OF THE COUNCIL establishing a European Union Agency for the
Cooperation of Energy Regulators (recast)

Delegations will find in the Annex the four column document concerning the abovementioned proposal.

Proposal for REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL establishing a European Union Agency for the Cooperation of Energy Regulators (recast)

Since further amendments are to be made, that Regulation should be recast in the interest of clarity.</p>	
<p>(2) The creation of the Agency has manifestly improved coordination between regulators on cross-border issues. Since its creation, the Agency has received new important tasks concerning the monitoring of wholesale markets under Regulation (EU) No 1227/2011 of the European Parliament and of the Council² and in the field of cross-border energy infrastructure under Regulation (EU) No 347/2013 of the European Parliament and Council³.</p>		<p>(2) The creation of the Agency has manifestly improved coordination between regulators on cross-border issues. ¹ Regulation (EC) No 713/2009 of the European Parliament and of the Council of 13 July 2009 establishing an Agency for the Cooperation of Energy Regulators (OJ L 211, 14.8.2009, p. 1)

² Regulation (EU) No 1227/2011 of the European Parliament and of the Council of 25 October 2011 on wholesale energy market integrity and transparency (OJ L 326, 8.12.2011, p. 1).

³ Regulation (EU) No 347/2013 of the European Parliament and Council of 17 April 2013 on guidelines for trans-European energy infrastructure and repealing Decision No 1364/2006/EC and amending Regulations (EC) No 713/2009, (EC) No 714/2009 and (EC) No 715/2009 (OJ L 115, 25.4.2013, p. 39).

<p>(3) It is projected that the need for coordination of national regulatory actions will increase further in the coming years. Europe's energy system is in the middle of its most profound change in decades. More market integration and the change towards more variable electricity production requires increased efforts to coordinate national energy policies with neighbours and to use the opportunities of cross-border electricity trade.</p>		<p>(3) It is projected that the need for coordination of national regulatory actions will increase further in the coming years. Europe's energy system is in the middle of its most profound change in decades. More market integration and the change towards more variable electricity production requires increased efforts to coordinate national energy policies with neighbours and to use the opportunities of cross-border electricity trade.</p>	
<p>4) Experience with the implementation of internal market rules has shown that uncoordinated national action can lead to severe problems for the market, notably in closely interconnected areas where decisions of Member States often have a tangible impact on their neighbours. To achieve the positive effects of the internal electricity market for consumer welfare, security of supply and decarbonisation Member States, and in particular independent national regulators, are required to cooperate on those regulatory measures which have a cross-border effect.</p>		<p>(4) Experience with the implementation of internal market rules has shown that uncoordinated national action can lead to severe problems for the market, notably in closely interconnected areas where decisions of Member States often have a tangible impact on their neighbours. To achieve the positive effects of the internal electricity market for consumer welfare, security of supply and decarbonisation Member States, and in particular independent national regulators, are required to cooperate on those regulatory measures which have a cross-border effect.</p>	

<p>(5) Fragmented national state interventions in energy markets constitute an increasing risk to the proper functioning of cross-border electricity markets. The Agency should therefore be given a role in the development of a coordinated European resource adequacy assessment, in close cooperation with the European Network of Transmission System Operators for Electricity ("ENTSO for Electricity"), in order to avoid the problems of fragmented national assessments which follow different uncoordinated methods and do not sufficiently take into account the situation in neighbouring countries. The Agency should also supervise the technical parameters developed by the ENTSO for Electricity for an efficient participation of cross-border capacities and other technical features of capacity mechanisms.</p>		<p>(5) Fragmented national state interventions in energy markets constitute an increasing risk to the proper functioning of cross-border electricity markets. 	<p>AM 1 <i>(5a) (new) Despite significant progress in integrating and interconnecting the internal electricity market, some Member States or regions still remain isolated or not sufficiently interconnected. This is particularly the case with regard to insular Member States and Member States located in the periphery. The Agency in its work should take account of the specific situation of</i></p>		

	<i>those Member States or regions as appropriate.</i>		
(6) Security of electricity supply requires a coordinated approach to prepare against unexpected supply crises. The Agency should therefore coordinate national actions related to risk preparedness, in line with [Risk Preparedness Regulation as proposed by COM(2016) 862]. The Agency should therefore coordinate national actions related to risk preparedness, in line with [Risk Preparedness Regulation as proposed by COM(2016) 862].	
(7) Due to the close interconnection of the Union electricity grid and the increasing need to cooperate with neighbouring countries to maintain grid stability and integrate large volumes of renewable energies, regional operational centres will play an important role for the coordination of transmission system operators. The Agency should guarantee regulatory oversight over the regional operational centres where necessary. The Agency should guarantee regulatory oversight over the Regional Security Coordinators where necessary.	
(8) As large parts of new electricity generation will be connected at local level, distribution system operators will play an important role when it comes to operating the European electricity system in a flexible and efficient manner. <p>(9) Member States should cooperate closely, eliminating obstacles to cross-border exchanges of electricity and natural gas with a view to achieving the objectives of the Union energy policy. A European Union Agency for the Cooperation of Energy Regulators (the Agency) was established by Regulation (EC) No 713/2009 in order to fill the regulatory gap at Union level and to contribute towards the effective functioning of the internal markets in electricity and natural gas. The Agency enables national regulatory authorities to enhance their cooperation at Union level and participate, on a mutual basis, in the exercise of Union -related functions.</p>		<p>(9) Member States should cooperate closely, eliminating obstacles to cross-border exchanges of electricity and natural gas with a view to achieving the objectives of the Union energy policy. <p>(10) The Agency should ensure that regulatory functions performed by the national regulatory authorities in accordance with [the recast Electricity Directive as proposed by COM(2016) 864/2] and Directive 2009/73/EC of the European Parliament and of the Council are properly coordinated and, where necessary, completed at Union level. In exceptional circumstances, in order to safeguard the proper functioning of the internal energy market, ACER should be able to adopt decisions addressed to such entities to ensure that they comply with their obligations under certain energy law.</i></p>		

<p>(12) The Agency should monitor, in cooperation with the Commission, the Member States and relevant national authorities, the internal markets in electricity and natural gas and inform the European Parliament, the Commission and national authorities of its findings where appropriate. <p>(14) The Agency has an important role in developing framework guidelines which are non-binding by nature ("framework guidelines"). Network codes should be in line with those framework guidelines. It is also considered appropriate for the Agency, and consistent with its purpose, to have a role in reviewing draft network codes to ensure that they are in line with the framework guidelines and provide for the necessary degree of harmonisation, before it submits them to the Commission for adoption.</p>	<p>AM 8 (14) The Agency has an important role in developing framework guidelines which are non-binding by nature ("framework guidelines"). <p>(15) With the adoption of a set of network codes and guidelines which provide for a stepwise implementation and a further refinement of common regional and Union-wide rules, the role of the Agency in monitoring the implementation of the network codes and guidelines has increased. <p>(16) From experience with the implementation of network codes and guidelines it has emerged that it is useful to streamline the procedure for the regulatory approval of regional or Union-wide terms and conditions or methodologies to be developed under the guidelines and network codes by submitting them directly to the Agency in order for national regulators, represented in the Board of Regulators, to be able to decide upon them.</p>		<p>(16) From experience with the implementation of network codes and guidelines it has emerged that it is useful to streamline the procedure for the regulatory approval of regional or Union-wide terms and conditions or methodologies to be developed under the guidelines and network codes by submitting them directly to the Agency in order for national regulators, represented in the Board of Regulators, to be able to decide upon them.</p>	
<p>(17) Since the stepwise harmonisation of the Union energy markets involves finding regional solutions regularly as an interim step, it is appropriate to reflect the regional dimension of the internal market and to provide for appropriate governance mechanisms. Regulators responsible for coordinated regional approvals should be able to prepare Board of Regulators decisions on issues of regional relevance in a regional subcommittee of the Board of Regulators, unless those issues are of general importance for the Union.</p>	<p>AM 10 (17) Since the stepwise harmonisation of the Union energy markets involves finding regional solutions regularly as an interim step, it is appropriate to reflect the regional dimension of the internal market and to provide for appropriate governance mechanisms. <i>Decisions on proposals for joint regional terms and conditions or methodologies should therefore be taken by the competent regulatory authorities of the region concerned unless those decisions have a tangible impact on the internal energy market. <p>(18) Since the Agency has an overview of the national regulatory authorities, it should have an advisory role towards the Commission, other Union institutions and national regulatory authorities as regards the issues relating to the purpose for which it was established.
