NOTE

From: General Secretariat of the Council
To: Delegations
Subject: ANNEX to the COUNCIL IMPLEMENTING DECISION amending the
Implementing Decision of 15 December 2022 on the approval of the
assessment of the recovery and resilience plan for Hungary

Delegations will find attached the above-mentioned annex to the amending Council Implementing Decision.

SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN

1. Description of reforms and investments

A. COMPONENT 1: DEMOGRAPHY AND PUBLIC EDUCATION

This component of the Hungarian recovery and resilience plan addresses challenges related to the inclusive access to quality school education, the labour market integration of vulnerable groups, and broader demographic developments facing the Hungarian economy, public finances and society.

The main objectives of the component are to:

- improve access to quality school education by providing pupils and teachers with the devices necessary to participate in modern digital education, and developing their digital skills;
- increase the participation of disadvantaged pupils and students with special education needs in quality mainstream education;
- reduce the risk of segregation in schools;
- increase the attractiveness of the teaching profession and reinforce the skillset of teachers;
- improve access to early childhood education and care to reduce social inequalities and facilitate labour market integration of vulnerable groups

The component includes measures reflecting principles of the European Pillar of Social Rights on education, training and lifelong learning, on gender equality and on childcare and support to children. The component also supports the digital transition by increasing the digital capacities in the public education and by enhancing the digital skills of pupils and teachers. The focus on reducing segregation in schools contributes to social cohesion. The component also contributes to the green transition, as the planned infrastructure developments shall apply high standards of energy efficiency.

The component is in line with the Hungarian public education strategy prepared for the period 2021-2030, the Hungarian National Energy and Climate Plan, the National Energy Strategy 2030 and the National Clean Development Strategy.

The component contributes to addressing the Country Specific Recommendations on the need to continue the labour market integration of the most vulnerable groups, in particular through upskilling and to improve education outcomes and increase the participation of disadvantaged groups, in particular Roma in quality mainstream education (Country Specific Recommendation 2 in 2019 and Country Specific Recommendation 3 in 2022), contribute to women's participation to the labour market (Country Specific Recommendation 4 in 2019), to focus investment-related economic policy on energy and resource efficiency (Country Specific Recommendation 3 in 2019), to ensure access to essential services and quality education for all (Country Specific Recommendation 2 in 2020), to focus investment on the green and digital transition and digital infrastructure for schools (Country Specific Recommendation 3 in 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

A.1. Description of the reforms and investments for non-repayable financial support

C1.I1: Development of competitive public education using 21st century technology

The objective of the measure is to support the digital transformation of public education by increasing the availability of digital devices and tools in schools.

This measure consists in delivering digital devices to the school education institutions and to the school administration centrum (Klebelsberg Központ).

C1.I2: Supporting the education of students with special education needs

The objective of the measure is to enhance the quality of specialised services for schools integrating students with special education needs, those in long-term care, and those requiring specialised pedagogical support.

This measure consists in providing specialised support services to public education institutions integrating children and pupils with special education needs.

C1.R1: Reduction of segregation risk in schools

The objective of the reform is to enhance equal access to quality education and to reduce school segregation.

The measure consists in the entry into force of legal act(s) for the reduction of State support for primary and lower secondary schools (grades 1 to 8) with a low proportion of disadvantaged students.

C1.R2: Increasing the attractiveness of the teaching profession

The objective of this measure is to increase the attractiveness of the teaching profession and to reduce teacher shortages.

The measure consists in the entry into force of legal act(s) on gradually increasing teachers' wages to at least 80% of the average wage of tertiary graduates in 2025 and to be maintained at the same level until at least 31 December 2031.

C1.I3: Construction of childcare facilities

The objective of the investment is to increase the availability of early childhood education services by creating new crèche places.

This measure consists in the construction of childcare facilities.

C1.I4: Modernisation of school infrastructure

The objective of the investment is to increase capacities in the primary and secondary education by upgrading school infrastructure and teaching equipment.

This measure consists in the construction and renovation of school facilities, and purchase and installation of teaching equipment.

A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
1	C1.I1 Development of competitive public education using 21st century technology	Milestone	Delivery of digital notebooks and tools	Delivery of equipment				Q2	2026	Delivery of 579 000 digital notebooks and 3 100 digital tools to the school education institutions or to the school administration centrum (Klebsberg Központ).
2	C1.I2 Supporting the education of students with special education needs	Milestone	Provision of support services for the education of children with special education needs	Award of support				Q2	2026	EUR 23.5 million awarded for projects in training and knowledge sharing, school transportation services, equipment rental, ICT and medical equipment, adapted electric vehicles, and payments made.
3	C1.R1 Reduction of segregation risk in schools	Milestone	Entry into force of legal act(s) providing for the reduction of State support for primary and lower secondary schools with a low proportion of disadvantaged students	Provisions in the legal act(s) indicating its entry into force				Q2	2026	Entry into force of legal act(s) for the reduction of State support for primary and lower secondary schools (grades 1 to 8) with a low proportion of disadvantaged students. The legal act(s) shall include provisions according to which the State support for primary and lower secondary schools is reduced by 10% if the proportion of disadvantaged students in those schools is more than 20 percentage points lower than the average proportion in the settlement (at local administrative unit level where the school is located) as determined at the beginning of the schoolyear 2025/2026.
4	C1.R2 Increasing the attractiveness of the teaching profession	Milestone	Entry into force of legal act(s) to increase wages of teachers in the public education system	Provisions in the legal act(s) indicating its entry into force				Q2	2026	Entry into force of legal act(s) setting out the obligation that the average wage of teachers in the public education system (all teachers in public education system holding a tertiary degree as defined in the Public Education Act, excluding vocational education) shall reach at least 80% of

Seq Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										<p>the average wage of tertiary graduates by 1 January 2025 and shall be maintained at a level of at least 80% of the average wage of tertiary graduates until at least 31 December 2031.</p> <p>The law shall also include provisions according to which, as of 1 January 2024 and until at least 31 December 2031, the wage of teachers in the categories listed below shall be higher by at least 12.5 % of the wage of teachers with the same qualification and experience not included in these categories:</p> <ul style="list-style-type: none"> - teachers working in disadvantaged settlements or catching up settlements as defined by government decree; - teachers working in schools with a proportion of disadvantaged pupils of at least 10% and defining special pedagogical methods for inclusive education in their pedagogical programmes (source: Köznevelési Információs Rendszer).
5	C1.I3 Construction of childcare facilities	Target	Constructed childcare facilities		Number	0	110	Q2	2026	Launch of call(s)/tender(s) for the construction of 110 childcare facilities. The conditions of the tender(s)/call(s) for applications shall ensure that the primary energy demand of any new buildings is at least 20% lower than the nearly zero-energy building requirement as set out in national legislation. Construction of 110 childcare facilities.
6	C1.I4 Modernisation of school infrastructure	Milestone	Construction and renovation of school facilities	Disbursement of funds				Q2	2026	Disbursement of EUR 152 million of funds for investments in school infrastructure and teaching equipment.

B. COMPONENT 2: HIGHLY QUALIFIED, COMPETITIVE WORKFORCE

This component of the Hungarian recovery and resilience plan contributes to the modernisation of the vocational and higher education systems. It addresses the challenges of the green and digital transition by implementing energy efficiency renovation and digital equipment solutions in buildings in higher and vocational education institutions. The component also addresses challenges related to skills development and levels of research and innovation by incentivising business-academia research projects. The measures in this component are important for the recovery of the economy and for enhancing future crisis resilience.

The central objective of this component is to strengthen the labour force and related training institutions in light of current and possible new crises, and to improve the socio-economic environment of Hungary. To this end, the component aims to (i) create a competitive higher education system; (ii) contribute to increasing the availability of skilled workers; and (iii) support an ecosystem for science, innovation and training.

The component supports addressing the Country Specific Recommendations on promoting investment and reform on research and innovation, and green and digital skills (Country Specific Recommendation 5 in 2022); on focusing investment on the green and digital transitions and on the digital infrastructure of schools (Country Specific Recommendation 2 in 2020); and on focusing investment-related economic policy on research and innovation (Country-Specific Recommendation 3 in 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

B.1. Description of the reforms and investments for non-repayable financial support

C2.R1: Modernisation of higher education courses

The objective of this measure is to modernise higher education by including more practice-oriented elements in the programmes.

This measure consists in the revision of higher education programmes to introduce practice-oriented elements and the amendment of selected related regulations.

C2.I1: Institutional innovation in higher education

The objective of this measure is to develop digital learning content.

This measure consists in developing digital learning content.

C2.I2: Digitalization and modernisation of higher education infrastructure

The objective of this measure is to increase the attractiveness of higher education institutions and support the green and digital transition through modernised infrastructure and digitalisation.

This measure consists in:

- i) energy efficiency refurbishment of higher education institutions, achieving at least 30% primary energy savings.
- ii) the construction of new buildings for higher education institutions, which shall have a primary energy demand of at least 20% below the nearly zero-energy buildings requirement.
- iii) purchase and delivery of digital equipment in higher education institutions.

C2.I3: Vocational education and training infrastructure for the 21st century

The objective of the investment is to improve digitalisation and energy efficiency of selected vocational training centres.

This measure consists in: (i) energy efficiency renovation and/or construction of new buildings, and (ii) purchase and delivery of ICT equipment to selected vocational education and training centres.

C2.I4: Development of the Central Examination Centre

The objective of this measure is to develop a central examination centre in Budapest promoting high-quality professional examinations.

This investment consists in the renovation and purchase and delivery of equipment for the Central Examination Centre.

C2.I5: Support for research and development

The objective of the investment is to strengthen the innovation ecosystem in the country by supporting research and development activities in the areas of safe society and environment; health; industry and digitalisation.

The measure consists of the provision of financial support to research entities.

B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
7	C2.R1 Modernisation of higher education programmes	Milestone	Revision of higher education programmes	Revised programmes				Q2	2026	Revision of 15 higher education programmes to introduce practice-oriented elements and amend related regulations.
8	C2.I1 Institutional innovation in higher education	Milestone	Digital learning materials accessible in higher educations	Digital learning materials accessible in higher educations				Q2	2026	At least 1 000 digital learning materials (e.g., textbooks, research studies, and other educational resources) are developed in higher education institutions.
9	C2.I2 Digitalization and modernisation of higher education infrastructure	Milestone	Energy efficiency refurbishment of building infrastructure and construction of new buildings in higher education institutions	Higher education institutions renovated/constructed				Q2	2026	<p>Launch of a call for projects regarding 1) energy efficiency renovation, 2) construction of new buildings, 3) purchase and installation of digital equipment in higher education institutions.</p> <p>The requirements in the call documentation shall ensure non-discrimination among Hungarian higher education institutions, including based on their ownership structure. Public trust funds shall not be eligible as recipients under the call.</p> <p>Renovation and/or construction of 25 145 square meters of buildings in higher education institutions and purchase and delivery of 22 300 ICT equipment for higher education institutions.</p> <p>Newly constructed buildings shall have a primary energy demand that is at least 20% lower than nearly zero-energy building requirement. Energy efficiency renovations shall achieve, on average, at least a 30%</p>

Sequential Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										reduction of direct and indirect GhG emissions compared to ex ante emissions.
10	C2.13 Vocational education and training infrastructure for the 21st century	Target	Vocational education and training centres equipped and with upgraded infrastructure		Number	0	18	Q2	2026	Renovation and/or construction of 57 000 square meters and purchase and delivery of 1 150 ICT equipment. These centres shall achieve on average at least 30 % reduction of direct and indirect greenhouse gas emissions or at least 30% primary energy savings.
11	C2.14 Development of the Central Examination Centre	Milestone	Refurbishment of the Central Examination Centre	Refurbishment of the Central Examination Centre				Q2	2026	Renovation of the Central Examination Centre's building and purchase and delivery of ICT and production simulation equipment. The energy efficiency renovation shall reach at least 30% primary energy savings or at least 30% reduction in greenhouse gas emissions.
12	C2.15 Support for research and development	Target	Support research entities		Number	0	14	Q2	2026	Signature of 14 grant agreements with research entities.

C. COMPONENT 3: CATCHING UP SETTLEMENTS

This component of the Hungarian recovery and resilience plan addresses the socio-economic and territorial challenges that have been amplified by the COVID-19 pandemic, particularly in the poorest settlements, and tackles issues such as the lack of access to the labour market and public services, the shortage of primary care professionals and more generally poverty.

The main objective of this component is to provide basic services for the inhabitants of the 300 most disadvantaged settlements in Hungary (as defined by the Government Decision 1404/2019 (VII.05.) and the Government Decision 1057/2021. (II.19.)) through an integrated social policy intervention. The scope of measures in this component is an integral part of the wider Catching up Settlements Programme. The component contributes to the principle 20 on access to essential services of the European Pillar of Social Rights.

To this end, the component aims to (i) establish social solar power plants; (ii) promote employment and skills development based on local specificities and the strengthening of the local economic culture; and (iii) achieve better learning outcomes through community-oriented pedagogy.

The component shall contribute to addressing the Country Specific Recommendations on improving the adequacy of social assistance and ensure access to essential services, quality education (Country Specific Recommendations 2 in 2020 and 3 in 2022), on ensuring labour market integration of the most vulnerable groups (Country Specific Recommendations 2 in 2019 and 3 in 2022), and on making investments focused on the green and digital transitions (Country Specific Recommendations 3 in 2020 and 6 in 2022).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

C.1. Description of the reforms and investments for non-repayable financial support

C3.I1: Production and use of renewable energy in disadvantaged municipalities

The objective of this measure is to reduce energy poverty in municipalities selected under the Catching up Settlements Programme through renewable energy production.

This measure consists in the installation of photovoltaic capacity to subsidise electricity needs of households living in municipalities selected under the Catching up Settlements Programme.

C3.I2: Promoting employment and skills development based on local specificities

The objective of this measure is to develop employability of people living in municipalities selected under the Catching-up Settlements Programme.

This measure consists in the support of participation in labour socialisation programmes.

C3.I3: Community-oriented pedagogy

The objective of the measure is to provide pupils targeted support in municipalities selected under the Catching up Settlements Programme.

The measure consists in the participation of public education institutions in inclusive pedagogical development.

C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential Number	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
13	C3.I1 Production and use of renewable energy in disadvantaged municipalities	Target	Installation of renewable energy production capacity for the benefit of households from municipalities selected under the Catching up Settlements Programme		kWp	0	15 000	Q2	2026	Installation of photovoltaic power plants with a total capacity of at least 15 000 kWp. Grant awards issued for 1 500 beneficiaries from municipalities selected under the Catching up Settlements programme to subsidise annual electricity costs.
14	C3.I2 Promoting employment and skills development based on local specificities	Target	Participation in labour socialisation programmes		Number	0	7 000	Q2	2026	At least 7 000 people from municipalities selected under the Catching up Settlements Programme have participated in labour socialisation programmes, for example workshops, training, mentoring or labour personalised services.
15	C3.I3 Community-oriented pedagogy	Target	Pedagogical development of public education or vocational training institutions		Number	0	60	Q2	2026	Participation of at least 60 public education or vocational training institutions from municipalities selected under the Catching up Settlements Programme in inclusive, community oriented pedagogical development programmes, for example social diagnoses for public education institutions, extended school programmes and career guidance methods for teachers.

D. COMPONENT 4: WATER MANAGEMENT AND CIRCULAR ECONOMY

This component of the Hungarian recovery and resilience plan aims at addressing the challenges that Hungary faces with water management and with its transition to a circular economy.

Water scarcity has a detrimental effect on the status of water bodies, ecosystems and agricultural lands. The objective of this component is to contribute to introducing solutions in the field of water management through the establishment of an action plan and water retention measures.

The measures under circular economy contribute to a more developed waste management system in Hungary. This requires establishing the main legislative and procedural requirements for preparing the Hungarian economy to the transition to the circular economy, accompanied by awareness raising activities on waste recycling. The objectives of this component are consistent with the EU Waste Management Framework.

The component contributes to addressing the Country Specific Recommendations to focus investment-related economic policy on sustainable water management (Country Specific Recommendation 3 in 2020, and Country Specific Recommendation 5 in 2022). In addition, this component contributes to addressing the Country Specific Recommendations to promote reform on sustainable waste management and the circularity of the economy (Country Specific Recommendation 5 in 2022).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

D.1. Description of the reforms and investments for non-repayable financial support

C4.R1: Awareness raising - water

The objective of the reform is to set a climate-resilient and sustainable water management framework by aligning water use with available water resources and climate change projections.

The measure consists of the adoption of an action plan on sustainable water management and the delivery of controlled water retention interventions.

C4.I1: Nature protection

The objective of this investment is to improve the water quality and ecological status of the (Soroksári)-Danube branch by constructing and putting into operation the new Kvassay pumping station and its associated infrastructure and ensure reliable, climate-resilient water supply.

The measure consists of completing the Danube-side suction structure of the new pumping station, installing four propeller pumps with their mechanical and electrical equipment, and establishing the high-voltage power supply and control system.

C4.R2: Domestic regulation of the transition to a circular economy

The objective of this measure is to create a sound legal framework for the transition to a circular economy.

The measure consists of the entry into force of the amendments to the legal framework with a view to creating an enabling environment for waste management in Hungary.

C4.R3: Action plan for local awareness raising activities

The objective of the measure is to raise the awareness of the population on waste recycling.

The reform consists in the adoption of a national communication action plan which informs the general public regarding the higher levels of waste hierarchy.

D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential Number	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
16	C4.R1 Awareness-raising - water	Milestone	Adoption of an action plan on sustainable water management	The action plan on sustainable water management is adopted				Q2	2026	<p>An action plan on sustainable water management has been adopted by the Government, setting out measures, responsibilities and timelines to:</p> <ul style="list-style-type: none"> - align water use with available water resources and climate change projections, including reducing flood and drought impacts and ensuring long-term water resilience. - prioritise nature-based solutions and natural water retention measures, including their integration into river basin management plans and land-use planning - increase water-use efficiency including reduction of losses and promotion of circular water use and sustainable urban stormwater management - develop green skills in the water sector and related fields through targeted training and upskilling measures also at local level - develop monitoring and evaluation framework for assessing the quantitative and qualitative status of groundwater bodies and the impact of water retention measures. - estimate financial needs - prepare recommendations for future legislative changes needed to implement the action plan, based on structured involvement of stakeholders.

Sequential Number	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										In addition to the adoption of the Action plan, communication activities shall be delivered on sustainable water management.
17	C4.R1 Awareness-raising - water	Target	Number of hectares of water retention interventions		Number of hectares	0	18 000	Q2	2026	At least 18 000 ha of agricultural land have been involved in the “Water to Landscape” programme, where controlled water retention interventions shall be either carried out or assessed feasible by the water authority.
18	C4.I1 Nature protection	Milestone	Delivery of the Kvassay pumping station – Phase 2	Entry into operation of the Kvassay pumping station				Q2	2026	Entry into operation of the Danube-side suction structure, the four propeller pumps together with their mechanical and electrical equipment, the high-voltage power supply system, and the control system, forming the second phase of the Kvassay pumping station project. Delivery of an environmental screening.
19	C4.R2 Domestic regulation of the transition to a circular economy	Milestone	Entry into force of the legal act(s) necessary to operationalise waste management practice and adoption a national waste management plan	Provision in the legal acts indicating the respective entry into force and adoption of a national waste management plan				Q2	2026	Entry into force of legal act(s) regulating the following elements respectively: <ul style="list-style-type: none"> - The establishment of, and rules governing the deposit system for beverage bottles; - The reduction of environmental impact of certain plastic products (including measures concerning single-use plastic products); - Rules of the extended producer responsibility;

Sequential Number	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										<ul style="list-style-type: none"> - The removal of abandoned waste from immovable property and of transport to waste treatment place. Adoption of a national waste management plan establishing a framework for transitioning to a circular economy and preventing waste.
20	C4.R3: Action plan for local awareness raising activities	Milestone	Adoption of a national communication action plan	Adoption of a national communication action plan				Q2	2026	Adoption of the national communication action plan providing a communication framework to inform the general public about higher levels of waste hierarchy.

E. COMPONENT 5: SUSTAINABLE GREEN TRANSPORT

This component of the Hungarian recovery and resilience plan addresses the need to strengthen the contribution of the transport sector to the reduction of greenhouse gas and pollutant emissions, to speed up the modernisation of the transport network and rolling stock, to increase the attractiveness of sustainable transport modes, in particular public transport, and to improve social and territorial cohesion.

The objective of this component is to promote sustainable mobility, strengthen low-carbon public transport, reduce negative externalities of transport (in particular congestion and emissions) and provide accessible modes of transport, mostly through a strengthening of public transport infrastructure and vehicles. The measures of this component are expected to lead to a reduction of emissions due to transport by encouraging the use of environmentally friendly urban and suburban modes of transport and more generally by strengthening alternatives to individual cars. Public transport is expected to be made more attractive, which would lead to more users shifting from private car to public transport. More robust railway infrastructure is also expected to facilitate modal shift of freight. To this end, this component shall consist of reforms and investments that promote sustainable transport through the modernisation of important railways lines, the purchase of zero emission buses and trams for public transport, improvements to the oversight on railway market and the introduction of legislation relating to tariffs for public transport. The component also includes the establishment of a Rolling Stock Company (ROSCO) to catalyse the renewal of Hungary's rolling stock and to create the basis for a more efficient management of railway services.

The component contributes to addressing the Country Specific Recommendations on focusing investment-related economic policy on transport infrastructure, taking into account regional disparities, and on focusing investment on the green transition, in particular sustainable transport (Country Specific Recommendation 3 in 2019 and 2020) and on the reduction of the dependency on fossil fuels in transport by stepping up efforts on energy efficiency, in particular through electrification (Country Specific Recommendation 6 in 2022).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the plan in accordance with the DNSH Technical Guidance (2021/C58/01).

E.1. Description of the reforms and investments for non-repayable financial support

C5.I1: Development of a suburban railway line

The objective of the measure is to channel traffic towards low CO₂ emission modes. The measure consists of works on a railway section.

C5.I2: Rail network congestion switching on TEN-T corridor

The objective of the measure is to channel traffic towards low CO₂ emission modes and to improve the use of long-distance freight and passenger transport. The measure consists of works on a railway section.

C5.I3: Development of zero-emission bus transport

The objective of the measure is to renew and decarbonise the public transport fleet in Hungary through the provision of zero-emission buses.

The measure consists in the delivery of 187 zero-emission/electric buses.

C5.I4: Development of tram and trolleybus system

The objective of the measure is to improve the transportation infrastructure.

The measure consists in the handover or production of trams and delivery of trolleybuses.

C5.I5: Works on railway section

The objective of the measure is to electrify railway sections.

The measure consists in (re)construction works related to the railway section “Szeged-Rendező - Rőszke – Border of the country” and the connection of railway lines 136 and 140.

C5.I6: Boosting companies’ uptake of electric vehicles (EVs)

The objective of this measure is to increase companies’ uptake of electric vehicles by providing financial support in the form of grants.

The measure consists in financial support to companies for the purchase of at least 10 000 electric vehicles.

C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)

The measure shall consist in a public investment in a Facility, in order to incentivise private investment and improve access to finance in Hungary’s electric mobility sector by developing the charging infrastructure for electric vehicles. The Facility shall operate by providing combined loan and grant support directly to the private sector, as well as to public sector entities engaged in similar activities.

The Facility shall be managed by the Hungarian Development Bank (*Magyar Fejlesztési Bank Zrt.* – MFB) as the Implementing Partner. The Facility shall include the following product line:

- Combined loan and grant support for the installation of charging stations. The share of grants and loans shall be decided based on the following criteria:
 - the regional state aid map, as included in Art. 36a of the General block exemption regulation (GBER);
 - the size of the company applying to the Facility. Namely, the smaller the company is, the higher shall be the share of grant support;
 - the heavy-duty vehicles (HDV) charging stations to be installed by final beneficiaries. In particular, the higher is the HDV stations’ ratio, the higher shall be the share of grant support.

In order to implement the investment into the Facility, Hungary and the MFB shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Facility: The initial investment decision of the Facility shall be taken by an investment committee or other equivalent governing body and approved by a majority of votes from members who are independent from the government. The final investment decision of the Facility shall be limited to the approval (without modifications) or the exercise of a veto right on an investment decision proposed by the investment committee or equivalent governing body.
2. Key requirements of the associated investment policy, which shall include:
 - a. The description of the financial product and eligible final beneficiaries.
 - b. The requirement that all investments supported are economically viable.
 - c. The requirement to comply with the ‘do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets

related to fossil fuels, including downstream use¹, (ii) activities and assets under the EU Emissions Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the applicable benchmarks², (iii) activities and assets related to waste landfills, incinerators³ and mechanical biological treatment plants⁴.

- d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.
3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.
 4. Monitoring, audit, and control requirements, including:
 1. The description of the Implementing Partner's monitoring system to report on the investment mobilized.
 2. The description of the Implementing Partner's procedures that will ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
 3. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
 4. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the MFB. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate target requirements; and iii) that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.
 5. Requirements for climate investments carried out by the Implementing Partner: At least EUR 19 418 569 of the RRF investment into the Facility shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.⁵

¹ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'do no significant harm' Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

² Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

³ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁴ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

⁵ Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution. The Implementing Partner shall also be required to provide to the Member State a semi-annual report on the implementation of each project/activity.

C5.R1: Tariff reform

The objective of this measure is to encourage the use of public transport.

The measure consists in the entry into force of legal act(s) relating to travel discounts on public passenger transport.

E.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Sequential Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
21	C5.I1 Development of a suburban railway line	Milestone	Works related to the Debrecen-Balmazújváros railway section	Handover and acceptance protocol(s)				Q2	2026	Technical handover and acceptance protocol(s) for (re)construction works on the railway infrastructure between Debrecen and Balmazújváros.
22	C5.I2 Rail network congestion switching on TEN-T corridor	Milestone	Works related to the Békéscsaba-Lőkősháza railway section	Handover and acceptance protocol(s)				Q2	2026	Technical handover and acceptance protocol(s) for (re)construction works on the railway infrastructure between Békéscsaba and Lőkősháza.
23	C5.I3 Development of zero-emission bus transport	Target	Delivery of zero emission/electric buses		Number	0	187	Q2	2026	Delivery of 187 zero-emission/electric buses.
24	C5.I4 Development of tram and trolleybus system	Milestone	Trams	Technical handover protocol(s)/production report(s)				Q2	2026	Technical handover protocol(s) for 41 trams and production report(s) for 4 trams.
25	C5.I4 Development of tram and trolleybus system	Milestone	Trolleybuses	Technical handover protocol(s)				Q2	2026	Technical handover protocol(s) for 48 trolleybuses.
26	C5.I5: Works on railway section	Milestone	Works related to the Szeged-Rendező - Rösztke – Border of the country railway section	Technical handover protocol(s)				Q2	2026	Technical handover protocol(s) for (re)construction works related to the railway section “Szeged-Rendező - Rösztke – Border of the country” and the connection of railway lines 136 and 140.

Sequential Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
27	C5.I6: Boosting the companies' uptake of electric vehicles (EVs)	Target	Financial support for the purchase of electric vehicles		Number	0	10 000	Q2	2026	Disbursement of funds to companies for the purchase of at least 10 000 electric vehicles.
28	C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)	Milestone	Implementing Agreement	Entry into force of the Implementing Agreement				Q2	2026	Entry into force of the Implementing Agreement.
29	C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)	Target	Legal agreements signed with final beneficiaries		%	0	100	Q2	2026	The MFB shall have entered into legal financing agreements with final beneficiaries for an amount necessary to use 100% of the RRF investment into the Facility (taking into account management fees). 100% of this financing shall contribute to climate objectives using the methodology in Annex VI to the RRF Regulation.
30	C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)	Milestone	Ministry has completed the investment	Certificate of transfer				Q2	2026	Hungary shall transfer at least EUR 19 418 569 to the MFB for the Facility.
31	C5.R1 Tariff reform	Milestone	Entry into force of legal act(s) related to tariffs	Provision in the legal act(s) indicating entry into force				Q2	2026	Entry into force of legal act(s) relating to travel discounts on public passenger transport.

E.3. Description of the reforms and investments for the loan

C5.I8: Equity injection into a newly created Rolling Stock Company “ROSCO”

This measure aims at supporting the growth potential of the Hungarian economy by structurally adjusting the level of public support available to address market failures and inefficiencies within the economy. The measure shall consist of an equity injection of EUR 1 800 000 000 into the Rolling Stock Company (ROSCO).

The satisfactory fulfilment of milestones under this measure is subject to the satisfactory fulfilment of the milestones of reform C5.R2.

C5.R2: Reform of railway services in Hungary

The objective of this measure is to contribute to an improvement of the railway market in Hungary.

It consists in the entry into force of legal act(s) on the establishment of the National Public Transport Authority (NPTA) and of the Rolling Stock Company (ROSCO).

E.4. Milestones, targets, indicators, and timetable for monitoring and implementation for loan support

Sequential Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
32	C5.I8: Equity injection into a newly created Rolling Stock Company "ROSCO"	Milestone	Equity injection into the ROSCO	Certificate of transfer				Q2	2026	Hungary shall transfer EUR 1 800 000 000 to the ROSCO to increase its equity.
33	C5.R2 Reform of railway services in Hungary	Milestone	Set-up of the National Public Transport Authority	Provision in the legal act(s) indicating the establishment and entry into operation of the National Public Transport Authority				Q2	2026	<p>Entry into force of legal act(s) that establishes the National Public Transport Authority (NPTA) as a permanent public body under the Ministry of Transport.</p> <p>The legislation shall explicitly define the NPTA's legal status, governance structure, mandate, and powers, and shall clearly delimit the respective roles of the NPTA and ROSCO. In particular, the legislation shall clarify that the NPTA manages the public service contracts with railway operators as well as the tendering process, while the ROSCO manages the procurement of rolling stock and their lease.</p> <p>The legislation shall moreover specify information-sharing obligations between the two bodies.</p> <p>The legislation shall moreover:</p> <p>On tendering: empower NPTA to impose public service obligations (PSO) and competitively tender Public Service Contract packages in compliance with Regulation (EC) 1370/2007. The legislation shall mandate NPTA</p>

Sequential Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
										to divide the network under PSO into contestable lots and to adopt a multi-year tendering programme for these lots, specifying which lots are subject to competitive tender with priority. On planning and passenger information: designate the NPTA as the competent authority for public transport planning, and passenger information, and shall specify the functions to be unified under its authority (including ticketing interoperability standards and real-time passenger information systems).
34	C5.R2 Reform of railway services in Hungary	Milestone	Set-up up of the ROSCO	Provision in the legal act indicating the establishment and entry into operation of the ROSCO				Q2	2026	1) Entry into force of legal act(s) that establishes a new permanent wholly state-owned entity (Rolling Stock Company – ROSCO) in the form of a joint stock company. The legislation shall: i. set forth the mission, mandate, and powers of such company so to increase competition in the tenders and the contestability of the service contracts. In particular, the legislation shall ensure that rolling stock is available to incoming PSO operators under fair equal and non-discriminatory conditions with

F. COMPONENT 6: Energy – green transition

This component of the Hungarian recovery and resilience plan addresses several challenges of the energy sector. The objective of the component is to contribute to the attainment of Hungary's 2030 climate and energy targets, also considering the need to raise Member States' ambition in the context of the EU-wide 2030 objective of reducing greenhouse gas emissions by at least 55 % relative to 1990 levels. The National Energy Strategy 2030 and the National Energy and Climate Plan aim at strengthening energy sovereignty and energy security by reducing import dependency, ensuring affordable energy supply for the population and decarbonising energy production, including the increase of the share of energy generation based on renewable sources.

In this context, the component aims at creating additional capacities based on renewable energy sources and ultimately reducing greenhouse gas emissions. The amendments to the legal framework shall establish the supportive regulatory environment to achieve this objective. With a view to integrating the energy production capacities from renewable energy sources into the electricity network in a secure and flexible way, the component shall support the investment related to the network development and investments into electricity storage facilities. The investment into smart meters is expected to contribute to the optimisation of electricity demand in the long term. The component shall also result in creation of additional renewable energy production capacity by supporting onshore wind power generation and the installation of residential solar panel systems. Furthermore, in order to address air pollution and energy efficiency-related challenges, it shall also provide support to households for the installation of electric heating systems and for windows replacement, in addition to the solar panel systems and storage units.

The measures under this component are expected to contribute to the green transition and to the achievement of the climate neutrality objective by 2050.

The smart network development based on innovative technical solutions is an important step towards digitalisation. The exploitation of data through digital solutions ensures better forecast of supply-demand balances and better regulation of energy production.

The component contributes to the strategic autonomy and security of Hungary as part of European objectives. The upscaling of renewable energy production capacities shall lead to increased energy sovereignty through increasing the share of domestic energy sources. The grid development shall also contribute to improving the security of the electricity network.

The investments are also expected to contribute to job creation at local level, including for the SME sector.

The component contributes to addressing the Country Specific Recommendations regarding the need to focus on the green and digital transitions, in particular clean and efficient production and use of energy (Country Specific Recommendation 3 in 2020) and to put low carbon energy and energy and resource efficiency in the centre of investment-oriented economic policy (Country Specific Recommendation 3 in 2019). It also contributes to addressing the Country Specific Recommendation 6 in 2022 regarding the need to reduce overall reliance on fossil fuels by accelerating the deployment of renewables, by streamlining the permitting procedures and the upgrading of the electricity infrastructure, as well as to addressing the Country Specific Recommendation 4 in 2025 regarding the need to improve flexibility and competition in the electricity sector, by strengthening the balancing market and boosting cross-border electricity trading.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

F.1. Description of the reforms and investments for non-repayable financial support

C6.R1: Transformation of electricity regulations

The objective of this measure is to improve the legal framework of the Hungarian electricity market by amending the applicable laws.

The measure consists of the introduction of separate accounting for the electricity fed into the grid and electricity consumed from the grid.

C6.R2: Encouraging the deployment of onshore wind energy

The objective of the measure is to encourage the deployment of additional onshore wind power generation capacity in Hungary.

The measure consists in simplifying the rules for the installation of onshore wind power generation capacity.

C6.R3: Accelerate the connection of renewable energy projects to the grid

The objective of this measure is to accelerate the connection of renewable energy projects to the grid.

The measure consists of a simplification of grid connection procedures for renewable energy installations.

C6.R4: Setting minimum energy efficiency standards

The objective of the measure is to improve energy efficiency of buildings in Hungary.

The measure consists in introducing minimum energy efficiency standards for building renovation support schemes (co-) financed from EU funds.

C6.I1: Classic and smart grid development for transmission system operator and distribution system operators

The objective of the measure is to accommodate the expected increase in demand for integrating additional capacity into the grid.

The measure consists of construction and upgrade of transmission and distribution grids.

C6.I2: Support for the use of residential solar panels and heating modernisation

The objective of the measure is the upscaling of residential renewable energy production capacities, the increase of energy efficiency as well as the reduction of air pollution stemming from outdated heating solutions.

The measure consists in: (i) the installation of residential solar panel systems; and (ii) the installation of residential solar panel systems combined with one or multiple of the following measures: replacement of windows and/or doors, installation of storage capacity and installation of electric heating.

C6.I3: Installation of grid energy storage facilities for market participants

The objective of this measure is to provide for the market players in the balancing markets access to zero-emission flexibility services.

This measure consists in the installation of energy storage facilities.

C6.I4: Dissemination of smart metering

The objective of the measure is to support the purchase and installation of smart meters.

This measure consists of subsidising distribution system operators for the installation of smart meters.

C6.I5: Energy efficiency investments in public buildings

The objective of the measure is to improve the energy performance of public buildings.

This investment consists of energy efficiency renovations in public buildings.

C6.I6. Grant scheme for the development of the electricity grid

This measure shall consist of a public investment in a Grant Scheme, in order to incentivise private investment and improve access to finance in Hungary's energy sector. The Scheme shall operate by providing grants directly to the private sector as well as to public sector entities engaged in similar activities.

The Scheme shall be managed by the Hungarian Development Bank (*Magyar Fejlesztési Bank Zrt. – MFB*) as the implementing partner. The Scheme shall include the following product line:

- Grants for distribution and transmission grid development investments including - but not limited to - cables, smart meters, transformers and other grid infrastructure.

In order to implement the investment into the Scheme, Hungary and the Hungarian Development Bank shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Scheme: The final award decision of the Scheme shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.
2. Key requirements of the associated grant policy, which shall include:
 - a. The description of the grants provided and eligible final beneficiaries⁶.
 - b. The requirement that all investments supported are economically viable.
 - c. The requirement to comply with the 'Do no significant harm' (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the grant policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use⁷, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks⁸, (iii) activities and assets related to waste landfills, incinerators⁹ and mechanical biological treatment plants¹⁰.

⁶ Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution. For the purpose of the computation of the climate contribution, final beneficiaries from equity, quasi-equity, corporate bonds or equivalent instruments not targeted to specific projects shall provide a justification for the selected intervention field(s). The implementing partner shall also be required to provide to the Member State a semi-annual report on the implementation of each project/activity.

⁷ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

⁸ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

⁹ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁰ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

- d. The requirement that final beneficiaries of the Scheme shall not receive support from other Union instruments to cover the same cost.
3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to use any unused proceeds of the scheme, including beyond 2026, for the same policy purposes.
4. Monitoring, audit, and control requirements, including:
 1. The description of the implementing partner's monitoring system to report on the grants mobilized.
 2. The description of the implementing partner's procedures that will ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
 3. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before awarding a grant to an operation.
 4. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the Hungarian Development Bank. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate and digital target requirements; and iii) that the requirement that final beneficiaries of the Scheme have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement and Grant Agreements are being respected.
5. Requirements for climate and digital investments carried out by the implementing partner: at least EUR 856 756 163.36 of the RRF investment into the Scheme shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation and at least EUR 342 702 465.34 shall contribute to the digital transition in accordance with Annex VII to the RRF Regulation.

F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Number	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

44	C6.14 Dissemination of smart metering	Target	Installation of smart meters		Number	0	290 680	Q2	2026	At least 290 680 smart meters installed by the distribution system operators.
45	C6.15. Energy efficiency investments in public buildings	Target	Number of public buildings benefitted from energy efficiency renovation		Number	0	180	Q2	2026	Energy efficiency renovations in at least 180 public buildings.
46	C6.16. Grant scheme for the development of the electricity grid	Milestone	Implementing Agreement	Entry into force of the Implementing Agreement				Q2	2026	Entry into force of the Implementing Agreement.
47	C6.16. Grant scheme for the development of the electricity grid	Target	Legal agreements signed with final beneficiaries		Percentage (%)	0	100	Q2	2026	The MFB shall have entered into legal grant agreements with the beneficiaries for an amount necessary to use 100% of the RRF investment into the Scheme (taking into account management fees).
48	C6.16. Grant scheme for the development of the electricity grid	Milestone	Ministry has completed the investment	Certificate of transfer				Q2	2026	Hungary shall transfer EUR 856 756 163.36 to the MFB for the Facility (taking into account management fees).

G. COMPONENT 7: HEALTH

This component of the Hungarian recovery and resilience plan addresses several challenges that the Hungarian health system currently faces, such as unequal access to services and the high incidence of informal (gratuity) payments; an excessive reliance on hospitals in the provision of services and regional shortages of workforce within the health system.

The main objective of the component is to develop a modern and efficient care system capable of responding to the challenges of the twenty-first century and accessible to all, in line with principle 16 of the European Pillar of Social Rights. To this end, the component aims to (i) eradicate gratuity payments in the health system; (ii) reinforce the role of general practitioners; (iii) streamline in-patient care and upgrade its infrastructure and (iv) increase the use of information and communication technologies (ICT) to improve the quality and efficiency of healthcare services.

The component supports addressing the Country Specific Recommendations on supporting preventive health measures and strengthening primary healthcare (Country Specific Recommendations 2 of 2019 and 3 in 2022), on addressing shortages of health workers and ensuring an adequate supply of critical medical products and infrastructure (Country Specific Recommendation 1 in 2020), and on ensuring access to essential services for all (Country Specific Recommendation 2 in 2020). It should also contribute to the implementation of the European Pillar of Social Rights.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

G.1. Description of the reforms and investments for non-repayable financial support

C7.R1: Eradication of gratuity payments in the healthcare sector

The objective of the measure is to eradicate the practice of informal gratuity payments in healthcare services while creating better financial and working conditions for doctors.

The measure consists of the entry into force of legal act(s) for: (i) introducing a new employment contract for doctors in the interest of increasing their salaries and (ii) the criminalisation of gratuity payments.

C7.I1: Modernisation of healthcare system in the 21st century

The objective of the measure is to enhance the quality of care by improving healthcare infrastructure and upgrading healthcare equipment in healthcare units.

The measure consists in providing financial support for refurbishment and renovation works, as well as for the purchase of healthcare equipment.

C7.I2: Supporting the digital transformation of health

The objective of this measure is to support the digital transformation of healthcare services by expanding digital process and improving efficiency.

This measure consists in digitisation of new or upgraded functions and procedures of the e-health care system.

C7.I3: Development of primary health care

The objective of the measure is to improve primary health care services through general practitioners, local services, and to alleviate the pressure on specialized care.

The measure consists of establishing praxis communities of general practitioners, increasing the number of doctors in these communities, and enrolling patients in the Chronic Disease Management Programme and Prevention Programme.

C7.I4: Local health and social infrastructure

The objective of the measure is to enhance the quality, accessibility, and efficiency of health and social services.

The measure consists in the refurbishment of healthcare and social care facilities, as well as the delivery of related equipment.

G.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Number	Related Measure (Reform or Investment)	Milestone /Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
49	C7.R1 Eradication of gratuity payments in the healthcare sector	Milestone	Entry into force of the legal act(s) on the eradication of the practice of gratuity payment	Provision in the legal act(s) indicating its entry into force				Q2	2026	Entry into force of a legal act regulating the employment contract of state-owned healthcare service providers, the elimination and criminalization of gratuity payments and the salary for doctors under the new employment contract.
50	C7.I1 Modernisation of healthcare system for the 21st century	Milestone	Refurbishment of health facilities and upgrading of healthcare equipment	Disbursement of funds				Q2	2026	Disbursement of EUR 240 million of funds for investments in healthcare infrastructure and healthcare equipment refurbishment.
51	C7.I2 Supporting the digital transformation of health	Milestone	Expansion of online health functions and procedures	Mobile application registry list				Q2	2026	New or upgraded functions and procedures are digitised or online and accessible via the e-health care system. At least 100 000 users are registered for the EESZT mobile application.
52	C7.I3 Development of primary health care	Milestone	Programmes for primary health care	Participation of GPs and patients in dedicated programmes				Q2	2026	Participation of 4 000 general practitioners in praxis communities. 43 000 patients with chronic non-communicable diseases, for example hypertension, cardiovascular diseases, type II diabetes, and chronic obstructive pulmonary disease (COPD) are enrolled in the Chronic Disease Management Programme. 25 000 patients enrolled in prevention program.

H. COMPONENT 8: GOVERNANCE AND PUBLIC ADMINISTRATION

Hungary has a number of long-standing horizontal challenges related to the robustness and functioning of the public institutions in general, which has implications also on economic and social processes in the country. Specific issues in this regard relate to the anti-corruption framework, competition in public procurement, judicial independence, as well as the predictability, quality and transparency of decision-making. Hungary ranks low in corruption perception indicators and the level of competition in public procurements is moderate. Accountability for decisions to close investigations remains a matter of concern as there are no effective remedies against decisions of the prosecution service not to prosecute alleged criminal activities. Recurrent challenges in the application of the rules on transparency and access to public information further weaken the anti-corruption framework as well. As regards judicial independence, concerns relate in particular to the challenges faced by the independent National Judicial Council in counter-balancing the powers of the President of the National Office for the Judiciary, the rules on electing the President of the Supreme Court, the possibility of discretionary decisions as regards judicial appointments and promotions, case allocation as well as bonuses to judges and court executives, as well as the possibility for public authorities to challenge before the Constitutional Court final judicial decisions. The quality, predictability and transparency of decision-making and the absence of effective consultation of social partners and stakeholders in the decision-making processes, represent recurrent challenges. The complexity of the tax system and the risks of aggressive tax planning have also been identified as issues to tackle; and so is the need to improve the sustainability of public finances and the budgetary framework.

This component of the Hungarian recovery and resilience plan aims to address these challenges. It includes measures that are expected to contribute to reinforcing the anti-corruption framework, including by establishing an Integrity Authority and an Anti-Corruption Task Force, implementing anti-corruption measures and strengthening the capacities of the Hungarian audit and control bodies, in particular with regard to spending from the EU budget. It also includes measures to strengthen prosecutorial efforts. Measures are also included to increase competition in the field of public procurement and ensure the transparency of and public oversight over public procurements.

Measures included in the component also address issues concerning the independence of the judiciary, to raise the standard of judicial protection and to improve the investment climate in Hungary, by strengthening the guarantees of independence and impartiality of courts, namely by establishing stronger powers for the National Judicial Council to counterbalance the powers of the President of the National Office for the Judiciary, strengthening the judicial independence of the Supreme Court, removing obstacles to references for preliminary rulings to the Court of Justice of the European Union, and removing the possibility for public authorities to challenge before the Constitutional Court final judicial decisions.

The measures in this component are also expected to improve the quality and transparency of decision-making, including by a more systematic involvement of social partners and stakeholders, and to facilitate access to public information, as well as ensuring effective oversight on how public interest asset management foundations make use of EU support. The component also features measures to tackle the risk of aggressive tax planning and simplify the tax system. Lastly, the component includes measures that aim to improve the quality and sustainability of public finances.

In several instances, this component also contributes to the digital transition of public institutions by supporting the digitalisation of public administration and services.

The component contributes to addressing the Country Specific Recommendations on the need to “Reinforce the anti-corruption framework, including by improving prosecutorial efforts and access to public information” (Country Specific Recommendation 4 of 2019, Country Specific Recommendation 4 of 2022), “Improve competition in public procurement” (Country Specific Recommendation 4 of 2020, Country Specific Recommendation 4 of 2022), “Strengthen judicial independence” (Country Specific Recommendation 4 of 2019, Country Specific Recommendation 4 of 2022), “Improve the quality and transparency of the decision-making process through effective social dialogue, engagement with other stakeholders and regular impact assessments” (Country Specific Recommendation 4 of 2019, Country Specific Recommendation 4 of 2022), “Continue simplifying the tax system” (Country Specific Recommendation 4 of 2019, Country Specific Recommendation 4 of 2022), “Strengthen the tax system against the risk of aggressive tax planning” (Country Specific Recommendation 4 of 2019, Country Specific Recommendation 5 of 2020), “Achieve prudent medium-term fiscal positions” (Country Specific Recommendation 1 of 2022), “Strengthen the medium-term budgetary framework, align the preparation of annual budgets with the budgetary year and limit discretion in the implementation of annual budgets” (Country Specific Recommendation 1 of 2024, Country Specific Recommendation 1 of 2025) and “Phase out remaining price and interest rate caps to reduce distortive effects and facilitate the smooth transmission of monetary policy” (Country Specific Recommendation 1 of 2024, Country Specific Recommendation 1 of 2025).

A number of these measures have been put forward by Hungary and discussed with the European Commission in the context of the procedure under the Conditionality Regulation¹¹. The content of the related milestones and targets is aligned with the commitments taken in that context and some of these milestones shall be implemented before the submission of a payment request under the Recovery and Resilience Facility.

In accordance with Article 20(5)(e) of Regulation (EU) 2021/241, in order to comply with Article 22 of that Regulation, the implementation of the milestones in this component that are related to the Hungarian control system aiming at the protection of the financial interests of the Union shall be a precondition for any payment under Article 24 of the RRF Regulation¹².

In accordance with Article 24(3) of Regulation (EU) 2021/241, any reform by Hungary shall be undertaken without weakening this result and negatively impacting the below elements.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

H.1. Description of the reforms and investments for non-repayable financial support

C8.R1: Entry into force of legal acts on an Integrity Authority

The objective of this reform is to reinforce the prevention, detection and correction of fraud, conflict of interest and corruption as well as other illegalities and irregularities concerning the implementation of Union support in Hungary, with a particular focus on public procurement, through the legal establishment of an Integrity Authority.

¹¹ Procedure under Article 6 of Regulation (EU, Euratom) 2020/2092 on a general regime of conditionality for the protection of the Union budget.

¹² This is the case for milestones 54, 55, 57, 58, 59, 62, 63, 66, 68, 69, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84.

The reform consists in the entry into force of legislation providing for an independent Integrity Authority, with competence to intervene in all cases where in its views competent national authorities have not taken the necessary steps to prevent, detect and correct fraud, conflict of interests, corruption and other illegalities or irregularities that have affected or seriously risk affecting the sound financial management of the Union budget or the protection of the financial interests of the European Union.

The legislation shall also provide the competences of the Integrity Authority, such as directly verifying asset declarations of certain categories of senior political executives (as well as those of their relatives living in the same household) and other high-risk officials.

C8.R2: Participation in the enhanced cooperation on the establishment of the European Public Prosecutor's Office

The objective of this reform is to strengthen the effective protection of the Union's financial interests and the fight against criminal offences affecting the Union's financial interest in Hungary with its participation in the enhanced cooperation on the establishment of the European Public Prosecutor's Office (EPPO). The EPPO is an indivisible Union body operating as one single Office in the interest of the Union as a whole with the competence to investigate, prosecute and bring to judgment perpetrators of criminal offences committed against the financial interests of the Union.

The reform consists in the submission of the notification by Hungary to the European Commission of its intention to participate in the enhanced cooperation on the establishment of the EPPO.

C8.R3: Entry into force of legal acts on an Anti-Corruption Task Force

The objective of this reform is to monitor and review the measures taken in Hungary to prevent, detect, prosecute and sanction corruption by an Anti-Corruption Task Force.

This reform consists in the entry into force of legislation on the legal establishment of an Anti-Corruption Task Force, including the specification of its main tasks. The legislation shall provide that, *inter alia*, (i) non-governmental actors active in the field of anti-corruption shall make up at least 50% of the members of the Anti-Corruption Task Force (the chair excluded); (ii) the Anti-Corruption Task Force shall meet at least twice a year, (iii) the Anti-Corruption Task Force prepares a publicly available annual report and (iv) the Anti-Corruption Task Force shall put forward proposals aiming to improve corruption prevention and detection and boost the flow of information between administrative and control authorities of the state and criminal investigation authorities.

C8.R4: Introduction of a specific procedure in the case of special crimes related to the exercise of public authority or the management of public property ('judicial review')

The objective of this reform is to establish a specific procedure that ensures judicial review of decisions of investigating authorities or the prosecution service to dismiss a crime report or to terminate proceedings in the case of special crimes related to the exercise of public authority or the management of public property, in order to ensure that determined action is taken to prosecute corruption and similar criminal offences. The reform consists in the entry into force of legislative amendment(s) on judicial review and the right to file an indictment concerning certain corruption and corruption-related practices.

C8.R5: Amendment of rules related to asset declarations

The aim of this reform is to amend the anti-corruption framework by introducing more stringent rules related to asset declarations, along with a sanctions regime for the breach of these rules and obligations.

The reform consists in the entry into force of legislative amendments that provide for the obligation that senior political executives and their relatives living in the same household, as well as members of the National Assembly and their relatives living in the same household shall submit asset declarations upon taking up duties, annually thereafter and at the time of leaving their duties, and the aforementioned asset declarations shall be submitted electronically.

C8.R6: Entry into force of legal acts on the transparency of the use of public resources by public interest asset management foundations

The objective of this reform is to ensure oversight on how public interest asset management foundations make use of Union support and to prevent the structural risk of conflict of interest situations in their functioning.

The reform consists in the entry into force of legislative amendments to set out the designation of public interest asset management foundations performing public duty and the legal persons established or maintained by them as contracting authorities within the meaning of public procurement rule, and in the adoption of rules to prevent and address risks of conflict of interest.

C8.R7: Enhancing the transparency of public spending

The objective of this reform is to increase the transparency of public spending by ensuring that bodies carrying out public duties proactively publish a wide range of information.

The reform consists in the entry into force of legislation providing for an obligation for bodies carrying out public duties to proactively publish a pre-defined set of information on the use of public funds into a central register.

C8.R8: Rules ensuring the transparency of beneficial owners of entities and clarifying the use of public subsidies

The objective of this reform is to increase clarity and legal certainty of rules applicable to ultimate beneficial owners of certain entities, including private investment funds/a fiduciary asset management entities and to ensure that bodies responsible for the audit and control of Union support in Hungary can retroactively access that data for carrying out their tasks thereby increasing the level of protection of the Union's financial interests.

The reform consists in the entry into force of

- i. legislative amendments providing for the revision of the definition of ultimate beneficial owner to include special provisions on private investment funds, ensure that bodies responsible for the management and control of Union support in Hungary have the possibility to gather information on and verify the ultimate beneficial owners of private equity funds from at least 1 February 2020, and
- ii. legislation providing for the clarification and the extension of the scope of excluded public officials and the scope of entities that cannot apply for or receive subsidies provided from public funds.

C8.R9: Reducing the share of single-bid public procurement procedures

The objective of the reform is to improve competition in public procurement and to increase the transparency and robustness of related processes by reducing the share of single-bid public procurement procedures financed from Union funds.

This reform consists in the obligation to keep the share of public procurement tender procedures with single bids for procurements at least partially financed from Union support below 15% as reported in a tool developed for monitoring and reporting single bids in line with the Single Market Scoreboard methodology.

C8.R10: Reinforcing integrity, transparency and competition in the public procurement market

The objective of the reform is to reinforce the transparency of public procurement procedures, introduce corruption-prevention and conflict of interest rules, reporting and publication obligations for contracting authorities and incentivise competition in the public procurement market.

The reform consists in entry into force of legal act(s) on public procurement.

C8.R11: Development of the Electronic Public Procurement System (EPS) to increase transparency

The objective of this reform is to increase the transparency of public procurements and facilitate the independent oversight and analysis of competition in public procurements.

This reform consists of making possible the structured search in and bulk export of contract award notice data in machine-readable format, through the Electronic Public Procurement System (EPS).

C8.R12: Performance measurement framework for public procurements

The objective of this reform is to facilitate the assessment of the efficiency and cost effectiveness of public procurements and the reasons for limited competition.

This reform consists in the publication of a performance measurement framework of public procurements on the EPS website to assess the efficiency and cost-effectiveness of public procurements and the possible reasons for- and effects of limited competition in public procurement procedures, and the sectors most affected by public procurement procedures resulting in single bids.

C8.R13: Action plan for increasing the level of competition in public procurement

The objective of this reform is to increase the level of competition in public procurement in Hungary.

This reform consists in the adoption, publication and annual review of an action plan aiming to increase the level of competition in public procurement. The action plan shall set out objectives to be achieved, define measures to achieve the objectives, set precise deadlines for the implementation of the measures, identify the body/ies responsible for implementing the measures and establish a monitoring mechanism to assess progress.

C8.R14: Reinforcing the role and powers of the National Judicial Council aimed at counterbalancing the powers of the President of the National Office for the Judiciary

The objective of the reform is to reinforce the independence and impartiality of courts and judges established by law by establishing stronger powers for the National Judicial Council (NJC) so that it can effectively exercise its constitutional role in supervising the central administration of courts, while maintaining the Council's independence based on its members being elected by judges.

This reform consists in legislative amendments establishing stronger powers for the NJC by adopting provisions on a motivated binding opinion by the NJC for a number of matters regarding both individual decisions and regulations.

C8.R15: Judicial independence of the Supreme Court (*Kúria*)

The objective of the reform is to strengthen the judicial independence of the Supreme Court (*Kúria*).

This reform consists in legislative amendments related to the rules on the election of the *Kúria* President, the rules on the case allocation scheme of the *Kúria*, and the rules on the functioning of the *Kúria*.

C8.R16: Removing obstacles to references for preliminary rulings to the Court of Justice of the European Union

The objective of the reform is to remove obstacles for courts to independently refer cases for preliminary rulings to the Court of Justice of the European Union (CJEU).

This reform consists in the entry into force of legislative amendment(s) related to preliminary references to the Court of Justice of the European Union.

C8.R17: Reform regarding the review of final judgments by the Constitutional Court

The objective of this reform is to strengthen the independence and impartiality of courts and judges.

This reform consists in legislative amendments on the removal of the possibility for public authorities to challenge before the Constitutional Court final judicial decisions.

C8.R18: Legislative amendments strengthening the management, monitoring and audit and control mechanisms to guarantee the sound use of Union support

The objective of this reform is to protect the financial interests of the Union in the use of Union support.

This reform consists in the entry into force of legal acts defining the roles and responsibilities of the bodies involved in the management, monitoring, control and audit of Union support provided by specific EU instruments and on the management, monitoring, control and audit of the funds under Regulation (EU) 2021/1060 including by setting out specific rules to prevent, detect and correct conflict of interest.

C8.R19: Anti-fraud and anti-corruption strategy for the implementation, audit and control of Union support

The objective of the reform is to ensure the prevention, detection and correction of fraud and corruption related to any Union support in Hungary by putting in place a comprehensive anti-corruption and anti-fraud strategy including a clear timeline for implementing it.

This reform consists of an anti-fraud and anti-corruption strategy complemented by an action plan setting out actions with clear deadlines for implementation, responsible bodies, indicators for measuring progress for each of the actions respectively and arrangements for the regular review of the actions.

C8.R20: The Arachne system for Union support

The objective of the reform is to reinforce the prevention, detection and correction of fraud, corruption, conflict of interest, double funding and other irregularities related to Union support in Hungary.

This reform consists in the adoption of rules that require authorities to upload data into the Arachne system every two months, that they systematically follow-up on risk-scoring signalled by the Arachne system and that they rely on the Arachne system in their risk-assessment.

C8.R21: Establishment of a Directorate of Internal Audit and Integrity to reinforce the control of conflicts of interest when implementing Union support

The objective of this reform is to prevent, detect and correct conflict of interest in the implementation of Union support.

This reform consists in the entry into force of legal act(s) providing for:

- i) the set up of a Directorate of Internal Audit and Integrity (DIAI), including provisions on the independence of DIAI;

- ii) the selection of its staff;
- iii) its competence to act in relation bodies involved in the implementation of Union support in Hungary;
- iv) the requirements related to its provision of access to conflict of interest declarations and to files of the Integrity Authority;
- v) its rules of procedure;
- vi) its financial and human resources;
- vii) obligations related to regular controls of conflict of interest declarations filed in relation to the implementation of Union support in Hungary;
- viii) obligations related to anonymous reporting;
- ix) its investigation obligations;
- x) its reporting obligations to the Integrity Authority.

C8.R22: Ensuring the capacity for the EUTAF to carry out its tasks

The objective of this reform is to prevent and detect fraud, corruption and other irregularities in the implementation of Union support.

This reform consists in the entry into force of legal act(s) providing for the arrangement of the financial and human resources for the audit authority (Directorate General for Audit of European Funds, EUTAF) to safeguard its independence and enable it to carry out its tasks independently. The legal act specifies that the annual budget of EUTAF is established on the basis of its initial proposal, the remuneration of the head of EUTAF and that the functional and professional independence of the EUTAF shall be maintained and that its staff shall continue not to seek or accept instructions regarding its audit work.

C8.R23: Cooperation with OLAF to reinforce the detection of fraud related to the use of Union support

The objective of this reform is to establish a legal framework for cooperation with OLAF in the implementation of Union support.

This reform consists in the entry into force of legal acts designating the National Tax and Customs Administration (Nemzeti Adó- és Vámhivatal, NAV) to assist OLAF when carrying out on-the-spot checks in Hungary and when an economic operator subject to those checks refuses to cooperate. The legal acts also provide for financial type of sanctions to be imposed in case an economic operator refuses to cooperate with OLAF for the purposes of on-the-spot checks and inspections.

C8.R24: Audit and control of the Recovery and Resilience Plan and the protection of the financial interests of the Union

The objective of this reform is to protect the financial interests of the Union with respect to the Recovery and Resilience Plan of Hungary.

This reform consists in the establishment of a repository system for the collection, storage and provision of access in relation to implementation data as required by Article 22(2)(d)(i) to (iii) of the RRF Regulation, and the adoption and entry into force of an audit strategy for the EUTAF” providing for the audit of the implementation of the Recovery and Resilience Plan of Hungary accomplished in accordance with internationally accepted audit standards.

C8.R25: Reinforcing transparency and access to public information

The objective of the reform is to reinforce transparency and improve access to public information.

This reform consists in the entry into force of legislative amendments (i) facilitating access to public information by ensuring that public data shall, as a principle, be provided free of charge and repeal certain grounds for refusal of access to public information requests; (ii) a regular review of bodies carrying out public duties' compliance with access to public information rules, carried out by the NAIH; and (iii) to introduce an exceptional procedure for court cases related to access to public information to facilitate access to public information and limiting the duration of judicial procedures.

C8.R26: Improving the quality of law-making and effective involvement of stakeholders and social partners in decision-making

The objective of this reform is to increase the quality and the involvement of social partners, stakeholders and non-governmental experts in law-making and to establish a framework for the systematic consultation of social partners and stakeholders on the implementation of the recovery and resilience plan.

This reform consists in the entry into force of legal act(s) (i) to set out public consultation requirements on draft legal acts and the requirement to systematically publish summary impact assessments and explanatory memoranda; and (ii) to provide for an obligation to draw up a strategy on the involvement of stakeholders and the setting up of a monitoring committee for the recovery and resilience plan.

C8.R27: Review of minimum substance requirements for corporate income tax purposes

The objective of this reform is to ensure that companies are not established in Hungary exclusively for tax planning purposes, and contribute to the fight against the use of letterbox and shell companies.

This reform consists of an independent international expert review on domestic anti-tax avoidance rules.

C8.R28: Strengthening of transfer pricing regulations

The objective of this reform is to tackle tax evasion and improve the transparency of the Hungarian tax system by transforming the data reporting obligations on related party transactions for transfer pricing purposes.

The reform consists of the entry into force of legal act(s) setting out requirements for a new transfer pricing data reporting.

C8.R29: Extending the scope of non-deductibility rules for outbound payments

The objective of this reform is to tackle the risk of double non-taxation of outbound payments flowing from Hungary to zero- or low-tax jurisdictions, thus limiting opportunities for aggressive tax planning.

This reform consists in the entry into force of legislative amendments on broadening the non-deductibility rules for outbound payments and the commissioning of an independent evaluation of the rules related to aggressive tax planning.

C8.R30: Digital transformation of tax compliance procedures

The objective of this reform is to streamline tax compliance procedures and reduce compliance costs by creating new, user-friendly digital services for taxpayers and financial intermediaries.

This reform consists in the creation of digital services related to receipts and VAT and the launch of a pilot related to digital payroll services.

C8.R31: Simplifying the tax system by reducing the number of taxes

The objective of this reform is to simplify the tax system by reducing the number of taxes and corporate tax expenditures.

The reform consists of amending the tax code to reduce the number of tax benefits and taxes, and conducting reviews of corporate and personal income taxation.

C8.R32: Reforming the tax on public utility pipelines

The objective of this reform is to simplify the tax system while fostering a tax environment which stimulates investments in large utility infrastructure projects.

This reform consists in either the repeal of the legal act(s) on the tax on utility pipelines or its amendment to introduce a tax rule allowing the owners of utilities to discharge or credit the itemised tax payable on their lines for the amount they invest in the maintenance or upgrade of those lines.

C8.R33: Boosting the efficiency of public expenditure by carrying out spending reviews

The objective of this reform is to evaluate and improve the efficiency of public expenditure, with a view to enhancing the medium-term sustainability of public finances and government debt and boosting economic growth.

This reform consists in the introduction of reviews of expenditure in selected priority areas of public expenditure, using international best practices, and the production of two spending reviews.

C8.R34: Improving the domestic fiscal framework

The objective of this reform is to improve fiscal governance by strengthening transparency, accountability, and efficiency in public financial management.

The reform consists of improvements to the domestic fiscal framework.

C8.R35: Reform of subsidised lending

The objective of this reform is to strengthen market-based financing mechanisms and ensure that public financial support is targeted at addressing genuine market failures.

The reform consists in reforming the Széchenyi Card Programme, reducing government counter-guarantees and reviewing government guarantees on private sector lending.

H.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

I. COMPONENT 9: REPOWEREU

The objective of the REPowerEU component of the Hungarian recovery and resilience plan is to increase energy security and to support energy transition by incentives to the uptake of energy storage, by increasing the flexibility of the electricity market, and by supporting geothermal research. The component is to reduce fossil fuel consumption by increasing energy efficiency by and improving the energy efficiency of buildings. The component is also to increase the efficiency and flexibility of the electricity market by supporting the flexibility and digitalisation of the electricity network and by promoting the establishment and connection of energy communities, as well as the connection of aggregators and energy storage facilities to the network.

The REPowerEU component contributes to addressing Country-Specific Recommendations, in particular CSR 2022 5, CSR 2022 6, CSR 2023 4 and CSR 2025 4 (Accelerate the diversification of fossil fuel supply to phase out dependence on Russian sources [...]. Improve flexibility and competition in the electricity sector, by strengthening the balancing market and boosting cross-border electricity trading.).

Several measures are to have a cross-border impact including investments in electricity network development and the financial instrument to increase the energy efficiency of residential buildings.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the ‘do no significant harm’ Technical Guidance (2021/C58/01).

I.1. Description of the reforms and investments for non-repayable financial support

C9.R1: Setting network tariffs

The objective of this measure is to establish a new framework for setting electricity network tariffs to ensure fairness and financial efficiency across the grid.

This measure consists in the entry into force of legal act(s) adopting the new methodology to calculate network tariffs.

C9.R2: Adapting the legal act(s) on smart meters

The objective of this measure is to enhance the use of smart meters.

This measure consists in the entry into force of legal act(s) that broadens the scope of users obliged to install smart meters.

C9.R3: Strengthening the role of aggregators

The objective of this measure is to strengthen the role of aggregators.

This measure consists in the adoption and publication in the Official Journal of legal act(s) that strengthens the role of aggregators.

C9.R4: Wider use of dynamic pricing in electricity purchase agreements

The objective of the reform is to encourage the usage of dynamic pricing contracts.

This reform consists in the entry into force of legal act(s) that allows residential consumers and micro-enterprises to enter into voluntary electricity purchase contracts with dynamic pricing.

C9.R5: Opening the regulatory reserve markets to encourage competition

The objective of the measure is to open the balancing markets to competition.

The measure consists in the entry into force of MEKH decision approving the Network Code that encourages competition in the balancing market.

C9.R6: Expanding energy communities

The objective of this measure is to expand the establishment of ‘energy communities’ among households and businesses.

The measure consists in the entry into force of legal act(s) on energy communities to expand their operations.

C9.R7: Legal incentives for the uptake of energy storage

The objective of the measure is the adoption of a comprehensive regulatory framework for energy storage.

The reform consists in the entry into force of legal act(s) on energy storage to incentivise their uptake.

C9.R8: Amendments to legal act(s) on geothermal energy

The objective of this measure is to amend the regulatory framework for the exploration and use of geothermal energy by removing legal and administrative barriers to geothermal exploration and exploitation activities.

The measure consists in the entry into force of amendments to legal act(s) to optimise geothermal energy exploration and exploitation.

C9.I1: Grant scheme for the development of the electricity grid (scale up)

This investment scales up investment C6.I6: “Grant scheme for the development of the electricity grid”. It shall consist of a transfer of EUR 643 243 836.64 to the MFB. This amount shall be additional to any amount provided under measure C6.I6.

The satisfactory fulfilment of all milestones under this measure is subject to the satisfactory fulfilment of the milestone 46 in component 6 (“Implementing Agreement”).

C9.I2: Setting up a financial instrument to improve the energy efficiency of residential buildings

The measure shall consist of a public investment in a Facility, in order to incentivise private investment and improve access to finance in Hungary’s energy sector for residential buildings. The Facility shall operate by providing combined loan and grant support through intermediaries to the private sector, specifically to households.

The Facility shall be managed by the Hungarian Development Bank (*Magyar Fejlesztési Bank Zrt.* – MFB) as the Implementing Partner. The Facility shall include the following product lines:

- Combined loan and grant support to improve the energy efficiency of residential buildings.

In order to implement the investment into the Facility, Hungary and the MFB shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Facility: The final award decision of the Facility shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.
2. Key requirements of the associated investment policy, which shall include:
 - a. The description of the financial product and eligible final beneficiaries.
 - b. The requirement that all investments supported are economically viable.

- c. The requirement to comply with the ‘do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use¹³, (ii) activities and assets under the EU Emissions Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the applicable benchmarks¹⁴, (iii) activities and assets related to waste landfills, incinerators¹⁵ and mechanical biological treatment plants¹⁶. Moreover, support for heating systems based on gas shall amount to no more than the maximum of 20% of the overall envelope for this measure.
 - d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.
3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and financial intermediaries, and the requirement to reinvest any reflows according to the investment policy of the Facility.
 4. Monitoring, audit, and control requirements, including:
 1. The description of the Implementing Partner’s monitoring system to report on the investment mobilised.
 2. The description of the Implementing Partner’s procedures that ensures the prevention, detection and correction of fraud, corruption, and conflicts of interests.
 3. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
 4. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the MFB. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate target requirements; and iii) that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement and Funding Agreements are being respected.

¹³ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

¹⁴ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the applicable benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

¹⁵ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

¹⁶ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

5. Requirements for climate investments carried out by the Implementing Partner: At least EUR 61 266 991 of the RRF investment into the Facility shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation¹⁷.
6. Requirements for selecting financial intermediaries: The MFB shall select financial intermediaries in an open, transparent, and non-discriminatory manner. Controls for the absence of conflict of interests on financial intermediaries shall take place and be conducted ex-ante for all financial actors involved.
7. Requirement to sign Funding Agreements: The MFB shall sign Funding Agreements with the financial intermediaries in line with key requirements that shall be provided as an annex of the Implementing Agreement. The key requirements of the Funding Agreement shall include all the requirements under which the Facility operates, including:
 1. The obligation of the financial intermediary to take its decisions in compliance *mutatis mutandis* with the decision making and investment policy requirements specified above, including related to respect of the DNSH principle.
 2. The description of the monitoring and audit and control framework that the financial intermediary shall put in place, which *mutatis mutandis* shall be subject to all the monitoring, audit and control requirements specified above.

¹⁷ Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution. The Implementing Partner shall also be required to provide to the Member State a semi-annual report on the implementation of each project/activity.

I.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
104	C9.R1: Setting network tariffs	Milestone	New methodology to calculate network tariffs	Provision in the adoption decree indicating the entry into force of the methodology				Q2	2026	Adoption by the regulatory authority (MEKH) and entry into force of a new methodology to calculate network tariffs that are cost reflective and non-discriminatory.
105	C9.R2: Adapting the legal act(s) on smart meters	Milestone	Entry into force of legal act(s)	Provision in the law indicating the entry into force of the legal act(s)				Q2	2026	Entry into force of legal act(s) that: a. Lower(s) the mandatory smart meter installation threshold from 5 000 kWh/year to 4 000 kWh/year for consumers connected to the low-voltage grid with a connection providing maximum 3x80A. The legal act(s) moreover establish(es) that the DSOs cover the installation costs for these consumers; b. Establish(es) that the DSOs cover the costs of installation of the first smart meter for all consumers connected to the low-voltage grid with a connection providing maximum 3x80A and who requests a smart meter.
106	C9.R3: Strengthening the role of aggregators	Milestone	Adoption of legal act(s)	Publication in the official journal				Q2	2026	Adoption and publication in the official journal of legal act(s) that: i) Allow active users to conclude contracts with aggregators to make their self-generated electricity available; ii) define the model that is used to determine the clearing rules and imbalance responsibility of aggregators' balancing services.

Seq. Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

116	C9.I2: Setting up a financial instrument to improve the energy efficiency of residential buildings	Milestone	The MFB has completed the investment	Certificate of transfer				Q2	2026	Hungary shall transfer EUR 61 266 991 to the MFB for the Facility.

J. COMPONENT 10: BUSINESS ENVIRONMENT

The objective of this component is to strengthen the capacity of the Hungarian Development Bank (Magyar Fejlesztési Bank, MFB) to address market failures and support Hungary's economic development, by coupling a governance reform with a significant equity injection. The governance reform aims to reinforce MFB's independence, operational framework, and accountability structures. The equity injection will enable MFB to scale up its financing activity across three strategic programme lines: SME competitiveness, affordable rental and student housing, and venture capital for early-stage and high-growth firms.

The component contributes to addressing Country-Specific Recommendations, in particular CSR 2022.5, (promote investment in research and innovation) CSR 2023.1 (Target support measures in the housing sector to low-income households), CSR 2024.1, (Target support measures in the housing sector to low-income households) CSR 2025.1, 3 and 6 (Phase out remaining price and interest-rate caps, and equivalent measures; Stimulate the development of capital markets by increasing tax and regulatory incentives; Strengthen the innovation framework for the public sector and businesses by improving the predictability of public R&D spending and better targeting existing measures towards SMEs; Target support measures in the housing sector to low-income households and increase housing supply, including for social housing).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'do no significant harm' Technical Guidance (2021/C58/01).

J.1. Description of the reforms and investments for non-repayable financial support

C10.R1: Governance reform of Magyar Fejlesztési Bank

The objective of this measure is to reform the Hungarian Development Bank Private Limited Company (*Magyar Fejlesztési Bank Zrt.* (MFB)), in order to strengthen its independence, governance and operational framework.

The reform consists in the adoption of legislation amending the governance and operational framework of MFB, and the appointment modalities of the Board of Directors, as well as Supervisory Board and Audit Committee.

C10.I1: Equity injection into Magyar Fejlesztési Bank (MFB)

The objective of this measure is to support the growth potential of the Hungarian economy by structurally adjusting the level of public support available to address market failures and inefficiencies within the economy. The measure shall consist of an equity injection of EUR 1 126 815 025 into the Hungarian Development Bank Private Limited Company (*Magyar Fejlesztési Bank Zrt.* (MFB)).

MFB shall adopt a new investment policy for the use of the additional equity. The investment policy shall set out the allocation of the equity across three programme lines, namely (i) SME competitiveness, (ii) affordable rental housing and student dormitory development for low-income households and students (iii) venture capital and growth capital. It shall also include the description of the financial product(s) including the expected type of eligible final beneficiaries that the additional equity is expected to initially support, the expected implementation timeline and amounts allocated to each financial programme as well as the expected leverage multiplier per investment programme

MFB shall use for the additional equity the same audit and control system that was positively assessed by the Commission in accordance with Article 157 of Regulation (EU, Euratom) 2024/2509.

The Investment Policy shall require that financial product(s) that the additional equity supports comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use¹⁸, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks¹⁹, (iii) activities and assets related to waste landfills, incinerators²⁰ and mechanical biological treatment plants²¹. Furthermore, in the case of general support to corporates, the investment policy shall exclude companies with a substantial focus²² in the following sectors: (i) fossil fuel-based energy production and related activities²³; (ii) energy-intensive and/or high CO2-emitting industries²⁴; (iii) production, rental, or sale of polluting vehicles²⁵; (iv) waste collection, waste treatment and disposal²⁶, (v) processing of nuclear fuel, production of nuclear energy.

Moreover, the investment policy shall require compliance with the relevant EU and national environmental legislation of the final beneficiaries.

The satisfactory fulfilment of milestones under this measure is subject to the satisfactory fulfilment of the milestones of Reform 1 – Governance reform of Magyar Fejlesztési Bank.

¹⁸ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

¹⁹ Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²⁰ This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²¹ This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

²² It is considered that a Final Beneficiary has a “substantial focus” on a sector or business activity if such sector or activity is identified as being an essential part of the business activity of the Final Beneficiary respectively in relation to the gross revenue, profit, or client base of the Final Beneficiary. The gross revenue generated from the restricted sector or activity shall, in any case, not exceed 50% of the gross revenue.

²³ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

²⁴ Including activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks. Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

²⁵ Polluting vehicles are defined as non-zero-emission vehicles.

²⁶ This exclusion does not apply to actions in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

J.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Beyond the equity injection into the MFB which constitutes the RRF investment, Hungary shall transmit a report outlining the actions taken by the MFB by 31 August 2026 to implement the investment policy, including the steps taken for the implementation of the financial products that the additional equity is expected to initially support, as well as the expected steps to be taken for further implementing those products.

J.3. Description of the reforms and investments for the loan

C10.I2: Top-up to the equity injection into Magyar Fejlesztési Bank (MFB)

The objective of this measure is to support the growth potential of the Hungarian economy by structurally adjusting the level of public support available to address market failures and inefficiencies within the economy.

The measure shall consist of an equity injection of EUR 688 338 565 into the Hungarian Development Bank Private Limited Company (Magyar Fejlesztési Bank Zrt. (MFB)). This amount shall be additional to any amount provided under measure C10.I1. This EUR 688 million of the equity injection shall be used to co-finance investments with the EIB within the Hungarian economy. The satisfactory fulfilment of milestones under this measure is subject to the satisfactory fulfilment of the milestones of Reform 1 – Governance reform of Magyar Fejlesztési Bank.

J.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

Seq. Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target

124	C10.I2 Equity injection into Magyar Fejlesztési Bank (MFB)	Milestone	Equity injection and signature of a Memorandum of Understanding between Hungary and the EIB	Certificate of transfer and signature of a Memorandum of Understanding between Hungary and the EIB				Q2	2026	Hungary shall transfer EUR 688 338 565 to the MFB to increase its equity. Signature of a Memorandum of Understanding between Hungary and the EIB regarding a co-investment agreement for the use of that equity. That Memorandum of Understanding shall include an understanding that MFB is to co-invest in EIB financed projects in Hungary on <i>pari passu</i> terms with the EIB (except pricing), the types of products, areas, beneficiaries, governance and timeline for implementation, including that a legal agreement shall be signed by 30 November 2026.

K. COMPONENT 11: DIGITAL INNOVATION

The objective of this component is to strengthen Hungary's digital infrastructure and capabilities across three complementary dimensions. Through contributions to established EU programmes, Hungary aims to secure access to frontier artificial intelligence computing capacity via an AI Gigafactory or equivalent quantum technology under the EuroHPC Joint Undertaking, and to enhance its secure connectivity infrastructure through participation in the IRIS² satellite programme. At the domestic level, the component supports the modernisation of e-government services, including upgraded digital identity and access management systems and the rollout of a digital wallet, to improve the accessibility and security of public services for citizens and businesses.

The component contributes to addressing Country-Specific Recommendations, in particular, CSR CSR 2025.3. (Strengthen the innovation framework for the public sector and businesses by improving the predictability of public R&D spending and better targeting existing measures towards SMEs).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'do no significant harm' Technical Guidance (2021/C58/01).

K.1. Description of the reforms and investments for non-repayable financial support

C11.I1: E-government services

The objective of the measure is to promote the uptake of e-government services in the area of electronic identification and trust services.

The measure consists in: (i) upgrading the e-government identification and access management system(s); (ii) making the digital identity for portable devices and digital wallet available to users; and (iii) creating new e-government functionalities or upgrading existing ones.

K.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

Seq. Number	Related Measure (Reform or Investment)	Milestone/ Target	Name	Qualitative indicators (for milestones)	Quantitative indicators (for targets)			Indicative timeline for completion		Description of each milestone and target
					Unit of measure	Baseline	Goal	Quarter	Year	
125	C11.I1 E-government services	Milestone	Digital data wallet solution	Upgrade or creation of systems				Q2	2026	E-government interventions shall: (i) upgrade the e-government identification and access management system(s); (ii) make the digital identity for portable devices and digital wallet available to users; and (iii) create new e-government functionalities or upgrade existing ones.

K.3. Description of the reforms and investments for the loan

C11.I2: AI Gigafactory and other EuroHPC compute infrastructure

The objective of this measure is to support Hungary's establishment of and access to Artificial Intelligence Gigafactories and their services.

The measure consists of a voluntary contribution of EUR 500 million to the EuroHPC Joint Undertaking, to provide financial support for an AI Gigafactory and/or advanced AI/HPC infrastructure and/or quantum technology initiatives and/or other EuroHPC compute infrastructure and/or any other EuroHPC research and innovation projects, to be established in the Union.

C11.I3: Voluntary contribution to IRIS²

The objective of the measure is to support Hungary's secure communication capabilities.

The measure consists of a voluntary contribution of EUR 500 million to the EU Secure Connectivity Programme (IRIS²). The contribution may support but is not limited to the purchase of additional satellites, ground infrastructure with gateway and Point of Presence located in Hungary, satellites communication capacity, and/or development of ancillary connectivity activities.

K.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

	contribution to IRIS ²		the European Commission and assignment of a Voluntary Contribution to the EU Secure Connectivity Programme (IRIS ²)							activities that would be funded under the voluntary contribution. Hungary shall transfer EUR 500 million to the EU Secure Connectivity Programme (IRIS ²).

2. Estimated total cost of the recovery and resilience plan

The estimated total cost of the recovery and resilience plan of Hungary is HUF 3 553 302 225 000, which equals EUR 10 000 000 000 on the basis of the EUR HUF ECB reference rate of 9 June 2026.

SECTION 2: FINANCIAL SUPPORT

1. Financial contribution

The instalments referred to in Article 2(2) shall be organised in the following manner:

1.1. First Instalment (non-repayable support):

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
1	C1.I1 Development of competitive public education using 21st century technology	Milestone	Delivery of digital notebooks and tools
2	C1.I2 Supporting the education of students with special education needs	Milestone	Provision of support services for the education of children with special education needs
3	C1.R1 Reduction of segregation risk in schools	Milestone	Entry into force of legal act(s) providing for the reduction of State support for primary and lower secondary schools with a low proportion of disadvantaged students
4	C1.R2 Improving the attractiveness of the teaching profession	Milestone	Entry into force of legal act(s) to increase wages of teachers in the public education system
5	C1.I3 Construction of childcare facilities	Target	Constructed childcare facilities
6	C1.I4 Modernisation of school infrastructure	Milestone	Construction and renovation of school facilities
7	C2.R1 Modernisation of higher education programmes	Milestone	Revision of higher education programmes
8	C2.I1 Institutional innovation in higher education	Milestone	Digital learning materials accessible in higher educations
9	C2.I2 Modernisation of infrastructure and digitalisation in higher education institutions	Milestone	Energy efficiency refurbishment of building infrastructure and construction of new buildings in higher education institutions

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
10	C2.I3 Vocational education and training infrastructure for the 21st century	Target	Vocational education and training centres equipped and with upgraded infrastructure
11	C2.I4 Development of the Central Examination Centre	Milestone	Refurbishment of the Central Examination Centre
12	C2.I5 Support for research and development	Target	Support research institutions
13	C3.I1 Production and use of renewable energy in disadvantaged municipalities	Target	Installation of renewable energy production capacity for the benefit of households from municipalities selected under the Catching up Settlements Programme
14	C3.I2 Promoting employment and skills development based on local specificities	Target	Participation in labour socialisation programmes
15	C3.I3 Community-oriented pedagogy	Target	Pedagogical development of public education or vocational training institutions
16	C4.R1 Awareness-raising - water	Milestone	Adoption of an action plan on sustainable water management
17	C4.R1 Awareness-raising - water	Target	Number of hectares of water retention interventions
18	C4.I1 Nature protection	Milestone	Delivery of the Kvassay pumping station – Phase 2
19	C4.R2 Domestic regulation of the transition to a circular economy	Milestone	Entry into force of the legal act(s) necessary to operationalise waste management practice and adoption a national waste management plan
20	C4.R3: Action plan for local awareness raising activities	Milestone	Adoption of a national communication action plan
21	C5.I1 Development of a suburban railway line	Milestone	Works related to the Debrecen-Balmazújváros railway section
22	C5.I2 Rail network congestion switching on TEN-T corridor	Milestone	Works related to the Békéscsaba-Lőkősháza railway section
23	C5.I3 Development of zero-emission bus transport	Target	Delivery of zero emission buses

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
24	C5.I4 Development of tram and trolleybus system	Milestone	Trams
25	C5.I4 Development of tram and trolleybus system	Milestone	Trolleybuses
26	C5.I5: Works on railway section	Milestone	Works related to the Szeged-Rendező - Rösztke – Border of the country railway section
27	C5.I6: Boosting the companies' uptake of electric vehicles (EVs)	Target	Financial support for the purchase of electric vehicles
28	C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)	Milestone	Implementing Agreement
29	C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)	Target	Legal agreements signed with final beneficiaries
30	C5.I7: Setting up a financial instrument to increase the rollout of charging stations for electric vehicles (EVs)	Milestone	Ministry has completed the investment
31	C5.R1 Tariff reform	Milestone	Entry into force of legal act(s) related to tariffs
35	C6.R1 Transformation of electricity regulation	Milestone	Entry into force of legal act(s) concerning gross metering
36	C6.R2 Encouraging the deployment of onshore wind energy	Milestone	Entry into force of legal act(s)
37	C6.R2 Encouraging the deployment of onshore wind energy	Milestone	Entry into force of legal act(s)
38	C6.R3 Accelerate the connection of renewable energy projects to the grid	Milestone	Entry into force of legal act(s)
39	C6.R3 Accelerate the connection of renewable energy projects to the grid	Target	Grid connection authorisation for renewable power plants capacity

Sequential Number	Related Measure (Reform or Investment)	Milestone / Target	Name
39bis	C6.R3 Accelerate the connection of renewable energy projects to the grid	Milestone	Entry into force of legal act(s)
40	C6.R4 Setting minimum energy efficiency standards	Milestone	Setting minimum energy efficiency requirements for building renovation support schemes
41	C6.I1 Classic and smart grid development of transmission system operator and distribution system operators	Target	Cumulative additional capacity added to the grid
42	C6.I2 Support for the use of residential solar panels and heating modernisation	Target	Number of households supported
43	C6.I3 Installation of grid energy storage facilities for energy market participants	Target	Capacity of installed energy storage facilities
44	C6.I4 Dissemination of smart metering	Target	Installation of smart meters
45	C6.I5. Energy efficiency investments in public buildings	Target	Number of public buildings benefitted from energy efficiency renovation
46	C6.I6. Grant scheme for the development of the electricity grid	Milestone	Implementing Agreement
47	C6.I6. Grant scheme for the development of the electricity grid	Target	Legal agreements signed with final beneficiaries
48	C6.I6. Grant scheme for the development of the electricity grid	Milestone	Ministry has completed the investment
49	C7.R1 Eradication of gratuity payments in the healthcare sector	Milestone	Entry into force of the legal act(s) on the eradication of the practice of gratuity payment
50	C7.I1 Modernisation of healthcare system for the 21st century	Milestone	Refurbishment of health facilities and upgrading of healthcare equipment
51	C7.I2 Supporting the digital transformation of health	Milestone	Expansion of online health functions and procedures

Instalment amount			EUR 3 488 338 565

SECTION 3: ADDITIONAL ARRANGEMENTS

1. Arrangements for monitoring and implementation of the recovery and resilience plan

The arrangements defined below, together with the relevant measures specified in Component 8 (Governance and Public Administration)²⁷, constitute the Hungarian control and audit system under the Recovery and Resilience Plan. Each of these elements is an integral part of the Hungarian control and audit system, whose implementation and continuous respect is necessary to ensure compliance with Article 22 of Regulation (EU) 2021/241. Together, the implementation and continuous respect of these elements ensure that the arrangements for the monitoring and implementation of the recovery and resilience plan include the measures necessary to ensure the protection of the financial interests of the Union.

The monitoring and implementation of the recovery and resilience plan of Hungary shall take place in accordance with the following arrangements:

Government Decree 373/2022 (IX. 30.) establishes the roles and responsibilities of bodies involved in the implementation, audit and control of the Hungarian Recovery and Resilience Plan. The entry into force of this Government Decree, described in reform C8.R18, is reflected in a specific milestone, which shall be fulfilled before the submission of a payment request under the Recovery and Resilience Plan. The Government Decree shall define the institutional framework for the implementation, monitoring, control and audit of the plan, including following the establishment of the National Development Centre (NFK) and subsequent changes in the allocation of governmental responsibilities.

The implementation, monitoring and reporting process of the Hungarian Recovery and Resilience Plan shall be ensured by the National Authority. The National Authority role shall be performed by the National Development Centre (NFK), an organisational unit with independent legal personality operating within the Ministry of Rural and Regional Development. This shall include the operation of the monitoring system (including with the support of a monitoring IT system), the monitoring of the progress of implementation of the different measures and ensuring the reliability and veracity of data in the monitoring IT system. The National Authority shall also be the responsible body to verify that the milestones and targets set in the Recovery and Resilience Plan have been fulfilled. The National Authority shall be responsible for drafting and submitting the payment requests under the Recovery and Resilience Plan as well as ensuring their veracity and the signature of the management declaration. It shall also act as the single liaison between the Hungarian authorities and the Commission.

The National Authority shall be responsible for establishing and operating an internal management and control system to effectively prevent and detect irregularities and take appropriate corrective actions while observing the principles of sound financial management and protecting the Union's financial interests, for putting in place effective anti-fraud and anti-corruption measures, taking into account the risks identified, and for supervising the implementation and control activities delegated to implementing bodies, sub-granting bodies and financial intermediaries.

The sectoral implementation of the specific measures of the plan is supervised by the responsible line ministries, whose services shall support the monitoring of the progress of the measures and maintain close cooperation with the National Authority.

²⁷ This is the case for 24 milestones that shall be fulfilled before the submission of the first payment request. A number of the measures contained in component 8 are aligned with the commitments made by Hungary in the procedure under Article 6 of Regulation (EU, Euratom) 2020/2092 on a general regime of conditionality for the protection of the Union budget.

The National Authority shall be supported in the implementation and monitoring process of the plan by implementing bodies which shall operate through written contracts under the supervision and responsibility of the National Authority. Where implementation tasks of the National Authority are delegated to implementing bodies, the work of the implementing bodies shall be closely controlled by the National Authority, which shall provide methodological support and guidance to implementing bodies. In particular, it shall be ensured that implementing bodies have sufficient resources and adequate professional experience to effectively carry out the tasks assigned to them.

Implementing bodies and sub-granting bodies shall carry out first-level management verifications, including desk-based and on-the-spot controls, on the basis of delegation agreements concluded with the National Authority. Since August 2024, on-the-spot verifications carried out within the framework of the National Authority may be performed by the Joint Services Directorate acting as an internal service provider. The implementing bodies shall remain responsible for the performance of delegated tasks and for the controls carried out on their behalf.

Implementing bodies shall have effective internal control arrangements in place. Implementing bodies shall carry out the control functions of the National Authority for the components and measures in their responsibility which they implement.

A dedicated unit within the National Authority shall be responsible for the management of complaints and irregularities related to the implementation of the Recovery and Resilience Plan. The unit shall be empowered to carry out desk-based and on-the-spot checks, request information from bodies involved in implementation and determine the appropriate follow-up and corrective measures in relation to detected irregularities. The unit shall perform its functions independently and shall not seek or receive instructions in relation to its decisions concerning complaints and irregularities.

To ensure the effective prevention and detection of serious irregularities, such as fraud, corruption, conflict of interest and double funding, the National Authority and the implementing bodies shall systematically use all functions of the Arachne risk-scoring tool when implementing and controlling the implementation of the Recovery and Resilience Plan. The relevant bodies shall assess, document and follow up on risks identified by Arachne in accordance with binding procedural requirements.

A Directorate for Internal Audit and Integrity (DIAI) operating within the organisational framework of the National Development Centre (NFK) shall be responsible for reinforcing the effective prevention and detection of conflict of interest. The DIAI shall be responsible for carrying out regular controls of the veracity of conflict of interest declarations by staff at all levels involved in the implementation and control of the plan. The DIAI shall remain organisationally separate from the National Authority and implementing bodies and shall exercise its functions independently. The work of the DIAI shall be supervised by the Integrity Authority.

The DIAI shall verify compliance with conflict of interest requirements applicable to all staff involved in the implementation of the Recovery and Resilience Plan, including personnel carrying out on-the-spot checks. Detailed procedures shall govern the prevention, detection and management of conflicts of interest, including regular verification of declarations and systematic follow-up of identified risks.

The Directorate General for the Audit of European Funds (EUTAF), in its role as audit authority, shall carry out the audit tasks related to the implementation of the plan. Hungary shall provide the necessary financial and human resources to the EUTAF to safeguard its independence and to enable it to carry out its tasks. The legal framework shall ensure the financial, operational and professional independence of EUTAF and provide the necessary budgetary and staffing arrangements to enable it to perform its responsibilities related to the Recovery and Resilience Facility and other tasks entrusted to it under Union-related control frameworks.

EUTAF shall draw up an audit strategy in line with internationally accepted audit standards. This strategy shall determine the method and frequency of audits. It shall be in place sufficiently early in time to carry out the audits that shall be included in the audit summary submitted together with the payment request.

The audit strategy shall be updated to cover the implementation period of the plan until at least the end of 2028 and shall include detailed arrangements for ex post verification activities and the audit treatment of additional control mechanisms and safeguards introduced under the plan.

EUTAF shall carry out system audits and substantive testing. System audits shall be implemented on the basis of a risk assessment, with appropriate frequency and shall examine the functioning of the system set up for the implementation of the recovery and resilience plan. Substantive testing shall focus on the progress towards the achievement of milestones and targets and encompass the testing of the fulfilment of sound financial management conditions. EUTAF shall provide an audit opinion for each payment request submitted to the Commission based on the results of its audit work both from its system audits and substantive testing.

In addition, dedicated audit and control milestones shall require strengthened audit and verification activities, including ex post controls covering a significant proportion of financing agreements, procurement contracts and related payments under the plan, with a particular focus on fraud, corruption, conflicts of interest and double funding risks.

In addition, a Monitoring Committee consisting of relevant stakeholders and social partners involved in the implementation of the recovery and resilience plan shall be established via a legislative act. The Monitoring Committee shall supervise the effective implementation of the recovery and resilience plan. The legislative act shall include a provision to make it a legal requirement to consult the Monitoring Committee during the implementation of the recovery and resilience plan.
