31a		<u><i>(22a) Per- and polyfluorinated alkyl substances (PFASs) are a large family of more 10 000 man-made chemicals. Since their emergence in the late 1940s, PFASs have been used in an increasingly wide range of consumer products. Exposure to the most studied PFASs has been associated with a range of adverse health effects, including thyroid disease, liver damage, obesity, diabetes and reduced response to routine vaccinations, as well as increased risk of breast, kidney and testicular cancer. Toys should not contain any per- and polyfluorinated alkyl substances (PFASs).</i></u>
