks and a Decision shall be taken by the Minister of Infrastructure on priorities for the removal of bottlenecks, leading to increase of railways capacity.</p>
E16G	E2.1 Enhance the competitiveness of the railways sector	Target	Establishing tolling system on new roads		km	0	1 400	Q1	2023	Length of new roads subject to tolling system, covering both highways and expressways.
E17G	E2.1.1 Railways lines	Milestone	Signature of contracts following open and competitive tenders	Contracts signed				Q4	2024	Signature of contracts for the upgrade of 478km of railways lines to TEN-T standards and electrification. Contractors of railway

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										infrastructure modernisation shall be selected under the Public Procurement Law regime in a competitive model. Contracts shall concern main works on the lines.
E18G	E2.1.1 Railways lines	Target	Modernisation of 478 km of railways lines, including 300 km with TEN-T standards		Number	0	478	Q2	2026	Completion of upgrading works on 478 km of railways lines adapting 300 km to TEN-T network requirements (of which 200 km on the TEN-T Core network), 200 km of lines shall be adapted for 250 km/h speed for passenger traffic, 320 km shall allow 100 km/h speed for freight traffic, 144 km of lines shall be electrified, 70 km shall be upgraded to 160km/h speed.
E19G	E2.1.2 Railways passenger rolling stock	Milestone	Signature of contracts for passenger rolling stock	Contracts signed				Q3	2023	Projects shall be selected under competitive and open call for proposals. After the call, the contracts with selected beneficiaries shall be signed for the delivery of 70 zero-emission / electric and ERTMS-equipped rolling stock units for regional railways passenger transport. Additional 38 electric rolling stock units shall be subject to contracts signed with National Polish Railway Company PKP IC – operator of long-distance trains.
E20G	E2.1.2 Railways passenger rolling stock	Target	Electric and ERTMS-equipped rolling stock in operation for regional and long-distance railways lines		Number	0	108	Q2	2026	Number of new rolling stock units for long-distance and regional traffic put in operation. Rolling stock shall be zero emission / electric, compliant with the DNSH principles (e.g. zero-emission) and equipped with ERTMS: 70 units for regional lines and 38 units for long-distance lines. The rolling stock shall be transferred to the competent authority or the next operator (at market price net of the aid) at the end of the public service contract.
E21G	E2.1.3 Intermodal projects	Milestone	Signature of contracts for intermodal transport projects	Contracts signed				Q4	2023	Projects shall be selected under competitive and open call for proposals. After the call, the contracts with selected beneficiaries shall be signed for support of 10 intermodal terminals and delivery of 250 units of rolling stock compliant with technical specifications and

										with the DNSH principles (e.g. silent brakes, zero-emission) and with Global System for Mobile Communications (for locomotives).
E22G	E2.1.3 Intermodal projects	Target	Increase of transshipment capacity		% (Percentage)	Baseline 9,1 mln TEU/y installed capacity (ref 2020) for all terminals in Poland	5	Q2	2026	Increase of trans-shipment capacity of terminals supported under RRF by at least 5% vs baseline (2020).
E23G	E2.2 Enhance transport safety	Milestone	Entry into force of legal acts introducing: priority for pedestrians at crossings, uniform speed in built-up areas minimum distance between vehicles, road safety targets by 2030 (-50 % fatalities in accidents)	Provisions in the legal acts indicating the entry into force				Q4	2021	The following legislative changes promoting road safety shall be introduced: priority of pedestrians on crossings, introducing homogenous speed limit in urban areas (50 km/h) and minimum distance between vehicles on motorways and expressways (half the speed in meters). The overall goal for road safety shall be established in the National Road Safety Programme aiming for a 50% reduction of fatalities in road accidents by 2030 vs 2019 in line with EU commitment.
E24G	E2.2.1 Transport safety investments	Target	Completion of the construction of bypasses and removal of road safety black/hotspots		Number	0	10 km, 125 black/hotspots	Q4	2023	Completed investments in: 125 dangerous black/hotspots modernised, 10 km length of ring roads constructed to remove safety black/hotspots.
E25G	E2.2.1 Transport safety investments	Target	Completion of the construction of bypasses, removal of road safety black/hotspots, and installation of automatic road surveillance devices		Number	0	90 km, 305 black/hotspots, 128 devices	Q2	2026	Completed investments in: 305 dangerous black/hotspots modernised, 90km length of ring roads constructed to remove safety black/hotspots, 128 new automatic surveillance devices installed.
E26G	E2.2.2 Digitalisation of transport	Milestone	Single railways passengers' ticketing	System in operation				Q2	2026	The milestone refers to further development of a single railways ticketing system, making available a system designed and based on new technical solutions. The ticketing system shall be open for the integration of other

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										transport modes, and be open to all transport operators. Timetables and tariffs shall be accessible for the public in an easy, user-friendly manner. A new core module for ticketing system shall ensure the introduction of up-to-date solutions with access modules provided to all transport undertakings without fee, to allow passengers to benefit from a comprehensive and open ticket purchase system. The system run on a new core module shall be interoperable with TTE 2.0 solutions. The B2B and B2C modules shall be developed in order to ensure smooth connection with the new core module.
E27G	E2.2.2 Digitalisation of transport	Target	Installation of: Dynamic Passenger Information System (SDIP), control systems and level crossings in 55 areas		Number	0	SDIP: 10 locations, control: 15 locations, level crossing s: 30 locations	Q1	2024	Installation of Dynamic Passenger Information System (SDIP) in 10 locations for SDIP providing real-time information on railway traffic for passengers, 15 locations for automatic control allowing to manage particular railway areas from local traffic management centres, 30 level crossings concerning installation of automatic controlled safety devices (crossing gate, sound and light signalling systems).
E28G	E2.2.2 Digitalisation of transport	Target	Installation of automatic control, level crossings, 180 ERTMS on-board units, and related entry into service		Number	0	- 180 ERTMS on-board units; - 45 locations for level crossing s; - 35 locations for	Q2	2026	Completion of works related to: the installation of 180 ERTMS on-board-units (proposal shall be selected under competitive call for proposals), upgrade of 45 level crossings systems (including gates, sound and light safety systems), and introduction of automatic control of railway control points in 35 locations.

							automat ic control			

E.3. Description of the reforms and investments for the loan

E1.2 Increase the share of zero and low-emission transport, prevent and reduce the negative impact of transport on the environment

The reform shall aim at lowering the environmental and health impact of transport.

The reform shall consist of setting an obligation to create low-emission transport zones in cities with more than 100 000 inhabitants, where specific thresholds of air pollution are exceeded. Local authorities shall have 9 months for introducing such zones from the moment the excess in pollution level shall be established by the Environmental Protection Inspectorate.

The reform shall enter into force by 30 June 2024, and relevant cities shall introduce low-emission zones by 31 March 2025.

E1.2.1 Zero-emission public transport in cities (trams)

The investment shall aim at increasing the clean public transport offer in cities.

Support shall be given as a matter of priority to areas where clean transport zones have been or are planned to be introduced.

The investment shall consist of purchasing 110 zero-emission railways rolling stock (trams) for public transport in cities by 30 June 2026.

E2.3 Enhance transport accessibility, security and digital solutions

The reform shall aim at increasing the accessibility of transport.

It shall consist of an accelerated implementation of Regulation 1371/2007 on rail passenger's rights and on rolling stock adaptations to passengers with reduced mobility. The reform shall enter into force by 31 December 2022.

The reform shall also include an obligation to upgrade national, international and regional rolling stock with requirements for passengers with disabilities. That obligation shall enter into force by 30 June 2024.

E2.3.1 Regional railways passenger rolling stock

The investment shall aim at enhancing regional rail transport service, reduce transport exclusion and improve the travel comfort of regional passenger carriers, speed up the protection of passenger rights and improve the quality of rail services provided in regional, inter-regional and international passenger services.

To achieve the objective, the investment shall consist in the modernisation and purchase of 75 new zero-emissions rolling stock complying with TSI requirements, equipped with ERTMS and ensuring full accessibility for persons with disabilities and persons with reduced mobility

by	30	June	2026.
----	----	------	-------

E.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
E1L	E1.2 Increase the share of zero and low-emission transport, prevent and reduce the negative impact of transport on the environment	Milestone	Entry into force of a legal act introducing low-emission zones obligation for selected, most polluted cities	Provision in the legal act indicating its entry into force				Q2	2024	The legal act shall set an obligation, as of Q1 2025, to create low-emission transport zones in cities with more than 100,000 inhabitants, where there is an excess of harmful substances vs EU air pollution thresholds, and extend the possibility of introducing them to all urban areas, regardless of the number of inhabitants. Only "low emission" passenger vehicles shall be allowed to enter the zones. Within 9 months from the date of receiving information about exceeding the air pollution concentration level, the cities shall create a clean transport zone in their area. The period of 9 months is to enable local authorities to prepare the area where the clean transport zone is to be located to the planned restrictions.
E2L	E1.2 Increase the share of zero and low-emission transport, prevent and reduce the negative impact of transport on the environment	Milestone	Introduction of low-emission transport zones implemented by relevant municipal authorities	Introduction of low-emission transport zones				Q1	2025	Low-emission transport zones shall be obligatory in cities with more 100,000 inhabitants where air quality thresholds are exceeded. The General Environmental Protection Inspectorate shall prepare air quality report on yearly basis by 30 April. The cities which exceed the limits on air quality - identified in the first report published after legislation shall enter into force - shall have 6 months to establish low-emission transport zones.
E3L	E1.2.1 Zero-emission public transport in cities (trams)	Milestone	New trams: selection of beneficiaries	Contracts signed with beneficiary entities				Q1	2025	Contracts signed with beneficiary entities (municipalities or public service operators) for the purchase and entry into service of 110 trams, following open and transparent competitive calls. The beneficiary entities shall be selected via transparent and competitive calls open to all local authorities and public service operators. The criteria for selection of beneficiary entities shall in particular reflect the needs for clean public

Seq. N°	Related Measure (Reform or Investment)	Milestone / Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
										<p>transport and impact on decrease of emissions and congestion, maturity of the projects. Priority shall be given to areas where clean transport zones have been or are planned to be introduced.</p> <p>The funds shall be allocated in a fair and transparent manner agreed with the local governments and shall not be repaid by the final recipients or the local governments to the Polish government in any form.</p>

Equipment shall be procured via open and competitive call for proposals and in line with public service contracts. The rolling stock shall be transferred to the competent authority or the next operator (at market price net of the aid) at the end of the public service contract.

F. COMPONENT F: ‘IMPROVING THE QUALITY OF INSTITUTIONS AND THE CONDITIONS FOR THE IMPLEMENTATION OF THE RRP’

Poland faces a number of long-standing challenges related to the investment climate, notably with regard to the Polish judicial system as well as decision- and law-making processes.

This component therefore primarily seeks to improve the investment climate and put in place the conditions for an effective implementation of the Polish Recovery and Resilience Plan. To that end, the reforms aim to: strengthen certain aspects of the independence and impartiality of courts; remedy the situation of judges affected by the decisions of the Disciplinary Chamber of the Supreme Court in disciplinary cases and judicial immunity cases with a view to their reinstatement following positive review proceedings by the new Chamber, to be conducted without delay; enhance the consultation of social partners in the law-making process; increase the use of impact assessments in the law-making process; reduce the use of fast-track procedures in the law-making process; ensure the proper consultation of social partners and stakeholders in the implementation of the Recovery and Resilience Plan, including through the creation of a Monitoring Committee and ensure the application of the Arachne risk-scoring tool in the implementation of the Recovery and Resilience Plan.

The component contributes to addressing the Country Specific Recommendation to ‘[i]mprove the regulatory environment, in particular by strengthening the role of consultations of social partners and public consultations in the legislative process’ (Country Specific Recommendation 3 of 2019) and to ‘[e]nhance the investment climate, in particular by safeguarding judicial independence’ as well as ‘[e]nsure effective public consultations and involvement of social partners in the policy-making process’ (Country Specific Recommendation 4 of 2020).

F1 Justice system

The main aim of the reforms is to raise the standard of judicial protection and to improve the investment climate in Poland, as well as to support the internal control system referred to in Article 22 of Regulation (EU) 2021/241 of the European Parliament and of the Council, by strengthening the guarantees of independence and impartiality of courts.

The reform shall result in a strengthening of the independence and impartiality of courts and judges established by law in accordance with Article 19 of the TEU and the relevant EU acquis. In accordance with Article 24(3) of Regulation (EU) 2021/241, any other reform shall be undertaken without weakening this result and negatively impacting the below elements.

F1.1 Reform strengthening the independence and impartiality of courts

The reform shall:

- a) in all cases relating to the judges, including the disciplinary and waiver of judicial immunity, determine the scope of jurisdiction of the Supreme Court Chamber, other than the existing Disciplinary Chamber, meeting the requirements ensuing from Article 19 paragraph 1 of the TEU. This shall ensure that the above-mentioned cases shall be examined by an independent and impartial court established by law, while the discretionary power to designate the disciplinary tribunal with jurisdiction at first instance in cases concerning judges of ordinary courts shall be circumscribed,

- b) clarify the scope of disciplinary liability of judges, by ensuring that the right of Polish courts to submit requests for preliminary rulings to the CJEU is not restricted. Such request shall not be grounds to initiate disciplinary proceedings against a judge,
- c) while the judges may still be held liable for professional misconduct, including obvious and gross violations of the law, determine that the content of judicial decisions is not classified as a disciplinary offence,
- d) ensure that initiation of the verification, within the court proceedings, whether a judge meets the requirements of being independent, impartial and ‘being established by law’, according to Article 19 of the TEU is possible for a competent court where a serious doubt arises on that point and that such verification is not classified as a disciplinary offence,
- e) strengthen procedural guarantees and powers of parties in disciplinary proceedings concerning judges, through
 - (i) assuring that the disciplinary cases against judges of the ordinary courts are examined within a reasonable time,
 - (ii) making more precise regulations on territorial jurisdiction of the courts examining the disciplinary cases to ensure that the relevant court can be directly determined in accordance with the legislative act; and
 - (iii) ensuring that the appointment of a defence counsel in disciplinary proceedings concerning a judge is done within a reasonable timeframe, as well as providing time for substantive preparation of the defence counsel to perform their functions in the given proceedings. Simultaneously the court shall suspend the course of proceedings in case of a duly justified absence of the accused judge or his or her defence counsel.

The reform shall enter into force by the end of the second quarter of 2022.

F1.2 Reform to remedy the situation of judges affected by the decisions of the Disciplinary Chamber of the Supreme Court in disciplinary cases and judicial immunity cases

The reform shall ensure that judges affected by decisions of the Disciplinary Chamber of the Supreme Court have access to review proceedings of their cases. Such cases already decided by the Disciplinary Chamber shall be reviewed by a court that meets the requirements of Article 19 paragraph 1 of the TEU, in accordance with the rules to be adopted on the basis of the reform above. The legislative act shall set out that the first hearing of the court to adjudicate those cases shall take place within three months from receipt of the motion of the judge asking for a review, and that the cases shall be adjudicated within twelve months from receipt of such motion. The cases which are currently still pending before the Disciplinary Chamber shall be referred for further consideration to the court and in accordance with the rules determined within the above-mentioned proceedings.

The reform shall enter into force by the end of the second quarter of 2022.

Both reforms listed above with a completion date of Q2 2022 shall be fulfilled before the first payment request is submitted to the Commission and shall be a precondition for any payment under Article 24 of the RRF Regulation.

F2.1 Improving the process of law-making

The objective of the reform is the adoption of an amendment to the Rules of Procedure of the Sejm, the Senate and the Council of Ministers, which shall introduce a mandatory impact assessment and public consultation for draft laws proposed by deputies and senators. The reform shall also limit the use of fast-track procedures to well-specified and exceptional cases.

The implementation of the reform shall be completed by 30 September 2022.

F3.1 Improving the conditions for the implementation of the RRP

In order to ensure the proper consultation of social partners and stakeholders in the implementation of the Recovery and Resilience Plan, the reform shall include the entry into force of a legislative act to create a Monitoring Committee consisting of stakeholders and social partners involved in the implementation of the recovery and resilience plan. The Monitoring Committee shall be tasked to supervise the effective implementation of the recovery and resilience plan. The legislative act shall include a provision to make it a legal requirement to consult the Monitoring Committee during the implementation of the Recovery and Resilience Plan. The reform shall also include adoption of the guidance establishing the rules for involvement of stakeholders and social partners in programming, implementation, monitoring and evaluation of the RRP.

The reform shall also include putting in place a repository system in line with Article 22(2)(d) of Regulation (EU) No 2021/241 to allow for the collection, storage and monitoring of data on the milestones and targets, including at the level of final recipients. The data coming from this repository system shall feed into the Arachne system, which shall be used during audits and controls to prevent, detect and correct conflict of interest, fraud, corruption and double funding.

The implementation of the reform shall be completed by 30 June 2022.

F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

D7G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the regulation on the list of voivodship monitoring centres for the oncological network
D10G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Milestone	First call for proposals for hospitals requesting financing
E2G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Measures to support the development of Sustainable Urban Mobility Plans (SUMPs) and adoption of incentives for SUMPs' implementation providing technical and financial support to all functional urban areas by the Ministry of Infrastructure.
E16G	E2.1 Enhance the competitiveness of the railways sector	Target	Establishing tolling system on new roads
		Instalment amount	EUR 2 003 340 320

2.1.4 Fourth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A6G	A1.2 Further reducing regulatory and administrative burden	Milestone	Entry into force of an amendment to the Investment Zone Act
A10G	A1.2.2 Support for the preparation of investment sites for investments of key importance for the economy	Target	Hectares of developed investment areas
A25G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	Farmers and fishermen that completed projects to modernise their infrastructure and equipment, shorten food supply-chains and implement agriculture 4.0 solutions in production processes
A41G	A3.1 Workforce for the modern economy: improving the matching of skills and qualifications with labour market requirements due to the introduction of new technologies in the economy and the green and digital transformation	Milestone	Entry into force of the act amending the Education Law, establishing the legal framework for the network of Sectoral Skills Centres, providing targeted upskilling and reskilling highly relevant for the labour market needs
A42G	A3.1 Workforce for the modern economy: improving the matching of skills and qualifications with labour market requirements due to the introduction of new technologies in the economy and the green and digital transformation	Milestone	Entry into force of the act amending the Teachers Act enabling continuous vocational teacher training to be implemented in the Sectoral Skills Centres
A50G	A3.1.1 Investments in modern vocational training, higher education and lifelong learning	Target	Development of operationalised implementation programmes for the Integrated Skills Strategy at regional level by the established Regional Coordination Groups for vocational education and training and lifelong learning
A52G	A4.1 Effective institutions for the labour market	Milestone	New standards and performance framework on functioning and coordination of the Public Employment Services
A69G	A4.6 Increase labour market participation of certain groups by developing long-term care	Milestone	Strategic review of long-term care in Poland with a view to identifying reform priorities
B5G	B1.1 Clean air and energy efficiency	Milestone	Entry into force of the regulation setting quality standards for biomass solid fuels
B8G	B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings	Target	T1 - Heat source replacement in single-family buildings
B10G	B1.1.2 Replacement of heat source and improvement of energy efficiency in residential buildings	Target	T1 - Thermo-modernisation and installation of renewable energy sources in residential buildings (single and multi-family buildings)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
B17G	B2.1 Improving the conditions for the development of hydrogen technologies and other decarbonised gases	Milestone	Entry into force of the law laying down rules for hydrogen
B18G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Environmental permits issued for hydrogen refuelling stations
B25G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T1 - Installed capacity of onshore wind and photovoltaic installations (in GW)
C7G	C2.1 Scaling up digital applications in the public sphere, the economy and society	Milestone	Amendment to the Act of 17 February 2005 on computerisation of the activities of entities performing public tasks – introducing default digital form of documents and electronic form of services and digitisation of administrative processes
C14G	C2.1.2 Level playing field for schools with mobile multimedia devices – investments related to the fulfilment of minimum equipment standards	Target	New portable computers at disposal of teachers
C22G	C3.1 Enhancing the cybersecurity of information systems, strengthening the data processing infrastructure and optimising the infrastructure of the law enforcement services	Milestone	Amendment of the Regulation of the Council of Ministers of 11 September 2018 on the list of essential services and the thresholds for the disruptive effect of an incident for the provision of essential services
D11G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Target	T1 - Contracts signed between hospitals and the Ministry of Health for the purchase of medical equipment or for infrastructure investment
E13G	E1.1.2 Zero and low-emission collective transport (buses)	Milestone	Zero-emission and low-emission vehicles: selection of beneficiaries
E19G	E2.1.2 Railways passenger rolling stock	Milestone	Signature of contracts for passenger rolling stock
E21G	E2.1.3 Intermodal projects	Milestone	Signature of contracts for intermodal transport projects
E24G	E2.2.1 Transport safety investments	Target	Completion of the construction of bypasses and removal of road safety black/hotspots
F3G	F2.1 Remedying the situation of judges affected by the decisions of the Disciplinary Chamber in disciplinary cases and judicial immunity cases	Milestone	Reform to remedy the situation of judges affected by the decisions of the Disciplinary Chamber of the Supreme Court in disciplinary cases and judicial immunity cases

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
		Instalment amount	EUR 2 625 066 626

2.1.5 Fifth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A7G	A1.2.1 Investments for enterprises in products, services and competences of employees and staff related to the diversification of activities	Target	T1 - Number of SMEs and micro-enterprises in the HoReCa, culture and tourism sectors that have modernised their business activities
A14G	A1.3.1 Implementation of land-use planning reform	Target	Staff from local authorities and spatial planners that completed a course on the new spatial planning law
A30G	A2.2 Creating the conditions for the transition to a circular economy model	Milestone	Entry into force of new legislation introducing changes to the legislative framework to enable trade in secondary raw materials
A36G	A2.3.1 Development and equipment of competence centres (inter alia specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an Ecosystem of Innovation	Target	Implemented unmanned vehicles services preceded by pilot projects
A44G	A3.1.1 Investments in modern vocational training, higher education and lifelong learning	Target	T1 - Establishing a Network of functioning Sectoral Skills Centres providing targeted upskilling and reskilling highly relevant for the labour market needs
A58G	A4.2 Reform to improve the labour market situation of parents by increasing access to high-quality childcare for children up to the age of three	Milestone	Entry into force of an act amending the Act on the care of children up to three years of age ensuring a stable long-term domestic financing of the childcare services for children up to the age of three
C8G	C2.1 Scaling up digital applications in the public sphere, the economy and society	Milestone	Amendment to the Act of 11 March 2004 on tax on goods and services (use of structured invoices) – introducing structured electronic invoices to the economic market and the obligation to issue and receive them through the National System of e-invoices
C24G	C3.1.1 Cybersecurity – CyberPL, infrastructure of data processing and	Milestone	Signature of the contracts for the

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	optimization of the infrastructure of law enforcement services		buildings of the data centre facilities
C28G	C3.1.1 Cybersecurity – CyberPL, infrastructure of data processing and optimization of the infrastructure of law enforcement services	Target	Important Project of Common European Interest (IPCEI): National infrastructure/service data processing solutions developed
D5G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of the Act on the National Cardiological Network establishing the rules for the operation of the network by introducing a new structure and a new model of cardiological care management
E27G	E2.2.2 Digitalisation of transport	Target	Installation of: Dynamic Passenger Information System (SDIP), control systems and level crossings in 55 areas
		Instalment amount	EUR 1 946 819 746

2.1.6 Sixth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A16G	A1.3.1 Implementation of land-use planning reform	Target	Share of municipalities that adopted general spatial development plans
A22G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	SMEs in the agri-food sector that completed projects to modernise their infrastructure and equipment
A28G	A2.1.1 Investments in robotisation and digitalisation in enterprises	Target	T1 - Implementation of projects related to robotisation, artificial intelligence or digitalisation of processes, technologies, products or services
A46G	A3.1.1 Investments in modern vocational training, higher education and lifelong learning	Target	T1 - Skills provision to learners in the Sectoral Skills Centres including certification of learning outcomes (skills), issued and recognised by the sector
A54G	A4.1 Effective institutions for the labour market	Milestone	Entry into force of an amendment of relevant laws to implement the reform priorities as identified in the consultation on collective agreements and in the study on a single labour contract in Poland
A68G	A4.5 Extend careers and promote working beyond the statutory retirement age	Milestone	Report to evaluate the impact of measures taken to raise the effective retirement age

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A70G	A4.6 Increase labour market participation of certain groups by developing long-term care	Milestone	Entry into force of a law amending relevant laws to implement the reform priorities as identified in the strategic review of long-term care in Poland (in line with milestone A69G)
B6G	B1.1.1 Investments in heat sources in district heating systems	Target	T1 - Heat sources in district heating systems
B26G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T2 - Installed capacity of onshore wind and photovoltaic installations (in GW)
B31G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Target	T1 - Length of newly built or modernised power transmission network (km)
B34G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Milestone	Implementation of the data hub on the electricity market (OIRE/CSIRE)
C4G	C1.1.1 Ensuring access to very high-speed internet in white spots	Target	T1 - Additional households (residential premises) with broadband Internet access with a capacity of at least 100 Mb/s (with the possibility of increasing it to gigabit capacity)
C11G	C2.1.1 Public e-services, IT solutions improving the functioning of economic sectors and disruptive technologies in the public sector, the economy and society	Target	T1 - Projects that create new e-services and upgrade existing ones, improving the process of their creation or, through digitisation, improving the handling of processes
C19G	C2.1.3 E-competences	Target	T1 - Additional people trained in digital competences, including digital literacy
D12G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Target	T2 - Contracts signed between hospitals and the Ministry of Health for the purchase of medical equipment or for infrastructure investment
D17G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Milestone	Centre for digital medical documentation
E3G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Entry into force of a legal act introducing a registration fee for emissions-related vehicles in line with the "polluter pays" principle
E6G	E1.1 Increase in the use of environmentally friendly transport	Target	Bus lines supported by the Public Bus Transport Fund
E17G	E2.1.1 Railway lines	Milestone	Signature of contracts following open and competitive tenders
		Instalment amount	EUR 2 398 984 333

2.1.7 Seventh Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A2G	A1.1 Reform of the fiscal framework	Milestone	Entry into force of an amendment of the Act on Public Finances prepared by the Ministry of Finance implementing the new budgetary system, including the new classification system, the new model of budget management and the re-defined new medium-term budgetary framework
A4G	A1.1 Reform of the fiscal framework	Milestone	Review of the functioning of the stabilising expenditure rule in the years 2019-2023, with a view to: <ul style="list-style-type: none"> - assessing the effectiveness of the rule, including the application of the exit clause and the return clause - analysing the impact of changes in EU rules on the formula of the stabilising expenditure rule
A19G	A1.4 Reform to improve the competitiveness and protection of producers/consumers in the agricultural sector	Milestone	Adoption of a mid-term review of the new law to fight against the unfair use of contractual advantages in the agricultural and food trade sector
A31G	A2.2.1 Investments in the deployment of environmental technologies and innovation, including those related to circular economy	Target	Signed grant agreements for projects awarded to SMEs with solutions to develop and stimulate or apply green technologies (related to the circular economy)
A34G	A2.3.1 Development and equipment of competence centres (inter alia specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an Ecosystem of Innovation	Target	T1 - Local centres and infrastructure for unmanned vehicles completed by local government or designated entity to operate locally
A43G	A3.1 Workforce for the modern economy: improving the matching of skills and qualifications with labour market requirements due to the introduction of new technologies in the economy and the green and digital transformation	Milestone	Entry into force of the acts amending the Act on regional self-government, the Act on labour market institutions, the Act on county self-government and other relevant acts for the coordination of vocational education and training and lifelong learning in the regions
A55G	A4.1.1 Investment in support of labour market institution reform	Target	Public employment service (PES) where modernised IT systems shall be implemented

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A56G	A4.1.1 Investment in support of labour market institution reform	Target	Public employment service (PES) staff trained on the application of new procedures and use of IT tools, implemented as a result of the new laws on PES, on employment of third country nationals and on an electronic conclusion of job contracts by certain employers
A63G	A4.3.1 Investment support programmes making it possible, in particular, to develop activities, increasing participation in the implementation of social services, improving the quality of integration into social economy entities	Target	Number of entities that obtained a social enterprise status
A66G	A4.4.1 Investments related to equipping workers/companies to work remotely	Target	Companies supported in the field of digitalisation
B35G	B2.2.2 RES installations operated by energy communities	Target	Entities supported within the pre-investment part
B37G	B2.2.3 Construction of offshore terminal infrastructure	Milestone	Construction of an offshore installation terminal
D8G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Evaluation of the oncological care network
D19G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Target	T1 - Medical documents digitised
E5G	E1.1 Increase in the use of environmentally friendly transport	Target	Cities with new SUMPs adopted
		Instalment amount	EUR 2 172 902 039

2.1.8 Eight Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A11G	A1.2.2 Support for the preparation of investment sites for investments of key importance for the economy	Target	Hectares of developed investment areas

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A21G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	Distribution and storage centres that have been built or modernised and wholesale markets that have been modernised
A23G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	SMEs in the agri-food sector that completed projects to modernise their infrastructure and equipment
A24G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	Charitable organisations in the food sector that completed projects to modernise their infrastructure and equipment
A26G	A1.4.1 Investments to diversify and shorten the supply chain of agricultural and food products and build the resilience of the entities in the chain	Target	Farmers and fishermen that completed projects to modernise their infrastructure and equipment, shorten food supply-chains and implement agriculture 4.0 solutions in production processes
A32G	A2.2.1 Investments in the deployment of environmental technologies and innovation, including those related to circular economy	Target	Signed grant agreements for projects supporting the development of technologies contributing to the creation of a market for secondary raw materials
A40G	A2.4.1 Investment in the development of research capacities	Target	Laboratories with modern research and analytical infrastructure in institutions supervised and/or subordinated to the Ministry of Education and Science and the Ministry of Agriculture and Rural Development
A45G	A3.1.1 Investments in modern vocational training, higher education and lifelong learning	Target	T2 - Establishing a Network of functioning Sectoral Skills Centres providing targeted upskilling and reskilling highly relevant for the labour market needs
A47G	A3.1.1 Investments in modern vocational training, higher education and lifelong learning	Target	T2 - Skills provision to learners in the Sectoral Skills Centres including certification of learning outcomes (skills), issued and recognised by the sector
A64G	A4.3.1 Investment support programmes making it possible, in particular, to develop activities, increasing participation in the implementation of social services, improving the quality of integration into social economy entities	Target	Number of social economy entities, including social enterprises, covered by financial support
B27G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T3 - Installed capacity of onshore wind and photovoltaic installations (in GW)

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
B32G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Target	T2 - Length of newly built or modernised power transmission network (km)
B36G	B2.2.2 RES installations operated by energy communities	Target	Energy communities supported within the investment part
B41G	B3.1.1 Investments in wastewater treatment systems and water supply in rural areas	Target	Additional connections of rural population in scope of water infrastructure
C5G	C1.1.1 Ensuring access to very high-speed internet in white spots	Target	T2 - Additional households (residential premises) with broadband Internet access with a capacity of at least 100 Mb/s (with the possibility of increasing it to gigabit capacity)
C13G	C2.1.1 Public e-services, IT solutions improving the functioning of economic sectors and disruptive technologies in the public sector, the economy and society	Target	Authentications by the national node https://login.gov.pl (on average per month in a given year)
C15G	C2.1.2 Level playing field for schools with mobile multimedia devices – investments related to the fulfilment of minimum equipment standards	Target	New portable computers at disposal of students
C18G	C2.1.3 E-competences	Target	T2 - New digital coordinators, at least one per each municipality (gmina) in Poland
C26G	C3.1.1 Cybersecurity – CyberPL, infrastructure of data processing and optimization of the infrastructure of law enforcement services	Target	Mobile infrastructure for the crisis management system
D16G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Milestone	Security Operations Centre (SOC) at the e-Health Centre established
D26G	D2.1 Creating the right conditions for an increase in the number of medical staff	Target	Number of paramedics who completed their Master's degree
D28G	D2.1 Creating the right conditions for an increase in the number of medical staff	Target	Number of doctors and dentists who have obtained a certificate confirming their professional medical competences
D31G	D2.1.1 Investments related to the modernisation and retrofitting of teaching facilities with a view to increasing admission limits for medical studies	Target	Number of modernized teaching facilities for preclinical education (including Medical Simulation Centres), adapted facilities of the clinical base used in teaching in central clinical hospitals, modernized library infrastructures and students' dormitories in medical

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			universities
E12G	E1.1.1 Support for a low-carbon economy	Target	SMEs and mid-caps supported by the specific investments targeted by the Fund
		Instalment amount	EUR 2 681 587 199

2.1.9 Ninth Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A8G	A1.2.1 Investments for enterprises in products, services and competences of employees and staff related to the diversification of activities	Target	T2 - Number of SMEs and micro-enterprises in the HoReCa, culture and tourism sectors that have modernised their business activities
A15G	A1.3.1 Implementation of land-use planning reform	Target	Staff from local authorities and spatial planners that completed a course on the new spatial planning law
A17G	A1.3.1 Implementation of land-use planning reform	Target	Share of municipalities that adopted general spatial development plans
A29G	A2.1.1 Investments in robotisation and digitalisation in enterprises	Target	T2 - Implementation of projects related to robotisation, artificial intelligence or digitalisation of processes, technologies, products or services
A35G	A2.3.1 Development and equipment of competence centres (inter alia specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an Ecosystem of Innovation	Target	T1 - Local centres and infrastructure for unmanned vehicles completed by local government or designated entity to operate locally
A37G	A2.3.1 Development and equipment of competence centres (inter alia specialist training centres, implementation support centres, observatories) and unmanned vehicle industry management infrastructure, as an Ecosystem of Innovation	Target	Implemented unmanned vehicles services preceded by pilot projects
A48G	A3.1.1 Investments in modern vocational training, higher education and lifelong learning	Target	T3 - Skills provision to learners in the Sectoral Skills Centres including certification of learning outcomes (skills), issued and recognised by the sector

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A61G	A4.2.1 Support for childcare facilities for children up to three years of age (nurseries, children's clubs) under Maluch+	Target	Creation of new places in childcare facilities (nurseries, children's clubs) for children up to three years of age
B7G	B1.1.1 Investments in heat sources in district heating	Target	T2 - Heat sources in district heating systems
B9G	B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings	Target	T2 - Heat source replacement in single-family buildings
B11G	B1.1.2 Replacement of heat sources and improvement of energy efficiency in residential buildings	Target	T2 - Thermo-modernisation and installation of renewable energy sources in residential buildings (single and multi-family buildings)
B12G	B1.1.3 Thermal modernisation of schools	Target	Modernized or exchanged heat sources fulfilling DNSH requirements in buildings of educational institutions (under signed contracts)
B13G	B1.1.3 Thermal modernisation of schools	Target	Thermo-modernized buildings of educational institutions (under signed contracts)
B14G	B1.1.4 Strengthening the energy efficiency of local social activity facilities	Target	Social activity facilities with replaced inefficient solid fuel heat sources to modern heat sources fulfilling DNSH requirements
B15G	B1.1.4 Strengthening the energy efficiency of local social activity facilities	Target	Thermo-modernised facilities of social activity
B19G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Entry into operation of hydrogen refuelling stations
B20G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Research and innovation projects on innovative hydrogen powered transport units
B21G	B2.1.1 Investment in hydrogen, hydrogen manufacturing, storage and transport	Target	Capacity of low-carbon and renewable hydrogen production facilities, including electrolyzers, with associated infrastructure
B28G	B2.2 Improving the conditions for the development of renewable energy sources	Target	T4 - Installed capacity of onshore wind and photovoltaic installations (in GW)
B33G	B2.2.1 Development of transmission networks, smart electricity infrastructure	Target	T3 - Length of newly built or modernised power transmission network (km)
B38G	B2.2.3 Construction of offshore terminal infrastructure	Target	Construction of an offshore service terminal in Łeba and Ustka

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
C6G	C1.1.1 Ensuring access to very high-speed internet in white spots	Target	T3 - Additional households (residential premises) with broadband Internet access with a capacity of at least 100 Mb/s (with the possibility of increasing it to gigabit capacity)
C12G	C2.1.1 Public e-services, IT solutions improving the functioning of economic sectors and disruptive technologies in the public sector, the economy and society	Target	T2 - Projects that create new e-services and upgrade existing ones, improving the process of their creation or, through digitisation, improving the handling of processes
C20G	C2.1.3 E-competences	Target	T2 - Additional people trained in digital competences, including digital literacy
C23G	C3.1.1 Cybersecurity – CyberPL, infrastructure of data processing and optimization of the infrastructure of law enforcement services	Target	Projects in cybersecurity (CyberPL) under two areas of intervention: 1) Programme for Enhancing the Effectiveness of the National Cybersecurity System (KSC-PL) and 2) Construction and development of operational cybersecurity centres (SOC-DEV-PL)
C25G	C3.1.1 Cybersecurity – CyberPL, infrastructure of data processing and optimization of the infrastructure of law enforcement services	Milestone	Creation of standard data processing centres that provide energy-efficient infrastructure
D6G	D1.1 Improving the effectiveness, accessibility and quality of health services	Milestone	Entry into force of a legislative package pertaining to the launch of national e-health services and their integration into existing/available eHealth systems at national and regional level
D13G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Target	Hospitals with new medical equipment purchased in connection with their restructuring or their introduction into the National Oncological Network
D14G	D1.1.1 Development and modernisation of the infrastructure of highly specialised care centres and other healthcare providers	Target	Hospitals with enhanced infrastructure in connection with their restructuring or their introduction into the National Oncological Network
D15G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Milestone	Launch of new-e-services, including: - the Patient Health Analysis Tools; - decision-making support tool for doctors based on AI algorithms; and - central repository of medical data integrated with other key healthcare

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
			systems
D18G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Target	History of patients' interaction with healthcare kept in medical facilities digitised
D20G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Target	T2 - Medical documents digitised
D21G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Target	Central/regional healthcare providers connected to the central repository of medical data and central/regional healthcare providers equipped with the AI based decision-making support tool
D22G	D1.1.2 Accelerating the digital transformation of health by further developing digital health services	Target	Adult patients covered by the Patient Health Analysis Tool
D24G	D2.1 Creating the right conditions for an increase in the number of medical staff	Target	Number of medical universities students having received financial support in accordance with the Law on Higher Education and Science and on the Professions of Physician and Dentist
D30G	D2.1.1 Investments related to the modernisation and retrofitting of teaching facilities with a view to increasing admission limits for medical studies	Target	Number of students of nursing, midwifery, emergency medical services, medicine, dentistry, medical analytics, physiotherapy and pharmacy who received a scholarship and students of nursing, midwifery, emergency medical services covered by a scholarship, study co-financing or mentoring
D35G	D3.1.1 Comprehensive development of research in the field of medical sciences and health sciences	Milestone	Establishment of a specialised Research and Analytical Centre
D36G	D3.1.1 Comprehensive development of research in the field of medical sciences and health sciences	Target	Number of financed projects for research units and entrepreneurs in the biomedical sector
D37G	D3.1.1 Comprehensive development of research in the field of medical sciences and health sciences	Target	Number of created Clinical Trial Support Centres
E4G	E1.1 Increase in the use of environmentally friendly transport	Milestone	Entry into force of a legal act introducing an ownership tax for emissions-related vehicles in line with the "polluter pays" principle
E7G	E1.1 Increase in the use of environmentally friendly transport	Target	New zero-emission vehicles

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
E10G	E1.1.1 Support for a low-carbon economy	Target	Production capacity of new zero-emission vehicles installed
E11G	E1.1.1 Support for a low-carbon economy	Target	Production and storage capacity of zero-emission/low-emission storage and production of alternative fuels/energy
E14G	E1.1.2 Zero and low-emission collective transport (buses)	Target	New zero-emission and low-emission vehicles in operation
E18G	E2.1.1 Railway lines	Target	Modernisation of 478 km of railways lines, including 300 km with TEN-T standards
E20G	E2.1.2 Railways passenger rolling stock	Target	Electric and ERTMS-equipped rolling stock in operation for regional and long-distance railway lines
E22G	E2.1.3 Intermodal projects	Target	Increase of transshipment capacity
E25G	E2.2.1 Transport safety investments	Target	Completion of the construction of bypasses, removal of road safety black/hotspots, and installation of automatic road surveillance devices
E26G	E2.2.2 Digitalisation of transport	Milestone	Single railways passengers' ticketing
E28G	E2.2.2 Digitalisation of transport	Target	Installation of automatic control, level crossings, 180 ERTMS on-board units, and related entry into service
		Instalment amount	EUR 4 151 122 104

2.2. Loan

The instalments referred to in Article 3(2) shall be organised in the following manner:

2.2.1. First Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
B1L	B1.2 Facilitating the implementation of the energy saving obligation for energy companies	Milestone	Entry into force of the implementing regulation to the Energy Efficiency Act
B10L	B2.4 Legal framework for the development of energy storage facilities	Milestone	Entry into force of amendments of the Act on energy law with regards to energy storage
B21L	B3.3 Support for the sustainable management of water resources in agriculture and rural areas	Milestone	Entry into force of amendments to national legislation needed to improve the conditions for resilient water management in agriculture and rural areas
B22L	B3.3.1 Investments in increasing the potential of sustainable water management in rural areas	Milestone	Adoption of selection criteria for call for proposals
B25L	B3.4 Enabling framework for green transition investments in urban areas	Milestone	Green Urban Transformation Instrument
B28L	B3.5 Reform of housing construction for people with low and average incomes, taking into account the higher energy efficiency of buildings	Milestone	Entry into force of an amendment to the Act of December 8, 2006 on financial support for the creation of residential premises for rent, sheltered housing, night shelters, shelters for the homeless, heating plants and temporary premises, and resulting changes in other acts
C1L	C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs	Milestone	Amendment of the Regulation of 17 February 2020 on monitoring of electromagnetic field emission in the environment
C2L	C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs	Milestone	Amendment of the Regulation of the Council of Ministers of 10 September 2019 on environmental impact assessment
D1L	D1.2 Increasing the efficiency, availability and quality of long-term care services of healthcare providers at district level	Milestone	Review of the potential for establishing long-term care and geriatric care units/centres in district hospitals in Poland
		Instalment amount	EUR 1 368 535 211

2.2.2. Second Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A1L	A2.5 Strengthening the potential of the cultural sector and cultural industries for economic development	Milestone	Adoption of a policy paper for supporting green and digital actions in the cultural and creative sectors (CCS)
A2L	A2.5.1 A program to support the activities of entities in the cultural and creative industries to stimulate their development	Milestone	Selection criteria for the support of projects in the cultural and creative sectors (CCS)
B2L	B1.2.1 Energy efficiency and RES in companies – investments with the highest greenhouse gas reduction potential	Milestone	Financing instructions (including eligibility and selection criteria) for the support scheme targeting energy efficiency and RES in companies, including those covered by the EU Emissions Trading System
B7L	B2.3.1 Construction of offshore wind farms	Milestone	Call for proposals of selected offshore wind farm projects
B14L	B3.2 Support for the improvement of the condition of the environment and protection against hazardous substances	Milestone	Entry into force of a law to facilitate a comprehensive elimination of the negative environmental impact of large-scale post-industrial areas.
B15L	B3.2 Support for the improvement of the condition of the environment and protection against hazardous substances	Milestone	Entry into force of a legal act dedicated to hazardous materials lingering in the Baltic Sea
C4L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communications networks	Milestone	Framework for financial products to strengthen commercial investments in modern electronic communication network
C8L	C2.2 Reform of the basis of digitalisation of the education system	Milestone	Adoption of a new digitalisation policy for education, constituting the basis for changes in the education system and implementation of investments in ICT and defining the directions of digitization of the education system process in the short and long term
C9L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Milestone	Public consultation on the framework defining the procedures for the distribution of ICT equipment and for the provision of infrastructure to schools
D2L	D1.2 Increasing the efficiency, availability and quality of long-term care services of healthcare providers at district level	Milestone	Entry into force of a legislative act on the support for establishing long-term care and geriatric care units/centres in district hospitals, based on the results of the review
E5L	E2.3 Enhance transport accessibility, security and digital solutions	Milestone	Entry into force of a legal act introducing improvements to passenger rights in the field of rolling stock requirements

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
		Instalment amount	EUR 1 530 598 592

2.2.3. Third Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A9L	A2.6.1 Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Milestone	Preparatory works for the launching of the first Polish satellite: ECSS Phase 0/A/B/C (Mission analysis/needs identification, Feasibility and Definition)
C10L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Milestone	Framework defining the procedures for the distribution of ICT devices and for the provision of infrastructure to schools
D3L	D1.2.1 Development of long-term care by modernisation of medical entities' infrastructure at district level	Milestone	List of district hospitals selected for the additional support for the creation of long-term and geriatric beds, based on specific selection criteria
D6L	D3.2 Creation of favourable conditions for the development of the medicines and medical devices sector	Milestone	Entry into force of a legislative act safeguarding the security of medicines supply, including solutions to address medicines shortages and key vulnerabilities in the supply chains
		Instalment amount	EUR 1 044 408 451

2.2.4. Fourth Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A8L	A2.6.1 Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Target	Development of necessary infrastructure: the National Satellite Information System (NSIS) that shall provide monitoring services using data from satellite Earth Observation (EO)
B3L	B1.2.1 Energy efficiency and RES in companies – investments with the highest greenhouse gas reduction potential	Target	Award of all contracts for the implementation of energy efficiency and RES in enterprises
B6L	B2.3 Support for investment in offshore	Milestone	Entry into force of an amendment of the Regulation on the detailed conditions for

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	wind farm		the operation of the power system which shall amend national balancing rules in order to reduce to the maximum possible extent the impact of the allocation constraints
B24L	B3.4 Enabling framework for green transition investments in urban areas	Milestone	Entry into force of a law on sustainable urban development setting goals, directions, implementing rules and coordination mechanisms for the green transformation of cities
C3L	C1.2 Increasing the level of accessibility and use of modern wired and wireless communication for social and economic needs	Milestone	New legal act eliminating barriers to the implementation of the 5G network by vertical industries
C5L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communications networks	Milestone	Contracts awarded for the construction of 5G base stations
D4L	D1.2.1 Development of long-term care by modernisation of medical entities' infrastructure at district level	Target	Signed contracts between district hospitals and the Ministry of Health (or other institution indicated by Ministry) for investment support in creating long-term care and geriatric care units/centres
D7L	D3.2.1 Developing the potential of the medicines and medical devices sector – investments linked to the production of API in Poland	Milestone	Selection of API production works projects to be supported
D8L	D3.2.1 Developing the potential of the medicines and medical devices sector – investments linked to the production of API in Poland	Target	Number of Supported Critical Active Pharmaceutical Product Ingredients
		Instalment amount	EUR 1 368 535 211

2.2.5. Fifth Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
-------------------	--	--------------------	------

B4L	B2.3 Support for investment in offshore wind farms	Milestone	Entry into force of implementing regulations following from the Act on the promotion of electricity generation in offshore wind farms
B11L	B2.4.1 Energy storage systems	Target	T1 - Residential energy storage facilities for energy prosumers installed
B26L	B3.4.1 Investments in a green transformation of cities	Target	T1 - Signature of all of the contracts for investments in green urban development projects (calculated on a compound basis)
B29L	B3.5.1 Investments in energy-efficient housing for low- and average-income households	Target	T1 - Completed construction of the first batch of energy efficient housing for low and average income households
C7L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communications networks	Target	Cities covered by the new stationary monitoring system of electromagnetic field emissions from radio communication installations
E1L	E1.2 Increase the share of zero and low-emission transport, prevent and reduce the negative impact of transport on the environment	Milestone	Entry into force of a legal act introducing low-emission zones obligation for selected, most polluted cities
E6L	E2.3 Enhance transport accessibility, security and digital solutions	Milestone	Obligation to upgrade national, international and regional rolling stock with requirements for passengers with disabilities
		Instalment amount	EUR 1 125 440 141

2.2.6. Sixth Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A3L	A2.5.1 A program to support the activities of entities in the cultural and creative industries to stimulate their development	Target	Number of signed contracts for projects by cultural institutions, NGO's, SMEs and micro-enterprises operating in the cultural and creative sectors (CCS)
A4L	A2.5.1 A program to support the activities of entities in the cultural and creative industries to stimulate their development	Target	Number of fellowships awarded in the cultural and creative sectors (CCS)
A6L	A2.5.2 Investment for the creation of a model support centre for creative industries	Target	Cooperation agreements concluded between clients of the creative industries support centre
A7L	A2.6.1 Development of the national system of monitoring services, products, analytical tools, services and	Milestone	Entry into force of a law on space activities to be adopted by the Parliament

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
	accompanying infrastructure using satellite data		
B8L	B2.3.1 Construction of offshore wind farms	Milestone	Commencement of construction works
B17L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Land areas for which field research related to the presence of pollutants and hazardous materials was carried out
		Instalment amount	EUR 1 125 440 141

2.2.7. Seventh Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
A10L	A2.6.1 Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Target	T1 - Launching of the first Polish satellite
B30L	B3.5.1 Investments in energy-efficient housing for low- and average-income households	Target	T2 - Completed construction of the second batch of energy – efficient housing for low and average – income households.
C12L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Target	Classrooms in vocational schools and general education institutions equipped with IT tools to allow for remote teaching
E2L	E1.2 Increase the share of zero and low-emission transport, prevent and reduce the negative impact of transport on the environment	Milestone	Introduction of low-emission transport zones implemented by relevant municipal authorities
E3L	E1.2.1 Zero-emission public transport in cities (trams)	Milestone	New trams: selection of beneficiaries
		Instalment amount	EUR 1 044 408 451

2.2.8. Eight Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
-------------------	--	--------------------	------

B5L	B2.3 Support for investment in offshore wind farm	Milestone	Organisation of auctions for electricity from offshore wind farms
B18L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Locations in Polish sea areas (including wrecks) with performed inventory and field research related to the presence of hazardous materials
B19L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Area of remediated land (in hectares)
B20L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Area of revitalised buildings (in square metres)
B23L	B3.3.1 Investments in increasing the potential of sustainable water management in rural areas	Target	Area of agricultural land / forest (in hectares) benefitting from improved water retention
B27L	B3.4.1 Investments in a green transformation of cities	Target	T2 - Signature of all of the contracts for investments in green urban development projects (calculated on a compound basis)
C11L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Target	Classrooms in schools and other educational institutions equipped with Local Area Network (LAN) connection
C13L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Target	Artificial Intelligence (AI) and Science, Technology, Engineering and Mathematics (STEM) laboratories set-up in schools and other educational institutions
C14L	C2.2.1 Equipping schools/institutions with adequate ICT devices and infrastructure to improve the overall performance of education system	Milestone	Digitalisation of the examination system
		Instalment amount	EUR 1 368 535 211

2.2.9. Ninth Instalment (loan support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
-------------------	--	--------------------	------

A5L	A2.5.2 Investment for the creation of a model support center for creative industries	Milestone	Renovation of a museum to host a model support centre for creative industries
A11L	A2.6.1 Development of the national system of monitoring services, products, analytical tools, services and accompanying infrastructure using satellite data	Target	T2 - Launching of the next three Polish satellites
B9L	B2.3.1 Construction of offshore wind farms	Target	Installed capacity of offshore wind farms (in MW)
B12L	B2.4.1 Energy storage systems	Target	T2 - Residential energy storage facilities for energy prosumers installed
B13L	B2.4.1 Energy storage systems	Milestone	Modernisation of the electricity storage facility (storage and pumped power station)
B16L	B3.2.1 Investments in risk neutralisation and the restoration of large-scale brownfield sites and the Baltic Sea	Target	Documentation sets prepared for investments related to the negative environmental impact of selected large-scale brownfields and hazardous materials sunken on the bottom of the Baltic Sea
B31L	B3.5.1 Investments in energy-efficient housing for low- and average-income households	Target	Completed construction of the third batch of energy-efficient housing for low- and average-income households
C6L	C1.2.1 Strengthening the potential of commercial investments in modern electronic communications networks	Target	Construction of 5G base stations in rural areas
D5L	D1.2.1 Development of long-term care by modernisation of medical entities' infrastructure at district level	Target	Finalised projects aiming to develop long-term care and geriatric care provision in district hospitals
E4L	E1.2.1 Zero-emission public transport in cities (trams)	Target	New trams in operation for public urban transport
E7L	E2.3.1 Regional railways passenger rolling stock	Target	New electric and ERTMS- equipped regional trains in operation
		Instalment amount	EUR 1 530 598 592

SECTION 3: ADDITIONAL ARRANGEMENTS

1. Arrangements for monitoring and implementation of the recovery and resilience plan

The monitoring and implementation of the recovery and resilience plan of Poland shall take place in accordance with the following arrangements:

The body responsible for the overall coordination of the implementation and monitoring of the recovery and resilience plan shall be the Ministry of Funds and Regional Policy. This body is also responsible for drawing-up of the payment requests, management declarations and summary of audits and shall also act as the liaison between the Commission and the Polish authorities. The institutions responsible for the implementation of the reforms and investments shall verify compliance of implemented measures with the applicable Union and national law and progress in achievement of defined milestones and targets at the level of the final recipients. Information and results from these verifications shall be submitted to the coordinating body via an IT system.

In addition, a Monitoring Committee consisting of stakeholders and social partners involved in the implementation of the recovery and resilience plan shall be established via a legislative act. The Monitoring Committee shall supervise the effective implementation of the recovery and resilience plan. The legislative act shall include a provision to make it a legal requirement to consult the Monitoring Committee during the implementation of the recovery and resilience plan.

Audits shall be carried out by the National Revenue Administration, in particular by the Department of Public Funds Audit at the Ministry of Finance and 16 tax administration chambers (regional offices) in the country. This audit body shall verify the correct implementation of reforms and investments, achievement of defined milestones and targets, the effectiveness of mechanisms to prevent, detect and correct serious irregularities, meaning fraud, corruption and conflicts of interest and avoid double funding and the reliability and security of the IT system.

2. Arrangements for providing full access by the Commission to the underlying data

The Ministry of Funds and Regional Policy, as the central coordinating body for the Polish recovery and resilience plan and its implementation, is responsible for overall coordination and monitoring of the plan. In particular, it acts as a coordinating body for monitoring progress on milestones and targets and for providing reporting and requests for payments. It coordinates the reporting of milestones and targets, relevant indicators, but also qualitative financial information and other data, such as on final recipients. The data encoding is taking place in an IT system through which the institutions responsible for the implementation of reforms and investments are obliged to report to the Ministry of Funds and Regional Policy

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2.1 of this Annex, Poland shall submit to the Commission a duly justified request for payment of the financial contribution and, where relevant, of the loan. Poland shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
