Subject:	Proposal for a Regulation of the European Parliament and of the Council amending Regulation (EU) 2017/1369 and Regulation (EU) 2020/740 as regards simplification and better use of digital options for energy and tyre labelling - Mandate for negotiations with the European Parliament

Delegations will find in the Annex the text of the mandate for negotiations with the European Parliament on the above-mentioned file as agreed by the Permanent Representatives Committee at its meeting on 6 November 2026.

Changes compared to the Commission proposal are marked in **bold** and deletions in ~~*strikethrough*~~.

ANNEX

2026/0169 (COD)

Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

amending Regulation (EU) 2017/1369 and Regulation (EU) 2020/740 as regards simplification and better use of digital options for energy and tyre labelling and repealing Regulation (EC) No 106/2008 and Regulation (EU) No 174/2013

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 and Article 194(2) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national Parliaments,

Having regard to the opinion of the European Economic and Social Committee[1],

Having regard to the opinion of the Committee of the Regions[2],

Acting in accordance with the ordinary legislative procedure,

Whereas:

[1] OJ C [...], [...], p. [...].
[2] OJ C [...], [...], p. [...].

(1) The political guidelines for the Commission's 2024-2029 term[3] point to the goal of simplifying legislation to eliminate any overlaps and contradictions, while maintaining original policy objectives. In its communication on a Strategy for a single market[4], the Commission acknowledges digitalisation of paper formats as a key lever for a smooth functioning single market. That digitalisation is partly implemented for the product information sheet, but not yet for the energy label.

(2) The Draghi report[5] points to insufficient market surveillance and poor enforcement as major shortcomings in the implementation of the EU ecodesign and energy labelling frameworks. This includes missing, fake or wrongly-placed labels, and wrong or inconsistent declarations of energy efficiency on labels and in the European Product Registry for Energy Labelling ('EPREL').

(3) In the context of the Commission's commitment to reduce administrative burdens and compliance costs, enhance interoperability, and stimulate competitiveness, it is opportune to amend certain provisions of Regulation (EU) 2017/1369 of the European Parliament and of the Council[6] setting a framework for energy labelling and Regulation (EU) 2020/740 of the European Parliament and of the Council[7] on the labelling of tyres.

(4) It is appropriate to take advantage of opportunities for simplification and digitalisation, which were not anticipated when Regulation (EU) 2017/1369 and Regulation (EU) 2020/740 were adopted. In particular, the further development and wider use of EPREL, established in accordance with Article 12 of Regulation (EU) 2017/1369, represent such opportunities that are not yet fully exploited. This database contains over two million model entries for energy-related products and tyres, and the introduction of QR codes on the

[4] ~~*COM (2025) 500.*~~

[5] ~~*Draghi, M. (2024), The future of European competitiveness.*~~

[6] Regulation (EU) 2017/1369 of the European Parliament and of the Council of 4 July 2017 setting a framework for energy labelling and repealing Directive 2010/30/EU (OJ L 198, 28.7.2017, pp. 1–23, ELI: http://data.europa.eu/eli/reg/2017/1369/oj).

[7] Regulation (EU) 2020/740 of the European Parliament and of the Council of 25 May 2020 on the labelling of tyres with respect to fuel efficiency and other parameters, amending Regulation (EU) 2017/1369 and repealing Regulation (EC) No 1222/2009 (OJ L 177, 5.6.2020, pp. 1–31, ELI: http://data.europa.eu/eli/reg/2020/740/oj).

respective labels unlocks access to comprehensive information on the products for dealers, distributors, customers and end users.

(5) Energy-related products are very diverse and range from electronics and white goods to large heating and cooling appliances. There is a need for more flexibility on when and how a label is to be delivered with each product, in view of the diversity in products and distribution channels. The requirement to have a printed **or digital** label ~~*for each unit*~~ should be adapted to ~~*the*~~ product specificities**, and product-specific delegated acts should provide further guidance in this regard.** ~~*that enable to identify the best combination of digital and printed label transmission.*~~ **It is important, for example, that special consideration is given to the provision of physical labels for products intended for household consumers sold in physical stores. Where a printed label is no longer required for each unit, other labelling-relevant information, such as an EPREL QR code, EPREL link, EPREL model registration number or a link to the Digital Product Passport, could be required.**

(5a) For products physically on display, including representations of a product used for marketing or promotional purposes, energy labels should be able to be displayed either physically or electronically, provided that consumers can easily associate the label with the specific model.

(6) Experience shows that the electronic format of the product information sheet has been accepted by the market, and it should be made ~~*fully*~~ digital **by default**. ~~*The right of dealers to request a printed copy of this product information sheet should therefore be removed*~~. In order to ensure that customers, installer**s**, dealers, professional repairers ~~*, recyclers*~~ and any other stakeholder and the public in general ~~*nevertheless*~~ have access to product information such as maintenance and repair instructions ~~*stored*~~ **linked** in EPREL, it is appropriate to specify that suppliers should include information in the documentation accompanying the product, the technical promotional material, in visual advertisements, and in distance selling, thereby allowing to retrieve the information registered in EPREL. **For certain products, it may be appropriate to provide the possibility for a printed copy of the product information sheet. To this end, the Commission should be empowered to specify in the relevant delegated act that a dealer should be able to request a printed copy of the product information sheet.**

(7) The reports under Article 19 of Regulation 2017/1369 and under Article 15 of Regulation (EU) 2020/740, and the results of compliance checks carried out by national market surveillance authorities and other market actors, point to ~~*persistent insufficient levels of market surveillance and resulting*~~ high levels of non-compliance, particularly for online sales. Some of them are rooted in unclear definitions and technical specifications that should be clarified. **Where market surveillance authorities find a non-compliant product, they should be able to use the harmonised functionalities in EPREL to reduce visibility of the product in the public part or to display a warning, without prejudice to applicable national rules. Market surveillance authorities should be able to use their discretion in deciding whether to require the supplier to reduce the visibility of a non-compliant product or to directly reduce the visibility of a non-compliant product, or to use both measures, in the course of their enforcement processes. The reduction of visibility** ~~*should be*~~ **can be reversed in EPREL as soon as the non-compliance ends or any litigation is resolved, in accordance with national legal procedures.**

(8) To avoid the need for economic operators of energy-related products to register multiple times the same model-related information, it is appropriate to ensure a technical link between EPREL and the ~~*centralised element of the future*~~ *digital* registry **referred to in Article 13 of** ~~*under*~~ Regulation (EU) 2024/1781[8]. **Where similar reporting information to that inputted in EPREL is also inputted by economic operators in other systems provided for under Union law, this information should not need to be entered a second time. To this end, and in line with the 'once-only' principle, the Commission should work to provide for links between such systems and EPREL, as appropriate.** ~~*A single system for electronic verification of the identity of suppliers for both databases also reduces the burden for suppliers*~~. The reuse of information registered in EPREL for national purposes, such as documenting eligibility with financial incentives for products in scope, should also be encouraged in line with the 'once-only' mandate set out in Regulation (EU) 2018/1724 establishing a single digital gateway[9]. **To this effect, it should be possible for**

---

8 Regulation (EU) 2024/1781 of the European Parliament and of the Council of 13 June 2024 establishing a framework for the setting of ecodesign requirements for sustainable products, amending Directive (EU) 2020/1828 and Regulation (EU) 2023/1542 and repealing Directive 2009/125/EC (OJ L, 2024/1781, 28.6.2024, ELI: http://data.europa.eu/eli/reg/2024/1781/oj).

9 Regulation (EU) 2018/1724 of the European Parliament and of the Council of 2 October 2018 establishing a single digital gateway to provide access to information, to procedures and to assistance and problem-solving services and amending Regulation (EU) No

national authorities in charge of implementing such incentives to be granted partial access to relevant documentation available in the compliance part of EPREL, subject to conditions to be specified in an implementing act.

(9) The supplier obligations laid down in Regulation (EU) 2017/1369 apply to EU manufacturers, importers and authorised representatives, all of which are required to comply with those obligations. It is appropriate to eliminate ambiguity about the scope of the mandates of Union-based authorised representatives registering energy-related products on behalf of manufacturers established outside the Union. To provide more clarity for market surveillance authorities about who can be requested to take corrective action if a product fails to comply with energy labelling rules, authorised representatives should therefore be required to include a copy of their mandate in the compliance part of EPREL. This is without prejudice to the obligations of authorised representatives in accordance with other Union legislation.

(10) Information referring to an offer of products placed on the market or made available on the market which are not compliant with this Regulation should be considered to be illegal content within the meaning of Regulation (EU) 2022/2065[10]. Regulation (EU) 2022/2065 also provides that online marketplaces are obliged to design and organise their online interface in a way that allows traders to provide, among others, information concerning the labelling and marking in compliance with rules of applicable Union law on product safety and product compliance. This information may include unambiguous product identifiers and the related machine-readable and freely accessible pre-contractual information available via the public interface of EPREL.

(11) Customers may be influenced by labelling information being shown at different stages of an online shopping process and before the actual purchasing decision is made. In online distance selling, the simplified label ~~*display*~~ **providing direct access to the** ~~*complete*~~ **label through a** ~~*with*~~ nested display ~~*mechanisms*~~ should therefore be visible not only on the main

1024/2012 (OJ L 295, 21.11.2018, pp. 1–38**, ELI: http://data.europa.eu/eli/reg/2018/1724/oj**)

[10] Regulation (EU) 2022/2065 of the European Parliament and of the Council of 19 October 2022 on a Single Market For Digital Services and amending Directive 2000/31/EC (Digital Services Act) (OJ L 277, 27.10.2022, pp. 1–102, ELI: http://data.europa.eu/eli/reg/2022/2065/oj).

product page, but also on other relevant pages such as those listing or comparing alternatives and on the shopping basket page shown before a purchase is completed.

(12) **Without prejudice to the discretion of national authorities, ~~I~~ i**t is appropriate to continuously monitor ~~*that sufficient*~~ **the** action**s** ~~is~~ taken by market surveillance authorities to address non-compliance and that the Commission regularly reports on efforts and progress made **in an aggregated form at EU level**. **Such reporting should draw on existing information shared with the Commission by market surveillance authorities, including through the Information and Communication System for Market Surveillance.**

(13) The existing provisions in Regulation (EU) 2017/1369 on greying out empty energy label~~s~~ classes on the label for lower classes in which models are no longer allowed to be placed on the market or put into service because of an ecodesign implementing measure have proved difficult to implement and should be removed.

(14) ~~*Intermediary actors such as installers or tyre fitters, as well as dealers not selling to customers or end users directly, should make sure that the energy labelling related information is handed down the supply chain.*~~ Intermediary actors **such as installers or tyre fitters** should comply with the obligations set for dealers under the energy labelling **framework** and **for distributors under the** tyre labelling frameworks when they, as part of their commercial activity, offer products or tyres for sale, hire or hire-purchase~~*, or display products to customers or tyres to end users*~~. **Installers and tyre fitters, when not offering products or tyres for sale, hire or hire-purchase,** ~~*or displaying products to customers or tyres to end users,*~~ **should not be subject to such obligations.**

(14a) Suppliers and intermediary actors, as well as dealers and distributors when not selling to customers or end users directly, such as in a situation where one dealer sells to another, should make sure that EPREL product registration information is handed down the distribution chain in invoices or delivery notes. This provision, which is necessary to ensure that the dealer selling to the consumer in all scenarios has the ability to retrieve the label from EPREL, is separate from obligations specified in delegated acts on how the label, and QR code or link to the registration in EPREL are to be provided, including for distance selling.

(15) To simplify the transition period in case of label rescaling, suppliers should no longer be required to provide both the non-rescaled and the rescaled labels with each unit placed on

the market during the 4-month transition period preceding the date as from which rescaled labels apply. During that period, suppliers should be required to provide only the non-rescaled or rescaled label, or should be allowed to supply both labels. After the rescaling date, suppliers should only provide the rescaled label with any units placed on the market.

(16) The current 14-working-day deadline for dealers to substitute non-rescaled labels by rescaled labels on products on display both in shops and online should be replaced by a **simpler framework under which dealers can implement the rescaling process with** more flexi**bility for** ~~*le,*~~ stock **management** ~~*driven process managed by dealers*~~ **and to address complex supply chain logistics**. ~~*In that context, dealers should simply ensure that the labels delivered with products to customers correspond to the label used for display.*~~ **Dealers should replace the label on display within four months after the rescaling date.** Dealers should be able to continue displaying and selling units that they received with only the non-rescaled label until 12 months after the rescaling date **in cases where dealers are unable to obtain rescaled labels because the supplier has ceased its activities and where suppliers have, in accordance with Article 13(5) of Commission Implementing Regulation (EU) 2024/994**[11], **declared in EPREL** that **the model will no longer be placed on the market after the rescaling date. For this purpose, the supplier shall inform dealers about the list of models that will not be placed on the market anymore at the latest by the rescaling date and, for models that continue to be sold after the rescaling date, provide the link to EPREL registrations for both non-rescaled and rescaled labels in EPREL. It is appropriate to allow delegated acts, in view of the specific characteristics of the concerned product group, to extend the 12 month period in duly justified cases, to avoid premature disposal or destruction of significant quantities of otherwise functional products.**

(17) Unlike Regulation (EU) 2017/1369, which relies on delegated acts to lay down product-specific technical requirements, Regulation (EU) 2020/740 incorporates all technical specifications directly in its annexes. However, the scope of the existing empowerment does not allow for the update of **boundaries between performance classes** ~~*important parameters*~~ of the tyre label in line with technological and market developments, as is the

---

11 **Commission implementing Regulation (EU) 2024/994 of 2 April 2024 laying down operational details of the product database established under Regulation (EU) 2017/1369 of the European Parliament and of the Council (OJ L 994 2.4.2024, p. 1) (ELI http://data.europa.eu/eli/reg_impl/2024/994/oj).**

case for energy labelling. **As a result of the progressive development of minimum requirements and test methods relevant for the tyre label defined by UNECE regulations and Regulation (EU) 2019/2144 of the European Parliament and of the Council[12], a concentration of tyres can now be observed in the upper classes, such as the upper four classes for fuel efficiency, upper three classes for wet grip, and upper two classes for external rolling noise. As such, updating the boundaries to align with changing technological and market developments is a condition for preserving the essential elements of the tyre label and ensuring sufficient differentiation between tyres, enabling customers to make informed choices, and promoting innovation and investments in more efficient and safer tyres. For these reasons, ~~T~~ t**he procedure for amending the tyre label should ~~*therefore*~~ be aligned with the rules for energy labelling, by empowering the Commission to amend **via delegated act** the tyre label and the technical annexes to align with ecodesign information requirements established under Regulation (EU) 2024/1781 **and with type-approval requirements established under Regulation (EU) 2019/2144**. **The revision of Regulation (EU) 2020/740 is without prejudice to the content of the future delegated act on tyres that could be adopted pursuant to Article 4 of Regulation (EU) 2024/1781. It is important that delegated acts include appropriate transitional periods, including for tyres already placed on the market**.

(18) There is a need to improve the effectiveness of the EU tyre label ~~*scheme*~~ and its enforcement to enable end-users to identify safe and fuel-efficient tyres that are compliant. Obligations for dealers should also be proportionate. Therefore, detailed specifications for simplified label display via nested display mechanisms for online sales, in promotional material and in tyre catalogues should be included and obligations for vehicle ~~*dealers*~~ **suppliers and vehicle distributors** should be removed.

---

12 **Regulation (EU) 2019/2144 of the European Parliament and of the Council of 27 November 2019 on type-approval requirements for motor vehicles and their trailers, and systems, components and separate technical units intended for such vehicles, as regards their general safety and the protection of vehicle occupants and vulnerable road users, amending Regulation (EU) 2018/858 of the European Parliament and of the Council and repealing Regulations (EC) No 78/2009, (EC) No 79/2009 and (EC) No 661/2009 of the European Parliament and of the Council and Commission Regulations (EC) No 631/2009, (EU) No 406/2010, (EU) No 672/2010, (EU) No 1003/2010, (EU) No 1005/2010, (EU) No 1008/2010, (EU) No 1009/2010, (EU) No 19/2011, (EU) No 109/2011, (EU) No 458/2011, (EU) No 65/2012, (EU) No 130/2012, (EU) No 347/2012, (EU) No 351/2012, (EU) No 1230/2012 and (EU) 2015/166 (OJ L 325, 16.12.2019, pp. 1–40, ELI: http://data.europa.eu/eli/reg/2019/2144/oj)**

(18a) Regulations (EU) 2017/1369 and (EU) 2020/740 should therefore be amended accordingly.

(18b) In order to allow economic operators time to make any changes necessary to allow them to comply with the requirements introduced by this Regulation, it is appropriate to provide that certain provisions should apply twelve months after the date of entry into force of the Regulation.

(19) The Agreement between the Government of the United States of America and the European Community on the coordination of energy-efficiency labelling programmes for office equipment the Energy Star Agreement expired in February 2018. Regulation (EC) No 106/2008 of the European Parliament and of the Council[13] and Regulation (EU) No 174/2013 of the European Parliament and of the Council[14], which implemented that agreement, should therefore be repealed.

HAVE ADOPTED THIS REGULATION:

[13] Regulation (EC) No 106/2008 of the European Parliament and of the Council of 15 January 2008 on a Community energy-efficiency labelling programme for office equipment (OJ L 39, 13.2.2008, p. 1, ELI: http://data.europa.eu/eli/reg/2008/106/oj).

[14] Regulation (EU) No 174/2013 of the European Parliament and of the Council of 5 February 2013 amending Regulation (EC) No 106/2008 on a Community energy-efficiency labelling programme for office equipment (OJ L 63, 6.3.2013, p. 1, ELI: http://data.europa.eu/eli/reg/2013/174/oj).

Article 1

Amendments to Regulation (EU) 2017/1369

Regulation (EU) 2017/1369 is amended as follows:

(1) ~~*in*~~ Article 2 **is amended as follows** ~~*the following points are added*~~:

(a)point (11) is replaced by the following:

'(11) authorised representative' means authorised representative as defined in point (12) of Article 3 of Regulation 2019/1020 of the European Parliament and of the Council[15];'

(b~~a~~) ~~*Definition*~~ **point (19) is replaced by the following:**

'(19) label' means a graphic diagram, either in printed or electronic form, including a closed scale using only letters from A to G, each letter representing a class and each class corresponding to energy savings, in seven different colours from dark green to red, in order to inform customers about energy efficiency and energy consumption; it includes rescaled labels and labels with fewer classes and colours in accordance with Article 11(11);'

(c~~b~~) ~~*Definition*~~ **point (22) is replaced by the following:**

'(22) product information sheet' means a standard document in electronic form, or printed form where provided for in a delegated act, containing information relating to a product model;'

(d~~c~~) ~~*Definition*~~ **point (25) 'product database' is deleted and throughout the text of the Regulation, including in the titles, the words 'product database' shall be replaced by the word 'EPREL' and any necessary grammatical changes shall be made.**

---

[15] Regulation (EU) 2019/1020 of the European Parliament and of the Council of 20 June 2019 on market surveillance and compliance of products and amending Directive 2004/42/EC and Regulations (EC) No 765/2008 and (EU) No 305/2011 (OJ L 169, 25.6.2019, pp. 1–44, ELI: http://data.europa.eu/eli/reg/2019/1020/oj)

(c~~d~~) The following ~~*definitions*~~ points are added:

‘(27) ‘European product registry for energy labelling’ or ‘EPREL’ means the product database established and maintained by the Commission in accordance with Article 12;

(28) ‘EPREL model registration number’ means the unique registration number of a model in ~~*the product database*~~ **EPREL** established under Article 12;

(29) 'installer' means a natural or legal person responsible for the correct and safe installation, setting up, or fitting of energy-related products on the Union market;

(30) ‘rescaling date’ is the date specified in the relevant delegated act **from** ~~*at*~~ which each unit of a model placed on the market by the supplier is to be accompanied only by the rescaled label;

(31) ‘nested display’ means a visual interface where an image or data set is accessed by a mouse click, mouse roll-over**,** or tactile screen expansion of another image or data set**, or by other means specified in the relevant delegated act**;

(32) ‘invitation to purchase’ means invitation to purchase as defined in article 2 point (i), of Directive 2005/29/EC[16] of the European Parliament and of the Council.’

(33) ‘simplified label ~~*format*~~**’ means an energy class arrow or set of class arrows, including the applicable range of classes as specified in the relevant delegated act.**

---

16 ~~*Directive 2005/29/EC of the European Parliament and of the Council of 11 May 2005 concerning unfair business-to-consumer commercial practices in the internal market and amending Council Directive 84/450/EEC, Directives 97/7/EC, 98/27/EC and 2002/65/EC of the European Parliament and of Directive 2005/29/EC of the European Parliament and of the Council of 11 May 2005 concerning unfair business-to-consumer commercial practices in the internal market and amending Council Directive 84/450/EEC, Directives 97/7/EC, 98/27/EC and 2002/65/EC of the Europe*~~ **Directive 2005/29/EC of the European Parliament and of the Council of 11 May 2005 concerning unfair business-to-consumer commercial practices in the internal market and amending Council Directive 84/450/EEC, Directives 97/7/EC, 98/27/EC and 2002/65/EC of the European Parliament and of the Council and Regulation (EC) No 2006/2004 of the European Parliament and of the Council (Unfair Commercial Practices Directive)** (OJ L149, 11.6.05, p14 ELI: http://data.europa.eu/eli/dir/2005/29/2022-05-28).

~~*(1a) Article 2 is amended as follows:*~~

~~*(19) 'label' means a graphic diagram, either in printed or electronic form, including a closed scale using only letters from A to G, each letter representing a class and each class corresponding to energy savings, in seven different colours from dark green to red, in order to inform customers about energy efficiency and energy consumption; it includes rescaled labels and labels with fewer classes and colours;*~~

~~*(22) 'product information sheet' means a standard document containing information relating to a product in electronic form;*~~

(2) Article 3 is amended as follows:

(a) paragraph 1 is replaced by the following:

'1. The supplier shall ensure that products that are placed on the market are provided **free of charge** ~~*with*~~, for each individual unit**, or each batch of two or more identical units**~~*,*~~ **if provided for in the relevant delegated act**, ~~*free of charge*~~, **with** accurate labels **and other labelling-relevant information** in accordance with this Regulation and as specified in the relevant delegated act~~*s*~~**.** ~~*In view of the characteristics of the product, delegated acts shall specify how the label and other labelling-relevant information, such as the QR code, is to appear on the product, on its packaging or in the documents accompanying the product.*~~

The supplier shall enter the parameters of the product information sheet into ~~*the product database*~~ **EPREL** in accordance with Article 4 and the relevant delegated act**, unless such information is available to the authorities via a valid Digital Product Passport registered in the** ~~*Digital Product Passport*~~ **registry referred to in Article 13 of Regulation (EU) 2024/1781 and linked to the model's registration in EPREL.** A link to that information shall be provided by the supplier along with the label';

(b) paragraph 2 is replaced by the following:

‘2. Upon a dealer’s request, suppliers shall send printed labels, ~~*including rescaled labels in accordance with Article 11(13),*~~ free of charge, promptly and in any event within five working days from receiving that request.~~’;~~

Where provided for in the relevant delegated act, upon a dealer’s request, suppliers shall send printed product information sheets, free of charge, promptly and in any event within five working days from receiving that request.’;

(c) paragraph 3 is replaced by the following:

‘ 3. The supplier shall ensure the accuracy of the labels that it provides and the parameters of the product information sheet that it enters into EPREL or a Digital Product Passport and shall produce technical documentation sufficient to enable the accuracy to be assessed.’;

(3) Article 4 is amended as follows:

(a) ~~*the following*~~ paragraph ~~*(*~~3~~*a)*~~ is ~~*inserted*~~ **replaced by the following**:

‘(3~~*a*~~). The supplier shall indicate the EPREL model registration number, or provide the link or ~~*insert*~~ the QR code **leading** to the **registration of that** model ~~*’s web page*~~ in EPREL**, in invoices or in delivery notes** ~~*on free access websites of suppliers, and, if specified in the relevant delegated acts*~~, ~~in the documents~~ accompanying the product~~, *in visual advertisements and technical promotional material as well as in online distance selling*~~. **The EPREL model registration number, link or QR code shall be accompanied by the term “EPREL”.** ~~*This indication shall take the form of “EPREL: ‘model registration number’” or “EPREL: ‘link’” or “EPREL: ‘QR code’”.*~~

(b) the following paragraph (3**a**~~*b*~~) is inserted:

'(3**a**~~*b*~~). The authorised representative of a manufacturer not established in the Union shall upload in **the compliance part of** EPREL a signed copy of the mandate received from the manufacturer in an official language of the Member State where the authorised representative is established, **unless such information is available to the authorities via a valid Digital Product Passport registered in the** ~~*Digital Product Passport*~~ **registry referred to in Article 13 of Regulation (EU) 2024/1781 and linked to the model's registration in EPREL**. The mandate shall, as a minimum, include contact details of both the manufacturer and the authorised representative and shall confer on the authorised representative the ability to follow up on requests of market surveillance authorities. It shall specify the content and limits of the authorised representative's tasks, as well as information on the brands or trademarks, models and the geographical scope and duration covered by that mandate.

The authorised representative shall upload, without delay, an updated version of the mandate in case of ~~*A*~~ **a**ny changes in the tasks performed by the authorised representative on behalf of the manufacturer **or**~~*,*~~ any change in the scope or duration of the mandate**.** ~~*or a*~~ **The authorised representative shall register, without delay,** ~~*A*~~ **a**ny change in ~~*the*~~ **its** name and contact details ~~*of the authorised representative shall be registered by the authorised representative*~~ in **the compliance part of** EPREL ~~*without delay*~~.';

(4) Article 5 is amended as follows:

~~*(a) the title is replaced by the following:*~~

~~*'Obligations of dealers and installers';*~~

(**a**~~*b*~~) paragraph 1 is replaced by the following:

‘1. Dealers shall:

(a) ‘display, for products physically on display, the label in a visible manner in proximity to the product in such a way that the label is unequivocally and easily identified with the specific model**. The label may be displayed electronically, provided it is continuously visible without additional manipulation by the customer, and that any additional specifications laid down in the relevant delegated act, are respected**;

(b) display, for products on display via online distance selling, the label in proximity to**, and clearly associated with**~~,~~ the price and on the product detail page, search result pages and the shopping basket page. Dealers may display the label in the simplified label format **that provides direct access to the** ~~*complete*~~ **label through a** ~~*with*~~ nested display ~~*consisting of an energy class arrow including the applicable range and directly giving access to the complete label*~~, as specified in the relevant delegated act**. Dealers shall display, where there is an image carousel on the product detail page, the label as one of the product images**;

(c) display, for products on display via distance selling, except online distance selling, the label in proximity to, and clearly associated with the price. Dealers may display the label in the simplified label format, as specified in the relevant delegated act;

(**d**~~*c*~~) in invitations to purchase, and in contractual offers, include the relevant label as material (pre-)contractual information that enables the customer to make informed purchases;

(**e**~~*d*~~) in any dealer to dealer transaction, provide the EPREL registration number or the link or QR code leading to the registration of that model in EPREL **in invoices or delivery notes**;

(**f**~~*e*~~) make available to customers the product information sheet as specified in the relevant delegated act.’;

(**b**~~c~~) paragraph 2 is replaced by the following:

'2. Installers**,** ~~*who, as part of their activity*~~ **only when they** offer for sale, hire or hire-purchase a product **as part of their activity,** shall **be considered dealers and shall** comply with the obligations ~~*under letters (cd) and (df) of paragraph 1 of this Article, and if applicable, the other obligations of dealers referred to in paragraph 1 of this Article.*~~ **where applicable to their specific activity**';

(**c**~~d~~) paragraph 3 is deleted;

(**4a**) **Article 6 is amended as follows:**

(a) **Point (a) is replaced by the following:**

'(a) make reference to the energy efficiency class of the product and the range of the efficiency classes available on the label, in visual advertisements and technical promotional material for a specific model, and in distance selling, in accordance with the relevant delegated act;

(aa) indicate the EPREL model registration number, or provide the link or the QR code leading to the registration of that model in EPREL, in printed visual advertisements and technical promotional material for a specific model, and in distance selling. The indication of the EPREL model registration number, link or QR code shall be accompanied by the term "EPREL". The EPREL model registration number or link or QR code leading to the registration may, in addition, be provided on suppliers' or dealers' free access websites where a specific registered model is listed or presented;';

(b) **Point (d) is replaced by the following:**

'(d) for products not covered by delegated acts, not supply or display labels which mimic the labels and EPREL links provided for under this Regulation and the relevant delegated acts;';

(c) **Point (e) is replaced by the following:**

'(e) for non-energy related products, not supply or display labels and EPREL links which mimic the labels provided for in this Regulation or in the relevant delegated acts.'.

(5) In Article 9(2), the following subparagraph is added **after the first subparagraph**:

'**Where deemed appropriate,** ~~*M*~~**m**arket surveillance authorities may ~~*reduce the visibility to the public of the product in EPREL and display appropriate warnings until the non-compliance ceases, using the harmonised functionalities provided for this purpose in EPREL.';~~ **also require the supplier to use the harmonised functionalities provided for in EPREL to:**

- **display appropriate warnings visible to all users on the EPREL public** ~~*page*~~ **part,** ~~*as well as in the compliance part, and/*~~ **or**

- **exclude the** ~~*product*~~ **model from normal visualisation in the EPREL public** ~~*page*~~ **part** ~~*and from search results,*~~ **and insert an appropriate** ~~*"Blocked"*~~ **warning** ~~*in the compliance part*~~**.';**

(5a) In Article 9(5), the following subparagraph is added:

'The market surveillance authorities may use the harmonised functionalities provided for in EPREL to:

- **display appropriate warnings visible to all users on the EPREL public part or**
- **exclude the model from normal visualisation in EPREL public part and insert an appropriate warning.';**

(5b) In Article 9, a new paragraph (10) is added:

'(10) Communication and transfer of information between market surveillance authorities and the Commission referred to in paragraphs (6), (7) and (8) of this Article, and in paragraphs (1) and (2) of Article 10, shall take place via the existing tools in place for this purpose in the Information and communication system referred to in Article 34 of Regulation (EU) 2019/1020.'

(6) The following Article (**10**~~*9*~~a) is inserted:

'*Article **10**~~9~~a*

Reporting by the Commission

1. The Commission shall, every four years, draw up a report ~~*by 30 June*~~ based on the information entered by market surveillance authorities into the information and communication system referred to in Article 34 of Regulation (EU) 2019/1020.

That report may be combined and published simultaneously with the report required under Article 67 of Regulation (EU) 2024/1781 and shall include:

(a) information **aggregated at EU level** on the nature and number of checks performed by market surveillance authorities during the four preceding calendar years pursuant to Article 34(4) and (5) of Regulation (EU) 2019/1020;

(b) **to the extent available,** information **aggregated at EU level** on the level and nature of **product-related** non-compliance identified and, on the nature and severity of penalties imposed in the four preceding calendar years in relation to products covered by delegated acts adopted pursuant to Article **16** ~~*4*~~ of this Regulation;

~~*(c) a comparison of the information referred to in points (a) and (b) of this paragraph with the activities planned in the context of the section on the market surveillance activities drawn up pursuant to Article 8(3);*~~

~~*(d) indicative benchmarks for market surveillance authorities in relation to the frequency of checks and the nature and severity of penalties imposed;*~~

(e) a list of **indicative** priorities for market surveillance authorities in terms of products and requirements.'

2. The Commission shall publish the report referred to in paragraph 1 of this Article in the information and communication system referred to in Article 34 of Regulation (EU) 2019/1020 and shall make it publicly available. The first of those reports shall be published by 19 July 2032.';

(7) Article 11 is amended as follows:

(a) paragraph (10) is deleted;

(b) paragraph (13) is replaced by the following:

‘13. Where, pursuant to paragraph 1 or 3, a label is rescaled:

(a) the suppliers shall, when placing a product on the market during the period beginning four months before the rescaling date, provide either the non-rescaled label **or the rescaled label** and the **link to the** related product information sheet ~~*or the rescaled label and the link to the related product information sheet*~~, or may provide both. As of the rescaling date, suppliers shall provide only the rescaled label and the **link to the** related product information sheet with products placed on the market;

(b) The supplier shall, prior to the rescaling date, communicate to dealers when a label for a model, already placed on the market, has been rescaled and provide the link to EPREL registration for both non-rescaled and rescaled labels. The supplier shall, prior to the rescaling date, provide dealers with the list of models that will not be placed on the market after the rescaling date;

(**c**~~b~~) the dealer shall display ~~*or advertise*~~ the label**,** at the point of sale **and in distance selling,** that corresponds to the label that is provided with the unit that is offered or sold to a customer. When both the non-rescaled and rescaled label are provided by the supplier, the dealer **may choose which label to display during the four month period prior to the rescaling date and** shall only use the rescaled label as of the rescaling date;

(**d**~~c~~) the dealer shall **replace existing non-rescaled labels on products on display, both in shops and online, with rescaled labels within four months after the rescaling date** ~~*be permitted to sell units of models placed on the market before the rescaling date and accompanied only with the non-rescaled label until 12 months after the rescaling date.’*~~;

(e) the dealer shall be permitted, for 12 months from the rescaling date, to sell units of product models already in stock with non-rescaled labels. This applies for models for which the supplier has declared in EPREL that no units are placed on the market after the rescaling date or for which dealers are unable to obtain rescaled labels because the supplier has ceased its activities. By way of derogation from this point, delegated acts pursuant to Article 16 may provide for longer periods in justified cases.

(8) Article 12 is amended as follows:

(a) paragraph (4) is replaced by the following:

"(4) The compliance part of EPREL shall be accessible only to market surveillance authorities and to the Commission and shall contain the information set out in point 3 of Annex I, including the specific parts of the technical documentation as referred to in paragraph 5 of this Article. The national authorities responsible for incentives referred to in Article 7(2) may be granted partial access to the technical documentation referred to in paragraph 5 of this Article, under conditions to be specified in an implementing act adopted pursuant paragraph 12 of this Article. The compliance part shall meet the criteria in paragraphs 7 and 8 of this Article, and the functional criteria set out in point 4 of Annex I.

(**b**~~a~~) in paragraph (5), the second subparagraph is replaced by the following:

'In addition, the supplier may upload, on a voluntary basis, additional parts of the technical documentation, including test reports and other documents related to ecodesign or energy labelling requirements or conformity assessment for the models registered in EPREL. Where a supplier has chosen to upload such documents **in EPREL**, or where such documentation is available to the authorities via a **valid** Digital Product Passport **registered in the registry referred to in Article 13 of Regulation (EU) 2024/1781 and** linked to the model's registration in EPREL, the information ~~included in EPREL~~ shall **not need to** be ~~*accepted*~~ **resubmitted** for the purposes of Article 7(2).';

(c~~b~~) the following paragraph is added:

'(13.) Where provided for by Union law, the Commission shall ensure ~~*the integration*~~ **alignment** between EPREL and ~~*the central part of*~~ the registry ~~*to be established under*~~ **referred to in** Article 13 of Regulation (EU) 2024/1781.';

(9) Article 16 paragraph (3) is amended as follows:

(a) point (e) ~~*is replaced by the following:*~~ **is deleted;**

~~*'(e) in view of the characteristics of the product, the manner in which labels and QR codes appear on the product or on its packaging, or are to be included in the user manual or other documentation provided with the product;';*~~

(b) point (g) is replaced by the following:

'(g) **in view of the characteristics of the product, how the label and the QR code appear on the product or on its packaging and** the manner in which the label and the product information sheet, the detailed information in the product information sheet, or the link to the ~~*product*~~ **model** registration in EPREL, are to be provided **and displayed**, including in the case of distance selling;';

~~*(c) the following point (r) is added:*~~

~~*'(r) where applicable, if and how installers have to display or provide the label.'.*~~

(10) In Annex I, point 1, point (c) is deleted.

Article 2

Amendments to Regulation (EU) 2020/740

Regulation (EU) 2020/740 is amended as follows:

(1) ~~*in*~~ Article 3 **is amended as follows** ~~*, the following points are added*~~:

(a) ~~*Definition*~~ **Point (10) on 'product database' is deleted and throughout the text of the Regulation, including in the titles, the words 'product database' shall be replaced by the word 'EPREL' and any necessary grammatical changes shall be made.**

(b) ~~*Definition*~~ **Point (8) is replaced by the following:**

'(8) 'product information sheet' means a standard document in electronic form, or printed form where provided for in a delegated act, containing the information set out in Annex III;'

(c) Point (14) is replaced by the following:

'(14) authorised representative' means authorised representative as defined in point (12) of Article 3 of Regulation 2019/1020;'

(de) The following ~~*definitions*~~ **points are added:**

'(25) 'European product registry for energy labelling' or 'EPREL' means the product database established and maintained by the Commission in accordance with Article 12 of Regulation (EU) 2017/1369;

(26) 'tyre fitter' means a natural or legal person who is responsible for the correct and safe fitting and setting up of tyres on vehicles;

(27) 'nested display' means a visual interface where an image or data set is accessed by a mouse click, mouse roll-over or tactile screen expansion of another image or data set**, or by other means specified in the relevant delegated act**;

(28) 'EPREL tyre type registration number' means the unique registration number of the tyre type in EPREL established under Article 12 of Regulation (EU) 2017/1369.';

(29) 'simplified label' means an energy class arrow or set of class arrows, including the applicable range of classes, as set out in Annex IV.

(2) Article 4~~(1)~~ **is amended as follows:**

(a) paragraph (1) is replaced by the following:

'(1) Suppliers shall ensure that C1 tyres, C2 tyres and C3 tyres that are placed on the market are accompanied free of charge for each individual tyre, or for each batch of two or more identical tyres, by a tyre label, in the form of a sticker, that complies with the requirements set out in Annex II, indicating the information and class for each of the parameters set out in Annex I;

~~*point (b) is replaced by the following:*~~

~~*'(b) for each batch of two or more identical tyres, by a tyre label that complies with the requirements set out in Annex II, indicating the information and class for each of the parameters set out in Annex I,';*~~

(b) paragraphs 2, 3 and 4 are deleted.

(3) in Article 5, paragraph 1 is replaced by the following:

‘1. Suppliers shall enter the information set out in Annex III and in Annex VII into EPREL before placing **a tyre** on the market ~~*a tyre produced after that date*~~. A link to that information shall be provided along with the label.’;

(3a) In Article 5, new paragraph 1a is added:

‘1a. The authorised representative of a manufacturer not established in the Union shall upload in the compliance part of EPREL a signed copy of the mandate received from the manufacturer in an oficial language of the Member State where the authorised representative is established, unless such information is available in a valid Digital Product Passport registered in the registry referred to in Article 13 of Regulation (EU) 2024/1781 and linked to the model’s registration in EPREL. The mandate shall, as a minimum, include contact details of both the manufacturer and the authorised representative and shall confer on the authorised representative the ability to follow up on requests of market surveillance authorities. It shall specify the content and limits of the authorised representative’s tasks, as well as information on the brands or trademarks, tyre types and the geographical scope and duration covered by that mandate.

The authorised represantive shall upload, without delay an updated version of the mandate in case of any changes in the tasks performed by the authorised representative on behalf of the manufacturer, or any change in the scope or duration of the mandate. The authorised representative shall register, without delay, any change in its name and contact details in the compliance part of EPREL.’;

(3b) Paragraphs 2, 3 and 4 are deleted.

(4) Article 6 is amended as follows:

~~*(a) the title is replaced by the following:*~~

~~*‘Obligations of tyre distributors and tyre fitters’;*~~

(**a**~~*b*~~) ~~*in*~~ **P**~~*p*~~aragraph 1 ~~*, points (a) and (b) are*~~ **is** replaced by the following:

'~~(a)~~ **1. Distributors shall ensure that** at the point of sale, **each** tyre~~s~~ **or a batch of two or more identical tyres,** bear a tyre label, in the form of a sticker, that complies with the requirements set out in Annex II, provided by the supplier in accordance with ~~*point (a) of*~~ Article 4(1) in a clearly visible position and legible in its entirety~~*; or*~~ **and** ~~*(b)*~~ before the sale ~~*of a tyre that is part of a batch of two or more identical tyres, a tyre label that complies with the requirements set out in Annex II,*~~ **it** is shown to the end-user ~~*and is clearly displayed close to the tyre at the point of sale*~~.';

~~*(c) paragraph 2 is replaced by the following:*~~

~~*'2. Distributors shall ensure that the EPREL tyre registration number or the link or QR code leading to the tyre registration in EPREL is included in all tyre offers, visual advertisements and on invoices. If a price is indicated, the tyre label, or the tyre classes as set out in Annex IV, shall be displayed close to the price indication. For online sales, distributors may make the tyre label available display the tyre label in the simplified label format that provides direct access to the complete label through in a nested display as set out in Annex IV located close to the price indication.';*~~

(**b**~~*d*~~) paragraph**s 2, 3,** 4, 5**,** ~~*and*~~ 6 **and 7** are deleted;

(**c**~~*e*~~) the following paragraph is added:

~~*'4. In catalogues or technical promotional material, where displaying the full label is not possible or advisable, the rolling resistance, the wet grip and the noise classes may be shown by the means of a simplified label format with a nested display consisting of class arrows including the applicable ranges as set out in Annex IV and directly giving access to the complete label.';*~~

'1a. Tyre fitters, only when they offer for sale, hire or hire-purchase a ~~*product*~~ **tyre as part of their activity, shall be considered distributors and shall comply with the obligations of this Article, where applicable to their specific activity';**

(4a) A new Article 6a is inserted:

Information to be provided in visual advertisements, product catalogues, technical promotional material and distance selling, including distance selling on the internet, and on invoices and delivery notes

1. **Suppliers and distributors shall ensure that, in visual advertisements, product catalogues, technical promotional material and distance selling, including distance selling on the internet, the tyre label set out in Annex II is displayed and, where a price indication is provided, is displayed close to the price indication. The size of the tyre label shall be such that it is clearly visible and legible.**

2. **Where the tyre label cannot be displayed due to space or format constraints, the tyre classes may be shown in accordance with Annex IV by the means of a simplified label and, in the case of online material, with a nested display providing direct access to the tyre label and to the product information sheet as set out in Annex IV.**

3. **In printed visual advertisements, printed product catalogues, printed technical promotional material and paper-based distance selling when the simplified label format is included, the EPREL tyre type registration number or the link or QR code leading to the tyre registration in EPREL shall also be included, accompanied by the term "EPREL".**

4. **Where the tyre is classified for use in severe snow conditions in accordance with Annex I, Part D, or for ice grip in accordance with Annex I, part E, the relevant symbol may also be displayed with the simplified label.**

5. **Suppliers and distributors when not selling to end users directly, shall ensure that on invoices and delivery notes, the EPREL tyre registration number, or a link or QR code leading to the tyre registration in EPREL, shall be provided, accompanied by the term "EPREL".**

6. **Suppliers and distributors shall ensure that their websites include the information set out in paragraphs 3 and 4 of Annex IV.**

(5) Article 7 is deleted.

(5a) Article 10 is replaced by the following:

‘For each of the parameters set out in Annex I, market surveillance authorities shall apply the verification procedure set out in Annex VI when verifying the conformity of the declared classes and performance parameter values with this Regulation.’;

(5b) In Article 12, the following paragraph (1a) is added:

‘Where deemed appropriate, market surveillance authorities may also require the supplier to use the harmonised functionalities provided for in EPREL to:

- **display appropriate warnings visible to all users on the EPREL public part, or**
- **exclude the model from normal visualisation in EPREL public part and insert an appropriate warning .’;**

The market surveillance authorities may use the harmonised functionalities provided for in EPREL to:

- **display appropriate warnings visible to all users on the EPREL public part , or**
- **exclude the model from normal visualisation in EPREL public part and insert an appropriate warning .’;**

(6) Article 13 is amended as follows:

Paragraph 1, point (b), is replaced by the following:

‘(b) Annexes I, II, III, IV, V, VI and VII, by adapting the values, calculation methods and requirements set out therein ~~*to technological or market developments or,*~~ **either to adapt** to ecodesign information requirements set out in delegated acts adopted pursuant to Regulation (EU) 2024/1781**, or, as a consequence of technological, regulatory or market developments, the number of populated classes is less than five, over 30 percent of tyre types registered in EPREL fall within class A, or over 50 percent of tyre types registered in EPREL fall within classes A and B, provided that all of the following conditions are met:**

(a) a thorough impact assessment has been carried out;

(b) a proper consultation of the relevant stakeholders has been conducted;

(c) changes to parts A, B or C of Annex I concern the calibration of performance class boundaries and take into account the interrelationship between the different tyre parameters.';

(6a) Annex II, point 2.2, is amended as follows:

(a) point (c) is replaced by the following:

'c) Typefaces: Verdana, Calibri or Noto Sans';

(b) in point (e), the words 'Verdana' and 'Calibri' are deleted in all indents;

(7) Annex III is replaced by the text **set out** in Annex I to this Regulation;

(8) Annex IV **is** amended in accordance with Annex II to this Regulation;

(9) Annex VII is amended in accordance with Annex III to this Regulation.

Article 3

Repeal of Regulation (EC) No 106/2008 and Regulation (EU) No 174/2013

Regulation (EC) No 106/2008 and Regulation (EU) No 174/2013 are repealed.

Article 4

Entry into force and application

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply as of the date of the entry into force.

However, Article 1(3), points (a) and (b), Article 1(4), point (a), in so far as it concerns Article 5(1), points (b) and (e) of Regulation (EU) 2017/1369, Article 1(4a) point (a), in so far as it concerns Article 6, point (aa) of Regulation (EU) 2017/1369, Article 2(2) point (b), Article 2(3a), Article 2(4) point (b), and Article 2(4a), (7), (8) and (9) shall apply from [twelve months after the date of entry into force of this Regulation].

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Done at Brussels,

For the European Parliament	*For the Council*
The President	*The President*
~~*Roberta Metsola*~~	~~*António Costa*~~

ANNEX I

‘ANNEX III

PUBLIC INFORMATION TO BE ENTERED INTO ~~*THE PRODUCT DATABASE*~~ EPREL BY THE SUPPLIER

Pursuant to point 1 of Article 5, the supplier shall enter into the ~~*product database*~~ **EPREL** the information as set out in Tables III A-D below, that becomes the product information sheet. ~~Promotional material or other commercial documents provided with the tyre shall include the EPREL registration number or the link or QR code leading to the tyre type registration in EPREL.~~

Product Information Sheet

ANNEX II

Annex IV to Regulation (EU) 2020/740 is amended as follows:

(1) the title is replaced by the following:

‘INFORMATION TO BE PROVIDED IN VISUAL ADVERTISEMENTS, IN PRODUCT CATALOGUES, IN TECHNICAL PROMOTIONAL MATERIAL AND IN DISTANCE SELLING, INCLUDING DISTANCE SELLING ON THE INTERNET”

(2) points 1 and 2 are replaced by the following:

‘**1. Printed material**

~~(~~I.~~)~~ For the purposes of ensuring conformity with the requirements laid down in Article~~s~~ **6a** ~~*4(3), 4(4) and 6(2) and 6(4)*~~, in visual advertisements, in product catalogues and in technical promotional material, and in the case of paper-based distance selling and telemarketing-based distance selling, the ~~*rolling resistance*~~ **fuel efficiency** class and the range of classes available on the label, the wet grip class and the range of classes available on the label and the external rolling noise class and value shall be displayed as indicated in Figure 1, and in accordance with the following additional specifications:

(a) ‘class arrows’ shall be used, containing the letter, indicating the fuel efficiency, wet grip and noise, centred in the rectangular part of the arrow;

(b) the class arrows shall have a border, and the internal background colour shall match the colour of respectively fuel efficiency, wet grip and noise class in the ~~full~~ label;

(c) the typeface of the ‘class letter’ shall be Noto Sans, bold, 100 % white, with an outline in 100 % black and in a size equivalent to that of the price, if the price is shown;

(d) the typeface of the range of available energy-efficiency classes shall be in Noto Sans 100 % black on a white background.

 **(a) class arrow, with range of fuel efficiency classes**	 **(b) class arrow, with range of wet grip classes**	 **(c) class arrow, with range of external rolling noise classes**

Figure 1: class arrows example, with range of energy-efficiency classes

~~(~~II.~~)~~ By way of derogation from point I, if the visual advertisement, technical promotional material or paper-based distance selling is printed in monochrome, points I.(b) and I.(c) are replaced by the following:

(b) the class arrow shall have a border, and the internal background shall be uncoloured, matching the colour of the background support;

(c) the typeface of the 'class letter' shall be Noto Sans bold, 100 % black, and in a size equivalent to that of the price, if the price is displayed.

2. Online material

~~(~~III.~~)~~ For the purposes of ensuring conformity with the requirements laid down in Article~~s~~ **6a** ~~*4(3), 4(4) and 6(2) and 6(4)*~~, in visual advertisements, in product catalogues and in technical promotional material, in distance selling and telemarketing on the internet, both for products and for packages, the ~~*rolling resistance*~~ **fuel efficiency** class and the range of classes available on the label, the wet grip class and the range of classes available on the label and the external rolling noise class and value shall be displayed as indicated in Figure 1, in accordance with the following additional specifications:

(a) the class-arrow images shall be each the nested display of the label set out in Annex III and as available from the **EPREL** ~~*product database*~~;

(b) the label shall be displayed by pop up, new tab, new page or inset screen display and must appear on the first mouse click or mouse-over on the class arrow image;

(c) for magnification of the label on tactile screens, the device conventions for tactile magnification shall apply;

(d) the label shall cease to be displayed by means of a close option or other standard closing mechanism;

(e) the alternative text for the class arrow image, appearing with a mouse-over, shall be respectively “fuel-efficiency class is”, “wet grip class is”, “external rolling noise class is”, followed by the class letter and the text “(range A-x)”, where “x” is the worst permitted class**;**~~.~~

(f) a text indicating ‘Product Information Sheet’, in proximity to the class arrow, shall give direct access to the product-information sheet, as available from ~~*the product database*~~ **EPREL**, or to the model page in ~~*the product database*~~ **EPREL**.’.

ANNEX III

Annex VII to Regulation (EU) 2020/740 is amended as follows:

(1) the title is replaced by the following:

'INFORMATION TO BE ENTERED IN THE COMPLIANCE PART OF ~~THE *PRODUCT DATABASE*~~ **EPREL** BY THE SUPPLIER';

(2) point 1 is deleted~~;.~~

(3) point 2 is replaced by the following:

' ~~2.~~ **Suppliers shall enter the following** ~~*I*~~ **i**nformation ~~*to be entered*~~ into the compliance part of ~~*the product database*~~ **EPREL**:

(a) the tyre type identifier of equivalent tyre types placed on the market;

(b) the parameters of the product information sheet set in Annex III table III A that are part of compliance assessment;

(c) copy of the type approval document relevant for the specific tyre type family;

(d) copy of test reports for any parameter in the label if the class corresponds to a coefficient of rolling resistance, to an index of wet grip or to a noise emission value more favourable than the one corresponding to the worst case as resulting from the type-approval documentation in point (c). The test reports can be those corresponding to the type approval or any other of equivalent level of accuracy that justifies the declared values;

(e) alternatively to point (d), when the declared value does not correspond to a test result, the supplier shall provide detailed description of how the value used to determine the class was determined. Any simulation or extrapolation procedure must ensure that the declared values are identical -or worse- to those obtained in a physical test of the relevant tyre dimension;

(f) specific precautions, if any, that shall be taken when the tyre type is maintained, mounted or tested.'.
