ANNEX 6

ANNEX

to the

Proposal for a Council Decision

on the signing, on behalf of the European Union, of a broad package of agreements to consolidate, deepen and expand the bilateral relations with the Swiss Confederation, and on the provisional application of the Agreement on the terms and conditions for the participation of the Swiss Confederation in the European Union Agency for the Space Programme

AGREEMENT
BETWEEN THE EUROPEAN UNION
AND THE SWISS CONFEDERATION
ON ELECTRICITY

THE EUROPEAN UNION, hereinafter referred to as the "Union",

and

THE SWISS CONFEDERATION, hereinafter referred to as "Switzerland",

hereinafter referred to as the "Contracting Parties";

CONSIDERING the existing particularly close integration of the electricity systems of the Union and Switzerland and that Switzerland was part of the group of European countries which developed cross-border electricity trade in Europe on the basis of cooperation between transmission system operators, with a view to benefitting from the advantages of shared energy resources;

NOTING that a dense legal framework has been created in the Union in the last two decades to organise an efficient internal electricity market with electricity trading mechanisms, such as Union-wide market coupling, replacing the former cooperation framework;

RECOGNISING that the absence of the application of Union rules for electricity trade and security of supply in Switzerland, and the resulting absence of Switzerland from joint trading schemes, platforms and coordination bodies governed by Union law, has posed increasing challenges for electricity cooperation between the Contracting Parties and for their security of supply, leading to market inefficiencies, higher transaction costs, legal uncertainty and a lack of reliability in the exchange of electricity, resulting in additional cost for electricity customers;

EMPHASIZING that this Agreement, while taking into account the existing physically close integration of the Swiss electricity system into the European electricity system, is meant to enhance mutual cooperation in the electricity sector, to enable the participation of Switzerland in all trading schemes, platforms and common coordination bodies governed by Union law, to foster cross-border trading of electricity, to increase economic efficiency and social welfare, to strengthen security of supply, to increase grid stability and to facilitate the transition to a net zero greenhouse gas energy system in Europe by 2050 for the mutual benefit of Switzerland and the Union;

CONSIDERING that the participation of Switzerland in the internal electricity market of the Union requires the integration of Switzerland in a manner that ensures the same rights and obligations for the Contracting Parties. This requires in turn appropriate rules on a level playing field which ensures open and fair competition between the Contracting Parties, including relevant rules on competition, environment and renewable energy production;

NOTING the need for close cooperation between the Contracting Parties and their authorities for the proper interpretation and application of the rules of the internal electricity market and for enhanced regional grid stability as well as security of supply, especially in times of an energy crisis;

EMPHASIZING that the Contracting Parties attach a great importance to electricity security of supply in their cooperation under this Agreement and that a key purpose of this Agreement is to create reliable rules, guaranteeing that both Contracting Parties will continue exchanging electricity also in times of an energy crisis, on the basis of clear rules, so that they can rely on electricity flows from each other, reducing costs for electricity consumers;

RECOGNISING that physical long-term cross-border capacity reservations restrict the principle of third-party access as implemented in the Union's electricity market rules and that the treatment of historic contracts with physical long-term reservations with non-Union countries may raise complex legal questions, this Agreement should provide legal certainty as to the phasing out of such reservations and to the regime applicable in the transitional period;

CONSIDERING the benefits of trading electricity across borders and incentivising investment for cost efficient, clean and secure electricity supplies in the Union and Switzerland;

RECOGNISING that public ownership of electricity infrastructure can be a legitimate political choice;

AIMING to strengthen and deepen the participation of Switzerland and its undertakings in the internal market of the Union, in which Switzerland participates on the basis of this Agreement;

RECOGNISING that the proper functioning and homogeneity in the fields of the internal market in which Switzerland participates requires a level playing field for competition between Swiss and Union undertakings based on substantive and procedural rules equivalent to those that apply in the internal market as regards State aid;

REAFFIRMING the autonomy of the Contracting Parties and the role and competences of their institutions and, as far as Switzerland is concerned, respect for the principles deriving from its constitutional order, including direct democracy, the separation of powers and federalism;

WHEREAS the Union and Switzerland are bound by numerous bilateral agreements covering various fields, providing for specific rights and obligations similar, in certain respects, to those provided for within the Union;

RECALLING that the purpose of those bilateral agreements is to increase Europe's competitiveness and to create closer economic ties between the Contracting Parties, based on equality, reciprocity and the general balance of their advantages, rights and obligations;

RESOLVED to strengthen and deepen Switzerland's participation in the internal market of the Union, on the basis of the same rules as those that apply to the internal market, while preserving their independence and that of their institutions and, as regards Switzerland, respect for the principles stemming from direct democracy, federalism and the sectoral nature of its participation in the internal market;

REAFFIRMING that the competence of the Swiss Federal Supreme Court and all other Swiss courts as well as that of the Member States' courts and of the Court of Justice of the European Union to interpret the Agreement in individual cases is preserved;

CONSCIOUS of ensuring uniformity in the fields related to the internal market in which Switzerland participates, both current and future,

HAVE AGREED AS FOLLOWS:

PART I

GENERAL PROVISIONS

ARTICLE 1

Purpose

1. The purpose of this Agreement is to allow the participation of Switzerland in the internal electricity market of the Union, by ensuring the uniform application of the rules of the internal electricity market as adapted where necessary, under the terms and conditions laid down in this Agreement.
2. In this regard, the aim of this Agreement is to:
 - (a) guarantee to all market participants equal market access to both the Union and the Swiss electricity markets, including access to joint trading schemes, platforms and coordination bodies;
 - (b) foster cross-border electricity trade for the mutual benefit of the Union and Switzerland, including through an improved allocation and management of the capacity of the transmission system, especially on interconnectors;
 - (c) ensure the stability of the regional electricity network and of the connection of the Swiss electricity system into the interconnected system of the Union;
 - (d) ensure a high degree of security of supply;

- (e) guarantee the integrity and transparency of the wholesale electricity market;
- (f) increase and promote the share of electricity produced from renewable energy sources and guarantee a high level of environmental protection in the electricity sector, to facilitate the transition to a net zero greenhouse gas energy system in Europe by 2050;
- (g) increase the cooperation between the Contracting Parties, their respective regulatory authorities and operators in the electricity sector.

ARTICLE 2

Scope

1. This Agreement applies to the electricity sector, as regards the generation, transmission, distribution, trading and supply of electricity.
2. This Agreement also applies to the matters directly related to the electricity sector as set out in this Agreement.

ARTICLE 3

Non-discrimination

The Contracting Parties undertake not to take discriminatory measures when applying this Agreement.

PART II

RULES CONCERNING PARTICIPATION IN THE INTERNAL ELECTRICITY MARKET

ARTICLE 4

Rules governing the electricity sector

Switzerland shall apply the legal acts in the electricity sector set out in Annex I.

ARTICLE 5

Swiss transmission system operator

1. Without prejudice to the provisions on unbundling of transmission system operators (hereinafter referred to as "TSOs") in the legal acts set out in Annex I, no provision of this Agreement shall be interpreted as preventing Swiss public bodies, such as cantons and municipalities, from holding a direct or indirect majority in the operator of the Swiss transmission system.
2. Nothing in this Agreement shall prevent companies active in the electricity sector from holding a direct or indirect majority in the Swiss TSO within the limits of the provisions on unbundling of TSOs in the legal acts set out in Annex I.

ARTICLE 6

Swiss distribution system operators

Without prejudice to the provisions on unbundling of distribution system operators in the legal acts set out in Annex I, no provision of this Agreement shall be interpreted as preventing Swiss public bodies, such as cantons or municipalities, from:

- (a) fully owning or holding a direct or indirect majority in Swiss distribution system operators;
- (b) organising their grid operators and entities for generation or supply under public law.

ARTICLE 7

Swiss universal service

1. No provision of this Agreement shall be interpreted as preventing Switzerland from adopting consumer protection measures which provide for a right for households and enterprises below a certain consumption threshold to benefit from a universal service, including the services of a supplier of last resort in accordance with the provisions of the legal acts set out in Annex I.
2. This Agreement shall neither be interpreted as preventing price regulation for the universal service in accordance with the provisions of the legal acts set out in Annex I.

ARTICLE 8

Transitional regime for existing long-term capacity reservations on interconnectors at the Swiss borders

1. In order to establish compliance with the principle of non-discriminatory grid access, the existing long-term capacity reservations for electricity at interconnectors between Switzerland and France, as identified in the contracts concluded before 1 January 2002, which are listed in Section B of Annex II, shall be removed with the entry into force of this Agreement. Financial compensation shall be granted to the holders of those contracts for a transitional period ending seven years after the entry into force of this Agreement but for no longer than the end date of the respective existing contract listed in Section B of Annex II if that contract terminates before. Changes to the contracts listed in Section B of Annex II shall not affect the removal of long-term capacity reservations or the transitional period.
2. Section A of Annex II sets out the principles of the financial compensation and the National Regulatory Authorities' (hereinafter referred to as "NRAs") tasks related to the compensation and its financing.
3. Notwithstanding paragraph 1, the capacity reservations related to cross-border hydropower installations with a smaller volume of capacity reservation not exceeding 65 MW, as listed in Section C of Annex II, shall be preserved during a transitional period ending 15 years after the entry into force of this Agreement but for no longer than the end date of the respective existing concession, if the concession terminates before, and shall be removed thereafter.

ARTICLE 9

Security of supply and reserves

1. The Contracting Parties attach great importance to electricity security of supply in their cooperation under this Agreement. To ensure functioning electricity markets and that electricity flows where it is most needed, cross-border interconnectors shall remain open, including in times of an electricity crisis, in line with this Agreement. Measures jeopardising electricity security of supply, especially in the event of electricity crises, shall be avoided, in particular interventions such as undue restrictions on cross-border electricity flows.
2. Switzerland may take necessary, proportionate and non-distorting measures to ensure security of electricity supply, in particular by establishing and having in place electricity reserves to the extent that they are compatible with this Agreement.
3. When assessing its national resource adequacy, Switzerland may make assumptions taking into account the particularities of national electricity demand and supply, including such particularities resulting from the fact that Switzerland is not a Member State of the Union, or from elements that may be particularly relevant for security of supply in Switzerland, such as reduced availability of nuclear power and gas for power generation in neighbouring countries, provided that such concerns are considered in a proportionate and reasonable manner.
4. In order to ensure the effectiveness of the rules on State support for generation adequacy under this Agreement and to take account of the new possibilities to exchange electricity on the basis of binding rules after the entry into force of this Agreement, State support for adequacy reserves granted before the entry into force of this Agreement that is not compatible with this Agreement shall not exceed a duration of more than six years after the entry into force of this Agreement.

ARTICLE 10

Swiss participation in institutions and other bodies

1. Switzerland and the relevant Swiss actors participate in institutions, committees, regions, schemes, platforms, initiatives and other similar bodies relevant under this Agreement.
2. In particular:
 - (a) the Swiss NRA participates in the Agency for the Cooperation of Energy Regulators (hereinafter referred to as "ACER");
 - (b) the Swiss TSO participates in the European Network of Transmission System Operators for Electricity (hereinafter referred to as "ENTSO-E");
 - (c) Swiss distribution system operators participate in the European entity for distribution system operators (hereinafter referred to as "EU DSO entity").
3. The details of the Swiss participation are set out in the Annexes.

ARTICLE 11

Exploitation of energy resources and ownership of generation installations

1. Switzerland shall preserve the right to determine the conditions for exploiting its energy resources, including the use of hydropower, within the limits of the relevant applicable law under this Agreement, as well as its choice between different energy sources and the general structure of its energy supply.
2. Nothing in this Agreement shall prevent the public ownership of generation installations, including of hydropower generation, by public bodies, within the limits of the relevant applicable electricity law.

PART III

STATE AID

ARTICLE 12

Objectives of the State aid provisions

1. The objectives of this Part are to ensure a level playing field for competition between Union and Swiss undertakings in the fields of the internal market falling under the scope of this Agreement and to guarantee the proper functioning of the internal market by laying down substantive and procedural rules on State aid.

2. This Part and its Annexes shall alter neither the scope nor the objectives of this Agreement.

ARTICLE 13

State aid

1. Save as otherwise provided for in this Agreement, any aid granted by Switzerland or by a Member State of the Union, or through State resources in any form whatsoever, which distorts or threatens to distort competition by favouring certain undertakings or the production of certain goods shall, in so far as it affects trade between the Contracting Parties within the scope of this Agreement, be incompatible with the proper functioning of the internal market.
2. The following shall be compatible with the proper functioning of the internal market:
 - (a) aid having a social character, granted to individual consumers, provided that such aid is granted without discrimination related to the origin of the products concerned;
 - (b) aid to make good the damage caused by natural disasters or exceptional occurrences;
 - (c) the measures set out in Section A of Annex III.
3. The following may be considered to be compatible with the proper functioning of the internal market:
 - (a) aid to promote the economic development of areas where the standard of living is abnormally low or where there is serious underemployment;

- (b) aid to promote the execution of an important project of common European interest, or of common interest to the Contracting Parties, or to remedy a serious disturbance in the economy of a Member State of the Union or Switzerland;
- (c) aid to facilitate the development of certain economic activities or of certain economic areas, where such aid does not adversely affect trading conditions to an extent contrary to the interest of the Contracting Parties;
- (d) aid to promote culture and heritage conservation where such aid does not affect trading conditions and competition to an extent contrary to the interest of the Contracting Parties;
- (e) the categories of aid set out in Section B of Annex III.

4. Aid granted in accordance with Section C of Annex III shall be presumed compatible with the proper functioning of the internal market and shall be exempted from notification requirements under Article 14.

5. Aid granted to undertakings entrusted with the operation of services of general economic interest or having the character of a revenue-producing monopoly shall be subject to the rules contained in this Agreement, in so far as the application of these rules does not obstruct the performance, in law or in fact, of the particular tasks assigned to them. The development of trade must not be affected to such an extent as would be contrary to the interest of the Contracting Parties.

6. This Part shall not apply to aid where the amount granted to a single undertaking for activities within the scope of this Agreement constitutes *de minimis* aid as set out in Section D of Annex III.

7. The Joint Committee established by Article 25 of this Agreement (hereinafter referred to as the "Joint Committee") may decide to update Sections A and B of Annex III by specifying measures that shall be compatible, or categories of aid that may be considered to be compatible, with the proper functioning of the internal market.

ARTICLE 14

Surveillance

1. For the purposes of Article 12, the Union, in accordance with the distribution of competences between the Union and its Member States, and Switzerland, in accordance with its constitutional order of competences, shall supervise the application of State aid rules in their respective territory in accordance with this Part.

2. For the purposes of the implementation of this Part, the Union shall maintain a State aid surveillance system in accordance with Articles 93, 106, 107 and 108 of the Treaty on the Functioning of the European Union (hereinafter referred to as "TFEU") as supplemented by Union legal acts in the field of State aid and Union legal acts concerning State aid in the electricity sector listed in point 1 of Section A of Annex IV.

3. For the purposes of the implementation of this Part, Switzerland shall, within five years of the entry into force of this Agreement, establish and maintain a State aid surveillance system that ensures at all times a level of surveillance and enforcement equivalent to that applied in the Union, as set out in paragraph 2, including the following:

(a) an independent surveillance authority; and

(b) procedures to ensure the review by the surveillance authority of the compatibility of aid with the proper functioning of the internal market, including the following:

- (i) prior notification to the surveillance authority of planned aid;
- (ii) assessment by the surveillance authority of notified aid and its competence to review non notified aid;
- (iii) challenge before the competent judicial authority, with suspensive effect from the moment the act is challengeable, of aid that the surveillance authority considers to be incompatible with the proper functioning of the internal market; and
- (iv) recovery, including interest, of aid granted and found incompatible with the proper functioning of the internal market.

4. In accordance with Switzerland's constitutional order of competences, paragraph 3, point (b)(iii) and (iv) does not apply to acts of the Swiss Federal Assembly or of the Swiss Federal Council.

5. Where the Swiss surveillance authority cannot challenge the aid of the Swiss Federal Assembly or of the Swiss Federal Council before a judicial authority, due to its limitations of competence under the Swiss constitutional order, it shall challenge the application by other authorities of that aid in all specific cases. If the judicial authority finds that that aid is incompatible with the proper functioning of the internal market, the competent Swiss judicial and administrative authorities shall take that finding into account when assessing whether to apply that aid in the case before them.

ARTICLE 15

Existing aid

1. Article 14(3), point (b), shall not apply to existing aid, including aid schemes and individual aid.
2. For the purposes of this Agreement, existing aid shall include aid granted before the entry into force of this Agreement and within five years thereof.
3. Within 12 months of the date of establishment of the surveillance system pursuant to Article 14(3), the surveillance authority shall gain an overview of existing aid schemes within the scope of this Agreement that are still in force and make a prima facie assessment of those schemes against the criteria set out in Article 13.
4. All existing aid schemes in Switzerland shall be subject to constant review by the surveillance authority as to their compatibility with the proper functioning of the internal market pursuant to paragraphs 5, 6 and 7.
5. If the surveillance authority considers that an existing aid scheme is not, or is no longer, compatible with the proper functioning of the internal market, it shall inform the competent authorities about the obligation to comply with this Part. If such an aid scheme is amended or terminated, the competent authorities shall inform the surveillance authority.
6. If the surveillance authority considers the measures taken by the competent authorities to be appropriate to ensure the compatibility of the aid scheme with the proper functioning of the internal market, it shall publish those measures.

7. Notwithstanding paragraph 1 of this Article, if the surveillance authority considers that the aid scheme remains incompatible with the proper functioning of the internal market, the surveillance authority shall publish its assessment and challenge the application of that aid scheme in all specific cases, in accordance with Article 14(3), point (b)(iii), and Article 14(5).

8. For the purposes of this Part, if an existing aid scheme is amended in such a way as to affect the compatibility of the aid with the proper functioning of the internal market, the aid shall be considered to be new aid and shall therefore be subject to Article 14(3), point (b).

ARTICLE 16

Transparency

1. With regard to aid granted in their territory, the Contracting Parties shall ensure transparency. For the Union, transparency shall be based on substantive and procedural rules that apply in the Union on State aid within the scope of this Agreement. For Switzerland, transparency shall be based on substantive and procedural rules equivalent to those that apply in the Union on State aid within the scope of this Agreement.

2. Each Contracting Party shall, in respect of its territory and unless it is otherwise provided for in this Part, ensure the publication of:

- (a) aid granted;
- (b) opinions or decisions of its surveillance authorities;

- (c) rulings of its competent judicial authorities on the compatibility of aid with the proper functioning of the internal market; and
- (d) guidelines and communications applied by its surveillance authorities.

ARTICLE 17

Terms of cooperation

1. The Contracting Parties shall cooperate and exchange information on State aid, subject to their respective laws and available resources.
2. For the purposes of the uniform implementation, application and interpretation of the substantive rules on State aid and of harmonious development thereof:
 - (a) the Contracting Parties shall cooperate and consult each other with regard to the relevant guidelines and communications referred to in Section B of Annex IV; and
 - (b) the surveillance authorities of the Contracting Parties shall conclude arrangements for a regular exchange of information, including on the implications for the application of rules on existing aid.

ARTICLE 18

Consultations

1. At the request of a Contracting Party, the Contracting Parties shall consult each other, within the Joint Committee, on matters relating to the implementation of this Part.
2. In the event of developments concerning important interests of a Contracting Party that may affect the operation of this Part, the Joint Committee shall, at the request of a Contracting Party, meet at an appropriately high level within 30 days of that request in order to discuss the matter.

ARTICLE 19

Integration of legal acts concerning State aid

1. Notwithstanding Article 27, for the purposes of Articles 13(4) and (6) and Article 14(2) and (3), and in order to guarantee legal certainty and the homogeneity of the law in the fields of the internal market in which Switzerland participates by virtue of this Agreement, Switzerland and the Union shall ensure that legal acts of the Union adopted in the fields covered by Sections C and D of Annex III as well as Section A of Annex IV are integrated into those Annexes as quickly as possible after their adoption.
2. When it adopts a legal act in the field covered by Sections C and D of Annex III or Section A of Annex IV, the Union shall inform Switzerland thereof as quickly as possible through the Joint Committee. At the request of either of the Contracting Parties, the Joint Committee shall conduct an exchange of views on the subject.

3. The Joint Committee shall act in accordance with paragraph 1 by adopting a decision as quickly as possible to amend Sections C and D of Annex III as well as Section A of Annex IV, including the necessary adaptations.

4. Subject to Article 28, the decisions of the Joint Committee pursuant to paragraph 3 of this Article shall enter into force immediately, but under no circumstances before the date on which the corresponding legal act of the Union becomes applicable in the Union.

PART IV

AREAS RELATED TO THE ELECTRICITY MARKET

ARTICLE 20

Environment

1. The Contracting Parties shall ensure a high level of environmental protection in the electricity sector.

2. Switzerland shall ensure a high level of environmental protection in accordance with Article 27(3) and Annex V.

ARTICLE 21

Renewable energies

1. The Contracting Parties shall cooperate in the field of renewable energies, in particular with regard to their deployment and promotion.
2. The Contracting Parties commit to increasing the share of renewable energy in their energy systems. Switzerland shall apply the legal acts on renewables as set out in Annex VI and especially set an appropriate indicative renewable energy target.
3. The Contracting Parties shall endeavour to accelerate their planning and permitting procedures.

ARTICLE 22

Infrastructure cooperation

1. The Contracting Parties shall cooperate to facilitate the timely development and interoperability of the electricity infrastructure connecting their territories.
2. Each Contracting Party shall ensure that network development plans for its electricity transmission systems are drawn up, published and regularly updated.

3. For the purpose of the potential qualification of Swiss infrastructure projects as projects of mutual interests pursuant to Article 2(1) and Article 4(2), point (e), of Regulation (EU) 2022/869 of the European Parliament and of the Council¹, a high level of convergence of the policy framework is presumed for Switzerland. Participation in the drafting of legal acts of the Union ("decision shaping")

1. When drafting a proposal for a legal act of the Union in accordance with the TFEU in the field covered by this Agreement, the European Commission (hereinafter referred to as the "Commission") shall inform Switzerland thereof and shall informally consult Switzerland's experts in the same way that it asks for the views of experts from the Member States of the Union for the drafting of its proposals.

At the request of either Contracting Party, a preliminary exchange of views shall take place within the Joint Committee.

The Contracting Parties shall consult each other again, at the request of either of them, within the Joint Committee at important moments of the phase preceding the adoption of the legal act by the Union, in a continuous process of information and consultation.

3. When preparing, in accordance with the TFEU, implementing acts concerning basic acts of Union law in the field covered by this Agreement, the European Commission shall ensure that Switzerland has the widest possible participation in the preparation of the drafts to be submitted to the committees assisting the Commission in the exercise of its implementing powers and shall consult Switzerland's experts on the same basis as it consults the experts from the Member States of the Union.
4. Switzerland's experts shall be involved in the work of committees not covered by paragraphs 2 and 3 where this is required for the proper functioning of this Agreement. A list of those committees and, where appropriate, of other committees with similar characteristics, shall be drawn up and updated by the Joint Committee.

3. Switzerland shall, with applicability in the electricity sector, adopt or maintain provisions laying down requirements that ensure at least the same level of environmental protection as laid down in the legal acts of the Union integrated into Annex V in accordance with paragraph 5. The provisions of Swiss law adopted or maintained in accordance with this paragraph may not be invoked to restrict the free access to the Swiss market of goods and services from the Union that comply with the requirements laid down in the legal acts of the Union referred to in Annex V.
4. When it adopts a legal act in the field covered by this Agreement, the Union shall inform Switzerland thereof as quickly as possible through the Joint Committee. At the request of either of the Contracting Parties, the Joint Committee shall conduct an exchange of views on the subject.
5. The Joint Committee shall act in accordance with paragraph 1 by adopting a decision as quickly as possible to amend Annexes I, V and VI to this Agreement, including the necessary adaptations.
6. Without prejudice to paragraphs 1 and 2, if necessary in order to ensure coherence of this Agreement with Annexes I, V and VI as amended pursuant to paragraph 5, the Joint Committee may propose, for approval by the Contracting Parties according to their internal procedures, the revision of this Agreement.
7. References in this Agreement to legal acts of the Union that are no longer in force shall be construed as references to the repealing legal act of the Union as integrated into the Annexes I, V and VI as from the entry into force of the Joint Committee's decision on the corresponding amendment of Annexes I, V and VI, unless otherwise provided in that decision.

8. The obligation set out in paragraph 1 shall not apply to legal acts of the Union or provisions thereof falling within the scope of the following exception:

– Article 9(3).

9. Subject to Article 28, decisions of the Joint Committee pursuant to paragraph 5 shall enter into force immediately, but under no circumstances before the date on which the corresponding legal act of the Union becomes applicable in the Union.

10. The Contracting Parties shall cooperate in good faith throughout the procedure set out in this Article in order to facilitate decision-making.

ARTICLE 28

Fulfilment of constitutional obligations by Switzerland

2. Where the decision referred to in Article 27(5) requires Switzerland to fulfil constitutional obligations in order to become binding, Switzerland shall have a time limit of two years maximum from the date of the information provided for in paragraph 1, except where a referendum procedure is launched, in which case this period shall be extended by one year.

3. Pending the information by Switzerland that it has fulfilled its constitutional obligations, the Contracting Parties shall provisionally apply the decision referred to in Article 27(5), unless Switzerland informs the Union that the provisional application of the decision is not possible and provides the reasons for this.

Under no circumstances can the provisional application occur before the date on which the corresponding legal act of the Union becomes applicable in the Union.

4. Switzerland shall notify the Union without delay through the Joint Committee once it has fulfilled the constitutional obligations referred to in paragraph 1.

CHAPTER 3

INTERPRETATION AND APPLICATION OF THE AGREEMENT

ARTICLE 29

Uniform interpretation principle

1. For the purpose of achieving the objectives set out in Articles 1, 12 and 23 and in accordance with the principles of public international law, the bilateral agreements in the fields related to the internal market in which Switzerland participates and the legal acts of the Union to which reference is made in such agreements shall be uniformly interpreted and applied in the fields related to the internal market in which Switzerland participates.
2. The legal acts of the Union to which reference is made in this Agreement and, to the extent that their application involves concepts of Union law, the provisions of this Agreement shall be interpreted and applied in accordance with the case law of the Court of Justice of the European Union, prior or subsequent to the signature of this Agreement.

ARTICLE 30

Effective and harmonious application principle

1. The Commission and the competent Swiss authorities shall cooperate and assist each other in ensuring the surveillance of the application of this Agreement. They may exchange information on the activities of surveillance of the application of this Agreement. They may exchange views and discuss issues of mutual interest.
2. Each Contracting Party shall take appropriate measures to ensure the effective and harmonious application of this Agreement on its territory.
3. The surveillance of the application of this Agreement shall be carried out jointly by the Contracting Parties within the Joint Committee. If the Commission or the competent Swiss authorities become aware of a case of incorrect application, the matter may be referred to the Joint Committee with a view to finding an acceptable solution.
4. The Commission and the competent Swiss authorities respectively shall monitor the application of this Agreement by the other Contracting Party. The procedure provided for in Article 32 of this Agreement applies.

To the extent that certain surveillance competences of the institutions of the Union as regards one Contracting Party are necessary to ensure the effective and harmonious application of this Agreement, such as investigation and decision powers, this Agreement must foresee them specifically.

ARTICLE 31

Exclusivity principle

The Contracting Parties undertake not to submit a dispute regarding the interpretation or application of this Agreement and of the legal acts of the Union to which reference is made in this Agreement or, where applicable, regarding the conformity with this Agreement of a decision adopted by the Commission on the basis of this Agreement to any method of settlement other than those provided for in this Part.

ARTICLE 32

Procedure in the event of difficulty of interpretation or application

1. In the event of difficulty of interpretation or application of this Agreement or of a legal act of the Union to which reference is made in the Agreement, the Contracting Parties shall consult each other within the Joint Committee in order to find a mutually acceptable solution. To this end, all useful elements of information shall be provided to the Joint Committee to enable it to make a detailed examination of the situation. The Joint Committee shall examine all possibilities that allow the proper functioning of this Agreement to be maintained.
2. If the Joint Committee is not able to find a solution to the difficulty referred to in paragraph 1 within three months of the date on which the difficulty was submitted to it, either of the Contracting Parties may request that an arbitral tribunal settle the dispute in accordance with the rules laid down in the Protocol.

3. Where the dispute raises a question concerning the interpretation or application of a provision referred to in Article 29(2), and if the interpretation of that provision is relevant to the settlement of the dispute and necessary to enable it to decide, the arbitral tribunal shall refer that question to the Court of Justice of the European Union.

Where the dispute raises a question concerning the interpretation or application of a provision that falls within the scope of an exception from the dynamic alignment obligation referred to in Article 27(8) and where the dispute does not involve the interpretation or application of concepts of Union law, the arbitral tribunal shall settle the dispute without referral to the Court of Justice of the European Union.

4. Where the arbitral tribunal refers a question to the Court of Justice of the European Union pursuant to paragraph 3:

- (a) the ruling of the Court of Justice of the European Union shall be binding on the arbitral tribunal, and;
- (b) Switzerland shall enjoy the same rights as the Member States and the institutions of the Union and shall be subject to the same procedures before the Court of Justice of the European Union, *mutatis mutandis*.

5. Each Contracting Party shall take all measures necessary to comply in good faith with the arbitral tribunal's decision. The Contracting Party that has been found by the arbitral tribunal not to have complied with this Agreement shall inform the other Contracting Party through the Joint Committee of the measures it has taken to comply with the arbitral tribunal's decision.

ARTICLE 33

Compensatory measures

1. If the Contracting Party that has been found by the arbitral tribunal not to have complied with this Agreement does not inform the other Contracting Party, within a reasonable time period set in accordance with Article IV.2(6) of the Protocol, of the measures it has taken to comply with the arbitral tribunal's decision, or if the other Contracting Party considers that the measures communicated do not comply with the arbitral tribunal's decision, this other Contracting Party may adopt proportionate compensatory measures within the framework of this Agreement or of any other bilateral agreement in the fields related to the internal market in which Switzerland participates (hereinafter referred to as "compensatory measures") in order to remedy a potential imbalance. It shall notify the Contracting Party that has been found by the arbitral tribunal not to have complied with this Agreement of the compensatory measures, which shall be specified in the notification. Those compensatory measures shall take effect three months from the date of this notification.
2. If, within one month from the date of the notification of the intended compensatory measures, the Joint Committee has not taken a decision to suspend, amend or annul those compensatory measures, either Contracting Party may submit to arbitration the question of the proportionality of those compensatory measures, in accordance with the Protocol.
3. The arbitral tribunal shall decide within the time limits laid down in Article III.8(4) of the Protocol.
4. Compensatory measures shall not have retroactive effect. In particular, the rights and obligations already acquired by individuals and economic operators before the compensatory measures take effect shall be preserved.

ARTICLE 34

Cooperation between jurisdictions

1. To promote the homogeneous interpretation, the Swiss Federal Supreme Court and the Court of Justice of the European Union shall agree on a dialogue and the modalities thereof.
2. Switzerland shall have the right to lodge statements of case or written observations with the Court of Justice of the European Union where a court of a Member State of the Union refers to the Court of Justice of the European Union a question concerning the interpretation of this Agreement or of a provision of a legal act of the Union referred to therein for a preliminary ruling.

TRANSITIONAL REGIME FOR EXISTING
LONG TERM CAPACITY RESERVATIONS
ON INTERCONNECTORS AT THE SWISS BORDERS

SECTION A

PRINCIPLES FOR FINANCIAL COMPENSATION

ARTICLE 1

General principles and scope

1. This Annex establishes the principles for a transitional mechanism of financial compensation for the holders of contracts listed in Section B.
2. The financial compensation shall be calculated based on the economic value of the capacity reservations for contract holders, as calculated pursuant to Article 2.
3. The financial compensation shall be granted for the transitional period set out in Article 8(1) of this Agreement.

4. Prior to the participation of Switzerland in single day-ahead coupling, contract holders who want to receive the financial compensation shall acquire the necessary cross-border capacity through an auction performed by the Joint Allocation Office (hereinafter referred to as "JAO"), in accordance with the applicable rules and procedures set out by the JAO. Contract holders shall not be entitled to compensation if they did not succeed in acquiring the necessary capacity through the auction process.

5. Once Switzerland has joined single day-ahead coupling, the contract holders who want to receive financial compensation shall demonstrate that their bid was accepted in the single day-ahead process in accordance with the applicable rules and procedures as defined in the Regulation (EU) 2015/1222 of 24 July 2015 establishing a guideline on capacity allocation and congestion management (OJ L 197, 25.7.2015, p. 24, ELI: <http://data.europa.eu/eli/reg/2015/1222/oj>).

ARTICLE 2

Calculation of the financial compensation

1. The financial compensation shall be calculated based on a compensation volume (in MW for a given hour) as defined in paragraphs 2 and 3, multiplied by a compensation price (in euro/MWh), as defined in paragraph 4.

2. The compensation volume for each contract shall be:
- (a) during the period prior to Switzerland joining the single day-ahead coupling, the capacity (in MW for a given hour) allocated to the contract holder in the auction process; when claiming the compensation, the contract holders shall deliver proof that a capacity up to the volume of the contract at the border has been acquired and used and of the availability of the generation installation in the respective market time unit.
 - (b) after Switzerland has joined the single day-ahead coupling, the volume (in MW for a given hour) of the successful bid in the single day-ahead coupling process in the respective bidding zone, up to the maximum volume of the contracts; when claiming the financial compensation, the contract holders shall deliver proof of the volume of the successful bid and the availability of the generation installation in the respective market time unit.
3. In any given year, the compensation volume pursuant to paragraph 2 shall be reduced to the following percentages:
- 74,3 % for the direction from France to Switzerland in winter (1 October to 30 April) and 68,5 % in summer (1 May to 30 September);
 - 93,9 % for the direction from Switzerland to France in winter (1 October to 30 April) and 100 % in summer (1 May to 30 September).
4. The compensation price shall be calculated *ex post* as the positive price difference between the day-ahead market clearing prices of Switzerland and France, considering the direction of the historical capacity reservation, resulting from the market result in the day-ahead timeframe, calculated for each market time unit separately. In the event that the price difference is negative, no compensation shall be paid.

5. The amount of the compensation calculated pursuant to paragraphs 1 to 4 shall be further reduced by 20 % to account for the contribution of contract holders to the maintenance and capital costs of the grid.

6. In the event that the total compensation payments to contract holders as calculated pursuant to paragraphs 1 to 5 exceed the congestion income from or assigned to the French-Swiss border, the compensation payments shall be reduced proportionally for all contract holders to ensure that the total compensation payments do not exceed the available congestion income.

7. The total financial compensation for each contract holder calculated pursuant to this Article shall be paid to the contract holders *ex post* on a monthly basis.

ARTICLE 3

Financing of the compensation

The financial compensation pursuant to Article 2 shall be financed by the congestion income generated by the allocation of capacity on the French-Swiss border, either as received from an auction of capacity at that border performed by the JAO or assigned to the border by application of the Congestion Income Distribution methodology.

ARTICLE 4

Implementation, monitoring, and dispute resolution

1. The NRAs of France and Switzerland shall, where necessary, agree on procedures to implement the rules in this Annex within three months of the date of entry into force of this Agreement. They shall notify a draft of the procedures to ACER, the Commission and the Joint Committee two months after the date of entry into force of this Agreement.
2. The NRAs of France and Switzerland shall be responsible for verifying the compliance of TSOs and contract holders with the procedures developed pursuant to paragraph 1, including that the compensation granted to contract holders is limited to the contracts listed in Section B to this Annex. They shall send a yearly report on the application of the transitional mechanism to ACER and the Joint Committee by 1 March of the following year.
3. In the event that the NRAs fail to reach a consensus on the procedures pursuant to paragraph 1 within three months of the date of entry into force of this Agreement, Switzerland may refer the issue to the Joint Committee which shall decide on the implementation procedures within 6 months of the date of that referral.
4. Notwithstanding paragraphs 1 to 3, the contract holders shall have the right to receive the financial compensation from the date of entry into force of this Agreement until the end of the transitional period.

4. On the basis of its draft budget, the Commission shall provide an estimate of information under points (a) and (b) of paragraph 3 as soon as possible, and at the latest, by 1 September of the financial year.

5. The Commission shall issue to Switzerland, at the latest on 16 April and, if applicable to the relevant agency, information system or other activity, at the earliest on 22 October and at the latest on 31 October of each financial year, a call for funds that corresponds to the contribution of Switzerland under this Agreement for each of the agencies, information systems and other activities in which Switzerland participates.

6. The call(s) for funds referred to in paragraph 5 shall be structured in instalments as follows:
- (a) the first instalment of each year, in relation to the call for funds to be issued by 16 April, shall correspond to an amount up to the equivalent of the estimate of the annual financial contribution of the agency, information system or other activity in question referred to in paragraph 4.

Switzerland shall pay the amount indicated in this call for funds at the latest 60 days after the call for funds is issued;

8. Any delay in the payment of the financial contribution shall give rise to the payment of default interest by Switzerland on the outstanding amount as from the due date until the day on which that outstanding amount is paid in full.

The interest rate for amounts receivable not paid on the due date shall be the rate applied by the European Central Bank to its principal refinancing operations, as published in the C series of the *Official Journal of the European Union*, in force on the first day of the month in which the due date falls, or 0 %, whichever is higher, plus 3,5 percentage points.

ARTICLE 3

Adjustment of Switzerland's financial contribution to Union agencies in the light of implementation

The adjustment of Switzerland's financial contribution to Union agencies shall be made in year N+1 when the initial operational contribution shall be adjusted upwards or downwards by the difference between the initial operational contribution and an adjusted contribution calculated by applying the contribution key of year N to the amount of budgetary commitments made on commitment appropriations authorised in year N under the relevant Union subsidy budget line(s). Where applicable, the difference shall take into account for each agency the percentage-based adjusted operational contribution as defined in Article 1.

ARTICLE 4

Transitional arrangements

In the event that the date of entry into force of this Agreement is not on 1 January, this Article shall apply by way of derogation from Article 2.
