COMMISSION WORKING DOCUMENT

First progress report on the strategy for the simplification of the regulatory environment

Executive summary

The present Commission Working Document is a direct follow-up to the October 2005 Communication COM(2005) 535: Implementing the Community Lisbon programme: A strategy for the simplification of the regulatory environment. It also complements the Communication on the “Strategic review of Better Regulation in the European Union”.

Simplification of EU legislation can make a significant contribution to improve the regulatory environment, update and modernize rules as well as reduce administrative burden in order to enhance the state of the European economy, taking into account developments in technologies, markets and the international context. This is the reason why the Commission has identified simplification as one of the key political priorities through the Better Regulation agenda.

In line with this orientation, the Commission Working Document takes stock of progress achieved in the implementation of the October 2005 simplification, addresses ongoing work in the pipeline and presents brand new initiatives which will enhance the simplification rolling programme covering the period 2006-2009. One of the key achievements of simplification is the progressive coverage of all EC regulatory areas. The Commission Working Document will also present a state of play in terms of codification.

In parallel, this first progress report addresses the success factors for achieving the simplification goals, in particular a solid set of methodologies, improved inter institutional cooperation with the European Parliament and the Council to take the work to the final stages, increased use of self-regulation and co-regulation as well as simplification at national level to ensure that the EU simplification benefits are not cancelled out by new national rules or technical barriers.

INTRODUCTION

In line with the political priorities of its Better Regulation policy set out in March 2005, the Commission adopted a new strategy for the simplification of the regulatory environment¹ in October 2005. The overarching objective of the strategy is to improve the quality and effectiveness of the *acquis* and remove unnecessary burdens for operators, thereby contributing to the goal of enhancing competitiveness of the European economy.

¹ Communication COM(2005) 535: Implementing the Community Lisbon programme: A strategy for the simplification of the regulatory environment. Simplification covers a broad range of instruments including repeal, codification, recast or modification of the regulatory approach. Definition of codification is presented in this document under point “1.2 State of play – Codification”. Recasting is the process whereby a new legally binding act repealing the acts which it replaces combines both the amendment of the substance of the legislation and the codification of the remainder which is intended to remain unchanged.

The European Parliament² broadly welcomed the Commission's programme to simplify the *acquis* whilst the European Council³ called on the Council to prioritise the progress of simplification proposals through the legislative system. Cooperation with the co-legislators is crucial to the delivery of simplification proposals.

As a complement to the “Strategic review of Better Regulation in the European Union”⁴, the present Commission Working Document reports for the first time on achievements since the launch of the strategy in October 2005 and presents new developments in the realisation of Simplification strategy goals. In particular it will:

- present the “state of play” in the implementation of the Simplification Strategy and the codification process, focusing on:
 - (1) completed actions in the rolling programme,
 - (2) action in progress requiring further work and,
 - (3) new actions identified by the Commission;
- address the key success factors for achieving a genuinely simplified regulatory environment, in particular a solid set of methodologies, close cooperation between EU institutions, increased use of self-regulation and co-regulation, as well as simplification at national level.

The updated rolling programme covering the period 2006-2009 integrates the simplification initiatives earmarked in the Commission Legislative and Working Programme 2007 and provides an overview of the Commission's efforts to simplify the current regulatory environment in a multi-annual perspective. The fact that simplification initiatives are included in the Commission's legislative and work programme for 2007 for the first time, clearly demonstrates the political priority given to the simplification strategy.

A change in regulatory culture is taking place. Indeed, for the first time, the Commission has adapted its working methods, priorities and resources to the simplification goals. One of the key achievements is the progressive coverage of all policy fields.

In the future, the ongoing work on the reduction of administrative burden will feed into the simplification exercise which will, in his turn, contribute to an overall 25% joint reduction target for EU and national legislation to be achieved by 2012, as indicated in the “Strategic Review of Better Regulation”.

In line with this, the benefits of extensive consultations of stakeholders and impact assessments will help improve the quality of the Commission's new proposals and will better enable legislators to produce a regulatory environment that is in full compliance with the subsidiarity principle and is more conducive to competitiveness, innovation and growth. This is likely to alleviate the future simplification workload.

Progress reports will be launched on a regular basis.

1. STATE OF PLAY

1.1. State of play – simplification rolling programme

In the Simplification Strategy of October 2005 a range of simplification methods is covered, providing for a three-year rolling programme, initially listing for the period 2005-2008 about 100 initiatives covering 220 basic legislative instruments that the Commission intends to simplify, based on extensive consultations with Member States, businesses and citizens.

In view of the importance of the continuous re-examination of the *acquis*, the Commission has now identified a further 43 additional initiatives with a potential simplification dimension for the period 2006-2009. These are included in the updated rolling programme, which is presented in Annex 1. The programme confirms the Commission's determination to target the reduction of administrative burden generated by the regulatory framework and to update and modernise rules, taking into account developments in technologies, markets and the international context.

1.1.1. Progress achieved by the Commission

12 out of 14⁵ initiatives scheduled for 2005 have been completed. As far as 2006 is concerned, no less than 54 initiatives were planned in the October 2005 Communication, three initiatives are newly identified, one is carried over from 2005 and one is brought forward from 2008. Of these, 15 initiatives have been adopted to date⁶. In addition, 24 simplification proposals have been confirmed for adoption before the end of this year and are presented in Annex 1. 15 will be postponed to 2007/2008. Thorough reviews and consultations with stakeholders have led to cancellation of five initiatives.

The Commission has adopted to date 27 initiatives out of 71 for 2005-2006 and more than half of the programme will have been adopted by the end of 2006. The rate of progress of the Simplification rolling programme in 2006 varies according to the complexity of the field concerned, and in some instances, has globally fallen behind schedule, even if some initiatives have been adopted earlier than initially planned. The delayed initiatives are however almost all confirmed for 2007.

It should be stressed that this programme is by far the most ambitious exercise on simplification ever launched by the Commission. Simplification exercise has proven to be challenging where the benefits for business and citizens have to be balanced against the effort and costs needed to adapt to a new regulatory environment. Simplification can indeed imply regulatory reform for some policy areas. To overcome the resistance to change that reform plans generate, more time is often needed to help demonstrate the overall macroeconomic net benefits of the proposed changes.

⁵ The remaining two - the proposals the radio protection and agricultural products and the computerised air reservation system - have been respectively postponed to 2006 and 2007.

⁶ As of 27 October 2006.

Moreover, impact assessments may highlight new elements of relevance for the policy maker when it comes to choosing the most appropriate policy option⁷. The implementation of the simplification programme is being developed taking into account the findings of these impact assessments.

Almost all simplification proposals tabled by the Commission are currently still pending before the Council and the European Parliament. These proposals are presented in Annex 3.

Some examples of achievements are presented below and show that major areas for business and citizens have been already addressed by the Commission's simplification programme.

Examples of proposals adopted by the Commission are presented below:

- **Modernised Customs Code and e-customs**⁸: recast of Community customs legislation and creation of pan-European electronic systems for data exchange between public authorities and companies. International trade will be facilitated by streamlined and simplified customs procedures and rules, automated and interlinked customs systems, and the close cooperation of all authorities and agencies involved in the movement of goods across Community borders.
- **Environment**⁹: modernisation of the Waste Framework Directive:
 - Simplifying waste legislation by clarifying definitions, streamlining provisions and integrating directives on hazardous waste and on waste oils;
 - Improving the recycling market by setting environmental standards that specify the circumstances in which certain recycled waste is no longer considered waste.
- **Free movement of workers**¹⁰
 - Modernisation of current provisions on the coordination of national social security systems;
 - Facilitation of procedures for insured persons and reduction of the time needed for institutions in the various branches of social security (sickness, accidents at

⁷ Examples of delays encountered in the Simplification strategy include: (a) The initially planned repeal of the computer reservation systems legislation in the aviation sector is being reviewed and any action has been postponed, as the need arose to conduct further analysis in view of the reactions of both stakeholders and the European Parliament. Fully in line with Better Regulation principles, the Commission decided to launch an extended impact assessment to further examine the range of options, including the repeal or partial liberalisation of the existing regulation, and to consult stakeholders again. (b) Recent international developments in the energy field and the subsequent debate on energy security led the Commission to postpone, probably until 2008, its planned review of oils stocks legislation. The future policy of the Commission in this area will largely depend on the outcome of the consultation on the Green Paper on energy policy tabled by the Commission in March 2006.

work, occupational diseases, invalidity, old age, unemployment, family benefits) to respond and to process cross-border cases.

- **Food additives and flavouring**¹¹

- Simplification of food additive legislation by creating a single instrument for principles, procedures and approvals;
- Improvement of the procedure to update the Community list of authorised food additives.

- **Small and medium sized enterprises in pharmaceuticals**¹²: establishment of a simplified regulatory framework for micro-SMEs, including reduced fees, options for deferred payment of fees and administrative and regulatory assistance when submitting applications to the European Medicines Agency.

- **Payment services**¹³: Creation of a simplified regulatory framework for payment services for consumers and firms. The proposal provides for simplification of legislation (replacing three directives and three recommendations by one coherent set of rules), simplification of administrative procedures for public authorities (EC or national), and simplification of administrative procedures for private parties. The proposal introduces more transparency and clearer, more succinct information requirements for users of payment services and consumers.

- **Accounting rules**¹⁴: Amendment of existing accounting rules by giving Member States more room to exempt companies from certain disclosure requirements (by raising the thresholds for such disclosure). This will lead to administrative simplification for smaller firms.

- **Structural business statistics**¹⁵: the proposal simplifies the production of SBS data by deleting some 15 mandatory variables (on R&D, employment, energy, and financial leasing), by moving other variables from annual to multi-annual collection, and by deleting the optional variables. Furthermore, Eurostat is developing a programme for re-engineering business statistics, to help Member States with new methods that could reduce substantially the response burden through e.g. a more intensive use of administrative data, and the automatic electronic transmission of company accounts.

- **Air transport market**¹⁶: the revision of the so-called third package of air transport liberalisation should make the legislation more readable by combining three existing regulations into one new regulation. The legislation modernises and simplifies the legal framework, ensures a coherent application across member States and addresses potential distortions and limitations of competition in some segments of the market. This should contribute to more consumer choice, lower fares and more competition.

1.1.2. Ongoing work

A number of major simplification initiatives relevant for competitiveness are now confirmed for 2006/2007/2008 and are illustrated below:

- **Agriculture:** merging of the 21 Common Market Organisations into one single scheme to establish a streamlined horizontal legal framework that will provide a single set of harmonised rules in the various areas of market policy such as intervention, private storage, import tariff quotas, export refunds, safeguard measures, agricultural products, state aid rules, communications and data reporting.
- **Environment:** review of the Integrated Pollution Prevention and Control Directive (IPPC) and other related legislation on industrial emissions with a view to improving clarity and consistency (notably in terms of reporting) and streamlining requirements.
- **Construction** products Directive, with a view to clarifying and reducing the administrative burden, in particular for SMEs, through more flexibility in the formulation and use of technical specifications, lighter certification rules, and elimination of the implementation obstacles that so far have hampered the creation of a full internal market for construction products.
- **Statistics:** lighten statistical reporting by economic operators, in particular SMEs, taking into account the ongoing work on improving statistical governance of the Union and the final outcome of the ongoing pilot projects on the measurement and reduction of administrative burden.
- **Food/Feed labelling:** The modernisation of the legislation will clarify rules under which labelling will operate to enable consumers to make informed, safe, healthy and sustainable choices and contribute to a pro-competitive market environment in which operators can make efficient use of labelling to sell their products.
- **Consumer protection:** Rationalisation and simplification of the whole consumer protection *acquis* in order to remove possible inconsistencies, overlaps, internal market barriers and distortions of competition.
- **Cosmetics:** The cosmetics Directive was adopted 30 years ago and has been modified more than 40 times. A recast is needed to introduce more consistency and clarity in the text. This will help reduce the administrative cost of implementation and management of the Directive, while maintaining unchanged the actual regime on the progressive banning of animal testing.
- **Accounting and financial reporting standards:** Providing EU firms with an up-to-date set of Financial Reporting Standards by merging the current set of Regulation¹⁷, amounting to over 2 000 pages, into one single and user-friendly Regulation.
- **Automotive Regulatory Framework:** The pending proposal for the revision of the framework Directive on type-approval of motor vehicles, when approved, will allow:

¹⁷ Commission Regulations on the endorsement of International Financial Reporting Standards (IFRS), International Accounting Standards (IAS) and interpretations.

- the replacement of EC Directives by UN/ECE regulations. This simplification will streamline regulations and remove redundant requirements. Furthermore, it will help global industry to remove non-tariff barriers to trade, maintaining the EU's leading position as the developer of international standards and allowing industry to adapt faster to technical developments at international level;
 - the introduction of necessary technical provisions for self-testing and virtual testing in 25 EC Directives and UN/ECE Regulations. It will permit the simplification of the type-approval procedure and allow the regulatory environment to be kept up to date with technological developments. Virtual and self-testing will speed up product development and reduce costs for both industry and consumers. In addition, the Commission is currently proposing a general provision in the Directive for the approval of motor vehicles, enabling manufacturers to act as testing laboratories provided that the type-approval authority has acknowledged the necessary competence.
- **Access to the road transport market and profession:** Recasting four regulations and one directive to clarify, simplify and make more enforceable the rules governing access to the profession and to the market, including cabotage of road haulage and passenger transport. The recast should allow for harmonised application and cost-effective enforcement of the rules, including in the trans-national context, thus limiting distortion of competition, protecting the right of establishment and improving service quality and road safety.
 - Consolidation of the technical **New Approach**¹⁸ Regulations/Directives for the marketing of products around consistent definitions, simplified certification procedures and streamlined administrative cooperation so as to facilitate the commercialisation of products while protecting manufacturers against non- conforming products.

1.1.3. New initiatives reinforcing the Simplification rolling programme

Based on the rolling programme launched last year, the Commission is reinforcing its simplification action with 43¹⁹ new initiatives for the period 2006-2009 to:

- stimulate innovation and reduce administrative burden stemming from regulatory requirements;
- reduce the total volume of the Community *acquis* and promote the transition to more flexible regulatory approaches.

Some new major initiatives are presented below:

- Simplification of the rules concerning post-licensing changes to **medicines** (so-called 'Variations' Regulations). Administrative management of these rules currently mobilise more than 60% of the human resources and financial costs of companies' regulatory

¹⁸ The New Approach Directives: lay down only the essential public interest requirements, with which products must comply, instead of fixing detailed product specific requirements. Manufacturers can choose different technical solutions and enjoy flexibility in demonstrating that these solutions comply with these requirements e.g. through standardisation.

¹⁹ The figure of 43 new initiatives corresponds to 3 new initiatives in 2006, 28 in 2007, 11 in 2008 and 1 in 2009.

departments. In some cases, this burden may hinder innovation by preventing the introduction of changes that are beneficial to patients and society. Procedures will be streamlined so that the Variations Regulations are made simpler, clearer and more flexible, without compromising public and animal health.

- Ensuring the **mutual recognition**²⁰ of goods not covered by harmonised Community rules. The Commission is currently working on a legislative proposal on the elimination of technical obstacles to the free movement of goods within the EU ("Mutual Recognition Proposal"). The instrument will define the rights and obligations of, on the one hand, national authorities and, on the other, enterprises wishing to sell in one Member State products already lawfully manufactured or marketed in another Member State.
- Clarification of the definition and the scope of safety assessment for **novel/new foods** and streamlining the authorisation procedure.
- Simplification of the management of administrative procedures in the **agricultural** field through the implementation of a series of technical simplifications. A rolling action plan has been set up to amend legal provisions that have an immediate impact on farmers, other economic operators and national administrations. The amendments concern for example obligations for farmers to keep documents available, the control obligations of Member States, the conditions for receiving support, etc.
- Simplification and improvement of the **Common Fisheries Policy** through the implementation of a legal and administrative simplification in accordance with the "2006-2008 Action Plan" adopted by the Commission in 2005²¹. The action plan covers certain regulatory provisions concerning management and control of fishing activities for example to promote legibility of the legislative framework and reduce the administrative burden to for fishermen and the administrators concerned.
- Revision of the regulatory framework for **electronic communications networks and services** will reduce the needs for ex-ante regulation and facilitate flexibility and innovation, to the benefit of both the industry and citizens.
- Replacement of the **textiles** Directives by a single Regulation in order to simplify procedures on the adoption of new fibre names. Furthermore, quantitative methods for measuring fibre content will be transferred to the standardisation process.
- Simplification of the existing legislation on **toys** by clarifying essential safety requirements and by developing conditions for a better common approach by national market surveillance authorities.
- Limitation of the legislative acts on **metrology** and **fertilizers** to essential requirement through the "New Approach". Detailed technical descriptions will be replaced by standards.
- Revision of the Community **eco-label award scheme**, with the aim of:

²⁰ This initiative is also contributing to the simplification strategy but is not included in the simplification rolling programme.

²¹ COM(2005) 647.

- (a) Creating a more business friendly system by involving stakeholders in the decision making process and including the needs of SMEs;
 - (b) Outsourcing the development of award criteria to a dedicated body and linking the eco-label closely with Green Procurement.
- Recasting of a Directive on the marketing of **fruit plant propagating material** and fruit plants intended for fruit production.
 - Addressing work-related **musculoskeletal disorders** in the context of a single instrument which would integrate various existing minimum health and safety requirements, such as those relating to the manual handling of loads or to working with display screens.

All Commission departments will complete the review of their *acquis* by 2009 to check the relevance of their instruments, the choice of regulatory technique and the scope for applying one of the simplification techniques set out in the simplification strategy of October 2005. This will lead where necessary and appropriate to the identification of new simplification initiatives and the updating of the rolling programme in the future.

1.2. State of play – codification

Codification is a key part of the European Commission's Better Regulation process. Codification is the processes that brings together the provisions of existing acts with all of their subsequent amendments into one law, thereby contributing to a reduction in the volume of the EU legislation and making it more transparent, readable and legally clear.

The codification rolling programme (in Annex 2) involves about 500 acts. A total of 52 acts have successfully gone through the codification process²² and have been adopted and published in the OJ (38 Commission acts and 14 acts of the European Parliament and the Council). In addition 33 acts are pending before the legislative authority and 8 acts are currently in written procedure. In total, 85 acts have been finalised by the European Commission.

In order to meet the objective of finalising the codification programme by the middle of 2008, measures have been taken to accelerate the conversion of the backlog of master-copies into the new EU languages. This backlog is the result of delays in the supply of translations of the texts being codified in those languages.

Adequate measures have also to be taken to maximise the number of codified texts available in Bulgarian, Romanian, Irish and Maltese, by giving priority to the codification of acts where the relevant translations have been completed.

In addition, a programme for the adoption of the remaining acts to be codified has been prepared. The aim is to ensure the transparency of the process in order, in particular, to encourage minimal new amendment of the acts undergoing codification, thereby stabilizing the legislation involved and reducing delay. This programme remains indicative since the finalisation of the codification project depends on the availability of the acts to be codified in all languages. This will apply in particular to Bulgarian and Romanian. In addition,

²² As at 27 October 2006.

codification has to be postponed when new amendments of these acts are envisaged. The order of acts in the programme will change in the light of these two factors.

It should also be noted that adoption of codified acts by the legislative authority is subject to the rules set out in the Inter-institutional Agreement on an Accelerated Working Method for Official Codification of 20 December 1994.

2. SUCCESS FACTORS

The regulatory environment for European businesses and citizens consists of several layers of often intertwined laws and rules generated at different levels (international²³, Community, national, regional and local). None of these regulators can improve the quality of this legislative network decisively on its own. Concrete improvement in the quality of the overall regulatory framework requires a determined, consistent and co-ordinated effort at all regulatory level.

2.1. Simplification work based on solid methodological grounds

2.1.1. Consultation of all parties

Both the initial and the updated 2006-2009 simplification rolling programme have been developed on the basis of stakeholders' and Member States' contributions. Their experience is indispensable in establishing a meaningful simplification programme. In-depth stakeholder consultations, review of entire policy areas, ex-post evaluation of legislative act and expert reviews help policy makers to better identify the genuine problems on the ground. Such processes also facilitate stakeholders' subsequent ownership of the proposed measure.

The October 2005 Simplification Communication²⁴ announced a series of specific initiatives:

- As announced in the "Communication from the Commission on Simplification and Better Regulation for the Common Agricultural Policy", an Action plan was established and presented at the conference entitled: "A simple CAP for Europe, a challenge for all" which took place in October 2006. The Action plan presents 20 concrete projects for technical simplification (reduction of burden without changing the underlying policy), which are to be implemented by 2007. The Action plan begins a continuous simplification process. Stakeholders and Member States are therefore invited to present further simplification proposals.
- The "2006-2008 Action Plan for simplifying and improving the Common Fisheries Policy" was adopted by the Commission in 2005 and fully supported by the Europeans institutions and the stakeholders consulted.
- The forthcoming Communication on the reduction of response burden, simplification and priority setting in the field of Community Statistics. This Communication sets out a strategic approach to continue reducing the statistical burden on enterprises through a

²³ For instance in the areas of accounting, auditing, public procurement and intellectual property rights, some rules and standards are often agreed or adopted at international level.

²⁴ Communication COM(2005) 535: Implementing the Community Lisbon programme: A strategy for the simplification of the regulatory environment.

combination of two elements: simplification of the requirements for statistics in selected priority areas and promotion of statistical tools and methods which will make it easier to meet statistical obligations. In particular, the Commission will propose a single flow system for Intrastat, a programme for re-engineering business statistics and actively pursue the simplification of the European system of agricultural statistics.

Furthermore, Article 138 of the Treaty provides for the consultation of European social partners on Community initiatives in the social policy field²⁵.

In some instances, the outcome of the consultation process has driven the Commission services to reconsider their initial intentions. For example, as regards the reviews of the Company Law and Copyright regulatory frameworks, which have resulted in further initiatives:

- Concerning company law, the Commission has planned to launch before end of this year a comprehensive initiative to measure the administrative costs originating from the company law directives with the view to identifying together with Member States and stakeholders the scope for reduction of these costs. The outcome of this exercise will be presented in a Communication in the second half of 2007.
- Concerning copyright the review resulted in several activities including an evaluation of the 2001 Copyright Directive which could, inter alia, identify exceptions to the application of this Directive. The outcome of this exercise could be envisaged by summer 2007.

2.1.2. Sector-specific analysis

In its previous Communication, the Commission identified the need for a sector-specific approach to simplification in order to better assess the impact of the regulatory framework on sectoral competitiveness.

For example, work is ongoing in the area of construction products. This includes an overall analysis of those factors influencing the competitiveness of stakeholders in the construction sector as well as specific action to simplify the construction product Directive (Directive 89/106/EEC). Stakeholder consultation is ongoing and contributions are being examined by the Commission.

In the area of motor vehicles, the CARS 21 High Level Group has examined the major policy areas which have an impact on the competitiveness of the European automotive industry and has produced a number of recommendations.

In parallel, the application of Better Regulation principles is currently being examined within the context of the new fora created in the follow-up to the Industrial Policy Communication²⁶. Sectoral screening activities have started in groups such as the taskforce on ICT Competitiveness and the Mechanical Engineering Policy Dialogue.

²⁵ A recent example is the 2005 consultation of the social partners on the simplification of the Directives on "Health and Safety at work" concerning the reports and their practical implementation.

²⁶ Commission Communication "Implementing the Community Lisbon Programme: A Policy Framework to Strengthen EU Manufacturing - towards a more integrated approach for Industrial Policy" - COM(2005) 474, 5.10.2005.

2.1.3. Current work on administrative burden

In response to the June 2006 European Council conclusions and within the competitiveness framework of the re-launched Lisbon agenda, in early 2007 the Commission will launch a major Action Plan to measure and reduce administrative burden generated by existing legislation in the EU. The plan will build on the previous experience developed by four Member States (UK, NL, DK and CZ) that have already set reduction targets after completing large baseline measurements. The Commission working paper on “Measuring administrative costs and reducing administrative burdens in the European Union”²⁷ presents the results of a pilot project on administrative burden, carried out in 2006, that examines and builds on such previous experience. In the medium term, this process should enable the EU legislator and the Member States to identify on the basis of quantified data the priority areas where there is scope for further simplification.

In this context it should be noted that, in the field of agriculture, a study is being conducted on administrative burden for farmers. The study concerns the implementation of the 2003 CAP Reform and its later amendments. First results will become available in 2007.

2.2. Close cooperation between the EU institutions

If high quality legislative proposals are delivered by the Commission, the responsibility of the Council and the Parliament is to take this simplification work to the final stage.

22 simplification proposals adopted by the Commission are pending before the Council and the European Parliament (Annex 3). Out of these, 7 simplification initiatives dated back to the previous simplification programmes of 2003²⁸ are still pending before the legislator. A list of pending proposals is presented in Annex 3 and includes texts of major importance for business such as the review of the 6th VAT Directive, modernization of the Customs Code, revision of waste legislation, simplification of type approval of motor vehicles, streamlining of structural business statistics and the repeal of the pre-packaging requirements. The adoption of the accounting directive²⁹ containing exemptions in favour of SMEs as well as the recent approval by the Council of the common position on pre-packaging illustrate the shared determination among the Institutions to simplify the regulatory framework.

Following the Commission’s invitation to the European Parliament to react to its October 2005 simplification strategy, the European Parliament responded in April 2006. The positions, taken by Parliamentary Committees on the multi-annual simplification programme show significant convergence with Commission priorities on what needs to be simplified.

In May 2006, the European Parliament adopted a series of reports covering different aspects of Better Regulation including simplification³⁰. The European Parliament proposes *inter alia*

In parallel to the resolution, the European Parliament addressed also a contribution endorsed by the Conference of Presidents summarising the position of the Committees on the simplification rolling programme covering also the interinstitutional dimension of simplification.

to identify a new type of instrument, alongside codification and recasting³¹, for specific types of simplification proposals that could benefit from adapted working methods and faster adoption.

The Inter-institutional Agreement (IIA) on Better Lawmaking³², in force since December 2003, established a platform to develop cooperation between the three institutions. The High Level Technical Group responsible for monitoring the implementation of the IIA has regularly examined progress such as the coordination and the programming of the legislative work, the quality of the legislation (impact assessment in particular), transposition and application of the Community legislation and simplification. Identification by the co-legislators of concrete action to prioritise simplification and speed-up the legislative process has proved difficult.

The agreement reached between the institutions in December 2005 on an Inter-institutional Common Approach for Impact Assessment³³ proves that if there is political will, the Inter-institutional Agreement on Better Lawmaking can produce concrete improvements in the inter-institutional implementation of better regulation. At the occasion of the review of the Common Approach in 2008, the institutions should agree that Member States initiatives in the area of police and judicial cooperation in criminal matters be accompanied by impact assessments.

The Commission has announced that it intends to facilitate the inter-institutional decision-making process by improving the programming and the visibility of simplification initiatives through:

- Integrating simplification proposals in the Annual Commission Legislative and Work Programme. This has now been achieved in the context of the 2007 CLWP;
- Fully exploiting the explanatory memorandum to better explain the simplification objectives pursued in its proposals. In the simplification proposals subject to impact assessment, the Commission will also strive to assess the simplification impacts, including administrative burden;
- Identifying some pilot cases of simplification proposals to test the possibilities to establish improved inter-institutional working methods for simplification.

2.3. Increased use of co-regulation and self regulation

Co-regulation and self-regulation are examples of tools which can be used in certain circumstances to achieve policy objectives with a limited intervention of the legislator.

For example, the European Standardisation bodies and the Commission are currently collaborating in order to propose new standard initiatives in the services sector which would focus specifically on the internal market. Standards allow users to freely compare products and prices, thus strengthening competition and enhancing intra-EU trade in services. Following wide consultations, the definition of a standardisation action plan aimed at

promoting industrial competitiveness, as well as the approval of a decision for Community financing, will energise the standardisation activities.

In the area of self regulation, the social partners at European level have a specific role to play in that they have the possibility of concluding agreements³⁴ that are made binding through a legislative proposal or that are implemented on an autonomous basis. Self-regulation is consistent with the Commission's policy to promote corporate social responsibility (CSR). Voluntary initiatives carried out under the umbrella of the European Alliance on CSR could conceivably result in new agreements on self-regulation. Such initiatives, taken by EU enterprises in close cooperation with relevant stakeholders, should also contribute to a much wider take-up of CSR practices in Europe and globally. In order to better inform private parties wishing to set up or improve self-regulatory schemes, as well as regulators responsible for co-regulatory design, the European Economic and Social Committee (EESC) and the European Commission have set up a database of almost 100 EU schemes. Due to be launched in November 2006, this database details among other things the types of problem which led to the development of EU self or co-regulation schemes, their objectives and organisational settings. Identifying good and bad practices will therefore be much easier.

2.4. Simplification at national level

2.4.1. Simplified EU legislation must also be reflected at national level

The EU Simplification exercise will need to be fully supported by Member States to ensure that the advantages of a lighter Community regulatory environment are not cancelled out by new national rules or technical barriers. This is already the case for an increasing number of Member States, although there is still room for improvement. The maintenance of statistical requirements at national level when Community law has been streamlined illustrates this.

Consequently, in some recent repeal proposals, the Commission has introduced a mutual recognition provision to ensure that no new obstacles to trade arise following the repeal of Community law. For example, the proposal on pre-packaging aims at preventing obstacles to trade because of the maintenance of national requirements.

Similarly, for the decision to repeal EU legislation on the classification of wood in the rough to be effective, there should be uniform follow-up across the EU. National laws referring to the Directive must be amended accordingly and Member States should ensure that technical changes are implemented swiftly and clearly.

Too often administrative controls and procedures are imposed on European companies wishing to operate in an other Member State. Where applicable, Treaty rules contribute to the simplification of the operations in the Internal Market. The Commission helps reducing such burdens by enforcing Article 28 of the EC Treaty on the free circulation of goods, notably through the monitoring of draft national legislation.

³⁴ The 'Agreement on workers health protection through the good handling and use of crystalline silica and products containing it', signed in April 2006, is a successful example of self-regulation. It is an autonomous agreement listing good practices to minimise the exposure of the workforce to crystalline silica dust. It should help to comply with the different national occupational limit values. This agreement negotiated by the social partners from the various industries concerned is the first multi-sectoral autonomous agreement concluded in the context of the European Social Dialogue.

In 2007, the Commission will address the integration of the defence market with the objective of alleviating the excessive administrative burden that hinders the competitiveness of EU industry in this domain. Indeed, the annual costs associated with intra-community import/export licences for military goods are estimated at 238.90 million euros for industries and administrations. In practice, these requests for licences are hardly ever rejected³⁵.

2.4.2. Avoiding gold-plating

Examination of national implementing provisions transposing Community Directives provides abundant examples of technical requirements, labelling obligations, deadlines, authorisation procedures and other administrative requirements that are added on top of Community legislation by national regulators ('gold plating'). The regulatory environment for EU companies can only be improved if initiatives taken at EU level are complemented by suitable action at national level.

This is confirmed by other sources, for example a recent study³⁶ conducted for a national federation of SMEs. This study suggests that extending the original scope of Directives in transposing measures may seriously hamper productivity for small businesses, thereby taking money away from key wealth and job creators. Furthermore, gold-plating may put national businesses at a competitive disadvantage vis-à-vis other countries.

This underpins the Commission's intention, announced in the October 2005 Communication to better exploit the potential for simplification by using, wherever appropriate, regulations rather than directives. The replacement of Directive 91/414/EEC by a regulation on the placing of plant protection products on the market is one concrete example of this shift in regulatory practice.

2.4.3. National reform programmes

Regulatory requirements and implementation measures mainly originate at national level.

The national reform programmes (NRP) are part of the new governance structure of the growth and jobs strategy (Lisbon strategy) and set out the economic reform policies at national level on the basis of Community guidelines. They are, therefore, of key importance in creating a better business environment in the EU. All Member States have responded to the guidelines on Better Regulation and have included measures to promote Better Regulation in their National Reform Programmes.

At this stage, nine Member States have launched simplification programmes of varying degrees of ambition in the context of these NRPs. It is however essential that the EU simplification programme is complemented by a progress on simplification in all Member States and at all regulatory levels. The Note for the Economic Policy Committee "Promoting

³⁶ Federation of Small Businesses in UK: Burdened by Brussels or the UK? Improving the implementation of EU Directives. (Authors Sarah Schaefer, Edward Young). This project analyses the transposition of eight directives into British law. It identifies several examples of over-implementation, notably as far as the Money Laundering Directive or the Insurance Mediation Directive are concerned.

Better Regulation”³⁷ prepared by the European Commission and the Competitiveness Report 2006 set out the main conclusions regarding the implementation of Better Regulation at Member State level and describe in greater detail progress achieved so far in this area.

Examples of national initiatives include:

- Administrative cost reduction: 17 Member States are aware of the need to analyse administrative costs imposed on business and have launched measurement activities. Some have fixed quantitative targets for reducing administrative costs (e.g. 20 or 25% by 2010). Initiatives to support this exercise are, for example, e-government, one stop-shops³⁸ or central registration offices, reduction of fiscal legislation, simplification of administrative procedures linked to employment and self-employment or cross-government initiatives;
- e-government and ICT solutions to cut red tape in public administration: establishment of portals containing legislation and forms (requests, reporting tools, etc), increased broadband availability;
- Review of legislation: to ensure its objectives are still valid - simplification of labour law, dissemination of good regulatory practices throughout government, cost-benefit analysis of legislation, creation of a business regulation forum where stakeholders examine the burdens imposed on business, overarching principles of good regulation including necessity, proportionality, subsidiarity, transparency, accountability, accessibility and simplicity;
- Simplification of taxation obligations, administration or reporting: especially one-stop shops for companies, SMEs and citizens, reform of corporate and capital income taxes;
- Simplification of VAT obligations, for example elimination of tax obstacles in cross border activities by introducing rules to allow for tax relief for contributions to pensions schemes in EU Member States, helping both migrants and cross border service providers;
- Improvement of the implementation of the internal market law to maximise its benefits;
- SMEs: better access to finance, reduction in reporting requirements, creation of a web-based, one-stop agency for start-ups;
- Common Commencement Dates (CCDs)³⁹.

Exchanges of best practices between Member States and peer reviews are of crucial importance to improving the regulatory environment. The Commission is facilitating this work through the High Level Group on Better Regulation as well as through the Lisbon process.

³⁷ Directorate General Enterprise and Industry, Brussels, 18 October 2006.

³⁸ One-stop-shops: bringing together administrative arrangements into a single processing. It increases efficiency, benefits SMEs, is transferable and has quantified measurements of outcomes.

³⁹ The purpose of CCDs is to help the business plan for new regulation and to increase awareness of the introduction of new or changed requirements. By reducing to two dates, for example, on which new regulation may be started, it is hoped that increased awareness by businesses of new or changed obligations will result in improved compliance levels.

Member States and regions should be encouraged to work together on the development of good practices, for example through the BEST initiative⁴⁰.

3. CONCLUSION

This simplification strategy, which is at the heart of the Better Regulation initiative, is showing its first results.

The European Commission is determined to move forward to deliver on its commitments to contributing to a strong regulatory environment through an enriched and ambitious rolling programme.

To achieve our common objective, Council and Parliament have to intensify their involvement to carry the Simplification work forward to the final stages.

Member states have also to do their part of the work. They should exchange best practices and implement simplification programmes.

⁴⁰ The Business Environment Simplification Task Force (BEST) was set up in 1997: involving representatives from the business community and public authorities in the Member States, BEST's brief was to prepare an independent report on ways of improving legislation and removing unnecessary hindrances to the development of European businesses, particularly small and medium-sized enterprises (SMEs). The BEST expert group has identified best practice initiatives (e.g. promoting one-stop-shops, risk-based regulation) undertaken in different countries with the aim that others can learn from their experiences. Risk-based regulation aims to focus the efforts of regulation (and the costs incurred by business) to those activities that pose the greater risks to health or the environment.

2007				
25	Proposal for a Council Regulation on common market organisation of wine	Revision	The reform of the common market organisation for wine aims mainly: - To increase the competitiveness of the EU's wine producers; - To create a wine regime that operates through clear, simple rules that ensure balance between supply and demand; and - To create a wine regime that preserves the best traditions of EU wine production and reinforces the social and environmental fabric of rural areas.	
26	Cross compliance report and relevant legislative proposals for direct support schemes under the common agricultural policy	Revision	Report with appropriate legislative proposals on the implementation of the cross compliance mechanisms of Council Regulation (EC) NO 1782/2003 establishing common rules for direct support schemes	
27	Council regulation on information and promotion actions for agricultural products	Recast	The objective of this initiative is to define the conditions, procedures and control methods in the co-financing of information programmes and the promotion of agricultural goods, both within the Internal Market and with regard to third countries. This initiative translates into a reduction of current regime on the promotion of agricultural products. The four Regulations (two of the Council and two of the Commission) will be halved into one Council Regulation and one Commission implementing measure.	X
28	Amendment of the rules concerning applications for export licenses (agricultural products)	Revision	Redrafting of Art 25 of Commission Regulation (EC) N° 1291/2000 will clarify that (for reasons of efficiency) the electronic versions of certificates referred to in Art. 19 may be submitted to the issuing body instead of to the importer / exporter.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiative to COM (2005) 535
29	Commission Regulation (EC) No 917/2004 on beekeeping	Revision	The objective is to give Member States greater flexibility to adapt financial allocations, allowing better realisation of the programme and benefiting production and marketing conditions in this sector. Commission autonomous act	X
30	Commission Regulation (EC) No 800/1999 on proof of import for differentiated refunds (agricultural products)	Revision	The objective is to amend the rules concerning proof of import in the system of differentiated export refunds (Articles 16 and 17 of Commission Regulation (EC) No 800/1999). Commission autonomous act	X
31	Commission Regulation (EC) No 2808/98 and implementing rules of Regulation (EC) No 2799/98 (operative events and exchange rates)	Revision	The proposal concerns the harmonisation of operative events and exchange rates in the different CAP sectors, relating to amounts, prices and aids to be converted in euros or in another national currency of Member States. The repeal of certain sectoral regulations and modification of Regulation (EC) NO 2808/98 in order to use a single exchange rate instead of an average rate for amounts are under consideration. Commission autonomous act	X
32	Simplification of standard periodic agricultural instruments	Revision	The objective is to replace multiple sectoral rules by horizontal ones and simplify management mechanisms through the modification of periodic agricultural instruments relating to: - Allocation of quantities for import tariff quotas; - Tendering procedures for export refunds; - Tendering procedures for public storage; - Fixing of export refunds (including respect of WTO commitments). Commission autonomous act	X

33	Horizontal rules for private storage of agricultural products	Revision	The aim is to replace multiple sectoral rules by horizontal ones and simplify management mechanisms relating to the private storage of agricultural products. It is planned to carry out a legal review of the existing sectoral provisions with a view to eliminating unnecessary provisions and to harmonising the system of private storage, and to adopt a horizontal regulation for the rules concerning private storage. Commission autonomous act	X
34	Commission Regulation (EC) No 2295/2003 on egg labelling	Revision	The existing implementing Regulation (EC) No 2295/2003 will be redrafted to take into account the changes introduced by the new Council Regulation (EC) No 1028/2006. Commission autonomous act	X
35	Horizontal rules on tender procedures for export refunds for certain agricultural products	Revision	The aim is to replace multiple sectoral rules and simplify management mechanisms relating to tendering procedures concerning export refunds for certain agricultural products, through the adoption of a horizontal regulation for the tendering procedure concerning export refunds for certain agricultural products. Commission autonomous act	X
36	Horizontal rules on import tariff quotas managed through a system of import licences (agricultural products)	Revision	The aim is to replace multiple sectoral rules by horizontal ones and simplify management mechanisms relating to import tariff quotas managed by a system of import licences (excepted bananas) by means of a legal review of the existing sectoral provisions with a view to eliminating unnecessary provisions and to harmonising regulations opening the import tariff quotas. Commission autonomous act	X
37	Commission Regulation (EC) No 382/2005 on the Common organisation of the market in dried fodder	Revision	The objective is to amend the implementing Regulation to reduce obligations for non-processors (farmers and downstream sector) under the regulation and to remove obsolete provisions. Commission autonomous act	X

38	General block exemption Regulations on the application of Arts 87 and 88 of the EC Treaty to regional aid, SME, R&D, environmental aid, employment, training	Revision	The new General block exemption Regulation (GBER) will cover areas already covered by existing block exemptions concerning training, employment, SME, and new areas like innovation, environment, risk capital and regional aid. State aid covered by this GBER will not have to be notified to the Commission. The GBER will gather all provisions concerning State aid exempted from the notification obligation in one single document and by increasing the number of cases exempted from prior notification, thereby reducing the administrative burden for MS.	
39	Notice on the execution of recovery decisions	Revision	A more effective execution of recovery decisions by Member States has been identified as a priority objective in the State aid action plan This notice should provide guidance to Member States on how they should ensure that the Commission's recovery decisions are properly executed	X
40	Implementing regulation, state aids procedural aspects	Recast	The implementing regulation provides guidance to Member States on a number of specific State aid procedural aspects (notification, calculation of recovery interests, reporting). The objective is to - Adapt the Regulation to accommodate the increased use of electronic exchanges between the Commission and the Member States; - Revise provisions regarding the recovery interests to bring them into line with economic reality; - Revise the annual reporting requirements for transparency and monitoring purposes.	X

41	Repeal of Council Decision 85/368/EEC on a system for the comparability of vocational education and training (VET) qualifications	Repeal	Following the adoption of the draft Recommendation of the Council and the EP on a European Qualifications Framework COM(2006)479, the Decision has become outdated and is no longer sustainable, notably because of the rapid development of qualifications.	X
42	Revision of Directive 2001/23/EC 'Transfer of Undertakings'	Revision	The objective is to clarify the application of the Directive to cross border operations and to introduce any amendments that are justified, after consulting Member States and social partners, on the basis of the Commission report of 2006.	X
43	Codification of Directive 89/655/CEE and its amendments, Directives 95/63/EC and 2001/45/EC, concerning the health and safety minimum requirements for the use of work equipment at work	Codification	Codification.	
44	Revision of Directive 88/378/EC on the safety of toys	Revision	The main policy objectives are the simplification of the current legislation, the improvement on the safety of toys by clarifying essential safety requirements, the improvement in the functioning of the Internal Market by developing conditions for a better common approach by national market surveillance authorities in the implementation of the legislation in force.	X
45	Proposal for Regulation of EP and Council on type approval of heavy-duty vehicles and engines with respect to their emissions (Euro VI proposal)	Revision and repeal	The proper functioning of the single market in the European Union requires common standards limiting the emission of atmospheric pollutants from motor vehicles. The proposal will apply to heavy-duty vehicles. The main objective of the proposal is to lay down the Euro VI limits for pollutant emissions. The proposal will repeal four directives.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiative to COM (2005) 535
46	Simplification of Council Directive 76/768/EEC on Cosmetic Products	Recast	The purpose of this proposal is to recast legislation on cosmetics products, as part of a more general simplification strategy concerning goods.	
47	Recast of Directive 89/106/EEC on Construction Products	Recast	The purpose of this proposal is to clarify the scope and the objectives of the existing Directive and to simplify the implementing mechanisms, ensuring proper functioning of the internal market for construction products, while avoiding constraints and obligations, e.g. administrative costs, which are disproportionate to the benefits to be expected.	
48	Repeal of Directive 84/539/EEC on electro-medical equipment used in human or veterinary medicine	Repeal	This Directive has become obsolete. The applicable standard specified in the Annex dates back to 1979. It is intended to broaden the scope of Directive 93/42/EC on medical devices which currently only addresses medical devices for human beings to veterinary devices.	X
49	Review of existing legislation on industrial emissions	Recast	The objectives is to improve the current legal framework related to industrial emissions, and to streamline the interaction between the various legislation, while not altering the underlying principles and the level of ambition of the present legal framework. As regards the scope of the present initiative, it includes reviewing the Directive 96/61/EC concerning integrated pollution prevention and control (IPPC) and related industrial emissions legislation (Directive 2001/80/EC on large combustion plants, Directive 2000/76/EC on the incineration of waste, Directive 1999/13/EC on the use of organic solvents in certain activities and installations).

50	Revision of Regulation (EC) No 1980/2000 on a revised Community eco-label award scheme	Recast	The objective is to create a more business friendly system by involvement of key stakeholders in the decision making process, outsource routine criteria development to a dedicated body, link Eco-label closely with Green Procurement and reduce the procedural burden for the Commission. The changes will focus on the substance with special attention for the needs of SMEs, the institutional set up and the links to other policy instruments in particular Green Public Procurement.	X
51	Revision of the Regulation (EC) 761/2001 allowing voluntary participation by organisations in a Community eco-management and audit scheme (EMAS)	Recast	The objective is to raise attractiveness for SMEs by reduction of the administrative burden for companies, simplify access to EMAS for company-clusters and reduce procedural requirements by cutting red tape. The changes will focus on the substance with special attention for the needs of SMEs, the institutional set up and the links to other policy instruments in particular Green Public Procurement	
52	Review of the Directives on waste from the titanium dioxide industry	Recast	The objective is to simplify the current legislation related to the waste from the titanium dioxide industry (78/176/EEC, 82/883/EEC, 92/112/EEC) based on other existing legislation, deleting obsolete provisions, while keeping the same level of environmental protection. This initiative includes reviewing and clarifying the interaction with Directive 96/61/EC (IPPC).	X
53	Development of the Shared Environmental Information System (SEIS)	Communication Recast/revision	Communication outlining the vision, objectives, actions and timetable for the development of the Shared Environmental Information System. It will be accompanied or followed by appropriate legislative proposals to streamline the environmental reporting.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiative to COM (2005) 535
54	Recast of Council Regulation (EC) No 850/98 and its modifications (8) for the conservation of fishery resources through technical measures for the protection of juveniles of marine organisms	Recast	Major revision of current technical measures in order to reduce their complexity and number, reinforce consistency and provide for simpler procedures for later updating and revision. More enforceable technical measures will be established in close cooperation with stakeholders.	
55	New legislative proposals amending the regulatory framework for electronic communications networks and services	Revision	The main objective of the legislative proposals is to enhance the ability of the current framework to deliver on its initial objectives by proposing adaptations that take account of experience to date and expected market and technological changes in the future. The creation of a competitive single market for electronic communications services and networks in Europe with corresponding benefits for citizens is the ultimate aim.	X
56	Repeal of Decision 2003/548/EC on Leased Lines	Repeal	There is no need or justification for mandating specific retail services. In the public consultation on the 2006 review, it is proposed that the concept be removed altogether by legislative amendment of the Universal Service Directive.	X
57	Repeal of Directive 87/372/EC on the frequency bands to be reserved for cellular digital band-based mobile communications	Repeal	Policy initiative linked to previous actions in radio spectrum policy. Directive 87/372 is reaching obsolescence. A new Commission Decision pursuant to Decision 676/2002/EC will regulate the use of the 900 MHz band in the EU.	X
58	Revision of Regulation (EC) No 2195/2002 on the Common Procurement Vocabulary (CPV)	Revision	The objective is to update and revision of the existing Commission Regulation (following targeted and wide stakeholder consultations). The update of the CPV Regulation is necessary to maintain an efficient and simple procurement system that is easily applied for both suppliers and bidders

59	Proposal for a directive on the solvency of insurance companies (Solvency II)	Recast	In line with similar developments in the banking sector and following international developments in solvency, risk management and accounting, the new solvency regime aims at the protection of policyholders and beneficiaries. It will improve the competitiveness of EU insurers and provide for a better allocation of capital resources, without causing significant market disruptions and impeding innovation in the insurance industry.	
60	Revision of Regulation (EC) No 258/97 on novel foods	Recast	Revision of the Novel Food Regulation is needed to clarify the legislation after removal of GM food from the scope, create a more favourable environment for innovation for the food industry and facilitate internal and external trade. This will: -Tighten and streamline the authorisation procedure for novel/new foods and thus make it more predictable for the applicants. -Tailor the safety assessment to different types of foods allowing foods with safe history of use outside the EU to enter the EU more easily than is presently the case. -Take into account new technologies with an impact on food (e.g. nanotechnology, animal cloning).	X
61	Revision of the existing legislation on feed labelling and authorisation/withdrawal procedure of feed materials (Directives 79/373/EEC, 96/25/EC, 82/471/EEC and 93/74/EEC)	Recast	Recast, modernisation and replacement of the directives to amend the existing feed labelling requirements, to extend the non-exclusive list of feed materials and to align the authorisation procedures with principles and provisions set out in the General Food Law.	

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiative to COM (2005) 535
62	Revision of existing Regulation on general food labelling and nutrition labelling	Revision and repeal	The key objective is to update the current rules on general food and nutrition labelling, taking into account the experience gained in applying Directives 2000/13/EC and 1990/496/CEC. There is a need to ensure that there is legislation that meets consumers' needs, is not too burdensome for the industry, and that can adapt to a continually changing market. This requires a new approach that strikes a balance between flexibility and prescription and between action at the national and EU level. The proposed Regulation will repeal the above mentioned Directives and will clarify and simplify the laws on general food and nutrition labelling.	
63	Revision of Directive 92/34/EEC on the marketing of fruit plant propagating material and fruit plants intended for fruit production	Recast	Amendments concern inter alia a new definition of marketing, as well as technical measures which will be adopted based on an appropriate evaluation and on technical and scientific progress. Two objectives can be identified: - To clarify and simplify the regulatory framework in which business operates; - To improve the legislation based on technical and scientific progress and to the new marketing environment in line with the new CAP.	X
64	Review of the Timeshare Directive (94/47/EC)	Revision	The objective is to enhance legal certainty for consumers. Level playing field for business as traders marketing and selling the new products in the market will have to comply with the same rules as "traditional timeshare". Update of the list of requirements for the prospectus and the contract will provide for modernisation. The scope is extended to bring under the Directive other long-term holiday products which have been developed since the adoption of the current directive.	X

	Title of action	Type of simplification action	Description of scope and objectives	Additional initiative to COM (2005) 535
65	Rules of Origin (based on the Community Customs Code)	Recast	The objective is to simplify the rules of origin by proposing new rules which will determine the position in negotiation on GSP as well as in the context of the new Economic Partnership Agreements with the ACP countries.	
66	Modernisation of VAT provisions relating to financial services including insurance	Revision	The current provisions are out of date and at the very least need to be modernised. The overall legal and regulatory environment in which the industry operates does not keep pace with the evolution of the industry and conflicts with the bias towards vertical integration. Companies are thus prevented from further refining their economic and legal structures to increase their competitiveness. Changes should be directed towards modernising the rules, ensuring their consistency with established policy objectives and reducing the need to seek clarification through litigation.	
67	Revision of Directive 92/12/EEC on general arrangements for products subject to excise duty and holding, movement and monitoring of such products	Recast	Simplification and modernisation of requirements and computerisation of the procedures by: - modernizing and simplifying the provisions of the directive wherever possible - integrating into the directive judgements of the ECJ as well as guidelines of the excise committee - adapting the directive to support the computerisation of procedures for the movement of excise products under suspension of excise duty (the EMCS project).

68	Revision of Regulation (EC) No 1334/2000 setting up a Community regime for the control of dual-use items and technology	Recast	The proposal provides for enlarging the scope of controls by extending them, under specific circumstances, to transit and brokering of dual use items. This enlargement of the scope of controls is compensated by the creation of a level playing field for exporters aiming at reducing the current distortions of competition between EU exporters which originate from MS different practices. A number of measures will simplify the work for: – Community administrations (for example improved system of sharing denials using a template provided by the Commission, a comitology procedure for changes to the annexes and for the adoption of guidelines for the implementation of the Recast Regulation); – private entities (harmonisation of the conditions of use of export authorisations and their format, e-systems for the management of licence applications, replacement of intra-Community transfer authorisations by pre-notification of transfers by EU suppliers of those dual use goods whose intra-EC trade is currently under control).	X
69	Recast of Directives 96/26/EC and 98/76/EC on the conditions of admission to the occupation of road haulage and road passenger transport operators	Recast	The objective is to ensure a harmonised application of the rules, a clear understanding of what is required, maintain mutual recognition of qualifications, protect the right of establishment, rationalise the market, improve service quality and road safety. The amendment of existing rules will strengthen, clarify and simplify the application of the three qualitative criteria of good repute, financial standing and professional competence, by which operators gain admission to the occupation.

70	Recast of conditions of access to road transport market (Regulations (EC) No 881/92, 684/92, 3118/93, 12/98 and 484/2002)	Recast	The objective is to ensure a harmonised application of the rules, a clear understanding of what is required, protect the right of establishment, rationalise the market, improve service quality and road safety. The amendment of existing rules to strengthen, clarify and simplify the access to the market, conditions for cabotage and the applicability of driver attestation to EU drivers.	
71	Revision of Regulation (EC) No 2299/89 on a code of conduct for computerised reservation systems	Revision	Regulation (EC) No 2299/89 was adopted in a market context where almost all airline bookings were made via computerised reservation systems (CRS) and where most CRS were owned and controlled by airlines. With the divestment of most airlines and the development of alternative distribution channels, the market context has changed and the regulation now seems to be standing in the way of an efficient functioning of the market. The main policy objective is to increase market efficiency by giving more room to market forces. Increased competition in the sector should allow to improve the quality of services offered and to reduce the distribution costs in the air transport sector.

74	Community initiative on work-related musculoskeletal disorders (follow-up of the second phase of consultation of the social partners)	Recast	The objective is to integrate the provisions of both Council Directive 90/269/EEC on the minimum health and safety requirements for the manual handling of loads and Council Directive 90/270/EEC on the minimum health and safety requirements for work with display screen equipment into a new legislative instrument. (depending on the result of the consultation of the social partners a proposal for a new Directive)	X
75	Proposal for a Council Regulation extending the provisions of EC Regulation n° 883/2004 and its implementing Regulation to nationals of third countries (who are not already covered by those provisions on the basis of their nationality)	Revision and repeal	EC Regulation 883/2004 modernises and simplifies the coordination of social security systems. Its predecessor, Regulation 1408/71, was extended to third country nationals through Regulation 859/03. The proposed Regulation will achieve the same aim and replace Regulation 859/03. This Regulation will result in fewer administrative costs for Member States.	X
76	Revision of Regulation of the European Parliament and of the Council completing the Annexes of EC Regulation n°883/2004	Revision	The objective of the proposal is to complete the Annexes of Regulation 883/2004. EC Regulation 883/2004 modernises and simplifies the coordination of social security systems. It is necessary for these Annexes to be completed for Regulation 883/2004 to apply.	X

83	Revision of 3 Directives on textiles	Revision	The objective is to replace these Directives by a Regulation and simplify procedures for Member States, companies and the Commission. It will provide for shorter period of time for adoption of new fibre names. Quantitative methods will be transferred to the standardisation process Commission autonomous act	X
84	Extension of the scope of Directive 2004/22/EC on measuring instruments and repeal 8 “old approach” metrology Directives (75/33/EEC, 76/765/EEC, 76/766/EEC, 71/317/EEC, 74/148/EEC, 86/217/EEC, 71/347/EEC, 71/349/EEC)	Repeal	The objective is to provide for a coherent legal framework for legal metrology. Commission autonomous act	X
85	Recast of 4 Directives on Pressure vessels and equipments	Recast	The objective is to recast these Directives into one legal instrument by implementing the revised regulatory approach to technical harmonisation.	
86	Legal instrument setting sector-specific adaptations to New Approach revision	Recast	This instrument is meant to adapt sectoral Directives to the horizontal instrument to be adopted in 2006 and would cover sectors not already specifically addressed in the simplification programme.	
87	Commission Directive relating to self testing and to virtual testing, with a view to simplify the type-approval procedure with respect to ten separate directives. The list of Directive is published as Annex I to the CARS 21 Final Report	Recast	The introduction of virtual / self testing will reduce costs and administrative burden of present producers. Virtual and self testing will speed up product development and reduce costs for both industry and consumers. The recast of Directive 70/156/EEC will empower the Commission to adopt the necessary modifications via comitology.	
88	Review of Regulation (EC) No 2037/2000 on substances that deplete the ozone layer	Recast	Simplification as part of an overall assessment of the effectiveness of the present framework in the light of new technical and scientific developments which might require new issues to be addressed or possibly strengthened..

95	Proposal for a Council Directive amending Directive 77/388/CEE as regards the VAT treatment of public authorities and the exemptions for certain activities in the public interest	Revision	The proposal aims at ensuring a more harmonised and neutral VAT system. Harmonisation is necessary as, due to certain options and vague definitions, the practical application of the provisions related to public authorities varies widely among Member States creating differences in the VAT treatment of public authorities between Member States. Neutrality has to be achieved as distortions of competition between the public and the private sector and several economic inefficiencies as well as tax avoidance schemes are the main disadvantages of the current rules.	
96	Council Directive 2003/49/EC on a common system of taxation applicable to interest and royalty payments made between associated companies of different Member States as amended	Codification	Consolidation of the legal text and adoption of simplified procedures relating to exemption from withholding tax.
