In addition to the information presented in sections II and III above, the European Union also reports the following information:

a) Information on actions to correct discrepancies identified from 1 January 2022 to 9 September 2023, changes to the national registry to prevent discrepancies from reoccurring and resolution of previous questions of implementation pertaining to transactions

9. In accordance with paragraph 17 of the annex to decision 15/CMP.1 in conjunction with decision 3/CMP.11, the European Union reports that discrepancies have been identified by the ITL during the periods 1 January to 31 December 2022 or 1 January to 9 September 2023 and the actions taken to correct problems that caused discrepancies to occur can be found in section 2 of this report.

In view of the discrepancies identified by the ITL, the changes to the national registry made to prevent such discrepancies from reoccurring can be found in annex I of this report.

10. In accordance with paragraph 17 of the annex to decision 15/CMP.1 in conjunction with decision 3/CMP.11, the European Union reports that no questions of implementation pertaining to its transactions have been previously identified.

b) Commitment period reserve

11. For the purposes of the joint fulfilment, the commitment period reserve applies to the EU, its Member States and Iceland individually. The commitment period reserve (CPR) of the European Union is 14 231 780 406 tonnes CO₂-eq. The European Union CPR is contained in annex II, table II.1, of the “Report on the individual review of the annual submission of the European Union submitted in 2022”⁴ and was agreed by the relevant expert review team.

c) Total quantity of units in the retirement account

There are three types of assigned amount in relation to the EU’s joint fulfilment under the second commitment period of the Kyoto Protocol: on the one hand, the joint assigned amount, and on the other, the respective emission levels of the members to the joint fulfilment, namely the EU’s assigned amount and the Member States’ and Iceland’s assigned amounts:

⁴ [FCCC/ARR/2022/EU](#)

- i. Joint assigned amount: the joint assigned amount for the European Union, its Member States and Iceland is calculated pursuant to the quantified emission limitation and reduction commitment listed in the third column of the table contained in Annex B to the Kyoto Protocol, while the assigned amount of each Member State and Iceland is determined in accordance with the terms of the joint fulfilment agreement and fixed based on annex II to European Commission decision 2013/162/EU and as adjusted by European Commission implementing decision 2013/634/EU.
- ii. EU assigned amount: the emission level and assigned amount for the EU is the difference between the joint assigned amount of the members, and the sum of the emission levels of the Member States and Iceland. The assigned amount of the EU is counted against the emissions of greenhouse gases listed in Annex A to the Kyoto Protocol that are also covered by the EU Emissions Trading System (EU ETS) pursuant to Directive 2009/29/EC of the European Parliament and of the Council amending Directive 2003/87/EC so as to improve and extend the greenhouse gas emission allowance trading scheme of the Community. The sectors covered by the EU Emissions Trading System are those specified in Annex I of the EU ETS Directive and taking into account the application of its articles 24 and 27.
- iii. Member States' and Iceland's assigned amounts: The emission levels of the Member States and Iceland cover the emissions from sectors and gases listed in Annex A to the Kyoto Protocol not covered by Directive 2009/29/EC of the European Parliament and of the Council amending Directive 2003/87/EC so as to improve and extend the greenhouse gas emission allowance trading scheme of the Community. This includes all emissions from sources and removals by sinks covered by Article 3(3) and (4) of the Protocol, noting that some LULUCF activities are voluntary, as well as all emissions of nitrogen trifluoride (NF₃) under the Kyoto Protocol. The figure for individual Member States is equal to the sum of each Member State's Annual Emissions Allocation (AEA) under Decision No 406/2009/EC on the effort of Member States to reduce their greenhouse gas emissions to meet the Community's greenhouse gas emission reduction commitments up to 2020 (Effort Sharing Decision) for the years 2013 to 2020 before the application of Article 3(7bis).

Regarding LULUCF, EU Member States, the UK and Iceland will continue to apply Article 3(3) and (4) of the Kyoto Protocol. Each Member State, UK and Iceland will individually account for net emissions and removals for each activity under Article 3(3) and (4), if elected, by issuing RMUs or cancelling Kyoto Protocol units in their Kyoto registries based on the corresponding reported emissions and removals from these activities and the specific accounting rules. The EU will neither issue, nor cancel units based on the reported emissions and removals from activities under Article 3(3) and (4).

'For the assessment of compliance with the joint fulfilment agreement at the end of the second commitment period, the total GHG emissions of the EU, its Member States, the United Kingdom and Iceland from sources listed in Annex A to the Kyoto Protocol for the period 2013 to 2020 shall be compared to the total amount of Kyoto units retired in the Kyoto registries of the EU, its Member States, the United Kingdom and Iceland'⁵ as submitted in their True-up period reports. The total GHG emissions of the EU have been reviewed as part of the resubmission of the EU's GHG inventory in December 2022 and are final.'⁶

In accordance with the joint fulfilment agreement, the total quantities of Kyoto Protocol units in the retirement account for individual Member States and the United Kingdom in **Table 1bis** should be at least equal to the sum of each Member State's verified emissions based on the Annual Emissions Allocation (AEA) under Decision No 406/2009/EC on the effort of Member States to reduce their greenhouse gas emissions to meet the Community's greenhouse gas emission reduction commitments up to 2020 (Effort Sharing Decision) for the years 2013 to 2020 before the application of Article 3(7).⁸

The respective quantity of Kyoto protocol units retired for the 27 Member States, the United Kingdom and Iceland in accordance with Article 4(1) and (5) of the Protocol and before application of Article 3(7) are listed in Table 1bis below.

If either one of the two entries is deleted, the other one is also deleted. If the account representative is added again, it is displayed twice again. This is a specific case when the AR is attempted to be added to the account, then initially rejected, and added again successfully. The same account must be released and claimed by a new account holder and the same AR is added again to the new account holder.	EUCR	EUCR 13.8.2	PASSED

b) Annex II - Information regarding the serial numbers of the Kyoto Protocol units in the EU's retirement account for the second commitment period (2013-2020)

c) **Annex III – Text on the European Union’s joint commitments under Article 3 of the Kyoto Protocol for the second commitment period of the Kyoto Protocol**

The terms of the **agreement to fulfil jointly the commitments of the European Union, its Member States⁹ and Iceland** (‘the members’) under Article 3 of the Kyoto Protocol for the second commitment period of the Kyoto Protocol, as adopted by the Conference of the Parties to the United Nations Framework Convention on Climate Change (‘UNFCCC’) serving as the meeting of the Parties to the Kyoto Protocol in Doha, by Decision 1/CMP.8, in accordance with Article 4 of the Kyoto Protocol provides that **the members will fulfil their commitments by ensuring that**, in accordance with Article 4(5) and (6) of the Kyoto Protocol, **the combined sum of the aggregate anthropogenic carbon dioxide equivalent emissions of the greenhouse gases listed in Annex A to the Kyoto Protocol in the Member States and Iceland does not exceed their joint assigned amount.**

The joint assigned amount of the EU, its Member States and Iceland for the period 2013-2020, as established in the initial review report, is 37 604 433 280 t CO₂ eq¹⁰.

The assigned amounts of the individual Member States and Iceland cover the emissions from sectors and gases listed in Annex A to the Kyoto Protocol not covered by the EU’s emissions trading system (ETS), i.e., emissions covered by the EU’s [Effort Sharing Decision](#). The assigned amounts for the period 2013-2020 were calculated per each Member State after exclusion of LULUCF activities. However, 6 countries (DK, IE, LU, NL, PT and UK) were allowed to include net emissions from deforestation activities in the calculation of their assigned amounts. The total amount assigned to the individual Member States and Iceland is 21 791 343 942 t CO₂ eq. A breakdown of the assigned amounts per country is presented in Table A.1.

The assigned amount of the Union for the period 2013-2020 amounts to the difference between the joint assigned amount and the sum of the individual assigned amounts of the Member States and Iceland, and is, as established in the UNFCCC initial review report, 15 813 089 338 t CO₂ eq. It covers emissions under the EU ETS. The sectors covered by the EU Emissions Trading System are those specified in Annex I of the [EU ETS Directive](#) and taking into account the application of its Articles 24 and 27.

Based on the above, for the purpose of compliance with the second commitment period of the Kyoto protocol, the **assigned amounts of the individual Member States and Iceland should not be compared with the sum of the anthropogenic carbon dioxide equivalent emissions of the greenhouse gases listed in Annex A to the Kyoto Protocol in these individual countries** as the calculation of the assigned amounts of these countries excludes ETS emissions on their territory.

⁹ In this Annex, ‘Member States’ should be understood as the current 27 EU Member States and the United Kingdom.
