| From:    | General Secretariat of the Council   |
| To:      | Delegations  |
| Subject: | ANNEX to the Council Implementing Decision on the approval of the assessment of the recovery and resilience plan for Estonia |

---

Delegations will find attached the above-mentioned annex to the Council Implementing Decision, as revised and agreed by the Financial Counsellors Working Party, based on the Commission Proposal COM (2021) 625.

## **ANNEX**

### **SECTION 1: REFORMS AND INVESTMENTS UNDER THE RECOVERY AND RESILIENCE PLAN**

#### **1. Description of Reforms and Investments**

##### **A. COMPONENT 1: DIGITAL TRANSFORMATION OF ENTERPRISES**

The objective of this component of the Estonian recovery and resilience plan is to foster the digital transformation of Estonian companies and their competitiveness, in particular on export markets. It shall provide financial support to companies of all sectors, with a focus on SMEs and micro-enterprises, at different stages of their digital transformation, as well as specific contributions to the adoption and deployment of digital solutions in the construction and road freight transport sectors. Moreover, the component shall address the key issue of digital skills, through awareness-raising of SME managers and support to the upskilling and retraining of specialists in information and communication technologies (ICT).

Actions aimed at supporting the identification of export opportunities and the promotion of Estonian companies abroad shall be carried out in synergy with the activities of Enterprise Estonia.

The component supports addressing the Country Specific Recommendations on investment in the digital transition (Country Specific Recommendation 3 in 2020) and on skills shortages (Country Specific Recommendation 2 in 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

##### **A.1. Description of the reforms and investments for non-repayable financial support**

##### ***1.2. Investment: Digital transformation in enterprises***

The objective of the measure is to foster the digital transformation of businesses with a particular focus on SMEs and micro-enterprises.

The measure consists in providing financial support to SMEs and micro-enterprises located in Estonia from all sectors for activities and investments relevant to their digital transformation. This financial support, which shall be complemented with the companies' own resources, shall cover one or several of the following aspects:

- the adoption of digital technologies,
- the development of industrial data clouds,
- industrial research, development, testing and piloting activities,
- feasibility studies, advisory and support services,
- training of staff.

The funding shall be allocated through open calls for proposals.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for the calls for proposals shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>1</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>2</sup>; (iii) activities related to waste landfills, incinerators<sup>3</sup> and mechanical biological treatment plants<sup>4</sup>; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the measure shall be completed by 31 December 2025.

### **1.3. Investment: Development of e-construction**

The objective of the measure is to contribute to the acceleration of the digital transformation of the construction sector in order to increase its productivity, reduce its environmental footprint and improve the quality of buildings. This investment is also expected to foster a wider and more efficient sharing of data among stakeholders.

The measure consists of three different strands:

- (i) the development of software interfaces between the national e-construction platform (which is being developed under the responsibility of the Construction and Housing Department of the Ministry of Economic Affairs and Communications) and existing public and private information systems used in the sector, in order to, inter alia, automate the verifications of the compliance of buildings with various regulatory requirements, as well as the delivery of certificates and authorisations; this includes the training of users of the e-construction platform (including the development of training material);
- (ii) the support to the introduction of international standards and best practices in relation to the digitalisation of construction and building maintenance, including through the introduction of a construction data classification system, the creation of a database on construction materials and construction products, the introduction of BIM (Building Information Modelling) in the field of property maintenance;

---

<sup>1</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>2</sup> Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>3</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>4</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

- (iii) the support to projects (selected through open calls for proposals) aiming at implementing digital construction tools and developing (also prototyping) innovative private and public services connected to the national e-construction platform.

The implementation of the measure shall be completed by 31 December 2025.

#### ***1.4. Investment: Development of digital waybills services***

The objective of the measure is to support the digitalisation of the exchange of information in road freight transport through the introduction of digital waybills, in accordance with the Regulation (EU) 2020/1056 on electronic freight transport information (eFTI), thus contributing to the smooth functioning of the internal market.

The measure consists in supporting:

- (i) service providers in the establishment of eFTI platforms to enable the deployment of digital waybills (eCMR - electronic Consignment Note),
- (ii) transport and logistics enterprises in the interfacing of their systems and processes with the eFTI platforms, enabling them to use digital waybills (eCMR).

The corresponding projects shall be selected through two distinct calls for proposals.

The implementation of the measure shall be completed by 30 June 2026.

#### ***1.5. Reform: Skills reform for the digital transformation of businesses***

The objective of the reform is to contribute to strengthening the capacity of businesses at management level to steer and foster the digital transition, as well as to ensuring the availability of sufficient ICT professionals possessing up-to-date skills and knowledge, so that Estonian companies can fully seize the opportunities offered by the digital transition. It also aims at offering new career opportunities to both employed and unemployed people through upskilling and retraining in ICT, as well as through a better recognition of skills acquired outside formal learning. The measure also aims to contribute to increasing the participation of women in ICT training and ICT professions.

The measure consists of the four following strands:

- (i) the training of managers in companies (SMEs in particular), in order to increase their ICT skills and knowledge, and raise their awareness about the potential gains from the use of ICT,
- (ii) a revision of the content and organisation of the training of ICT experts, taking into account the latest technological developments, the growing importance of cybersecurity and the needs of companies,
- (iii) a pilot for the redesign of the qualification framework for ICT specialists,
- (iv) the upskilling and retraining of ICT specialists, including in cybersecurity.

The implementation of the measure shall be completed by 30 June 2026.

## ***1.6. Reform: Supporting the competitiveness of enterprises in foreign markets***

The objective of the measure is to increase the export capacity and competitiveness of Estonian companies, including notably those of the ICT sector. The measure is expected to be particularly relevant for SMEs. It shall also take advantage of the possibilities offered by digital tools.

The measure consists of three sub-measures:

- (i) the development of export strategies aimed at specific countries or regions;
- (ii) the establishment of business centres located in key export markets;
- (iii) the promotion of Estonian products and services (from the ICT sector in particular) through physical, virtual or hybrid missions and events.

The implementation of the measure shall be completed by 30 June 2026.

### ***1.5.1. Sub-reform: Country and regional strategies***

This sub-reform consists in the development of a series of comprehensive export strategies addressing key target countries and regions, i.e. those which represent a high growth potential for Estonian companies. They shall include specific chapters on export opportunities for the ICT sector and, more broadly, digital solutions developed in different application areas (such as governance, education or transport).

These strategies aim at providing advice to companies entering or already operating in the concerned markets.

The countries and regions to be addressed by the strategies shall be identified through an analysis to be carried out as part of the implementation of this sub-measure.

The implementation of this measure shall be carried out in synergy with the activities of Enterprise Estonia, among other partners.

### ***1.5.2. Sub-reform: Innovative business centres in key export markets***

This sub-reform consists in establishing business centres in seven foreign countries (inside and/or outside the Union) considered as important export markets. These business centres shall contain suitable equipment for physical, virtual as well as hybrid meetings, receptions and presentations which will be organised by Estonian enterprises across all sectors targeting the particular market. That equipment can also be used outside events, for introduction to any potential client of a cluster or a particular enterprise in Estonia. The business centres shall contribute to the promotion of Estonian companies, support them locally in their export activities, and help attract foreign investors. The activities of the business centres shall be carried out in synergy with the activities of Enterprise Estonia, among other partners.

The location of the business centres shall be identified after an analysis to be carried out as part of the implementation of this sub-measure.

### ***1.5.3. Sub-reform: Global e-export impact groups and virtual stages***

This sub-reform consists in setting up groups of representatives of both public authorities and other stakeholders, including notably private companies, and supporting the promotion of Estonian products and services (from the ICT sector in particular) by these groups, through missions and participation in physical, virtual or hybrid events.

The implementation of this sub-reform also includes the reinforcement of the promotion of Estonian products and services at major events with the use of digital tools. The so-called ‘virtual stages’ shall create more opportunities of participation for Estonian stakeholders and showcase Estonian digital solutions. These ‘virtual stages’ shall consist of technical solutions combining physical and digital elements to enable either an export-related event in Estonia to reach global audiences, or Estonian exporters to participate in global events organised abroad.

The implementation of this measure shall be carried out in synergy with the activities of Enterprise Estonia, among other partners.

**A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment)    | Milestone / Target | Name  | Qualitative indicators (for milestones)             | Quantitative indicators (for targets)       |          |      | Indicative timeline for completion |      | Description of each milestone and target   |
|-------------------|---|--------------------|---|---|---|----------|------|------------------------------------|------|--|
|                   |   |                    |   |   | Unit of measure                             | Baseline | Goal | Quarter                            | Year |  |
| 1                 | 1.1 Digital transformation in enterprises | Milestone          | Call for proposals with award criteria and award conditions | Publication of the notice of the call for proposals |   |          |      | Q2                                 | 2022 | A call for proposals to support the digital transformation of businesses, together with the award criteria, shall be published by the Ministry of Economic Affairs and Communications. The evaluation criteria and the conditions for granting support shall be defined on the basis of an analysis of the needs of Estonian companies and the expected impact of the measure. Eligibility criteria shall also ensure that the selected projects comply with the 'Do no significant harm' Technical Guidance (2021/C58/01) through the use of an exclusion list and the requirement of compliance with the relevant EU and national environmental legislation. |
| 2                 | 1.1 Digital transformation in enterprises | Target             | Award of grants   |   | Number of enterprises being awarded a grant | 0        | 110  | Q4                                 | 2023 | Number of enterprises to which grants shall be awarded by the Ministry of Economic Affairs and Communications to support their digital transformation in accordance with the call for proposals.   |

| Sequential Number | Related Measure (Reform or Investment)    | Milestone / Target | Name   | Qualitative indicators (for milestones)                | Quantitative indicators (for targets)       |          |      | Indicative timeline for completion |      | Description of each milestone and target   |

## **B. COMPONENT 2: ACCELERATING THE GREEN TRANSITION IN ENTERPRISES**

### **B.1. Description of the reforms and investments for non-repayable financial support**

The objective of the component of the Estonian recover and resilience plan is to speed up the green transition in the business sector in Estonia and to seize the business opportunities it represents. The component consists of two reforms and six investments and aims to support the development of green technologies, increase green R&D and innovation capabilities and resource efficiency, introduce new business models and improve skills and expertise in fields related to the green transition. The measures under this component aim for a comprehensive approach to the green transition addressing key market failures and facilitating the technological and behavioural breakthrough to increase the competitiveness of the business sector. The measures also support further development of the capital market and business environment.

The component supports addressing the Country Specific Recommendations on supporting the innovation capacity of small and medium-sized enterprises and focussing investment on the green transition, ensuring sufficient access to finance (Country Specific Recommendation 3 in 2020), and on skills shortages (Country Specific Recommendation 2 in 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

#### ***2.1. Reform: Green transition of enterprises***

The objective of the reform is to improve the green transition in the business sector, which is expected to have economic, environmental and social benefits by making existing businesses more efficient and environmentally friendly (resource efficiency, new green transition certificates and market authorisations for products) and by supporting the emergence of new green technology companies (development and deployment of green technologies, new opportunities for the valorisation of bio-resources).

The reform shall consist of the set-up of a broad-based Green Transition Task Force to foster cooperation between the green technology stakeholders and the adoption of legislation necessary for the implementation of the five complementary investments: 1. Green skills to support the green transition of companies; 2. Green technology development programmes; 3 Modernisation of the business models in manufacturing companies; 4. Deployment of resource efficient green technologies; and 5. Green Fund.

The reform is interlinked with Component 1 as digitalisation and automation are contributing to the development of green technologies and green transition in the business sector.

The implementation of the reform shall be completed by 31 December 2022.

#### ***2.2. Investment: Green skills to support the green transition of enterprises***

The objective of the investment is to ensure the availability of high-quality expertise to implement the green transition in enterprises. The investment consists of the introduction of up-to-date upskilling and retraining programmes for adults and the modernisation of study programmes in higher and vocational education, as well as the development and piloting more flexible training programmes offering micro credentials, taking into account future needs of the green economy.

Green skills are defined as skills needed for jobs that contribute to the reduction of greenhouse gas emissions, improving energy and resource efficiency and include a wider introduction of circular economy principles. In cooperation with stakeholders, professional standards and skills profiles shall be updated and, where appropriate, new profiles shall be developed, specifying the expected learning outcomes and selecting specific areas with the greatest impact on the green transition. Retraining opportunities shall be provided to people working in sectors already affected by the green transition (energy, transport, waste management; new industries and sectors with a potential for creation of jobs stemming from or linked to the green transition) and to those wishing to change their career.

The implementation of the investment shall be completed by 30 June 2026.

### **2.3. *Investment: Green technology development programmes***

The investment aims to contribute to the green transition of the companies by fostering the development and spreading of innovative green technologies. The investment is expected to increase the number of research-intensive green technology companies in the market and support the start-up ecosystem. The investment consists of support to start-ups and development clusters with a focus on integrated green technology solutions through various development services (including accelerators, incubation, business development, prototype development, piloting) and improvement of the cooperation between different types of organisations and actors that are already active on the market (academia, businesses, other stakeholders).

The focus of the investment shall be on energy and resource efficiency, promoting the circular economy, new business models, digitalisation and automation. The projects supported under the investment shall contribute to reducing greenhouse gas emissions and increasing resource productivity in Estonia.

The implementation of the investment shall be completed by 30 June 2026.

### **2.4. *Investment: Modernisation of the business models in manufacturing companies***

The objective of the investment is to support the change of business models in manufacturing to ensure the compliance of Estonian products with environmental and climate objectives, including with circular economy principles, and raise competitiveness of manufacturing companies. The measure shall support projects modernising the business models of manufacturing companies related to climate and environmental objectives. The projects shall be selected on the basis of a call for proposals.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for the call for proposals shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>5</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>6</sup>; (iii) activities related to waste

---

<sup>5</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>6</sup> Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

landfills, incinerators<sup>7</sup> and mechanical biological treatment plants<sup>8</sup>; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 31 December 2025.

## **2.5. *Investment: Deployment of resource-efficient green technologies***

The objective of the investment is to improve the resource efficiency of companies, including energy efficiency, with a particular focus on the valorisation of underutilised bio-resources such as residues and by-products. The investment aims to support innovation in production technology and product development in enterprises and contributes to circular economy solutions.

The measure shall support two kinds of investments:

- promoting resource-efficient green technologies for industrial plants;
- valorisation of bio-resources.

The projects shall be selected on the basis of a call for proposals. The main criteria for selecting projects to receive a grant shall include, according to relevance, efficiency in reducing greenhouse gas emissions, resource efficiency, cost-effectiveness, reducing of residues and waste generation, added value to bio-resources and innovativeness of the solutions to be developed.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for the call for proposals shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>9</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>10</sup>; (iii) activities related to waste landfills, incinerators<sup>11</sup> and mechanical biological treatment plants<sup>12</sup>; and (iv) activities where the

---

<sup>7</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>8</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>9</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>10</sup> Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>11</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>12</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions

long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 30 June 2026.

## **2.6. *Investment: Green Fund***

The objective of the investment is to provide capital for the development of new green technologies in strategic areas such as energy, agriculture, food industry, transport and logistics, materials and chemical industries. The Green Fund shall provide funding for companies and sectors whose products, services or processes are characterised by research-intensive green technologies and whose activities contribute to solving environmental problems, developing new products, services or technologies that reduce or capture greenhouse gas emissions or are driven by eco-design requirements. Investments shall be made in sustainable projects, taking into account the EU Taxonomy Regulation.

The measure shall be implemented as a financial instrument as part of a broader green technology investment programme that provides equity investments to companies in the form of direct equity investments and through venture capital funds, managed by the public fund manager SmartCap.

The measure shall comply with the ‘Do no significant harm’ Technical Guidance (2021/C58/01). The legal agreement signed between Estonia and SmartCap and the subsequent investment policy of the Green Fund shall:

- i. require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund; and
- ii. require companies that derived more than 50% of their revenues during the preceding financial year from the following activities and/or assets to adopt and publish green transition plans: (i) activities and assets related to fossil fuels, including downstream use<sup>13</sup>; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>14</sup>; (iii) activities and assets related to waste landfills, incinerators<sup>15</sup> and mechanical biological treatment plants<sup>16</sup>; and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

---

under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>13</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>14</sup> Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>15</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>16</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

- iii. require the verification of legal compliance with the relevant EU and national environmental legislation of the beneficiary by SmartCap for all transactions, including those exempted from sustainability proofing.

The implementation of the investment shall be completed by 30 June 2026.

## **2.7. *Investment: Creating opportunities for the uptake of renewables-based green hydrogen technologies***

The objective of the investment is to support the deployment and piloting of hydrogen integrated value chains from energy production and supply solutions to final consumption in different application areas.

The projects to be supported shall be selected following a call for proposals. The call for proposals is open for projects from all economic sectors. The electricity used to produce hydrogen must be produced from renewable energy and the consumption of green hydrogen shall take place in Estonia.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for the call for proposals shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>17</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>18</sup>; (iii) activities related to waste landfills, incinerators<sup>19</sup> and mechanical biological treatment plants<sup>20</sup>; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 30 June 2026.

---

<sup>17</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

<sup>18</sup> Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>19</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>20</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

**B.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment) | Milestone / Target | Name  | Qualitative indicators (for milestones)   | Unit of measure | Quantitative indicators (for targets) |      | Indicative timeline for completion |      | Description of each milestone and target  |
|-------------------|--|--------------------|---|---|-----------------|---------------------------------------|------|------------------------------------|------|---|
|                   |  |                    |   |   |                 | Baseline                              | Goal | Quarter                            | Year |   |
| 23                | 2.1 Green transition of enterprises    | Milestone          | Creation of a Green Transition Task Force to implement and monitor the green transition | Set up of a task force and working groups |                 |                                       |      | Q4                                 | 2021 | The Ministry of the Environment shall reform the existing Working Group on Green Technology (set up in 2020) into the RRP's Green Transition Task Force to coordinate the measures on the green transition of companies, and improve cooperation and exchange of information among the public sector, stakeholders and interest groups. The necessary working groups shall be set up for specific measures. |
| 24                | 2.1 Green transition of enterprises    | Milestone          | Adoption of the Circular Economy Action Plan by the Green Transition Task Force         | Circular Economy Action Plan adopted      |                 |                                       |      | Q4                                 | 2022 | The Green Transition Task Force shall review the existing Circular Economy activities and different action plans into a single Circular Economy Action Plan that will lead the Estonian transition to Circular Economy.   |

| Sequential Number | Related Measure (Reform or Investment)                          | Milestone / Target | Name   | Qualitative indicators (for milestones)   | Unit of measure        | Quantitative indicators (for targets) |      | Indicative timeline for completion |      | Description of each milestone and target   |

The role of the project manager shall be set out to gather information from market participants and design the necessary support measures and procurement. The working group shall be composed of parties involved in the development of entrepreneurship and shall undertake to meet at least three times a year to take stock of developments in investment-related activities and provide recommendations for further action. The working group shall draw up provisions related to the selection of actions to be supported under the development programme in such a way that it is ensured that each action directly contributes either to lowering greenhouse gas emissions or supporting adaptation to climate change. |

| Sequential Number | Related Measure (Reform or Investment)       | Milestone / Target | Name  | Qualitative indicators (for milestones)  | Unit of measure    | Quantitative indicators (for targets) |      | Indicative timeline for completion |      | Description of each milestone and target  |

## C. COMPONENT 3: DIGITAL STATE

Building on the successful deployment of digital technologies for the delivery of public services in Estonia over the last years, this component of the Estonian recovery and resilience plan aims at upgrading the digital government services further, in particular in terms of user-centricity and resilience (including in light of the growing cybersecurity threats). The component features measures allowing to take advantage of the opportunities offered by the latest technologies, especially artificial intelligence, but also significant redesigns of both front-end and back-end services. They shall benefit both citizens and businesses. Specific actions are foreseen in order to reinforce the country's capacities to combat money laundering. The support to the deployment of very high capacity networks in rural areas is also expected to ensure wider access to online services and, more generally, contribute to the further digital transformation of the country.

The component supports addressing the Country Specific Recommendations on investment in the digital transition (Country Specific Recommendation 3 in 2020) and on the anti-money laundering framework (Country Specific Recommendation 1 in 2019 and Country Specific Recommendation 4 in 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

### **C.1. Description of the reforms and investments for non-repayable financial support**

#### ***3.1. Reform: Creation and development of a centre of excellence for data governance and open data***

The objective of the measure is to foster a better management of the data collected and held by the Estonian public authorities. It aims at improving the quality of the data, increase its use for decision-making as well as its availability as open data, so that it may also be reused by other stakeholders.

The measure consists of:

- the creation of a centre of excellence within Statistics Estonia (the Estonian government agency responsible for producing official statistics) to coordinate and support the development of data governance in other public authorities,
- the development of data governance and data sharing tools/information systems,
- the implementation of projects aiming at improving the quality of data held by public authorities and increasing the availability of open data.

The implementation of the measure shall be completed by 31 December 2025.

### ***3.2. Reform: Development of event services and proactive digital public services for individuals***

The objective of the measure is to improve the efficiency of the delivery of public services and reduce the administrative burden for citizens.

The measure consists in redesigning a series of public services (and the underlying IT systems) in order to enable their automatic and proactive delivery on the basis of life or business events experienced by citizens (such as a marriage, the birth of a child or the creation of an enterprise). It shall notably allow a better integration of IT systems across different public authorities and contribute to the implementation of the once-only principle.

The implementation of the measure shall be completed by 31 December 2025.

### ***3.3. Reform: Development of event services and digital gateway for entrepreneurs***

The objectives of the measure are to improve the efficiency and the quality of the delivery of public services and reduce the administrative burden for entrepreneurs.

The measure consists in establishing one digital gateway for the delivery of public services to entrepreneurs and redesigning a series of services (and the underlying IT systems) in order to interface them with the gateway, supporting the user-friendliness of services, the implementation of the once-only principle and, whenever possible, enabling the proactive delivery of information based on events experienced by businesses.

It shall take into account the solutions developed in the context of the implementation of Regulation (EU) 2018/1724 establishing a single digital gateway to provide information, procedures, assistance and problem solving services.

The implementation of the measure shall be completed by 31 December 2025.

### ***3.4. Investment: #Bürokratt programme (national virtual assistant platform and ecosystem)***

The objective of the measure is to improve the user-friendliness and accessibility of public services in Estonia.

The measure consists in developing a speech- and text-based AI virtual assistant for the access to online public services. The work shall build on pilot projects already carried out in 2020 and 2021.

The implementation of the measure shall be completed by 31 December 2025.

### ***3.5. Investment: Reconfiguration of basic digital services and safe transition to cloud infrastructure***

The objective of the measure is to increase the resilience, the security and the reliability of the IT systems and services of the Estonian public authorities through their migration to a private cloud and through comprehensive security testing.

The measure consists of the following elements:

- the creation of a new public body in charge of the central management of the IT basic services and infrastructures of public institutions,
- The establishment of new security testing capability within the Estonian Information System Authority (RIA),

- the procurement of private cloud infrastructure resources,
- the migration of existing information systems to the private cloud,
- the comprehensive testing of the security of new cloud-based information systems used by public authorities, as well as of existing information systems,
- the development of the capacity of the data embassy (i.e. IT hosting capacities established abroad to ensure the continuity of the availability of critical databases in case of disaster), building on the pilot project carried out between 2017 and 2020 in Luxembourg,
- the extension of the private cloud to the data embassy, so that systems migrated to the cloud may also be hosted in and operated from the data embassy,
- the migration of critical systems to the data embassy infrastructure.

The implementation of the measure shall be completed by 31 December 2024.

### **3.6. *Reform: Establishing the strategic analysis of money laundering and terrorist financing in Estonia***

The objective of the reform is to strengthen the capacity of the Financial Intelligence Unit to identify money laundering schemes and channels at an early stage.

The measure consists in establishing a Centre for Strategic Analysis within the Financial Intelligence Unit. This Centre for Strategic Analysis is expected to allow more operational and more efficient prevention and detection of money laundering and terrorist financing. The team of the Centre for Strategic Analysis shall notably be in charge of developing specifications for a new IT tool drawing on data available from different sources. The Centre for Strategic Analysis might also identify necessary legislative changes.

The implementation of the measure shall be completed by 31 December 2024.

### **3.7. *Investment: Information system for real-time strategic analysis of money laundering and terrorist financing***

Building on the analysis carried out as part of the implementation of the reform 3.6, the investment aims at providing the Financial Intelligence Unit with a new dedicated IT system enabling the exploitation of data available from different authorities and the identification of possible money laundering schemes and channels in real time. The measure consists in developing the new IT system.

The implementation of the measure shall be completed by 30 June 2026.

### **3.8. *Investment: Construction of very high capacity broadband networks***

The objective of the investment is to improve the access to very high capacity broadband networks (VHCN), which offer a connection of at least 100 Mbps, for households and socio-economically important institutions such as hospitals, schools, public services and businesses.

The measure consists in providing financial support to the deployment of very high capacity broadband networks in areas of market failure (in accordance with provisions of Article 52 of the Commission Regulation 651/2014). The eligibility and selection criteria used to allocate the funding shall ensure an appropriate regional balance.

The implementation of the measure shall be completed by 31 December 2025.

## **C.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment)   | Milestone / Target | Name  | Qualitative indicators (for milestones)  | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target   |
|-------------------|--|--------------------|---|--|---------------------------------------|----------|------|------------------------------------|------|--|
|                   |  |                    |   |  | Unit of measure                       | Baseline | Goal | Quarter                            | Year |  |
| 44                | 3.1 Creation and development of a centre of excellence for data governance and open data | Milestone          | Setting up a data management team in the Statistical Office, the Ministry of Economic Affairs and Communications and the State Information System Authority | Establishment of the necessary organisational structure for coordinating data management |                                       |          |      | Q4                                 | 2021 | Creation of a Data Management Team in Statistics Estonia through the recruitment of expert staff tasked with coordinating the data governance framework and supporting other public authorities. In addition, posts shall be created at the Ministry of Economic Affairs and Communications and at the State Information System Agency to carry out development projects. By the end of 2021, at least five people shall be recruited across the three entities. |
| 45                | 3.1 Creation and development of a centre of excellence for data governance and open data | Target             | Completion of data quality improvement projects   |  | Number of projects                    | 0        | 430  | Q2                                 | 2025 | Number of completed projects contributing to ensuring an improved reusability of data from public institutions, with up-to-date and accurate descriptions of databases and datasets.   |

| 62                | 3.8 Construction of very high capacity broadband networks   | Target             | Rollout of very high capacity broadband network to new sites  |   | Number of sites                       | 4000     | 8097 | Q4                                 | 2025 | Number of additional sites (residential, companies, establishments) covered by VHCN (and which have thus the possibility to get a connection of at least 100 Mbps) thanks to the measure.             |

## **D. COMPONENT 4: ENERGY AND ENERGY EFFICIENCY**

This component of the Estonian recovery and resilience plan addresses the challenge of decarbonising the energy sector. The objectives of the component are to reduce the dependency on oil shale, incentivise uptake of renewable energy and improve the energy efficiency of buildings.

The component supports addressing the Country Specific Recommendation to focus investments on energy infrastructure and on resource and energy efficiency, contributing to the progressive decarbonisation of the economy (Country Specific Recommendation 3 in 2019 and in 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

### **D.1. Description of the reforms and investments for non-repayable financial support**

#### ***4.1. Reform: Energy efficiency promotion***

The objective of the reform is to reduce the administrative barriers to energy efficient renovations by advising apartment associations, private households and local governments on legislation, technical aspects and financing of renovations. The reform also supports the use of innovative solutions such as renovation using pre-fabricated elements in order to increase renovation capacity and reduce the carbon footprint of the building stock (economising on the materials and ensuring quality). The reform aims to increase renovation rates in areas with lower property value.

The measure consists of setting up a regional advisory network and training of technical consultants in order to provide the necessary information and incentivise renovations. Access to information related to energy-efficient renovations shall be further ensured by setting up a dedicated website and digital tools facilitating understanding of the renovation result, cost and benefits. The component is linked to a measure on digitalisation of construction data under component 1 of the Estonian Recovery and Resilience Plan.

The implementation of the reform shall be completed by 31 December 2024.

#### ***4.2. Investment: Support for the renovation of apartment buildings***

The objective of the measure is to boost deep renovations of apartment buildings in order to increase energy efficiency, reduce energy consumption and improve the living conditions of their residents. The objective is also to increase renovation rates in areas with lower property value.

Support shall be given to apartment associations for renovations that achieve an improvement of at least one energy efficiency class or, in the case of complete renovations, at least the energy efficiency class C. The renovations shall correspond to at least a medium-depth renovation representing an average level of primary energy savings of at least 30%. Differentiated regional support rates shall be applied: 30% in Tallinn and Tartu, 40% in the areas surrounding Tallinn and Tartu based on the real estate price and 50% in all other areas. Outside Tallinn and Tartu, the apartment associations may carry out partial reconstruction work to prevent deterioration of the technical condition of the building, in which case the support rate shall be lower. In addition, as part of its long-term national strategies, Estonia is planning to finance complementary renovation measures from the European Regional Development Fund and the REACT-EU.

The implementation of the investment shall be completed by 30 June 2026.

#### **4.3. *Investment: Support for the renovation of small residential buildings***

The objective of the measure is to boost deep renovations of private dwellings in order to increase energy efficiency, reduce energy consumption and improve the living conditions of their residents. The objective is also to increase renovation rates in areas with lower property value.

Support shall be given to private owners for renovations that achieve an improvement of at least one energy efficiency class or, in the case of complete renovations, at least energy label class C, and correspond to at least a medium-depth renovation representing an average level of primary energy savings of at least 30%. Differentiated regional support rates shall be applied: 30% in Tallinn and Tartu, 40% in the areas surrounding Tallinn and Tartu based on the real estate price and 50% in all other areas. For the purpose of the measure, housing (dwelling) is defined as ‘a dwelling or dwellings in a single building or in a separate building intended for a single household to live throughout the year’ (in accordance with Eurostat).

The implementation of the investment shall be completed by 31 December 2024.

#### **4.4. *Reform: Boosting the green transition in the energy economy***

The aim of this measure is to contribute to decarbonising the energy production and consumption in Estonia by updating targets and actions of Estonian energy policy (including those related to the phase out oil shale) and by removing administrative barriers to renewable energy installations.

The National Development Plan of the Energy Sector shall be updated and shall include targets on renewable energy production, energy efficiency and security of supply. The plan will also include actions to reduce dependency on oil shale in the Estonian energy sector and targets on the phase-out of oil shale in the energy sector altogether.

The reform shall also consist of adopting the necessary legislation and compiling guidance materials for accelerating the installation of renewable electricity production capacity and actions for alleviating the defence-related height restrictions on wind parks.

The implementation of the reform shall be completed by 31 December 2025.

#### **4.5. *Investment: Programme to strengthen the electricity grid to increase renewable energy production capacity and adapt to climate change (such as protection against storms)***

The aim of this measure is to contribute to decarbonising the Estonian electricity production by increasing the connection capacities available for renewable energy production.

Under this measure, the transmission system operator’s investments into the transmission grid shall be co-financed with the aim of adding at least 310 MW of additional connection capacity.

The implementation of the measure shall be completed by 30 June 2026.

#### **4.6. *Investment: Programme to boost energy production in industrial areas***

The measure aims to make the electricity system more effective by incentivising the production of electricity close to consumption. The measure shall incentivise renewable electricity production in or nearby industrial areas through co-financing the necessary grid connection. Under this measure, investments made by companies to connect renewable electricity production capacities into the grid shall be supported through grants. In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of

reference for the calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use<sup>21</sup>; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks<sup>22</sup>; (iii) activities related to waste landfills, incinerators<sup>23</sup> and mechanical biological treatment plants<sup>24</sup>; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

The implementation of the investment shall be completed by 30 June 2026.

#### **4.7. *Investment: Pilot Energy Storage Programme***

To complement the above measures, the phase-out of oil shale and increased renewable energy production, pilot projects for renewable energy storage shall be supported.

The objective of the measure is to pilot renewable energy storage in Estonia. The knowledge acquired in this pilot project is expected to provide a basis for the future zero-subsidy investments into storage facilities. Under this measure, grants shall be provided to companies investing in renewable energy storage facilities.

The implementation of the investment shall be completed by 30 June 2026.

---

<sup>21</sup> Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the 'Do no significant harm' Technical Guidance (2021/C58/01).

<sup>22</sup> Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

<sup>23</sup> This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

<sup>24</sup> This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants' waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

## **D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment) | Milestone / Target | Name  | Qualitative indicators (for milestones)   | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target   |

| 67                | 4.2 Support for renovation of apartment buildings | Target             | Estimated annual reduction of greenhouse gas emissions | N/A                                     | tons of CO2eq/ye ar                   | 0        | 2200 | Q2                                 | 2026 | Annual emissions of at least 2 200 tons of CO2 equivalent have been saved. The target shall be measured as the decrease of the greenhouse gas (GHG) emissions as a sum of all the renovation projects finished by 2024. The energy efficiency class for each renovated building shall be measured at the latest in 2025; and their annual greenhouse gas emissions estimated on this basis. The baseline shall refer to the estimated greenhouse gas emissions of the building prior to renovation. It shall be assessed if the activities of the support measure have been carried out and all the necessary documents have been submitted by the apartment associations (such as Energy Performance Certificate, audit). The calculation of the GHG emission savings result shall be based on the model of SA Kredex/Enterprise Estonia for energy consumption and other relevant data. The results achieved shall be delivered at the end of the supporting activities. |

## **E. COMPONENT 5: SUSTAINABLE TRANSPORT**

The component of the Estonian recovery and resilience plan aims at addressing the challenge of decarbonising the transport sector. The objectives of the component are to reduce emissions and incentivise the uptake of sustainable modes of transport.

The reform and investments of the component support the development of the cross-border Rail Baltic project, connecting the three Baltic capitals and countries with Poland and the rest of the Union. The measures in the component aim at connecting the Rail Baltic with other national railways and other TEN-T hubs (Tallinn Airport and Old Port) and facilitating access to its local stops on foot or by bicycle.

The component supports addressing the Country Specific Recommendation to focus investments on resource efficiency and sustainable transport contributing to decarbonisation of the economy (Country Specific Recommendation 3 in 2019 and in 2020).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

### **E.1. Description of the reforms and investments for non-repayable financial support**

#### ***5.1. Reform: Deploy safe, green, competitive, needs-based and sustainable transport and energy infrastructure***

The objective of the reform is to reduce the CO<sub>2</sub> emissions of the transport sector and incentivise the uptake of sustainable modes of transport.

The measure consists of adoption and implementation of the new Transport and Mobility Development Plan and the related Implementation Plan. The focus of the Plan is to reduce the environmental footprint of transport systems and it shall include measures to develop interconnected and shared mobility in urban areas at the expense of private cars and promote a comprehensive framework of light mobility (on foot or bicycle) in areas outside major urban centres. The Plan shall include railway investments that shall be directed towards increasing the speed and safety of journeys and adding connections for both passenger and freight transport. The key actions under this Plan to be implemented within the timeline of the Recovery and Resilience Facility include building and extending the electrified railway from Tallinn to Tartu and harmonising the public transport system in the Tallinn capital region (ticketing systems and pricing).

The implementation of the reform shall be completed by 30 June 2026.

#### ***5.2. Investment: Construction of a section of the westbound Tallinn-Rohuküla railway***

The investment aims to connect by railway the Western region Läänemaa with Tallinn and with the international TEN-T junctions such as Tallinn Airport, the Rail Baltic and ferry connections from Tallinn's Old Port.

Support shall be given to the national railway infrastructure manager Eesti Raudtee to construct a 15 km section of one-track electrified railway between the stations of Turba (where the current connection ends) and Risti. The rest of the track until the station of Rohuküla – a ferry port with connections to islands of Hiiumaa and Vormsi – is expected to be financed from the ERDF and national budget and is expected to be finalised in 2026. The completion of the total length of

Tallinn-Rohuküla railway shall connect the Western region to the international TEN-T hubs in Tallinn.

The implementation of the investment shall be completed by 31 December 2024.

### **5.3. *Investment: Construction of the Rail Baltic multimodal joint terminal in Tallinn***

The objective of the measure is to increase the share of sustainable mobility in Tallinn region.

The Tallinn terminal is expected to be the starting point of Rail Baltic. The terminal shall consist of a terminal building, railway infrastructure and the surrounding infrastructure, of which the terminal building shall be financed from the Recovery and Resilience Facility. The rest is expected to be financed from the Connecting Europe Facility.

The implementation of the investment shall be completed by 31 March 2026.

### **5.4. *Investment: Construction of the Tallinn Old Port tram line***

The objective of the measure is to increase the share of sustainable mobility in the Tallinn region. To this end, the measure aims to connect Rail Baltic to sea connections with the Nordic countries through Tallinn Old Port.

Support shall be given to the Tallinn City Transport Authority, responsible for operating public transport in Tallinn, to construct a new tramline of around 2 km which shall connect Tallinn Airport, Rail Baltic hub, the city centre, the Old Port and the regional train station.

The implementation of the investment shall be completed by 30 June 2024.

### **5.5. *Investment: Municipalities' investments in bike- and walkways***

The objective of the measure is to reduce car dependency and increase sustainable mobility in areas outside the three major urban centres (Tallinn, Tartu, Pärnu), where the financial capacity of municipalities is an obstacle to development of safe and climate-friendly bicycle and pedestrian corridors.

Support shall be given to municipalities for the construction of 24 km of bike- and walkways infrastructure to ensure safe and sustainable access to public services, including public transport, and workplaces. Attention will be also paid to the Rail Baltic local stops and connection with existing cycling and pedestrian network.

The measure complements a similar measure expected to be financed from the ERDF, which helps increase mobility by bike in the three major urban centres of Tallinn, Tartu and Pärnu.

The implementation of the investment shall be completed by 31 December 2025.

## **E.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name  | Qualitative indicators (for milestones)                           | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target   |
|-------------------|---|--------------------|---|---|---------------------------------------|----------|------|------------------------------------|------|--|
|                   |   |                    |   |   | Unit of measure                       | Baseline | Goal | Quarter                            | Year |  |
| 81                | 5.1 Deployment of safe, green, competitive, needs-based and sustainable transport and energy infrastructure | Milestone          | Adoption of the Transport and Mobility Development Plan 2021-2035 by the Government | Adoption of the Transport and Mobility Development Plan 2021-2035 |                                       |          |      | Q1                                 | 2022 | <p>The Transport and Mobility Development Plan 2021-2035 shall be approved by the Government. It shall include the creation of the Tallinn capital region common transport system, actions to facilitate uptake of local biomethane, actions to develop sustainable and active urban mobility in bigger towns following the logic of integrated transport corridors, planning multimodal infrastructure, increasing the connections, speed and safety of rail, making the maritime transport sector more competitive and greener and connect it multimodally, developing faster and safer road transport.</p> <p>The plan shall include a target to reduce CO2 emissions by 700 000 tons (or 30%) compared to 2018 levels and reach a share of renewables in the energy consumed in the transport sector of 24% by 2035.</p> |

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name  | Qualitative indicators (for milestones) | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target   |
|-------------------|---|--------------------|---|---|---------------------------------------|----------|------|------------------------------------|------|--|
|                   |   |                    |   |   | Unit of measure                       | Baseline | Goal | Quarter                            | Year |  |
| 82                | 5.1 Deployment of safe, green, competitive, needs-based and sustainable transport and energy infrastructure | Milestone          | Adoption of the Implementation Plan for green sustainable public transport development of the Transport and Mobility Development Plan 2021-2035 | Adoption of the Implementation Plan     |                                       |          |      | Q4                                 | 2022 | The implementation plan shall be approved by the Steering Committee of the Transport and Mobility Development Plan 2021-2035. It shall include the creation of the Tallinn capital region common transport system, actions to facilitate uptake of local biomethane, actions to develop sustainable and active urban mobility in bigger towns following the logic of integrated transport corridors, planning multimodal infrastructure, increasing the connections, speed and safety of rail, making the maritime transport sector more competitive, greener and connect it multimodally, developing faster and safer road transport. The implementation plan shall include an annual reporting obligation on the responsible minister to the Government. |

| Sequential Number | Related Measure (Reform or Investment)                | Milestone / Target | Name  | Qualitative indicators (for milestones) | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target   |
|-------------------|---|--------------------|---|---|---------------------------------------|----------|------|------------------------------------|------|--|
|                   |   |                    |   |   | Unit of measure                       | Baseline | Goal | Quarter                            | Year |  |
| 93                | 5.5 Municipalities' investments in bike- and walkways | Target             | Bike- and walkways infrastructure completed |   | Km of bike- and walkways              | 0        | 24   | Q4                                 | 2025 | At least 24 kilometres of bike and walkways shall be built as a result of the support scheme. These shall generally be new ways. In justified cases, the reconstruction of existing bike- and walkways shall be allowed, such as if the width of the existing walkway does not meet the standards, making it impossible for walkers and cyclists to move simultaneously in a safe and non-interference manner. |

## **F. COMPONENT 6: HEALTHCARE AND SOCIAL PROTECTION**

This component of the Estonian recovery and resilience plan aims to address the challenges related to the resilience of and access to the health care system, the adequacy of the social safety net, accessibility of social services and youth unemployment. The objectives of the measures included in the component are to: address workforce shortages in the health sector, strengthen primary and hospital care, extend the duration of the unemployment insurance benefit in periods of high unemployment, improve access to social services, address youth unemployment and reduce the gender pay gap.

The component supports addressing the Country Specific Recommendation, on improving the accessibility and resilience of the health system, including by addressing the shortages of health workers, strengthening primary care and ensuring the supply of critical medical products (Country Specific Recommendation 1 in 2020), on improving the social safety net, increasing access to social services in an integrated way (Country Specific Recommendation 2 in 2019 and Country Specific Recommendation 2 in 2020) and on reducing the gender pay gap, including by improving wage transparency (Country Specific Recommendation 2 in 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the 'Do no significant harm' Technical Guidance (2021/C58/01).

### **F.1. Description of the reforms and investments for non-repayable financial support**

#### ***6.1. Reform: A comprehensive change in the organisation of health care in Estonia***

The objective of the reform is to improve the resilience of the Estonian health system, including for coping with crises, thus ensuring that people have access to high-quality, integrated healthcare throughout Estonia. The reform consists of the following elements:

- (i) A Hospital Development Plan shall be adopted by 31 December 2024 which shall outline the consolidated hospital network in order to improve efficiency and infrastructure, and define the specialisation of hospitals to reduce the high rate of unmet need for medical care.
- (ii) Health workforce shortages shall be addressed by three measures:
  - a. A strategic framework shall be adopted by 31 December 2022 which shall outline the provision of health services in the various health sectors, in particular specialised care, the allocation of physical and human resources, and the funding mechanism to ensure the provision of good quality healthcare across the country. By 2023, the admission to nursing training shall be increased by 5% compared to 2020.
  - b. The reimbursement scheme for doctors, nurses and pharmacists shall be amended by 31 March 2023 in order to incentivise the health workforce to work in remote areas.
  - c. The agreement between the Ministry of Social Affairs and the University of Tartu shall be amended to lay down requirements for the gradual increase of admission in certain professions with shortages, in particular general practitioners, psychiatrists, internal diseases. The amendment shall enter into force by 30 June 2026.

#### ***6.2. Investment: Establishment of the Northern Estonia Medical Campus***

The investment aims to contribute to the optimisation of the Estonian hospital network, increase efficiency and contribute to reducing the unmet need for specialised care, which is one of the

highest in the Union. The investment consists of building the Northern Estonia Medical Campus as a centre of excellence in Estonia where high quality health care is provided in a modern and safe environment for two-thirds of the Estonian population. The Northern Estonia Medical Campus shall be established through the consolidation of two existing Tallinn hospitals, notably the East and West Tallinn Central Hospitals. The reduction of hospital buildings is expected to improve the services provided and a new modern facility is expected to help cope with the pressure caused by the growing number of patients and increase the availability and quality of health care services as well as help in health workforce retention in Estonia. The Recovery and Resilience Facility finances the construction of the Campus only partially.

The implementation of the investment shall be completed by 30 June 2026.

### **6.3. *Reform: Strengthening primary health care***

The objective of the reform is to ensure access to general medical care, improve the continuity of treatment and make provision of primary health care more flexible and human-centred. The reform consists of three sub-measures. First, in order to improve access to specialist care, the use of e-consultation in primary care was extended on 30 September 2020 allowing patients to be advised by a specialist without having to consult them face-to-face. Second, legislation entered into force on 31 March 2021 improving access to health care by increasing the level of support for general practitioners and by modifying the funding model for general medical care with a view to making working in primary health centres in remote areas more attractive. Third, the Health Services Organisation Act shall be amended as regards the management of the list of patients, ensuring continuity of primary care and extending the rights of nurses to prescribe medicines to patients.

The implementation of the reform shall be completed by 31 March 2023.

### **6.4. *Reform: Renewal of the eHealth Governance***

The objective of the reform is to update the governance framework for eHealth with a view to better responding to the needs of the health system and ensure the development of digital solutions to support a sustainable health system in Estonia. The reform consists of adopting a revised national governance model for information and communication technology of the current health system to provide a forward-looking new eHealth governance model and promote a common understanding among partners of the division of roles and responsibilities in eHealth.

The implementation of the reform shall be completed by 30 June 2023.

### **6.5. *Investment: Capacity building for multipurpose medical helicopters***

The objective of the investment is to ensure that – in case of events requiring urgent medical assistance (such as heavy traffic accidents, mass-affected rescue events, medical assistance on board ships) – rapid access to health care services is available for those who live in peripheral areas, especially from islands, through specialised helicopters. The investment consists of the purchase of two multifunctional medical helicopters, including ancillary equipment, maintenance supplies and initial training of personnel needed to operate the helicopters, as well as the construction of landing bases and landing sites at emergency medical centres. It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In

particular, the multipurpose helicopters shall be of the best available technology with the lowest environmental impacts in the sector.

The implementation of the investment shall be completed by 30 June 2026.

#### **6.6. *Investment: Providing labour market measures to reduce youth unemployment***

The objective of the investment is to help young people with little work experience get into employment. The legislation on the renewed “My first job” (MIT) scheme shall have two components: a wage subsidy paid to the employer and the reimbursement of the training costs of a young person. A wage subsidy and training allowance (up to EUR 2 500) shall be paid to an employer who employs a young person between 16 and 29 years old and registered as unemployed with no or only short-term work experience. The MIT measure shall be integrated with other services, in particular with follow-on support to young people and employers beyond the start of the employment relationship. The aim is, in particular, to prevent the premature end of the employment relationship and to identify, in cooperation with the employer and the young person, the training needs of the young person. A reinforced Youth Guarantee Action Plan shall be presented by 30 June 2022 which shall support the implementation of the investment with additional measures supporting young unemployed. In particular, it shall include measures to improve the skills of young people, define actions to prevent and address youth unemployment, including outreach and prevention of NEET-situation and define key parties and their roles to prevent and deal with youth unemployment.

The implementation of the investment shall be completed by 31 December 2025.

#### **6.7. *Reform: Extending the duration of unemployment insurance benefits***

The objective of the reform is to address the long-standing challenge of improving the adequacy of the social safety net. The reform consists of the establishment of a mechanism to activate the extension of the period of the unemployment insurance benefits by 60 days, notably when the registered unemployment rate exceeds the non-accelerating inflation/wage rate of unemployment (NAIRU/NAWRU) by a significant margin. The mechanism of prolongation and the margin, which shall not be higher than 2%, shall be agreed upon in dialogue with the social partners. The measure aims at helping people to bridge a longer period of unemployment in difficult labour market conditions.

The reform shall be implemented by 30 June 2023.

#### **6.8. *Reform: Long-term care***

The objective of the reform is to improve the provision of long-term care. The reform consists of the following elements:

(i) Amendments to the Social Welfare Act shall lay down the definition of long-term care and require local authorities to take into account the principle that a person must be able to live as long as possible in his or her home, in his or her usual environment, with sufficient quality services available. The amendments shall enter into force by 30 June 2022.

(ii) An Action Plan on providing social and health care in an integrated way shall provide for the establishment of an integrated care model throughout Estonia, lay down the roles and responsibilities of the actors involved and define the financing of the system. The Action Plan shall be adopted by 31 December 2022.

(iii) A Decree of the Minister of Social Protection shall define the design and characteristics of care services by local authorities to people with lower care needs, as well as the conditions for their implementation. In particular, it shall include adequate investments and development of services by local authorities to provide for independent living for older people with lower care needs and people with disabilities to support independent living. The Decree of the Minister of Social Protection by 31 December 2024.

(iv) Legislative amendments aiming at improving the support system for children with higher care needs shall provide for the modernisation and integration of services for children with higher care needs. In particular, services in the health, education, social protection and employment areas shall be integrated in order to provide comprehensive support for families under care burden. The current support system shall be simplified and the assessments of care needs consolidated so that parents have a secure point of contact for initial advice and support. The legislative amendments shall enter into force by 31 March 2025.

#### **6.9. Reform: Reducing gender pay gap**

The objective of the reform is to reduce the gender pay gap. The reform consists of the adoption of the Welfare Development Plan for 2023-2030 and its implementation and the roll out of a digital gender pay gap tool.

The Welfare Development Plan shall be adopted by 31 March 2024 and it shall lay down the strategic objectives of reducing social inequalities and poverty, ensuring gender equality and greater social inclusion, and promoting equal treatment of persons belonging to minority groups. The Development Plan shall outline measures to reduce the gender pay gap, in particular by increasing wage transparency, reducing the prevalence and negative impact of gender stereotypes on the lives and decisions of women and men, including concerning educational and career choices and carrying the care burden, and supporting a more effective implementation of the Gender Equality Act.

A digital gender pay gap tool shall be rolled out by 31 March 2024 which shall offer employers a simple and easy tool to receive and analyse data and information concerning the gender pay gap and its possible reasons in their organisations and thereby supporting them in making informed decisions and taking effective action to implement the principle of equal pay and to reduce the gender pay gap.

The implementation of the reform shall be completed by 31 March 2024.

**F.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment)                                   | Milestone / Target | Name   | Qualitative indicators (for milestones) | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target   |

## **G. AUDIT AND CONTROL**

### **G.1. Description of the reforms and investments for non-repayable financial support**

The objective of the reform is to set the legal framework for the implementation and monitoring of the recovery and resilience plan. It shall define the roles played by relevant public entities in the implementation of the plan and how these bodies shall carry out their tasks.

The implementation of the reform shall be completed by 31 December 2021.

**G.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support**

| Sequential Number | Related Measure (Reform or Investment)    | Milestone / Target | Name   | Qualitative indicators (for milestones)   | Quantitative indicators (for targets) |          |      | Indicative timeline for completion |      | Description of each milestone and target  |
|-------------------|---|--------------------|--|---|---------------------------------------|----------|------|------------------------------------|------|---|
|                   |   |                    |  |   | Unit of measure                       | Baseline | Goal | Quarter                            | Year |   |
| 124               | Monitoring and implementation of the plan | Milestone          | Entry into force of the Government Regulation on the legal framework for the implementation and monitoring of the recovery and resilience plan of Estonia. | Entry into force of government regulation |                                       |          |      | Q4                                 | 2021 | Entry into force of the regulation establishing the legal framework for the implementation and monitoring of the recovery and resilience plan of Estonia before the first payment request is made.<br>The regulation shall at least define the authorities involved in the implementation of the recovery and resilience plan of Estonia and their tasks including the tasks of the Ministry of Finance, the sectoral ministries and the State Shared Service Center. |

## 2. Estimated total cost of the recovery and resilience plan

The estimated total cost of the recovery and resilience plan of Estonia is EUR 982 490 000.

### SECTION 2: FINANCIAL SUPPORT

#### 1. Financial contribution

The instalments referred to in Article 2(2) shall be organised in the following manner:

First Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name  |
|-------------------|---|--------------------|---|
| 23                | 2.1. Green transition of enterprises  | Milestone          | Creation of a Green Transition Task Force to implement and monitor the green transition   |
| 28                | 2.3. Green technology development programmes  | Milestone          | Establishment of a working group to plan and set up the development programme   |
| 37                | 2.6. Green Fund   | Milestone          | Signature of contractual agreement between the Ministry of Economic Affairs and Communications and SmartCap   |
| 38                | 2.6. Green Fund   | Milestone          | Adoption of the investment policy document by SmartCap  |
| 44                | 3.1. Creation and development of a centre of excellence for data governance and open data | Milestone          | Setting up a data management team in the Statistical Office, the Ministry of Economic Affairs and Communications and the State Information System Authority                                       |
| 70                | 4.4. Boosting the green transition in the energy economy                                  | Milestone          | Government decision on investments needed to alleviate the defence related height restrictions on wind parks  |
| 71                | 4.4. Boosting the green transition in the energy economy                                  | Milestone          | Adoption of the decision of the Government on the initiation of the preparation process of the National Development Plan of the Energy Sector, the designation of those responsible and deadlines |

| Sequential Number | Related Measure (Reform or Investment)   | Milestone / Target | Name  |
|-------------------|--|--------------------|---|
| 74                | 4.5. Programme to strengthen the electricity grid to increase renewable energy production capacity and adapt to climate change (such as protection against storms) | Milestone          | Signature of network investment co-financing contract with transmission system operator   |
| 81                | 5.1. Deploy safe, green, competitive, needs-based and sustainable transport and energy infrastructure  | Milestone          | Adoption of the Transport and Mobility Development Plan 2021-2035 by the Government   |
| 86                | 5.3. Construction of the Rail Baltic multimodal joint terminal in Tallinn  | Milestone          | Award of the contract for the construction of the Rail Baltic multimodal terminal building in Tallinn   |
| 89                | 5.4. Construction of the Tallinn Old Port tram line  | Milestone          | Completion of the tramway construction project design   |
| 99                | 6.2. Establishment of the Northern Estonia Medical Campus  | Milestone          | Signature of the design contract of the Northern Estonia Medical Campus   |
| 106               | 6.3. Strengthening primary health care   | Milestone          | Entry into force of the Decree of the Government, which amends the list of health care services of the Estonian Health Insurance Fund on access to specialised medical care                       |
| 107               | 6.3. Strengthening primary health care   | Milestone          | Entry into force of amendments to the Decree of the Government which amends the list of health care services of the Estonian Health Insurance Fund on costs and services of general practitioners |
| 113               | 6.6. Providing labour market measures to reduce youth unemployment   | Milestone          | Entry into force of the Decree of the Minister of Health and Labour to strengthen the “My First Job” scheme   |
| 124               | Audit and Control  | Milestone          | Entry into force of the Government Regulation on the legal framework for the implementation and monitoring of the recovery and resilience plan of Estonia.  |
|                   |  | Instalment Amount  | EUR 145 394 882   |

Second Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name  |
|-------------------|---|--------------------|---|
| 1                 | 1.1. Digital transformation in enterprises  | Milestone          | Call for proposals with award criteria and award conditions   |
| 11                | 1.4. Skills reform for the digital transformation of businesses   | Milestone          | Entry into force of secondary legislation setting out the terms of support for the development of digital skills              |
| 16                | 1.5.1. Supporting the competitiveness of enterprises in foreign markets - Country and regional strategies                   | Milestone          | Preparation of the development of strategies  |
| 19                | 1.5.2. Supporting the competitiveness of enterprises in foreign markets - Innovative business centres in key export markets | Milestone          | Preparatory analysis to define the content and the locations of business centres  |
| 21                | 1.5.3. Supporting the competitiveness of enterprises in foreign markets - Global e-export impact groups and virtual stages  | Milestone          | Setting-up of impact groups and selection of destinations for global digital missions   |
| 25                | 2.2. Green skills to support the green transition of enterprises  | Milestone          | Entry into force of secondary legislation setting out the terms of support for the development of green skills                |
| 32                | 2.4. Modernisation of the business models in manufacturing companies  | Milestone          | Entry into force of the ministerial decree setting out the terms and conditions of grant eligibility                          |
| 34                | 2.5. Deployment of resource-efficient green technologies  | Milestone          | Publication of call for proposals for grants  |
| 51                | 3.4. #Bürokratt programme (national virtual assistant platform and ecosystem)   | Target             | Access to digital public services through the virtual assistant platform  |
| 54                | 3.5. Reconfiguration of basic digital services and safe transition to cloud infrastructure                                  | Milestone          | Development of centrally delivered/shared IT base services  |
| 65                | 4.2. Support for the renovation of apartment buildings  | Milestone          | Publication of calls for applications for residential apartment buildings renovation grants                                   |
| 68                | 4.3. Support for the renovation of small residential buildings  | Milestone          | Published calls for renovation grant  |
| 84                | 5.2. Construction of a section of the westbound Tallinn-Rohuküla railway  | Milestone          | Award of a railway construction contract for the construction of a railway on the sections of Turba-Ellamaa and Ellamaa-Risti |
| 90                | 5.4. Construction of the Tallinn Old Port tram line   | Milestone          | Award of works contract   |
| 114               | 6.6. Providing labour market measures to reduce youth unemployment  | Milestone          | Youth Guarantee Action Plan   |
| 117               | 6.8. Long-term care   | Milestone          | Entry into force of amendments to the Social Welfare Act  |

|  |  |                      |                 |
|--|--|----------------------|-----------------|
|  |  | Instalment<br>Amount | EUR 145 394 882 |
|--|--|----------------------|-----------------|

Third Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 7                 | 1.3. Development of digital waybills services   | Target             | eFTI (electronic Freight Transport Information) platforms development  |
| 24                | 2.1. Green transition of enterprises  | Milestone          | Adoption of the Circular Economy Action Plan by the Green Transition Task Force  |
| 41                | 2.7. Creating opportunities for the uptake of renewables-based green hydrogen technologies            | Milestone          | Entry into force of the ministerial decree setting out the terms and conditions for granting support   |
| 47                | 3.2. Development of event services and proactive digital public services for individuals              | Target             | Launch of personal life event services and/or pro-active services  |
| 49                | 3.3. Development of event services and digital gateway for entrepreneurs                              | Target             | Deployment of IT developments contributing to the implementation of the business event services and gateway  |
| 63                | 4.1. Energy efficiency promotion  | Milestone          | Conclusion of the cooperation agreement stipulating conditions for cooperation between SA Kredex/Enterprise Estonia and county development centers |
| 76                | 4.6. Programme to boost energy production in industrial areas   | Milestone          | Publication of a call for proposals for projects boosting energy production in industrial sites  |
| 78                | 4.7. Pilot Energy Storage Programme   | Milestone          | Publication of a call for proposals for a pilot energy storage programme   |
| 82                | 5.1. Deploy safe, green, competitive, needs-based and sustainable transport and energy infrastructure | Milestone          | Adoption of the Implementation Plan for green sustainable public transport development of the Transport and Mobility Development Plan 2021-2035    |
| 92                | 5.5. Municipalities' investments in bike- and walkways  | Milestone          | Call for proposals for grants  |
| 95                | 6.1. A comprehensive change in the organisation of health care in Estonia                             | Milestone          | Approval of the Strategic Framework for addressing health workforce shortages  |

| Sequential Number | Related Measure (Reform or Investment)                                    | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 96                | 6.1. A comprehensive change in the organisation of health care in Estonia | Milestone          | Entry into force of the Decree of the Minister of Health and Labour and Health on the Service Organisation Act amending the reimbursement system for doctors, nurses and pharmacists |
| 108               | 6.3. Strengthening primary health care                                    | Milestone          | Entry into force of amendments to the Health Services Organisation Act   |
| 109               | 6.4. Renewal of the eHealth Governance                                    | Milestone          | Approval of the eHealth Governance Framework and its implementation roadmap  |
| 116               | 6.7. Extending the duration of unemployment insurance benefits            | Milestone          | Entry into force of the amendments to the Unemployment Services and Benefits Act and the Unemployment Insurance Act  |
| 118               | 6.8. Long-term care   | Milestone          | Action Plan on an integrated care model  |
| 122               | 6.9. Reducing gender pay gap  | Milestone          | Digital gender pay gap tool  |
|                   |   | Instalment Amount  | EUR 145 394 882  |

Fourth Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name  |
|-------------------|---|--------------------|---|
| 2                 | 1.1. Digital transformation in enterprises  | Target             | Award of grants                                 |
| 12                | 1.4. Skills reform for the digital transformation of businesses   | Target             | Enrolment in training activities                |
| 14                | 1.4. Skills reform for the digital transformation of businesses   | Target             | Number of new upskilling and retraining modules |
| 17                | 1.5.1. Supporting the competitiveness of enterprises in foreign markets - Country and regional strategies | Milestone          | Procurement of studies                          |
| 26                | 2.2. Green skills to support the green transition of enterprises  | Target             | Number of upskilling and retraining modules     |

| Sequential Number | Related Measure (Reform or Investment)   | Milestone / Target | Name  |
|-------------------|--|--------------------|---|
| 29                | 2.3. Green technology development programmes   | Milestone          | Set up of the Green Technologies Development Programme  |
| 35                | 2.5. Deployment of resource-efficient green technologies                                   | Target             | Number of contracts awarded following the call for proposals  |
| 55                | 3.5. Reconfiguration of basic digital services and safe transition to cloud infrastructure | Target             | Deployment of national private cloud infrastructure by public authorities   |
| 56                | 3.5. Reconfiguration of basic digital services and safe transition to cloud infrastructure | Milestone          | Extension of the cloud infrastructure to the data embassy   |
| 61                | 3.8. Construction of very high capacity broadband networks                                 | Target             | Rollout of very high capacity broadband network to new sites  |
| 91                | 5.4. Construction of the Tallinn Old Port tram line  | Target             | New tramway line in operation   |
| 97                | 6.1. A comprehensive change in the organisation of health care in Estonia                  | Target             | Admission to nursing training   |
| 100               | 6.2. Establishment of the Northern Estonia Medical Campus                                  | Milestone          | Signature of the contracts for the excavation and for the water supply and electricity, and for the reinforced concrete structures of the Northern Estonia Medical Campus |
| 101               | 6.2. Establishment of the Northern Estonia Medical Campus                                  | Milestone          | Signature of the contract for the construction of the Northern Estonia Medical Campus   |
| 110               | 6.5. Capacity building for multipurpose medical helicopters                                | Milestone          | Award of contracts for multifunctional medical helicopter capabilities  |
| 121               | 6.9. Reducing gender pay gap   | Milestone          | Adoption of the Welfare Development Plan 2023-2030 by the government  |
| 123               | 6.9. Reducing gender pay gap   | Milestone          | Digital gender pay gap tool   |
|                   |  | Instalment Amount  | EUR 145 394 882   |

Fifth Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment) | Milestone / Target | Name |
|-------------------|--|--------------------|------|
|-------------------|--|--------------------|------|

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 4                 | 1.2. Development of e-construction  | Milestone          | Adoption of international standards and best practices for the use of digital technologies in construction   |
| 8                 | 1.3. Development of digital waybills services   | Target             | eCMR (electronic Consignment Note) interface developments  |
| 15                | 1.4. Skills reform for the digital transformation of businesses                                 | Target             | Review of qualification standards for ICT specialists.   |
| 39                | 2.6. Green Fund   | Target             | Volume of investments in venture capital funds or equity investments in enterprises  |
| 42                | 2.7. Creating opportunities for the uptake of renewables-based green hydrogen technologies      | Milestone          | Technologies and equipment to create complete green hydrogen value chains  |
| 57                | 3.5. Reconfiguration of basic digital services and safe transition to cloud infrastructure      | Target             | Migration of critical systems to the national cloud infrastructure of the data embassy   |
| 58                | 3.5. Reconfiguration of basic digital services and safe transition to cloud infrastructure      | Target             | Central security testing of public authorities' information systems  |
| 59                | 3.6. Establishing the strategic analysis of money laundering and terrorist financing in Estonia | Milestone          | Entry into force of the amendment of the Money Laundering and Terrorist Financing Prevention Act and of other legislative, administrative and contractual changes needed for the Centre for Strategic Analysis                       |
| 64                | 4.1. Energy efficiency promotion  | Milestone          | Digital tools to facilitate access to information on renovation including visualising the results of the renovation and estimating the cost of renovation have become operational  |
| 66                | 4.2. Support for the renovation of apartment buildings  | Target             | Dwellings with improved energy performance   |
| 69                | 4.3. Support for the renovation of small residential buildings                                  | Target             | Dwellings with improved energy performance   |
| 72                | 4.4. Boosting the green transition in the energy economy  | Milestone          | Entry into force of the relevant primary and/or secondary legislation and publication of guidance material to alleviate the barriers for the installation of renewable energy generating installations and energy storage facilities |

| Sequential Number | Related Measure (Reform or Investment)                                    | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 85                | 5.2. Construction of a section of the westbound Tallinn-Rohuküla railway  | Target             | Completion of new railway (ready for traffic)  |
| 87                | 5.3. Construction of the Rail Baltic multimodal joint terminal in Tallinn | Milestone          | Completion of the terminal passage   |
| 94                | 6.1. A comprehensive change in the organisation of health care in Estonia | Milestone          | Entry into force of the Government Regulation on the Hospital network development plan                 |
| 102               | 6.2. Establishment of the Northern Estonia Medical Campus                 | Target             | 10% of the volume of the construction contract is fulfilled  |
| 111               | 6.5. Capacity building for multipurpose medical helicopters               | Target             | Reception of helicopters   |
| 119               | 6.8. Long-term care   | Milestone          | Entry into force of the decree of the Minister of Social Protection                                    |
| 120               | 6.8. Long-term care   | Milestone          | Entry into force of the legislative amendments of the support system for children with high care needs |
|                   |   | Instalment Amount  | EUR 145 394 882  |

Sixth Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 3                 | 1.1. Digital transformation in enterprises  | Target             | Award of grants  |
| 5                 | 1.2. Development of e-construction  | Milestone          | Availability of public services on the e-construction platform |
| 6                 | 1.2. Development of e-construction  | Target             | Completion of development and prototyping projects             |
| 9                 | 1.3. Development of digital waybills services   | Target             | Total number of projects completed                             |
| 33                | 2.4. Modernisation of the business models in manufacturing companies                      | Target             | Number of projects supported                                   |
| 45                | 3.1. Creation and development of a centre of excellence for data governance and open data | Target             | Completion of data quality improvement projects                |
| 46                | 3.1. Creation and development of a centre of excellence for data governance and open data | Target             | Publication of datasets on the national open data portal       |

| Sequential Number | Related Measure (Reform or Investment)   | Milestone / Target | Name  |
|-------------------|--|--------------------|---|
| 48                | 3.2. Development of event services and proactive digital public services for individuals | Target             | Launch of personal event services and pro-active services   |
| 50                | 3.3. Development of event services and digital gateway for entrepreneurs                 | Target             | Deployment of IT developments contributing to the implementation of the business event services and gateway |
| 52                | 3.4. #Bürokratt programme (national virtual assistant platform and ecosystem)            | Target             | Introduction of the Bürokratt virtual assistant in digital public services environments                     |
| 53                | 3.4. #Bürokratt programme (national virtual assistant platform and ecosystem)            | Target             | Access to digital public services through the virtual assistant platform                                    |
| 62                | 3.8. Construction of very high capacity broadband networks                               | Target             | Rollout of very high capacity broadband network to new sites  |
| 73                | 4.4. Boosting the green transition in the energy economy                                 | Milestone          | Adoption of the National Development Plan of the Energy Sector by the Government                            |
| 93                | 5.5. Municipalities' investments in bike- and walkways                                   | Target             | Bike- and walkways infrastructure completed   |
| 103               | 6.2. Establishment of the Northern Estonia Medical Campus                                | Target             | 50% of the volume of the construction contract is fulfilled   |
| 104               | 6.2. Establishment of the Northern Estonia Medical Campus                                | Milestone          | Signature of the contract for equipping the Northern Estonia Medical Campus to make it fully operational    |
| 115               | 6.6. Providing labour market measures to reduce youth unemployment                       | Target             | Number of young people participating in the "My First Job" scheme   |
|                   |  | Instalment Amount  | EUR 145 394 882   |

Seventh Instalment (non-repayable support):

| Sequential Number | Related Measure (Reform or Investment)                          | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 10                | 1.3. Development of digital waybills services                   | Milestone          | Ex-post evaluation of the development and deployment of the digital waybills |
| 13                | 1.4. Skills reform for the digital transformation of businesses | Target             | Completion of training activities  |

| Sequential Number | Related Measure (Reform or Investment)   | Milestone / Target | Name  |
|-------------------|--|--------------------|---|
| 18                | 1.5.1. Supporting the competitiveness of enterprises in foreign markets - Country and regional strategies  | Target             | Number of country and regional export strategies  |
| 20                | 1.5.2. Supporting the competitiveness of enterprises in foreign markets - Innovative business centres in key export markets  | Target             | Number of business centres opened   |
| 22                | 1.5.3. Supporting the competitiveness of enterprises in foreign markets - Global e-export impact groups and virtual stages   | Target             | Number of missions carried out by the global impact groups and number of major events in which Estonia was represented through 'virtual stages' |
| 27                | 2.2. Green skills to support the green transition of enterprises   | Target             | People taking part in upskilling and retraining programmes  |
| 30                | 2.3. Green technology development programmes   | Target             | Number of clusters supported through the Green Technology Development Programme   |
| 31                | 2.3. Green technology development programmes   | Target             | Number of start-ups supported through the Green Technology Development Programme and which have received private investment                     |
| 36                | 2.5. Deployment of resource-efficient green technologies   | Target             | Number of projects completed  |
| 40                | 2.6. Green Fund  | Target             | Volume of investments in venture capital funds or equity investments in enterprises   |
| 43                | 2.7. Creating opportunities for the uptake of renewables-based green hydrogen technologies   | Target             | Grants allocated to renewables-based green hydrogen technologies representing at least EUR 49.49 million  |
| 60                | 3.7. Information system for real-time strategic analysis of money laundering and terrorist financing   | Milestone          | Development of the new real-time ICT analysis system for the Centre for Strategic Analysis, and delivery to the Financial Intelligence Unit     |
| 67                | 4.2. Support for the renovation of apartment buildings   | Target             | Estimated annual reduction of greenhouse gas emissions  |
| 75                | 4.5. Programme to strengthen the electricity grid to increase renewable energy production capacity and adapt to climate change (such as protection against storms) | Target             | Additional renewable energy connection capacity created via investments into the transmission network   |
| 77                | 4.6. Programme to boost energy production in industrial areas  | Target             | Additional connection capacity for renewable electricity production in or near industrial sites connected to the grid                           |

| Sequential Number | Related Measure (Reform or Investment)  | Milestone / Target | Name   |
|-------------------|---|--------------------|--|
| 79                | 4.7. Pilot Energy Storage Programme   | Target             | Additional heat storage capacity resulting from investment support   |
| 80                | 4.7. Pilot Energy Storage Programme   | Target             | Additional electricity storage capacity resulting from investment support  |
| 83                | 5.1. Deploy safe, green, competitive, needs-based and sustainable transport and energy infrastructure | Milestone          | Implementation of Transport and Mobility Development Plan 2021-2035  |
| 88                | 5.3. Construction of the Rail Baltic multimodal joint terminal in Tallinn                             | Milestone          | Completion of the new railway station  |
| 98                | 6.1. A comprehensive change in the organisation of health care in Estonia                             | Milestone          | Entry into force of the Ministerial Regulation amending the agreement between the Ministry of Social Affairs and the University of Tartu on the shortage of doctors in certain specialisations |
| 105               | 6.2. Establishment of the Northern Estonia Medical Campus   | Milestone          | Completion of the construction works   |
| 112               | 6.5. Capacity building for multipurpose medical helicopters   | Target             | Completion of airbases built or expanded   |
|                   |   | Instalment Amount  | EUR 96 929 921   |

### SECTION 3: ADDITIONAL ARRANGEMENTS

#### 1. Arrangements for monitoring and implementation of the recovery and resilience plan

The monitoring and implementation of the Estonian recovery and resilience plan shall take place in accordance with the following arrangements:

The Ministry of Finance as the lead ministry and the State Shared Service Center shall ensure overall coordination, monitoring and implementation of the recovery and resilience plan. The State Shared Service Center shall perform the functions of the managing authority. The State Budget Department in the Ministry of Finance in cooperation with the State Shared Service Center shall carry out the tasks related to monitoring and evaluation.

Sectoral ministries and agencies shall perform the responsibilities assigned to them, related to the implementation of the plan. Their services shall also support the monitoring of the progress of the projects under their competency and maintain close cooperation with the State Shared Service Center and the Ministry of Finance. To this end, the existing Structural Funds Operating System (SFOS) shall be used to record all the data related to implementation and monitoring of the plan.

The Financial Control Department of the Ministry of Finance, the audit authority, shall carry out regular audits of the management and control systems put in place. It shall also prepare a summary

of the audits carried out for requests for payments. The Audit Authority shall also host the Anti-Fraud Co-ordinating Service.

All national and external sources shall be budgeted together in sector-specific programmes allowing transparent monitoring of sectoral funding and allowing the identification of risks and prevention of double funding.

## **2. Arrangements for providing full access by the Commission to the underlying data**

The State Shared Service Center as the managing authority shall hold the responsibility for submitting requests for payment to the European Commission and for drawing up the management declaration by which it certifies that the funds have been used for their intended purpose, that the information is complete, accurate and reliable and that the control system provides the necessary assurance. In addition, monitoring and evaluation shall also be ensured by the Ministry of Finance in cooperation with the State Shared Service Center.

Data related to the implementation and monitoring of the plan shall be stored in the existing integrated information system, the Structural Funds Operating System (SFOS). The SFOS is adapted to the requirements under Regulation (EU) 2021/241 for data collection, progress reports and requests for payment, including to collect indicators and other information necessary to demonstrate and report the achievement of milestones and targets. The SFOS shall be used by all actors involved in the implementation of the plan. The information in the SFOS shall continuously be updated on the progress and results of the plan including deficiencies identified and all corrective actions taken.

In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2.1 of this Annex, Estonia shall submit to the Commission a duly justified request for payment of the financial contribution. Estonia shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
