		cleaner and more competitive Europe COM(2020)98 final.		
Recital 2a				
11a			(2a) A fully functioning internal market for sustainable products is a prerequisite for the establishment of a circular economy in the Union. Common ecodesign requirements at Union level would enable the development, deployment and scale-up of new circular economy business models throughout the internal market and boost long-term competitiveness of the Union. Such measures would also remove a disproportionate burden on companies and provide industry and consumers with access to reliable and clear data, thereby allowing for more sustainable choices to be made.

12	(3) The European Industrial Strategy¹ sets out the Union's overarching ambition to foster a 'twin transition' to climate neutrality and digital leadership. It echoes the European Green Deal in pointing to the leading role that Europe's industry must play in this, by reducing its carbon and material footprint and embedding circularity across the economy, and underlines the need to move away from traditional models, and revolutionise the way we design, make, use and dispose of products. The 2021 Update to the Industrial Strategy² reinforces the main messages of the 2020 Strategy and focuses on the lessons from the COVID-19 crisis, including the need to foster resilience. 1. Communication from the Commission to the European Parliament, the European Council, the Council, the European Economic and Social Committee and the Committee	(3) The European Industrial Strategy¹ sets out the Union's overarching ambition to foster a 'twin transition' to climate neutrality and digital leadership. Horizontal ecodesign requirements should be established where the technical similarities of product groups allow their environmental sustainability to be improved based on the same requirements. <u><i>It is important that horizontal</i></u>	movement of products in the internal market, the power to adopt delegated acts in accordance with Article 290 TFEU should be delegated to the Commission to supplement this Regulation by setting out the specific ecodesign requirements applicable. Those ecodesign requirements should in principle apply to specific product groups, such as washing machines or washing machines and washer dryers. In order to maximise the effectiveness of ecodesign requirements and to efficiently improve environmental sustainability of products, it should also be possible to set out one or more horizontal ecodesign requirements for a wider range of products groups in the same delegated act, such as electronic appliances or textiles. Horizontal ecodesign requirements should be established where the ~~technical~~ similarities of product groups allow their environmental sustainability to be improved	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>requirements be developed in particular on durability and repairability. Sufficient time should be provided to economic operators to adjust to new ecodesign requirements. Those horizontal requirements should take into account potential environmental benefits stemming from the use of one common charger for several products. Therefore, product groups with technical similarities should be required to be equipped with common chargers.</u>	based on the same requirements.	
Recital 13a				
22a			(13a) When defining the product group, the Commission should consider inter alia if products which are custom-made products and small series production should be exempted from the application of all or parts of the ecodesign requirements. The Commission should ensure that such exemptions	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			do not lead to circumvention.	
Recital 14				
23	(14) In order to allow the Commission to set requirements as appropriate to the product groups covered, ecodesign requirements should include performance and information requirements. Those requirements should be used to improve product aspects relevant for environmental sustainability, such as energy efficiency, durability, reparability and carbon and environmental footprints. Ecodesign requirements should be transparent, objective, proportionate and in compliance with international trade rules.	(14) In order to allow the Commission to set requirements as appropriate to the product groups covered, ecodesign requirements should include performance and information requirements. Those requirements should be used to improve <u>relevant</u> product aspects ~~relevant for~~ <u>concerning</u> environmental sustainability, such as energy efficiency, durability, ~~reparability~~ <u>repairability</u>, <u>reusability</u>, <u>recyclability</u>, and carbon and environmental footprints. Ecodesign requirements should be transparent, objective, proportionate and in compliance with international trade rules. <u>Those requirements should also be based on the product parameters referred to in Annex I and, in setting them, the Commission should take</u>	(14) ~~In order to allow the Commission to set requirements as appropriate to the product groups covered~~, Ecodesign requirements ~~should include~~ are performance and information requirements.- Those requirements should be used to improve product aspects relevant for environmental sustainability, such as energy efficiency, durability, reparability and carbon and environmental footprints. Ecodesign requirements should be transparent, objective, proportionate and in compliance with international trade rules. In view that circular and sustainable business models, including those based on the sale of second-hand goods, need to be promoted, ecodesign requirements should not apply to products already placed on the market.	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>into account the Union's objectives in the fields of climate, environment and biodiversity, energy efficiency and resource security. Such requirements should contribute to decreasing the Union's environmental, material and consumption footprints in order to bring them within planetary boundaries as soon as possible.</u>	Products which are modified or reworked in such a substantial way that they are to be considered as new products to be placed on the market should however be subject to ecodesign requirements if they fall within the scope of a delegated act. This assessment should be made on a case-by-case basis and where applicable in line with product specific sectoral legislation. The "Commission's Blue Guide" on the implementation of EU product rules 2022 can also be a useful tool for determining when a product should be considered new when it is altered in a substantial manner. Refurbishment or repair of a product which do not meet the criteria of being waste should generally not be seen as resulting in a new product having been placed on the market.	
Recital 15

		the size, nature or impacts of the products considered. <u>The product passport should remain available for at least the expected lifetime of a specific product, but with an adequate margin to ensure the product passport is available in cases in which the product lasts for longer than expected.</u>	setting ecodesign requirements should analyse the costs and benefits of setting information requirements through product passports on model, batch or item level. A ‘model’ usually means a version of a product of which all units share the same technical characteristics relevant for the ecodesign requirements and the same model identifier, a ‘batch’ usually means a subset of a specific model composed of all products produced in a specific manufacturing plant at a specific moment in time and an ‘item’ usually means a single unit of a model. The impact assessment should also, to the extent that the product passport relies on standards which are not free of charge, consider whether this is suitable and how disproportionate costs for SMEs can be avoided .

36a			(27a) Union law already establishes various information requirements for products and sets up systems to make this information available to economic operators and consumers. Whenever feasible, the Commission should aim to ensure consistency and to reduce the administrative burden on economic operators due to potential duplication of reporting obligations under other Union legislations and information requirements under this Regulation. In particular, the Commission should consider linking information requirements under this Regulation to other existing information requirements under EU law, such as the obligation to provide safety data sheets for substances and mixtures according to Regulation (EC) No 1907/2006. When feasible, the Commission should also link the product passport to

	maintenance originally conceived at the design stage, or to meet applicable technical standards or regulatory requirements, with the result of making a fully functional product;	functionality within the intended use, ~~range of performance and maintenance~~ originally conceived at the design stage, ~~or to meet applicable technical standards or regulatory requirements~~ , with the result of making a fully functional product;	~~either~~ its performance or functionality within the intended use; ~~and~~ range of performance ~~and maintenance~~ originally conceived at the design stage, ~~or to meet~~ applicable technical standards or regulatory requirements, with the result of making a fully functional product at the time of its placing on the market. ;	
Article 2, first paragraph, point (19)				
157	(19) ‘maintenance’ means an action carried out to keep a product in a condition where it is able to function as required;		(19) ‘maintenance’ means ~~an action~~ actions carried out to keep a product in a condition where it is able to ~~function as required~~ fulfil its intended use;	
Article 2, first paragraph, point (20)				
158	(20) ‘repair’ means returning a defective product or waste to a condition where it fulfils its intended use;	(20) ‘repair’ means returning a defective product or waste to a condition where it fulfils its intended use;	(20) ‘repair’ means ~~returning~~ actions carried out that return a defective product or waste to a condition where it fulfils its intended use;	
Article 2, first paragraph, point (20a)				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
158a		<u>(20a) 'premature obsolescence' means making available on the market a product with a feature which limits its foreseeable lifetime;</u>		
Article 2, first paragraph, point (21)				
159	(21) 'durability' means the ability of a product to function as required, under specified conditions of use, maintenance and repair, until a limiting event prevents its functioning;	(21) 'durability' means the ability of a product to function ~~as~~ <u>and maintain for a certain period of time its</u> required ~~function and performance~~ under ~~specified~~ <u>normal</u> conditions of use, maintenance and repair; until a limiting event prevents ~~its~~ <u>the product from</u> functioning;	(21) 'durability' means the ability of a product to function as required, under specified conditions of use, maintenance and repair, until a limiting event prevents its functioning condition after one or more limiting events is reached;	
Article 2, first paragraph, point (22)				
160	(22) 'reliability' means the probability that a product functions as required under given conditions for a given duration without a limiting event;	(22) 'reliability' means the <u>high</u> probability that a product functions as required under given conditions for a given duration without a limiting event;	(22) 'reliability' means the probability that a product functions as required under given conditions, including maintenance , for a given duration without a limiting event;	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Article 2, first paragraph, point (22a)				
160a			(22a) ‘limiting event’ means an occurrence with the result that a function, which fulfils the intended use, is no longer delivered;	
Article 2, first paragraph, point (23)				
161	(23) ‘environmental footprint’ means a quantification of a product’s environmental impacts, whether in relation to a single environmental impact category or an aggregated set of impact categories based on the Product Environmental Footprint method;	(23) ‘environmental footprint’ means a quantification of ~~a product~~ <i>product life cycle</i> ’s environmental impacts, whether in relation to a single environmental impact category or an aggregated set of impact categories based on the Product Environmental Footprint method <i>or other scientific methods developed by international organisations and widely tested in collaboration with different industry sectors and recognised by the Commission</i> ;	(23) ‘environmental footprint’ means a quantification of a product’s environmental impacts, whether in relation to a single environmental impact category or an aggregated set of impact categories based on the Product Environmental Footprint method which can be, where appropriate, complemented or supplemented by scientifically robust tools and methods with a level of detail that ensures comparability across product groups ;	
Article 2, first paragraph, point (24)				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
G 162	(24) ‘Product Environmental Footprint method’ means the life cycle assessment method to quantify the environmental impacts of products established by Recommendation (EU) 2021/2279;	(24) ‘Product Environmental Footprint method’ means the life cycle assessment method to quantify the environmental impacts of products established by Recommendation (EU) 2021/2279;	(24) ‘Product Environmental Footprint method’ means the life cycle assessment method to quantify the environmental impacts of products established by Recommendation (EU) 2021/2279;	(24) ‘Product Environmental Footprint method’ means the life cycle assessment method to quantify the environmental impacts of products established by Recommendation (EU) 2021/2279; Text Origin: Commission Proposal
Article 2, first paragraph, point (25)				
G 163	(25) ‘carbon footprint’ means the sum of greenhouse gas (GHG) emissions and GHG removals in a product system, expressed as CO ₂ equivalents and based on a life cycle assessment using the single impact category of climate change;	(25) ‘carbon footprint’ means the sum of greenhouse gas (GHG) emissions and GHG removals in a product system, expressed as CO ₂ equivalents and based on a life cycle assessment using the single impact category of climate change;	(25) ‘carbon footprint’ means the sum of greenhouse gas (GHG) emissions and GHG removals in a product system, expressed as CO ₂ equivalents and based on a life cycle assessment using the single impact category of climate change;	(25) ‘carbon footprint’ means the sum of greenhouse gas (GHG) emissions and GHG removals in a product system, expressed as CO ₂ equivalents and based on a life cycle assessment using the single impact category of climate change; Text Origin: Commission Proposal

Y 177a		<u>- substances regulated under Regulation (EU) No 2019/1021 of the European Parliament and of the Council^{1a};</u> <u>1a. Regulation (EU) 2019/1021</u>		CSL in principle not in favour of this addition, checking. but we understand why it might be a good move. check with chemical experts.

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants (OJ L 169, 25.6.2019, p. 45).</u>	PUBLIC	EC not enthusiastic about the addition. Do not see the need. Those substances are already covered, if not all, then mostly covered by the other categories. This being said, precisely because already covered, this specific addition may not be harmful so if co-legislators agree, we can live with it. CSL LS - why "regulated" and not listed or referred EP will check this particular word.
Article 2, first paragraph, point (28)(b), eleventh indent				
R 177b		<u>- specific restricted substances listed in Annex XVII of Regulation (EC) No 1907/2006.</u>		CSL why is this not already included? this means that the def is expanded. restriction of reach is on particular uses, the linking of the S to the detail of the restrictions in reach would have a substantial negative impact, also in consideration of the use of this definition under

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
				this proposal EC not in favour of this addition. it's not the logic of this part B which precisely identifies the categories of the S which have a chronic effect and thus be relevant in a circularity approach. Here it's not the same logic, it's the restriction under REACH and the job is done there EP underlines the importance of this point.

Annex II, first paragraph				
Y	925b		When deciding which information requirements, other than requirements on the digital product passport and substances of concern, are appropriate for the product group concerned the Commission shall, apart from Article 5 and 7, take into consideration the following elements:	Y
Annex II, first paragraph, point (a)				
Y	925c		(a) the potential for improvement and relative effectiveness in delivering a better environmental sustainability	Y
Annex II, first paragraph, point (b)				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement	
Y	925d		(b) the technical feasibility of such information requirements		Y
	Annex II, first paragraph, point (c)				
Y	925e		(c) the needs of various economic operators, including SMEs		Y
	Annex II, first paragraph, point (d)				
Y	925f		(d) the need for potential customers to make informed choices		Y
	Annex II, first paragraph, point (e)				
Y	925g		(e) the need to verify compliance with the requirements		Y
	Annex II, first paragraph, point (f)				
Y	925h		(f) the legitimate need to protect confidential business		Y

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			information, intellectual property rights and trade secrets	
	Annex II, first paragraph, point (g)			
Y	925i		(g) the need to provide information on the performance of the products for each aspect covered by a performance requirement	Y
	Annex II, first paragraph, point (h)			
Y	925j		(h) the added value in providing information on the performance of the products for aspects not covered by performance requirements.	Y
	Annex II, second paragraph			
Y	925k		The Commission will include information requirements in its analysis and impact assessment related to performance requirements referred to in Article 6 and	Y

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			this Annex. In particular, the Commission will assess the type of information and the manner in which it should be made available to ensure that it is relevant and understood by the target group.
