Subject: Presidency note on progress on the legislative proposals associated with the Commission commitment to reduce by 25% burdens associated with reporting requirements

---

Delegations will find in attachment a presidency note on progress on the legislative proposals associated with the Commission commitment to reduce by 25% burdens associated with reporting requirements, as an AOB agenda item with a view to the meeting of the Competitiveness Council on 24 May 2024.

**PRESIDENCY NOTE ON PROGRESS ON THE LEGISLATIVE PROPOSALS  
ASSOCIATED WITH THE COMMISSION COMMITMENT TO REDUCE BY 25%  
BURDENS ASSOCIATED WITH REPORTING REQUIREMENTS**

**BACKGROUND**

Administrative burden reduction features prominently in the Council and European Council agendas.

On 23/03/2023, Leaders at the European Council called for advancing work for a growth-enhancing regulatory environment, including measures such as:

- *simplify the general regulatory environment and reduce the administrative burden, including by accelerating permitting procedures, carrying out competitiveness checks for new legislative proposals and considerably increasing the uptake of digital solutions (such as eID and machine-readable and standardised data). Reporting requirements, notably across the EU's green, digital, and economic legislation, should be rationalised;*
- *enforce the Single Market rules effectively to ensure regulatory convergence in all sectors, including services;*
- *step up efforts at national and EU level to reduce barriers to cross-border business and take work forward on access to medicines across Member States while also strengthening incentives for investments in innovation.*

On 26/10/2023, the European Council addressed the subject again, inviting:

- *the Commission and Member States “to further improve framework conditions for investment, including through a common, clear and coherent regulatory framework and a business environment that are more conducive to competitiveness”;*
- *all relevant institutions “to take forward work to simplify regulation and reduce the unnecessary administrative burden, including reporting requirements, notably for SMEs and start-ups”;*
- *the Commission “to develop additional proposals in this regard, seizing the opportunities of the data economy and standardised business data”.*

On 17/10/2023, the Commission responded to these calls by designing its 2024 Work Programme around measures to rationalise and simplify reporting obligations, with the aim of reducing them by 25%. This follows up on President von der Leyen’s State of the European Union commitment to reduce reporting requirements by 25%, in line with the Commission strategy<sup>1</sup> to boost the EU’s long-term competitiveness and to provide relief for SMEs. Therefore, it puts a strong focus on simplifying rules for citizens and businesses across the European Union. That strongly corresponds with one of the key Belgian Presidency priorities: ‘A coherent, predictable and simplified regulatory framework’.

The 2024 Work Programme (ST 13917/23 + ADD1) identified 15 administrative burden reduction measures announced since the beginning of 2023 and introduced 26 additional measures in its Annex II, Section B. Out of the 26 additional measures, **13** are **legislative proposals** under ordinary legislative procedure. These are targeted amendments to multiple legislative acts covering a whole range of topics. The proposals built upon the analysis in the 2022 Annual Burden Survey, released on 12 September, with its methodology to operationalise the “one-in one-out” approach and the first analysis based on such methodology.

---

<sup>1</sup> ST 7604/23 - Commission Communication on “Long-term competitiveness of the EU: looking beyond 2030”.

On 24 May, during the COMPET Council, the Presidency foresees an AOB to inform delegations about the progress made in several legislative files. Under this AOB, the Presidency aims at debriefing on the progress made on the so-called “25% reduction of the administrative burden package”. This refers to the progress made on the 13 legislative proposals.

Even with the time constraints with the end of the legislative term, the Presidency has managed to make significant progress on these proposals, with 8 out of the 13 proposals already published in the Official Journal and/or agreed with the European Parliament.

As of 14/05/2024:

- 3 proposals have already been finalised and published in the Official Journal, (Commission proposals COD 2023/0368, 2023/0361, and 2023/0362 - in dark green in the annex);
- On 5 proposals, an agreement has been reached between the Council and the Parliament. They are now under linguistic revisions and the legislative process is expected to be finalised as soon as the new Parliament will be operational (in light green in the annex).
- On 1 proposal, the co-legislators are proposing different amendments and the trilogue will start as soon as the new Parliament will be operational (in yellow in the annex)
- 4 proposals are still being analysed by co-legislators (in red in the annex).
