From: General Secretariat of the Council  
To: Delegations

---

No. prev. doc.: 10768/1/26 REV 1

---

Subject: Proposal for a Regulation of the European Parliament and of the Council  
establishing a budget expenditure tracking and performance framework  
and other horizontal rules for the Union programmes and activities  
*- Partial mandate for negotiations with the European Parliament*

---

Delegations will find in the Annex, for information, the text of the partial mandate for negotiations with the European Parliament on the above proposal as agreed by the Permanent Representatives Committee at its meeting on 26 June 2026.<sup>1</sup>

---

<sup>1</sup> The *[provisions in brackets]* are excluded from the partial mandate.

**Proposal for a**

**Regulation of the European Parliament and of the Council  
establishing a budget expenditure tracking and performance framework  
and other horizontal rules for the Union programmes and activities**

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 322(1), point (a), thereof,

Having regard the Treaty establishing the European Atomic Energy Community, and in particular Article 106a thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the Court of Auditors<sup>2</sup>,

Acting in accordance with the ordinary legislative procedure<sup>3</sup>,

Whereas:

---

<sup>2</sup> OJ C, C/2026/1819, 18.3.2026, ELI: <http://data.europa.eu/eli/C/2026/1819/oj>.

<sup>3</sup> [...]

- (1) This Regulation aims to lay down the elements for both an expenditure tracking and a performance framework applicable to the implementation of expenditure appropriate to each method of implementation and complementing the rules of Regulation (EU, Euratom) 2024/2509 of the European Parliament and of the Council<sup>4</sup> on the financial rules applicable to the general budget of the Union (the ‘budget’) as part of the financial rules within the meaning of Article 322(1), point (a), of the Treaty on the Functioning of the European Union (TFEU). In particular, rules should be established on monitoring of budget spending, on monitoring and reporting on the performance of Union programmes and activities, as well as rules on evaluation of the programmes and activities. [This Regulation also aims to set out common rules to ensure a uniform application of the ‘do no significant harm’ and gender equality principles; as well as other common rules applicable across the budget such as those for establishing a Single Gateway, and rules on information, communication and visibility. The Commission may put in place additional elements for monitoring and reporting, including relevant indicators, for the purpose of measuring the impact of Union policies and actions more widely.]
- (2) Expenditure tracking refers to the monitoring of how the funds of Union budget programmes are used across categories of activities, to ensure transparency and accountability. The monitoring relies primarily on budgetary commitments which is independent from the delivery model of the programmes and how the funds are disbursed to beneficiaries.
- (3) The performance framework of the budget refers to the rules aimed at monitoring the results achieved and is fundamental to ensuring that the budget is implemented in accordance with the principle of sound financial management, therefore respecting the principles of economy, efficiency and effectiveness as set out in Article 33(1) of Regulation (EU, Euratom) 2024/2509.

---

<sup>4</sup> Regulation (EU, Euratom) 2024/2509 of the European Parliament and of the Council of 23 September 2024 on the financial rules applicable to the general budget of the Union (OJ L, 2024/2509, 26.9.2024).

- (4) In its communication on a Competitiveness Compass for the EU<sup>5</sup>, the Commission sets targets aiming at achieving simplification, including reducing administrative burden by at least 25% for all companies and at least 35 % for small- and medium-sized enterprises. A uniform expenditure tracking and performance framework across Union programmes should be established to contribute to simplification efforts by reducing the administrative costs associated with its implementation, for the Commission, Member States, third countries, implementing partners and beneficiaries. In order to deliver on the simplification objective, in particular, reporting obligations for recipients should remain proportionate across all methods of budget implementation. The simplification should be reflected in all relevant documents, such as work programmes and agreements. Moreover, the reporting by the Commission on the performance of the budget should be streamlined and made easier.

---

<sup>5</sup> Communication on a Competitiveness Compass for the EU, COM(2025) 30 final.

- (5) The streamlined application of the ‘do no significant harm’ principle where feasible and appropriate, as referred to in Article 33(2), point (d) of Regulation (EU, Euratom) 2024/2509 should be based on a single, stable and simple guidance. The Commission should provide this technical guidance by 1 November 2026 after consultation with Member States. That guidance should be based on the overarching principles of clarity, simplification, subsidiarity and proportionality, having regard to the principles of economy, efficiency and effectiveness and to achieving the set objectives of the programme or instrument in line with the Union’s policy priorities. The guidance should contain a methodology for the assessment of the compliance with the do no significant harm principle, particularly identifying policy areas or intervention fields that are always deemed to be in line with the do no significant harm principle and that do not require any further assessment. Where necessary, it should set out specific criteria at the level of relevant policy areas or intervention fields as well as a list of indicative examples. The guidance should specify in which cases EU environmental legislation is sufficient and therefore no further DNSH assessment would be required. It should take into due consideration the high levels of protection to human health and the environment provided by existing EU legislation, the principles of preparedness and climate resilience by design, the need to avoid duplication with those requirements as well as the administrative and reporting burden on authorities and beneficiaries. Moreover, in its Communication on the EU’s eastern regions bordering Russia, Belarus and Ukraine<sup>6</sup>, the Commission indicates that, when preparing the guidance on the ‘do no significant harm’ principle for the next MFF, it will take into account territorial specificities and challenges of the eastern border regions ensuring the principle is applied proportionately.

---

<sup>6</sup> Communication on the EU’s eastern regions bordering Russia, Belarus and Ukraine, COM(2026) 82 final.

- (6) As the economic, financial and societal costs linked to climate change and environmental degradation are growing, it is crucial to invest in decarbonisation, climate resilience, circular economy, water resilience and the natural environment. It is in particular essential to enhance the Union's and Member States' capability to anticipate, prepare for, and respond to crises, disasters and impacts of climate change and extreme weather events, and to protect the investments under the EU budget. Deploying new innovative technologies and solutions boosting climate resilience will at the same time increase the competitive edge of the EU companies not only through their improved adaptive capacity and climate resilience but also due to new export opportunities.
- (7) In line with the European Pillar of Social Rights and in accordance with Article 9 TFEU and Article 33(2), point (e), of Regulation (EU, Euratom) 2024/2509, programmes and activities are to be implemented, where feasible and appropriate, by respecting working and employment conditions under applicable national law, Union law, International Labour Organization conventions and collective agreements. In this context, a system should be put in place to ensure a systematic and transparent monitoring of the contribution from the budget towards those social objectives within the Union, including by means of EU coefficients.

- (8) In line with Article 8 TFEU, the Union shall in all its activities aim to eliminate inequalities, and to promote equality, between men and women. Article 33(2), point (e), of Regulation (EU, Euratom) 2024/2509 therefore lays down the requirement for the implementation of programmes and activities to take into account the principle of gender equality in accordance with an appropriate gender mainstreaming methodology, where feasible and appropriate in accordance with the relevant sector specific rules. This Regulation should therefore establish a single set of rules to implement the principle of gender equality consistently. In particular, this Regulation should set out the gender mainstreaming methodology, building on the methodology developed by the Commission under the 2021-2027 MFF and used for the first time for the financial year 2021, to measure expenditure contributing to gender equality through a system of scores based on the objectives pursued by programmes and activities of the Union budget. Further guidance should be provided by the Commission by 1 November 2026 to ensure the consistent application of that principle. This Regulation should also specify which data collected in relation to performance indicators should be broken down, where feasible and appropriate, by gender.
- (9) [The establishment and implementation of the budget is to comply with the provisions of Regulation (EU, Euratom) 2020/2092<sup>7</sup>, pursuant to Article 6(2) of Regulation (EU, Euratom) 2024/2509. Moreover, in the implementation of the budget, Member States and the Commission are to ensure compliance with the Charter of Fundamental Rights of the European Union, in accordance with Article 51 of the Charter, and shall respect the Union values enshrined in Article 2 TEU relevant in the implementation of the budget, including the principles of Rule of Law, in accordance with Article 6(3) of Regulation (EU, Euratom) 2024/2509.] Moreover, the Union is party to the UN Convention on the Rights of Persons with Disabilities, which requires that the protection and promotion of the human rights of persons with disabilities is taken into account in all policies and programmes.

---

<sup>7</sup> Regulation (EU, Euratom) 2020/2092 of the European Parliament and of the Council of 16 December 2020 on a general regime of conditionality for the protection of the Union budget (OJ L 433I, 22.12.2020, p. 1).

- (10) The economic, financial and social costs linked to climate change, natural hazards, health emergencies, technological accidents, evolving security and hybrid threats, and other disruptions are growing. It is essential to enhance the Union's and Member States' capability to anticipate, prepare for, and respond to crises disasters, and impacts of climate change, to protect the investments under the EU budget, as well as to reinforce internal security. Therefore, preparedness and climate resilience by design should ensure that relevant programmes and activities support reforms and investments that strengthen disaster risk and crises management, invest in climate resilience, enhance the resilience of vital societal functions, and build a more resilient, secure, and prepared societies, in line with the objectives of the EU Preparedness Union Strategy<sup>8</sup>, the ProtectEU Strategy<sup>9</sup> and the EU obligation under Article 5 of Regulation (EU) 2021/1119<sup>10</sup> (the 'European Climate Law') to reduce vulnerability to climate change.
- (11) To ensure consistency, transparency, and accountability across Union programmes, allowing for a comprehensive and comparable assessment of the performance and effects of the programmes, a uniform system should be established to track budget expenditure, as well as to monitor, report and evaluate the implementation of the budget and to contribute to measuring its overall performance. Building on existing approaches, in particular the approach for measuring contributions towards overarching policy priorities by using EU coefficients, that system should be based on common elements, namely a list of standardised and predefined categories used to classify activities supported by the budget ('intervention fields'), EU coefficients assigned to such intervention fields to determine their contribution towards policy objectives, and performance indicators, consisting of both output and result indicators, to monitor the effects of Union action on the ground. The system should take into account the specificities of different programmes, such as its size, duration and location of implementation. It should not be understood as determining the eligibility of an intervention under the budget, which is based on the sector-specific rules. In the same vein, the system does not establish or prejudge what will or will not be financed from the budget. That system should be without prejudice to other monitoring and reporting rules that may be established to measure the impact of Union policies and actions more widely.

---

<sup>8</sup> Joint Communication on the European Preparedness Union Strategy, JOIN(2025) 130 final.

<sup>9</sup> Communication on ProtectEU: a European Internal Security Strategy, COM(2025) 148 final.

<sup>10</sup> Regulation (EU) 2021/1119 of the European Parliament and of the Council of 30 June 2021 establishing the framework for achieving climate neutrality (OJ L 243, 9.7.2021, p. 1).

- (12) The system of intervention fields should be established to ensure comprehensive coverage of all types of activities financed by the budget. To this end, a set of intervention fields encompassing broad categories of activities should be defined. Pursuant to the principle of sound financial management and to enable meaningful reporting on performance of the budget, activities financed by the budget should be assigned a single intervention field that best represents the substance of the activity financed.
- (13) Regulation (EU, Euratom) 2024/2509 refers to the need to track the Union budget spending contributing to gender equality, as well as spending on climate change mitigation and adaptation and on the protection of biodiversity. Expenditures contributing to climate mitigation, climate change adaptation, and biodiversity also need to be tracked to meet the reporting requirements of the United Nations Framework Convention on Climate Change and the Convention on Biological Diversity. A standardised system for classifying activities funded under the budget, which should facilitate the tracking of policies and the aggregation of the contribution from each activity or programme more efficiently, should be put in place, including, where relevant, by means of EU coefficients.
- (14) The Commission has established EU climate coefficients to quantify the Union budget expenditure contributing to climate objectives and reflecting the objectives of the European Green Deal. Under that system<sup>11</sup>, a coefficient of 100 % is assigned to activities expected to make a substantial contribution to climate change mitigation or adaptation objectives in line with Union climate goals, a coefficient of 40 % is assigned to activities expected to make a non-marginal, positive contribution to climate change mitigation or adaptation objectives, and a coefficient of 0 % is assigned to activities expected to have a neutral impact on climate objectives. For a number of activities, EU climate coefficients reflect the technical screening criteria of the EU Taxonomy of sustainable activities. In addition, the Commission has also developed environment and biodiversity coefficients. This regulation builds on the system of EU coefficients established for the 2021-2027 period.

---

<sup>11</sup> Commission Staff Working Document on Climate Mainstreaming Architecture in the 2021-2027 Multiannual Financial Framework, SWD(2022) 225 final.

- (15) The tracking approach provided under this Regulation will enable the Commission to continue reporting on its Official Development Assistance to the Development Assistance Committee of the Organisation for Economic Co-operation and Development.
- (16) Article 33(3) of Regulation (EU, Euratom) 2024/2509 requires the monitoring of performance indicators which are to be relevant, accepted, credible, easy and robust, while allowing for aggregation of data across programmes. It is therefore necessary to set out a list of performance indicators that should be concise and proportionate, be limited in number and not result in excessive administrative burden. Performance indicators, including output and result indicators, should be mainly used for the purpose of monitoring and reporting on the performance of the budget, and for informing the evaluation of programmes and should be without prejudice to additional information that may be obtained through other monitoring and reporting and evaluation rules to measure the impact of Union policies more widely. In close consultation with Member States, the Commission should provide detailed definitions of the performance indicators and their applicable methodology, including the calculation method of the indicators, before 1 November 2026.
- (17) The Commission has developed a methodology to calculate the greenhouse gas emissions avoided in the context of its annual reporting on the impact of Next Generation EU green bonds, with the aim of assessing support to the transition to a low-carbon economy. It is necessary to continue developing appropriate methodologies to calculate greenhouse gas emissions avoided as a result indicator, based on output indicators, in order to reduce the administrative burden of performance reporting, particularly for Member States. The Commission will report on greenhouse gas emissions avoided based on outputs reported by Member States under Article 14.
- (18) In respect to the implementation through plans by Member States, each Member State should have a monitoring and reporting system in place to allow for the monitoring of performance and the transmission of information. In this context, output indicators should also be used to define the final milestone or target for each intervention field assigned to measures included in the plans. In the case of reforms, such output indicators used as final milestones should be qualitative.

- (19) To ensure consistency, transparency, comparability and accountability across all programmes and activities under the budget, common rules should be provided in relation to their evaluation by the Commission, in line with Article 34(3) of Regulation (EU, Euratom) 2024/2509. In addition to a retrospective evaluation in accordance with that provision, the Commission should also publish a mid-term implementation report for each programme or activity mobilising quantitative and quality evidence in order to shed light on the progress made towards the achievement of their objectives. When carrying out evaluations, the Commission should, in particular, aim to quantify to the extent possible the contribution to Union policy objectives, GDP growth and employment rates in the Union, and take into account previous programming periods, with a view to assessing the long-term effects of certain activities on the economy and society. In addition, the Commission should carry out a retrospective evaluation to assess the impact of the Horizon Europe programme.
- (20) Member States should carry out evaluations to assess the impact of measures implemented in shared management, including at least one interim evaluation of their plans, which may be broken down by Chapters. Evaluations by Member States may also involve third countries, regarding support for cooperation activities between Member States and third countries. Evaluations should be conducted in a sufficiently timely manner to feed into the decision-making process, and could cover programmes, activities, or groups of activities.
- (21) Accessing information about the budget should be made simpler and more efficient, to increase the transparency and accountability of the budget as well as to simplify the administrative burden for applicants and beneficiaries and ultimately improve the performance of the budget and strengthen Union action. A single dedicated publicly available website ('Single Gateway') should be set up to display information about budget implementation and performance, as well as information about funding opportunities. The Single Gateway, as far as possible, will build on existing tools, in line with the European Commission's Digital Strategy and its 'reuse, buy, build' approach. It should be user-friendly and designed to adapt to the needs of the different users. In addition, the Single Gateway should also integrate other functions, such as displaying data on recipients and operations supported by the budget, and should also be regularly updated by the Commission. In addition, the Commission should make available to Member States a test version of the Single Gateway by 1 January 2027.

- (22) The implementation of the provisions on do no significant harm and on gender equality, as well as the provisions on performance monitoring, reporting and funding opportunities, should be clarified for each method of implementation. It should, in particular, be taken into account that a part of the budget is to be implemented through plans prepared and submitted by Member States, setting out their agenda of reforms, investments and output-based interventions ('measures'), and thorough performance-based plans by third countries. References to plans by third countries should be understood as only covering Union candidate countries, potential candidates and neighbourhood East countries. Support to other third countries may be provided through other means than plans. Given the specific circumstances of third countries and in line with the principle of proportionality, those countries should benefit from further flexibility in the implementation of the relevant provisions of this Regulation. Agreements with each implementing partner should contain appropriate provisions to implement the different elements of this Regulation, including the application of the expenditure tracking and performance framework, taking into account, among others, the capacity of that implementing partner. As regards implementation under direct management, the Commission should also provide and make public a 'do no significant harm' assessment for each work programme.
- (23) Clear communication about support from the budget and its achievements ensures that Union citizens and businesses know how funds are spent, which increases transparency, public awareness and engagement. Consistent rules regarding information, communication and visibility obligations should be laid down, in particular for beneficiaries and implementing partners, the Member States, third countries and Union institutions, taking into account the specific circumstances under which the budget may be implemented. This is without prejudice to further modalities during implementation, including on the use of brands associated with EU funding under programmes.

- (24) For the purposes of carrying out their respective obligations under this Regulation, the Financial Regulation and the sector-specific rules, in particular monitoring, reporting, communication, publication, evaluation, financial management, verifications, audits and, where applicable, determining the eligibility of participants, it is necessary to collect and process different categories of personal data relating to entities involved in the implementation of the Union budget so as to allow for, among others, the identification of those entities, calculation of appropriate performance indicators and evaluation of the achievement of objectives in the relevant sectors.
- (25) The personal data should be processed in accordance with Regulation (EU) 2016/679 or Regulation (EU) 2018/1725 of the European Parliament and of the Council, whichever is applicable. Data should be processed in an adequate and relevant manner, limiting it to what is necessary in relation to the purposes for which they are processed ('data minimisation'). Only necessary categories of personal data should be processed, in particular data necessary for the identification of the persons concerned, data necessary for calculating the performance indicators and personal data such as employment status, education, skills and socio-demographic characteristics. To that end, a distinction should be made between, on the one hand, processing for which anonymous or pseudonymised data may be sufficient for the purpose being pursued (such as the monitoring of contributions by means of EU coefficients or in the context of the budget expenditure tracking) and, on the other hand, processing for which non pseudonymised personal data is necessary (such as verifications of eligibility or in case of audits on beneficiaries of funds). Furthermore, the processing should take into account the provisions relating to special categories of personal data.

(26) The power to adopt acts in accordance with Article 290 TFEU should be delegated to the Commission in respect of: amending Annex I to this Regulation by adding new intervention fields or new performance indicators in order to adapt it to changes occurring to programmes and activities financed by the budget; amending the list of codes for the territorial dimension by adding new codes to the list set out in Annex II in order to adapt it to changes occurring to programmes and activities financed by the budget; amending Annex IV to this Regulation by adding new programmes to the list of programmes relevant for gender equality; and amending Annex V to this Regulation on information, communication and visibility in order to adapt it to changes occurring to programmes and activities. It is of particular importance that the Commission carry out appropriate consultations with Member States during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement on Better Law-Making of 13 April 2016<sup>12</sup>. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts.

---

<sup>12</sup> OJ L 123, 12.5.2016, p. 1.

- (26a) In line with the principle of sound financial management and Article 33(2), point (2) of Regulation (EU, Euratom) No 2024/2509 of the European Parliament and of the Council, the ‘do no significant harm’ principle is fundamental to the assessment of performance when using EU budget appropriations. This principle ensures that EU funding does not undermine environmental objectives, and it applies to all budget implementation methods. To ensure uniform conditions for implementing this principle, a ‘do no significant harm’ guidance should be adopted, particularly containing a methodology for assessing compliance with the principle and identifying policy areas or intervention fields that are always in line with it and do not require further assessment. To this end, implementing powers should be conferred on the Commission. These powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council. Given the importance of the guidance in providing stable and reliable direction to all those involved in implementing the EU budget, particularly at the start of the 2028-2034 programming period, the examination procedure should be used to adopt the ‘do no significant harm’ guidance.
- (27) This Regulation should apply from the start of application of the 2028-2034 MFF on [1 January 2028].
- (28) The European Data Protection Supervisor was consulted in accordance with Article 42(1) of Regulation (EU) 2018/1725 and delivered an opinion on 17 April 2026.

HAVE ADOPTED THIS REGULATION:

# Chapter 1

## General provisions

### *[Article 1*

#### *Subject matter*

1. This Regulation establishes an expenditure tracking and a performance framework for the budget, including rules on the monitoring of all budget expenditure, monitoring and reporting on the performance of Union programmes and activities, and rules for the evaluation of the programmes and activities.
2. This Regulation also establishes rules for ensuring a uniform application of the principles of ‘do no significant harm’ and gender equality referred to in Article 33(2), points (d) and (f) of Regulation (EU, Euratom) 2024/2509 respectively, where feasible and appropriate, in line with the principles of economy, efficiency and effectiveness as set out in Article 33(1) of that Regulation, as well as other horizontal principles regarding working and employment conditions and climate and environment. It also establishes horizontal provisions applicable to all Union programmes and activities, such as rules for establishing a Single Gateway referred to in Article 12 of this Regulation, and rules on information, communication and visibility. ]

### *Article 2*

#### *Definitions*

For the purposes of this Regulation, the following definitions apply:

- (1) ‘intervention field’ means a standardised and predefined category set out in Annex I of this Regulation used to classify supported activities;
- (2) ‘activity’ means the specific initiative undertaken to contribute to the achievement of an objective set or to the implementation of a measure;
- (3) ‘EU coefficients’ means the three-tier system of coefficients (0%, 40%, 100%) which are applied to measure the contribution of each budget intervention field towards policy objectives;

- (4) ‘output indicator’ means a quantitative performance indicator that monitors what is directly produced or supported by the implementation of an activity;
- (5) ‘result indicator’ means a quantitative performance indicator that monitors the direct effects of supported activities;
- (6) ‘plan’ means the document laying down measures:
  - (a) drawn up by Member States (‘plans by Member States’) as referred to in Title III of Regulation .../... [National and Regional Partnership Plans] or drawn up by Member States as chapters of Interreg Plan as referred to in Chapter II of Regulation .../... [ERDF/CF/Interreg], or
  - (b) drawn up by Union candidate countries, potential candidates and neighbourhood East countries as referred to in article 31 of Regulation .../... [Global Europe] (‘plans by third countries’);
- (7) ‘measure’ means a reform, an investment or output-based intervention included in plans drawn up by Member States or third countries, which may consist of one or more activities. One or more intervention fields may be assigned to each measure;
- (7a) ‘output-based intervention’ has the meaning given in Regulation .../... [National and Regional Partnership Plans];
- (8) ‘milestone’ has the meaning given in Regulation .../... [National and Regional Partnership Plans];
- (9) ‘target’ has the meaning given in Regulation .../... [National and Regional Partnership Plans];

- (10) ‘operation’ means any of the following:
- (a) a project, action or group of projects or actions implementing one or more activities;
  - (b) in the context of financial instruments and budgetary guarantees, the reimbursable financing provided to final recipients and supported by the Union budget;
  - (c) a payment granted to farmers or, where applicable, to other beneficiaries under area- and animal-based CAP income support interventions as defined under Regulation .../... [National and Regional Partnership Plans];
- (11) ‘advisory partner’ has the meaning given in Regulation .../... [European Competitiveness Fund “ECF”].

### *Article 3*

#### *Objectives*

This Regulation aims to strengthen the design, monitoring and implementation of the EU budget and of the Union’s strategic priorities, to reduce administrative burden at all levels, particularly for Member States and beneficiaries, and to increase transparency, by:

- (a) establishing a uniform system to track budget expenditure;
- (b) establishing a uniform system across the budget to monitor, report on and evaluate the implementation of the budget through programmes and activities, and contribute to measuring its overall performance;
- (c) harmonising and rationalising the reporting of performance information;
- (d) harmonising the application of horizontal principles across all programmes and activities, where feasible and appropriate;
- (e) establishing the arrangements for providing information about budgetary performance, available funding opportunities under the budget and other information of interest to the public related to the implementation of the budget.

## Chapter 2

### Horizontal principles

#### *Article 4*

#### *Climate, environment and biodiversity*

1. The contribution from the budget to climate, environment and biodiversity objectives shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.
2. Programmes and activities shall be implemented with a view to achieving an overall spending target of at least 35% of the total amount of the budget on climate action and environmental objectives ('climate and environment spending target') over the entire 2028-2034 multiannual financial framework, calculated by using the highest coefficient amongst climate mitigation, climate adaptation and resilience, and environment of the framework referred to in paragraph 1. Defence and security spending shall be excluded from the basis for the calculation of the climate and environment spending target.]
3. EU programmes and instruments shall contribute to reaching the climate and environment spending target defined in paragraph 2. The specific contribution of some EU programmes and instruments is laid out in Annex III.
4. Where there is insufficient progress towards the climate and environment spending targets in one or more of the relevant programmes, the European Parliament, the Council and the Commission, in accordance with their responsibilities and the relevant legislation, will consult each other on appropriate measures to be taken to ensure that Union spending on climate and environment objectives over the 2028-2034 multiannual financial framework corresponds to [at least 35%] of the total amount of the Union budget.

## *Article 5*

### *'Do no significant harm' to environmental objectives*

1. A streamlined application of the 'do no significant harm' principle as referred to in Article 33(2), point (d), of Regulation (EU, Euratom) 2024/2509, shall be facilitated by a single, stable and simple guidance ('do no significant harm guidance').

The Commission shall provide this guidance by 1 November 2026, following close consultation with Member States.

In the context of the first subparagraph, the Commission shall be empowered to adopt an implementing act to establish the 'do no significant harm guidance'. Such implementing act shall be adopted in accordance with the examination procedure referred to in Article 20a [Committee procedure].

2. The guidance referred to in paragraph 1 shall set out general principles and criteria in accordance with the principles of subsidiarity and proportionality and, where necessary, specific criteria at the level of relevant policy areas or intervention fields.

The guidance shall contain a methodology for the assessment of the compliance with the do no significant harm principle. In particular, it shall identify policy areas or intervention fields that are always deemed to be in line with the do no significant harm principle and that do not require any further assessment.

In this respect, it shall also notably be considered that support subject to the farm stewardship conditions in accordance with Article 3 of Regulation .../... [CAP Regulation] shall be deemed to comply with the do no significant harm principle.

The guidance by the Commission shall also take into account the need to achieve the set objectives of the relevant programmes or instruments in line with the Union's policy priorities, the need to avoid duplication with requirements under existing EU legislation (such as environmental impact assessments and strategic environmental assessments) or with assessments already carried out during the 2021-2027 period, the high levels of protection to human health and the environment provided by existing EU legislation, the administrative and reporting burden on authorities and beneficiaries, and the principle of proportionality.

Proportionality shall be ensured notably by taking into account the size of an activity, including the support from the EU budget, its climate and environmental impacts, and the territorial characteristics of the regions where the activities take place or the fact that they may take place in third countries.

3. The guidance referred to in paragraph 1 shall also identify cases where the application of the do no significant harm principle may not be feasible or appropriate, such as crisis situations as defined in Article 2(22) of Regulation 2024/2509 [Financial Regulation] or other reasons of overriding public interest.

In this respect, it shall notably be considered that it is not feasible or appropriate to apply the do no significant harm principle in relation to migration and border management as well as defence, including military mobility, and security.

#### *Article 6*

#### *Social policies*

1. The contribution from the budget to social policy objectives within the Union shall be monitored by means of the budget expenditure tracking and performance framework laid down in Article 8, including by means of EU coefficients.
2. Programmes and activities shall, where feasible and appropriate in accordance with the relevant sector-specific rules, be implemented to achieve their set objectives respecting working and employment conditions under applicable national law, Union law, ILO conventions and collective agreements in accordance with Article 33(2), point (e), of Regulation (EU, Euratom) 2024/2509.

*Article 7*  
*Gender equality*

1. The programmes that aim to support gender equality in accordance with Article 33(2), point (f), of Regulation (EU, Euratom) 2024/2509 are specified in Annex IV to this Regulation.

Gender equality, gender mainstreaming and the integration of a gender perspective shall be taken into account and promoted throughout the preparation, implementation, monitoring, reporting and evaluation of the programmes listed in Annex IV, where feasible and appropriate in accordance with the sector-specific rules.

Particular attention shall be paid to ensuring, to the extent possible, gender balance in evaluation panels and other relevant advisory bodies such as boards, expert groups and monitoring committees.

2. For the purpose of the gender equality mainstreaming methodology referred to in Article 33(2), point (f), of Regulation (EU, Euratom) 2024/2509, activities of the budget shall fall into one of the following categories and corresponding gender equality scores:
  - (a) with gender equality as a principal objective ('gender equality score 2');
  - (b) with gender equality as an important and deliberate objective but not as its main objective ('gender equality score 1');
  - (c) anticipated to have no substantial contribution to gender equality ('gender equality score 0').
3. In close consultation with Member States, the Commission shall provide technical guidance by 1 November 2026 on the methodology referred to in paragraph 2 to determine the categories and corresponding gender equality scores, aiming to ensure consistency across all programmes. Modifications to the guidance shall have no retroactive effects to ensure a stable framework, in particular in the context of the implementation of Member States' National and Regional Partnership Plans.

4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend the list included in Annex IV to add new programmes.

## **Chapter 3**

# **Budget expenditure tracking and performance framework, monitoring and reporting, evaluation and transparency**

### *Article 8*

#### *Budget expenditure tracking and performance framework*

1. The budget expenditure tracking and performance framework shall be based on the following elements:
  - (a) a single list of intervention fields;
  - (b) EU coefficients, assigned to the intervention fields to determine their contribution to climate, environment, biodiversity and social policy objectives;
  - (c) for each intervention field, effective, relevant and comprehensive performance indicators consisting of output indicators and result indicators, pursuant to Article 33(3) of Regulation (EU, Euratom) 2024/2509.

The elements referred to in the first subparagraph are set out in Annex I.

For activities in the Union, the budget expenditure tracking and performance framework shall also include the territorial dimension codes laid down in Annex II.

2. Each activity financed by the budget shall be assigned a single intervention field that best represents the substance of the activity financed. The eligibility of an activity under the budget shall be based on the sector-specific rules and it shall not be restricted by the definition of intervention fields and performance indicators, which are established only for the purposes of tracking expenditure and monitoring the performance of the budget.
3. In close consultation with Member States, the Commission shall detail further the definition of the performance indicators referred to in paragraph 1, first subparagraph, point (c) as regards methodological clarifications, including the calculation method of the indicators, before 1 November 2026. Modifications to the guidance shall have no retroactive effects to ensure a stable framework, in particular in the context of the implementation of Member States' National and Regional Partnership Plans.

4. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend Annex I by adding new intervention fields or new performance indicators in order to adapt it to changes occurring to programmes and activities financed by the budget and taking into account the methodological clarifications referred to in paragraph 3 [of this Article].

The Commission is empowered to adopt delegated acts in accordance with Article 20 to add new codes for the territorial dimension to the list set out in Annex II in order to adapt it to changes occurring to programmes and activities financed by the budget.

### *Article 9*

#### *Budget performance monitoring and reporting*

1. The Commission shall monitor the implementation of the programmes and activities financed by the budget, across all methods of budget implementation, to assess the progress made towards the achievement of their objectives in accordance with the performance indicators referred to in Article 8(1), first subparagraph, point (c). Data shall be collected efficiently, effectively, regularly, in a timely manner, and stored electronically. To that end, proportionate reporting requirements in accordance with the “once-only principle” shall be imposed on Member States and recipients of Union funding.

Detailed rules on data collection may be laid down in sector-specific basic acts.

2. The Commission shall inform annually the European Parliament and the Council on the level of implementation of the programmes and activities, including where relevant financial instruments, as well as the progress made towards the achievement of programme objectives, in accordance with Article 41(3), first subparagraph, point (h) and Article 253(1), point (e), of Regulation (EU, Euratom) 2024/2509 as well as progress made towards the specific spending targets set out in this and other sectoral regulations.

3. Specifically for external action instruments, when fulfilling its obligations under paragraph 2, the Commission shall also provide information broken down by chapter, country, region and cooperation sector, based on the nomenclature set out in Annex I of Regulation (EU, Euratom) .../... [Global Europe Regulation] and on the provisions laid down in this regulation, including Annex I, as well as information on the cooperation with the relevant partners, broken down by type of implementing entity, where applicable.

#### *Article 10*

##### *Evaluations by the Commission*

1. The Commission shall carry out retrospective evaluations in accordance with Article 34(3) of Regulation (EU, Euratom) 2024/2509 to examine the effectiveness, efficiency, relevance, coherence and Union added value of each programme or activity, where appropriate by means of independent experts. In relation to the common agricultural policy and the common fisheries policy, such evaluations shall also cover measures implemented in accordance with Regulation (EU) No 1308/2013<sup>13</sup> and (EU) No 1379/2013<sup>14</sup>, respectively.
2. The Commission shall publish an implementation report for each programme or activity no later than four years after the start of its implementation.
3. The Commission shall carry out a retrospective evaluation to assess the performance of the programme or activity at the latest three years after the end of the programming period of each programme or activity.
- 3a. The Commission shall carry out a final evaluation to assess the impact of the Horizon Europe programme at the latest seven years after the end of the programming period. It shall include an assessment of the long-term impact of the previous framework programmes for research and innovation.
4. All evaluations shall be published on the website referred to in Article 12(1).

---

<sup>13</sup> Regulation (EU) No 1308/2013 of the European Parliament and of the Council of 17 December 2013 establishing a common organisation of the markets in agricultural products (OJ L 347, 20.12.2013, p. 671).

<sup>14</sup> Regulation (EU) No 1379/2013 of the European Parliament and of the Council of 11 December 2013 on the common organisation of the markets in fishery and aquaculture products (OJ L 354, 28.12.2013, p.1).

## *Article 11*

### *Evaluations by the Member States under shared management*

1. By way of derogation from Article 34(2) of the Financial Regulation, when implementing the Union budget under shared management, Member States, in accordance with their institutional and legal framework, including their relevant managing authorities, shall carry out evaluations related to one or more of the following criteria: effectiveness, efficiency, relevance and coherence, with the aim of improving the quality of the design and implementation of the measures and to identify bottlenecks in their implementation. Evaluations may also cover other relevant criteria, such as inclusiveness, visibility and European added value.
2. Member States shall carry out evaluations to assess the impact of measures implemented in shared management at the latest two years after the end of the programming period. These evaluations may be carried out by means of quantitative and qualitative techniques, including, where appropriate, counterfactual approaches and findings from experimental design.
3. Member States shall carry out at least one interim evaluation of their plans no later than three years after their approval or, in any event, ahead of the mid-term review of the plans as set out in Article 25 of Regulation .../... [National and Regional Partnership Plans], which shall take that evaluation into account.

The requirement set out in the first subparagraph does not apply to Interreg.

4. Member States, in accordance with their institutional and legal framework, including their relevant managing authorities, shall draw up an evaluation roadmap and shall submit it to the relevant monitoring committee or body and the Commission no later than one year after the approval of their plans. The evaluation roadmap may also specify whether the interim evaluation referred to in paragraph 3 is to be broken down by multiple evaluations, such as by Chapters.
5. Member States shall entrust evaluations to experts, who are functionally independent.
6. Member States shall ensure that the necessary procedures are set up to produce and collect the data necessary for evaluations.
7. All evaluations shall be published on the website referred to in Article 12(1).

*Article 12*  
*Transparency – Single Gateway*

1. By 1 January 2028, the Commission shall set up a dedicated publicly available website (the ‘Single Gateway’), with several content sections, and develop and operate the following functions:
  - (a) display the progress of the financial implementation and performance of the budget, including the relevant evaluations;
  - (b) provide the information referred to in Article 38 and Article 142(1) of Regulation (EU, Euratom) 2024/2509, in accordance with the criteria specified in paragraph 3 of Article 38 and paragraph 2 of Article 142 of the same regulation;
  - (c) provide information about operations financed by the budget, having due regard to confidentiality and security considerations, and with the exception of support provided through financial instruments or budgetary guarantees for an amount lower than EUR 500 000;
  - (d) provide information about operations that have received a quality label, special distinctions or an emblem of excellence awarded under Union programmes, and are seeking alternative or additional funding, financing or investors;
  - (e) provide information about ongoing and upcoming calls for expression of interests, calls for proposals and calls for tenders financed by the budget;
  - (f) provide a channel for promoters to present operations to potential investors;
  - (g) provide centralised access to advisory and business support services funded by the budget.

2. With regard to the function referred to in paragraph 1, point (a), of this Article, the Single Gateway shall contain, as appropriate, information on the following elements:
  - (a) progress of the financial implementation and performance, broken down by programme and by chapter of a plan by a Member State where relevant;
  - (b) aggregated performance broken down by programme and intervention field, using the relevant performance indicators referred to in Article 8(1), first subparagraph, point (c), of this Regulation;
  - (c) contribution towards policies as referred to in Article 8(1), first subparagraph, point (b), of this Regulation broken down by programme;
  - (d) for programmes and activities implemented directly by the Commission, the level of subscription, in particular, for each call for proposals, the number of proposals, their average score and the share of proposals above and below quality thresholds by Member State;
  - (e) information referred to in Article 41(3), first subparagraph, point (h) and Article 253(1), point (e), of Regulation (EU, Euratom) 2024/2509.
3. With regard to the function referred to in paragraph 1, point (c), of this Article, the Single Gateway shall contain, regarding the operations financed through plans by Member States, the information referred to in Article 63, paragraph 1, point (e) and excluding the information referred to in Article 64, paragraph 5, of Regulation .../... [National and Regional Partnership Plans].
4. With regard to the function referred to in paragraph 1, point (e), of this Article, the Single Gateway shall contain, as appropriate, information on the following elements:
  - (a) subject of the call, including a short description;
  - (b) geographical area covered by the call;
  - (c) type of eligible participants;
  - (d) total amount of support for the call and the currency;

- (e) start and end date of the call;
  - (f) link to the online platform where the call has been or will be published.
5. The Single Gateway shall be updated regularly by the Commission.
  6. The Commission shall make available to Member States a test version of the Single Gateway by 1 January 2027.

## Chapter 4

### Implementation

#### *Article 13*

#### *Implementation through plans by Member States or third countries – do no significant harm and gender equality*

1. Each Member State or third country shall provide a ‘do no significant harm’ assessment for each measure in their plans, at the level of each intervention field assigned to the measure, in accordance with the guidance referred to in Article 5, except where otherwise exempted by the same guidance.
2. By derogation from the first paragraph, in case of an intervention field assigned to a measure where the application of the ‘do no significant harm’ principle may not be feasible or appropriate, each Member State or third country shall provide a justification in line with the guidance referred to in Article 5.
  - 2a. Member States shall not be required to provide a ‘do no significant harm’ assessment at operation level.
3. Each Member State or third country shall provide a gender equality assessment for each measure in their plans, where feasible and appropriate, as follows:
  - (a) providing an explanation of how measures in the plans are expected to contribute to gender equality;
  - (b) assigning the appropriate gender score from those set out in Article 7(2) at the level of the intervention field assigned to a measure and providing adequate justification.

Moreover, gender equality shall be included among the criteria used for the evaluation of proposals, where feasible and appropriate.

4. The assessment referred to in paragraphs 1 to 3 shall be provided at the moment of the submission of the plans. If it is not possible to provide a gender equality assessment at that moment because of duly justified reasons, the measure shall be deemed to have no substantial contribution to gender equality and therefore be assigned a score 0. The Member State or third country concerned shall revise or confirm that score 0 whenever they submit an amendment of their plans.
5. The compliance with the obligations referred to in paragraphs 1 to 3 of this Regulation of each plan or amendment submitted by a Member State or a third country shall be subject to an assessment in accordance with the relevant sector-specific rules.

#### *Article 14*

##### *Implementation through plans by Member States – performance monitoring and reporting*

1. Each Member State shall have in place, in accordance with their institutional and legal framework, a monitoring and reporting system to allow for the monitoring of performance and the transmission of information based on the relevant elements of the expenditure tracking and performance framework referred to in Article 8(1). The Member States shall make that information available to the Commission in accordance with the “once-only principle” in an interoperable way through the electronic data exchange system between the Member States and the Commission referred to in Annex XVI to Regulation .../... [National and Regional Partnership Plans – SFC 2028].
2. Each plan submitted by a Member State, in accordance with their institutional and legal framework, and any amendment thereof, shall include for each measure the proposed assignment of at least one intervention field from Annex I and, for each intervention field assigned to that measure, the corresponding EU contribution as well as the following performance indicators as appropriate:
  - (a) one output indicator defining the final milestone or target for each intervention field of that measure and selected from Annex I corresponding either to the assigned intervention field or, where appropriate, to a different intervention field.

Where the selected output indicator comprises an aggregated level and sub-categories, either the aggregated level or one of the sub-categories shall define the final milestone or target.

Where the nature of the measure cannot be adequately captured by any of the output indicators in Annex I, other output indicators not included in Annex I can be assigned;

Where a single intervention field is assigned multiple times to a measure, distinct performance indicators can be selected for each of those assignments.

The output indicators in Annex I shall not prejudice the design of the milestones and targets in the plans of the Member States.

For non-final milestones and targets, Member States may use any output indicators, including other than those in Annex I.

- (b) if available in the corresponding intervention field, one or more result indicators corresponding either to the assigned intervention field or, where appropriate, to a different intervention field as provided under Annex I.

If no result indicator is available in the corresponding intervention field, the Member State may decide not to assign a result indicator.

Where the nature of the measure cannot be adequately captured by any of the result indicators in Annex I, another result indicator not included in Annex I can be assigned.

Where ‘greenhouse gas emissions avoided’ is assigned as the result indicator, the Member State shall also assign a second result indicator, if available under the same intervention field.

Reporting on the ‘greenhouse gas emissions avoided’ shall be carried out by the Commission based on the data provided by Member States.

Where the Social Climate Plan chapter referred to in Article 80 of Regulation .../... [National and Regional Partnership Plans] is concerned, Member States may decide to apply Article 6(1), point (m), of Regulation 2023/955<sup>15</sup> instead of this Regulation.

---

<sup>15</sup> Regulation (EU) 2023/955 of the European Parliament and of the Council of 10 May 2023 establishing a Social Climate Fund and amending Regulation (EU) 2021/1060.

3. Each plan shall provide the baseline and an estimated value for the result indicator assigned to each measure in accordance with paragraph 2, including the expected year of achievement of that value. For area- and animal-based income support under the common agricultural policy, such an estimated value shall not be cumulative and shall correspond to the maximum value reached during the programming period.

Where the result indicator assigned to the measure in accordance with paragraph 2 comprises more than one sub-category, the baseline and estimated value shall be provided for only either the aggregated value or one of these sub-categories.

The Member State may update the performance indicators, including where relevant their baseline or estimated values, during the mid-term review or any amendment of the plan.

4. Each plan submitted by a Member State, and any amendment thereof, shall also include for each measure a proposed assignment of at least one territorial dimension code laid down in part 1 of Annex II and at least one location pursuant to part 4 of Annex II. Where relevant and available, Member States shall also propose territorial dimension codes under part 2 and/or part 3 of Annex II.
5. Member States shall make available to the Commission the information on the progress in the selected output indicator in accordance with Article 59, paragraph 1, point (a) of Regulation .../... [National and Regional Partnership Plans] and actual results of the measure against the estimated value of the result indicator assigned to that measure and including, where relevant, all sub-categories of the result indicator in accordance with the template set out in Annex IX of Regulation .../... [National and Regional Partnership Plans]. The information on the result indicator shall be updated by 15 February of each year, until 2037.
6. For performance monitoring and reporting purposes only, where an output indicator comprises more than one sub-category, Member States shall make available to the Commission the information on the progress for all relevant sub-categories, in addition to the sub-categories defining the final milestone or target of the measure that will be reported pursuant to paragraph 5.

- 6a. For the measures and investments set out in the Social Climate Plan chapters referred to in Article 80 of Regulation .../... [National and Regional Partnership Plans], Member States may decide to report on the output and result indicators in accordance with Article 24 and Annex IV of Regulation 2023/955 instead of applying this Regulation.
7. The deadline referred to in paragraph 5 may be exceptionally extended by the Commission to 1 March upon written communication by the Member State concerned.

#### *Article 15*

##### *Implementation through plans by third countries – performance monitoring and reporting*

1. For each measure of a plan by third countries, the Commission shall assign at least one intervention field from Annex I and, to the extent possible, shall ensure that, in their plans, third countries use the performance indicators referred to in Article 8(1), first subparagraph, point (c) and in compliance with the implementing rules set out in Article 31 [Global Europe Instrument]. The Commission shall make observations or seek additional information if necessary. Agreements concluded with the third country concerned shall include an obligation for the third country to provide the requested additional information and to revise the proposed performance indicators if needed.
2. Plans shall contain appropriate provisions on the reporting of performance data and the electronic transmission to the Commission of the underlying monitoring data.

#### *Article 16*

##### *Implementation under direct management*

1. When implementing the budget in accordance with Article 62(1), first subparagraph, point (a), of Regulation (EU, Euratom) 2024/2509, the Commission shall ensure compliance with the requirements laid down in Article 33(2), points (d), (e) and (f), of that Regulation and in accordance with the guidance referred to in Article 5 of this Regulation. In particular, gender equality shall be included among the criteria used for the evaluation of proposals, where feasible and appropriate.

2. When preparing the work programme within the meaning of Article 110 of Regulation (EU, Euratom) 2024/2509, the Commission shall define the areas of eligible activities in a manner that allows for the assignment of at least one intervention field to each area. Where support is provided via financial instruments and budgetary guarantees, the Commission shall also use the result indicator “amount of investment mobilised”.

The Commission shall also provide and make public a ‘do no significant harm’ assessment for each work programme, taking into account the relevant intervention fields, in accordance with the guidance referred to in Article 5, except where otherwise exempted by the same guidance.

3. Reporting requirements imposed on recipients of Union funds shall be proportionate and shall aim to ensure that data for monitoring implementation and results are collected efficiently, effectively and in a timely manner.

#### *Article 17*

##### *Implementation under indirect management*

1. When assessing and agreeing on actions to be financed under indirect management by persons or entities implementing Union funds and budgetary guarantees pursuant to Article 62(1), first subparagraph, point (c) of Regulation (EU, Euratom) 2024/2509, the Commission shall ensure that those actions comply with the requirements laid down in Article 33(2), points (d), (e) and (f) of that Regulation and in accordance with the guidance referred to in Article 5 of this Regulation.
2. Agreements signed between the Commission and persons or entities implementing Union funds and budgetary guarantees pursuant to Article 62(1), first subparagraph, point (c) of Regulation (EU, Euratom) 2024/2509 shall contain appropriate provisions on:
  - (a) reporting of performance data referred to in Article 158(7) of Regulation (EU, Euratom) 2024/2509 as part of the report referred to in Article 158(1), first subparagraph, point (a), of that Regulation. Where feasible and appropriate, output and result indicators shall be selected from those set out in Annex I and, where support is provided via financial instruments and budgetary guarantees, the result indicator “amount of investment mobilised” shall also be used;

- (b) transmitting electronically to the Commission information with relevant elements as referred to in Article 12(4) of this Regulation in relation to calls for expression of interests, calls for proposals and calls for tenders, by the day of publication of those calls;
  - (c) any other information deemed important by the Commission for the implementation of the programme.
3. Reporting requirements imposed on recipients of Union funds including persons or entities implementing Union funds pursuant to Article 62(1), first subparagraph, point (c), of Regulation (EU, Euratom) 2024/2509 shall be proportionate and shall aim to ensure that data for monitoring implementation and results are collected efficiently, effectively and in a timely manner.

## Chapter 5

# Communication, protection of personal data and final provisions

### *Article 18*

#### *Information, communication and visibility*

1. Beneficiaries, persons or entities implementing Union funds and budgetary guarantees pursuant to Article 62(1), first subparagraph, point (c), of Regulation (EU, Euratom) 2024/2509, bodies implementing financial instruments under the plans, and advisory partners shall acknowledge the origin of those Union funds and ensure the visibility of the Union support as appropriate, in particular when promoting the actions and their results. For that purpose, they shall provide coherent, effective and proportionate targeted information to relevant audiences, including the media and the public, through selected communication and promotional tools appropriate to the nature of the operation and to the target audience groups and to the scale of support, in particular press or communication material, websites and other digital channels, events and outreach activities, and other communication and visibility actions.

This obligation does not apply to:

- (a) the beneficiaries of area- and animal-based interventions under the common agricultural policy or of compensation-based interventions under the common fisheries policy;
- (aa) the beneficiaries of operations where the amount of Union support received is equal or less than EUR 10 000.
- (b) other cases where this is justified by reasons of security and public order.

2. Persons or entities implementing financial instruments and budgetary guarantees pursuant to Article 62(1), first subparagraph, point (c), of Regulation (EU, Euratom) 2024/2509 and bodies implementing financial instruments under the Plans shall require their financial intermediaries to acknowledge the origin of those funds and to inform final recipients thereof, and shall ensure the visibility of the Union support by making that information clearly visible in the agreements signed with them. When advisory partners select entities to provide advisory and business support services, they shall ensure that those entities inform the persons benefitting from the advisory and business support services that those services have been funded by the Union and make that information clearly visible in the agreements signed with them.
3. To fulfil the obligation laid down in paragraphs 1 and 2, the emblem of the Union shall be used and a funding statement that reads ‘Co-funded by the European Union’ or ‘Funded by the European Union’ for operations fully financed by the European Union or ‘In partnership with the European Union’ for external actions, shall be provided when carrying out information, communication and visibility actions, in accordance with Annex V. The emblem of the Union and the funding statement shall, in particular, feature in press or communication material, websites and other digital supports addressed to the public.

For operations, other than financial instruments or budgetary guarantees or EU school schemes, where the total cost of the tangible asset exceeds EUR 300 000, durable plaques or billboards or equivalent electronic displays that are clearly visible to the public and that present the emblem of the Union and the funding statement referred to in the first subparagraph shall be displayed, as soon as the physical implementation of the operation starts or purchased equipment is installed and for at least five years after the final payment to the beneficiary.

For operations under measures supporting the objectives of the European Regional Development Fund and the Cohesion Fund as referred to in Article 2(1)(a) of Regulation .../... [National and Regional Partnership Plans]... the amount referred to in the second subparagraph regarding the total cost of the tangible asset shall be EUR 500 000.

For multiple operations involving a single beneficiary and taking place at the same location, a single durable plaque or billboard or equivalent electronic display may be used, provided that all the information is clearly visible.

4. The Commission shall implement information, visibility and communication actions and campaigns relating to the Union's policies, priorities, actions and results directed towards multiple audiences, including the media and the public. Financial resources allocated to the programmes and activities may also contribute to the corporate communication of the political priorities of the Union.
5. Member States shall ensure information, communication and visibility of support and achievements of the Union funds, and communicate to citizens through the website referred to in Article 64(1) of Regulation .../... [National and Regional Partnership Plans], in accordance with the requirements set out in this Article, except where Union law or national law excludes such publication for reasons of security, public order or criminal investigations. Publication of personal data shall comply with the rules on the protection of personal data as laid down in Regulation (EU) 2016/679<sup>16</sup> or Regulation (EU) 2018/1725<sup>17</sup>, whichever is applicable.

---

<sup>16</sup> Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) (OJ L 119, 4.5.2016, p. 1).

<sup>17</sup> Regulation (EU) 2018/1725 of the European Parliament and of the Council of 23 October 2018 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC (EU Data Protection Regulation) (OJ L 295, 21.11.2018, p. 39).

6. Member States, in accordance with their institutional and legal framework, shall appoint one or more communication coordinators who shall be responsible for the overall information, communication and transparency actions in relation to the support received from the budget implemented within their territory, ensuring coordination with relevant managing authorities and liaising with the Commission and its representations, European Parliament Liaison Offices, Europe Direct Centres and other relevant networks, including European CAP Network, education and research organisations as well as with other relevant partners. Member States may also identify one or more communication officers, in particular in relation to their plans. The Commission shall maintain the network comprising communication coordinators, communication officers and Commission representatives to exchange about information, communication and visibility activities.
7. Third countries implementing EU-funded external actions shall also ensure visibility of EU support. In the case of implementation through plans by third countries, a communication and visibility plan for the local audiences of the beneficiaries shall be submitted in the plans.
8. Where security considerations or an urgent need in a crisis situation may make it preferable or necessary to limit or adjust communication and visibility actions in certain third countries or parts thereof, the target audience and the visibility tools, products and channels to be used in promoting a given action shall be determined on a case-by-case basis, in agreement with the Commission.
9. The Commission is empowered to adopt delegated acts in accordance with Article 20 to amend or supplement Annex V in order to adapt it to changes occurring to programmes and activities.

*Article 19*  
*Processing of personal data*

1. The Member States and the Commission shall be allowed to process personal data only where necessary for the purpose of carrying out their respective obligations under this Regulation and under Regulation .../... [National and Regional Partnership Plans], in particular for monitoring, reporting, communication, publication, evaluation, financial management, verifications and audits and, where applicable, for determining the eligibility of participants. The personal data shall be processed in accordance with Regulation (EU) 2016/679 or Regulation (EU) 2018/1725 of the European Parliament and of the Council, whichever is applicable.
2. For evaluations referred to in Article 11(2) and involving the use of a control group, the same categories of data as for participants may be processed for the individuals belonging to a control group, who are non-participants with similar socio-demographic characteristics compared to participants.
3. Special categories of personal data referred to in Article 9 of Regulation (EU) 2016/679 and Article 10 of Regulation (EU) 2018/1725, may be processed only for the purposes of determining the eligibility of participants, monitoring, reporting and evaluation of operations involving support to persons with disabilities and marginalised communities, including Roma, and calculating the values of the performance indicators related to the relevant intervention fields set out in Annex I, as well as verifications and audits.
4. Personal data shall be collected directly from the persons concerned, or by re-using information stored in registers in compliance with relevant Union or national legislation.
5. Personal data shall be stored no longer than necessary to demonstrate the compliance with this Regulation and, in any event, no longer than five years from either the end of the activity or, in the case of plans by Member States, from the date of the final payment to the Member State, whichever is later. For evaluation purposes, to allow for an assessment of long-term impacts, personal data may be stored for a longer period, but no longer than ten years.

6. Personal data shall be accessed only by authorised identifiable individuals. The responsible authority shall log such access and conduct reviews, as appropriate. The logs shall be deleted not later than the period of data retention referred to in paragraph 5. Personal data shall be provided to the third parties referred to in Article 11(5) only in pseudonymised format or anonymised format where the disclosure of personal data is not necessary to achieve the objectives of this Regulation.
7. Where personal data are processed for the purpose of implementing the budget in accordance with Article 62(1), first subparagraph, point (a) of Regulation (EU, Euratom) 2024/2509, the controller shall be the Commission or the relevant executive agency, as appropriate.
8. Where personal data are processed for the purpose of implementing the budget in accordance with Article 62(1), first subparagraph, point (b), of Regulation (EU, Euratom) 2024/2509, the controller shall be the relevant authorities of the Member State. Where data collected by Member States' authorities and communicated to the Commission including through the electronic exchange system referred to in Article 14(1) of this Regulation are processed for the Commission's tasks, the Commission shall be the controller.
9. Where personal data are processed for the purpose of implementing the budget in accordance with Article 62(1), first subparagraph, point (c), of Regulation (EU, Euratom) 2024/2509, the controller shall be the entity responsible for the implementation of the respective operation. Where data collected by that entity and communicated to the Commission are processed for the Commission's tasks, the Commission shall be the controller.
10. Where personal data are processed in accordance with Article 12 of this Regulation, the Commission shall be the controller.

*Article 20*  
*Exercise of the delegation*

1. The power to adopt delegated acts is conferred on the Commission subject to the conditions laid down in this Article.
2. The power to adopt delegated acts referred to in Articles 7, 8 and 18 shall be conferred on the Commission for an indeterminate period of time from 1 January 2028.
3. The delegations of power referred to in Articles 7, 8 and 18 may be revoked at any time by the European Parliament or by the Council. A decision to revoke shall put an end to the delegation of the power specified in that decision. It shall take effect on the day following the publication of the decision in the Official Journal of the European Union or at a later date specified therein. It shall not affect the validity of any delegated acts already in force.
4. Before adopting a delegated act, the Commission shall consult experts designated by each Member State in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making.
5. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.
6. A delegated act adopted pursuant to Articles 7, 8 and 18 shall enter into force only if no objection has been expressed either by the European Parliament or by the Council within a period of two months of notification of that act to the European Parliament and the Council or if, before the expiry of that period, the European Parliament and the Council have both informed the Commission that they will not object. That period shall be extended by one month at the initiative of the European Parliament or of the Council.
7. Once a delegated act enters into force, it shall have no retroactive effect.

*Article 20a*  
*Committee procedure*

1. The Commission shall be assisted by a committee. That committee shall be a committee within the meaning of Regulation (EU) No 182/2011.
2. Where reference is made to this paragraph, Article 5 of Regulation (EU) No 182/2011 shall apply.

Where the committee delivers no opinion, the Commission shall not adopt the draft implementing act and Article 5(4), third subparagraph, of Regulation (EU) No 182/2011 shall apply.

*Article 21*  
*Entry into force and application*

1. This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.
2. It shall apply from 1 January 2028.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

*For the European Parliament*

*For the Council*

*The President*

*The President*

## ANNEX I

### Intervention fields and indicators

#### Explanatory introduction:

- **Policy areas 1 and 2** are established for indicative purposes only, in view of tracking and monitoring, and are not prescriptive to the assignment of the intervention fields to measures or activities or to eligibility conditions.
- For easier reference, the original **numbering of the interventions fields** has been kept (as per Commission proposal), without renumbering. New intervention fields proposed are referred as Xa, Xb, etc. When intervention fields have been deleted, the original numbering of the particular intervention field has also been deleted.
- Some performance indicators are broken down into **sub-categories**, which detail the nature of the indicator more precisely into subdivisions, and share specific features or characteristics of the broader category.
- For direct and indirect management, when support is provided through financial instruments or budgetary guarantees and a more specific intervention field is selected, the **amount of investment mobilised** must be reported as an indicator, in addition to the relevant indicators associated with that more specific intervention field.

CCM: climate change mitigation  
CCA: climate change adaptation and resilience  
BIO: biodiversity  
ENV: environment  
SOC: social

- \* Intervention field with gender equality as a principal objective ('gender equality score 2')
- \*\* Where appropriate, a more specific intervention field may be assigned if additional information becomes available with the implementation of the activity
- \*\*\* This indicator may also be disaggregated by income level (bottom (poorest) 40%/others) for programmes implemented outside of the EU

## ANNEX II

### List of codes for the territorial dimension

#### Part 1: CODES FOR THE TERRITORY TYPE DIMENSION (I)

01	Urban areas
02	Rural areas
03	Other types of territories targeted
04	No territorial targeting

#### Part 1a: CODES FOR THE TERRITORY TYPE DIMENSION (Ia)

01	Areas affected by industrial transition
02	Islands and coastal areas
03	Mountainous areas

#### Part 2: CODES FOR THE TERRITORY TYPE DIMENSION (II)

01	Outermost regions
02	Small Aegean Islands
03	Eastern border region
04	Northern sparsely populated areas

#### Part 3: CODES FOR THE TERRITORIAL INITIATIVE AND LOCAL COOPERATION DIMENSION

01	Integrated territorial and urban development
02	Community-led local development including LEADER
03	Other territorial tools

#### Part 4: LOCATION

XX	Code of region or area where the measure or the operation is located or carried out, as set out in the common classification of territorial units for statistics (NUTS) provided in Annex I to Regulation (EC) No 1059/2003.
----	--

## [ANNEX III

### **Specific climate and environment spending targets**

The following programmes and instruments are expected to contribute at least the following percentages of their overall financial envelope to climate and environmental objectives:

- (1) National and Regional Partnership Plans: 43%
  - (2) European Competitiveness Fund: 43%
  - (3) Framework programme for research and innovation: 40%
  - (4) Connecting Europe Facility: 70%
  - (5) Global Europe Instrument: 30%]
-

## ANNEX IV

### List of programmes mainstreaming gender equality

- (1) European Fund for economic, social and territorial cohesion, agriculture and rural, fisheries and maritime, prosperity and security
  - (2) European Competitiveness Fund
  - (3) Framework programme for research and innovation
  - (4) Global Europe Instrument
  - (5) Erasmus+
  - (6) AgoraEU
  - (7) Union Civil Protection Mechanism
  - (8) Justice programme
  - (9) Aid Programme for the Turkish Cypriot community
  - (10) Overseas Countries and Territories (including Greenland)
-

## ANNEX V

### Information, communication and visibility

- (1) The use and technical characteristics of the emblem of the Union ('the emblem') and the funding statement:
  - (a) The emblem and the funding statement shall be prominently displayed on all information, communication and visibility activities addressed to the public related to the implementation of Union-supported actions. This includes, in particular, media relations, conferences, seminars, and information materials such as brochures, leaflets, posters, banners, presentations and merchandise, as well as digital products, websites (including mobile views), and traditional or social media platforms. The emblem and the funding statement on infrastructures, vehicles, supplies and equipment purchased in the framework of EU-(co) funded actions shall be clearly displayed if accessible and visible to the public, in a proportionate manner, taking into account the size and visibility of the operation. In the case of formats that do not allow visual display (audio formats) and in justified cases, such display may be replaced by the statement "Co-funded by the European Union" or "Funded by the European Union".
  - (b) The funding statement "Co-funded by the European Union" or "Funded by the European Union" shall always be spelled out in full and placed together with the emblem. It shall be translated into local languages. In agreement with the Commission, the funding statement may be replaced with the words 'European Union'. This simplified statement shall be written out in full and be translated into local languages.
  - (c) For partners implementing external actions, the funding statement shall be replaced with the statement 'In partnership with the European Union', written out in full and placed together with the emblem. It shall be translated into local languages.
  - (d) The typeface to be used in conjunction with the emblem shall be simple and easily readable. The recommended typeface is Arial.
  - (e) Underlining and use of other font effects is not allowed.

- (f) The positioning of the text in relation to the emblem shall not interfere with the emblem.
- (g) The colour of the font shall be the blue colour of the European flag (Reflex Blue<sup>18</sup>), white or black depending on the background.
- (h) The font size used shall be proportionate to the size of the emblem.
- (i) Sufficient contrast shall be ensured between the emblem and the background. If there is no alternative to a coloured background, a white border shall be placed around the flag, with a width equal to one 25th of the height of the rectangle.
- (j) For reasons of integrity and visibility, the emblem in addition with the funding statement shall always be surrounded by a clear space or ‘protection area’, which no other element (text, image, drawing, figure, etc.) can infringe upon. The emblem shall have at least the same size, measured in height or width, as the biggest of the other logos.
- (k) The graphic elements of the emblem shall be compliant with the graphics guide to the European emblem in Annex A1 to the Interinstitutional Style Guide<sup>19</sup>.
- (l) Examples of the emblem including the funding statement:

**Funded by  
the European Union**

**Funded by  
the European Union**

**Funded by  
the European Union**

<sup>18</sup> Pantone reference, in four-colours process: C:100%, M:80%, Y:0%, K:0%, digital colours process: R:0%, G:51%, B:153%, Hexadecimal: #003399.

**Co-funded by  
the European Union**

**Co-funded by  
the European Union**

**Co-funded by  
the European Union**

(m) Examples of the simplified European Union statement:

**European  
Union**

**European Union**

EUROPEAN UNION

(n) Examples of the partnership statement for external actions funded by the Union:

**In partnership with  
the European Union**

**In partnership with  
the European Union**

**In partnership with  
the European Union**

- (2) The principles for the use of the emblem by third parties are set out in the administrative agreement with the Council of Europe regarding the use of the European emblem by third parties<sup>20</sup>.
- (3) The Member States shall ensure that communication and visibility material, including at the level of beneficiaries, is made available upon request to Union institutions, bodies, offices or agencies. They shall also ensure that the Union is granted a royalty-free, non-exclusive and irrevocable license to use such material and any pre-existing rights attached to it for promotional, non-commercial use, including at least the following rights:
- (a) internal use i.e. the right to reproduce, copy and make available the communication and visibility materials to Union's institutions and agencies, Member States' authorities, and their employees;
  - (b) reproduction of the communication and visibility materials by any means and in any form, in whole or in part;
  - (c) communication to the public of the communication and visibility materials by using any and all means of communication;
  - (d) distribution to the public of the communication and visibility materials (or copies thereof) in any and all forms;
  - (e) storage and archiving of the communication and visibility materials;
  - (f) sub-licensing of the rights on the communication and visibility materials to third parties;
  - (g) compliance with the applicable copyright rules.

Compliance with the obligations referred to in the first subparagraph shall not require significant additional costs or a significant administrative burden for the beneficiaries or for the Member States.

---

<sup>20</sup> [OJ C 271, 8.9.2012, p. 5.](#)

- (4) The Commission may provide communication templates and further guidance to support beneficiaries, in line with the principles of simplification and proportionality. Partners implementing EU-funded external actions under Global Gateway shall follow the specific guidelines.
-
