Subject: AOB for the meeting of the Justice and Home Affairs Council on 13-14  
October 2025  
AOB Drone detection and protection  
- Information from Germany

---

Germany wishes to inform the JHA Council (Home Affairs part) about drone detection and protection.

Europe has recently become a frequent target of hybrid threats.

Most recently, drones have been increasingly used to violate European airspace in order to potentially spy and sabotage against our critical infrastructure, including airports, large industrial and energy production facilities, military and police installations, and parliamentary and government buildings.

We want to address this challenge not only at the national level, but also at the European level.
