Subject:	Proposal for a Regulation of the European Parliament and of the Council laying down harmonised rules on artificial intelligence (Artificial Intelligence Act) and amending certain Union legislative acts - Preparation for the trilogue

INTRODUCTION

1. The Commission adopted the proposal for a Regulation laying down harmonised rules on artificial intelligence (Artificial Intelligence Act) on 21 April 2021.
2. The Council unanimously adopted its General Approach on the proposal on 6 December 2022.
3. The European Parliament (hereinafter: the EP) confirmed its position in a plenary vote on 14 June 2023.

4. Also on 14 June 2023, immediately after the vote in the EP, the co-legislators and the European Commission held the first political trilogue on the AI Act, during which all three institutions outlined their priorities for the negotiations and the technical level was given a broad mandate to work on the entire proposal.
5. On 18 July 2023 the second political trilogue was held, during which some of the less controversial parts of the proposal were agreed and compromise was found on most elements of the chapter concerning measures in support of innovation.
6. Since then ten technical meetings with the EP have taken place, in order to prepare the next batch of provisions for confirmation or agreement at the political level during the third political trilogue, which will take place on 2 and 3 October 2023 in Strasbourg.
7. Between 12 and 20 September 2023, the Presidency consulted the Working Party on Telecommunications and Information Society (hereinafter: WP TELECOM) on all compromise proposals that are going to be discussed during the third political trilogue on 2 and 3 October 2023, and it has addressed most concerns expressed by the delegations in the final wording of the compromise proposals, as presented in the Annex to this note.

II. CONFIRMATION OF ARTICLES PROVISIONALLY AGREED

8. During the technical meetings held since the second trilogue on 18 July 2023 until now, the following articles have been discussed and prepared for confirmation at political level:
 - **Articles 8-12**
 - **Article 51**
 - **Articles 53-55 (with the exception of Articles 54a and 54b)**
 - **Articles 60-68e (with the exception of Articles 63a 68b)**
 - **Articles 70-85**
 - **Annex VIII**
9. In Section I of the Annex to this note, delegations will find the amendments made to the text by the EP and the Council with regard to the articles mentioned above in the fourth column ("Draft Agreement"). As compared to the Commission's proposal, changes are marked as ***bold italics*** (additions) and ~~strikethrough~~ (deletions).

10. The rows marked as **green** have been provisionally agreed with the EP at the technical level. The rows marked as **yellow** have also been provisionally agreed, subject to final checks by the EP, and are likely to be turned green. Some elements in those rows have been placed in [square brackets] and some rows are marked in red, which means that they will be agreed at a later stage, subject to solutions on higher-level political issues such as prohibitions, governance, foundation models/general purpose AI systems or exceptions for law enforcement authorities. During the meetings of WP TELECOM held between 12 and 20 September 2023 delegations made several comments concerning these proposals, which have been duly taken into account by the Presidency.

The Presidency considers the compromise proposals in green and yellow to fall within the Council's Genral Approach from 6 December 2022, as amended by the revised mandate obtained from the Permanent Representatives Committee during its meeting on 14 July 2023, but it intends to ask the Committee for confirmation during its meeting on 29 September 2023.

III. POLITICAL ISSUES FOR POTENTIAL AGREEMENT DURING THE THIRD TRILOGUE

11. Apart from confirming the provisions listed in point II above, the co-legislators intend to discuss the following three topics with a view to reaching a provisional agreement at political level during the third trilogue:
- **Classification of AI systems as high-risk** (Recitals 32 and 32a, Articles 6 and 7, Article 51, Article 65a (*new*), subparagraph 2 of Annex III (*new*) and Section D of Annex VIII (*new*))
 - **List of high-risk AI use cases** (Annex III)
 - **Subject matter and scope** (Recitals 1 and 1a, Articles 1 and 2)

All three topics were thoroughly discussed in WP TELECOM on 20 September 2023. Based on the outcome of this discussion, the Presidency would like to ask the Permanent Representatives Committee for flexibilities concerning these three topics, so that it can

approach the trilogue negotiations on 2 and 3 October 2023 with a revised mandate. The proposals for the revised mandate on these three topics can be found in Section II of the Annex to this note.

12. Concerning **the classification of AI systems as high-risk (Recitals 32 and 32a, Articles 6 and 7, Article 51, Article 65a (new), subparagraph 2 of Annex III (new) and Section D of Annex VIII (new))**, the compromise proposal, as set out in Section II, point A of the Annex to this note, is based on elements taken from the approaches of both the Council and the EP. It is based on the assumption that AI systems that fall under Annex III of the AI Act are by default high-risk, unless they exceptionally do not pose a significant risk of harm to the protected legal interests (rule-exception approach). A decision whether the AI system is high-risk or not would be subject to a self-assessment of the provider, based on the three criteria for self-assessment provided in Annex III. To ensure traceability and oversight, providers who conclude that their AI system is not high-risk would have to keep documentation of self-assessment and provide it upon request. They would also need to register the system in a dedicated database, and in addition to this market surveillance authorities would have the power to perform random checks and require the provider to undertake corrective actions to bring the AI system into compliance in case it has been misclassified.

The remaining point of difference between the positions of the co-legislators is that the EP would like to further modify the three criteria for self-assessment in Annex III in order to allow the provider more flexibility to classify AI systems as high-risk or not.

Delegations are asked to indicate whether they would be open to accept the compromise proposal for the classification of AI systems as high-risk as set out in Section II, point A of the Annex to this note and whether they would have flexibility with regard to the modification of the criteria for self-assessment in order to allow the provider more freedom to classify AI systems as high-risk or not.

13. Concerning **the list of high-risk AI use cases (Annex III)**, the compromise proposal, as set out in Section II, point B of the Annex to this note, combines the elements taken from the versions of both co-legislators, **with the exception of the rows in red**, which will be agreed

at a later stage together with the respective topics to which they are linked (prohibitions, law enforcement).

The only aspect where the current compromise proposals depart from the Council's mandate is the deletion of the exemptions for micro and small-sized enterprises with regard to use cases of AI systems intended to be used to evaluate the creditworthiness of natural persons or establish their credit score and of AI systems intended to be used for risk assessment and pricing in relation to natural persons in the case of life and health insurance. The Presidency considers that these exemptions could be removed in the spirit of compromise, also bearing in mind that the impact of potentially harmful AI systems on fundamental rights in those two cases would not depend on the size of the company.

Delegations are asked to indicate whether they would be open to accept the list of high-risk AI use cases as presented in the compromise proposal in Section II, point B of the Annex to this note (with the exception of rows marked in red). In particular, delegations are asked to indicate whether they have flexibility with regard to the deletion of the exemptions for micro and small-sized enterprises under use cases concerning the evaluation of creditworthiness of natural persons or establishing their credit score, as well as risk assessment and pricing in the case of life and health insurance.

14. Concerning **subject matter and scope** (Recitals 1 and 1a, Articles 1-2), the current compromise proposal as set out in Section II, point C of the Annex to this note is an attempt to reconcile the positions of both co-legislators. In order to reach agreement with the EP on these two articles, especially with regard to the national security exemption in Article 2(3) in the Council's mandate, the Presidency would like to explore with the delegations whether the Council could move towards the EP's position, as set out in the compromise proposals in Section II, point C of the Annex.

In particular, the delegations are asked to indicate whether they would be flexible to include the new wording at the beginning of Article 1 with references to democracy and rule of law, together with some changes in the respective recitals 1 and 1a, whether they would be able to agree to a minor alignment of the wording on the national security exemption in Article 2(3) with the corresponding wording in the already agreed the Data Act. and whether they would be open to include an exemption from the scope for AI

components provided under free and open-source licences, taking into account that this exemption would not apply to high-risk AI systems.

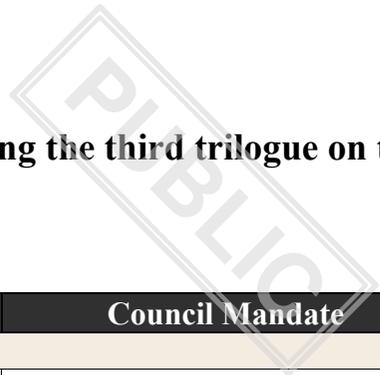

IV. CONCLUSION

15. In light of the above, and with a view to obtaining a revised mandate for trilogue negotiations on the AI Act on 2 and 3 October, the Permanent Representatives Committee is invited to:

- **endorse the compromise proposals referred to in Part II of this note;**
- **indicate flexibility with regard to the topics and questions presented in Part III of this note.**

Article 73(3a)				
697a		<u>3a. Before adopting a delegated act, the Commission shall consult with the relevant institutions, the Office, the Advisory Forum and other relevant stakeholders in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making. Once the Commission decides to draft a delegated act, it shall notify the European Parliament of this fact. This notification does not place an obligation on the Commission to adopt the said act.</u>		
Article 73(4)				
698	4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.	4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.	4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.	4. As soon as it adopts a delegated act, the Commission shall notify it simultaneously to the European Parliament and to the Council.

The identification of those systems is based on the same methodology and criteria envisaged also for any future amendments of the list of high-risk AI systems.</p>

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
		<p><i>defined areas specified in the Regulation</i> <u>duration combined altogether and on the other hand whether the risk can affect an individual, a plurality of persons or a particular group of persons. Such combination could for instance result in a high severity but low probability to affect a natural person, or a high probability to affect a group of persons with a low intensity over a long period of time, depending on the context.</u> The identification of those systems is based on the same methodology and criteria envisaged also for any future amendments of the list of high-risk AI systems.</p>	<p><u>significant risk to the legal interests protected under those scenarios, taking into account the output produced by the AI system. Therefore only when such output has a high degree of importance (i.e. is not purely accessory) in respect of the relevant action or decision so as to generate a significant risk to the legal interests protected, the AI system generating such output should be considered as high-risk. For instance, when the information provided by an AI systems to the human consists of the profiling of natural persons within the meaning of of Article 4(4) Regulation (EU) 2016/679 and Article 3(4) of Directive (EU) 2016/680 and Article 3(5) of Regulation (EU) 2018/1725, such information should not typically be considered of accessory nature in the context of high risk AI systems as referred to in Annex III. However, if the output of the AI system has only negligible or minor relevance for human action or decision, it may be considered purely accessory, including for example, AI systems used for translation for</u></p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
Recital 32a			<u>informative purposes or for the management of documents.</u>	
42a		<p><u>(32a) Providers whose AI systems fall under one of the areas and use cases listed in Annex III that consider their system does not pose a significant risk of harm to the health, safety, fundamental rights or the environment should inform the national supervisory authorities by submitting a reasoned notification. This could take the form of a one-page summary of the relevant information on the AI system in question, including its intended purpose and why it would not pose a significant risk of harm to the health, safety, fundamental rights or the environment. The Commission should specify criteria to enable companies to assess whether their system would pose such risks, as well as develop an easy to use and standardised template for the notification. Providers should submit the notification as early as possible and in any case prior to the placing of the AI system on</u></p>		<p><u>(32a) It is also important to clarify that there may be specific cases in which AI systems referred to in Annex III do not lead to a significant risk to the legal interests protected under those areas. This could be the case if one or more of the following conditions are fulfilled. The first condition should be that the AI system is intended to perform a narrow procedural task of low complexity, such as file classification or labelling, which typically is of such generic nature that it poses only limited risks which are not increased through the use in a context listed in Annex III. The second condition should be that the task performed by the AI system does not replace a human assessment relevant for the purpose of the use case listed in Annex III, but is intended to confirm or improve an accessory factor of such assessment and, hence, only provides an additional layer with</u></p>

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
		<p><u><i>the market or its putting into service, ideally at the development stage, and they should be free to place it on the market at any given time after the notification. However, if the authority estimates the AI system in question was misclassified, it should object to the notification within a period of three months. The objection should be substantiated and duly explain why the AI system has been misclassified. The provider should retain the right to appeal by providing further arguments. If after the three months there has been no objection to the notification, national supervisory authorities could still intervene if the AI system presents a risk at national level, as for any other AI system on the market. National supervisory authorities should submit annual reports to the AI Office detailing the notifications received and the decisions taken.</i></u></p>	<p style="text-align: center; opacity: 0.5; font-size: 48px; transform: rotate(-30deg);">PUBLIC</p>	<p><u><i>consequently lowered risk. The third condition should be that the AI system is intended to perform a preparatory task to an assessment relevant for the purpose of the use case listed in Annex III, for which typically the succeeding action steps lower the risks. In any case, AI systems referred to in Annex III should be considered to pose significant risks of harm to the health, safety or fundamental rights of natural persons if the AI system implies profiling within the meaning of Article 4(4) of Regulation (EU) 2016/679 and Article 3(4) of Directive (EU) 2016/680 and Article 3(5) of Regulation 2018/1725. To ensure traceability and transparency, a provider who considers that an AI system referred to in Annex III is not high-risk on the basis of the aforementioned conditions should draw up documentation of the assessment before that system is placed on the market or put into service and should provide this documentation to national competent authorities upon request. Such provider should be obliged to register the system in</i></u></p>

				<i><u>the EU database established under this Regulation. With a view to provide further guidance for the practical implementation of the conditions under which AI systems referred to in Annex III are exceptionally not high-risk, the Commission should, after consulting the [AI Board/Office], provide guidelines specifying this practical implementation.</u></i>
TITLE III				
197	TITLE III HIGH-RISK AI SYSTEMS			
Chapter 1				
198	Chapter 1 CLASSIFICATION OF AI SYSTEMS AS HIGH-RISK			
Article 6				
199	Article 6 Classification rules for high-risk AI systems			
Article 6(1)				

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement	
R	200	1. Irrespective of whether an AI system is placed on the market or put into service independently from the products referred to in points (a) and (b), that AI system shall be considered high-risk where both of the following conditions are fulfilled:	1. Irrespective of whether an AI system is placed on the market or put into service independently from the products referred to in points (a) and (b), that AI system shall be considered high-risk where both of the following conditions are fulfilled:	1. Irrespective of whether an AI system is placed on the market or put into service independently from the products referred to in points (a) and (b), that AI system shall be considered high-risk where both of the following conditions are fulfilled:	
	Article 6(1), point (a)				
Y	201	(a) the AI system is intended to be used as a safety component of a product, or is itself a product, covered by the Union harmonisation legislation listed in Annex II;	(a) the AI system is intended to be used as a safety component of a product, or <u>the AI system</u> is itself a product, covered by the Union harmonisation legislation <u>law</u> listed in Annex II;	<i>deleted</i>	(a) the AI system is intended to be used as a safety component of a product, or is itself a product, covered by the Union harmonisation legislation listed in Annex II;
	Article 6(1), point (b)				
Y	202	(b) the product whose safety	(b) the product whose safety	(b) the product whose safety	

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
	<p>component is the AI system, or the AI system itself as a product, is required to undergo a third-party conformity assessment with a view to the placing on the market or putting into service of that product pursuant to the Union harmonisation legislation listed in Annex II.</p>	<p>component <u>pursuant to point (a)</u> is the AI system, or the AI system itself as a product, is required to undergo a third-party conformity assessment <u>related to risks for health and safety</u>, with a view to the placing on the market or putting into service of that product pursuant to the Union harmonisation legislation<u>law</u> listed in Annex II-i.</p>	<p><i>deleted</i></p>	<p>component is the AI system, or the AI system itself as a product, is required to undergo a third-party conformity assessment with a view to the placing on the market or putting into service of that product pursuant to the Union harmonisation legislation listed in Annex II.</p>
Article 6(2)				
203	<p>2. In addition to the high-risk AI systems referred to in paragraph 1, AI systems referred to in Annex III shall also be considered high-risk.</p>	<p>2<u>1a</u>. In addition to the high-risk AI systems referred to in paragraph 1, AI systems <u>falling under one or more of the critical areas and use cases</u> referred to in Annex III shall also be considered high-risk if they pose a significant risk of harm to the health, safety or fundamental rights of natural persons. Where an AI system falls under Annex III point 2, it shall be considered <u>to be high-risk if it poses a significant risk of harm to the environment</u>high-risk.</p>	<p>2. In addition to the high-risk AI systems<u>An AI system intended to be used as a safety component of a product covered by the legislation</u> referred to in paragraph 1, AI systems referred to in Annex III shall be considered as high risk if it is required to undergo a third-party conformity assessment with a view to the placing on the market or putting into service of that product pursuant to above mentioned legislation. This provision shall also be considered high-risk<u>apply irrespective of whether the AI system is placed on the market or put into service independently from the product.</u></p>	<p>2. In addition to the high-risk AI systems referred to in paragraph 1, AI systems referred to in that pose significant risk of harm to the health, safety or fundamental rights of natural persons <u>pursuant to</u> Annex III shall also be considered high-risk.</p>

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
Article 6(2), second subparagraph				
203a		<p><u><i>The Commission shall, six months prior to the entry into force of this Regulation, after consulting the AI Office and relevant stakeholders, provide guidelines clearly specifying the circumstances where the output of AI systems referred to in Annex III would pose a significant risk of harm to the health, safety or fundamental rights of natural persons or cases in which it would not.</i></u></p>		
Article 6(2a)				
203b			<p><u><i>2a. AI systems referred to in Annex III shall be considered high-risk unless the output of the system is purely accessory in respect of the relevant action or decision to be taken and is not therefore likely to lead to a significant risk to the health, safety or fundamental rights.</i></u></p> <p><u><i>In order to ensure uniform conditions for the implementation of this Regulation, the Commission shall, no later than one year after the entry into force</i></u></p>	<p><u><i>2a. A provider who considers that an AI system referred to in Annex III is not high-risk in application of the procedure under Annex III shall document its assessment before that system is placed on the market or put into service. Such provider shall be subject to the registration obligation set out in Article 51(2). Upon request of national competent authorities, the provider shall provide the documentation of the assessment.</i></u></p>

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
			<p><i><u>of this Regulation, adopt implementing acts to specify the circumstances where the output of AI systems referred to in Annex III would be purely accessory in respect of the relevant action or decision to be taken. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 74, paragraph 2.</u></i></p>	
Article 6(2a new)				
203c		<p><i><u>2a. Where providers falling under one or more of the critical areas and use cases referred to in Annex III consider that their AI system does not pose a significant risk as described in paragraph 2, they shall submit a reasoned notification to the national supervisory authority that they are not subject to the requirements of Title III Chapter 2 of this Regulation. Where the AI system is intended to be used in two or more Member States, that notification shall be addressed to the AI Office. Without prejudice to Article 65, the national supervisory authority</u></i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
		<u><i>shall review and reply to the notification, directly or via the AI Office, within three months if they deem the AI system to be misclassified.</i></u>		
Article 6(2b new)				
R	203d	<u><i>2b. Providers that misclassify their AI system as not subject to the requirements of Title III Chapter 2 of this Regulation and place it on the market before the deadline for objection by national supervisory authorities shall be subject to fines pursuant to Article 71.</i></u>		
Article 6(2b)				
R	203e	<u><i>2c. National supervisory authorities shall submit a yearly report to the AI Office detailing the number of notifications received, the related high-risk areas at stake and the decisions taken concerning received notifications</i></u>		<u><i>2b. The Commission shall, no later than [...] before the date of application of this Regulation and after consulting the AI [Board/Office], provide guidelines specifying the practical implementation of Annex III.</i></u>
Article 7				
G	204			G

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
	Article 7 Amendments to Annex III	Article 7 Amendments to Annex III	Article 7 Amendments to Annex III	Article 7 Amendments to Annex III
Article 7(1)				
205	1. The Commission is empowered to adopt delegated acts in accordance with Article 73 to update the list in Annex III by adding high-risk AI systems where both of the following conditions are fulfilled:	1. The Commission is empowered to adopt delegated acts in accordance with Article 73 to update the list in <u>amend</u> Annex III by adding <u>or modifying areas or use-cases of</u> high-risk AI systems where both of the following conditions are fulfilled: these pose a significant risk of harm to health and safety, or an adverse impact on fundamental rights, to the environment, or to democracy and the rule of law, and that risk is, in respect of its severity and probability of occurrence, equivalent to or greater than the risk of harm or of adverse impact posed by the high-risk AI systems already referred to in Annex III.	1. The Commission is empowered to adopt delegated acts in accordance with Article 73 to update <u>amend</u> the list in Annex III by adding high-risk AI systems where both of the following conditions are fulfilled:	1. The Commission is empowered to adopt delegated acts in accordance with Article 73 to update <u>amend</u> the list in Annex III by adding high-risk AI systems where both of the following conditions are fulfilled:
Article 7(1), point (a)				
206	(a) the AI systems are intended to be used in any of the areas listed in points 1 to 8 of Annex III;	<i>deleted</i>	(a) the AI systems are intended to be used in any of the areas listed in points 1 to 8 of Annex III;	(a) the AI systems are intended to be used in any of the areas listed in points 1 to 8 of Annex III;

	Commission Proposal	EP Mandate	Council Mandate	Draft agreement
Article 7(1), point (b)				
207	(b) the AI systems pose a risk of harm to the health and safety, or a risk of adverse impact on fundamental rights, that is, in respect of its severity and probability of occurrence, equivalent to or greater than the risk of harm or of adverse impact posed by the high-risk AI systems already referred to in Annex III.	<i>deleted</i>	(b) the AI systems pose a risk of harm to the health and safety, or a risk of adverse impact on fundamental rights, that is, in respect of its severity and probability of occurrence, equivalent to or greater than the risk of harm or of adverse impact posed by the high-risk AI systems already referred to in Annex III.	(b) the AI systems pose a risk of harm to the health and safety, or a risk of adverse impact on fundamental rights, that is, in respect of its severity and probability of occurrence, equivalent to or greater than the risk of harm or of adverse impact posed by the high-risk AI systems already referred to in Annex III.
Article 7(1a)				
207a		<u><i>1a. The Commission is also empowered to adopt delegated acts in accordance with Article 73 to remove use-cases of high-risk AI systems from the list in Annex III if the conditions referred to in paragraph 1 no longer apply;</i></u>		
Article 7(2)				
208	2. When assessing for the purposes of paragraph 1 whether an AI system poses a risk of harm to the health and safety or a risk of adverse impact on fundamental rights that is equivalent to or	2. When assessing for the purposes of paragraph 1 whether an AI system poses a risk of harm to the health and safety or a risk of adverse impact on fundamental rights that is equivalent to or	2.
