For the purposes of this paragraph, works concessions contracts means any contractual agreement the main objective of which is to undertake the construction or rehabilitation of physical infrastructure, plants, buildings, facilities, or other government-owned works and under which a procuring entity grants to a supplier, through a contract and for a specified period of time, the temporary ownership or the right to control, operate and demand payment for the use of those works for the duration of the contract.

Note to Appendix 12-B-6:

For procurement contracts of goods in connection with a contract of construction services, including works concessions contracts, Argentina reserves the right to apply price preferences according to its law for the following goods, expressed in the Harmonized System (HS), for the following transitional periods:

- HS 8410¹ and HS 8504²: from the date of entry into force of this Agreement until the end of the 9th (ninth) year after the date of entry into force; as of the 10th (tenth) year after the date of entry into force of this Agreement no price preference shall be applied; and

GENERAL NOTES

The following general notes apply to Chapter 12:

1. Chapter 12 shall not apply to any form of preference or advantage aimed at SMEs¹. The preference or advantage may include any price preference, the right to improve the original tender, or the exclusive right to provide a good or service. Access to the above-mentioned preferences or advantages will be equally available to enterprises of the European Union registered as micro, small and medium-sized enterprises in Argentina. For greater certainty, enterprises of the European Union can register as micro, small and medium-sized enterprises in Argentina in accordance with the requirements set out in the relevant applicable law.
2. Chapter 12 does not apply to pre-commercial government procurement aimed at promoting the development of innovative solutions for public sector needs. Pre-commercial government procurement includes the product idea, solution design, prototyping, original development and validation or testing of a limited set of first products.

Every 3 (three) years after the date of entry into force of this Agreement, Argentina shall inform the European Union about the pre-commercial government procurement carried out during that period.

¹ For greater certainty, SMEs includes micro, small and medium-sized enterprises and entrepreneurs. Argentina may define the characteristics of the companies that will be considered SMEs taking into account the specificities of the different sizes, sectors and regions of the country and based on one, some or all of the following attributes or their equivalents: employed or occupied personnel, annual sales value and value of assets applied to the production process, amongst others, in accordance with its national legislation. These characteristics shall be defined in Argentina's general laws and regulations and not in any law or regulation which exclusively applies to government procurement.

3. Chapter 12 does not apply to concessions of services.
4. Chapter 12 does not apply to public procurement of goods and services from productive establishments of family farmers or family farmers cooperatives registered in a Family Farmer National Registry carried out by the national government for the provision of food in hospitals, schools, community canteens, institutions under the national penitentiary system, armed forces and other public institutions under the national government.
5. Notwithstanding Article 12.14(5), Argentina may exclude a supplier if:
 - (a) there is a confirmed indictment against the supplier for crimes against property, or against the public administration, or against public trust and good faith, or asset laundering or other financial crimes, or for crimes set out in the Inter-American Convention against Corruption, adopted at the third plenary session, held on March 29, 1996; or
 - (b) the supplier is:
 - (i) an agent or official of Argentinian public sector; or
 - (ii) an enterprise in which such agent or official has sufficient participation so as to control the enterprise's decision-making process.

For greater certainty, in procurements under the public-private partnership regime, the reference to bankruptcy in subparagraph (a) of Article 12.14(5) includes an ongoing insolvency proceeding.

6. Argentina reserves the right to award contracts by means other than open or selective tendering procedures in the following cases:
- (a) procurement undertaken for the repair of machinery, vehicles, equipment or engines whose disarmament, transfer or prior examination is essential to determine the necessary repair and the adoption of another contracting procedure will prove to be more expensive; this exception may not be used for common maintenance repairs of such items;
 - (b) government procurement undertaken between jurisdictions and entities of the national government, or between such jurisdictions and entities and provincial or municipal entities or entities of the Government of the Autonomous City of Buenos Aires, as well as with enterprises in which Argentina has majority participation, provided that the purpose of the procurement is the provision of security, logistics or health services;
 - (c) government procurement undertaken between jurisdictions and entities of the national government and national universities; and
 - (d) for complementary works that are essential for the execution of an ongoing public work (construction services), which could not have been foreseen in the original project and could not be included in the respective contract; the value of the contracts awarded for such complementary works shall not exceed the limits set by Argentina's law, which shall in no case exceed 50 % (fifty percent) of the value of the main contract.
7. Chapter 12 does not apply to government procurement carried out outside the territory of Argentina for consumption outside that territory.

8. Notwithstanding Article 12.11 (Offsets), when the entities listed in Appendix 12-B-1 carry out government procurement covered by Chapter 12, Argentina may seek or impose, in accordance with its law, any type of offset for up to 50 % (fifty percent) of the value of the procurement, including that the awarded supplier purchases local goods and services related to the object of the procurement.

From the 11th (eleventh) year to the end of the 15th (fifteenth) year after the date of entry into force of this Agreement, Argentina may only seek or impose offsets for up to 35 % (thirty five percent) of the value of the procurement.

The limitations set out in the first and second subparagraphs of this paragraph shall not apply to procurements undertaken by the Ministerio de seguridad or the Ministerio de defensa.

From the 16th (sixteenth) year after the date of entry into force of this Agreement offsets shall not exceed 20% (twenty percent) of the value of the procurement.

Offsets shall be indicated in the notice of intended procurement, shall be specified in the tender documentation and shall be applied in the same manner among all participating suppliers.

Every 3 (three) years from the date of entry into force of this Agreement, Argentina shall inform the European Union about the use of offsets carried out during that period.

9. Notwithstanding Article 12.13(1), for procurement entities covered under Appendix 12-B-1, Argentina may apply a transitional period of up to 18 (eighteen) months from the date of entry into force of this Agreement. Those entities shall, during such transitional period, provide their notices of intended procurement through links in a gateway electronic site that is accessible free of charge.

THRESHOLDS ADJUSTMENT FORMULA

For the European Union:

- (a) The threshold shall be adjusted at 2 (two)-year intervals with each adjustment taking effect on 1 January;
- (b) The calculation of the values of thresholds shall be based on the average of the daily values of the special drawing rights (hereinafter referred to as "SDRs") to Euro exchange rate over the 24 (twenty-four) months terminating on 31 August preceding the revision with effect as of 1 January. The value of the thresholds thus revised shall, if necessary, be rounded down to the nearest thousand Euros. The data source for the exchange rate is the International Monetary Fund (hereinafter referred to as "IMF"); and
- (c) The value of the newly calculated thresholds shall be made publicly available by the European Union before the respective thresholds take effect.

For Signatory MERCOSUR States:

- (a) Each Signatory MERCOSUR State shall calculate and convert the value of the thresholds into its national currency, using the conversion rates of the IMF. The conversion rates shall be the average of the values of their respective national currencies in terms of the SDR published by the IMF in its monthly "International Financial Statistics", over the 2 (two)-year period preceding 1 October of the year prior to the thresholds becoming effective. The converted thresholds shall apply as of 1 January of the following year and shall be fixed for 1 (one) year; and

- (b) The value of the newly calculated thresholds shall be made publicly available by each of the Signatory MERCOSUR States, in its national currency, before the respective thresholds take effect.
