REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

on European Long-term Investment Funds

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national Parliaments,

Having regard to the opinion of the European Economic and Social Committee¹,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) Long-term finance is a crucial enabling tool for putting the European economy on a path of sustainable, smart and inclusive growth and for building tomorrow's economy in a way that is less prone to systemic risks and is more resilient. European long-term investment funds (ELTIFs) provide finance to various infrastructure projects or un-listed companies of lasting duration that issue equity or debt instruments for which there is no readily identifiable buyer. By providing finance to such projects, ELTIFs contribute to the financing of the Union economies.

¹ OJ C , , p. .

- (2) On the demand side, ELTIFs can provide a steady income stream for pension administrators, insurance companies and other entities that face regular and recurrent liabilities. While providing less liquidity than investments in transferable securities, ELTIFs can provide a steady income stream for individual investors that rely on the regular cash flow that an ELTIF can produce. ELTIFs can also offer good opportunities for capital appreciation over time for those investors not receiving a steady income stream.
- (3) Financing for projects, regarding transport infrastructure, sustainable energy generation or distribution, social infrastructure (housing or hospitals), roll-out of new technologies and systems that reduce use of resources and energy or the further growth of SMEs, can be scarce. As the financial crisis has shown, complementing bank financing with a wider variety of financing sources that better mobilise capital markets could help tackle financing gaps. ELTIFs can play a crucial role in this respect.
- (4) While individual investors may be interested in investing in an ELTIF, the illiquid nature of most investments in long-term projects precludes an ELTIF from offering regular redemptions to its investors. The commitment of the individual investor to an investment in such assets is by its nature made to the full term of the investment. ELTIFs should, consequently, be structured so as not to offer regular redemptions before the end of life of the ELTIF. A report, five years after the adoption of this Regulation, shall investigate whether this rule will have achieved the expected results in terms of ELTIF distribution or whether the introduction, in a limited number of cases, of the possibility, for some individual retail investors, to redeem their units or shares before the end of the ELTIF, may contribute to increase the distribution of ELTIF among the individual retail investors.
- (5) Long-term asset classes within the meaning of this Regulation should comprise non-listed undertakings that issue equity or debt instruments for which there is no readily identifiable buyer. This Regulation should also cover real assets that require significant up-front capital expenditure and SMEs admitted to trading on a regulated market or on a multilateral trading facility in accordance with point (13) of Article 4(1) of Directive 2014/**/EU [MiFID II].

- (6) In the absence of a Regulation setting out rules on ELTIFs, diverging measures might be adopted at national level, which are likely to cause distortions of competition resulting from differences in investment protection measures. Diverging requirements on portfolio composition, diversification and eligible assets, in particular the investment in commodities, create obstacles to the cross-border marketing of funds that focus on non-listed undertakings and real assets because investors cannot easily compare the different investment propositions offered to them. Divergent national requirements also lead to different levels of investor protection. Furthermore, different national requirements pertaining to investment techniques, such as the permitted levels of borrowing, use of derivative financial instruments, rules applicable to short selling or securities financing transactions lead to discrepancies in the level of investor protection. In addition, different requirements on redemption and/or holding periods impede the cross-border selling of funds investing in non-listed assets. By increasing legal uncertainty, those divergences can undermine the confidence of investors when considering investments in such funds, and reduce the scope for investors to choose effectively between various long-term investment opportunities. Consequently, the appropriate legal basis for this Regulation is Article 114 of the Treaty, as interpreted by consistent case law of the Court of Justice of the European Union.
- (7) Uniform rules across the Union are necessary to ensure that ELTIFs display a coherent product profile across the Union. In order to ensure the smooth functioning of the internal market and a high level of investor protection, it is necessary to establish uniform rules regarding the operation of ELTIFs, in particular on the composition of the portfolio of ELTIFs and the investment instruments that they are allowed to use in order to gain exposure to non-listed undertakings and real assets. Uniform rules on the portfolio of an ELTIF are also required to ensure that ELTIFs that aim to generate regular income maintain a diversified portfolio of investment assets suitable to maintain the regular cash flow.

- (9) The new rules on ELTIFs are closely linked to Directive 2011/61/EU of the European Parliament and of the Council of 8 June 2011 on Alternative Investment Fund Managers and amending Directives 2003/41/EC and 2009/65/EC and Regulations (EC) No 1060/2009 and (EU) No 1095/2010² since that Directive forms the legal framework governing the management and marketing of alternative investment funds (AIFs) in the Union. By definition ELTIFs are EU AIFs that are managed by alternative investment fund managers (AIFMs) authorised in accordance with Directive 2011/61/EU.
- (10) Whereas Directive 2011/61/EU also foresees a staged third country regime governing non-EU AIFMs and non-EU AIFs, the new rules on ELTIFs have a more limited scope emphasising the European dimension of the new long term investment product. Hence, only an EU AIF as defined in Directive 2011/61/EU is eligible to become an authorised ELTIF and only if it is managed by an EU AIFM that has been authorised in accordance with Directive 2011/61/EU.
- (11) The new rules applicable to ELTIFs should build on the existing regulatory framework established through Directive 2011/61/EU and the acts adopted for its implementation. Therefore, the product rules concerning ELTIFs should apply in addition to the rules laid down in the existing Union legislation. Particularly, the management and marketing rules laid down in Directive 2011/61/EU should apply to ELTIFs. Equally, the rules on the cross-border provision of services and freedom of establishment laid down in Directive 2011/61/EU should apply accordingly to the cross-border activities of ELTIFs. These should be supplemented by the specific marketing rules designed for the cross-border marketing of ELTIFs to both retail and professional investors across the Union.
- (12) Uniform rules should apply to all those EU AIFs that wish to market themselves as ELTIFs. EU AIFs that do not wish to market themselves as ELTIFs should not be bound by these rules, thereby also consenting not to benefit from the advantages that ensue. On the other hand, Undertakings for collective investment in transferable securities (UCITS) and non-EU AIFs would not be eligible for marketing as ELTIFs.

²

OJL 174, 1.7.2011, p. 1.

- (13) In order to ensure the compliance of ELTIFs with the harmonised rules governing the activity of these funds, it is necessary to require that competent authorities authorise ELTIFs. The harmonised authorisation and supervision procedures for AIFMs under Directive 2011/61/EU should therefore be supplemented with a special authorisation procedure for ELTIFs. Procedures should be established to ensure that only EU AIFMs authorised in accordance with Directive 2011/61/EU and capable of managing AIFs that follow similar investment strategies to those of an ELTIF may manage ELTIFs. Where the ELTIF is internally managed and no external AIFM is appointed, the ELTIF should be authorised under this Regulation and as AIFM under Directive 2011/61/EU. All appropriate steps are taken to ensure that the ELTIF shall be able to comply with the harmonised rules governing the activity of these funds.
- (14) Given that EU AIFs may take different legal forms that do not necessarily endow them with legal personality, the provisions requiring ELTIFs to take action should be understood to refer to the manager of the ELTIF in cases where the ELTIF is constituted as an EU AIF that is not in a position to act by itself because it has no legal personality of its own.
- (15) In order to ensure that ELTIFs target long-term investments, rules on the portfolio of ELTIFs should require a clear identification of the categories of assets that should be eligible for investment by ELTIFs and of the conditions under which they should be eligible. An ELTIF should invest at least 70% of its capital in eligible investment assets. To ensure the integrity of ELTIFs it is also desirable to prohibit an ELTIF from engaging in certain financial transactions that might endanger its investment strategy and objectives by raising additional risks different to those that might be expected for a fund targeting long-term investments. In order to ensure a clear focus on long term investments, as may be useful for retail investors unfamiliar with less conventional investment strategies, an ELTIF should not be allowed to invest in financial derivative instruments other than for the purpose of hedging risks inherent to the ELTIF's investments. Given the liquid nature of commodities and financial derivative instruments that give an indirect exposure to them, investments in commodities do not require a long-term investor commitment and therefore should be excluded. This rationale does not apply to investments in infrastructure or companies related to commodities or whose performance is linked indirectly to the performance of commodities, such as farms in the case of agricultural commodities or power plants in the case of energy commodities.

- (16) The definition of what constitutes a long-term investment is broad. Without necessarily requiring long-term holding periods for the ELTIF manager, eligible investment assets are generally illiquid, require commitments for a certain period of time, and have an economic profile of a long-term nature. Eligible investment assets are non-transferable securities and therefore do not have access to the liquidity of secondary markets. They often require fixed term commitments which restrict their marketability. The economic cycle of the investment sought by ELTIFs is essentially of a long-term nature due to the high capital commitments and the length of time required to produce returns. As a result such assets do not suit investments with redemption rights.
- (17) An ELTIF should be allowed to invest in assets other than eligible investment assets, as may be necessary to efficiently manage its cash flow, but only so long as this is consistent with the ELTIF's long term investment strategy.
- (18) Eligible investment assets must be understood to include participations, such as equity or quasi-equity instruments, debt instruments in qualifying portfolio undertakings and loans provided to them. They should also include participation in other funds that are focused on assets such as investments in non-listed undertakings that issue equity or debt instruments for which there is not always a readily identifiable buyer. Direct holdings of real assets, unless they are securitised, should also form a class of eligible assets, **providing they yield a predictable stream of cash flows (regular or irregular), in the sense that they can be modelled and valued based on a discounted cash-flow valuation method**. Those assets could indicatively include ~~social~~ infrastructure that yields a ~~predictable~~ return, such as energy, transport and communication infrastructure, housing, and education, health, welfare support or industrial facilities. **Conversely, assets like works of art, manuscripts, wine stocks or jewels should not be eligible as they do not normally yield a predictable stream of cash-flows.**
- (19) Quasi-equity instruments must be understood to comprise a type of financing instrument, which is a combination of equity and debt, where the return on the instrument is linked to the profit or loss of the qualifying portfolio undertaking, and where the repayment of the instrument in the event of default is not fully secured. Such instruments include a variety of financing instruments such as subordinated loans, silent participations, participating loans, profit participating rights, convertible bonds and bonds with warrants.

- (20) To reflect existing business practices, an ELTIF should be allowed to buy existing shares of a qualifying portfolio undertaking from existing shareholders of that undertaking. Also, for the purposes of ensuring the widest possible opportunities for fundraising, investments into other AIFs should be permitted, provided that these AIFs have a depositary. To prevent dilution of the investments into qualifying portfolio undertakings, ELTIFs should only be permitted to invest in other AIFs, provided that those AIFs have not themselves invested more than 10 % of their capital in other AIFs.
- (21) The use of financial undertakings can be necessary in order to pool and organise the contributions of different investors, including investments of a public nature, into infrastructure projects. ELTIFs should therefore be permitted to invest in eligible investment assets by means of financial undertakings, so long as these undertakings are dedicated to financing long-term projects.
- (22) In order to provide investors with the assurance that ELTIFs contribute directly to the development of long-term investments, ELTIFs should be limited to investments in undertakings that have not been listed. Therefore qualifying portfolio undertakings should not be listed on regulated markets. Nevertheless, in an attempt to promote financing of the real economy, SMEs, as defined in Directive 2014/**/EU [MiFID II], listed on regulated markets or on multilateral trading facilities, should also constitute a qualifying portfolio undertaking. Qualifying portfolio undertakings- include infrastructure projects, investment in unlisted companies seeking growth and investments in real estate or other real assets that could be suitable for long term investment purposes.
- (23) Due to the scale of infrastructure projects, these require large amounts of capital that have to remain invested for long periods of time. Such infrastructure projects -include public building infrastructure such as schools, hospitals or prisons, social infrastructure such as social housing, transport infrastructure such as roads, mass transit systems or airports, energy infrastructure such as energy grids, climate adaptation and mitigation projects, power plants or pipelines, water management infrastructure such as water supply systems, sewage or irrigation systems, communication infrastructure such as networks and waste management infrastructure such as recycling or collection systems.

- (24) Unlisted undertakings can face difficulties accessing capital markets and financing further growth and expansion. Private financing through equity stakes or loans are typical ways of raising financing. Because such instruments are by their nature long-term investments they require patient capital that ELTIFs can provide.
- (25) Investments in real assets require patient capital due to the absence of liquid secondary markets. Investment funds represent an essential source of financing for assets that require large capital expenditure. For these assets, capital pooling is often necessary to achieve the desired level of funding. Such investments require long periods of time due to the generally long economic cycle attached to these assets. It generally takes several years to amortize the investment in large real assets. In order to facilitate the development of such large assets, ELTIFs should be able to invest directly in real assets with a value of more than €10 million. In practice this would include assets such as infrastructure, real estate, vessels, equipment, machinery, aircraft or rolling stock. For these reasons it is necessary to treat direct holdings in real assets and investments in qualifying portfolio undertakings in like manner.
- (26) Where the manager holds a stake in a portfolio undertaking, there is a risk that the manager puts its interests ahead of the interests of investors in the fund. To avoid such conflict of interests, the ELTIF should only invest in assets that are unrelated to the manager-.
- (27) In order to allow managers of ELTIFs a certain degree of flexibility in the investment of their funds, trading in assets other than long-term investments should be permitted up to a maximum threshold of 30 % of their capital.
- (28) In order to limit risk-taking by ELTIFs it is essential to reduce counterparty risk by subjecting the portfolio of ELTIFs to clear diversification requirements. All over-the counter (OTC) derivatives should be subject to Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories³.
- (28a) As part of its overall review of the functioning of this Regulation, the Commission, taking into account Regulation (EU) No 648/2012 on OTC derivatives [EMIR], shall review counterparty exposure limits applicable to derivatives transactions, taking into account the need to establish appropriate categorisations for such limits so that derivatives with similar risk characteristics are treated the same.**

³ OJ L 201. 27.7.2012. p.1

- (29) In order to prevent the exercise of significant influence by an investing ELTIF over the management of another ELTIF or of an issuing body, it is necessary to avoid excessive concentration by an ELTIF in the same investment.
- (30) In order to allow ELTIF managers to raise further capital during the life of the fund, they should be permitted to borrow cash amounting to up to 30% of the capital of the fund. This should serve to provide additional return to the investors. In order to eliminate the risk of currency mismatches, the ELTIF should only borrow in the currency the manager expects to acquire the asset in. However, in order to prevent shadow banking activities, the cash borrowed from the ELTIF should not be used for granting loans to qualifying portfolio undertakings.
- (31) Due to the long-term and illiquid nature of the investments of an ELTIF, the managers should have sufficient time to apply the investment limits. The time required to implement these limits should take account of the peculiarities and characteristics of the investments but should not exceed five years.
- (32) Notwithstanding the fact that ELTIFs do not offer redemption rights before the end of life of the ELTIF, nothing should prevent an ELTIF from seeking admission of these shares or units to a regulated market as defined in Article ~~4(14)~~4(1)(21) of Directive 2014/**/EU [MiFID II] of the European Parliament and of the Council of *** 2014 on markets in financial instruments,⁴ to a multilateral trading facility as defined in Article (1)(22) of Directive ~~2004/39/EC~~2014/**/EU, or to an organised trading facility as defined in **Article 4(1)(23) of Directive 2014/**/EU [MiFID II]** ~~point (...) of Regulation (...)~~, thus providing investors with an opportunity to sell their units or shares before the end of life of the ELTIF. The rules or instruments of incorporation of an ELTIF should therefore not prevent units or shares from being admitted to or from being dealt in regulated markets, nor should they prevent investors from freely transferring their shares or units to third parties who wish to purchase those shares or units.

⁴ OJ L 145, 30.4.2004, p.1.

- (33) In order for investors to effectively redeem their units or shares at the end of the fund's life, the manager should start to sell the portfolio of assets of the ELTIF in good time to ensure the value is properly realised. In determining an orderly disinvestment schedule, the ELTIF manager should take into account the different maturity profiles of the investments and the length of time necessary to find a buyer for the assets in which the ELTIF is invested. Due to the impracticality of maintaining the investment limits during this liquidation period, they should cease to apply when the liquidation period starts.
- (34) The assets in which an ELTIF is invested may obtain a listing on a regulated market during the life of the fund. Where this happens, the asset would no longer comply with the non-listing requirement of this Regulation. In order to allow managers to disinvest from such an asset in an orderly manner, this asset could continue to count towards the 70% limit of eligible investment assets for up to three years.
- (35) Given the specific characteristics of ELTIFs, as well as the targeted retail and professional investors it is important that solid transparency requirements be put in place that are capable of allowing prospective investors to make an informed judgement and be fully aware of the risks implied. In addition to the transparency requirements contained in Directive 2011/61/EU, ELTIFs should publish a prospectus the content of which should necessarily include all information required to be disclosed by collective investment undertakings of the closed-end type in accordance with Directive 2003/71/EC of the European Parliament and of the Council⁵ and Commission Regulation (EC) No 809/2004.⁶ For the marketing of an ELTIF to retail investors it should be mandatory to publish a key information document (KID) in accordance with Regulation No [...] of [...] of the European Parliament and the Council. Furthermore, any marketing documents should explicitly draw attention to the risk profile of the ELTIF.

⁵ OJ L 345, 31.12.2003, p.64.

⁶ OJ L 149, 30.4.2004, p.1.

- (36) As ELTIFs target both professional and retail investors across the Union, it is necessary that certain requirements be added to the marketing requirements laid down in Directive 2011/61/EU in order to ensure an appropriate degree of investor protection. Thus, facilities should be made available for making subscriptions, making payments to unit- or shareholders, repurchasing or redeeming units or shares and making available the information which the ELTIF and its managers are required to provide. Moreover, in order to ensure that retail investors are not disadvantaged with respect to experienced professional investors certain safeguards have to be put in place when ELTIFs are marketed to retail investors.
- (36a) The manager of the ELTIF should obtain all necessary information regarding the retail investor's knowledge and experience, financial situation, risk appetite, investment objectives and time horizon in order to assess whether the ELTIF is suitable for marketing to retail investors, taking into account, inter alia, the lifecycle and the intended investment strategy of the ELTIF.
- (36b) When marketed to retail investors, the depositary of the ELTIF should comply with the provisions of Directive 2014/**/EU [UCITS V], as regards the eligible entities that are permitted to act as depositaries, the no discharge of liability rule and the reuse of assets.
- (36c) In the attempt to strengthen protection of retail investors, the Regulation provides additionally ~~for a minimum investment threshold, as well as for the investors' declaration of risk awareness~~ **that the ELTIF should be admitted to trading on a regulated market or on a multilateral trading facility or on an organised trading facility and that the ELTIF manager should act as an intermediary in case no buyer for a unit or share can be identified despite the ELTIF's units or shares being admitted to trading on a secondary market. Moreover, for retail investors whose portfolio, composed of cash deposits and financial instruments, does not exceed € 500 000, the ELTIF manager should ensure that the retail investor does not invest an aggregate amount exceeding 5% of his portfolio in ELTIFs.**
- (37) The competent authority of the ELTIF should verify whether an ELTIF is able to comply with this Regulation on an on-going basis. As the competent authorities are already provided with extensive powers under Directive 2011/61/EU, it is necessary that such powers be extended in order to be exercised by reference to the new common rules on ELTIFs.

- (38) ESMA should be able to exercise all the powers conferred under Directive 2011/61/EU with respect to this Regulation.
- (39) The European Securities and Markets Authority (ESMA), established by Regulation (EU) No 1095/2010 of the European Parliament and of the Council of 24 November 2010 establishing a European Supervisory Authority (ESMA), amending Decision No 716/2009/EC and repealing Commission Decision 2009/77/EC,⁷ should play a central role in the application of the rules concerning ELTIFs by ensuring consistent application of Union rules by national competent authorities. As a body with highly specialised expertise regarding securities and securities markets, it is efficient and appropriate to entrust ESMA with the elaboration of draft regulatory technical standards which do not involve policy choices, for submission to the Commission, in respect of the circumstances in which the life of an ELTIF will be sufficient in length to cover the life-cycle of each of the individual assets of the ELTIF, the features of the schedule for the orderly disposal of ELTIF assets, the definitions, calculation methodologies and presentation of cost disclosures, and the characteristics of the facilities to be set up by ELTIFs in each Member State where they intend to market units or shares.

⁷ OJ L 331, 15.12.2010, p.84.

- (40) The new uniform rules on ELTIFs should comply with the provisions of Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data⁸ and with Regulation (EC) No 45/2001 of the European Parliament and of the Council of 18 December 2000 on the protection of individuals with regard to the processing of personal data by the Community institutions and bodies and of the free movement of such data⁹.
- (41) Since the objectives of this Regulation, namely to ensure uniform requirements on the investments and operating conditions for ELTIFs throughout the Union, while taking full account of the need to balance safety and reliability of ELTIFs with the efficient operation of the market for long-term financing and the cost for its various stakeholders, cannot be sufficiently achieved by the Member States and can therefore, by reason of its scale and effects, be better achieved at Union level, the Union may adopt measures in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
- (42) The new uniform rules on ELTIFs respect the fundamental rights and observe the principles recognised in particular by the Charter of Fundamental Rights of the European Union and notably consumer protection, the freedom to conduct a business, the right to remedy and to a fair trial, and the protection of personal data. The new uniform rules on ELTIFs should be applied in accordance with those rights and principles,
