Subject: Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND  
OF THE COUNCIL on ensuring a level playing field for sustainable air  
transport  
– 4 column document

---

In preparation to the Aviation Working Party of 24 November 2022, delegations will find in annex I the four-column document of the abovementioned proposal.

Boxes highlighted in green indicate boxes containing identical text for the EP and the Council. Text highlighted in green indicates tentative agreement of the EP to the proposal.

Following the trilogue of 13 October, further compromises and comments are added in the fourth column. Changes in the fourth column are highlighted in comparison to the Presidency compromise in document **ST 11503/22 REV 3**. These are highlighted in **bold** for the additions and ~~striketrough~~ for the deletions.

**Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on  
ensuring a level playing field for sustainable air transport (Text with EEA relevance)**

		<p>international aviation market, that could lead to the loss of traffic flows connecting through EU airports and to carbon leakage and in order to create a global market of sustainable aviation fuels, the Union external aviation policy should take a global lead in the shift towards the use of sustainable fuels, engage in international negotiations to harmonise definitions and standards of sustainable air fuels and promote international convergence on the rules concerning the production, uptake and uplift of sustainable aviation fuels. It is therefore important that the Union sustains its efforts at ICAO and strives for an ambitious global system that promotes a global market for sustainable aviation fuels and provides for an international level playing field. The Commission and Member States should therefore advocate at the ICAO General Assembly to immediately start negotiations for an ambitious global policy framework at ICAO level for the uptake of sustainable aviation</p>		

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
		<p>fuels. Once such a global policy framework is adopted, the Commission should ensure that the provisions of this Regulation are compatible, consistent and complementary to the global framework and the international standards, thereby securing a coherent implementation and a level playing field at international level. In addition, the Commission and Member States should aim to ensure that comprehensive multilateral and bilateral air transport and air services agreements integrate equivalent, binding provisions on a blending mandate for the uptake of sustainable aviation fuels. Furthermore, the Commission should regularly assess whether the provisions of this Regulation have an adverse effect on the functioning of the internal market in aviation, the sector's competitiveness, the international level playing field with regards to air carriers and airport hubs and possible re-routing leading to carbon leakage and, where appropriate, present remedies to address these adverse effects.</p>

			<p>produced from feedstock listed in Directive (EU) 2018/2001 with the exception of biofuels produced from ‘food and feed crops’ as defined in Article 2, second paragraph, point 40 of that Directive, and determined in line with the methodology set out under Delegated Act [XXX].</p> <p>Synthetic low-carbon fuels for aviation achieving similar high greenhouse gas reductions as renewable fuels on non-biological origin should also be included in the scope of this Regulation.</p>	
Recital 16a				
26a			<p>(16a) Given their use for cosmetics and animal feed, biofuels other than advanced biofuels as defined in Article 2, second paragraph, point 34 of Directive (EU) 2018/2001 and other than biofuels produced from the feedstock listed in Part B of Annex IX to that Directive supplied across Union airports by each fuel supplier should account for a maximum of 3 % for the purposes of complying with the minimum shares of</p>	

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
			SAF to be supplied at each Union airports under this Regulation.	
Recital 16a				
26b		(16a) It is essential that the pool of eligible sustainable feedstock be as inclusive as possible, in order to maximise the potential for scaling up the production of sustainable aviation fuels at affordable costs. The list of feedstock eligible under the present Regulation should not be static but evolving over time to include new sustainable feedstock. For that purpose, in line with article 28(6) of Directive (EU) 2018/2001, the Commission should review at least every two years the list of feedstock set out in Parts A and B of Annex IX with a view to adding new feedstock. New feedstock added to Annex IX should become directly eligible for production of sustainable aviation fuels under the present Regulation		
Recital 17				

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
27	<p>(17) For sustainability reasons, feed and food crop-based fuels should not be eligible. In particular, indirect land-use change occurs when the cultivation of crops for biofuels displaces traditional production of crops for food and feed purposes. Such additional demand increases the pressure on land and can lead to the extension of agricultural land into areas with high-carbon stock, such as forests, wetlands and peatland, causing additional greenhouse gas emissions and loss of biodiversity concerns. Research has shown that the scale of the effect depends on a variety of factors, including the type of feedstock used for fuel production, the level of additional demand for feedstock triggered by the use of biofuels and the extent to which land with high-carbon stock is protected worldwide. The highest risks of indirect land-use change have been identified for biofuels, fuels produced from feedstock for which a significant expansion of the production area into land with high-carbon stock is observed. Accordingly, feed and food crop-</p>	<p>(17) For sustainability reasons, feed and food crop-based fuels, <b>including high indirect land-use change risk biofuels such as those derived from palm oil</b>, should not be eligible. 	<b>Commission Proposal</b>	<b>EP Mandate</b>	<b>Council Mandate</b>	<b>11503/22 REV 4</b>
	<p>based fuels should not be promoted. This approach is in line with Union policy and in particular with Directive (EU) 2018/2001 which limits and sets a cap on the use of such biofuels in road and rail transport, considering their lower environmental benefits, lower performance in terms of greenhouse reduction potential and broader sustainability concerns. In addition to the greenhouse gas emissions linked to indirect land-use change – which is capable of negating some or all greenhouse gas emissions savings of individual biofuels – indirect land-use change poses risks also to biodiversity. This risk is particularly serious in connection with a potentially large expansion of production determined by a significant increase in demand. The aviation sector has currently insignificant levels of demand for food and feed crops-based biofuels, since over 99% of currently used aviation fuels are of fossil origin. It is therefore appropriate to avoid the creation of a potentially large demand of food and feed crops-based biofuels by promoting their use under this</p>	<p>the production area into land with high-carbon stock is observed. 	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
	<p>innovative with growth potential to meet future needs fuel technologies, this Regulation should set out gradually increasing minimum shares of synthetic aviation fuels over time. Setting out a dedicated sub-obligation on synthetic aviation fuels is necessary in view of the significant decarbonisation potential of such fuels, and in view of their current estimated production costs. When produced from renewable electricity and carbon captured directly from the air, synthetic aviation fuels can achieve as high as 100% emissions savings compared to conventional aviation fuel. They also have notable advantages compared to other types of sustainable aviation fuels with regards to resource efficiency (in particular for water needs) of the production process. However, synthetic aviation fuels' production costs are currently estimated at 3 to 6 times higher than the market price of conventional aviation fuel. Therefore, this Regulation should establish a dedicated sub-obligation for this technology. Other types of synthetic fuels,</p>	<p><b>regions. This would undermine the ability of aircraft operators in these regions to decarbonise, and unfairly increase the cost to those aircraft operators of compliance notably with the EU ETS, leading to market distortions and an overall competitive disadvantage. Therefore, common EU-level target setting for the overall production and for the uptake of sustainable aviation fuels should be set. This Regulation</b> supersedes any requirements established directly or indirectly at national or regional level requiring aircraft operators or aviation fuel suppliers to uptake or supply sustainable aviation fuels with different targets than the ones prescribed under this Regulation. In order to create a clear and predictable legal framework and in doing so encourage the market development and deployment of the most sustainable and innovative with growth potential to meet future needs fuel technologies, this Regulation should set out gradually increasing minimum shares of synthetic aviation fuels over time. Setting</p>	<p>and deployment of the most sustainable and innovative with growth potential to meet future needs fuel technologies, this Regulation should set out gradually increasing minimum shares of <b>SAF, including of</b> synthetic aviation fuels over time. Setting out a dedicated sub-obligation on synthetic aviation fuels is necessary in view of the significant decarbonisation potential of such fuels, and in view of their current estimated production costs. When produced from renewable electricity and carbon captured directly from the air, synthetic aviation fuels can achieve as high as 100% emissions savings compared to conventional aviation fuel. 	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
		<p>become defined under the Renewable Energy Directive.  <b>Furthermore, synthetic aviation fuels with CO<sub>2</sub> derived from direct air capture (DAC) can play an important role due to their ability to sustainably source carbon and should be further promoted.</b></p>		
Recital 19a				
29a		<p><b>(19a) The availability of feedstock and the production capacity of sustainable aviation fuel are not unlimited. An intensified competition for limited feedstock could lead to shortages of supply and market distortions and thereby negatively affect the competitiveness of the aviation sector as a whole. In order to ensure a level playing field and avoid a fragmentation of the internal market, harmonised requirements should apply across the Union about the minimum shares of SAF uptake. However, while ensuring the achievement of these EU harmonised volume shares in accordance with Annex I,</b></p>		

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
		<p><b>Member States may take national measures, supportive policies and initiatives aiming at increasing the level of production and uptake of sustainable aviation fuels, including synthetic aviation fuels, on their territory, for instance by providing financial support. Such national actions should be transparent, non-discriminatory, proportionate and of a general nature open to all enterprises. Furthermore, as this Regulation does not define a maximum share of sustainable aviation fuels, airlines and fuel suppliers may pursue more ambitious environmental policies with higher sustainable aviation fuels uptake and supply in their overall network of operations, while avoiding fuel tankering. To this end, airlines and fuel suppliers could, by means of contractual arrangements, agree on mutual commitments to produce, supply and purchase predetermined quantities of sustainable aviation fuels, including those exceeding the minimum volume shares set out in Annex I. Such contractual</b></p>		

	<b>Commission Proposal</b>	<b>EP Mandate</b>	<b>Council Mandate</b>	<b>11503/22 REV 4</b>
		arrangements may also cover liability and establish conditions for financial compensation in cases of non-delivery.		
Recital 19b				
29b		(19b) Consumer demand can play an important role in the development towards a more sustainable aviation. However, for consumers to be able to make an informed choice, more robust, reliable, independent and harmonised information is needed on the environmental impact of flights, in line with the Sustainable and Smart Mobility Strategy Action Plan. To this end, a comprehensive Union labelling system for the environmental performance of aviation should be established that can provide users of aviation services clear, transparent, comprehensive, user-friendly and easily understandable information about the environmental performance of aviation. This will drive consumers' choices and further promote the use of sustainable aviation fuels and		

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
		<p><b>other sustainability measures by aircraft operators. The European Union Aviation Safety Agency (EASA) is already responsible for environmental certification of aircraft and has been working together with stakeholders to develop an environmental labelling system for aviation that covers aircraft, aircraft operators and commercial flights. EASA should be tasked with the further development, implementation and functioning of such system to ensure independence, technical robustness and synergies with other EU measures.</b></p>

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
	(c) From 1 January 2035, a minimum share of 20% of SAF, of which a minimum share of 5% of synthetic aviation fuels;	(c) From 1 January 2035, a minimum share of 20% of SAF, of which a minimum share of 5% of synthetic aviation fuels;	(c) From 1 January 2035, a minimum share of 20% of SAF, of which a minimum share of 5% of synthetic aviation fuels;	(c) From 1 January 2035, a minimum share of 20% of SAF, of which a minimum share of 5% of synthetic aviation fuels;
	Annex I volume shares, point (d)			
R 134	(d) From 1 January 2040, a minimum share of 32% of SAF, of which a minimum share of 8% of synthetic aviation fuels;	(d) From 1 January 2040, a minimum share of <del>32%</del> <b>37%</b> of SAF, of which a minimum share of <del>8%</del> <b>13%</b> of synthetic aviation fuels;	(d) From 1 January 2040, a minimum share of 32% of SAF, of which a minimum share of 8% of synthetic aviation fuels;	
	Annex I volume shares, point (e)			
R 135	(e) From 1 January 2045, a minimum volume share of 38% of SAF, of which a minimum share of 11% of synthetic aviation fuels.	(e) From 1 January 2045, a minimum volume share of <del>38%</del> of <b>54%</b> SAF, of which a minimum share of <del>11%</del> <b>27%</b> of synthetic aviation fuels.	(e) From 1 January 2045, a minimum volume share of 38% of SAF, of which a minimum share of 11% of synthetic aviation fuels;	
	Annex I volume shares, point (f)			
R 136	(f) From 1 January 2050, a minimum volume share of 63% of SAF, of which a minimum share of 28% of synthetic aviation fuels	(f) From 1 January 2050, a minimum volume share of <del>63%</del> <b>85%</b> of SAF, of which a minimum share of <del>28%</del> <b>50%</b> of synthetic aviation fuels.	(f) From 1 January 2050, a minimum volume share of 63% of SAF, of which a minimum share of 28% of synthetic aviation fuels.	
	Annex II – Template for aircraft operator reporting, Table 1, Column 1, Row 1			

	Commission Proposal	EP Mandate	Council Mandate	11503/22 REV 4
G	137	Union airport	Union airport	Union airport
Annex II – Template for aircraft operator reporting, Table 1, Column 2, Row 1				
G	138	ICAO code of Union airport	ICAO code of Union airport	ICAO code of Union airport
Annex II – Template for aircraft operator reporting, Table 1, Column 3, Row 1				
Y	139	Yearly aviation fuel required (tonnes)	Yearly aviation fuel required (tonnes of kerosene equivalent)	Yearly aviation fuel required (tonnes)  Propose CGA
Annex II – Template for aircraft operator reporting, Table 1, Column 4, Row 1				
Y	140	Actual aviation fuel uplifted (tonnes)	Actual aviation fuel uplifted (tonnes of kerosene equivalent)	Actual aviation fuel uplifted (tonnes)  Propose CGA
Annex II – Template for aircraft operator reporting, Table 1, Column 5, Row 1				
Y	141	Yearly non-tanked quantity (tonnes)	Yearly non-tanked quantity (tonnes of kerosene equivalent)	Yearly non-tanked quantity (tonnes)  Propose CGA
Annex II – Template for aircraft operator reporting, Table 1, Column 6, Row 1				

	<b>Commission Proposal</b>	<b>EP Mandate</b>	<b>Council Mandate</b>	<b>11503/22 REV 4</b>
142	Total yearly non-tanked quantity (tonnes)	Total yearly non-tanked quantity (tonnes <b>of kerosene equivalent</b> )	Total yearly non-tanked quantity (tonnes)	<b>Total yearly non-tanked quantity (tonnes)</b>  Propose CGA
Annex II – Template for aircraft operator reporting, point (1)				
142a				<b>Yearly tanked quantity for fuel safety rules (tonnes)</b>  New proposal in line with line 70 and 70a.

Annex II – Template 2				
142a		<u>Template 2</u>	Template for aircraft operator reporting on purchases of SAF	A EP tentatively agrees
142b		<u>Fuel supplier</u>	Fuel supplier	
142c		<u>Amount purchased (tonnes of kerosene equivalent)</u>	Amount purchased (tonnes)	A [Note: see WK 13025/22.]
142d		<u>Conversion technology</u>	Conversion technology	Proposal : Conversion process EP tentatively agrees
142e		<u>Characteristics</u>	Characteristics	
142f		<u>Origin of feedstock</u>	Origin of feedstock	
142g		<u>Lifecycle emissions</u>	Lifecycle emissions
