PROCIV 67
CODEC 1210

DECISION
OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL
ON SERIOUS CROSS-BORDER THREATS TO HEALTH
AND REPEALING DECISION NO 2119/98/EC

**DECISION
OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL**

of 22 October 2013

**on serious cross-border threats to health
and repealing Decision No 2119/98/EC**

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 168(5) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee¹,

After consulting the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure²,

¹ OJ C 181, 21.6.2012, p.160.

² Position of the European Parliament of 3 July 2013 (not yet published in the Official Journal) and decision of the Council of 7 October 2013.

Whereas:

- (1) Article 168 of the Treaty on the Functioning of the European Union (TFEU) states, inter alia, that a high level of human health protection is to be ensured in the definition and implementation of all Union policies and activities. That Article further provides that Union action is to complement national policies, is to cover monitoring, early warning of, and combating serious cross-border threats to health, and that Member States are, in liaison with the Commission, to coordinate among themselves their policies and programmes in the areas covered by Union action in the field of public health.
- (2) Pursuant to Decision No 2119/98/EC of the European Parliament and of the Council¹ a network for the epidemiological surveillance and control of communicable diseases in the Community was set up. Experience gained in the implementation of that Decision confirms that coordinated Union action on monitoring, early warning of and combating those threats adds value to the protection and improvement of human health. However, a number of developments at Union and international level in the past decade have made a review of that legal framework necessary.
- (3) Apart from communicable diseases, a number of other sources of danger to health, in particular related to other biological or chemical agents or environmental events, which include hazards related to climate change, could by reason of their scale or severity, endanger the health of citizens in the entire Union, lead to the malfunctioning of critical sectors of society and the economy and jeopardise an individual Member State's capacity to react. The legal framework set up under Decision No 2119/98/EC should, therefore, be extended to cover other threats and provide for a coordinated wider approach to health security at Union level.

¹ OJ L 268, 3.10.1998, p. 1.

- (4) An important role in the coordination of recent crises of Union relevance has been played by an informal group composed of high-level representatives from Member States, referred to as the Health Security Committee, and established on the basis of the Presidency Conclusions of 15 November 2001 on bioterrorism. It is necessary to give this group a formalised status and to assign it a well-defined role to avoid duplications with other Union entities responsible for risk management.
- (5) Regulation (EC) No 851/2004 of the European Parliament and of the Council of 21 April 2004 establishing a European Centre for Disease Prevention and Control¹ ('ECDC') provides the ECDC with a mandate covering surveillance, detection and risk-assessment of threats to human health from communicable diseases and outbreaks of unknown origin. The ECDC has progressively taken over the epidemiological surveillance of communicable diseases and the operation of the Early Warning and Response System ('EWRS') from the Community network set up under Decision No 2119/98/EC. Those changes are not reflected in Decision No 2119/98/EC, because it was adopted before the establishment of the ECDC.
- (6) The International Health Regulations (2005) ('IHR') adopted by the Fifty-eighth World Health Assembly on 23 May 2005 reinforced the coordination among States Parties to the World Health Organisation (WHO), which include all the Member States of the Union, of the preparedness for, and response to, a public health emergency of international concern. Union legislation should take this development into account, including the integrated all-hazards approach of the WHO covering all categories of threat regardless of their origin.

¹ OJ L 142, 30.4.2004, p.1.

- (7) This Decision should apply without prejudice to other binding measures concerning specific activities or setting the standards of quality and safety of certain goods, which provide for special obligations and tools for monitoring, early warning and combating specific threats of a cross-border nature. Those measures include in particular relevant Union legislation in the area of common safety concerns in public health matters, covering goods such as pharmaceutical products, medical devices and foodstuffs, and exposure to ionising radiation.
- (8) The protection of human health is a matter which has a cross-cutting dimension and is relevant to numerous Union policies and activities. In order to achieve a high level of human health protection, and to avoid any overlap of activities, duplication or conflicting actions, the Commission, in liaison with the Member States, should ensure coordination and exchange of information between the mechanisms and structures established under this Decision, and other mechanisms and structures established at Union level and under the Treaty establishing the European Atomic Energy Community (the Euratom Treaty), the activities of which are relevant to the preparedness and response planning, monitoring, early warning of, and combating serious cross-border threats to health. In particular the Commission should ensure that relevant information from the various rapid alert and information systems at Union level and under the Euratom Treaty is gathered and communicated to the Member States through the EWRS.

- (9) The structures for coordinating responses to serious cross-border health threats established by this Decision, should, in exceptional circumstances, be available to the Member States and the Commission also when the threat is not covered by this Decision and where it is possible that public health measures taken to counter that threat are insufficient to ensure a high level of protection of human health. The Member States should, in liaison with the Commission, coordinate the response within the Health Security Committee ('HSC') as established by this Decision in close cooperation with, where applicable, other structures, established at Union level and under the Euratom Treaty, for the monitoring, early warning or combating of such threats.
- (10) Preparedness and response planning is an essential element for effective monitoring, early warning of and combating serious cross-border threats to health. Such planning should include in particular adequate preparedness of critical sectors of society, such as energy, transport, communication or civil protection, which rely, in a crisis situation, on well-prepared public health systems that are also in turn dependent on the functioning of those sectors and on maintenance of essential services at an adequate level. In the event of a serious cross-border threat to health originating from a zoonotic infection, it is important to ensure the interoperability between health and veterinary sectors for preparedness and response planning.

- (11) Cross-border threats to health are often related to pathogenic agents that can be transmitted between individuals. While such transmission cannot be completely prevented, general hygiene measures can make an important contribution by reducing the speed and extent of the spread of the agent and thus reducing the general risk. Such measures could include information on good hygiene practices, such as effective hand washing and drying, in collective settings and in the workplace, and should take into account the existing recommendations of the WHO.
- (12) The IHR already require Member States to develop, strengthen and maintain their capacity to detect, assess, notify and respond to a public health emergency of international concern. Consultation with a view to coordinating among the Member States is necessary in order to promote interoperability between national preparedness planning in view of the international standards, while respecting Member States' competence to organise their health systems. Member States should regularly provide the Commission with an update on the status of their preparedness and response planning at national level. Information provided by the Member States should include the elements that Member States are obliged to report to the WHO in the context of the IHR. That information should particularly address the cross-border dimension of preparedness and response planning. The Commission should compile the information received and should ensure its exchange among Member States through the HSC. When a Member State decides to substantially revise its national preparedness planning, it should inform the Commission thereof and submit the information about the main aspects of that revision in a timely manner to the Commission to allow for information exchange and possible consultations within the HSC.

- (13) The European Parliament in its resolution of 8 March 2011 and the Council in its Conclusions of 13 September 2010 stressed the need to introduce a common procedure for the joint procurement of medical countermeasures, and in particular of pandemic vaccines, to allow Member States, on a voluntary basis, to benefit from such group purchases, e.g. by obtaining advantageous prices and order flexibility with regard to a given product. With regard to pandemic vaccines, in the context of limited production capacities at global level, such a procedure would be undertaken with the aim of enabling more equitable access to vaccines for the Member States involved, to help them to better meet the vaccination needs of their citizens, in line with vaccination policies in the Member States.
- (14) Unlike communicable diseases, the surveillance of which at Union level is carried out on a permanent basis by the ECDC, other serious cross-border threats to health do not currently necessitate a systematic monitoring. A risk-based approach, whereby monitoring is carried out by Member States' monitoring systems and available information is exchanged through the EWRS, is therefore more appropriate to those threats.
- (15) The Commission will strengthen cooperation and activities with the ECDC, the Member States, the European Medicines Agency and the WHO to improve the methods and processes through which information related to the coverage of vaccine-preventable diseases is provided.

- (16) A system enabling the notification at Union level of alerts related to serious cross-border threats to health should be put in place in order to ensure that competent public health authorities in Member States and the Commission are duly informed in a timely manner. The EWRS should, therefore, be extended to all the serious cross-border threats to health covered by the present Decision. The operation of the EWRS should remain within the remit of the ECDC. The notification of an alert should be required only where the scale and severity of the threat concerned are or could become so significant that they affect or could affect more than one Member State and require or could require a coordinated response at the Union level. To avoid duplication, the Commission should ensure that alert notifications under the EWRS and other rapid alert systems at Union level are linked to each other to the extent possible so that the competent authorities of the Member States can avoid as much as possible notifying the same alert through different systems at Union level.
- (17) In order to ensure that the assessment of risks to public health at the Union level from serious cross-border threats to health is consistent as well as comprehensive from a public health perspective, the available scientific expertise should be mobilised in a coordinated manner, through appropriate channels or structures depending on the type of threat concerned. That assessment of risks to public health should be developed by means of a fully transparent process and should be based on principles of excellence, independence, impartiality and transparency. That assessment should be provided by the agencies of the Union in accordance with their missions or by the Commission if the risk assessment required is totally or partially outside the mandates of the agencies of the Union.

- (18) Taking account of the applicable rules in each case, scientific experts should make declarations of interest and of commitments. Such declarations should include any activity, position, circumstances or other facts potentially involving direct or indirect interest in order to make it possible to identify interests which could be considered prejudicial to those experts' independence.
- (19) Effectively responding to serious cross-border threats to health at national level could require consultation among Member States, in conjunction with the Commission, with a view to coordinating national responses and could necessitate exchange of information. Pursuant to Decision No 2119/98/EC, the Member States already consult each other in liaison with the Commission with a view to coordinating their efforts and their response at Union level with regard to communicable diseases. A similar mechanism should apply to all serious cross-border threats to health regardless of their origin. It should also be recalled that, independently of this Decision, a Member State may, in the case of a major emergency, request assistance under Council Decision 2007/779/EC, Euratom of 8 November 2007 establishing a Community Civil Protection Mechanism.¹
- (20) The obligations of Member States to provide information under this Decision do not affect the application of point (a) of Article 346(1) TFEU pursuant to which no Member State is obliged to supply information the disclosure of which it considers contrary to the essential interests of its security.

¹ OJ L 314, 1.12.2007, p. 9.

- (21) The Member States have a responsibility to manage public health crises at national level. However, measures taken by individual Member States could damage the interests of other Member States if they are inconsistent with one another or based on diverging risk assessments. The aim to coordinate the response at Union level should, therefore, seek to ensure inter alia that measures taken at national level are proportionate and limited to public health risks related to serious cross-border threats to health, and do not conflict with obligations and rights laid down in the TFEU such as those related to the restriction on travel and trade.
- (22) Inconsistent or confusing communication with the public and stakeholders such as healthcare professionals can have a negative impact on the effectiveness of the response from a public health perspective as well as on economic operators. The coordination of the response within the HSC, assisted by relevant subgroups, should, therefore, encompass rapid information exchange concerning communication messages and strategies and addressing communication challenges with a view to coordinating risk and crisis communication, based on robust and independent evaluation of public health risks, to be adapted to national needs and circumstances. Such exchanges of information are intended to facilitate monitoring of the clarity and coherence of messages to the public and to healthcare professionals.

- (23) The applicability of certain specific provisions of Commission Regulation (EC) No 507/2006 of 29 March 2006 on the conditional marketing authorisation for medicinal products for human use falling within the scope of Regulation (EC) No 726/2004 of the European Parliament and of the Council¹ and of Commission Regulation (EC) No 1234/2008 of 24 November 2008 concerning the examination of variations to the terms of marketing authorisations for medicinal products for human use and veterinary medicinal products² depends on the recognition at Union level, in the framework of Decision No 2119/98/EC, of an emergency situation or of a pandemic situation with respect to human influenza. Those provisions allow for the accelerated marketing of certain medicinal products in the case of urgent need, by means, respectively, of a conditional marketing authorisation and of the temporary option of granting a variation to the terms of a marketing authorisation for a human influenza vaccine even where certain non-clinical or clinical data are missing. However, in spite of the utility of such provisions in the event of a crisis, to date no specific procedure exists for issuing such recognitions at Union level. It is therefore appropriate to provide for such a procedure as part of laying down the standards of quality and safety for medicinal products.
- (24) Before recognising a situation of public health emergency at Union level, the Commission should liaise with the WHO in order to share the Commission's analysis of the situation of the outbreak and to inform the WHO of its intention to issue such a decision. Where such a decision is adopted, the Commission should also inform the WHO thereof.

¹ OJ L 92, 30.3.2006, p. 6.

² OJ L 334, 12.12.2008, p. 7.

- (25) The occurrence of an event that is linked to serious cross-border threats to health and is likely to have Europe-wide consequences could require the Member States concerned to take particular control or contact-tracing measures in a coordinated manner to identify those persons already contaminated and those persons exposed to risk. Such cooperation could require the exchange of personal data through the system, including sensitive information related to health and information about confirmed or suspected human cases of disease, between those Member States directly involved in the contact-tracing measures.
- (26) Cooperation with third countries and international organisations in the field of public health should be fostered and it is particularly important to ensure the exchange of information with the WHO on the measures taken pursuant to this Decision. In particular, it could be in the interests of the Union to conclude international cooperation agreements with third countries or international organisations, including the WHO, to foster the exchange of relevant information from monitoring and alerting systems on serious cross-border threats to health. Within the limits of the Union's competences, such agreements could include, where appropriate, the participation of such third countries or international organisations in the relevant epidemiological surveillance monitoring network and the EWRS, exchange of good practice in the areas of preparedness and response planning, public health risk-assessment and collaboration on response coordination.

- (27) The processing of personal data for the purpose of implementing this Decision should comply with Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data¹ and Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and on the free movement of such data². In particular, the operation of the EWRS should provide for specific safeguards for the safe and lawful exchange of personal data for the purpose of contact tracing measures implemented by Member States at national level.
- (28) Since the objectives of this Decision, cannot be sufficiently achieved by the Member States alone due to the cross-border dimension of serious threats to health and can, therefore, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Decision does not go beyond what is necessary in order to achieve those objectives.
- (29) As responsibility for public health is not an exclusively national matter in certain Member States, but is substantially decentralised, national authorities should, where appropriate, involve the relevant competent authorities in the implementation of this Decision.

¹ OJ L 281, 23.11.1995, p. 31.

² OJ L 8, 12.1.2001, p. 1.

(30) In order to ensure uniform conditions for the implementation of this Decision, implementing powers should be conferred on the Commission to adopt implementing acts in relation to: templates to be used when providing the information on preparedness and response planning; the establishment and update of a list of communicable diseases and related special health issues subject to the network of epidemiological surveillance and the procedures for the operation of such a network; the adoption of case definitions for those communicable diseases and special health issues covered by the epidemiological surveillance network and, where necessary, for other serious cross-border threats to health subject to ad hoc monitoring; the procedures for the operation of the EWRS; the procedures for the information exchange on and the coordination of the responses of the Member States; the recognition of situations of public health emergency at Union level and the termination of such a recognition. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council of 16 February 2011 laying down the rules and general principles concerning mechanisms for control by Member States of the Commission's exercise of implementing powers¹. As the implementing acts provided for by this Decision concern the protection of human health, the Commission may not adopt a draft implementing act where the Committee on serious cross-border threats to health delivers no opinion, in accordance with point (a) of the second subparagraph of Article 5(4) of Regulation (EU) No 182/2011.

¹ OJ L 55, 28.2.2011, p. 13.

- (31) The Commission should adopt immediately applicable implementing acts where, in duly justified cases relating to the severity or novelty of a serious cross-border threat to health or to the rapidity of its spread between the Member States imperative grounds of urgency so require.
- (32) The European Data Protection Supervisor has been consulted in accordance with Article 28(2) of Regulation (EC) No 45/2001 and has adopted an opinion¹.
- (33) Accordingly, Decision No 2119/98/EC should be repealed and replaced by this Decision,

HAVE ADOPTED THIS DECISION:

¹ OJ C 197, 5.7.2012, p. 21.

Chapter I

General provisions

Article 1

Subject matter

1. This Decision lays down rules on epidemiological surveillance, monitoring, early warning of, and combating serious cross-border threats to health, including preparedness and response planning related to those activities, in order to coordinate and complement national policies.
2. This Decision aims to support cooperation and coordination between the Member States in order to improve the prevention and control of the spread of severe human diseases across the borders of the Member States, and to combat other serious cross-border threats to health in order to contribute to a high level of public health protection in the Union.
3. This Decision also clarifies the methods of cooperation and coordination between the various actors at Union level.

Article 2

Scope

1. This Decision shall apply to public health measures in relation to the following categories of serious cross-border threats to health:
 - (a) threats of biological origin, consisting of:
 - (i) communicable diseases;
 - (ii) antimicrobial resistance and healthcare-associated infections related to communicable diseases (hereinafter "related special health issues");
 - (iii) biotoxins or other harmful biological agents not related to communicable diseases;
 - (b) threats of chemical origin;
 - (c) threats of environmental origin;
 - (d) threats of unknown origin;
 - (e) events which may constitute public health emergencies of international concern under the IHR, provided that they fall under one of the categories of threats set out in points (a) to (d).

2. This decision shall also apply to the epidemiological surveillance of communicable diseases and of related special health issues.
3. The provisions of this Decision are without prejudice to provisions of other Union acts governing specific aspects of monitoring, early warning of, the coordination of preparedness and response planning for, and the coordination of, combating serious cross-border threats to health, including measures setting quality and safety standards for specific goods and measures concerning specific economic activities.
4. In exceptional emergency situations, a Member State or the Commission may request response coordination within the HSC, as referred to in Article 11, for serious cross-border threats to health other than those covered in Article 2(1), if it is considered that public health measures taken previously have proven insufficient to ensure a high level of protection of human health.
5. The Commission shall, in liaison with the Member States, ensure coordination and information exchange between the mechanisms and structures established under this Decision and similar mechanisms and structures established at Union level or under the Euratom Treaty whose activities are relevant for preparedness and response planning, monitoring, early warning of, and combating serious cross-border threats to health.

6. Member States shall retain the right to maintain or introduce additional arrangements, procedures and measures for their national systems in the fields covered by this Decision, including arrangements provided for in existing or future bilateral or multilateral agreements or conventions, on condition that such additional arrangements, procedures and measures do not impair the application of this Decision.

Article 3

Definitions

For the purposes of this Decision, the following definitions shall apply:

- (a) 'case definition' means a set of commonly agreed diagnostic criteria that have to be fulfilled in order to accurately identify cases of a targeted serious cross-border threat to health in a given population, while excluding the detection of unrelated threats;
- (b) 'communicable disease' means an infectious disease caused by a contagious agent which is transmitted from person to person by direct contact with an infected individual or by indirect means such as exposure to a vector, animal, fomite, product or environment, or exchange of fluid, which is contaminated with the contagious agent;
- (c) 'contact tracing' means measures implemented in order to trace persons who have been exposed to a source of a serious cross-border threat to health, and who are in danger of developing or have developed a disease;

- (d) 'epidemiological surveillance' means the systematic collection, recording, analysis, interpretation and dissemination of data and analysis on communicable diseases and related special health issues;
- (e) 'monitoring' means the continuous observation, detection or review of changes in a condition, in a situation, or in activities, including a continuous function that uses systematic collection of data and analysis on specified indicators relating to serious cross-border threats to health;
- (f) 'public health measure' means a decision or an action which is aimed at preventing, monitoring or controlling the spread of diseases or contamination, combating severe risks to public health or mitigating their impact on public health;
- (g) 'serious cross-border threat to health' means a life-threatening or otherwise serious hazard to health of biological, chemical, environmental or unknown origin which spreads or entails a significant risk of spreading across the national borders of Member States, and which may necessitate coordination at Union level in order to ensure a high level of human health protection;

Chapter II

Planning

Article 4

Preparedness and response planning

1. Member States and the Commission shall consult each other within the HSC referred to in Article 17 with a view to coordinating their efforts to develop, strengthen and maintain their capacities for the monitoring, early warning and assessment of, and response to, serious cross-border threats to health. That consultation shall be aimed at:
 - (a) sharing best practice and experience in preparedness and response planning;
 - (b) promoting the interoperability of national preparedness planning;
 - (c) addressing the intersectoral dimension of preparedness and response planning at Union level; and
 - (d) supporting the implementation of core capacity requirements for surveillance and response as referred to in Articles 5 and 13 of the IHR.

2. For the purpose of paragraph 1, Member States shall by ...⁺ and every three years thereafter provide the Commission with an update on the latest situation with regard to their preparedness and response planning at national level.

* OJ: please insert the date: one year after the entry into force of this Decision.

That information shall cover the following:

- (a) identification of, and update on the status of the implementation of, the core capacity standards for preparedness and response planning as determined at national level for the health sector, as provided to the WHO in accordance with IHR;
- (b) description of the measures or arrangements aimed at ensuring interoperability between the health sector and other sectors including the veterinary sector, that are identified as being critical in the case of an emergency, in particular:
 - (i) coordination structures in place for cross-sectoral incidents;
 - (ii) emergency operational centres (crisis centres).
- (c) description of the business continuity plans, measures or arrangements aimed at ensuring the continuous delivery of critical services and products.

The obligation to provide the information referred to in points (b) and (c) shall only apply if such measures or arrangements are in place or are provided for as part of national preparedness and response planning.

3. For the purpose of paragraph 1, when substantially revising national preparedness planning, Member States shall inform the Commission in a timely manner of the main aspects of the revision of their preparedness planning at national level that are relevant to the objectives referred to in paragraph 1 and to the specific issues referred to in paragraph 2.

4. When receiving classified information transmitted pursuant to paragraphs 2 and 3 of this Article, the Commission and the HSC shall apply the rules set out in the Annex to Commission Decision 2001/844/EC, ECSC, Euratom of 29 November 2001 amending its internal Rules of Procedure¹.

Each Member State shall ensure that its national security regulations apply to all natural persons resident on its territory and all legal persons established on its territory that handle the information referred to in paragraphs 2 and 3 of this Article. Those national security regulations shall offer a degree of protection of classified information at least equivalent to that provided by the rules on security as set out in the Annex to Commission Decision 2001/844/EC, ECSC, Euratom and by Council Decision 2011/292/EU of 31 March 2011 on the security rules for protecting EU classified information².

5. The Commission shall make the information received in accordance with paragraphs 2 and 3 available to the members of the HSC.

On the basis of that information, and for the purpose of paragraph 1, the Commission shall, in a timely manner, initiate discussion in the HSC, including, where appropriate, on the basis of synthesis or thematic progress reports.

¹ OJ L 317, 3.12.2001, p. 1.

² OJ L 141, 27.5.2011, p. 17.

6. The Commission shall, by means of implementing acts, adopt templates to be used by the Member States when providing the information referred to in paragraphs 2 and 3 in order to ensure its relevance to the objectives identified in paragraph 1 and its comparability.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

Article 5

Joint procurement of medical countermeasures

1. The institutions of the Union and any Member States which so desire may engage in a joint procurement procedure conducted pursuant to the third subparagraph of Article 104(1) of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council of 25 October 2012 on the financial rules applicable to the general budget of the Union¹ and pursuant to Article 133 of Commission Delegated Regulation (EU, Euratom) No 1268/2012 of 29 October 2012 on the rules of application of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council on the financial rules applicable to the general budget of the Union², with a view to the advance purchase of medical countermeasures for serious cross-border threats to health.

¹ OJ L 298, 26.10.2012, p. 1.

² OJ L 362, 31.12.2012, p. 1.

2. The joint procurement procedure referred to in paragraph 1 shall comply with the following conditions:
 - (a) participation in the joint procurement procedure is open to all Member States until the launch of the procedure;
 - (b) the rights and obligations of Member States not participating in the joint procurement are respected, in particular those relating to the protection and improvement of human health;
 - (c) the joint procurement does not affect the internal market, does not constitute discrimination or a restriction of trade or does not cause distortion of competition.
 - (d) the joint procurement does not have any direct financial impact on the budget of Member States not participating in the joint procurement.
3. The joint procurement procedure referred to in paragraph 1 shall be preceded by a Joint Procurement Agreement between the Parties determining the practical arrangements governing that procedure, and the decision-making process with regard to the choice of the procedure, the assessment of the tenders and the award of the contract.

Chapter III

Epidemiological surveillance and ad hoc monitoring

Article 6

Epidemiological surveillance

1. A network for the epidemiological surveillance of the communicable diseases and of the related special health issues referred to in points (i) and (ii) of point (a) of Article 2(1), is hereby established. The network shall be operated and coordinated by the ECDC.
2. The epidemiological surveillance network shall bring into permanent communication the Commission, the ECDC, and the competent authorities responsible at national level for epidemiological surveillance.
3. The national competent authorities referred to in paragraph 2 shall communicate the following information to the participating authorities of the epidemiological surveillance network:
 - (a) comparable and compatible data and information in relation to the epidemiological surveillance of communicable diseases and related special health issues referred to in points (i) and (ii) of point (a) of Article 2(1);
 - (b) relevant information concerning the progression of epidemic situations;

- (c) relevant information concerning unusual epidemic phenomena or new communicable diseases of unknown origin, including those in third countries.
4. When reporting information on epidemiological surveillance, the national competent authorities shall, where available, use the case definitions adopted in accordance with paragraph 5 for each communicable disease and related special health issue referred to in paragraph 1.
5. The Commission shall, by means of implementing acts, establish and update:
- (a) the list of communicable diseases and related special health issues established according to the criteria set out in the Annex and referred to in points (i) and (ii) of point (a) of Article 2(1), in order to ensure coverage of communicable diseases and related special health issues by the epidemiological surveillance network;
 - (b) case definitions concerning each communicable disease and related special health issue subject to epidemiological surveillance, in order to ensure the comparability and compatibility at Union level of the collected data;
 - (c) procedures for the operation of the epidemiological surveillance network as developed in application of Articles 5, 10 and 11 of Regulation (EC) No 851/2004.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

On duly justified imperative grounds of urgency related to the severity or novelty of a serious cross-border threat to health or to the rapidity of its spread between the Member States, the Commission may adopt the measures referred to in points (a) and (b) through immediately applicable implementing acts in accordance with the procedure referred to in Article 18(3).

Article 7

Ad hoc monitoring

1. Following an alert notified pursuant to Article 9 concerning a threat to health as referred to in point (iii) of point (a) of Article 2(1) and in points (b), (c) or (d) of Article 2(1), the Member States shall, in liaison with the Commission and on the basis of the available information from their monitoring systems, inform each other through the EWRS and, if the urgency of the situation so requires, through the HSC about developments with regard to the threat concerned at national level.
2. The information transmitted pursuant to paragraph 1, shall include in particular any change in geographical distribution, spread and severity of the threat concerned and of the means of detection, if available.
3. The Commission shall, by means of implementing acts, adopt, where necessary, the case definitions to be used for ad hoc monitoring, in order to ensure the comparability and compatibility at Union level of the collected data.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

On duly justified imperative grounds of urgency related to the severity of a serious cross-border threat to health or to the rapidity of its spread between the Member States, the Commission may adopt or update the case definitions referred to in the first subparagraph through immediately applicable implementing acts in accordance with the procedure referred to in Article 18(3).

Chapter IV

Early warning and response

Article 8

Establishment of an early warning and response system

1. A rapid alert system for notifying at Union level alerts in relation to serious cross-border threats to health, an 'Early Warning and Response System' (EWRS), is hereby established. The EWRS shall enable the Commission and the competent authorities responsible at national level to be in permanent communication for the purposes of alerting, assessing public health risks and determining the measures that may be required to protect public health.

2. The Commission shall, by means of implementing acts, adopt procedures concerning the information exchange in order to ensure the proper functioning of the EWRS and the uniform implementation of Articles 8 and 9 and to avoid overlap of activities or conflicting actions with existing structures and mechanisms for monitoring, early warning and combating serious cross-border threats to health.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

Article 9

Alert notification

1. National competent authorities or the Commission shall notify an alert in the EWRS where the emergence or development of a serious cross-border threat to health fulfils the following criteria:
 - (a) it is unusual or unexpected for the given place and time, or it causes or may cause significant morbidity or mortality in humans, or it grows rapidly or may grow rapidly in scale, or it exceeds or may exceed national response capacity, and
 - (b) it affects or may affect more than one Member State, and
 - (c) it requires or may require a coordinated response at Union level.

2. Where the national competent authorities notify the WHO of events that may constitute public health emergencies of international concern in accordance with Article 6 of the IHR, they shall at the latest simultaneously notify an alert in the EWRS, provided that the threat concerned falls within those referred to in Article 2(1) of this Decision.
3. When notifying an alert, the national competent authorities and the Commission shall promptly communicate through the EWRS any available relevant information in their possession that may be useful for coordinating the response such as:
 - (a) the type and origin of the agent,
 - (b) the date and place of the incident or outbreak,
 - (c) means of transmission or dissemination,
 - (d) toxicological data,
 - (e) detection and confirmation methods,
 - (f) public health risks,
 - (g) public health measures implemented or intended to be taken at national level,
 - (h) measures other than public health measures,
 - (i) personal data necessary for the purpose of contact tracing in accordance with Article 16
 - (j) any other information relevant to the serious cross-border threat to health in question.

4. The Commission shall make available to the national competent authorities through the EWRS any information that may be useful for coordinating the response referred to in Article 11, including information related to serious cross-border threats to health and public health measures related to serious cross-border threats to health transmitted through rapid alert and information systems established under other provisions of Union law or the Euratom Treaty.

Article 10

Public health risk assessment

1. Where an alert is notified pursuant to Article 9, the Commission shall, where necessary for the coordination of the response at Union level and upon request of the HSC referred to in Article 17 or on its own initiative, make promptly available to the national competent authorities and to the HSC, through the EWRS, a risk assessment of the potential severity of the threat to public health, including possible public health measures. That risk assessment shall be carried out by:
 - (a) the ECDC in accordance with Article 7(1) of Regulation (EC) No 851/2004 in the case of a threat referred to in points (i) and (ii) of point (a) of Article 2(1) or point (d) of Article 2(1) and/or

- (b) the European Food Safety Authority (EFSA) in accordance with Article 23 of Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety¹ in the case of a threat referred to in Article 2 of this Decision where the threat falls under the mandate of the EFSA and/or
- (c) other relevant Union agencies.

2. Where the risk assessment needed is totally or partially outside the mandates of the agencies referred to in paragraph 1, and it is considered necessary for the coordination of the response at Union level, the Commission shall, upon request of the HSC or its own initiative, provide an ad hoc risk assessment.

The Commission shall make the risk assessment available to the national competent authorities promptly through the EWRS. Where the risk assessment is to be made public, the national competent authorities shall receive it prior to its publication.

The risk assessment shall take into account, if available, relevant information provided by other entities, in particular by the WHO in the case of a public health emergency of international concern.

3. The Commission shall ensure that information that may be relevant for the risk assessment is made available to the national competent authorities through the EWRS and to the HSC.

¹ OJ L 31, 1.2.2002, p. 1.

Article 11
Coordination of response

1. Following an alert pursuant to Article 9, on a request from the Commission or a Member State and on the basis of the available information, including the information referred to in Article 9 and the risk assessments referred to in Article 10, Member States shall consult each other within the HSC and in liaison with the Commission with a view to coordinating:
 - (a) national responses to the serious cross-border threat to health, including where a public health emergency of international concern is declared in accordance with the IHR and falls within Article 2 of this Decision;
 - (b) risk and crisis communication, to be adapted to Member State needs and circumstances, aimed at providing consistent and coordinated information in the Union to the public and to healthcare professionals.

2. Where a Member State intends to adopt public health measures to combat a serious cross-border threat to health, it shall, before adopting those measures, inform and consult the other Member States and the Commission on the nature, purpose and scope of the measures, unless the need to protect public health is so urgent that the immediate adoption of the measures is necessary.

3. Where a Member State has to adopt, as a matter of urgency, public health measures in response to the appearance or resurgence of a serious cross-border threat to health, it shall, immediately upon adoption, inform the other Member States and the Commission on the nature, purpose and scope of those measures.
4. In the event of a serious cross-border threat to health overwhelming the national response capacities, an affected Member State may also request assistance from other Member States through the Community Civil Protection Mechanism established by Decision 2007/779/EC, Euratom.
5. The Commission shall, by means of implementing acts, adopt the procedures necessary for the uniform implementation of the information exchange, consultation and coordination provided for in paragraphs 1 to 3.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

Chapter V

Emergency situations

Article 12

Recognition of emergency situations

1. The Commission may recognise a situation of public health emergency in relation to:
 - (a) epidemics of human influenza considered to have pandemic potential, where the Director-General of the WHO has been informed and has not yet adopted a decision declaring a situation of pandemic influenza in accordance with the applicable rules of the WHO; or
 - (b) cases other than that referred to in point (a) where the Director -General of the WHO has been informed and has not yet adopted a decision declaring a public health emergency of international concern in accordance with the IHR, and where:
 - (i) the serious cross-border threat to health in question endangers public health at the Union level;
 - (ii) medical needs are unmet in relation to that threat, which means that no satisfactory method of diagnosis, prevention or treatment is authorised in the Union or, despite the existence of such a method, the authorisation of a medicinal product would nonetheless be of major therapeutic advantage to those affected.

2. The Commission shall adopt the measure referred to in paragraph 1 by means of implementing acts.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

On duly justified imperative grounds of urgency related to the severity of a serious cross-border threat to health or to the rapidity of its spread among Member States, the Commission may recognise situations of public health emergency pursuant to paragraph 1 through immediately applicable implementing acts in accordance with the procedure referred to in Article 18(3).

3. The Commission shall inform the Director-General of the WHO of the adoption of the measures referred to in paragraph 1.

Article 13

Legal effects of recognition

The recognition of an emergency situation pursuant to Article 12(1) shall have the sole legal effect of enabling point 2 of Article 2 of Regulation (EC) No 507/2006 to apply or, where the recognition specifically concerns epidemics of human influenza considered as having a pandemic potential, of enabling Article 21 of Regulation (EC) No 1234/2008 to apply.

Article 14

Termination of the recognition

The Commission shall, by means of implementing acts, terminate the recognition referred to in Article 12(1) as soon as one of the applicable conditions laid down therein is no longer met.

Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 18(2).

Termination of the recognition, as referred to in the first paragraph, shall not affect the validity of marketing authorisations granted on the basis of Regulation (EC) No 507/2006 to medicinal products referred to in point 2 of Article 2 thereof or granted in accordance with the procedure referred to in Article 21 of Regulation (EC) No 1234/2008.

Chapter VI

Procedural provisions

Article 15

Designation of national authorities and representatives

1. Each Member State shall designate, by ...*
 - (a) the competent authorities responsible within the Member State for epidemiological surveillance as referred to in Article 6;
 - (b) the competent authority or authorities responsible at national level for notifying alerts and determining the measures required to protect public health, for the purposes of Articles 8, 9 and 10;
 - (c) one representative and an alternate in the HSC referred to in Article 17;
2. Member States shall notify the Commission and other Member States of the designations referred to in paragraph 1 and of any change thereof. In the event of such change, the Commission shall distribute immediately to the HSC an updated list of such designations.
3. The Commission shall make publicly available the updated list of the authorities designated in accordance with points (a) and (c) of paragraph 1, as well as the updated list of the authorities to which the representatives in the HSC belong.

* OJ please insert the date: four months after the date of the entry into force of this Decision.

Article 16

Protection of personal data

1. In the application of this Decision, personal data shall be processed in accordance with Directive 95/46/EC and Regulation (EC) No 45/2001. In particular, appropriate technical and organisational measures shall be taken to protect such personal data against accidental or illegal destruction, accidental loss, or unauthorised access and against any form of illegal processing.
2. The EWRS shall include a selective messaging functionality allowing personal data to be communicated only to national competent authorities involved in contact tracing measures. That selective messaging functionality shall be designed and operated so as to ensure safe and lawful exchange of personal data.
3. Where competent authorities implementing contact tracing measures communicate personal data necessary for contact tracing purposes through the EWRS pursuant to Article 9(3), they shall use the selective messaging functionality referred to in paragraph 2 of this Article and communicate the data only to the other Member States involved in the contact tracing measures.
4. When circulating the information referred to in paragraph 3, the competent authorities shall refer to the alert communicated previously through the EWRS.

5. Messages containing personal data shall automatically be erased from the selective message functionality 12 months after the date of their posting.
6. Where a competent authority establishes that notification of personal data made by it pursuant to Article 9(3) has subsequently proved to be in breach of Directive 95/46/EC because that notification was unnecessary for the implementation of the contact tracing measures at issue, it shall inform immediately the Member States to which that notification was transmitted.
7. In relation to their responsibilities to notify and rectify personal data through the EWRS, the national competent authorities shall be regarded as controllers within the meaning of point (d) of Article 2 of Directive 95/46/EC.
8. In relation to its responsibilities concerning storage of personal data, the Commission shall be regarded as a controller within the meaning of point (d) of Article 2 of Regulation (EC) No 45/2001.
9. The Commission shall adopt:
 - (a) guidelines aimed at ensuring that the day-by-day operation of the EWRS complies with Directive 95/46/EC and Regulation (EC) No 45/2001;
 - (b) a recommendation providing an indicative list of the personal data that may be exchanged for the purpose of the coordination of contact tracing measures.

Article 17
Health Security Committee

1. A Health Security Committee, composed of representatives of the Member States designated under point (c) of Article 15(1), is hereby established.
2. The HSC shall have the following tasks:
 - (a) supporting the exchange of information between the Member States and the Commission on the experience acquired with regard to the implementation of this Decision;
 - (b) coordination in liaison with the Commission of the preparedness and response planning of the Member States in accordance with Article 4;
 - (c) coordination in liaison with the Commission of the risk and crisis communication and responses of the Member States to serious cross-border threats to health, in accordance with Article 11.
3. The HSC shall be chaired by a representative of the Commission. The HSC shall meet at regular intervals and whenever the situation requires, on a request from the Commission or a Member State.
4. The secretariat shall be provided by the Commission.

5. The HSC shall adopt, by a majority of two thirds of its members, its rules of procedure. Those rules of procedure shall establish working arrangements, in particular with regard to:
- (a) the procedures for plenary meetings at high level and working groups;
 - (b) the participation of experts in plenary meetings, the status of observers, including from third countries;
 - (c) the arrangements for the HSC to examine the relevance to its mandate of a matter submitted to it and the possibility of recommending referral of that matter to a body competent under a provision of another act of the Union or under the Euratom Treaty; those arrangements shall not affect the obligations of the Member States under Articles 4 and 11 of this Decision.

Article 18

Committee procedure

1. The Commission shall be assisted by a committee on serious cross-border threats to health. That Committee shall be a committee within the meaning of Article 3(2) of Regulation (EU) No 182/2011.
2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Where the Committee delivers no opinion, the Commission shall not adopt the draft implementing act and the third subparagraph of Article 5(4) of Regulation (EU) No 182/2011 shall apply.

3. Where reference is made to this paragraph, Article 8 of Regulation (EU) No 182/2011, in conjunction with Article 5 thereof, shall apply.

Article 19

Reports concerning this Decision

The Commission shall submit to the European Parliament and the Council by ...^{*}, and every three years thereafter a report on the implementation of this Decision. The report shall include, in particular, an assessment of the operation of the EWRS and of the epidemiological surveillance network, as well as information on how the mechanisms and structures established under this Decision complement other alert systems at Union level and under the Euratom Treaty to protect public health effectively, while avoiding structural duplications. The Commission may accompany the report with proposals to modify the relevant Union provisions.

Chapter VII

Final provisions

Article 20

Repeal of Decision No 2119/98/EC

1. Decision No 2119/98/EC is hereby repealed.
2. References to the repealed Decision shall be construed as references to this Decision.

* OJ: Please insert the date: two years after the entry into force of this Decision.

Article 21
Entry into force

This Decision shall enter into force on the day following that of its publication in the *Official Journal of the European Union*.

Article 22
Addressees

This Decision is addressed to the Member States.

For the European Parliament
The President

For the Council
The President

ANNEX

Criteria for selection of communicable diseases
and related special health issues to be covered
by epidemiological surveillance within the network

1. Communicable diseases and related special health issues that cause, or have the potential to cause, significant morbidity or mortality, or both, across the Union, especially where the prevention of those diseases requires an approach to coordination at Union level.
2. Communicable diseases and related special health issues where the exchange of information may provide early warning of threats to public health.
3. Rare and serious communicable related diseases and special health issues which would not be recognized at national level and where the pooling of data would allow hypothesis generation from a wider knowledge base.
4. Communicable diseases and related special health issues for which effective preventive measures are available with a protective health gain.
5. Communicable diseases and related special health issues for which a comparison by Member States would contribute to the evaluation of national and Union programmes.
