NOTE

From:	General Secretariat of the Council
To:	Delegations
Subject:	2025 Employment Performance Monitor

Delegations will find attached the 2025 Employment Performance Monitor, transmitted by the Employment Committee.

13296/25 ADD 2

2025 Employment Performance Monitor

In line with its Treaty role and its 2025 Work Programme, the Employment Committee (EMCO) updated the 'Employment Performance Monitor' (EPM) for the year 2025, allowing for the identification at a glance of the main employment challenges for the EU and for each Member State as well as particularly good labour market outcomes. The EPM is based on the latest available yearly data¹.

As last year, the 2025 edition of the EPM includes the 2030 EU headline targets on employment and adult learning proposed by the Commission in the European Pillar of Social Rights Action Plan and welcomed by the EU Leaders at the Porto Social Summit in May 2021 and by the June 2021 European Council, as well as the related 2030 national targets set by the Member States and presented at the June 2022 EPSCO Council.

Moreover, the 2025 EPM presents the quantitative monitoring of progress towards the 2030 EU headline employment target and related national targets, based on the methodology agreed in the EMCO Indicators Group (IG) in October 2022. This year's EPM also includes the monitoring of progress towards the 2030 EU headline adult learning target and related national targets. This is based on the provisional agreement reached by the IG in September 2024 on the monitoring framework for the adult learning target, using Adult Education Survey (AES) data excluding guided on-the-job training.

Overall, the EPM builds on the findings of the Joint Assessment Framework (JAF²). The JAF is an indicator-based analytical tool, developed jointly by EMCO, the Social Protection Committee (SPC) and the Commission, covering general and specific policy areas, selected to match the themes of the Employment Guidelines. The tool's objective is to identify key challenges and good labour market outcomes in the employment and social policy areas based on a three-step approach combining quantitative and qualitative assessment and support Member States in establishing their priorities. The EPM reflects the results of the JAF for the employment policy areas and aims to provide a good overview of results both at country level and across all Member States. Its findings could also be useful for macroeconomic surveillance.

The EMCO Indicators Group has conducted a review of the JAF and its policy areas in recent years with the aim to better align them with the Employment Guidelines and modernise the tool. To this end, the JAF list of indicators has been streamlined to cover current monitoring needs and policy priorities. EMCO and EMCO IG will continue reflecting on the monitoring and reporting tools, in line with their Work Programme and the EPSCO Council's call in March 2022³ to EMCO and SPC to continue their work on developing monitoring and benchmarking frameworks and on further aligning existing monitoring tools.

Part I of the 2025 EPM presents an overview of the 2030 EU headline and national targets in the areas of employment and adult learning, depicts the progress towards the 2030 EU headline targets on employment and adult learning and presents a summary overview of the Key

13296/25 ADD 2 LIFE.4 EN

³ See Council Doc. 6933/22.

Employment Challenges (KECs) and Good Labour Market Outcomes (GLMOs) per Member State and per policy area of the JAF. **Part II** presents analytical country overviews. A special focus is given to the progress of each Member State towards its 2030 national targets on employment and adult learning. In addition to a table on 'Key indicators on labour market performance', containing indicators for all JAF policy areas, this part also presents the non-JAF KECs for each Member State as well as the JAF-based KECs and GLMOs for each Member State.

A table with all the national targets for 2030 on employment and adult learning as well as the <u>sub-targets</u> set by the Member States is presented in Annex A. The EPM dashboard, which can be found in Annex B, displays, for each of the main JAF indicators thereby included and for each Member State: the level, the year-on-year changes and the changes over three years, flagging at the same time notable positive/negative changes. This will serve as additional information in the process to depict the areas with positive and negative developments.

The JAF results, and hence the Employment Performance Monitor, respect the role of national parliaments and social partners and differences in national systems, such as the systems for wage formation.

Note 1: Concerning the graphs in Part II depicting progress towards the 2030 national employment rate targets, the average employment growth needed between 2024 and 2030 in order to reach the targets can be negative for some Member States due to having already achieved their targets by 2024 and/or demographic dynamics (decreasing working population).

Note 2: Breaks in the time-series are indicated with the flag (b), provisional data with (p), estimates with (e), definition differences with (d), low reliability data with (u) and break in series, low reliability with (bu).

Note 3: The cut-off date is 30 April 2025; for the dashboard is 25 April 2025.

C = Challenge, G = Good labour market outcome

Note: This table is based on the Key Employment Challenges (KECs) and Good Labour Market Outcomes (GLMOs) identified for each Member State, as presented in Table 4 of Part II of the EPM ('Country Overviews'). For instance, if a country has a KEC or a GLMO or both listed under the policy area 'Increase Labour Market Participation' in Table 4 of Part II, then the corresponding symbol 'C' (for KECs) or 'G' (for GLMOs) or 'C/G' (for both) is added for that Member Stater in Table 1 of Part I under the same policy area.

4. Key employment challenges Belgium, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate (20-64), including for young people (20-29), older workers (55-64, men) and the low-skilled, is lower than the EU average, and significantly lower for non-EU nationals (20-64) Weak labour market outcomes of people with a	
2. Enhancing labour	migrant background, in particular women	
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies		
4. Adequate and employment oriented social security systems	The unemployment trap is worse than the EU average, and the low-wage trap is significantly worse, including for second earners	
5. Work-life balance		Inactivity due to personal and family responsibilities (20-64) significantly below the EU average
6. Exploiting job creation possibilities		
7. Gender equality		The gender pay gap is significantly below the EU average
8. Improving skills supply and productivity, effective life-long learning	High skills mismatch	
9. Improving education and training systems	The difference in employment rates for those with medium and high education attainment (20-64) is well above the EU average and increasing significantly Significant educational inequalities linked to socioeconomic and migrant background	
10. Wage setting mechanisms and labour cost developments

4. Key employment challenges Bulgaria, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rates for young people (20-29) and the low-skilled are below the EU averages	
	Structural challenges for labour market participation for some vulnerable groups (in particular, the Roma and persons with disabilities) persist	
	Despite the strong performance of the labour market at national level, considerable disparities between the different regions in the country persist	
2. Enhancing labour market functioning; combating segmentation	The share of long-term unemployed in total unemployment is very high and further increasing	The share of employees (15-64) on temporary employment contracts is significantly below the EU average
Active labour market policies	Expenditure on ALMPs (per person wanting to work and as % of GDP) is below the EU average	
4. Adequate and employment oriented social security systems	The in-work poverty risk is well above the EU average and significantly increasing	
5. Work-life balance	Participation of children in formal childcare (age 0-3) is below the EU average	
6. Exploiting job creation possibilities		
7. Gender equality	The gender pay gap is widening	
8. Improving skills supply and productivity, effective life-long learning	The share of adults (25-64) participating in education and training is significantly lower than the EU average and further declining Increasing skills shortages (including digital skills) act as challenges for a fair green and digital transition, amid adverse demographics	The share of the population (20-24 and 25-64) having completed at least upper secondary education is above the EU average and further increasing
9. Improving education and training systems	Important challenges remain in the provision of quality, equity and labour market relevance of education, in particular for disadvantaged groups like Roma	
10. Wage setting mechanisms and labour cost developments		

Czechia

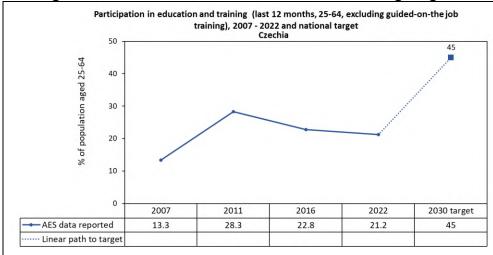

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024; Eurostat, EU LFS.
- Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- National employment rate targets from June 2022 EPSCO Council.
- Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- Adult education survey (AES) data (excluding guided on the job training).

 The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory bas
- National adult learning targets from June 2022 EPSCO Council.

13296/25 ADD 2 22

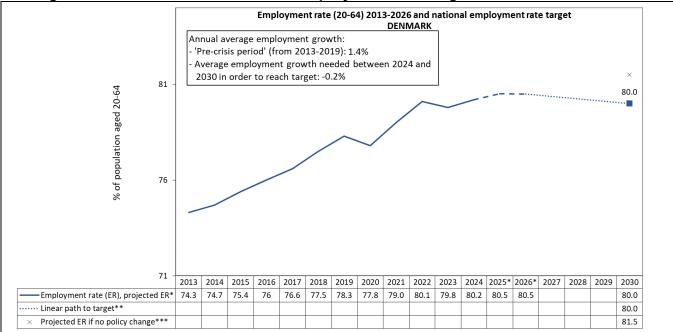

4. Key employment challenges Czechia, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	Integration of people from Ukraine and other vulnerable groups, like Roma and people with disabilities, into the labour market	Very high employment rate (20-64), including for older workers (55-64)
		The NEET rate for men (15-29) is significantly lower than the EU average
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies		
Adequate and employment oriented	The net replacement rate after 6 and 12 months of unemployment is (significantly) lower than the EU	Very low in-work poverty risk
social security systems	average across household compositions	The low-wage trap (tax rate on low-wage earners), including for second earners, is significantly below the EU average
5. Work-life balance	Participation of children in formal childcare (age 0-3 and 3 to mandatory school age) is (well) below the EU average despite increasing significantly	
6. Exploiting job creation possibilities		
7. Gender equality	Gender employment gap for those aged 20-29 well above the EU average despite narrowing significantly	
	Gender pay gap above the EU average and widening further	
8. Improving skills supply and productivity, effective life-long learning	Sustained labour and skills shortages	The share of the adult population (25-64) having attained upper secondary education is significantly larger than the EU average
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments		

13296/25 ADD 2

Denmark

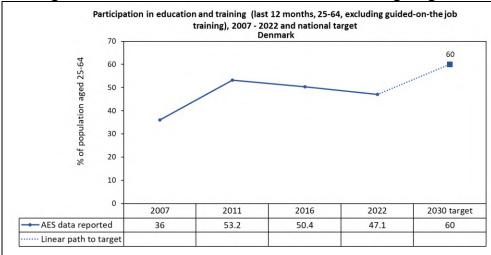

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024; Eurostat, EU LFS.
- Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- National employment rate targets from June 2022 EPSCO Council.
- Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- Adult education survey (AES) data (excluding guided on the job training).

 The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory bas
- National adult learning targets from June 2022 EPSCO Council.

13296/25 ADD 2 25

4. Key employment challenges Denmark, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation		The participation in education and training of persons aged 55-64 is significantly higher than the EU average and increasing
2. Enhancing labour market functioning; combating segmentation		The share of the newly employed among all employed is significantly higher than the EU average
3. Active labour market policies		The share of long-term unemployed in total unemployment is significantly lower than EU average
4. Adequate and employment oriented social security systems		
5. Work-life balance		The employment impact of parenthood is lower than the EU average and further decreasing
6. Exploiting job creation possibilities		
7. Gender equality	The inactivity trap for the second member of a couple (marginal effective tax rate on labour income when moving from social assistance to work) is worse than the EU average	
8. Improving skills supply and productivity, effective life-long learning	Shortages of sector-specific skilled workers linked also to the lower participation rates in vocational education and training	Adult participation in education and training (aged 25-64) is significantly higher than the EU average and increasing
9. Improving education and training systems	The rate of early leavers from education and training (18-24) is increasing	
10. Wage setting mechanisms and labour cost developments		Nominal unit labour cost growth has been relatively low in recent years

Germany

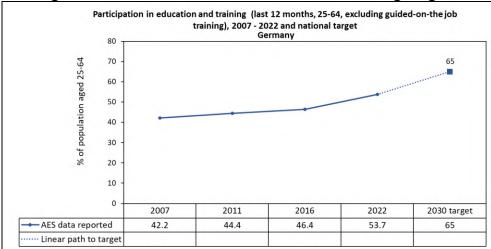

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024: Eurostat, EU LFS.
- * Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- ** National employment rate targets from June 2022 EPSCO Council.
- *** Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- * Adult education survey (AES) data (excluding guided on the job training).
- * The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis.
- National adult learning targets from June 2022 EPSCO Council.

28

⁵ The values for the following indicators will soon be revised for Germany due to technical issues in the classification of ISCED levels in the Eurostat LFS for the reporting years 2022 and 2023

^{1.} Share of adult population (aged 25-64) with upper secondary or tertiary education – total

^{2.} Completion of tertiary or equivalent education (aged 30-34)

^{3.} Employment rate of the low-skilled population aged 20-64

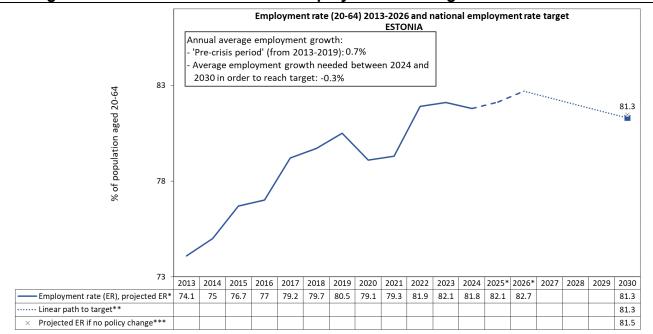

4. Key employment challenges Germany, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation		The employment rates for women (20-64) and older people (55-64) are above the EU averages
		The youth unemployment rate (15-29) and the share of unemployed NEETs are significantly lower than the EU average
2. Enhancing labour market functioning; combating segmentation		
3. Active labour market policies		The long-term unemployment rate is below the EU average
4. Adequate and employment oriented social security systems	The inactivity trap and the low-wage trap (tax rate on low-wage earners) for second earners are above the EU average	
5. Work-life balance	Inactivity and part-time work due to personal and family responsibilities higher than the EU average and increasing	
	Participation of children (0-3) in formal childcare lower than the EU average	
6. Exploiting job creation possibilities		
7. Gender equality	The gender gap in part-time employment is significantly wider than the EU average	
8. Improving skills supply and productivity, effective life-long learning	Barriers to skills development and bottlenecks for low-skilled workers to access the labour market	
9. Improving education and	The share of early leavers from education and training (18-24) is above the EU average	Difference in employment rates (20-
training systems	Educational outcomes are strongly dependent on the student's socio-economic background	64) for those with medium and high education attainment significantly smaller than the EU average and narrowing further
10. Wage setting mechanisms and labour cost developments

4. Key employment challenges Estonia, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The youth unemployment rate (15-29) is higher than the EU average and increasing The NEET rate (15-29) showed some negative development Medium-term integration of displaced persons from Ukraine into the labour market	The employment rate (20-64) is significantly higher than the EU average The duration of working life is higher than the EU average
2. Enhancing labour market functioning; combating segmentation	The long-term unemployment rate (15-74) showed some negative development	
Active labour market policies		
4. Adequate and employment oriented social security systems	The in-work-poverty risk is higher than the EU average	
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality	The gender pay gap is above the EU average, though with a significant positive development	The gender employment gap is significantly smaller than the EU average and improving The inactivity trap for the second member of a couple (marginal effective tax rate on labour income when moving from social assistance to work) is significantly lower than the EU average and decreasing
8. Improving skills supply and productivity, effective life-long learning		Adult participation in education and training (25-64) is relatively high and increasing
9. Improving education and training systems	The rate of early leavers from education and training (18-24) showed some negative development The education and training system is under pressure to adapt to demographic and labour market trends	
10. Wage setting mechanisms and	Labour productivity has decreased significantly in recent years	
labour cost developments	The coverage of collective bargaining and trade union density remain low

4. Key employment challenges Ireland, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The labour market outcomes for the most vulnerable groups, such as people with disabilities, single parents, Travellers, are comparatively poorer	The employment rate (20-64) is higher than the EU average, including for young people (20-29) and non-EU nationals, and significantly increasing
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies		
4. Adequate and employment oriented social security systems	Despite decreasing significantly, inactivity due to personal and family responsibilities remains well above the EU average	Unemployment and low-wage traps (tax rate on low-wage earners) (significantly) below the EU averages and further decreasing
5. Work-life balance	Despite increasing, participation of children in formal childcare (age 0-3) remains below the EU average	
6. Exploiting job creation possibilities		
7. Gender equality	The gender employment gap is increasing among older workers	
8. Improving skills supply and productivity, effective life-long learning	Shortages in labour and skills persist, aggravated by the unavailability/high cost of housing	The share of the adult population (25-64) having attained high (tertiary) education is very high The share of young people (20-24) having completed at least upper secondary education is very high
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments	Low trade union density ('membership') and collective bargaining coverage limits the ability to negotiate for fair wages and decent working conditions	

Greece

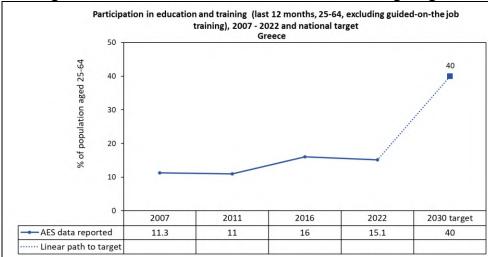

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024; Eurostat, EU LFS.
- Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- National employment rate targets from June 2022 EPSCO Council.
- Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- Adult education survey (AES) data (excluding guided on the job training).
- The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis
- National adult learning targets from June 2022 EPSCO Council.

4. Key employment challenges Greece, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate (20-64), including for young people (20-29) and older workers (55-64), remains below the EU average but is improving significantly	
	The NEET rate (15-29) remains above the EU average, especially for men, although the situation has been improving over the past decade	
Enhancing labour market functioning;	The share of newly employed (including young people aged 15-29) is below the EU average and declining	
combating segmentation	Persisting incidence of undeclared work	
Active labour market policies	Although significantly decreasing, the long-term unemployment rate remains well above the EU average, including for young people (15-29)	
	There is further scope in delivering more effective and customised activation support to jobseekers, targeting predominantly underrepresented groups such as youth, women and other vulnerable groups, including by improving outreach and strengthening capacity of the Public Employment Services, while steps have been taken	
4. Adequate and employment oriented social security systems	The in-work poverty risk is higher than the EU average	The unemployment trap (tax rate on low-wage earners) is significantly below the EU average and declining further
5. Work-life balance	The share of inactivity and part-time work due to lack of care services for children and other dependents among those aged 20-64 with care responsibilities is above the EU average	
6. Exploiting job creation possibilities		
7. Gender equality	The gender employment gap (20-64) remains significantly above the EU average	
8. Improving skills supply and productivity, effective life-long	The share of the adult population aged 25-64 (employed and unemployed) participating in education and training is below the EU average	
learning	There is further scope for skills provision, including for green and digital skills, to be delivered in a more systemic and coordinated manner, which may accelerate the potential for quality and tailored training provision	
9. Improving education and training systems	Significant, longstanding educational inequalities linked to socio-economic and migrant background persist, although recent reforms have started to be implemented to tackle this	The share of early leavers from education and training aged 18-24 is significantly below the EU average
10. Wage setting mechanisms and labour cost developments

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate (20-64) remains below the EU average despite improving, including for young people (20-29)	
	The youth unemployment rate remains significantly above the EU average despite markedly improving	
2. Enhancing labour market functioning; combating segmentation	A decreasing, yet still very high involuntary temporary employment share and a low and worsening transition rate from temporary to permanent employment	High level of newly employed, especially among young people
	Workforce ageing straining labour market dynamics and future competitiveness	
	Persistently high share of fixed-term contracts in the public sector	
	Persistent regional disparities in the labour market, especially for young and older workers, women and third-country nationals	
Active labour market policies	Very high unemployment and long-term unemployment rates (15-74), despite significant improvements	
4. Adequate and employment oriented social security systems	The in-work poverty risk is above the EU average, yet improving	
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and	Very low share of adults with medium educational attainment levels	
productivity, effective life-long learning	Limited engagement with the lifelong learning system, adding to system skills shortages and mismatches	
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments		

France

4. Key employment challenges France, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The youth unemployment rate is above the EU average and the NEET rate is on an increasing trend	
	Structural challenges for labour market participation for some vulnerable groups, including low-skilled and people with a migrant background (especially non-EU born)	
Enhancing labour market functioning;	Still widespread use of temporary and short-term contracts	
combating segmentation	Strong regional disparities in labour opportunities	
3. Active labour market policies		Expenditure on ALMP (as % of GDP) is significantly above the EU average and increasing
4. Adequate and employment oriented social security	The low-wage trap as well as the inactivity trap for the second earner in a couple are higher than the EU averages	
systems	The in-work poverty risk is on an increasing trend	
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and productivity, effective life-long learning	Significant skills and labour shortages	
9. Improving education and training systems	Low performance and persistent inequalities of the French education system coupled with low attractiveness of the teaching profession	
10. Wage setting mechanisms and labour cost developments		

Croatia

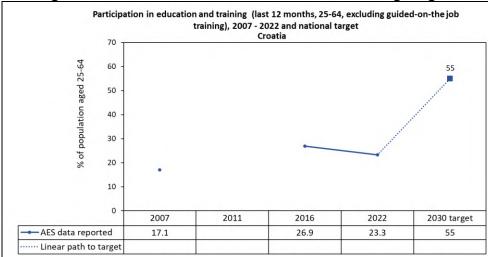

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024: Eurostat, EU LFS.

4. Key employment challenges Italy, May 2025

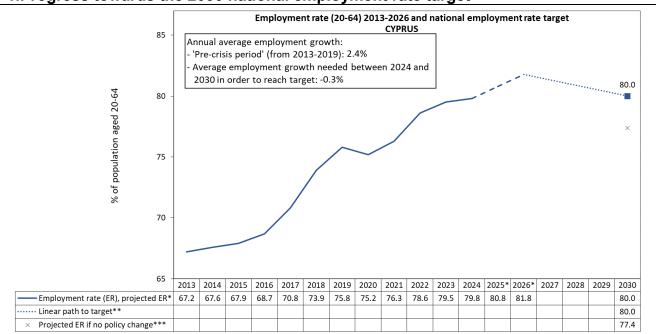

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate (20-64) is increasing but remains lower than the EU average, and significantly lower for women and young people (20-29)	
	The NEET rate (15-29) remains very high despite improving significantly	
	Second-generation migrants, i.e. people born in Italy with both parents born abroad, are markedly less included in the labour market	
Enhancing labour market functioning; combating segmentation	Involuntary temporary and part-time employment is very high, and the transition rate from temporary to permanent employment is significantly lower than the EU average and decreasing	
	The share of newly employed is low and decreasing significantly	
	The share of long-term unemployed in total unemployment is significantly higher than the EU average	
	Labour market indicators show wide regional disparities and undeclared work in 2022, while decreasing in relative terms, remained high in absolute terms	
Active labour market policies		
Adequate and employment oriented social security systems	The in-work poverty risk is above the EU average	The net replacement rate after 6 and 12 months of unemployment is better than the EU average across household compositions, with positive developments
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality	The gender employment gap (20-64) is significantly higher than the EU average and widening	The inactivity trap for the second member of a couple is better than the EU average, with significantly positive developments
		The gender pay gap is significantly narrower than the EU average
8. Improving skills supply and productivity,	The tertiary educational attainment rate is significantly lower than the EU average	
effective life-long learning	The participation in education and training is deteriorating rapidly and is low among the unemployed	
	Italian adults have a low level of basic skills, and in a context of demographic decline many young graduates are moving abroad, while those who stay struggle with transitioning into a labour market characterised by skills mismatches	
Improving education and training systems		
10. Wage setting mechanisms and	Wages remain structurally low due to productivity trends and struggle to keep pace with inflation

1. Progress towards the 2030 national employment rate target

Sources and notes:

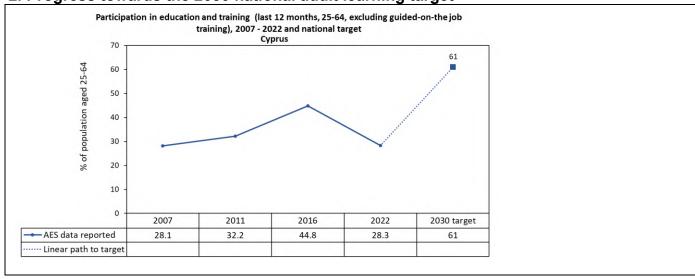

Employment rates (20-64 years old) for 2013-2024: Eurostat, EU LFS.

* Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).

** National employment rate targets from June 2022 EPSCO Council.

*** Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

13296/25 ADD 2 53

- Sources and notes:

 * Adult education survey (AES) data (excluding guided on the job training).

 * The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis.

 * National adult learning targets from June 2022 EPSCO Council.

4. Key employment challenges Cyprus, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The share of inactive NEETs increased significantly The labour market integration of persons with disabilities is hindered by a lack of accessible vocational and employment training schemes and incentives, as well as mobility barriers	The employment rates for older workers (60-64) and recent immigrants (men) are high and further improving
2. Enhancing labour market functioning; combating segmentation	The share of involuntary temporary employees among all employees continues to be significantly higher than the EU average across all age groups and further deteriorating There are barriers to the labour market participation of foreign workers, contributing to labour shortages in some sectors	The share of newly self- employed is significantly higher than the EU average
Active labour market policies	Modernisation and digitalisation of the Public Employment Service and activation measures available to certain demographic groups, including NEETs, persons with disabilities, women, and third-country nationals, remain a challenge	
4. Adequate and employment oriented social security systems	Low level of net replacement rates after 6 months of unemployment across different household compositions	
5. Work-life balance		Inactivity and part-time work due to personal or family responsibilities is below the EU average and further decreasing, including among women
6. Exploiting job creation possibilities		Overall employment growth is well above the EU average
7. Gender equality	The share of employees working under involuntary fixed- term or part-time contracts is high for both women and men and increasing, especially for women	
8. Improving skills supply and productivity, effective life-long learning		The share of the adult population (25-64) having attained tertiary education is very high and further increasing
9. Improving education and training systems	The share of early leavers from education and training (18-24) is increasing significantly The level of basic and digital skills is low, and the labour market relevance of education and training is limited	The share of 30-34-year- olds having completed tertiary or equivalent education is very high
10. Wage setting mechanisms and labour cost developments		Labour productivity growth is higher than the EU average

4. Key employment challenges Latvia, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome						
1.Increase labour market participation	Significant regional disparities in employment, with high unemployment in the region of Latgale	Very low ratio of youth unemployment (15-29) to adult unemployment (30-74)						
2. Enhancing labour market functioning; combating segmentation	The long-term unemployment rate and the share of long-term unemployment in total unemployment are increasing (significantly)	Very low share of employees (15-64) on temporary employment contracts						
Active labour market policies	Limited activation intensity and integration of the long-term unemployed							
4. Adequate and employment oriented social security systems	Low net replacement rates after 12 months of unemployment across several household compositions and high and increasing risk of poverty for the unemployed (18+)							
5. Work-life balance		Low and significantly decreasing impact of parenthood						
6. Exploiting job creation possibilities								
7. Gender equality	Despite narrowing significantly, the gender pay gap remains above the EU average	Very low gender employment gap (20- 64), including for those aged 55-64 for whom the gap is also narrowing further						
		Very low gender gap in part-time employment						
8. Improving skills supply and productivity, effective life-long learning	Low level of basic or above basic overall digital skills (16-74) Transitions in labour status and pay level (16-64) lower than the EU average	High and increasing government expenditure on education						
9. Improving education and training systems								
10. Wage setting mechanisms and labour cost developments	The coverage of collective bargaining and trade union density remain low

13296/25 ADD 2 61 LIFE.4

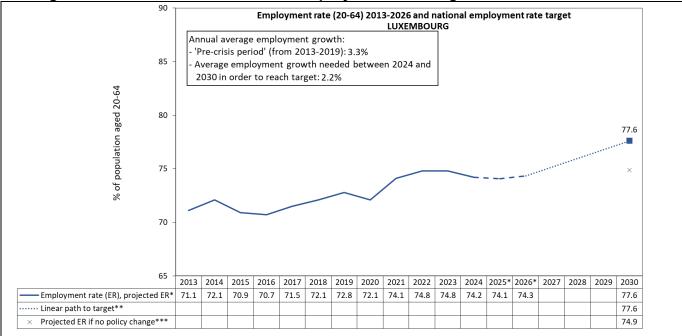

4. Key employment challenges Lithuania, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The NEET rate (15-29), including the share of inactive NEETs, is higher than the EU average and increased significantly The disability employment gap is among the largest in the EU, indicating structural issues in labour market integration for people with disabilities	The employment rates for non-EU nationals (20-64) and those who are recent immigrants to the EU (non-EU nationals) are significantly higher than the EU averages
2. Enhancing labour market functioning; combating segmentation		The share of employees (15-64) on temporary employment contracts is significantly below the EU average
Active labour market policies	ALMP expenditure (as % of GDP) and the number of participants in regular activation measures are below the EU average	
4. Adequate and employment oriented social security systems	The unemployment trap (tax rate on low-wage earners) is significantly higher than the EU average	
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and productivity, effective life-long learning	Matching efficiency in the labour market is insufficient, exacerbated by low labour market relevance and attractiveness of vocational education and training (VET)	
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments	The coverage of collective bargaining is low

13296/25 ADD 2 64 EN LIFE.4

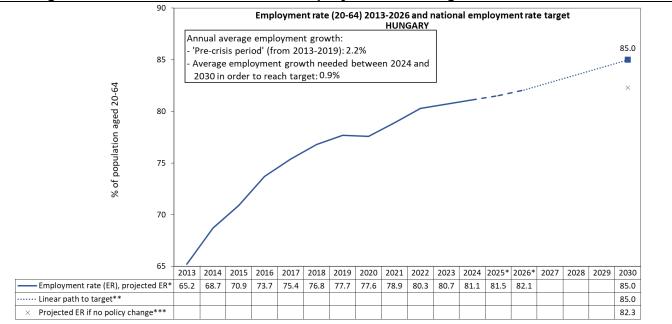

4. Key employment challenges Luxembourg, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate of older people (55-64) is significantly lower than the EU average, and the rate is decreasing for the overall population (20-64) and across various groups (young people, the low-skilled, non-EU nationals)	
	The NEET and youth unemployment rates (15-29) are increasing significantly	
Enhancing labour market functioning; combating segmentation		
Active labour market policies		
4. Adequate and employment oriented social security systems	The in-work poverty risk is significantly higher than the EU average The unemployment trap and the low-wage trap, including for second earners, are (significantly) higher than the EU averages The tax and benefit system presents financial disincentives to work, especially for older people	The net replacement rate after 6 months of unemployment is significantly above the EU average across different household compositions, and the at-risk-of-poverty rate for the unemployed (18+) is significantly lower than the EU average
5. Work-life balance		
Exploiting job creation possibilities		
7. Gender equality		The employment impact of parenthood on women is significantly lower than the EU average and decreasing further, and the gender employment and pay gaps are relatively narrow
8. Improving skills supply and productivity, effective life-long learning	Skills shortages and skills mismatches and might hinder the economy's competitiveness	The share of the adult population (25-64) having attained high (tertiary) education is significantly higher than the EU average and increasing further
9. Improving education and training systems	Large and significantly increasing difference in the employment rates for those with medium and high education attainment (20-64) Educational outcomes are strongly associated with the socio-economic status of students	Very high completion of tertiary or equivalent education (30-34)
10. Wage setting mechanisms and labour cost developments		

13296/25 ADD 2 65

4. Key employment challenges Hungary, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	Low level and significant deterioration of the employment rate of recently immigrated non-EU nationals Rising youth (15-29) unemployment rate Vulnerable groups continue to face barriers to employment and training	High employment levels among the population aged 30-54
2. Enhancing labour market functioning; combating segmentation		Low share of employees (15-64) on temporary employment contracts and a high transition rate from temporary to permanent employment
3. Active labour market policies	Deterioration of the long-term unemployment rate for those aged 30-74 and stagnation of the share of long-term unemployed in total unemployment, against solid improvements at EU level for both Significant decrease in ALMP expenditure (as % of	
	GDP) and decrease in the number of participants in regular activation measures	
4. Adequate and employment oriented social security systems	Inadequate duration and coverage of the unemployment benefit	
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and productivity, effective life-long learning		
9. Improving education and training systems	Low and stagnating completion levels of tertiary or equivalent education (30-34), against solid improvements at EU level Teacher shortages	
	Education outcomes are strongly influenced by pupils' socio-economic background	
10. Wage setting mechanisms and	Nominal unit labour costs have increased significantly in recent years	
labour cost developments	Weak functioning and structure of social dialogue	

Malta

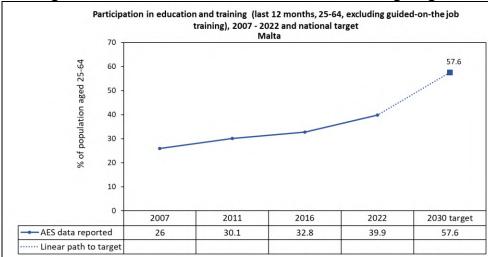

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024; Eurostat, EU LFS.
- Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- National employment rate targets from June 2022 EPSCO Council.
- Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- Adult education survey (AES) data (excluding guided on the job training).
- The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis
- National adult learning targets from June 2022 EPSCO Council.

4. Key employment challenges Malta, May 2025

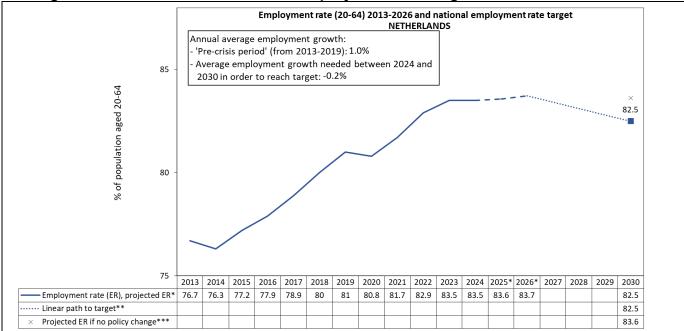

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate of older population, in particular women (55-64), is below the EU average but increasing. The employment rate gap between persons aged 20-54 and 55-64 is high	The employment rate (20-64) is significantly above the EU average and increasing, especially for young people (20-29), men, those with low skills and non-EU nationals
2. Enhancing labour market functioning; combating segmentation	Third-country nationals still face challenges with regards to working conditions Workplace safety is still lacking and the number of labour inspectors is limited	The youth unemployment rate (15-29) is significantly below the EU average
3. Active labour market policies		Long-term unemployment is very low for those aged 30-74
4. Adequate and employment oriented social security systems		
5. Work-life balance		The rate of inactivity and part-time work due to personal and family responsibilities is low and significantly decreasing
6. Exploiting job creation possibilities		Employment growth is very strong overall and in services
7. Gender equality	The gender employment gap for those aged 55-64 is narrowing significantly but remains relatively wide	The gender pay gap is below the EU average and narrowing
8. Improving skills supply and productivity, effective	The share of inactive adults (25-64) participating in education and training is increasing only slightly, against rapid improvements at EU level	
life-long learning	The share of the adult population (25-64) with medium (upper secondary) education is below the EU average but is increasing significantly	
	Malta has strengthened upskilling efforts, however skills mismatches as well as skills and labour shortages remain present in the labour market	
9. Improving education and training systems		
10. Wage setting mechanisms and	Social dialogue remains limited and civil society representation is low, but existing social dialogue	

EN

labour cost	mechanisms and civil society organisations provide
developments	a foundation for its strengthening and engagement

4. Key employment challenges Netherlands, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	Unfavourable labour market outcomes of people with a migrant background	Very high employment rate (20-64), including for young people (15-29)
		Very long duration of working life
		Participation of older workers (55-64) in education and training significantly above the EU average
2. Enhancing labour market functioning; combating	Share of employees (15-64) with temporary employment contracts significantly above the EU average	Share of long-term unemployed in total unemployment
segmentation	High level of labour market segmentation, including a high share of self-employed without employees	significantly below the EU average
Active labour market policies		
4. Adequate and employment oriented social security systems	Low-wage trap (tax rate on low-wage earners) for second earners significantly above the EU average	
5. Work-life balance	Inactivity and part-time work due to personal and family responsibilities is significantly above the EU average, in particular among women, and further increasing	Very high participation of children (0-3) in formal childcare
6. Exploiting job creation possibilities		
7. Gender equality	The gender gap in part-time employment remains significantly above the EU average despite improving markedly	
8. Improving skills supply and productivity, effective life-long learning		
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments

4 Key employment challenges Poland, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market
		outcome
Increase labour market participation	The employment rates for older people (55-64) and the low-skilled are below the EU averages	The employment rate for male non-EU nationals,
	Barriers to labour market participation of persons with disabilities	including recent immigrants, is significantly above the EU average
2. Enhancing labour market functioning; combating segmentation		
3. Active labour market policies		The unemployment rate (15-74) is significantly lower than the EU average
4. Adequate and employment oriented social security systems		
5. Work-life balance	Participation of children in formal childcare (age 0-3 and 3 to mandatory school age) is below the EU average	
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and productivity, effective life-long learning	Persisting skills gaps	
9. Improving education and training systems	Very large difference in employment rates for those with medium and high education attainment (20-64)	The share of early leavers from education and training (18-24) is significantly lower than the EU average and further decreasing
10. Wage setting mechanisms and labour cost developments	Limited social dialogue and collective bargaining	

EN

Portugal

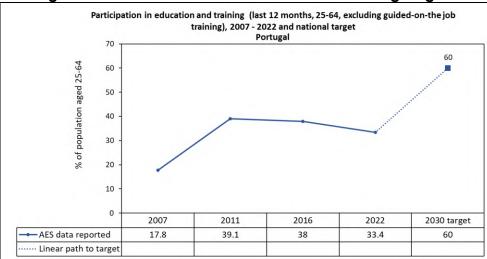

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024; Eurostat, EU LFS.
- Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- National employment rate targets from June 2022 EPSCO Council.
- Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

- Adult education survey (AES) data (excluding guided on the job training).
- The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis
- National adult learning targets from June 2022 EPSCO Council

4. Key employment challenges Portugal, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The share of young people neither in employment nor in education and training (NEET) that are unemployed is higher than the EU average	The share of NEETs that are inactive is significantly below the EU average
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies	Effectiveness of ALMPs in providing quality employment prospects for youth	
4. Adequate and employment oriented social security systems	The unemployment trap (tax rate on low wage earners) is significantly higher than the EU average	
5. Work-life balance		The share of children (0-3) in formal childcare is higher than the EU average and marked a significantly positive development
6. Exploiting job creation possibilities		
7. Gender equality		The gender employment gap (20-64) is smaller than the EU average, including for those aged 20-29 for whom the gap is further narrowing
8. Improving skills supply and productivity, effective	While still above the EU average, the participation of unemployed adults in training and learning marked a significantly negative development	
life-long learning	Labour and skills shortages are increasing for some sectors and professions	
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments

4. Key employment challenges Romania, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate (20-64) is significantly lower than EU average	
	The NEET rate (15-29) is significantly above the EU average	
2. Enhancing labour market functioning;	The involuntary temporary employment share is significantly higher than EU average	
combating segmentation	Prevalence of undeclared work and fragmentation of national responsibility to tackle it	
3. Active labour market policies	Limited effectiveness of the active labour market policies, coupled with the insufficient capacity of the Public Employment Services	
4. Adequate and employment oriented social security systems	The in-work-poverty risk is above the EU average but shows a significantly positive development	Low unemployment trap for low-wage earners
5. Work-life balance	Participation of children in formal childcare (age 0-3 and 3 to mandatory school age) is well below the EU average despite increasing significantly (age 3 to mandatory school age)	
6. Exploiting job creation possibilities		
7. Gender equality	The gender employment gap is above the EU average but shows some positive development	
8. Improving skills supply and productivity, effective	The share of adult population (25-64) having attained tertiary education is significantly below the EU average	
life-long learning	The percentage of individuals (16-74) possessing at least basic overall digital skills is significantly below the EU average	
	Skills shortages challenge Romania's fair green and digital transition, amid adverse demographics	
9. Improving education and	The early school leaving rate (18-24) is significantly higher than the EU average, with a worsening trend	
training systems	The share of low-achieving 15-year-olds in basic skills (reading, maths, science) is significantly higher than the EU average	
	Persisting urban/rural disparities in access to quality education, from the early childhood to university level	
10. Wage setting mechanisms and labour cost developments

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024: Eurostat, EU LFS.
- * Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- ** National employment rate targets from June 2022 EPSCO Council.
- *** Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- Adult education survey (AES) data (excluding guided on the job training).
- The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis.
- National adult learning targets from June 2022 EPSCO Council.

4. Key employment challenges Slovenia, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate for the population aged 55-64 is lower than EU average and significantly lower for men	The employment rate for non-EU nationals (20-64) – in particular men – is significantly above the EU average
		The employment rate for recent immigrants to the EU (non-EU nationals) is significantly above the EU average
Enhancing labour market functioning; combating segmentation		
Active labour market policies		
4. Adequate and employment oriented social security systems		
5. Work-life balance		A high share of children participate in early childhood education and care
		Inactivity due to personal and family responsibilities (20-64) is significantly lower than the EU average
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and productivity, effective life-long learning	Labour shortages in numerous sectors, skills mismatches and decline in participation in adult learning	
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments

13296/25 ADD 2

4. Key employment challenges Slovakia, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	Insufficient inclusion of underrepresented groups in the labour market	
2. Enhancing labour market functioning; combating segmentation	The share of long-term unemployed in total unemployment is significantly above the EU average The hiring rate is lower than the EU average	Share of employees on temporary contracts significantly below the EU average
segmentation	Low attractiveness of the teaching profession and teacher shortages and high prevalence of bogus self-employment	EU average
Active labour market policies	The rate of long-term unemployment of the young (15-29) is significantly above the EU average	
4. Adequate and employment oriented social security systems	The in-work-poverty risk is above the EU average and recorded a significantly negative development	
5. Work-life balance	Very low participation of children in formal childcare (age 0-3 and 3 to mandatory school age)	
6. Exploiting job creation possibilities	The tax wedge on labour for low-wage earners recorded some negative development	
7. Gender equality	Transitions by pay level for women and men are below the EU average	
	The employment impact of parenthood worsened for women	
8. Improving skills supply and productivity, effective life-long learning	Lack of skills supply: ageing workforce and need for reskilling and upskilling	The share of adult population (25-64) with upper secondary or tertiary education is significantly above the EU average
9. Improving education and training systems	Completion of tertiary or equivalent education (30-34) is below the EU average and further decreasing	Share of women aged 45-54 with low educational attainment significantly below the EU average
10. Wage setting mechanisms and labour cost developments

13296/25 ADD 2 95

4. Key employment challenges Finland, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	The employment rate (20-64), including for the low-skilled, shows a significantly negative development	
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies	The unemployment rate (15-74) is above the EU average and increasing significantly	
	High workloads and resource shortages in municipal public employment services, constraining service delivery particularly for jobseekers in need of personalised support	
Adequate and employment oriented	The at-risk-of-poverty rate for the unemployed (18+) shows a significantly negative development	The in-work poverty risk is significantly below the
social security systems	Inactivity and unemployment traps affecting the employment rates of certain groups	EU average
5. Work-life balance		Inactivity and part-time work due to personal and family responsibilities below the EU average and decreasing significantly
6. Exploiting job creation possibilities		
7. Gender equality	The gender pay gap is above the EU average	The gender employment gap (20-64) is significantly smaller than the EU average
8. Improving skills supply and productivity, effective life-long learning	Labour shortages driven by ageing, low attractiveness of some sectors and skills mismatches	
9. Improving education and training systems		
10. Wage setting mechanisms and labour cost developments		

Sweden

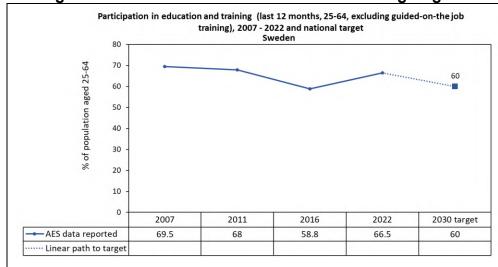

1. Progress towards the 2030 national employment rate target

Sources and notes:

- Employment rates (20-64 years old) for 2013-2024: Eurostat, EU LFS.
- * Values for 2025 and 2026 are based on the employment growth forecasts from the Commission Spring Forecast 2025 and the projected population and employed population growths from the 2023 Eurostat population projections (Europop 2023).
- ** National employment rate targets from June 2022 EPSCO Council.
- Projected employment rate under the assumption of no policy change: EPC Ageing Working Group 2024 Ageing Report (based on Eurostat 2023 population projection and AWG calculations).

2. Progress towards the 2030 national adult learning target

Sources and notes:

- * Adult education survey (AES) data (excluding guided on the job training).
- * The 2007 AES was a large sample pilot exercise carried out on a voluntary basis in all Member States, except Ireland and Luxembourg, between 2005 and 2008. On this basis, adjustments were implemented in the next wave. As from 2011, the AES is underpinned by a European legal act and thus carried out in all Member States on a mandatory basis.
- National adult learning targets from June 2022 EPSCO Council.

4. Key employment challenges Sweden, May 2025

Employment policy area	Key Employment Challenge	Particularly good labour market outcome
Increase labour market participation	Youth unemployment rate for age group 15-29 is significantly higher than the EU average Large gaps in employment rates between those born in Sweden and people born outside of the EU, especially women	Participation in education and training for those aged 55-64 is very high and significantly increasing
2. Enhancing labour market functioning; combating segmentation		
Active labour market policies	Unemployment rate (15-74) is higher than the EU average	
4. Adequate and employment oriented social security systems		
5. Work-life balance		
6. Exploiting job creation possibilities		
7. Gender equality		
8. Improving skills supply and productivity, effective life-long learning		A high and significantly increasing share of the population aged 20-24 that has completed at least upper secondary education
9. Improving education and training systems	Educational performance gaps for students with a migrant background, especially among those who are born abroad	
10. Wage setting mechanisms and labour cost developments		

Annex A. 2030 National Targets and sub-targets

Table A1: National employment rate (ER) and adult learning targets (as of 16 June 2022), as well as national sub-targets

as we	l as natio	nal sub-tarç	gets
	Headline	targets 2030	
MS	Employment rate (%)	Adult participation in learning in the past 12 months (%)	National sub-targets
BE	80	60.9	ER gap men-women <4pp; ER low-skilled >58.4%; ER non-EU born >58.3%; ER elderly (55-64) >68.8% ER gap persons with a handicap <24.5 pp; Youth NEET rate (15-29) <8.6%; Women in management positions 43.1%; Share of children <3 in formal childcare >61%; Gender pay gap <2.9%; In-work poverty (share of workers AROPE) <4.9%; Transitions temporary-permanent contract (3-yearly average) >40.7% Involuntary part-time work <5.6% Participation in learning 55-64yrs >49.8% Participation in learning low-skilled >32.6% Early school leavers 18-24 <7.4%; High-skilled 30-34 >50.1% Share of people with basic digital competences >70.4%
BG	79	35.4	
cz	82.2	45	Female employment rate 75.5%; Youth NEET rate (15-29) 9%; +7500 childcare places in children's groups; Early school leaving rate 5.5%; Share of people with basic digital skills 80.0%

Annex B. EPM Dashboard

The EPM dashboard includes the main indicators under the 10 JAF Policy Areas. The objective of the dashboard is to identify common EU "trends to watch" and "positive recent trends" with the aim of putting a stronger focus on the horizontal aspect of changes across Member States, thus identifying common conjunctural trends in the EU. Given the objective of the dashboard, the focus is on both, year-on-year changes and the changes for the three recent years for each Member State and the EU.

⁶The identification of notable (coloured) positive/ negative changes is normally done following the methodology for determining thresholds for substantive significance based on historical series, agreed in EMCO IG with cut-off point of 7.5% as threshold plus the statistical significance estimates provided by Eurostat, when available.

⁷ The values for the following indicators will soon be revised for Germany due to technical issues in the classification of ISCED levels in the Eurostat LFS for the reporting years 2022 and 2023: "Adults with medium or high education" and "Completion of tertiary or equivalent education (aged 30-34)"
