Agreement on Government Procurement**

COMMISSION STAFF WORKING DOCUMENT

The EU Statistical Report for 2023-2024 on public procurement according to the WTO Agreement on Government Procurement

This is the EU statistical report for 2023-2024 for submission to the WTO Government Procurement Agreement (GPA) Committee. For the purpose of this report, and with the aim of increasing transparency by making comprehensive use of electronic formats, the EU submits the report under Article XVI, paragraph 5 of the Revised GPA.

This report provides context and complementary information on the published datasets on European public procurement extracted from Tenders Electronic Daily (TED), the online version of the 'Supplement to the Official Journal' of the EU and the Public Procurement Data Space (PPDS).

The EU considers that statistical reports are a crucial element of GPA notification policy and of monitoring the Agreement.

Both the TED, the PPDS datasets and the EU's estimates refer to all administrative levels covered by the GPA.

1. Datasets and key figures

The datasets on GPA covered contract award notices registered on the Tenders Electronic Daily platform and Public Procurement Data Space are available under the following links:

- GROW – contract award notices 2023-2024:
https://single-market-economy.ec.europa.eu/single-market/public-procurement/international-public-procurement_en

These datasets contain variables that enable the identification of contract award notices covered by the GPA for 2023-2024.

In the .csv file, one compound variable groups all the information needed to identify the contracts covered by the GPA. This refers to contracts above threshold awarded by contracting authorities/entities, for goods, services and works covered by the EU's GPA schedule. This category also includes contracts fulfilling these criteria but lacking a contract value or stating in TED an unrealistically low contract value, below EUR 4500.

A more detailed methodological note can be downloaded at:

[TED advanced notes on methodology.pdf \(europa.eu\)](#)

There is also an API for data re-users:

<https://docs.ted.europa.eu/api/latest/index.html>

Based on the dataset referenced above and the methodology described in Section 2, the following table summarises the key figures for 2023-2024, without prejudice to the notes on the EU coverage schedule.

Contracts covered by the GPA

This report presents the value of contracts procured in the EU in 2023-2024.

2023

In 2023, the total value contracted by the 27 Member States of the EU and covered by the GPA was EUR 645.0 billion. In addition, the EU institutions contracted EUR 7.6 billion covered by the GPA. Taken together, the above-threshold contract procurement value covered in 2023 was EUR 652.6 billion. Of the total value of

¹ The European Council, European Commission and the European External Action Service are the only EU institutions that are covered by the GPA.

procurement covered, supplies accounted for EUR 249.8 billion, works for EUR 225.1 billion, and services for EUR 177.7 billion.

The highest share in total value of EU contracts covered by the GPA in 2023 was procured by Annex 2 sub-central entities: EUR 382.6 billion. Central government entities (EU entities and central government authorities of EU Member States) contracted EUR 123.7 billion covered by the GPA, and other entities under Annex 3 in the covered sectors contracted EUR 146.3 billion. In terms of procurement method, 72.35% of the contracts were procured using an open tendering method 21.11% of the contracts were procured through a selective tendering method, and 5.78% of the contracts were procured using a limited tendering method. A small share of 0.76% was not defined.

2024

In 2024, the total value contracted by the 27 Member States of the EU and covered by the GPA was EUR 659.7 billion. In addition, the EU institutions contracted EUR 4.6 billion covered by the GPA. Taken together, the above-threshold contract procurement value covered in 2022 was EUR 664.3 billion. Of the total value of procurement covered, supplies accounted for EUR 239.6 billion, works for EUR 238.5 billion, and services for EUR 186.2 billion.

Also in 2024, the highest share in value of EU contracts covered by GPA was procured by Annex 2 entities: EUR 383.7 billion. Central government entities contracted EUR 106.1 billion covered by the GPA, and other entities under Annex 3 in the covered sectors contracted EUR 174.5 billion. In terms of procurement method, 66.65% of the contracts were procured using an open tendering method 22.51% of the contracts were procured through a selective tendering method, and 7.23% of the contracts were procured using a limited tendering method. A share of 3.60% was not defined.

2. Methodological issues for the estimated values

The EU's objective is to continuously improve the accurateness and reliability of the data. Although TED and PPDS provide reliable data in terms of the number of contracts recorded, some challenges remain regarding the reporting of contract values. While it is the responsibility of each individual contracting authority to correctly fill in the value of all contracts in TED, the European Commission and the Member States are working on several action points to remedy if necessary, and the quality of the data has and continues to be steadily improved.

2023-2024

The data for 2023 and 2024 bring in a few methodological changes for estimating procurement values. The following improvements were made in the TED 2023 and 2024 contract award notice datasets:

- The methodology was adapted to the new Public Procurement Data Space (PPDS), which became the sole source in 2024, with 2023 using both TED

and PPDS. This also accounts for the introduction of eForms (mandatory from October 2023) replacing the former TED standard forms.

- A new preparatory phase was created to extract and harmonise data from PPDS and TED into a unified Procurement Source Dataset for GPA (PSD-GPA), ensuring comparability across years.
- To address the widespread presence of trailing zeros in CPV codes from PPDS, the methodology introduced a new rule: only CPVs with sufficient detail (up to five digits) are used to determine GPA coverage; overly general CPVs default to “not covered” under a conservative approach.
- Previously, missing values were imputed using median contract values within groups defined by country, contract type, and annex. In 2023–2024, the methodology was enhanced by adding procedure type to the grouping and introducing a robustness requirement of at least 30 contracts per group before imputation.
- The treatment of concessions was already present in 2021–2022 but is now presented in a clearer schema: construction concessions are covered when procured by Annex 1 or 2 entities, while service concessions remain excluded.

3. Description of the annexes to the report

For additional transparency, the EU has generated data tables summarising its calculations based on the methodology including the improvements above. The following data are included:

- **GPA Statistics EU - European Union - Statistics for 2023-2024** - Data for each of the 27 EU Member States and EU institutions for each reporting year (2023-2024) summarising the total GPA covered values and number of above-threshold procurement contracts, broken down by contract type (goods, works, services), GPA coverage, procurement procedure, and GPA Annex.
- **Summary for the GPA Working Programme on Statistics** -Data of GPA covered procurement over 2023 and 2024 in format as agreed in the Work programme on the collection and reporting of statistical data ([GPA/WPS/STAT/33](#))
