TACs APPLICABLE TO UNION FISHING VESSELS IN AREAS WHERE TACs EXIST BY SPECIES AND BY AREA

The tables in the Annexes set out the TACs and quotas (in tonnes live weight, except where otherwise specified) by stock, and, where appropriate, the conditions functionally linked thereto.

All fishing opportunities set out in the Annexes to this Regulation shall be subject to the rules set out in Regulation (EC) No 1224/2009, and in particular Articles 33 and 34 thereof.

The references to fishing zones in the Annexes are references to ICES zones, unless otherwise specified. Within each area, fish stocks are referred to according to the alphabetical order of the scientific names of the species. Only scientific names identify species for regulatory purposes.

For the purposes of this Regulation, a comparative table of scientific names and common names of the species listed in the Annexes is provided below, for ease of reference. Annexes IA to IM are part of Annex I.

- (2) Between 1 July to 31 December, during a maximum 2-week exemption period, up to a total of three hauls in which any other species for which this Regulation establishes fishing opportunities in the NAFO Convention area and other than squid comprises the largest percentage by weight of the total catch in the haul shall not be considered a directed fishery, provided that the fishing vessel carries on board a control observer, uses a mesh size no smaller than 60 mm, and complies with the NAFO notification and reporting requirements to make use of that 2-week exemption period. After each such haul, the fishing vessel shall immediately move a minimum of 10 nautical miles from any position of the previous haul throughout the subsequent haul.

However, if a fishing vessel is carrying an observer: (i) this maxima shall be 2 900 kg or 15 % of American plaice, whichever the greater; and (ii) a vessel may exceed the maxima referred to in point (i) for by-catches of American plaice retained on board during the first 9 fishing days in the NAFO Regulatory Area, provided that American plaice by-catch represents 15 % or less by the end of that period or when the vessel leaves the NAFO Regulatory Area, whichever occurs first; (b) the first two times that catches of American plaice comprise the largest percentage by weight of the total catch in a haul, such catches shall be considered as incidental catch, but the vessel shall immediately move a minimum of 10 nautical miles from any position of the previous haul throughout the subsequent haul.

Once the by-catch allowance is exhausted, the SIOFA Secretariat will notify SIOFA Contracting Parties. On receiving that notification that the by-catch allowance has been exhausted, Member States shall ensure that their vessels fishing in SIOFA subarea 2 do not retain any Portuguese dogfish for the remainder of the year. That retention prohibition shall apply to any lines in the water following the notification of the SIOFA Secretariat that the by-catch allowance has been exhausted. Vessels with lines in the water at the time that the notification is received may retain Portuguese dogfish that are dead at time of haul and shall release all live Portuguese dogfish on such lines.
