Whereas:

- (1) Council Regulation (EC) No 2223/96 of 25 June 1996 on the European system of national and regional accounts in the Community <sup>1</sup> contains the reference framework of common standards, definitions, classifications and accounting rules for drawing up the accounts of the Member States for the statistical requirements of the Community, in order to obtain comparable results between Member States.
- (2) The report of the Monetary Committee on statistical requirements in the Economic and Monetary Union (EMU), endorsed by the Ecofin Council of 18 January 1999, underlined that, for the proper functioning of the EMU and the Single Market, effective surveillance and coordination of economic policies are of major importance and that this requires a comprehensive statistical information system providing policy makers with the necessary data on which to base their decisions. This report outlined the high priority in having such information available for the Community and especially for Member States participating in the euro area.
- (3) The report underlined that the cross-country comparison of the labour market will demand more attention in the EMU.
- (4) In order to compile quarterly statistics for the euro area, the time limit for transmission of the main aggregates of national accounts should be reduced to 70 days.
