Subject:	Proposal for a Regulation of the European Parliament and of the Council laying down harmonised conditions for the marketing of construction products, amending Regulation (EU) 2019/1020 and repealing Regulation (EU) 305/2011 - Preparation for the trilogue

I. INTRODUCTION

1. On 30 March 2022, the Commission adopted a proposal for a Regulation of the European Parliament and of the Council laying down harmonised conditions for the marketing of construction products, amending Regulation (EU) 2019/1020 and repealing Regulation (EU) 305/2011.
2. The Proposal is based on Articles 114 of the Treaty on the Functioning of the European Union (TFEU) and aims at laying down EU harmonised rules for the making available on the market of construction products, fulfilling the objectives of the Green Deal and enhance the Competitiveness of the European industry through the setting of clear rules and improving enforcement and market surveillance.

3. On 21 April 2022, the European Parliament's Committee on Internal Market and Consumer Protection (IMCO) appointed Mr Christian Doleschal (EPP, DE) as rapporteur for the proposal. The Committee on Industry, Research and Energy (ITRE) and the Committee on the Environment, Public Health and Food Safety (ENVI) of the European Parliament are both committees for opinion on the proposal. The IMCO Committee voted on its final report, as well as the decision to enter into interinstitutional negotiations, on 23 May 2023. The Plenary endorsed that decision on 11 July 2023.
4. The European Economic and Social Committee gave an opinion on the proposal on 27 October 2022.
5. The Working Party on Technical Harmonisation (Construction Products) started the examination of the Proposal on 20 May 2022 under the French Presidency. Since then, 27 additional Working Party meetings have taken place under the French, Czech, Swedish and Spanish presidencies. The Permanent Representatives Committee adopted the Council's original mandate on 30 June 2023.
6. The work at Working Party level focused on the improvement of the clarity and structure of the proposal, the right balance between delegated acts and implementing acts with regards to Commission's empowerments, and balanced solutions to the existing shortcomings in the implementation of the current Construction Products Regulation. Particular attention was also paid to ensure consistency with the Ecodesign Regulation (Ecodesign for Sustainable Products Regulation), which is being examined in parallel and for which a general approach was reached on 22 May 2023.

II. INTERINSTITUTIONAL NEGOTIATIONS – STATE OF PLAY

7. The first political trilogue was held under the Spanish Presidency on 17 July 2023. The co-legislators presented their views on the main political issues and gave a broad mandate for the subsequent work at technical level. 7 technical meetings have taken place between the first and the second trilogue. The second political trilogue took place on 24 October 2023 and was successful in finding agreements on crucial parts of the proposal related to the Standardisation procedure, on environmental obligations of manufacturers in Article 22 and Annex I, while some issues like the empowerment for the Commission to amend Annex I.1 (Basic requirements for construction works) and 3D-printing had to be left pending until the third trilogue.
8. Since the second political trilogue, 8 additional meetings have taken place. A lot of work has been done at technical level as is reflected in the four-column document in the attachment. Some technical finetuning and consolidation of the text will still be necessary after the third trilogue of 13 December 2023.
9. Since the second trilogue, the Working Party on Technical Harmonisation was convened to discuss the progress in the interinstitutional technical meetings on 30 October, 14 and 30 November 2023.
10. The next political trilogue is scheduled for 13 December 2023.

III. PREPARATION FOR THE NEXT TRILOGUE

11. Following the discussion at the Working Party meeting on 14 and 30 November 2023, the Presidency has identified a set of key issues where it seems necessary to adjust the mandate in order to be able to reach an agreement with European Parliament during the third trilogue and close all main political issues in this file. These are listed below in order of the individual articles, excluding some smaller issues, like recitals and definitions (Article 3) that will require a bit more work at technical level. Discussions in the forthcoming political trialogue will be focused on the remaining political issues that were identified during negotiations at the technical level so far.

3D-PRINTING PRODUCTS

- Article 3(1) and Articles 21 and 28, Row: 124, 396-416, 504-511

Most delegations have stressed that 3D-printing is just another technology which is used in the manufacturing of construction products, that it is already covered by the existing legislative framework and therefore does not require any specific provisions in the new Construction Products Regulation. Parliament, on the other hand, has indicated that its solution on 3D-printed products is the result of a very delicate compromise and that it is very important that the issue of 3D-printing is addressed to cover a potential liability gap with this technology and make the new Construction Products Regulation futureproof. Commission has signalled its support to the Parliament's approach to 3D-printing products as a fair compromise which puts minimal additional burden on economic operators. Parliament has signalled this point as a priority for them. After presenting several iterations of the possible compromise, the Presidency has submitted a final version of the compromise to delegations during the meeting of the Working Party on Technical Harmonisation on 30 November 2023, where many delegations highlighted the need reach agreement on these issues and the proposal in general.

In the spirit of compromise, could delegations agree to inclusion of references to 3D-printing in Recital 9 as well as Articles 3 "Definitions" and 21 "Obligations of manufacturers"?

DOUBLE USE PRODUCTS

- Article 3(48) and 31, Rows 201 and 523 – 529

Parliament and Commission have argued that requiring additional marking “not for construction” of double use products is a simple and effective way to avoid confusion in the supply chains and to enable better informed choices by consumers. Council has argued throughout the negotiations that since construction products are subject to harmonised technical specifications and have to be CE marked, but products which are not intended for construction do not bare the CE marking, it is very easy for anyone to distinguish between the two.

In the spirit of compromise, Presidency proposes to show flexibility towards the idea to mark “not for construction” double use products.

EMPOWERMENT FOR COMMISSION TO AMEND ANNEX I.1 (Basic requirements for construction works)

- Article 3a(7), Row 224l:

Parliament and Commission keep insisting that such an empowerment is necessary in order to ensure a flexible standardisation procedure and the future-proof character of the legislative framework. However, many delegations have indicated that this empowerment touches upon an essential element of this draft legal act and is therefore very difficult to accept.

Presidency proposes to leave Council mandate unchanged and delete this empowerment.

– Article 78, Rows 863 - 871

This Article was less problematic for delegations throughout the discussions on this proposal as it was clear that it's not practicable to legislate in the Construction Products Regulation every detail of the future "construction products database" or "construction digital product passport system". During the discussions at the interinstitutional level, Council indicated that this is a possible area of flexibility, and that Council would be able to move closer to Parliament and Commission on this, as long as the final compromise made sense and was implementable.

In the spirit of compromise, the Presidency proposes to move closer to Parliament's position on this issue, to show flexibility towards using delegated acts in order to lay down the future functionalities, actors, procedures and requirements whilst ensuring the system works properly and all the actors have time to adapt before making its use mandatory. The Presidency also proposes to align with the provisions on Digital Product Passport in the Ecodesign proposal (Ecodesign for Sustainable Products Regulation) and to merge as much as possible the positions of both co-legislators.

GREEN PUBLIC PROCUREMENT

– Article 84, Rows 932 - 938g

Provisions on Green public procurement have been very important for the Commission as well as the Parliament and the Council. This matter was discussed on a number of occasions in the Working Party on Technical Harmonisation and in the interinstitutional setting, but it was not possible to find a mutually acceptable compromise. During the Working party on Technical Harmonisation on 30 November 2023 most delegations agreed with the Presidency's proposed way forward on this matter, namely to remove the explicit prohibition to apply green public procurement provisions to the procurement of construction works (buildings and infrastructure), to show flexibility towards the possibility of using delegated acts in this instance, to frame the empowerment for such delegated acts in a way that green public procurement provisions will be applicable to public contracts that contain products covered by the harmonised zone of the Construction Products Regulation and when contracting authorities have decided to impose environmental requirements on those products as well as to preserve Article 84(4), as long as this delegated act is kept.

In the spirit of compromise could the delegations mandate the Presidency to negotiate this Article along the lines of the Presidency compromise that was discussed during the meeting of the Working Party on Technical Harmonisation on 30 November 2023?

PENALTIES

- Article 90, Rows 965 - 985

Parliament and Commission insist more granularity is needed in the penalties provisions of the new Regulation in order to ensure level playing field for economic operators. They however also insist that their position does not imply harmonisation of penalties. Council has argued that the issue of penalties, their application and judicial control is a core national competence.

In the spirit of compromise Presidency proposes to show some flexibility to report on penalties imposed and to include as part of a non-exhaustive list particular non-compliances for which penalties need to be laid down to highlight most important non-compliances, namely deficiencies in affixing of CE marking, deficiencies in declaration of performance and conformity, deficiencies in instructions for use and safety information, deficiencies in applying the request measures in case of non-compliance or risk.

REPEAL OF REGULATION (EU) 305/2011

- Article 92, Row 990

Parliament's position on the repeal of Regulation (EU) 305/2011 differs from that of the Council and the Commission as Parliament proposes swift transition from the old legal framework to the new one and repeal of Regulation (EU) 305/2011 in 10 years after the date of entry into force. However, Council and Commission are convinced that more time is needed to ensure orderly transition and proper migration of harmonised technical specifications from the old legal framework to the new one, to avoid possible de-harmonisation of any relevant product groups or families.

In the spirit of compromise Presidency proposes to meet Parliament somewhere around half-way between the initial positions of co-legislators.

ENTRY INTO FORCE

- Article 94, Row 1003

Parliament and Commission consider it very important that the new legal framework becomes applicable as soon as possible, so that the development of new harmonised standards could immediately benefit from the new possibilities that it offers. From its side, Council has made it clear that a reasonable time to adjust national legislation is necessary, in particular to lay down penalties, and that therefore the date of application of the new Regulation needs to be delayed, while specific provisions related to the standardisation procedure could be allowed earlier application. Parliament and Commission have then argued that the opposite approach should be implemented, namely that most of the provisions should be applied immediately and only few duly-justified provisions should be applied at a later date.

In the spirit of compromise Presidency proposes to keep Council's overall approach to which provisions are allowed to be applied sooner and at the same time accept sooner application of some provisions that are important for Commission and Parliament as well as a sooner date of application at 12-18 months from the date of entry into force.

IV. CONCLUSION

12. The Permanent Representatives Committee is invited to reflect on the abovementioned questions and to express its views on possible areas of flexibility in order to reach the overall political agreement with European Parliament on this dossier during the upcoming trilogue on 13 December 2023.
13. The Permanent Representatives Committee is therefore invited:
 - to confirm the preliminary agreement reached at the technical level on the part of the text proposal, which is set out in the Annex to this note;
 - to approve the revision of the Council mandate for negotiating with the Parliament on the issues listed below.

		<u>ensuring the coherence and legal flawlessness of standards.4. Construction products standards laid down in the implementing acts referred to in Article 4(2) shall be of mandatory application for the purposes of this Regulation from 12 months after the publication of the delegated acts adopted pursuant to paragraph 9 of this Article. They may be voluntarily applied on request of the manufacturer from the date of that publication. They shall provide the methods and the criteria for assessing the performance of the products in relation to their essential characteristics. Those standards shall, where appropriate and without endangering the accuracy, reliability or stability of the results, provide methods that are less onerous than testing for assessing the performance of the products in relation to their essential characteristics, classes, threshold levels or product requirements.5. Construction products standards developed pursuant to the second sentence of Article 5(2) or the third sentence of Article 22(4)</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>shall be voluntary. Products which are in conformity with voluntary standards adopted in accordance with Article 5(2), or parts thereof, the references of which have been published in the Official Journal of the European Union shall be presumed to be in conformity with the requirements laid down in Annex I Parts C1 and C2, as specified for the respective product family or category by harmonised technical specifications adopted in accordance with the second sentence of Article 5(2), to the extent that those requirements are covered by such voluntary standards and that such coverage has been precisely stated in the respective harmonised standard. Manufacturers who comply with voluntary standards adopted in accordance with Article 22(2), or parts thereof, the references of which have been published in the Official Journal of the European Union, shall be presumed to be in conformity with the obligations set out in Article 22(2), to the extent that those obligations are covered by such standards and that such coverage has been precisely</u>

Article 93a				
1000a		<u>Working plan for transition and standardisation priorities 1. The Commission shall, not later than [6 months after entry into force], establish a working plan covering at least the following three-year period. The Commission shall be supported by an expert group composed of experts designated by the Member States and representatives of European standardisation organisations and of relevant European stakeholder organisations receiving Union financing under Regulation (EU) No 1025/2012 ('the CPR Acquis Expert Group'). The working plan referred to in the first subparagraph shall be publicly</u>		deleted Trilogue 24/10

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>available. The Commission shall renew and update the working plan for the following three-year period one year before its expiration as long as this Regulation remains applicable. If the Commission considers that it cannot achieve the goals set out in the working plan, it shall amend it accordingly without undue delay. 2. The working plan shall contain a list of product families or categories which are considered as priorities for the development of harmonised technical specifications and the issuing of standardisation requests in accordance with Article 4(2), Article 4a and Article 5 of this Regulation. This list shall be updated yearly after consultation with the CPR Acquis expert group. 3. In establishing the priorities under paragraph 2 of this Article, the Commission shall pay particular attention to the replacement of harmonised technical specifications adopted under Regulation (EU) 305/2011, the regulatory needs of Member States, safety issues related to construction works and products</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>and EU climate and circular economy goals. The Commission shall use a transparent and balanced methodology published together with the working plan.</u> <u>4. Following the establishment of the working plan, Member States shall communicate to the Commission the essential characteristics they require for the relevant construction product family or category, including the assessment methods they apply and any threshold levels or performance classes that they deem necessary, as well as other product requirements. When Member States communicate their regulatory needs to the Commission pursuant to the first subparagraph, the Commission shall integrate them in the standardisation request within 12 months. The Commission shall provide a statement of reasons where it refuses to integrate those regulatory needs.</u> <u>5. The Commission shall, once a year, report to the Member States and the European Parliament about progress in implementing the working plan, including the standardization requests issued</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>and, where appropriate, delays in implementation and its reasons. That report shall include information about the number of standards proposed by the European standardisation organisations, the average time needed for the assessment of standards by the Commission, and the ratio between standards accepted and rejected by the Commission.</u>

Annex IIIa				
1310a		<u>Annex IIIa Procedure for adopting a European Assessment Document 1. Work programme In the cases foreseen by points 1(a) and 1(b) of Annex III, after agreement with the manufacturer and the Group respectively, the organisation of TABs shall inform the Commission of the work</u>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<u>programme for drawing up the European Assessment Document and the schedule for its execution, indicating the assessment programme. This communication shall take place within three months of receipt of the request for a European Technical Assessment by a TAB, which shall initiate the procedure as laid down in points 1(a) and 1(b) of Annex III. In the case provided for by point 1(c) of Annex III, the organisation of TABs shall submit to the Commission the work programme for drawing up the European Assessment Document with the same content and within the same deadline as indicated in the previous subparagraph. The Commission shall then communicate to the organisation of TABs within 30 working days its observations on the work programme. The responsible TAB or the organisation of TABs, respectively, after having been given the opportunity to comment, shall amend the work programme accordingly. In the case foreseen in point 1(d) of Annex III, the organisation of TABs shall inform the Commission of the work</u>
