Item 01 02 01 01 — European Research Council

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
2 156 005 580	1 986 861 960	2 082 787 540	1 962 455 947	2 196 005 580	2 006 861 960	2 156 005 580	1 986 861 960	2 156 005 580	1 986 861 960

Remarks:

This appropriation is intended to provide attractive and flexible funding to enable talented and creative individual researchers, with an emphasis on early stage researchers, and their teams to pursue the most promising avenues at the frontier of science, regardless of their nationality and country of origin and on the basis of Union-wide competition based solely on the criterion of excellence.

The activities of the ERC shall support frontier research, in a bottom-up manner, carried out across all fields by principal investigators and their teams in competition at the European level, including early-stage career researchers.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

EFTA-EEA	59 290 153 6 6 0 0
Candidate countries and western Balkans potential candidate countries	10 040 502 6 0 1 0
Other countries	761 452 817 6 0 1 0

In accordance with Article 15(3) of the Financial Regulation, an amount of EUR 20 000 000 in commitment appropriations, corresponding to the additional top-up of EUR 100 million in 2018 prices agreed in the context of the MFF revision, is available for this budget item further to decommitments made in 2019 as a result of total or partial non-implementation of research projects.

Item 01 02 01 02 — Marie Skłodowska-Curie Actions

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments

Remarks:

This appropriation is intended to cover the following activities and actions:

Under Horizon Europe, the Marie Skłodowska-Curie Actions (MSCA) continue to support the career development and training of researchers through trans-national, cross-sectoral and interdisciplinary mobility. This will be achieved, inter alia, through the development of excellent and innovative doctoral training programmes, postdoctoral fellowships and collaborative projects, which promote high-quality training, employment and mentoring standards for researchers at all stages of their careers, and cooperation between academic and non-academic organisations in Europe and beyond.

The MSCA will contribute to the Commission's political priorities and missions, with specific focus on the European Green Deal, the Digital Agenda and Making Europe Stronger in the World.

The Commission will inform stakeholders and interested parties worldwide about the MSCA and facilitate their participation in Horizon Europe. The Commission will also continue to inform the public about the positive impact of MSCA-funded research projects on their daily lives and to motivate pupils and students to consider a career in science and research. In addition, it will support the MSCA alumni as well as a network of national contact points dedicated to the MSCA.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

Remarks:

This appropriation is intended to cover activities to improve and protect the health and well-being of citizens at all ages. It will generate new knowledge, develop innovative solutions, and ensure where relevant the integration of a gender perspective to:

- prevent, diagnose, monitor, treat and cure diseases,
- develop health technologies,
- mitigate health risks,
- protect populations,
- promote good health and well-being, also in the work place,
- make public health systems more cost effective, equitable and sustainable,
- prevent and tackle poverty-related diseases, and supporting and enabling patients' participation and self-management.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

EFTA-EEA	16 272 077 6 6 0 0
Candidate countries and western Balkans potential candidate countries	2 982 040 6 0 1 0
Other countries	259 300 777 6 0 1 0

In accordance with Article 15(3) of the Financial Regulation, an amount of EUR 3 334 771 in commitment appropriations, corresponding to the additional top-up of EUR 100 million in 2018 prices agreed in the context of the MFF revision, is available for this budget item further to decommitments made in 2019 as a result of total or partial non-implementation of research projects.

Remarks:

This appropriation is intended to strengthen democratic values, including the rule of law and fundamental rights, safeguarding our cultural heritage, exploring the potential of cultural and creative sectors, and promote socio-economic transformations that contribute to inclusion and growth, including migration management and integration of migrants.

This appropriation is also intended to cover an increase required for a better integration of gender perspective.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

EFTA-EEA	8 341 516 6 6 0 0
Candidate countries and western Balkans potential candidate countries	1 379 761 6 0 1 0

In accordance with Article 15(3) of the Financial Regulation, an amount of EUR 14 577 532 in commitment appropriations, corresponding to the original MFF agreement, is available for this budget item further to decommitments made in 2023 as a result of total or partial non-implementation of research projects. It is supplemented by an amount of EUR 1 103 071 in commitment appropriations, corresponding to the additional top-up of EUR 100 million in 2018 prices agreed in the context of the MFF revision, further to decommitments made in 2019 as a result of total or partial non-implementation of research projects.

Item 01 02 02 30 — Cluster ‘Civil Security for Society’

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
217 787 942	179 482 388	210 391 854	177 017 025	219 787 942	180 482 388	217 787 942	179 482 388	217 787 942	179 482 388

Remarks:

This appropriation is intended to respond to the challenges arising from persistent security threats, including cybercrime, as well as natural and man-made disasters. Research and innovation activities under this cluster will have an exclusive focus on civil applications. Coordination with Union-funded defence research will be sought in order to strengthen synergies, recognizing that there are areas of dual-use technology. Due attention will be given to the human understanding and perception of security. Security research responds to the commitment of the Rome Agenda to work towards ‘a safe and secure Europe’, contributing to a genuine and effective Security Union.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

EFTA-EEA	5 989 168 6 6 0 0
Candidate countries and western Balkans potential candidate countries	1 597 046 6 0 1 0
Other countries	32 646 076 6 0 1 0

In accordance with Article 15(3) of the Financial Regulation, an amount of EUR 772 117 in commitment appropriations, corresponding to the additional top-up of EUR 100 million in 2018 prices agreed in the context of the MFF revision, is available for this budget item further to decommitments made in 2019 as a result of total or partial non-implementation of research projects.

Item 01 02 02 40 — Cluster ‘Digital, Industry and Space’

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments

Remarks:

The Chips Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster ‘Digital, Industry and Space’ with the aim of supporting:

- large-scale capacity building throughout investment into cross-border and openly accessible research, development and innovation infrastructure set up in the Union to enable the development of cutting-edge and next-generation semiconductor technologies that will reinforce the Union’s advanced design, systems integration, and chips production capabilities, including emphasis on start-ups and scale-ups;
- key digital technologies that encompass electronic components, their design, manufacture and integration in systems and the software that defines how they work. The overarching objective of this partnership is to support the digital transformation of all economic and societal sectors, make the transformation work for Europe and support the European Green Deal.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

EFTA-EEA

12 708 856 6 6 0 0

In accordance with Article 15(3) of the Financial Regulation, an amount of EUR 19 939 311 in commitment appropriations, corresponding to the original MFF agreement, is available for this budget item further to decommitments made in 2023 as a result of total or partial non-implementation of research projects

Legal basis:

Council Regulation (EU) 2021/2085 of 19 November 2021 establishing the Joint Undertakings under Horizon Europe and repealing Regulations (EC) No 219/2007, (EU) No 557/2014, (EU) No 558/2014, (EU) No 559/2014, (EU) No 560/2014, (EU) No 561/2014 and (EU) No 642/2014 (OJ L 427, 30.11.2021, p. 17).

Regulation (EU) 2023/1781 of the European Parliament and of the Council of 13 September 2023 establishing a framework of measures for strengthening Europe’s semiconductor ecosystem and amending Regulation (EU) 2021/694 (Chips Act) (OJ L 229, 18.9.2023, p. 1).

Council Regulation (EU) 2023/1782 of 25 July 2023 amending Regulation (EU) 2021/2085 establishing the Joint Undertakings under Horizon Europe, as regards the Chips Joint Undertaking (OJ L 229, 18.9.2023, p. 55).

Remarks:

This appropriation is intended to build a knowledge base and deliver solutions to: protect the environment; restore, sustainably manage natural and biological resources from land, inland waters and sea to stop biodiversity erosion; address food and nutrition security for all, support the transition to a low-carbon, resource-efficient and circular economy; and develop a sustainable bioeconomy.

These activities will help to maintain and enhance biodiversity and secure the long-term provision of ecosystem services, such as climate change adaptation and mitigation and carbon sequestration (both on land and sea). They will help reduce greenhouse gas and other emissions, waste and pollution from primary production (both terrestrial and aquatic), the use of hazardous substances, processing, consumption and other human activities. Activities will also foster participatory approaches to research and innovation, including the multi-actor approach and develop knowledge, and innovation systems at local, regional, national and European levels.

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue).

Remarks:

The European Innovation Council (EIC) is intended to focus mainly on breakthrough and disruptive innovation, targeting especially market-creating innovation, while also supporting all types of innovation, including incremental.

The EIC shall:

- identify, develop and deploy high risk innovations of all kinds including incremental, with a strong focus on breakthrough, disruptive and deep-tech innovations that have the potential to become market-creating innovations, and
- support the rapid scale-up of innovative companies mainly SMEs, including start-ups and in exceptional cases small mid-caps at Union and international levels along the pathway from ideas to market.

Where relevant, the EIC shall contribute to the activities supported under other parts of Horizon Europe, in particular in Pillar II.

Remarks:

EASA is the Union's agency for aviation safety. Its mission is to ensure the highest common level of safety protection for Union citizens, ensure the highest common level of environmental protection, establish a single regulatory and certification process among Member States, facilitate the internal aviation market and create a level playing field, and work with other international aviation organisations and regulators.

The main activities of EASA include the collection and analysis of safety intelligence and performance data to derive strategic action plans, the certification of aviation products and the approval of organisations in all

aviation domains (design, production, maintenance, training, air traffic management, etc.), the preparation of regulatory material setting up common standards for aviation in Europe and the monitoring and inspections of the effective implementation of such standards in the Member States and the Union's neighbouring States that have signed aviation agreements with the Union.

The tasks performed by EASA cover the whole spectrum of the Union's aviation safety rules and have an important international component as EASA is legally mandated to cooperate with international actors in order to achieve the highest safety level for EU citizens globally (e.g. EU safety list, authorisation of third country operators, and implementation of technical assistance programming towards third countries). Established in 2002, EASA is composed of more than 800 aviation experts and administrators and it has 31 Member States (27 EU Member States + Switzerland, Iceland, Norway and Liechtenstein). It has four international offices in Montreal, Washington, Beijing and Singapore. Typically, its budget consists mainly of fees and charges (64%), a subsidy from the Union (23%), earmarked funds (11%) and third country contributions (2%).

Commission Regulation (EU) No 1321/2014 of 26 November 2014 on the continuing airworthiness of aircraft and aeronautical products, parts and appliances, and on the approval of organisations and personnel involved in these tasks (OJ L 362 17.12.2014, p. 1).

Commission Regulation (EU) 2015/340 of 20 February 2015 laying down technical requirements and administrative procedures relating to air traffic controllers' licences and certificates pursuant to Regulation (EC) No 216/2008 of the European Parliament and of the Council, amending Commission Implementing Regulation (EU) No 923/2012 and repealing Commission Regulation (EU) No 805/2011 (OJ L 63, 6.3.2015, p. 1).

Commission Implementing Regulation (EU) 2017/373 of 1 March 2017 laying down common requirements for providers of air traffic management/air navigation services and other air traffic management network functions and their oversight, repealing Regulation (EC) No 482/2008, Implementing Regulations (EU) No 1034/2011, (EU) No 1035/2011 and (EU) 2016/1377 and amending Regulation (EU) No 677/2011 (OJ L 62, 8.3.2017, p. 1).

Commission Implementing Regulation (EU) 2018/1048 of 18 July 2018 laying down airspace usage requirements and operating procedures concerning performance-based navigation (OJ L 189, 26.7.2018, p. 3).

Commission Implementing Regulation (EU) 2019/317 of 11 February 2019 laying down a performance and charging scheme in the single European sky and repealing Implementing Regulations (EU) No 390/2013 and (EU) No 391/2013 (OJ L 56, 25.2.2019, p. 1).

Commission Delegated Regulation (EU) 2019/945 of 12 March 2019 on unmanned aircraft systems and on third-country operators of unmanned aircraft systems (OJ L 152, 11.6.2019, p. 1).

Commission Implementing Regulation (EU) 2019/947 of 24 May 2019 on the rules and procedures for the operation of unmanned aircraft (OJ L 152, 11.6.2019, p. 45).

Commission Implementing Regulation (EU) 2019/2153 of 16 December 2019 on the fees and charges levied by the European Union Aviation Safety Agency, and repealing Regulation (EU) No 319/2014 (OJ L 327, 17.12.2019, p. 36).

Commission Implementing Regulation (EU) 2020/469 of 14 February 2020 amending Regulation (EU) No 923/2012, Regulation (EU) No 139/2014 and Regulation (EU) 2017/373 as regards requirements for air traffic management/air navigation services, design of airspace structures and data quality, runway safety and repealing Regulation (EC) No 73/2010 (OJ L 104, 3.4.2020, p. 1–243).

Remarks:

EMSA is the Union agency for maritime safety. It sits at the heart of the Union’s maritime safety network and fully recognises the importance of effective collaboration with many different interests and, in particular, between Union and international institutions, Member States’ administrations and the maritime industry.

EMSA’s activities include: providing technical and scientific assistance to the Member States and the Commission in the proper development and implementation of Union legislation on maritime safety, security, prevention of pollution by ships and maritime transport administrative simplification; monitoring the implementation of Union legislation through visits and inspections; improving cooperation with and between Member States; building capacity of national competent authorities; providing operational assistance, including developing, managing and maintaining integrated maritime services related to ships, ship monitoring and enforcement; carrying out operational preparedness, detection and response tasks with respect to pollution caused by ships and marine pollution by oil and gas installations; and, at the request of the Commission, providing technical and operational assistance to third countries.

Remarks:

ERA contributes to the further development and effective functioning of a single European railway area without frontiers, by guaranteeing a high level of railway safety and interoperability, while improving the competitive position of the railway sector. In particular, the ERA contributes, on technical matters, to the implementation of Union legislation by developing a common approach to safety on the Union rail system and by enhancing the level of interoperability on the Union rail system. Further objectives of the ERA are to follow the reduction of national railway rules in order to support the performance of national authorities acting in the fields of railway safety and interoperability, to promote the optimisation of procedures, to monitor national safety authorities and conformity assessment bodies and to manage and keep up-to-date a number of registers, which is vital for the smooth operation of the European railway area.

The entry into force of the technical pillar of the Fourth Railway Package designated ERA as the Union authority responsible for issuing authorisations for placing railway vehicles on the market, single safety certificates for railway undertakings and track-side approvals of the European Rail Traffic Management System.

Remarks:

ENISA was set up to enhance the capability of the Union, the Member States and, as a consequence, the business community to prevent, address and respond to network and information security problems. In order to achieve this goal, ENISA will be developing a high level of expertise and stimulating broad cooperation between actors from the public and private sectors.

ENISA's aim is to provide assistance and to deliver advice to the Commission and the Member States on issues related to network and information security falling within its competencies and to assist the Commission, where called upon, in the technical preparatory work for updating and developing Union legislation in the field of network and information security.

Remarks:

The Body of European Regulators for Electronic Communications (BEREC) acts as a specialised and independent expert advisory body assisting the Commission and the national regulatory authorities in the implementation of the Union regulatory framework for electronic communications in order to promote a consistent regulatory approach across the Union. BEREC is neither a Union body nor does it have legal personality.

The Agency for Support for BEREC (BEREC Office) is established as a Union body with legal personality, providing BEREC with professional and administrative support in carrying out the tasks conferred on it by Regulation (EU) 2018/1971.

Total Union contribution	8 125 577

Remarks:

ACER is an independent body and neutral arbiter on regulatory matters that can take binding decisions required for the integration of the European Internal Energy Market, both for electricity and natural gas, and thereby supports the European Green Deal and the construction of a more resilient Europe. ACER is entrusted with supervising wholesale electricity and gas markets in order to prevent, detect and investigate market manipulations.

In close cooperation with national energy regulatory authorities, ACER ensures that market integration and the implementation of Union legislation is achieved according to the Union's energy policy objectives and regulatory framework.

Remarks:

According to Article 96 of Regulation (EC) No 1907/2006, the revenues of the European Chemicals Agency (ECHA) shall consist of a subsidy from the Union, entered in the general budget of the Union (Commission Section), the fees paid by undertakings, and any voluntary contribution from the Member States.

The ECHA's revenue from fees and charges and the surplus carried over from the previous year will not be sufficient to cover the expected expenditure of the ECHA. A balancing Union contribution is required.

Total Union contribution	76 316 097
<i>of which amount coming from the recovery of surplus (revenue Article 6 6 2)</i>	1 393 523
Amount entered in the budget	74 922 574

Assigned revenue (origin, estimated amounts and corresponding article or item of the statement of revenue):

Remarks:

Having regard to the TFEU, and in particular Article 114 thereof, as well as to Regulation (EU) No 1093/2010, the European Banking Authority (EBA) forms part of a European System of Financial Supervision (ESFS). The main objective of the ESFS is to ensure that the rules applicable to the financial sector are adequately implemented to preserve financial stability and to ensure confidence in the financial system as a whole and sufficient protection for the customers of financial services.

Total Union contribution	21 303 298
<i>of which amount coming from the recovery of surplus (revenue Article 6 6 2)</i>	424 468
Amount entered in the budget	20 878 830

In addition to the Union contribution, revenues of the EBA also include contributions from the national public authorities of Member States competent for the supervision of financial institutions and contributions from EFTA national public authorities, as well as potential fees.

Legal basis:

Regulation (EU) No 1093/2010 of the European Parliament and of the Council of 24 November 2010 establishing a European Supervisory Authority (European Banking Authority), amending Decision No 716/2009/EC and repealing Commission Decision 2009/78/EC (OJ L 331, 15.12.2010, p. 12).

Regulation (EU) 2022/2554 of the European Parliament and of the Council of 14 December 2022 on digital operational resilience for the financial sector and amending Regulations (EC) No 1060/2009, (EU) No 648/2012, (EU) No 600/2014, (EU) No 909/2014 and (EU) 2016/1011 (OJ L 333, 27.12.2022, p. 1).

Regulation (EU) 2023/1114 of the European Parliament and of the Council of 31 May 2023 on markets in crypto-assets, and amending Regulations (EU) No 1093/2010 and (EU) No 1095/2010 and Directives 2013/36/EU and (EU) 2019/1937 (OJ L 150, 9.6.2023, p. 40).

Remarks:

Article 3 of Regulation (EC) No 851/2004 provides that the mission of the European Centre for Disease Prevention and Control is the following:

- In order to enhance the capacity of the Union and the Member States to protect human health through the prevention and control of communicable diseases in humans and related special health issues, the mission of the Centre is to identify and assess current and emerging threats to human health from communicable diseases and related special health issues, to report thereon and, where appropriate, to ensure that information thereon is presented in an easily accessible way. The Centre acts in collaboration with competent bodies of the Member States or on its own initiative, through a dedicated network. The mission of the Centre is also to provide science-based recommendations and support in coordinating the response at Union and national levels, as well as at cross-border interregional and regional level, to such threats, where appropriate. In providing such recommendations, the Centre, where necessary, cooperates with Member States and takes into account existing national crisis management plans and the respective circumstances of each Member State.
- In the event of other outbreaks of diseases of unknown origin that may spread within or to the Union, the Centre acts on its own initiative until the source of the outbreak is known. In the case of an outbreak that is clearly not of a communicable disease, the Centre acts only in cooperation with the coordinating competent bodies and upon their request, and provides a risk assessment.
- In pursuing its mission, the Centre respects the responsibilities of the Member States, the Commission and other Union bodies or agencies, and the responsibilities of third countries and international organisations active within the field of public health, in particular the WHO, in order to ensure that there is comprehensiveness, coherence and complementarity of action and that actions are coordinated.
- The Centre supports the work of the Health Security Committee (HSC), established by Article 4 of Regulation (EU) 2022/2371 of the European Parliament and of the Council of 23 November 2022 on serious cross-border threats to health and repealing Decision No 1082/2013/EU (OJ L 314, 6.12.2022, p. 26), the Council, the Member States and, where relevant, other Union structures, in order to promote effective coherence between their respective activities and to coordinate responses to serious cross-border threats to health, within its mandate.

Remarks:

European Food Safety Authority (EFSA) is the cornerstone of the Union system of risk assessment for food and feed safety. Its scientific advice on existing and emerging risks underpins the policies and decisions of risk managers in the Union institutions and Member States with the objective of protecting consumer health. The Authority's most critical commitment is to provide objective, transparent and independent advice and clear communication grounded in the most up-to-date scientific methodologies, information and data available. The Authority is committed to the core standards of scientific excellence, openness, transparency, independence and responsiveness.

The establishment plan of the Authority, as the outgoing Chair of the Network of Agencies, includes one post to create a position for the Head of the Shared Support Office in Brussels. This is with the aim of promoting efficiency gains and synergies across agencies and with the institutions, so that individual agencies can focus their resources on core tasks. The financing of the post for the Head of the Shared Support Office will be shared between the agencies, which means that no additional funding for the Authority is required in this respect.

Remarks:

In order to promote the protection of human and animal health and of consumers of medicinal products throughout the Union, and in order to promote the completion of the internal market through the adoption of uniform regulatory decisions based on scientific criteria concerning the placing on the market and the use of medicinal products, the objective of the European Medicines Agency (EMA) is to provide the Member States and the institutions of the Union with the best possible scientific advice on any question relating to the evaluation of the quality, the safety, and the efficacy of medicinal products for human and veterinary use, in accordance with the provisions of the Union legislation relating to medicinal products.

Regulation (EU) 2022/123 strengthened the role of the EMA in crisis preparedness and the management of medicinal products and medical devices, allowing the EMA to closely monitor and mitigate shortages of medicines and facilitate the faster approval of medicines that could treat or prevent a disease causing a public health crisis. After an initial transition period, the EMA will also coordinate responses of the Member States on shortages of critical medical devices in the event of a crisis.

Remarks:

This appropriation is intended to cover the field of education and training of the Erasmus+ programme under indirect management. It shall support the three key actions.

Key action 1: Learning mobility

In the field of education and training, the Erasmus+ programme is to support the following actions: (a) the learning mobility of higher education students and staff; (b) the learning mobility of vocational education and training learners and staff; (c) the learning mobility of school pupils and staff; and (d) the learning mobility of adult education learners and staff.

Learning mobility may be accompanied by virtual learning and measures, such as language support, preparatory visits, training and virtual cooperation. Learning mobility may be replaced by virtual learning for those persons who are unable to participate in learning mobility.

Key action 2: Cooperation among organisations and institutions

In the field of education and training, the Erasmus+ programme is to support partnerships for cooperation and exchanges of practices, including small-scale partnerships to foster wider and more inclusive access to the programme.

Key action 3: Support to policy development and cooperation

In the field of education and training, the Erasmus+ programme is to support the following actions: (a) the preparation and implementation of the Union general and sectoral policy agendas in education and training, including with the support of the Eurydice network or activities of other relevant organisations; (b) Union tools and measures that foster the quality, transparency and recognition of competences, skills and qualifications; (c) policy dialogue and cooperation with relevant stakeholders, including Union-wide networks, European organisations and international organisations in the field of education and training; (d) measures that contribute to the high-quality and inclusive implementation of the Erasmus+ programme; (e) cooperation with other Union instruments and support to other Union policies; and (f) dissemination and awareness-raising activities about European policy outcomes and priorities and about the Erasmus+ programme.

Remarks:

The European Foundation for the improvement of living and working conditions (Eurofound) delivers and disseminates important knowledge on work-related and social matters to contribute to sound and evidence-based policies in those fields. Its core activity relates to research in the areas of employment, working conditions, industrial relations and quality of life. The activities of Eurofound contribute to the following priorities: increasing labour market participation and combating unemployment by creating jobs, improving labour market functioning and promoting integration and gender equality, improving working conditions and making work sustainable throughout the life course, developing industrial relations to ensure equitable and productive solutions in a changing policy context, and improving standards of living and promoting social cohesion in the face of economic disparities and social inequalities such as the gender employment gap and the gender pay gap.

Part of this appropriation is intended for studies on working conditions and industrial relations in support of policies ensuring more and better jobs, making work more sustainable and strengthening social dialogue in Europe.

Another part of this appropriation is intended for studies and forward-looking research on labour markets, specifically the monitoring and anticipation of structural change, its impact on employment and the management of the consequences.

This appropriation will also cover research and gathering of knowledge on living conditions and quality of life with a particular focus on social policies and the role of public services in improving quality of life. Research into reconciliation of professional and private life and precarious employment, including breaking down by gender, is also covered by this appropriation.

Finally, this appropriation will be used for the analysis of the impact of digitalisation on all of the above-described areas and for studies contributing to policies aimed at upward convergence in the Union.

Remarks:

The European Agency for Safety and Health at Work (EU-OSHA) is committed to making Europe a safer, healthier and more productive place to work. EU-OSHA identifies and assesses new and emerging risks at work, and mainstreams occupational safety and health into other policy areas, such as education, public health and research. EU-OSHA raises awareness and disseminates information on the importance of workers' health and safety to governments, employers' and employees' organisations, Union institutions, bodies and networks, and private companies.

EU-OSHA's objective is to provide the Union institutions and bodies, Member States and interested parties with technical, scientific and economic information and qualified expertise in the area of health and safety at work. Special attention will be paid to gender aspects in the area of health and safety at work.

This appropriation is intended to cover the measures necessary to accomplish EU-OSHA's tasks as defined in Regulation (EU) 2019/126, and in particular:

- awareness-building and risk anticipation measures, with special emphasis on small and medium-sized enterprises,
- operation of the European Risk Observatory based on examples of good practice collected from firms or specific branches of activity,
- preparation and provision of relevant tools for smaller enterprises to manage health and safety at work,
- operation of the network comprising the main component elements of the national information networks, including the national employers' and employees' organisations, in accordance with national law or practice, as well as the national focal points,
- organising exchanges of experience, information and good practices, including in collaboration with the International Labour Organization and other international organisations,
- integrating candidate countries into these information networks and devising working tools which are geared to their specific situation,
- organising and running the European Campaign on Healthy Workplaces as well as the European Week on Health and Safety, focusing on specific risks and needs of users and final beneficiaries.

Remarks:

The European Institute for Gender Equality (EIGE) contributes to and strengthens the promotion of gender equality, including gender mainstreaming in all Union policies and the resulting national policies, and the fight against discrimination based on sex, and to raise Union citizens' awareness of gender equality by providing technical assistance to the Union institutions, in particular the Commission, and the authorities of the Member States.

EIGE carries out, *inter alia*, the following tasks:

- collect, analyse and disseminate relevant objective, comparable and reliable information as regards gender equality, including results from research and best practices,
- develop methods to improve the objectivity, comparability and reliability of data at European level by establishing criteria that will improve the consistency of information and take into account gender issues when collecting data,
- develop, analyse, evaluate and disseminate methodological tools in order to support the integration of gender equality into all Union policies and the resulting national policies and to support gender mainstreaming in all Union institutions and bodies,
- organise meetings of experts to support the institute's research work, encourage the exchange of information among researchers and promote the inclusion of a gender perspective in their research,
- raise Union citizens' awareness of gender equality, disseminate information regarding best practices and make documentation resources accessible to the public,
- provide information to the Union's institutions on gender equality and gender mainstreaming in the accession and candidate countries.

Remarks:

The European Public Prosecutor’s Office (EPPO) is responsible for investigating, prosecuting and bringing to judgment the perpetrators of, and accomplices to, criminal offences affecting the financial interests of the Union which are provided for in Directive (EU) 2017/1371 of the European Parliament and of the Council of 5 July 2017 on the fight against fraud to the Union’s financial interests by means of criminal law (OJ L 198, 28.7.2017, p. 29) and determined by Regulation (EU) 2017/1939. In that respect, the EPPO undertakes investigations, carries out acts of prosecution and exercises the functions of prosecutor in the competent courts of the Member States, until the case has been finally disposed of.

This appropriation is intended to cover the EPPO’s recruitment and staff-related expenditure, buildings (including building security), infrastructure and administrative information technology-related expenditures (Titles 1 and 2). It includes operational expenditure related to the costs related to the EPPO’s investigations in accordance with Article 91(5) and (6) of Regulation (EU) 2017/1939, the EPPO case management system, the IT exchange platform between the EPPO Central Office, the European Delegated Prosecutors and other judicial and law enforcement authorities in the Member States, which is a key element for the good functioning of the EPPO, and provisions for close protection services for senior EPPO staff, payment of the European Delegated Prosecutors and substantial translation costs for the operational needs of the EPPO (Title 3).

Remarks:

The objective of the European Labour Authority (ELA) is to contribute to ensuring fair labour mobility across the Union and assist Member States and the Commission in the coordination of social security systems within the Union. To this end, ELA is to facilitate access to information on rights and obligations regarding labour mobility across the Union as well as to relevant services; facilitate and enhance cooperation between Member States in the enforcement of relevant Union law across the Union, including facilitating concerted and joint inspections; mediate and facilitate a solution in cases of cross-border disputes between Member States; and support cooperation between Member States in tackling undeclared work.

This appropriation is intended to cover the measures necessary to accomplish ELA’s tasks, in particular:

- facilitate access to information and coordinate the European network of employment services (EURES),
- facilitate cooperation and the exchange of information between Member States with a view to the consistent, efficient and effective application and enforcement of relevant Union law,
- coordinate and support concerted and joint inspections,

- carry out analyses and risk assessments on issues of cross-border labour mobility,
- support Member States with capacity-building regarding the effective application and enforcement of relevant Union law,
- support Member States in tackling undeclared work,
- mediate in disputes between Member States on the application of relevant Union law.

Remarks:

This appropriation is intended to cover expenditure to promote European social dialogue in Member States and candidate countries, as well as the cost of preliminary consultation meetings with trade union representatives.

Regarding the promotion of European social dialogue, strong and representative social partners are needed in order to improve the process of enhancing the functioning of social dialogue and to enhance competitiveness, resilience and fairness in the social market economy. Measures should help employees' and employers' organisations to address the overarching challenges facing European employment and social policy, as laid down in particular in the Action Plan to implement the European Pillar of Social Rights, the Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions 'Strengthening social dialogue in the European Union: harnessing its full potential for managing fair transitions (COM(2023) 40 final)' and the Council Recommendation of 12 June 2023 on strengthening social dialogue in the European Union (C/2023/1389) and the Tripartite Declaration for a thriving European Social Dialogue, signed at the Val Duchesse Social Partners Summit and to support the digital and green transitions.

Regarding actions on preliminary consultation meetings between European trade union representatives, the appropriation is intended to cover costs with a view to helping European trade union representatives form their opinions and harmonise their positions regarding the development of Union policies. Costs are intended to cover in particular studies, workshops, conferences, analyses, evaluations, publications, technical assistance, the purchase and maintenance of databases and software and the part-financing and support of measures relating to economic monitoring, analysis of the combination of measures and coordination of economic policies.

This appropriation is intended to cover expenditure related to the promotion of European social dialogue and related measures, in the Member States and the candidate countries, in particular for the following activities:

- studies, consultations, meetings of experts, negotiations, publications and other actions directly linked to the achievement of the objectives of the budget heading, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts,
- actions undertaken by social partners to promote social dialogue (including capacity building of social partners in Member States and candidate countries) at cross-industry, sector and company levels, including actions undertaken to promote equal participation of women and men in the decision-making bodies of both trade unions and employers' organisations,
- actions to improve knowledge and expertise on industrial relations across the Union and to exchange and disseminate relevant information,
- actions to improve the degree and quality of involvement of employees' and employers' representatives in Union policy- and law-making,
- actions on preliminary consultation meetings between European trade union representatives, notably to cover costs with a view to help them form their opinions and harmonise their positions regarding the development of Union policies.

The appropriation is also intended to cover costs related to the promotion of information, consultation and participation of representatives of enterprises, in the Member States and the candidate countries, in particular for the following activities:

- measures aimed at developing employee involvement in enterprises, meaning any mechanism, including information, consultation and participation, through which employees’ representatives may exercise an influence on decisions to be taken within the enterprise, in particular by raising awareness and contributing to the application of Union law and policies in this area and the take-up and development of European Works Councils,
- initiatives to strengthen transnational cooperation between employees’ and employers’ representatives in respect of information, consultation and participation of employees within enterprises operating in more than one Member State and short training actions for negotiators and representatives in transnational information, consultation and participation bodies which may also involve social partners from candidate countries,
- measures to enable social partners to exercise their rights and duties as regards employee involvement, especially within the framework of European Works Councils, to familiarise them with transnational enterprise agreements and strengthen their cooperation in respect of Union law on employee involvement,
- projects and innovative actions supporting employee involvement, with a view to identifying, anticipating and addressing challenges and its social and economic consequences or changes in the world of work, e.g. restructuring and redundancies, outsourcing and subcontracting, digitalisation, automation and artificial intelligence, and new forms of work, or the need for a shift towards an inclusive, sustainable and low-carbon economy.

Legal basis:

Tasks resulting from specific powers directly conferred on the Commission by the Treaty on the Functioning of the European Union pursuant to Articles 154, 155, 159 and 161 thereof.

Item 07 20 04 09 — Information and training measures for workers’ organisations

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
22 928 771	22 000 000	22 928 771	22 000 000	24 928 771	23 000 000	22 928 771	22 000 000	23 428 771	22 500 000

Remarks:

This appropriation is intended to cover expenditure on information and training measures for workers’ organisations, including representatives of workers’ organisations in the candidate countries, deriving from Union action in the framework of the implementation of the Union social dimension. Those measures should help workers’ organisations to address the overarching challenges facing European employment and social policy as laid down in particular in the Action Plan to implement the European Pillar of Social Rights the Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions ‘Strengthening social dialogue in the European Union: harnessing its full potential for managing fair transitions (COM(2023) 40 final)’ and the Council Recommendation of 12 June 2023 on strengthening social dialogue in the European Union (C/2023/1389) and the Tripartite Declaration for a thriving European Social Dialogue, signed at the Val Duchesse Social Partners Summit and to support the digital and green transitions.

This appropriation is intended to cover in particular the following activities:

- support for the work programmes of the two specific trade union institutes, the European Trade Union Institute and the European Centre for Workers’ Questions, which have been established to facilitate

capacity building through training and research at European level, as well as to improve the degree of involvement of workers' representatives in European governance,

- information and training measures for workers' organisations, including representatives of workers' organisations in the candidate countries, deriving from the implementation of Union action in the framework of the implementation of the Union social dimension,
- measures involving representatives of the social partners in the candidate countries with the specific purpose of promoting social dialogue at Union level.

This appropriation is also intended to promote equal participation of women and men in the decision-making bodies of workers' organisations.

Strong and competent social partners are needed to improve the process of relaunching, and enhance the functioning of, social dialogue in order to support recovery and enhance competitiveness and fairness in the social market economy.

Legal basis:

Task resulting from specific powers directly conferred on the Commission by the Treaty on the Functioning of the European Union pursuant to Article 154 thereof.

Convention concluded in 1959 between the ECSC High Authority and the International Occupational Safety and Health Information Centre (CIS) of the International Labour Office.

Council Directive 89/391/EEC of 12 June 1989 on the introduction of measures to encourage improvements in the safety and health of workers at work (OJ L 183, 29.6.1989, p. 1), and the associated individual directives.

Council Directive 92/29/EEC of 31 March 1992 on the minimum safety and health requirements for improved medical treatment on board vessels (OJ L 113, 30.4.1992, p. 19).

Remarks:

This appropriation is intended to cover the expenditure arising from the fisheries agreements which the Union has negotiated or intends to renew or renegotiate with third countries.

In addition, the Union may negotiate new fisheries partnership agreements which would need to be financed under this article.

Legal basis:

Regulation (EU) No 1380/2013 of the European Parliament and of the Council of 11 December 2013 on the Common Fisheries Policy, amending Council Regulations (EC) No 1954/2003 and (EC) No 1224/2009 and repealing Council Regulations (EC) No 2371/2002 and (EC) No 639/2004 and Council Decision 2004/585/EC (OJ L 354, 28.12.2013, p. 22), and in particular Article 31 thereof.

Regulations and Decisions concerning the conclusion of agreements and protocols adopted with regard to fisheries between the Union and the governments of the following countries:

Remarks:

This appropriation is intended to cover the expenditure on staff, administration and operation of the European Fisheries Control Agency. The Agency's mission is to promote the highest common standards for control, inspection and surveillance under the Common Fisheries Policy (CFP). Its primary role is to organise coordination and cooperation between national control and inspection activities so that the rules of the CFP are respected and applied effectively. The Agency also plays a role in the European cooperation on coast guard functions.

Remarks:

The EUAA, which replaces and succeeds the European Asylum Support Office (EASO) from 19 January 2022, acts as a centre of expertise on asylum and contributes to the development of the Common European Asylum System by facilitating, coordinating and strengthening practical cooperation among Member States on the many aspects of asylum. EUAA also helps Member States fulfil their European and international obligations to give protection to people in need, and it provides operational support to Member States with specific needs and to Member States whose asylum and reception systems are under particular pressure. Furthermore, EUAA provides evidence-based input to Union policymaking and legislation in all areas having a direct or indirect impact on asylum.

Remarks:

This appropriation is intended to ensure strong and effective European integrated border management at the external borders while safeguarding the free movement of persons within them, in full compliance with the Union's commitments on fundamental rights, thereby contributing to guaranteeing a high level of security in the Union.

More specifically, the Instrument for Financial Support for Border Management and Visa Policy (the 'Instrument') should contribute to supporting effective European integrated border management at the external borders implemented by the European Border and Coast Guard as a shared responsibility of the European Border and Coast Guard Agency and of the national authorities responsible for border management, to facilitating legitimate border crossings, to preventing and detecting illegal immigration and cross-border crime and to effectively managing migratory flows, as well as to supporting the common visa policy in order to facilitate legitimate travel and prevent migratory and security risks.

The Instrument will promote the implementation of European integrated border management defined by its components in accordance with Article 3 of Regulation (EU) 2019/1896: border control, search and rescue during border surveillance, risk analysis and cooperation between Member States (supported and coordinated by the European Border and Coast Guard Agency). The Instrument will also promote inter-agency cooperation, cooperation with third countries, technical and operational measures within the Schengen area related to border control and designed to address illegal immigration and to counter cross-border crime better, and use of state-of-the-art technology, quality control and solidarity mechanisms. Furthermore, the Instrument will contribute to the improvement of the efficiency of visa processing in terms of detecting and assessing security and irregular migration risks, as well as facilitating visa procedures for *bona fide* travellers. The Instrument will support digitalisation of visa processing with the objective of providing fast, secure and client-friendly visa procedures for the benefit of both visa applicants and consulates.

Remarks:

The European Border and Coast Guard Agency (Frontex) promotes, coordinates and develops European border management in line with the Charter of Fundamental Rights of the European Union and the concept of integrated border management. Frontex's main tasks are to coordinate cooperation between Member States in external border management, assist Member States in training of national border guards, carry out risk analyses and follow research relevant for the control and surveillance of external borders. Furthermore, Frontex helps Member States requiring technical and operational assistance at external borders and provides Member States with the necessary support in organising joint return operations.

Remarks:

The European Union Agency for the Operational Management of Large-Scale IT Systems in the Area of Freedom, Security and Justice (eu-LISA) provides a long-term solution for the operational management of large-scale IT systems which are essential instruments in the implementation of the asylum, border management and migration policies of the Union.

eu-LISA is responsible for the operational management of the Schengen Information System (SIS II), the Visa Information System (VIS) and Eurodac. eu-LISA is also responsible for the preparation, development or operational management of the Entry/Exit System (EES), DubliNet, and the European Travel Information and Authorisation System (ETIAS), the European Criminal Records Information System – Third-country Nationals (ECRIS-TCN) and e-Justice Communication via Online Data Exchange (e-CODEX). eu-LISA is also responsible for the new information architecture for the Union's border management and internal security, ensuring interoperability between the Union's large-scale information systems and improving the timely, efficient and comprehensive exchange of information with relevant national and Union authorities.

Remarks:

The European Union Agency for Law Enforcement Cooperation (Europol) is the Union’s law enforcement agency, whose remit is to help make Europe safer by assisting law enforcement authorities in Member States. Europol offers support for law enforcement operations on the ground, is a hub for information on criminal activities as well as a centre of law enforcement expertise.

Remarks:

The European Union Agency for Law Enforcement Training (CEPOL) is an agency of the Union dedicated to develop, implement and coordinate training for law enforcement officials. CEPOL contributes to a safer Europe by facilitating cooperation and knowledge sharing among law enforcement officials of the Member States, and to some extent from third countries, on issues stemming from Union priorities in the field of security; in particular, from the EU Policy Cycle on serious and organised crime. CEPOL brings together a network of training institutes for law enforcement officials in Member States and supports them in providing frontline training on security priorities, law enforcement cooperation and information exchange. CEPOL also works with Union bodies, international organisations and third countries to ensure that the most serious security threats are tackled with a collective response.

Remarks:

The European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) / European Union Drugs Agency (EUDA) provides the Union and Member States with a factual overview of European drug problems and a solid

evidence base to support the drugs debate. It offers policymakers the data they need for drawing up informed drug laws and strategies. It also helps professionals and practitioners working in the field pinpoint best practice and new areas of research. While the EMCDDA/EUDA is primarily European in focus, it also works with partners in other world regions, exchanging information and expertise. Collaboration with European and international organisations in the drugs field is also central to its work as a means of enhancing understanding of the global drugs phenomenon.

Remarks:

This appropriation is intended to provide support to the Eastern Neighbourhood partner countries (Armenia, Azerbaijan, Belarus, Georgia, the Republic of Moldova, Ukraine) and cover actions implemented in the areas of cooperation specified in the NDICI — Global Europe, including through multi-country, regional, and trans-regional programmes. Priority areas for Union financing are selected mainly from those included in the association, partnership and cooperation agreements, jointly agreed association agendas and partnership priorities or other relevant, existing and future, jointly agreed documents between the Union and the partner countries in bilateral and multilateral formats.

In addition, this appropriation contributes to the specific objectives of Union support for the Neighbourhood, which are:

- to promote enhanced political cooperation and strengthen and consolidate deep and sustainable democracy, stability, good governance, the rule of law and the respect for human rights;
- to support the implementation of association agreements or other existing and future agreements, and jointly agreed association agendas and partnership priorities or equivalent documents, including through institutional cooperation and capacity building;
- to promote a strengthened partnership with societies between the Union and the partner countries, and among the partner countries, including through people-to-people contacts and a wide range of activities with a specific focus on youth;
- to enhance regional cooperation, in particular in the framework of the Eastern Partnership, European Neighbourhood-wide collaboration as well as Black Sea regional cooperation, Arctic cooperation, the Northern Dimension, including in the areas of energy and security;
- to achieve progressive integration into the Union internal market and enhanced sectoral and cross-sectoral cooperation, including through legislative approximation and regulatory convergence towards Union and other relevant international norms and standards, and improved market access, including through deep and comprehensive free trade areas, related institution building and investment;
- to strengthen partnerships on well-managed and safe migration and mobility and, where applicable and provided that conditions for well-managed and secure mobility are in place, support the implementation of existing visa-free regimes, in line with the revised visa suspension mechanism, visa liberalisation dialogues and bilateral or regional agreements and arrangements with third countries, including mobility partnerships;
- to support confidence-building and other measures contributing to security and the prevention and settlement of conflicts, including support to affected populations and reconstruction.

Part of the appropriation can also be used to implement the incentive-based approach as set out in the NDICI — Global Europe.

Remarks:*New chapter*

Appropriations under this chapter are intended to provide Ukraine with non-repayable financial support with a view to repay the principal, interest and any other related costs of the MFA Loan and the other eligible bilateral loans provided to support its budgetary needs, identified in cooperation with international financial institutions. Therefore, these appropriations will contribute to macro-financial stability and to ease Ukraine's external and internal financing constraints.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks:

New article

Appropriations are intended to provide Ukraine non-repayable financial support with a view to repay the principal, interest and any other related costs of the MFA Loan and the other eligible bilateral loans provided to support its budgetary needs.

The release of the non-repayable financial support under the Ukraine Loan Cooperation Mechanism will be conditional on the Commission's approval of the requests for non-repayable financial support submitted by Ukraine or, exceptionally, by bilateral lenders.

The Ukraine Loan Cooperation Mechanism will be financed by external assigned revenue transferred in accordance with Annex XLI to Council Regulation (EU) No 833/2014 or received as financial contributions from Member States, third countries or other sources.

Remarks:

The amount entered corresponds to the appropriations for the Publications Office of the European Union set out in detail in the specific annex to this section.

On the basis of the Publications Office's cost-accounting forecasts, the cost of the services it will perform for each institution is estimated as follows:

European Parliament	13 361 343	10,91%
Council of the European Union	6 454 104	5,27%
European Commission	71 117 619	58,07%
Court of Justice of the European Union	7 054 201	5,76%
European Court of Auditors	1 420 638	1,16%
European Economic and Social Committee	881 775	0,72%
European Committee of the Regions	514 369	0,42%
Agencies	11 646 781	9,51%
Other	10 017 946	8,18%
Total	122 468 776	100,00 %

This appropriation is intended to cover the costs borne by the Publications Office as official provider of publishing services to all institutions, bodies and agencies established by or under the Treaties. As such, the

Publications Office constitutes the central point of access to Union law, and also to publications, open data, research results, procurement notices and other official information.

Its mission is to support EU policies as a centre of excellence for information, data and knowledge management, and to ensure that this broad range of information is made available to the public as accessible and reusable data to facilitate transparency, economic activity, and the diffusion of knowledge.

Legal basis:

Decision 2009/496/EC, Euratom of the European Parliament, the European Council, the Council, the Commission, the Court of Justice, the Court of Auditors, the European Economic and Social Committee and the Committee of the Regions of 26 June 2009 on the organisation and operation of the Publications Office of the European Union (OJ L 168, 30.6.2009, p. 41).

Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1), and in particular Articles 64 to 67 thereof.

8.	Item	20 03 16 03	Office for Infrastructure and Logistics — Luxembourg	684 792
9.	Article	20 03 17	European Anti-Fraud Office (OLAF)	4 224
Total				5 707 288

Legal basis:

Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Article 30 02 02 — Differentiated appropriations

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
181 195 723	162 521 723	181 195 723	162 521 723	211 195 723	192 521 723	163 415 723	144 741 723	163 415 723	3 144 741 723

Remarks:

The appropriations in this title are intended for two circumstances only: (a) where no basic act exists for the action concerned when the budget is established; and (b) where there are serious grounds for doubting the adequacy of the appropriations or the possibility of implementing, under conditions consistent with sound financial management, the appropriations entered in the budget lines concerned. The appropriations entered in this article may be used only after transfer in accordance with the procedure laid down in Article 30 of the Financial Regulation for cases under point (a) and in Article 31 of the Financial Regulation for cases under point (b).

The breakdown is as follows (commitments, payments):

1.	Article	02 10 02	European Maritime Safety Agency (EMSA)		1 791 000	1 791 000
2.	Article	03 10 03	European Insurance and Occupational Pensions Authority (EIOPA)		379 000	379 000
3.	Article	03 10 04	European Securities and Markets Authority (ESMA)		484 000	484 000
4.	Article	05 02 01	ERDF — Operational expenditure			3 000 000 000
5.	Article	06 10 02	European Food Safety Authority		405 000	81 000
6.	Article	08 05 01	Establishing a governance framework for fishing activities carried out by Union fishing vessels in third-country waters		59 970 000	41 620 000
7.	Article	09 10 01	European Chemicals Agency – Environmental directives and international conventions		4 083 742	4 083 742
8.	Article	09 10 02	European Environment Agency		3 800 981	3 800 981
9.	Article	11 10 02	European Union Agency for the Operational Management of Large-Scale IT Systems in the Area of Freedom, Security and Justice (eu-LISA)		76 744 000	76 744 000
10.	Article	12 10 01	European Union Agency for Law Enforcement Cooperation (Europol)		15 758 000	15 758 000
Total					163 415 723	3 144 741 723

Legal basis:

Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PA 01 23 04 — Preparatory action — Support Service for citizens led renovation projects

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
p.m.	2 250 000	p.m.	2 250 000	500 000	750 000	p.m.	2 250 000	500 000	2 375 000

Remarks:

This appropriation is intended to cover commitments remaining to be settled from previous years under the preparatory action.

This preparatory action is a continuation of pilot project PP 01 21 02 which has been approved for two consecutive years and aims to overcome financial, legal and technical barriers to citizen-led renovation projects. It involves the creation of a specific Union support service for Citizens Energy Communities (CECs) and Renewable Energy Communities (REC) new actors enshrined in the Union legislation able to catalyse citizen engagement in various aspects of the ecological transition, including renovation projects. The creation of such a service could build upon the experience of cooperatives that are successfully bundling projects at a neighbourhood scale. The support service would aim to strengthen community building, to scale up and replicate successful programmes. It should include:

1. A platform for sharing experience and models, in order to build strong community dynamics to mobilise Union citizens around integrated building renovation and renewable deployment (through the tool of energy communities).
2. Support for the development of investment plans, as identifying financing options is a key element for the creation of project pipelines. (Looking for commonalities in order to scale the development of citizen-led projects. Investigating the development of models supporting renovation in conjunction with renewable deployment.)
3. Providing evidence and indicators in order to raise awareness among existing energy communities about the value of energy renovations.
4. Providing technical assistance and coaching to citizens groups, existing community organisations as well as local authorities to set up citizen and renewable energy communities dealing with building renovation, access to home ownership and energy poverty.
5. Monitoring and supporting a strong transposition of Clean Energy Package provisions concerning CECs and RECs which should be an opportunity for Member States to strengthen the role of citizens in the energy transition.

The goal of the preparatory action will be to coach renewable and citizen energy communities through the process of creating and implementing a territory transition.

2025 would be the final year of this successful pilot project and preparatory action. In order to gather all experiences from the previous project phases, the preparatory action could focus on drawing lessons, sharing best practices and disseminating experiences to multipliers in order to further boost citizens led renovations as part of the EU Renovation Wave, not least against the background of the implementation phase of the recast Energy Performance of Buildings Directive.

Item PA 01 24 03 — Preparatory action — Partnerships for Regional Innovation

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
p.m.	500 000	p.m.	500 000	1 000 000	1 250 000	p.m.	500 000	1 000 000	750 000

Item PA 02 24 02 — Preparatory action — Establishing book and claim system for SAF

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
p.m.	p.m.	p.m.	p.m.	2 800 000	3 650 000	p.m.	p.m.	2 800 000	700 000

Remarks:

The initially designed Preparatory Action (PA 02 24 02) aiming to establish book and claim system for aviation sector in the EU should continue further. Bearing in mind various business initiatives, it should well examine, whether IT architecture of book and claim should be based on a generic solution, extendable to cover additional sectors, with due regard to interoperability, in order to set up an internally secured, on time and reliable corporate tool at the disposal of the Commission and other business actors and to avoid possible market fragmentation or red tape.

In addition, the ongoing Preparatory Action on book and claim system should also cover European maritime sector in order to increase the share and to facilitate the cost-effective distribution of renewable and low-carbon fuels in the fuel mix of the EU maritime transport by separating the purchase of such fuels from their physical delivery and use. There are important differences between maritime and aviation sectors, which has to be well reflected within the Preparatory Action. It should be carried out in the following phases:

Analysing the existing legislative framework, including the relevant provisions under RED, EU ETS, AFIR and FuelEU maritime as well as any other relevant legislation in the EU, at IMO and in 3rd countries with main global bunkering hubs and those situated in green shipping corridors;

- Developing a sound framework for book and claim mechanisms, including for:
 - Sustainable fuel certification/credentials – to transfer sustainability certification/characteristics without actual transfer/use of molecules;
 - OPS green credentials – to trade green energy when using onshore power supply.
 - Design of IT architecture of the book and claim system, with due regard to the existing Union Database, the solution designed for aviation (ongoing preparatory action) and possibly other sectoral solutions (including provision of green electricity in ports through book and claim by energy companies in the future), as well as its interoperability with other relevant databases and IT systems.
 - developing a corporate tool through the Union Database (UDB) to serve the Commission and businesses in demonstrating fuels' sustainability credentials; strategic reflections on the future transport fuels master database, its interoperability with systems used by EU agencies and/or similar possible systems in 3rd countries, including in the context of potential global measures both for maritime (IMO) and aviation (ICAO/ECAC).

Article PA 02 25 — 2025

Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 500 000	750 000			1 500 000	375 000

Item PA 02 25 01 — Preparatory action — Preparatory work for auctions for renewable hydrogen imports under the European Hydrogen Bank

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 500 000	750 000			1 500 000	375 000

Remarks:

The REPowerEU Plan has put forward an ambition to produce 10 million tonnes of renewable hydrogen within the EU and to import 10 million tonnes of renewable hydrogen from third countries. The European Union is the

first region that has established a regulatory framework to support a fully-fledged ecosystem for the development and uptake of renewable hydrogen to decarbonise our economy. This includes clear rules governing the hydrogen market in the EU, access to infrastructure, and allowing hydrogen imports to count towards Member States' targets.

Renewable hydrogen is more expensive than fossil fuel-based hydrogen. Targeted use of public resources can leverage private sector investments by de-risking renewable hydrogen production.

The European Hydrogen Bank (EHB) will play an important role in facilitating early market creation for hydrogen. The European Commission has set up domestic auctions for renewable hydrogen production under the Innovation Fund to support market development, and has proposed to set up an international auction for imports as well. Both domestic production and imports are important to meet potentially large future demand from industrial sectors such as steel and chemicals.

This will require additional financing. Currently, there is no dedicated funding available for the international leg of the EHB to support imports of renewable hydrogen.

On the other hand, under the domestic leg of the EHB, a pilot auction for renewable hydrogen production in the EU was launched under the Innovation Fund with a €800 million budget, with results expected in April/May 2024. The Commission will draw lessons learned from this pilot with the aim to launch a second auction for renewable hydrogen production in the EU before the end of the year.

The EU ETS Innovation Fund finances the domestic auction, but can only be used within the EU and the EEA, not to support production in third countries. Therefore, in the EHB Communication, the European Commission has proposed a Team Europe approach to bring together Member States' resources and provide de-risking for third country projects. In addition, the Commission will explore options to secure dedicated funding for the EHB international leg from the next Multi-Annual Financial Framework.

In order to design a scheme for renewable hydrogen imports from third countries into the EU, substantial analytical and preparatory work is required in the immediate term. Such preparatory work could include, amongst other tasks, analysing the hydrogen market landscape globally, identifying the specific risks associated with the import of hydrogen and the associated financing challenges, and the advantages and disadvantages of different auction design elements, building on existing experience available, such as the international auctions organised by the H2Global Foundation.

This preparatory work will be beneficial for all EU Member States that are interested in hydrogen imports into the EU, and will also be valuable for Member States that are developing hydrogen corridors connected to EU borders. Despite the lack of a dedicated budget, there is momentum for an international import auction. A number of Member States expressed their interest to participate in such an auction. Moreover, there is keen interest from international producers and third countries to produce renewable hydrogen and export it to the EU.

A budget of 1.5 million would be required for this preparatory action, with implementation starting in 2025.

Legal basis:

Preparatory action within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PA 03 24 03 — Preparatory action — Upskilling and reskilling the Tourism Ecosystem -Tourism Knowledge hub and Tourism Data Space

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
p.m.	500 000	p.m.	500 000	1 600 000	1 750 000	p.m.	500 000	1 600 000	900 000

Remarks:

The report on establishing an EU strategy for sustainable tourism adopted in March 2021 by the European Parliament asked for the implementation of an EU tourism data space, also mentioned in the Tourism Transition Pathways delivered by the Commission.

By 2025, 90 per cent of people who are without formal education should be regular internet users. Nowadays, 67.8 per cent of people with low or no education use the internet less than once a week. Simultaneously, Members States and companies across Europe should have completed retraining of 20 per cent of the workforce, leaving only 32 per cent of workers in need of reskilling. Currently, an estimated 52 per cent of workers need some form of reskilling. Workers in a range of sectors, especially in tourism have seen their jobs radically change in the past few years, and this was accelerated during the pandemic.

This new proposal intends to be a continuation of the current preparatory action entitled ‘Upskilling and reskilling the Tourism Ecosystem’ (PA 03 24 03) tabled during the last budget exercise by the Tourism Task Force. Several results were achieved. The EU competence centre for data management D3Hub supports tourism destinations and their ecosystem (with special focus on SMEs) in their data-driven green and digital transition in order to increase collaboration and knowledge transfer between tourism stakeholders. Existing tools should be taken into account (such as the EU competence centre for data management D3Hub and for support of DMOs, the European Digital Innovation Hubs Network with its newly founded working group on tourism for the support of SMEs, and actions under the call setting up the tourism data space under the Digital Europe Programme) to ensure synergies and avoid overlaps. This project also takes into consideration the Skills Partnership for the Tourism Ecosystem.

Bearing that in mind this preparatory intends to:

- Upskilling and reskilling DMOs, SMEs and other tourism stakeholders in their management and use of data;
- Connecting DMOs, SMEs and other tourism stakeholders for strengthening existing networks and contact points ensure synergies.

The European Parliament also sees this objective as the first phase for the future implementation of a European Agency for Tourism.

Item PA 04 24 01 — Preparatory action — Game-changing innovation for European launch solutions

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
p.m.	2 500 000	p.m.	2 500 000	20 000 000	13 750 000	p.m.	2 500 000	20 000 000	7 500 000

Remarks:

The action intends to support the fast development of game-changing innovations that have the potential to revolutionise the future of access to space and improve the competitiveness of the European space industry. Access to space is an indispensable element of the space ecosystem, without which there is no EU space policy, which supports many political priorities..

The preparatory action is expected to focus on the following objectives:

- enable the development of game-changing innovations for European launch solutions while adopting an innovative implementation method, by supporting the different development cycles of technology and showing willingness to concretely use those technologies on future launchers;
- facilitate industry’s initiative to propose disruptive technologies. The industry should propose innovative solutions for the next generation of cheaper, more sustainable, agile and resilient access to space. They should do so by focusing on ambitious innovations which are not yet available, and go beyond the state of the art in the international pipelines for access to space.

The preparatory action should be implemented through a progressive approach for competitive calls starting with a proof-of-concept phase started in 2024 and continued with a development phase in the period 2025–2027.

In this first phase, the Commission launched a contest to award prizes to up to five most disruptive and game-changing innovations. As a follow-up, a subsequent preparatory action could be considered in 2025, to select the best three innovations identified in the previous phase, and attribute grants for their initial technology development. This will prepare the ground for a dedicated potential access to space component as part of the future Space programme in the next MFF, where final development and qualification could be supported.

Currently, there is no dedicated EU programme existing or in the pipeline for access to space. Some access to space activities supporting Research & Innovation (R&I) are implemented through the Horizon European R&I Programme.. However, these actions do not support the full technology development cycle for access to space.

Putting in competition several technologies would have an added value as it would accompany the development and maturation of the most disruptive technologies all along the development cycle up to flight model delivery. This is not possible through current Horizon Europe / Space Programmes. This would ultimately prepare the ground for a possible future dedicated access to space programme or a dedicated component in the frame of the future EU Space Programme, identifying access to space as a key EU priority, benefiting to both EU institutional and commercial users.

Item PA 04 24 02 — Preparatory action — Innovative user terminals for European secure satellite communication service

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
p.m.	500 000	p.m.	500 000	20 000 000	13 750 000	p.m.	500 000	20 000 000	5 500 000

Remarks:

This action is intended to enable timely adoption of the space secure connectivity services provided by IRIS² and GOVSATCOM, filling the gap in Union industrial capability to develop high-performance, cheap and secure satellite user terminals.

The EU is currently implementing measures to provide governments and citizens with secure connectivity via satellite, through the Union secure connectivity programme (IRIS²) and the GOVSATCOM component of the Union Space Programme. These services will be based on a new generation of state-of-the-art satellites, using orbits, frequencies and signal characteristics that have not been used yet by European industry players. The effective utilisation of such services relies therefore on the prompt availability of user terminals and receivers that are compatible with such characteristics. Such terminals and receivers are particularly important for emerging SatCom Service, seamlessly combining terrestrial and SatCom capabilities, for example in the automotive sector.

The objective of this preparatory action is therefore to set the condition for a competitive industry to develop terminals that can be commercialised with minimal additional effort, enabling production and market penetration with the utilisation of open standards.

In particular, the action will support companies in reaching maturity and having a solid business plan to provide high-performance, cheap and secure satellite user terminals. Such terminals would be able to:

- integrate multiple systems and orbits, including non-geostationary satellites in LEO and possibly MEO;
- use the IRIS² frequencies (including Ka-gov);
- suit both commercial and governmental services provided by IRIS²;
- integrate terrestrial networks, 5G standards and possibly IoT applications;
- provide for end-to-end solutions;
- adopt all IRIS² secure features.

If successful in the first year, the preparatory action should be implemented through an incremental approach for competitive calls in three phases:

- 2024: EUR 5 million on the proof-of-concept and business case development phase;
- 2025: EUR 20 million on technology development for the prototype & qualification phase;
- 2026: EUR 20 million on industrialisation and commercial prototyping.

The beneficiaries of the action would notably be the EU downstream industry, including New Space players like SMEs and start-ups.

Item PA 04 25 01 — Preparatory action — Enhanced cyber-resilience of space activities

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 000 000	500 000			1 000 000	250 000

Remarks:

Space systems and services in the EU provide essential services for societal functions and economic activities. In the current geopolitical context, the resilience of space systems and infrastructures is getting critical, as identified by the EU Space Strategy for Security and Defence. The space domain includes all elements relevant for the functioning of space systems and the delivery of space-based services, including the physical space environment, different orbits and spacecraft, their ground and launch infrastructure, radio frequency links, user terminals, information related to and delivered from these space assets, the relating cyber environment and the underlying industrial space sector. Thus, they need to be increasingly resilient and protected.

SMEs and start-ups in the field of space provide new technologies, services and capacities, including more and more in support of security-related missions. To ensure their reliability, those companies need to establish appropriate level of protection and cyber-resilience. For this reason, it would be appropriate to launch preparatory work to address particular security needs and propose some supportive measures for SMEs and start-ups by offsetting part of their relevant compliance costs and thus, facilitate the development of European solutions. Resilience measures for the space sector should include better coordination and cooperation between public and private space actors, including information exchange on threats and incidents. It could also be envisaged the development and uptake of relevant security standards and a framework for the exchange of best practices among commercial and governmental players on resilience measures.

In this context, the preparatory action could consist of the following actions:

- Mapping of existing innovative solutions and services (including costs and availability) that would enable SMEs and start-ups to increase their level of cyber-resilience;
- Identification of new potential innovative solutions and services that would enable SMEs and start-ups to increase their level of cyber-resilience;
- Identification of technologies and facilities that would need to be developed in the EU (e.g.: testing facilities, digital twins, etc); and related roadmaps;
- Identification of potential supportive measures at EU and national level that would enable SMEs and start-ups to offset part of the costs related to the enhancement of their level of resilience.

Legal basis:

Preparatory action within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PA 07 25 01 — Preparatory action — Building a trustworthy social media sphere: countering disinformation on social media for young Europeans

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				6 000 000	3 000 000			6 000 000	1 500 000

Remarks:

The Preparatory Action will create a truly social media public sphere specifically for younger European generations, by portraying the sense of togetherness reflected in a common culture, similar lifestyle, and shared values in a target group-appropriate way. Such a sense of European identity is undermined by the continuously increasing intensity of disinformation aiming to create divisions among young Europeans. This preparatory action focuses on social media platforms, which is an environment where disinformation is particularly prevalent, yet which stands for the vast majority of the media diet of younger generations.

Support for social media spaces specifically addressing – and, more importantly, actually reaching – young Europeans with engaging and constructive narratives related to the European project to counter divisive disinformation campaigns remains limited, despite its importance for the future of European democracy and identification. During the last European elections for example, widespread dissemination of disinformation challenged the information young people received on social media platforms. To address this issue, an audience-centric approach, highly connected and engaged with the target audience is needed that both addresses deceptive and misleading narratives head-on and fosters societal resilience of young audiences against spurious information sources in the mid- to long-term through media literacy. Efficient tools to foster resilience for this are prebunking methods, which help the target audience to recognize misleading narratives and understanding bias. Low-threshold, tailored content can also support young Europeans to identify credible sources and avoid misleading or fraudulent information. Another component is the examination of the opportunities and risks associated with AI and algorithm feeds, including their impact on digital interactions and mental health on the target audience illustrated by current trends. Attempts to manipulate the public debate through disinformation narratives and information manipulation could be tackled by media and information literacy initiatives e.g. with schools or universities.

Young people spend a disproportionate share of their media time on social media whose feeds are powered by algorithms and AI models focusing entirely on commercial logic. This has consequences for current affairs

content, which has an increasingly more difficult time achieving any organic reach. To create impact, such content must smartly adapt to this new form of attention economy to contribute, in a technologically healthy way, to networks and platforms where young Europeans gather and engage.

Moreover, social media use shifts from social interaction in large groups and communities to pure video consumption. The Preparatory Action aims at increasing relevant content formats, and narratives for a variety of social media platforms that provoke social interaction among young Europeans to foster togetherness and cross-border exchange. Next to fighting illegal content and societal harms online, it is crucial to simultaneously counter it with credible and trustworthy narratives on the EU and Europe, where Europeans drive the actual ‘story-telling’.

These narratives will be made available in all EU languages, or in as many as possible, to achieve comprehensive reach across EU member states. Additional non-EU languages widely spoken on the territory of EU member states are considered an asset.

In order to attract younger Europeans to European ideas and values, and in order to truly empower European citizens through digital platforms, the preparatory action will support curated online spaces on social media to create, collect and adapt narratives that deal creatively with topics that are of proven interest to young Europeans, and which will contextualise them in order to make them compelling and appealing to the target group. According to several recent multi-country studies, concerns voiced by young Europeans converge on a number of common themes. For instance, the cluster around issues such as the cost-of-living crisis, jobs, and social security is influenced by the experience of inflation and the reversal in interest rates since the second half of 2021. Similarly, young people’s intense longing for peace and mental wellbeing was certainly heightened by the experience of long Covid-19 lockdowns and related civil strife, and ultimately by Russia’s war against Ukraine as well as other recent international conflicts.

The wish for wholesale stability and security across all areas of life is perhaps the most important motivation across the board: From physical and mental health to international relations, and from living conditions to the labour market. On a secondary level come issues such as the climate crisis, environmental degradation, as well as social and economic inequality, exclusion, discrimination, and an ever more divisive public sphere. Young people feel increasingly cowed by the current poly-crisis.

The European added-value is created by comparing and contrasting regional experiences and points of view on matters of pan-European importance. The aim is to address relevant EU-level topics, and at the same time give a forum to local as well as community perspectives, allowing young users to identify strongly with the content. The preparatory action will pay particular attention to addressing non-cosmopolitan audiences and young Europeans with fewer opportunities in their mother tongue.

This ambitious pan-European and multilingual initiative will stimulate offline and online, open, true, deep, and constructive debates about current and future life in Europe among young Europeans. By using innovative formats on digital platforms, with the ultimate goal of creating greater awareness about European visions, events and realities and greater engagement of Europeans towards European values and ideas, the action subsequently contributes to a more active and resilient civil society.

Legal basis:

Preparatory action within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PA 07 25 02 — Preparatory action — Citizen facing European TV and Video News Portal for Streaming, Search and Translation of European TV and video news and political documentaries produced or transmitted by accredited public and private media in Member States

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				5 500 000	2 750 000			5 500 000	1 375 000

Remarks:

Following the expected results of the first cycle, the next phase should be dedicated to the development and deployment of a first demonstrator. Based on the defined objectives of the pilot project, this should include Artificial Intelligence tools as an underlying technology that goes beyond the mere translation and subtitling of content. The first demonstrator should already explore the possibility of using AI to curate content, e.g. by generating trailers and thumbnails of available content where possible. Technological developments, including generative AI, should form a main element of the Portal's search engine and recommendation system, among others. As this could be realised in many ways, the first demonstrator should explore and apply those potential avenues. Key elements are: a non-discriminatory search function, the development of algorithms that place public value at the centre, and a high level of transparency in translation systems, which is necessary to ensure trust in content. It is not only the speed at which developments are taking place in this area - but also the fact that there are no algorithms that are non-discriminatory and in line with European values - that make it necessary to develop these independently.

Legal basis:

Preparatory action within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PA 07 25 03 — Preparatory action — European Heritage Hub to support a holistic and cost-effective follow-up of the European Year of Cultural Heritage

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				2 000 000	1 000 000			2 000 000	500 000

Remarks:

It is the first project of its kind, aiming at a structured and lasting advocacy and knowledge platform fostering synergies between cultural heritage stakeholders (including cities and regions) and programmes from different disciplines and levels of governance in the EU and beyond. In the third year - 1st year as preparatory action - the project would capitalise and build on the results achieved over the pilot project phase to 1) include more stakeholders in the activities of the Hub, through strengthening and sustaining its outcomes 2) further strengthen a structured dialogue with all EU Institutions, especially the new EC and EP and 2) consolidate its wide geographical coverage, with a special focus on regions and cities in countries with clear EU integration perspective (e.g. Ukraine and Moldova, the Caucasus and the Western Balkans).

Legal basis:

Preparatory action within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PA 07 25 04 — Preparatory action — The European Union - the media freedom hub

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				3 000 000	1 500 000			3 000 000	750 000

Remarks:

Russia's unprovoked and unjustified war in Ukraine, accompanied by an information war for minds and hearts, including in Ukraine, other candidate countries, the EU, and in Russia and Belarus, and coupled with the elimination of independent media inside Russia and Belarus, presents a responsibility for the European Union to take leadership for safeguarding media plurality and independence in the wider regional context.

With freedom of expression as one of the fundamental values of the European Union, the EU has now become a major hub for those in Russia and Belarus striving for freedom of expression and democracy. This preparatory action builds on the pilot project of the same name and, by closing the gap in existing EU financing programs, aims to provide continuous support for independent media in exile as long as it takes for democracy to prevail. The preparatory action answers the multiple calls from the Council, the Commission and the European Parliament to support independent media.

Despite external and internal challenges in the area of press freedom, the European Union remains the world's safest place for media and journalists to do their work. Independent journalists and entire editorial newsrooms from Russia and Belarus have already fled and reallocated to the European Union countries. They are continuing their work in the fight for democracy in their home countries, but from a safe area within the EU, where they are not at risk of brutal repressions, reprisals, and imminent imprisonment for telling the truth. The grip of power in Russia and Belarus has become stronger in these past two war years. The situation is deteriorating, and information space is shrinking. Many journalists, civil society, and opposition leaders have been silenced, some forever. At the same time, support is needed also for Ukrainian media and their staff who have come to the European Union together with the war refugees from Ukraine.

Media organisations face an immediate lack of resources to continue their activities, challenges of establishing viable business models in the face of increasing closure and constraints in the Russian-Belarusian information and physical space, as well as a general decline in people's purchasing power as a result of the war. Unlike emergency solutions, where like-minded partners played a major role in solving acute financial and resource problems of media relocating to the EU in a matter of first months, this preparatory action aims to offer a predictable support mechanism that provides core support, opportunities for innovation and development in the longer term. It will improve and expand support provided by the pilot project.

The goal of the preparatory action is to promote the preservation of a pluralistic media environment of the affected countries, even while journalists and media are working from exile. The broader long-term aim is to make Europe a safe place by helping the peoples of Russia and Belarus in their democratic aspirations, where independent media play an indispensable role.

The preparatory action aims to build on the precise support needs identified by the pilot project and subsequently to provide appropriate support for independent media and journalists from Ukraine, Russia, and Belarus who have relocated and are working from the EU Member States by:

- Continuously assessing and re-evaluating the needs and challenges of independent newsrooms and professional journalists who have relocated their operations. This becomes particularly crucial given the deteriorating security situation in their respective home countries, which introduces additional layer of complexity, including the imperative to keep themselves, their sources and audience secure;
- Establishing, empowering, and extending support networks across multiple EU Member States to offer tailored assistance to the exile newsrooms and journalists. Overall, the support aims to cultivate conditions for exile media to sustain their work. This includes, but not limited to, aiding the exploration and

introduction of viable business models, introducing innovative technical and content format solutions to reach audiences (including those with possibly limited access to the internet and other resources), as well as seeking synergies and promoting sharing of best practices, promoting networking (in particularly among exile media), all while ensuring media independence and fostering plurality.

Legal basis:

Preparatory action within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Remarks:

Semiconductors are the backbone of the modern economy, the cornerstone of emerging technologies, and are in the middle of geopolitical competition. Europe cannot become completely self-reliant but relies on like-minded partner countries to diversify and secure its semiconductor supply chains, while leveraging its diplomatic weight with the aim of mitigating or preventing a crisis and achieving strategic autonomy. The US already initiated a Chip4 alliance without involving the Union. If Europe wants to become a relevant actor in the chips value chain, it must also invest in the competitiveness of its chips diplomacy and make it a cornerstone of its foreign policy.

This pilot project would establish track 2 bilateral dialogues between European stakeholders and strategic partners to enhance coordination and confidence-building on strategic, diplomatic, trade and security issues in the context of the semiconductors and semiconductor technologies, including topics such as protective measures, export controls, intellectual property protection, supply chain security, standards, certification and green innovation. It will support a better understanding of the semiconductor value chain and its evolution as well as a stronger European ecosystem through international partnerships. The specific objectives of this pilot project are to contribute to:

- track 2 diplomacy to increase consensus and coordination between all relevant European non-state stakeholders of the semiconductor ecosystem and those of partner countries, through a dialogue work stream;
- better understanding and analysis of factors affecting the semiconductor value chain and its evolution, through a research work stream;
- promoting the Union’s economic base, competitiveness, growth, standards and contributions to the global semiconductor value chain and its resilience in partner countries, through an advocacy work stream.

To reach those objectives, three work streams should be established with the following indicative list of activities:

- dialogue: as the core activity of this project, the organisation of track 2 consultation meetings with key global partners in the context on semiconductor topics of shared or converging interests. In contrast to official track 1 diplomacy that can already be undertaken, track 2 diplomacy is unofficial in nature, involves industry and is facilitated by a civil society organisation. This offers faster and informal channels of communication with strategic partners.
- research: briefings and research to support and inform the consultations and other forms of engagement, and joint research initiatives with stakeholders from partner countries to inform the mapping and monitoring efforts of the value chain.
- advocacy: dedicated outreach and public diplomacy channels to disseminate and promote Union’s chip policies, interests and achievements in Europe and abroad, e.g. at conferences or via social media, traditional media, written publications and other channels.

The priorities and intended results are:

- to enhance track 2 diplomacy, European coordination, engagement and advocacy through regular dialogues and consultations with key global partners on semiconductor topics of shared or converging interests;

- to increase consensus with partner countries on how to enhance supply chain security and a trusted foundry certification programme;
- to strengthen multi-stakeholder engagement and confidence-building between European non-state stakeholders in the semiconductor ecosystem, and with partner countries;
- to encourage cooperation on R&D and workforce development with strategic partners;
- to enhance dissemination of Union’s best practices in supply chain security, R&D or other topics of converging interests;
- to support and inform official governmental track 1 dialogues and decisions with insights from relevant industry and civil society actors in the semiconductor ecosystem;
- to strengthen convergence between the standards, policies, and best practices of the Union and those of partner countries;
- to offer European stakeholders avenues for signalling other delegations;
- to support the Commission’s activities under Regulation (EU) 2023/1781 of the European Parliament and of the Council of 13 September 2023 establishing a framework of measures for strengthening Europe’s semiconductor ecosystem and amending Regulation (EU) 2021/694 (Chips Act) (OJ L 229, 18.9.2023, p. 1), in particular on international cooperation and the mapping and monitoring of the supply and value chains;
- to support the envisioned activities of the European Economic Security Strategy as they pertain to semiconductors and semiconductor technologies.

In particular, it should contribute to informing and strengthening the Union's investment and export control frameworks and its coordination with strategic partners, especially in the context of the risk assessment and other proposals emanating from the European Economic Security Package.

Item PP 01 25 01 — Pilot project — Evaluation of drought monitoring and natural restoration of soils and groundwater

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 000 000	500 000			1 000 000	250 000

Remarks:

The aim of this pilot project is to:

- Study and establish procedures for monitoring and controlling the consequences of drought on soil productivity, measures for natural restoration, and mitigation of these effects.
- The project will compare existing experiences, experimentally apply different methods in (at least) three different case studies and develop a best practice guide to be made available to Member States.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 01 25 02 — Pilot project — HAB-Hub: Near Real-Time Monitoring System for Harmful Algal Blooms in European Waters

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 750 000	850 000			1 750 000	437 500

Remarks:

This project aims to develop a system, which integrates existing European datasets and services and allows for near-real time prediction and monitoring of harmful algal blooms (HABs) in aquatic environments.

Data management module and a distributed computing network allow for efficient data processing, ensuring automatic integration of relevant data from existing databases (e.g. EEA, EMODnet) and services (e.g. CMEMS, C3S). Furthermore, the system will allow for assimilation of in-situ measurements.

Data analysis, prediction module and anomaly detection algorithms coupled with machine learning solutions enable near real-time detection of HABs occurrence and rapid prediction of their spatial and temporal evolution.

Additional R&D efforts could target innovative HAB data collection and monitoring solutions. AI-based tools enable identification of regions with high predictions uncertainty, which should be prioritized for monitoring. Incorporation of unmanned vehicles and sensors within the system supports the prediction process and validation by providing high-resolution imagery and high frequency in situ measurements, respectively.

An expected Technology Readiness Level 4 (TRL 4) of the system will be assessed by demonstrating the predictive and analytic capabilities of the system in retrospective mode. Afterwards, the system's performance will be tested during a 6 month period in relevant environment in selected regions within Members State, aiming for TRL 6.

Legal basis:

Item PP 02 25 01 — Pilot project — Bring sustainable transport up to speed with hyperloop

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				3 000 000	1 500 000			3 000 000	750 000

Remarks:

Hyperloop currently is the only potential transport mode under development allowing to transport passengers and goods with low energy usage and without any pollution (i.e. GHG emissions and noise). In order for the trans-European transport network to keep up with innovative technological developments and deployments, sustainable emerging technologies that enhance and ease the transport and mobility of passengers and freight should be encouraged. At various test sites the technical feasibility has been largely demonstrated. The next step is to show that the technology is suitable to guarantee a high safety standard and comfort for passengers, which is crucial to ensure public acceptance and to address future transportation needs.

The EU has already made substantial investments in hyperloop R&D, but now we enter the next phase of developing safety standards for which there is no specific mandate yet nor any experience. This could be the final hurdle before actual deployment becomes possible. Therefore, the specific objective of this pilot project is to demonstrate that passengers can be safely transported and evacuated in case of incidents through further research and testing, which in turn can contribute to the development of EU safety standards. This way lessons can be learned, which could contribute to the development of concrete EU safety standards. In turn, this has the potential to create the basis for a new European transport mode.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 02 25 02 — Pilot project — Creation of a comprehensive dynamic digital timetable for rail services in the Union

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				750 000	375 000			750 000	187 500

Remarks:

There exists no comprehensive, digitised and dynamic timetable for rail journeys across the EU. This pilot project should conduct a feasibility study to assess whether and how such a system could be established and made public. Cross-border rail travel in particular is at times difficult to navigate, with problems surrounding ticketing and information besides others, such as scheduling coordination.

Today each Infrastructure Manager defines its timetable including cross-border routes and this info is available to the public, but it is generally neither provided on an interoperable and standardised way nor compiled. There is no centralised online availability of such aggregated information, which limits the rail sector integration. Overcoming also past reluctance to share data, thus gradually advancing towards a permanent dynamic system in terms of timetables and real-time train running and train forecast information, ticket fares etc., would be a relevant solution to practically enable the culmination of the Single European Railway Area, to the benefit of all the stakeholders and most importantly of passengers. In order to ensure the integration of data at EU level from National Access Points (NAPs) established by Member States under Commission Delegated Regulation (EU) 2017/1926 ('MMTIS Regulation') and ensure its quality for cross-border services in particular, the PP should look at synergies with existing projects and should allow for the re-use of information from existing systems established at sector level. To that end, there should be a transition from fee based sector databases to a publicly available database.

Hence, in order to create a tool for passengers and operators alike, such a system should be established by the European Commission, with appropriate support from the European Union Agency for Railways (ERA) . Ultimately, it would also help with digital platforms aiming to provide prospective travellers with information on most direct routes, timing and so on. Eventually, pricing could be also added by these operators and platforms, as well as further elements within the logic of multimodal digital mobility services, once this common digital dynamic timetable is put in place.

Having such real-time information on train running and train forecast in a comprehensive and integrated manner with planned timetable information is therefore an enabler of all these services of high added value for passengers, as well as operators and infrastructure managers themselves, hence helping with efforts to promote multimodal travel in line with the European Commission's Sustainable and Smart Mobility Strategy.

The Pilot Project should build on the efficient implementation of already existing legal obligations under MMTIS Regulation and the TSIs for telematics applications under the Rail Interoperability Directive (EU) 2016/797. Furthermore, it should provide for an appropriate mechanism for future maintenance ensuring a robust and resilient system.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 02 25 03 — Pilot project — Empowering Truck Drivers - Revolutionizing European Logistics

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				600 000	300 000			600 000	150 000

Remarks:

Context/Problem:

There are 3 million truck drivers in Europe, moving 75% Europe's total freight volume carried by land. Despite multiple European regulations to improve industry standards and working conditions, including remuneration, the sector is not able to attract more professionals and it faces a critical shortage of truck drivers. With 380,000-425,000 unfilled positions in 2021 and an aging workforce, this shortage is projected to reach 745,000 by 2028. This shortage is attributed to difficult working conditions, long periods spent away from home, long waiting times at loading/unloading points, poor quality of parking areas, lack of resting facilities, no access or low quality of sanitary facilities on the road and at loading/unloading sites, and a negative industry image. In addition to this, the lack of professional recognition and respect to professional drivers combined with the weak career development opportunities and lack of support discourages young people (only 7% of truckers) and women (only 3,2% of trucker's population) from entering the sector. Current regulatory and soft measures to improve working conditions and address the shortage have proven insufficient, necessitating an innovative approach. Truck drivers can themselves contribute to improving their working conditions and job attractiveness if they are empowered to do so and are provided with the right tool.

Solution:

The project aims to provide such empowering tool to truck drivers, in the form of a mobile app in which drivers would rate important points on their route, places where they do other work than driving, where they use various services or take a rest. The aim of creating such an app is to improve the working conditions and public perception of the trucking profession by leveraging driver feedback to rate and rank points of interest along trucking routes. To achieve this the app should be designed to incentivize positive change within the industry.

The rating could cover at least the following categories: (i) waiting time, (ii) accessibility and cleanliness of toilets for truckers, (iii) availability and cleanliness of showers for truckers, (iv) availability of parking for trucks, (v) staff friendliness, (vi) facilities for female truckers.

The app targets three user groups:

- professional drivers - the primary users who register, provide ratings, and access detailed information of various points of interest (PoIs);
- administrators of (PoIs) – those who manage PoI profiles, update information (e.g., opening hours, type of facilities, site maps, internal rules), and address negative feedback to improve their ranking;
- other users – such as warehouse workers, dispatchers, and other industry stakeholders who can access general information and comment on ratings.

The app should have a user-friendly interface, including simple design, large icons, and multi-language support to cater to a diverse driver population. Rating system should be based on clear criteria with visual aids (e.g., sliders, icons) to facilitate quick and intuitive assessments. The app should integrate geolocation based on GPS data to suggest and verify PoI locations, simplifying the rating process. The app should also allow drivers to provide detailed feedback by adding written comments and uploading photos to illustrate their ratings. The app should enable future integration with telematics providers to optimize routes and enhance communication between drivers and PoI administrators. PoI profiles should be visible to drivers and industry stakeholders, displaying ratings and driver-generated content. High-ranked PoIs should benefit from increased visibility and potential economic advantages, creating a powerful motivation for businesses to improve their practices and attract more drivers.

Justification for funding:

The project requires an estimated €600,000 for development, maintenance and promotion offering significant return on investment by addressing a critical industry challenge. The basic version of the app could be developed, tested and deployed within 12 months.

The project presents a timely, impactful, and cost-effective solution. By empowering drivers and promoting transparency, this project has the potential to transform the road transport sector and ensure its sustainability.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 02 25 04 — Pilot project — European Trusted Drone label

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				800 000	400 000			800 000	200 000

Remarks:

Objective of this pilot action is twofold:

- 1) Define criteria for a voluntary 'European Trusted Drone' label, which would contribute to the secure use of drones and promote the EU drone industry.
- 2) Assessment of options to set up a labelling scheme in the EU.

Both the criteria and the scheme would need to be done in close collaboration with the relevant industry and authority stakeholders. The criteria should meet cybersecurity expectations of authorities, be achievable for drone manufactures and the drones reasonably affordable for the buyers. The scheme should be voluntary and not introduce unnecessary costs for the industry or public authorities.

Depending on the outcome of the project, follow up action could be considered to support setting up such labelling scheme.

Legal basis:

Remarks:**Legal basis:****Reference acts:****Item PP 03 25 01 — Pilot project — Digital Services Act Enforcement ChatBot for users**

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				200 000	100 000			200 000	50 000

Remarks:

In order to operationalise the power of the Digital Services Act, a single interface, in the form of a chatbot, will give users the power to understand their rights and obligations, as well the best methodology to communicate with and, where necessary, report intermediaries, as well as to retrieve information from the various transparency databases created by the DSA. It would also serve as a valuable tool for collecting data, to allow disinformation campaigns to be identified and neutralised more quickly.

Like many other parts of the EU Acquis, the Digital Services Act provides comprehensive rights to users, such as individuals and businesses. The DSA accords these rights in relation to online intermediaries in general, with additional obligations for very large online platforms and search engines (VLOPs and VLOSEs). These rights include the right to report third-party content, to receive a statement of reasons when restrictions are imposed on their own content, as well as a right to be protected from systemic risks caused by VLOPs and VLOSEs.

The fight against disinformation, where the content is usually not usually illegal, is particularly challenging. Recipients of the service need support in understanding what should be reported and how. Policy-makers and regulators need data quickly on trends, such as voter suppression during election periods or failures of content moderation in particular languages.

An AI-powered chatbot would help:

- 1- users assess if the content s/he is reporting is a breach of the intermediary's rules or EU law;
- 2- users to formulate a complaint about breaches of the law or terms of service in a way that is most understandable for the intermediary;
- 3- users to escalate their complaint if the intermediary's response is not satisfactory.

For NGOs in the anti-disinformation community and regulators, data would be generated on:

- 4- how many complaints were made;
- 5- how quickly they were actioned;
- 6- patterns that could help identify foreign and/or coordinated campaigns;
- 7- particular types of campaigns, such as voter suppression.

As a pilot project, this would serve as a basis to expand knowledge and application of the real benefits EU legislation for people in the EU, in relation to this one instrument. In a second stage, the model could be expanded to cover unfair contract terms, distance selling rules, the right to repair and so on.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No

1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 03 25 02 — Pilot project — Mapping underground reservoirs of natural hydrogen in Europe and developing the necessary legislation for sustainable production in the framework of the EU's Climate Law, the EU strategy on energy system integration and the European Economic Security Strategy and European Energy Sovereignty

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				3 000 000	1 500 000			3 000 000	750 000

Remarks:

Natural Hydrogen (or also "WHITE or GEOLOGICAL" hydrogen) is a valuable clean energy resource naturally occurring in underground reservoirs. Unlike any other category of Hydrogen currently on the market, natural hydrogen require very limited energy to be produced and could be sustainably extracted from the ground.

It is produced 24/7, requires no storage and it has a production cost in the range of EUR 0.5-1 which would make it the most competitive hydrogen in the market. It has the lowest footprint of any source of hydrogen and no fresh water is required. Natural Hydrogen can revolutionise the clean energy transition. There are over 1 million tonnes of recoverable volume just in one single structure found in Aragón, Northern Spain that would satisfy 10% of Spain's current usage for 20+ years.

In terms of regulatory framework, only France, since 2022 and Poland, since October 2023 has legislation in place for natural hydrogen in Europe with Spain working on it at the moment. Mali, Australia and the USA are leading the development of natural hydrogen projects worldwide with a milestone, USD 91m invested by Bill Gates in the company Koloma to drill for carbon-free hydrogen that is continuously generated underground.

Most energy agencies worldwide now recognised the importance of natural hydrogen and its potential role in the future energy mix. The Internatioanal Energy Agency (IEA) is currently working on a TID (Task In Definition) in natural hydrogen to accelerate its development. The IAE's latest report related to hydrogen production published in 2023 (Global Hydrogen Review, September 2023) included for the first time natural hydrogen. It acknowledges two projects in Europe.

In the USA, the Advanced Research Projects Agency–Energy (ARPA-E) has financed with USD 20m two Initiatives focused on Low-Cost, Low-Greenhouse Gas Emissions Hydrogen Production.

The natural hydrogen economy is opening new sustainable commercial opportunities for the traditional oil and gas companies aiming to decarbonise their portfolio of projects and shift to new sustainable projects. Natural hydrogen should be part of the energy mix, replicating and scaling up successful business models and methodology in the European Union, accelerating the development of interregional investments, and reinforcing cohesion.

Natural hydrogen will contribute to innovation in rural and remote areas where the reservoirs of natural hydrogen are placed, building and putting new industrial and economic ecosystems in the European Union that are non-existent at the moment and reinforcing repopulation with high skills professionals.

Natural hydrogen can revolutionise the transition to clean energy. The earth continuously generates hydrogen and can form significant subsurface accumulations as a natural process without consuming fresh water. Consequently, natural hydrogen has the lowest carbon footprint, with 50 times lower CO2 than grey hydrogen, which currently provides over 95% of the world's natural hydrogen and can complement the low-carbon industrial production of hydrogen and contribute to securing the energy supply and avoiding the supply's intermittency.

Its potential is already scientifically demonstrated with limited commercial demonstrations existing in Mali, and Australia. The European public support is needed to define an appropriate regulatory framework in the European Union, identified resources and implement pilots in European countries where substantial resources occur. There is a need to determine how natural hydrogen existing in the European Union could contribute to the European Hydrogen Strategy and European energy mix.

Furthermore, developing a natural hydrogen economy will empower a new generation of high skilled professionals wholly aligned with the European Commission’s Green Skills Programme (European Climate Pact), where climate action is already providing the jobs and opportunities of the future. A natural hydrogen-based economy in Europe will contribute to the generation of highly skilled employment and the transformation of the oil and gas industry workforce to a new generation of Green Deal workforce.

Europe is considered a promising continent for discovering natural hydrogen deposits. Natural hydrogen reservoirs have been identified for instance in Spain, France, Poland, Hungary, Germany, Ukraine or Albania. A recent research targeting various countries worldwide suggests the presence of multiple viable plays and cost-effective exploitable production sites available within several European countries (see below ‘natural hydrogen in Europe’).

The development and utilisation of natural hydrogen reserves present a unique opportunity to accelerate the energy transition and hydrogen supply supporting Europe’s sovereignty and security.

By capitalising on the estimated abundance of natural hydrogen within Europe’s geological formations, the European Union could enhance its energy security, reduce emissions, and pave the way for a cleaner and more sustainable future for European citizens and industry.

For the regions with natural hydrogen locations, the accessibility to very competitive hydrogen will accelerate the attraction of new industrial investment with greenfield projects. Therefore, its proper identification/mapping and production at a commercial scale will be an excellent opportunity to develop an innovative European ecosystem involving multiple regions where natural hydrogen is located and where the gas industry and research are relevant.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 03 25 03 — Pilot project — Net-Zero AI4Permitting

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				5 000 000	2 500 000			5 000 000	1 250 000

Remarks:

This pilot project will provide financial support to public authorities, primarily local authorities, introducing AI-based systems, or exceptionally systems based on other digital technologies, to manage the new requirements for streamlined permitting under the Net-Zero Industry Act. The support will consist of both direct financial support and mutual learning by involved authorities to manage the back-end work needed for permitting. There will be a particular focus on Net-Zero Acceleration Valleys in coal regions in transition and environmental aspects of permits. Where possible, and only as a secondary objective subordinate to the main objective of providing financial support to public authorities, the Commission may explore how it can best facilitate local authorities in introducing digital tools to streamline permitting.

				2 000 000	1 000 000			2 000 000	500 000

Remarks:

Geospatial and location information are crucial for informed social, economic, and environmental decision-making. There is a set of core reference geospatial data from official sources which are primary datasets. These cannot be derived from other datasets and are important because they support information across all themes and domains. The European Strategy for Data and the Common European Data Spaces are forming an interconnected single market for data, and all the sectorial data spaces being developed, (example: health, environment, agriculture, energy, transport, security, emergency services, the SDGs), need to be underpinned by core geospatial data.

Member States, through their national mapping, cadastral and land registry authorities, are mandated to collect and maintain trusted and accurate national core reference geospatial information. This is crucial for developing tools and services to support public policies, common data spaces and the digital transition in Europe. Coordinating relevant policies is key to delivering core geospatial data at European level. Seamless, harmonised, compatible and interoperable datasets are an effective use and reuse of public sector information for the benefit of the Union and its citizens.

Although geospatial and location information are crucial for a wide range of policies, including the EU's Digital Decade and Green Deal, the management of geospatial, especially core reference geospatial data, is fragmented and scattered across various directives, rules and regulations. These include INSPIRE, Open Data and PSI Directive, Green Deal package, and the new GreenData4All initiative. As well as across various Directorates-General and Agencies, such as DG-Environment, DG-Connect, EEA, and Eurostat.

This fragmentation and lack of a single body within the Commission responsible for geospatial policy and data, causes challenges and obstacles, preventing the Union and its citizens from maximising the benefits from geospatial data collected from official sources.

To address these issues, this project proposes a study that would analyse and recommend how the Commission can ensure an effective and harmonised policy for core reference geospatial information from official sources across the Union.

The main directions of this study are:

- Research the existing (and planned) policy frameworks, directives, rules and regulations which impact/include core reference geospatial data from official sources;
- Conduct a study amongst the well-established community of national (public sector) producers of core reference geospatial data, to understand the gaps in existing European legislation that currently fails to effectively address core geospatial data from official sources;
- Highlight the challenges, barriers and obstacles in current policies that are blocking effective and harmonised management of geospatial information from official sources across the Union;
- Clearly demonstrate the benefits of a harmonised geospatial policy framework for core reference geospatial information, and how this links with the Europe’s digital future;
- Road map towards developing comprehensive governance for core geospatial data from official sources.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 04 25 02 — Pilot project — EU Space Data integration to support fisheries control

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				2 000 000	1 000 000			2 000 000	500 000

Remarks:

Fisheries control operations are implemented by the Member States (MS) with the support of DG-MARE and EFCA, the EU Fisheries Control Agency. DG-DEFIS together with EUSPA (the EU Agency for the Space Programme) is analysing the use cases where EU Space Data can contribute to fisheries control activities, under the umbrella of a memorandum of understanding with EFCA.

Two main use cases have been identified:

- Use of Galileo and Copernicus services for fishing vessels monitoring. Positions reported by vessels will be authenticated with data provided by Galileo data. Copernicus images will be used to verify the data in the area and time of coverage.
- Use of Galileo and Copernicus services for patrolling Unmanned Aerial Systems (UAS or drones).
- Images taken by drones will be stamped with time and position authenticated using Galileo data. Copernicus and Galileo services will be used to support the safety case for the drones operations.

The project shall be focused on:

- Attendance to existing working groups addressing solutions for fishing vessels and drones, including different public/private platforms and interviewing key industrial stakeholders, such as drone operators, fishing vessels associations, and relevant Maritime and Aviation authorities for search and rescue;
- Consolidation of the user requirements and definition of equipment for fishing vessels and patrolling drones.
- Consolidation of concept of operations and positioning performance and authentication needs for fisheries control.

- Identification of main challenges to be overcome to ensure safe operation and resilient positioning.
- Identification and analysis of the technical and regulatory barriers (e.g. lack of standards and regulation), industry value chain and new business models that could emerge.
- Identification of the possible actions at Member State, regional and local level to boost business development, and support SMEs to deliver EU Space based solutions to provide solutions for EU fishing fleet.
- Prototyping of onboard equipment that uses Galileo signals to address the main needs not covered so far by existing equipment, with focus on the use of Galileo authentication services.
- Implementation of several demonstrations for fishing vessels and patrolling drones, involving different Member States. The aim is to demonstrate feasibility and added value for the sector, validating the operational concept with the participation of Aviation and Maritime users and competent authorities from different countries. The drones and vessels in the demonstration shall use Galileo authentication service and the specific messages encoded.
- Contribution to draft new standards defining 1) minimum operational requirements for GNSS and VMS position information in fishing vessels and 2) the necessary tests required to verify the performance compliance in support of future regulatory initiatives in Europe.

Legal basis:

Item PP 05 25 01 — Pilot project — Establishment of cross-border coordination points to facilitate cross-border solutions to administrative and legal barriers

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				4 000 000	2 000 000			4 000 000	1 000 000

Remarks:

The European Commission has issued in December 2023 a revised proposal for a Regulation on Facilitating Cross-border Solutions (COM(2023) 790 final; 2018/0198 (COD)). Negotiations on this proposal are ongoing. The proposal sets out a procedure to facilitate the resolution of cross-border obstacles hampering the establishment or functioning of infrastructure necessary for private or public activities, or any cross-border public service provided that it contributes to economic, social and territorial cohesion in the cross-border territory.

Pursuant to the text of the proposal for a Regulation, Member States shall establish one or more cross-border coordination points at national or regional level, or jointly with a neighbouring country (or countries). This pilot project proposes to make available a sufficient amount of funds from the EU budget allowing willing Member States to establish cross-border coordination points at national or regional level, or jointly with one or more neighbouring Member States. Depending on the outcome or on the status of negotiations on the proposal for a Regulation, the pilot project could also be used by Member States to finance the creation or maintaining of other coordination structures facilitating cross-border solutions to administrative or legal barriers, in synergy with existing initiatives at EU or national level, such as ‘b-solutions’.

By channelling resources from the EU budget to Member States willingly deciding to establish cross-border coordination points or other structures, a fourfold objective could be achieved:

- Regardless of the outcome of negotiations on the proposal for a Regulation, the pilot project could support Member States in setting up cross-border coordination points or other coordination structures, with a view to bolster the provision of this new type of joint service to initiators. In turn, this would facilitate cross border understanding and enhance cooperation to resolve cross border obstacles;
- In the event of final adoption of the abovementioned proposal for a Regulation, the pilot project would ensure the inflow of funds to Member States willingly deciding to implement parts of the proposal for a Regulation pending its entry into force, or pending the entry into force of some of its provisions;
- in light of the previous indent, this pilot project could provide a reliable estimation of the amount of financing needed for the correct implementation of the proposal for a Regulation, and possibly guide the Commission and the co-legislators on the earmarking of sufficient funds when outlining and negotiating the new Multiannual Financial Framework.
- Last, and should the proposal for a Regulation be adopted and enter into force, this pilot project would decrease administrative burden for public authorities at regional or Member State level, in particular as regards the establishment of cross-border coordination points, or the obligation for Member States to store all cross-border files received in a public register.

The tasks of the cross-border coordination points established on a voluntary basis by Member States wishing to draw resources from this pilot project would fall within the meaning of paragraphs 1, 2, and 4 of Article 5 of the Proposal for a Regulation. In addition, the Member States involved could agree to empower the cross-border coordination point or points to use jointly the cross-border facilitation tool, and namely to start a consultation with competent authorities in the Member State(s) involved when a cross-border obstacle is notified, or to explore the resort of other EU initiatives such as ‘b-solutions’.

Legal basis:

Item PP 07 25 01 — Pilot project — Advancing social cohesion in the face of polarized public discourse?

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				800 000	400 000			800 000	200 000

Remarks:

Expected Outcome:

Is democracy in the age of distrust and polarisation sustainable? The rise of hate speech, misinformation and filter bubbles are sowing the seed of discontent and social exclusion. The dynamics seems very much an avalanche impossible to stop, with small but vocal fringe groups injecting extreme views in the public discourse. For this reason, a better prevention and monitoring of extreme online political discourse should be welcomed, while preserving the freedom of speech. This can be done by mapping the current public opinion discourse on social media around salient political issues. By checking the language elected representatives use, we could map the political discourse landscape and see what the most polarising terms and issues are. Using sentiment analysis, we could test whether the language used by elected representatives provokes or attacks other representatives and monitor the extent of smearing campaign in the EP and selected national parliaments. Drawing from that, several EU language versions can be drafted and adapted, so to cover a sample of EU27 Member States, perhaps those with larger recorded polarisation.

Scope:

1. Create the machine learning model. APOLLO: Analysis of Political Opinion Language by Learning Online.
2. Train the model in languages different from English (up to 5)
3. Plan a thorough web scrape of main social media (YT comments, X, Instagram, Facebook, TikTok, etc), paying for the scraping when necessary.
4. Run an online survey to collect respondents and identify their political preferences and whether they follow some politicians/public figures on social media, and find those who engage on social media the most. Potentially, field the survey on relevant subReddits dealing with European politics. Reddit could give an interesting insight on fringe communities too, identifying ‘superspreaders’ of misinformation.
5. Under GDPR rules, scrape elected representatives’ activity (always anonymised) on social media, as well as comments and replies. On hot topics, scraping comments and replies under established media (e.g. The Irish Times, Politico, Il Corriere, Le Monde, etc.)
6. By merging the two datasets, finding correlations between political language, politicians followed and feeling of social exclusion, controlling for socioeconomic variables such as economic and job insecurity.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 07 25 02 — Pilot project — Preparatory work for counselling structures to support mobile migrant labour

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 200 000	600 000			1 200 000	300 000

Remarks:

Mobile migrant labour has become a structural segment of the national labour markets in all EU Member States. It is expected that this phenomenon will continue to grow. Against the background of skills and labour shortages and targeted recruitment policies, there is evidence that also the mobility of third-country nationals working temporarily in the EU will increase. Often active in essential sectors, mobile migrant workers are key to the proper functioning of the EU internal market. At the same time, however, workers who are posted or take up employment for a short period of time, represent a very vulnerable group of workers and their situation is often precarious. In view of the complexity of transnational labour situations and due to a lack of language skills and knowledge of applicable rules, it is not easy for these workers to enjoy and defend their rights on their own. Precarious working conditions and structural labour exploitation prevent integration into the labour market, undermine future recruitment efforts and fair competition. The European Labour Authority has launched a variety of measures and campaigns to draw attention to particularly affected sectors and employment groups, such as seasonal workers, professional drivers and the growing group of posted third-country nationals. However, the ELA cannot offer individualised support for these target groups. Trade-union related transnational counselling and support structures targeting mobile migrant labour can therefore make an important contribution to the promotion of fair labour mobility and migration as enshrined in the European Union's social acquis and confirmed in the 2024 interinstitutional La Hulpe Declaration on the future of the European Pillar of Social Rights. Transnational counselling services not only give individual help to workers, but also provide important insights into the situation of mobile migrant labour in risk sectors, developments in the European labour market and new forms of employment and mobility patterns. Moreover, individual information and counselling of workers are important complements to enforcement activities, such as labour inspections.

The subject of the PP is a scientific research on the situation of mobile migrant labour and the impact of assisting counselling structures on these target groups. Special focus should be placed on risk sectors such as international road transport, seasonal work in horeca and agriculture, the construction sector and the increasing group of posted third-country nationals. A key element of the study should be the monitoring and evaluation of existing counselling structures in countries of origin and countries of destination. In order to ensure the representativeness of the monitoring and allow for the evaluation to formulate operational recommendations, a significant part of the PP will be to run a trade union-related transnational counselling network (at least 7 countries in the first year, to be gradually expanded). The network should also include 1-3 candidate countries or other third countries within Europe such as Bosnia-Herzegovina, Albania or Kosovo. Main target groups of the counselling are short-term mobile migrant workers. The counselling centres should be supported in their development, counselling work and transnational networking through coordination. The establishment of new counselling centres is to be supported by targeted capacity building measures.

The scientific study should include country-specific research and interviews with experts at national and European level on the situation of mobile migrant labour in risk sectors and of posted third-country nationals. As part of the research existing counselling services for the target groups should be identified and (sector-specific) needs for counselling and support determined. Regular exchange with the ELA and representatives of the affected sectors will take place throughout the duration of the PP.

The outcome of the PP will provide an analysis of the situation and challenges experienced by mobile migrant labour in risk sectors and posted third-country nationals in the European labour market, to be concretely addressed in parallel through the practical implementation and expansion of a transnational counselling

network. In addition, an evaluation of the existing counselling services for the target groups and a mapping of the (sector-specific) needs for counselling services will be developed. Based on the findings of the study, recommendations will be formulated for the preparation of a dedicated initiative for the long-term funding and establishment of a European counselling network for mobile migrant labour. The results of the PP will be presented and discussed at a final conference at European level. In order to continuously benefit from the results of the PP, interim results will be presented and discussed at a mid-project conference.

Legal basis:

Pilot project within the meaning of Article 58(2) of Regulation (EU, Euratom) 2018/1046 of the European Parliament and of the Council of 18 July 2018 on the financial rules applicable to the general budget of the Union, amending Regulations (EU) No 1296/2013, (EU) No 1301/2013, (EU) No 1303/2013, (EU) No 1304/2013, (EU) No 1309/2013, (EU) No 1316/2013, (EU) No 223/2014, (EU) No 283/2014, and Decision No 541/2014/EU and repealing Regulation (EU, Euratom) No 966/2012 (OJ L 193, 30.7.2018, p. 1).

Item PP 07 25 03 — Pilot project — Productivity, employment, and wages in the age of artificial intelligence (AI) - methodologies and impacts

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 500 000	750 000			1 500 000	375 000

Remarks:

Objective: The project seeks to analyse the potential impact of AI on European labour markets and compare the implications of exposure to AI for different labour market groups. It also seeks to develop a new measure of occupational exposure to AI that takes into account whether occupations are likely to be replaced (automated) or complemented by AI. This measure will be used to compare the implications of AI for different regions, sectors and Member States. Furthermore, it will also be used to study the potential impact of AI on job quality, wages and productivity.

The project will contribute to existing knowledge by developing a novel taxonomy for analysing the potential impacts of AI on labour markets and economies as a whole. Currently, most of the analyses on the impact of AI focus on the United States or subsets of selected countries while comparative EU research is currently missing. Therefore, the project will seek to fill this gap by developing indicators for comparing the impacts of AI across the EU27. Special emphasis will be placed on reproducibility and transferability of the methodology to other potential areas of interest such as greening of occupations. As AI is a rapidly growing technology, the project will also seek to ensure that the indicators can be easily reproduced and updated when new data are released. This would provide a valuable resource for policymakers both at the national and supranational levels.

The rise of Artificial Intelligence is one of the most important developments of recent decades with the current policy and academic literature predicting that AI will trigger profound changes in working lives. Therefore, having up-to-date evidence on the labour market impacts of AI technologies is of core importance for effective policy making. The analysis will also feed into European and national policy debates maximising potential gains stemming from the AI revolution while also limiting potential negative impacts for workers and economies.

Scope/Research questions:

Which regions, sectors and Member States are more likely to be exposed to AI?

What are the impacts of AI on the employment opportunities of different labour market subgroups? Which occupations will be automated, and which will be complemented by AI?

What are the potential impacts of AI on working conditions?

What are the potential effects of AI on wages and wage inequality in the EU?

How does exposure to AI affect labour market transitions?

What is the expected impact of AI on labour productivity?

What policies are necessary to address the impacts of AI in terms of inequalities, skills and job quality?

Overall policy relevance

More broadly, AI and especially large language models (LLMs) are fast evolving technologies and will impact large swathes of the European labour markets. Currently, more than 70% of EU employment is in the service sector, which is the sector most likely to be impacted by the advent of LLMs. Therefore, understanding both the individual and the structural implications of these new technologies is of key importance for ensuring a fair and inclusive European economy.

Added value for wider research community

The project will deliver a novel comparable methodology and taxonomy of exposure to AI that will be made available to the broader policy and academic community. It will also provide new evidence on the potential impact of AI which will inform current and future debates. Aggregate quantitative indicators on exposure to AI based on national and supranational data sources will be made available to the broader research community. Data from the qualitative and experimental analyses will also be made available through case studies and methodological reports.

Project results are expected to contribute to the following expected outcomes:

- Develop a novel taxonomy of AI exposure that is adapted to the EU27 labour market and allows for comparisons across regions; sectors and Member States;
- Provide an updated analysis of AI on occupations including an analysis of different labour market subgroups;
- Update existing methodologies that analyse the impacts of AI and publish reproducible analyses and source code;
- Provide an analysis of the expected impacts of AI in terms of inequality and productivity;

Expected impact:

The project will generate novel high-quality knowledge which will be used to inform ongoing policy debates on the impact of AI on European societies. It will also foster the diffusion of knowledge by developing new methodologies, using new techniques for studying AI and publishing open-source code.

Methodology:

The project will rely on a mixed method approach that will leverage information from European datasets (EU-LFS, EWCS, AMECO) as well as national sources. The latter could allow for a finer grained (firm-level) analysis of potential impacts of AI. The starting point of the empirical analysis will be to develop a new taxonomy for occupations that can be impacted by AI using (O*NET data) in conjunction with novel approaches that distinguish between jobs at risk of being automated or complemented by AI. The measure of exposure to AI will combine current approaches in the literature that use the O*NET database to measure the correspondence between AI and human skills with information on the social content of and skills required in occupations. This will contribute to a more fine-grained understanding of the potential impact of AI on the labour market. In addition, the analysis will be complemented by case studies focusing on the impact of selected AI technologies on job quality and productivity. The project will also use online experiments to isolate the potential productivity effects brought about by the use of different AI technologies.

Outline of timeline:

The total project duration will be 3 years and will be divided in 3 work packages. The first will focus on developing the exposure measure and on the comparison between different groups of interest. Given the importance of this aspect of the project, it is expected that the analysis will be updated on a regular basis throughout the lifetime of the project.

The second work package will consist of fieldwork done at the company level, which will commence 6 months into the project. Given the difficulty of securing company case studies and running the fieldwork, this part of the project is expected to last 1.5 years.

Finally, the third work package will focus on gathering evidence on the impacts of AI on productivity through experimental approaches. This work package is expected to commence at the end of the first year and have a total duration of 1 year.

Item PP 08 25 01 — Pilot project — EU observatory for agricultural land, control and access to farmland

Draft budget 2025		Council's position 2025		EP's position 2025		Revised Draft Budget 2025		Conciliation 2025	
Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments	Commitments	Payments
				1 000 000	500 000			1 000 000	250 000

Remarks:

The objective of the Observatory is to support the monitoring of large-scale land deals, or 'land grabbing', in the EU. It should aim to:

- Quantify the transfer of farms and arable land to large economic groups and investment funds
- Characterize the distribution of property in Europe,
- Study the access to arable land for young farmers, and examine the impact of ownership by third parties in the land tenure system of each member state
- Study of protection measures for small and medium agriculture and land tenure systems of each member state.
- Study the use of tools such as 'Tenure Guidelines' to aid policy-making.
