

Bruxelles, 7 octombrie 2021
(OR. en)

12531/21

ENV 727

NOTĂ PUNCT „I/A”

Sursă:	Secretariatul General al Consiliului
Destinatar:	Comitetul Reprezentanților Permanenți / Consiliul
Subiect:	Declarația de la Kunming pentru segmentul la nivel înalt al primei părți a Conferinței părților la Convenția privind diversitatea biologică (12-13 octombrie 2021) <ul style="list-style-type: none">– Autorizare de a aproba declarația în numele Uniunii Europene– Aprobare

1. Se preconizează ca Declarația de la Kunming, subintitulată „Civilizația ecologică: construirea unui viitor comun pentru toată viața de pe Pământ” să fie adoptată cu ocazia segmentului la nivel înalt al primei părți a celei de a cincisprezecea reuniuni a Conferinței părților la Convenția privind diversitatea biologică și al reuniunilor concomitente ale părților la Protocolul de la Cartagena și la Protocolul de la Nagoya (format hibrid, Kunming, China, 12-13 octombrie 2021) (CBD COP 15.1).
2. Părțile la CBD au fost consultate cu privire la textul acestei declarații, iar UE și statele sale membre au prezentat, la 6 septembrie 2021, observații cu privire la proiectul preliminar ¹. În urma procesului de consultare, Guvernul Republicii Populare Chineze a pregătit o versiune revizuită a Declarației de la Kunming, astfel cum figurează în anexa la prezenta notă.

¹ Doc. WK 10377/2021 REV 1.

3. Declarația de la Kunming constituie un instrument fără caracter juridic obligatoriu care conține angajamente politice, în conformitate cu dispozițiile privind instrumentele fără caracter juridic obligatoriu convenite de Consiliu, Comisie și SEAE ².
4. La 5 octombrie 2021, Comisia a informat grupurile de pregătire ale Consiliului cu privire la intenția sa de a aproba Declarația de la Kunming în numele Uniunii Europene și a solicitat Consiliului autorizarea de a aproba declarația ³. Acordul la nivel de grup de lucru cu privire la solicitarea de autorizare a Comisiei a fost obținut la 6 octombrie 2021, prin intermediul unei proceduri tacite informale ⁴.
5. Având în vedere natura negocierilor și finalizarea la fața locului, este posibil să fie necesare modificări suplimentare ale Declarației de la Kunming revizuite. În acest caz, modificările pot fi acceptate numai în măsura în care sunt în concordanță cu politicile și legislația existente ale Uniunii, precum și cu pozițiile convenite ale UE și ale statelor sale membre.
6. În acest context, Comitetul Reprezentanților Permanenți este invitat să recomande Consiliului, ca punct „A” pe ordinea de zi a uneia dintre viitoarele sale reuniuni, să autorizeze Comisia să aprobe Declarația de la Kunming în numele Uniunii Europene cu ocazia segmentului la nivel înalt al CBD COP 15.1.

REMARKS:

The first part of the 15th Conference of the Parties to the Convention on Biological Diversity will meet virtually and physically in Kunming, China, on 10-15 October. China proposes that the high-level segment of the COP adopts a Kunming Declaration. A ‘final draft’ has been circulated on 30 September and the Commission and the Member States will coordinate their position in the Council Working Party on International Environmental Issues – Biodiversity (WPIEI) and/or in dedicated EU coordination meetings.

In line with the ‘Arrangements for Non-Binding Instruments’¹, subject to formal approval by the Commission and agreement in the Council (WPIEI) or in the relevant EU coordination meeting, I hereby request the Council’s agreement for the Commission to endorse the Declaration on behalf of the Union alongside the Member States.

* * *

¹ Arrangements for Non-Binding Instruments’ signed by the Secretary General of the Commission, the Secretary General of the Council and the Secretary General of the EEAS, December 2017.

Kunming Declaration

Declaration from the High-Level Segment of the UN Biodiversity Conference 2020 (Part 1) under the theme:

“Ecological Civilization: Building a Shared Future for All Life on Earth”

(Final Draft)

We, the Ministers and other heads of delegations, having met in Kunming, Yunnan Province, People's Republic of China, in person, and remotely, on 12 and 13 October 2021, on the occasion of the United Nations Biodiversity Conference,¹ at the invitation of the Government of the People's Republic of China,

(PP1) Recalling the relevance of the 2050 Vision for Biodiversity: “Living in harmony with nature”,

(PP2) Recalling the 2030 Agenda for Sustainable Development and *recognizing* that its full achievement across the environmental, social and economic dimensions is necessary to enable the realization of the objectives of the Convention on Biological Diversity and the 2050 Vision for Biodiversity;

(PP3) Emphasizing that biodiversity, and the ecosystem functions and services it provides, support all forms of life on Earth and underpin our human and planetary health and well-being, economic growth and sustainable development,

(PP4) Concerned that the ongoing loss of biodiversity jeopardizes achievement of the Sustainable Development Goals and other international goals and targets,

(PP5) Recognizing that progress has been made in the last decade, under the 2011-2020 Strategic Plan for Biodiversity, but deeply concerned that such progress has been insufficient to achieve the Aichi Biodiversity Targets,

(PP6) Acknowledging with grave concern that the unprecedented and interrelated crises of biodiversity loss, climate change, land degradation and desertification, ocean degradation, and pollution, and increasing risks to human health and food security, pose an existential threat to our society, our culture, our prosperity and our planet,

(PP7) Recognizing that these crises share many underlying drivers of change,

¹Comprising: the fifteenth meeting of the Conference of the Parties, the tenth meeting of the Conference of the Parties serving as the meeting of the Cartagena Protocol on Biosafety, and the fourth meeting of the Nagoya Protocol on Access to Genetic Resources and the Fair and Equitable Sharing of Benefits Arising from Their Utilization.

(PP8) *Recognizing also* that the main direct drivers of biodiversity loss are land/sea use change, overexploitation, climate change, pollution and invasive alien species,

(PP9) *Acknowledging* that indigenous peoples and local communities contribute to the conservation and sustainable use of biodiversity through the application of traditional knowledge, innovations and practices, and through their stewardship of biodiversity on their traditional lands and territories,

(PP10) *Recognizing also* the important roles played by women and girls, and youth,

(PP11) *Stressing*, therefore, that urgent and integrated action is needed, for transformative change, across all sectors of the economy and all parts of society, through policy coherence at all levels of government, and the realization of synergies at national level across relevant Conventions and multilateral organizations, to shape a future path for nature and people, where biodiversity is conserved and used sustainably, and the benefits arising from the utilization of genetic resources are shared fairly and equitably, as an integral part of sustainable development,

(PP12) *Noting* that a combination of measures are needed to halt and reverse the loss of biodiversity, including actions to address land and sea use change, enhance the conservation and restoration of ecosystems, mitigate climate change, reduce pollution, control invasive alien species and prevent overexploitation, as well as actions to transform economic and financial systems and to ensure sustainable production and consumption, and reduce waste, recognizing that none of these measures alone, nor in partial combinations, is sufficient and that the effectiveness of each measure is enhanced by the other,

(PP13) *Noting* the efforts and commitments of many countries to protect 30% of their land and sea areas through well-connected systems of protected areas and other effective area-based conservation measures by 2030,

(PP14) *Reaffirming* the Cancun Declaration on Mainstreaming the Conservation and Sustainable Use of Biodiversity for Well-Being and the Sharm el Sheikh Declaration on Investing in Biodiversity for People and Planet,

(PP15) *Recalling* the UN Summit on Biodiversity in September 2020, with the theme “Urgent action on Biodiversity for Sustainable Development”,

(PP16) *Taking note* of the theme of the UN Biodiversity Conference 2020: “Ecological Civilization: Building a Shared Future for All Life on Earth”,

We declare that putting biodiversity on a path to recovery is a defining challenge of this decade, in the context of the UN Decade of Action for Sustainable Development, the UN Decade on Ecosystem Restoration and the UN Decade for Ocean Science for

Sustainable Development, requiring strong political momentum to develop, adopt and implement an ambitious and transformative post-2020 global biodiversity framework that promotes the three objectives of the Convention in a balanced manner,

We Commit to:

1. Ensure the development, adoption and implementation of an effective post-2020 global biodiversity framework, that includes provision of the necessary means of implementation, in line with the Convention, and appropriate mechanisms for monitoring, reporting and review, to reverse the current loss of biodiversity and ensure that biodiversity is put on a path to recovery by 2030 at the latest, towards the full realization of the 2050 Vision of “Living in Harmony with Nature”;
2. Support, as appropriate, the development, adoption and implementation of an effective post-2020 Implementation Plan, and Capacity Building Action Plan, for the Cartagena Protocol on Biosafety;
3. Work across our respective governments to continue to promote the integration, or “mainstreaming” of the conservation and sustainable use of biodiversity into decision-making including through the integration of the multiple values of biodiversity into policies, regulations, planning processes, poverty reduction strategies and economic accounting, and strengthen cross-sectoral coordinating mechanisms on biodiversity;
4. Accelerate and strengthen the development and update of the National Biodiversity Strategies and Action Plans, to ensure the effective implementation of the post 2020 global biodiversity framework at national level;
5. Improve the effectiveness, and increase the coverage, globally, of area-based conservation and management through enhancing and establishing effective systems of protected areas and adopting other effective area-based conservation measures, as well as spatial planning tools, to protect species and genetic diversity and reduce or eliminate threats to biodiversity, recognizing the rights of indigenous peoples and local communities and ensuring their full and effective participation;
6. Strengthen sustainable use of biodiversity for meeting the needs of people;
7. Actively enhance the global environmental legal framework and strengthen environmental law at national level, and its enforcement, to protect biodiversity and to combat its illegal use, and to consider, respect, and promote human rights obligations when taking actions to protect biodiversity;

8. Step up our efforts to ensure, through the Convention, the Nagoya Protocol and other agreements as appropriate, the fair and equitable benefit-sharing from the use of genetic resources, including associated traditional knowledge, taking into account the context of digital sequence information on genetic resources;

9. Strengthen measures, and their implementation, for the development, assessment, regulation, management, and transfer, as appropriate, of relevant biotechnologies, with a view to promote the benefits and to reduce the potential risks, including those associated with the use and release of living modified organisms which are likely to have adverse environmental impacts;

10. Increase the application of ecosystem-based approaches to address biodiversity loss, restore degraded ecosystems, boost resilience, mitigate and adapt to climate change, support sustainable food production, promote health, and contribute to addressing other challenges, enhancing One Health and other holistic approaches and ensuring benefits across economic, social, and environmental dimensions of sustainable development, through robust safeguards for environmental and social protection, highlighting that such ecosystem-based approaches do not replace the priority actions needed to urgently reduce greenhouse gas emissions in a way that is consistent with the goals of the Paris Agreement;²

11. Step up actions to reduce the negative effects of human activities on the ocean to protect marine and coastal biodiversity and strengthen the resilience of marine and coastal ecosystems to climate change;

12. Ensure that post-pandemic recovery policies, programmes and plans contribute to the conservation and sustainable use of biodiversity, promoting sustainable and inclusive development;

13. Work with ministries of finance and economy, and other relevant ministries, to reform incentive structures, eliminating, phasing out or reforming subsidies and other incentives that are harmful to biodiversity, while protecting people in vulnerable situations, to mobilize additional financial resources, and align all financial flows in support of the conservation and sustainable use of biodiversity;

14. Increase the provision of financial, technological and capacity building support to developing countries necessary to implement the post 2020 global biodiversity framework and in line with the provisions of the Convention;

² Ecosystem-based approaches may also be referred to as “Nature based solutions” as per SBSTTA recommendation 23/2, paragraph 4”.

15. Enable the full and effective participation of indigenous peoples and local communities, women, youth, civil society, local governments and authorities, academia, the business and financial sectors, and other relevant stakeholders, and encourage them to make voluntary commitments in the context of the Sharm el Sheikh to Kunming Action Agenda for Nature and People, and to continue to build the momentum for the implementation of the post 2020 global biodiversity framework;

16. Further develop communication, education and public awareness tools on biodiversity to support changes in behaviour towards the conservation and sustainable use of biodiversity;

17. Further enhance collaboration and coordinate actions with ongoing multilateral environmental agreements, such as the United Nations Framework Convention on Climate Change, the United Nations Convention to Combat Desertification, and the biodiversity-related conventions, as well as the 2030 Agenda for Sustainable Development and other related international and multilateral processes, to promote the protection, conservation, sustainable management and restoration of terrestrial, freshwater and marine biodiversity, while contributing to other sustainable development goals, aligned to the 2030 Agenda for Sustainable Development.

[This Declaration will be submitted to the General Assembly of United Nations, the 2022 High-Level Political Forum on Sustainable Development, and the second part of the 5th United Nations Environment Assembly.]
