MAIN TEXT.

EXISTING MEASURES

EXPLANATORY NOTES

1. The List of a Party to this Annex sets out, pursuant to Articles 10.12 (Non-Conforming Measures and Exceptions) and 11.8 (Non-Conforming Measures and Exceptions), the existing measures of that Party that do not conform to the obligations set out in the following provisions:

- (a) 10.7 (National Treatment), 11.6 (National Treatment);
- (b) 10.8 (Most-Favoured-Nation Treatment), 11.7 (Most-Favoured-Nation Treatment);
- (c) 10.9 (Performance Requirements);
- (d) 10.10 (Senior Management and Board of Directors); or
- (e) 11.5 (Local Presence).

2. For the purposes of this Annex:

- (a) "CMAP" means Mexican Classification of Activities and Products (Clasificación Mexicana de Actividades y Productos) numbers as set out by the National Institute for Statistics and Geography (Instituto Nacional de Estadística y Geografía), in the Mexican Classification of Activities and Products (Clasificación Mexicana de Actividades y Productos), 1994;
- (b) "CPC" means Central Product Classification numbers as set out in Statistical Office of the United Nations, Statistical Papers, Series M, No. 77, Provisional Central Product Classification, 1991; and
- (c) "ISIC" means the International Standard Industrial Classification of all Economic Activities numbers as set out in Statistical Office of the United Nations, Statistical Papers, Series M, No. 4, ISIC REV 3.1, 2002.

3. The List of a Party is without prejudice to the rights and obligations of the Parties under GATS.

4. Each entry in the List sets out the following elements:

- (a) "sector" refers to the general sector in which the entry is made;
- (b) "subsector" refers to the specific sector in which the entry is made;

- (c) "industry classification" refers to, if applicable, the activity covered by the non-conforming measure according to CMAP, CPC or ISIC;
- (d) "obligations concerned" specifies the obligations referred to in paragraph 1 that, pursuant to Articles 10.12 (Non-Conforming Measures and Exceptions) and 11.8 (Non-Conforming Measures and Exceptions), do not apply to the measures listed in the entry;
- (e) "level of Government" indicates the level of government maintaining the specified measures;
- (f) "measures" identifies the laws, regulations or other measures, as qualified, where indicated, by the "description" element, for which the entry is made; a measure cited in the "measures" element:
 - (i) means the measure as amended, continued or renewed as of the date of entry into force of this Agreement;
 - (ii) includes any subordinate measure adopted or maintained under the authority of and consistent with the measure; and
 - (iii) includes, for the European Union directives, any laws, regulations or other measures which implement the relevant directive at Member State level; and

(g) "description" either sets out the non-conforming aspects of the existing measure or provides a general non-binding description of the measure for which the entry is made.

5. In the interpretation of an entry, all elements of that entry shall be considered. An entry shall be interpreted in light of the Articles to which the "Obligations Concerned" in that entry refer.

6. The "measure" element prevails over other elements, unless a discrepancy between the "measure" element and the other elements considered in their totality is so substantial and material that it would be unreasonable to conclude that the "measure" element prevails, in which case the other elements prevail to the extent of that discrepancy.

7. A reservation maintained at the level of the European Union applies to a measure of the European Union and of a Member State at the national level as well as to a measure of a government within a Member State, unless the reservation excludes a Member State.

8. A reservation maintained at the national level of Mexico or of a Member State applies to a measure of a government at the central, regional or local level within that country.

9. Articles 11.5 (Local Presence) and 11.6 (National Treatment) are separate disciplines and a measure that does not conform to Article 11.5 (Local Presence) exclusively, needs not be reserved against Article 11.6 (National Treatment).

10. If a Party maintains a measure that requires a service supplier to be a natural person, citizen, permanent resident, or resident of its territory or to be domiciled in it as a condition to the provision of a service in its territory, a reservation for that measure taken with respect to an obligation referred to in paragraph 1 in relation to Chapter 11 (Cross-Border Trade in Services) shall operate as a reservation with respect to an obligation referred to in paragraph 1 in relation to Chapter 10 (Investment Liberalisation), to the extent of that measure.

11. The List of a Party does not include measures relating to qualification requirements and procedures, technical standards and licensing requirements and procedures that do not constitute a national treatment limitation within the meaning of Article 10.7 (National Treatment) or 11.6 (National Treatment), or a market access limitation within the meaning of Article 10.6 (Market Access) or 11.4 (Market Access). Those measures, such as the requirement to obtain a licence, universal service obligations, the requirement to have recognised qualifications in regulated sectors, the requirement to pass specific examinations which may include language examinations, and any non-discriminatory requirements that certain activities shall not be carried out in protected zones or areas, even if not listed, apply in any case.

With respect to Investment Liberalisation –National Treatment, Most-Favoured-Nation Treatment:

In CY: The Council of Ministers may refuse to allow access to and exercise of the activities of prospecting, exploration and exploitation of hydrocarbons to any entity which is effectively controlled by Mexico or by nationals of Mexico or third country nationals. No entity may, after the granting of an authorisation for the prospecting, exploration and production of hydrocarbons, come under the direct or indirect control of Mexico or a national of Mexico without the prior approval of the Council of Ministers. The Council of Ministers may refuse to grant an authorisation for the prospecting, exploration and production of hydrocarbons to an entity which is effectively controlled by Mexico or a third country or by a national of Mexico or a third country, if Mexico or the third country does not grant entities of CY or entities of Member States, in relation to the access to and exercise of the activities of prospecting, exploring for and exploiting hydrocarbons, treatment comparable to that which CY or the Member State grants entities of Mexico or that third country (ISIC 1110).

With respect to Investment Liberalisation – National Treatment, Most-Favoured-Nation Treatment; and Cross-Border Trade in Services – Local Presence:

In SI: The exploration for and exploitation of mineral resources, including regulated mining services, are subject to establishment in or citizenship of the EEA, the Swiss Confederation or an Organisation for Economic Co-operation and Development (OECD) member, or of a third country on condition of reciprocity. Compliance with the condition of reciprocity is verified by the Ministry responsible for mining (ISIC 10, 11, 12, 13, 14, CPC 883, 8675).

With respect to Investment Liberalisation – National Treatment:

In NL: The exploration for and exploitation of hydrocarbons in NL is always performed jointly by a private company and the public (limited) company designated by the Minister of Economic Affairs. Articles 81 and 82 of the Mining Act stipulate that all shares in this designated company must be directly or indirectly held by the Dutch State (ISIC rev 3.1 10, 3.1 11, 3.1 12, 3.1 13, 3.1 14).

With respect to Cross-Border Trade in Services – Local presence:

In SK: For mining, activities related to mining and geological activity, incorporation in a Member State of the EU or of the EEA is required (no branching). Mining and prospecting activities covered by Act of the Slovak Republic 44/1988 on protection and exploitation of natural resources are regulated on a non-discriminatory basis, including through public policy measures seeking to ensure the conservation and protection of natural resources and the environment such as the authorisation or prohibition of certain mining technologies. For greater certainty, those measures include the prohibition of the use of cyanide leaching in the treatment or refining of minerals, the requirement of a specific authorisation in the case of fracking for activities of prospecting, exploration or extraction of oil and gas, as well as prior approval by local referendum in the case of nuclear or radioactive mineral resources. This does not increase the non-conforming aspects of the existing measure for which the reservation is taken (ISIC 10, 11, 12, 13, 14, CPC 5115, 7131, 883 and 8675).

Description: Investment Liberalisation

Foreign nationals or foreign enterprises may not acquire property rights (*dominio directo*) over land and water in a 100-kilometre strip along the country's borders or in a 50-kilometre strip inland from its coasts (Restricted Zone).

Mexican enterprises without a foreigners exclusion clause may acquire property rights (*dominio directo*) over real estate located in the Restricted Zone, used for non-residential purposes. Notice of the acquisition shall be given to the Ministry of Foreign Affairs (Secretaría de Relaciones Exteriores), (hereinafter referred to as "SRE") within 60 business days following the date of acquisition.

Mexican enterprises without a foreigners exclusion clause may not acquire property rights (*dominio directo*) over real estate located in the Restricted Zone, used for residential purposes.

Pursuant to the procedure described below, Mexican enterprises without a foreigners exclusion clause may acquire rights for the use and enjoyment over real estate in the Restricted Zone, used for residential purposes. That procedure shall also apply when foreign nationals or foreign enterprises seek to acquire rights for the use and enjoyment over real estate in the Restricted Zone regardless of the purpose for which the real estate is used.

A permit from the SRE is required for credit institutions to acquire, as trustees, rights to real estate located in the Restricted Zone, when the purpose of the trust is to allow the use and enjoyment of that real estate, without granting real property rights thereof, and the trust beneficiaries are the Mexican enterprises without a foreigners exclusion clause, or the foreign nationals or foreign enterprises referred to above.

The terms "use" and "enjoyment" of the real estate located in the Restricted Zone mean the rights to use and enjoy that real estate, including, as applicable, obtaining benefits, products and, in general, any yield resulting from lucrative operation and exploitation through third parties or through the credit institutions acting as trustees.

The duration of the trust referred to in this entry shall be for a maximum period of 50 years, which may be renewed on request by the interested party.

The SRE may verify at any time the compliance with the conditions under which the permits referred to in this entry are granted, as well as the submission and veracity of the notices mentioned above.

The SRE shall decide on the permits, considering the economic and social benefits that these operations could have on the Nation.

Foreign nationals or foreign enterprises seeking to acquire real estate outside the Restricted Zone shall previously submit to the SRE a statement agreeing to consider themselves Mexican nationals for the above mentioned purposes, and waiving the right to invoke the protection of their governments with respect to that real estate.

Description:

Investment Liberalisation and Cross-Border Trade in Services

The Nation has the direct, inalienable and imprescriptible ownership of all hydrocarbons in the subsoil of its territory, including the continental shelf and the exclusive economic zone located outside the territorial sea and adjacent thereto, in strata or deposits, regardless of their physical conditions. Only the Nation shall conduct the exploration and production of hydrocarbons, through entitlements or contracts. The exploration and production contracts shall invariably stipulate that the hydrocarbons in the subsoil are property of the Nation.

The SENER may award entitlements to PEMEX for the exploration and production of hydrocarbons.

In order to perform the activities related to the entitlements for self-development, PEMEX shall only execute service contracts with private parties. For the activities related to the entitlements for mixed development, PEMEX shall execute mixed contracts with private parties, with a percentage of participation interest of PEMEX of no less than forty percent.

The SENER shall establish the appropriate contract model for each contractual area that undergoes a bidding process and is awarded in accordance with the law; for which it may choose among other contracting models such as services, profit-sharing, production-sharing or licenses. For contracts of exploration and production, PEMEX may enter into alliances or associations to participate in bidding processes, but it may not enter into public-private partnership contracts with private parties.

The SENER may establish a direct participation for PEMEX in the contracts for exploration and production of hydrocarbons. The SENER shall establish a mandatory participation of PEMEX in the contracts for exploration and production of hydrocarbons when there is a possibility to find a transboundary reservoir.

No bidding process shall be conducted in contracts for exploration and production for Natural Gas for self-consumption contained in coal seams and produced by it, which can be awarded directly to the mining concession holders.

The exploration and production activities of hydrocarbons conducted in the national territory through entitlements and exploration and production contracts must comply with a minimum national content percentage goal on average. This national content average goal will not take into account exploration and production of hydrocarbons in deep-water and ultra-deep water projects, which have different national content requirements established by the SE with the opinion of the SENER considering the characteristics of those activities.

The above mentioned mandate must comply with the methodology established by the Ministry of Economy, and must consider that it does not affect the competitive position of the PEMEX or any other state productive enterprises and other economic agents developing

exploration and production of hydrocarbons.

The Federal Executive shall establish safeguard zones in the areas in which the State decides to prohibit exploration and production activities, different from protected natural areas in which entitlements and contracts cannot be awarded.

The Mexican Government shall include within the conditions for the entitlements and exploration and production contracts, as well as in the permits, that under the same circumstances of prices, quality and timely delivery, preference should be given to the purchase of domestic goods and the contracting of domestic services, including the training and hiring, at a technical and management level, of Mexican nationals.

The activities of superficial exploration and recognition require an authorisation issued by the SENER, which does not grant rights for the exploration and production of hydrocarbons. The persons that have obtained an entitlement or an exploration and production contract do not require an authorisation for superficial exploration and recognition in the areas covered by the entitlement or exploration and production contract.

The SENER or the CNE shall establish the permit models for the transportation, treatment, refining, processing, storage, distribution, compression, liquefaction, decompression, regasification, sale to the public, commercialisation, formulation and dispatch for self-consumption of hydrocarbons (including natural gas), petroleum or natural gas products (including gasoline and diesel), and petrochemicals, as appropriate, as well as the management of Integrated Systems, taking into account that permit-holders shall have an enterprise incorporated under Mexican law and be domiciled in Mexico. The permits for the exporting and importing of hydrocarbons and petroleum or natural gas products shall be issued in accordance with the Foreign Trade Law (Ley de Comercio Exterior), which requires permit-holders to have an enterprise incorporated under Mexican law and be domiciled in Mexico.

The State public enterprise may, contract with privates, among other activities, the installation, maintenance, and expansion of the infrastructure needed to provide the public service of transmission and distribution of electricity.
