NOTE

Subject : MONTHLY SUMMARY OF COUNCIL ACTS OCTOBER 2010

This document consists of the following:

- ANNEX I containing a list of acts adopted by the Council in October 2010.^{1 2}
- ANNEX II containing further details on the adoption of these acts. PART I provides information on the adoption of legislative acts, such as the date of adoption, the relevant Council session, the number of the document adopted, and where appropriate, applicable voting rules, voting results, explanations of vote and statements published in the minutes of the Council. PART II provides information that the Council has decided to make public on the adoption of other acts.

¹ With the exception of certain acts of limited scope such as procedural decisions, appointments, decisions of bodies set up by international agreements, specific budgetary decisions, etc.

² In the case of legislative acts adopted in the ordinary legislative procedure, there may be a difference between the date of the Council's meeting where the legislative act is adopted and the actual date of the act in question, since legislative acts adopted in the ordinary legislative procedure are only considered to have been adopted after signature by both the President of the Council and the President of the European Parliament and the Secretaries-General of the two Institutions.

This document is also available via the Internet (<http://consilium.europa.eu/>) see under "Documents", "Legislative Transparency", "Summary of Council Acts". Documents listed in the summary may be obtained from the public register of Council documents (Access to Council documents: [Public Register](#)).

It should be noted that only the minutes concerning the definitive adoption of legislative acts are authentic (available via the Internet: <http://consilium.europa.eu/> , see under "Documents", "Legislative Transparency", "[Council Minutes](#)").

3034th meeting of the Council of the European Union (JUSTICE and HOME AFFAIRS), held in Luxembourg on 7 and 8 October 2010 Directive 2010/64/EU of the European Parliament and of the Council of 20 October 2010 on the right to interpretation and translation in criminal proceedings Statement by the Council The Council notes that according to Article 7(1), the Member States have to implement this Directive into their national legal orders within a period which ends 36 months after publication of the Directive in the Official Journal. The Council encourages the Member States to implement the Directive as soon as possible, before the end of the said period. The Council acknowledges that the period of 36 months for implementation of this Directive does not constitute a precedent for the period of implementation that has to be agreed upon in respect of the other measures that are to be adopted on the basis of the "Roadmap for strengthening procedural rights of suspected and accused persons in criminal proceedings" ¹ . 3035th meeting of the Council of the European Union (COMPETITIVENESS – INTERNAL MARKET, INDUSTRY AND RESEARCH) held in Luxembourg on 11 and 12 October 2010 Directive of the European Parliament and of the Council amending Directives 2003/71/EC on the prospectus to be published when securities are offered to the public or admitted to trading and 2004/109/EC on the harmonisation of transparency requirements in relation to information about issuers whose securities are admitted to trading on a regulated market	PE-CONS 29/10 + REV 1 (nl)	Qualified majority	All Member States in favour
Statement by the Portuguese and Cypriot delegations The proposed changes to the Prospectus Directive aim at limiting the burden to companies, especially to small and medium sized enterprises. This is certainly a laudable objective, but it should not jeopardize investor protection, the main goal of the Prospectus Directive, and the level of harmonisation across Member States previously achieved. In this context, Portugal and Cyprus consider that the potential negative impact of the current proposal on the two aforementioned key aspects of the Prospectus Directive - investor protection and harmonisation across Member States - should be borne in mind when drafting implementing measures and carefully reassessed by the Commission when further revisiting the Directive.

Statement by the Finnish delegation Finland is of the opinion that the application of Art 3.1 of the Directive may lead to retroactive application of legislation to private contracts, which would be in conflict with the established interpretation of the constitutional protection of property. Finland will therefore apply the paragraph taking into account the necessary principles to ensure the constitutional protection of property. Statement by the United Kingdom The UK notes the amendments to the treatment of covered bonds in paragraph 2 ba-bd of Annex I of the amending text. These affect the provisions on the risk-weights attached to covered bonds and the inclusion of securitisations in covered bond pools, which were due to be reviewed by December 2010. The risk weights have been made permanent and the inclusion of securitisations extended until 2013. After the initial agreement was reached between the Council and the European Parliament, the ECB Governing Council expressed serious concerns in relation to the inclusion of securitisations in covered bond pools. Given the concerns expressed and the importance of a sound prudential framework for banks in the European Union, the UK believes both the issues described above should be formally reviewed as soon as possible and, in any case, in time for the discussions of CRD4 proposals.

Statement by the Council and the Commission The Council and the Commission confirm that the Genval criteria, as reviewed by the Council (Ecofin) on 08.10.02, remain the principles on which any future macrofinancial assistance should continue to be based upon.			
Statement by the Council In giving its consent, the Council emphasises the fact that in view of the general review of the Comitology Decision 1999/468/EC of 28 June 1999, the envisaged creation of an advisory committee to monitor implementation of macro-financial assistance for Moldavia does not set forth a precedent for subsequent legislative proposals on macro-financial assistance. The Council supports further discussions with the European Parliament to agree on a joint approach to the macro-financial assistance in the light of the Genval criteria in the version of 8 October 2002.

Regulation of the European Parliament and of the Council concerning measures to safeguard security of gas supply and repealing Directive 2004/67/EC	PE-CONS 30/10 + COR 1(en) + REV 1 (bg, cs, el, es, et, fr, ga, it, lt, pt, sv, lv, mt, sl, ro) + REV 2 (el) + REV 3 (it) + REV 4 (lt)	Qualified majority	All Member States in favour
Statement by the Netherlands The Netherlands has taken note of the approval of the Regulation concerning measures to safeguard security of gas supply and is concerned about a number of issues following from the Regulation. Firstly, for a net exporter of gas as the Netherlands, formulating security of supply policies and measures with regard to gas should remain a national prerogative. The second issue concerns investments by governments in gas infrastructures, including LNG installations and gas storages, which are justified by security of supply arguments but are not needed by the market and may seriously distort the proper functioning of the internal market in natural gas as they will lead to unfair competition and are detrimental to private sector initiatives. The Netherlands calls on the Commission to closely monitor these type of investments. Thirdly, the Netherlands attaches great importance to clear and well-defined requirements for natural gas undertakings to take the necessary measures to ensure gas supply to protected customers. Unfortunately, the Regulation does not provide this clarity as the supply standard has an open ended character and it is not clear from the outset which natural gas undertaking or group of natural gas undertakings have to take measures. This may lead to long and cumbersome discussions at the national level. In order to avoid this the Netherlands should be allowed to make its own choices on these issues, without interference from the Commission. Finally, the Netherlands is of the opinion that Low Calorific Gas interconnections should be exempted from the reverse flow obligations as reverse flow for this specific kind of gas will not contribute to the European security of gas supply.

Commission declaration on competition with respect to recital 45 The Commission considers that the reference in recital 45 to distortions of competition covers all forms of restriction of competition, including in particular restrictive clauses of contracts, for example destination clauses. The Commission also confirms that the application of Article 101 of the TFEU to the conditions referred to in recital 45 will be carried out where appropriate by the Commission or by one or more of the competent competition authorities of the Member States, in line with the provisions of Council Regulation (EC) No 1/2003. Commission Declaration on long term security of supply measures including diversification of gas supply sources and routes, regional cooperation and international cooperation in energy efficiency The Commission underlines that the diversification of gas supply sources and routes for the Union is essential to improve the security of gas supply of the individual Member States and the Union as a whole. Recognizing the need to develop a long term security of supply strategy, the Commission will adopt by end of 2010 a comprehensive Energy Infrastructure Package assessing the priorities for the development of gas infrastructures in the coming decades and the progress achieved on the priorities identified in the Second Strategic Energy Review. The Energy Infrastructure Package will identify the instruments and measures to provide incentives for investments in gas infrastructures, in particular including the diversification of supply routes, integration of 'gas islands', facilities for liquefied natural gas (LNG), as well as storage capacities. The Commission also supports the close cooperation of all stakeholders at all levels – the Member States, the independent Regulators, the gas industry and the consumers – within the regional initiatives. In 2010 the Commission will issue a Communication on the regional initiatives to provide guidance how to best achieve the progress and further develop existing regional cooperation initiatives. Close regional cooperation is crucial to achieve fully functioning internal energy market. The Communication on regional initiatives will make proposals as to common goals and best practices. Finally, the Commission recognises that energy efficiency plays an important role in ensuring long term energy security. The Commission will continue to develop a close cooperation with third countries to promote energy efficiency through the exchange of information on the energy savings strategies, research on energy efficient technologies and sharing the best practices, through the International Partnership for Energy Efficiency Cooperation and through bilateral arrangements.

Regulation of the European Parliament and of the Council laying down the obligations of operators who place timber and timber products on the market	PE-CONS 33/10 + COR 1 (fi) + REV 1 (fr) + REV 2 (sl)	Qualified majority	All Member States in favour except: against: SE abstention: PT, CZ
Statement by the Swedish delegation Sweden fully endorses the purpose of the Regulation, namely to globally limit illegal logging. For the reasons given below, Sweden is not unfortunately able to endorse the Council Decision on Regulation 2008/0198(COD). Sweden doubts whether the extra administrative burden which the Regulation will involve for a large number of EU undertakings is proportionate to the extent to which the Regulation will be able to globally limit illegal logging. There is a danger that the Regulation will have a disproportionately great impact on third countries and may therefore cause distortion of trade.			
Statement by the Czech Republic, Finland, Italy, Lithuania, Luxembourg, Slovenia, Sweden and Romania When implementing this Regulation, the above-mentioned Member States shall endeavour to minimize the administrative burden caused by the Regulation and facilitate the ability of honest operators to comply with the requirements, taking specifically into account the situation of small and medium sized enterprises/operators.			
Statement by Portugal The imposition of rules which may involve additional costs for economic operators in the context of the global crisis affecting Europe and the rest of the world may contribute to weakening the business sector and making European products less competitive. This fact leads us to view with great concern the approval of the Regulation laying down the obligations of operators who place timber and timber products on the market. We are not questioning the underlying objectives, which we support – in particular that of combating illegal forest clearance – but rather the disproportionate obligations that the Regulation will entail. This is particularly worrying in the case of a sector based on large numbers of SMUs, for which, in accordance with the recommendation made by Portugal in March for the Council minutes when the common position was adopted, we should be seeking a simplified system.

Regulation of the European Parliament and of the Council concerning the rights of passengers when travelling by sea and inland waterway and amending Regulation (EC) No 2006/2004 REV 4 (it) Statement by the Italian Delegation Italy notes that the text of the Regulation concerning the rights of passengers when travelling by sea and inland waterway adopted at second reading by Parliament departs substantially from the Council's common position of October 2009 on several points. In particular, one cannot but note that as a result of the amendments, assistance obligations fall mainly in the maritime sector, while the inland waterway sector seems to have been largely excluded, rendering the purported aims of passenger protection in all sectors of Community transport quite meaningless. Certain aspects of the Regulation cannot fail to have a negative impact on the national maritime sector, which is characterised by the requirements of territorial continuity with the larger and smaller islands in Italian territory, by the high number of small and medium sized enterprises, by a complex arrangement of ports and islands and by flows that vary over the course of the year. Although the Regulation represents an opportunity to raise the quality of Community maritime transport services in practice and to strengthen the rights of passengers travelling by sea or inland waterway, Italy underlines its dissatisfaction with certain aspects of the Regulation that do not take into account the specific structure of the Italian sector or that of other Community countries with a high number of small and medium sized enterprises that are for the most part engaged in mixed transport of goods and passengers with cars, often of a seasonal nature, and that have already been ravaged by the recent crisis and are going through a difficult phase of restructuring (privatisation). Causes for concern are the refusal to exclude expressly units exclusively or predominantly engaged in freight transport, with the result that the scope has been extended too far (to include vessels certified to carry over 12 passengers), the rigidity of certain measures on provision of assistance (which come into play in cases of delays of over 90 minutes after the scheduled departure time) and the failure to include exceptional circumstances to activate certain derogations for the provision of assistance: these measures will place considerable additional burdens on a sector already showing signs of decline. The aspects referred to above are problematic, and the Regulation, in its most recent version, has lost clarity and applicability and has become an instrument that will place a considerable burden on the carriers concerned: the fact that it will be businesses that bear the direct and indirect costs arising from the application of the Regulation cannot be ignored or underestimated, as there is a real risk that many operators in the sector may be driven from the market, thereby reducing transport supply. Statement by the Greek Delegation The Hellenic Republic fully and unequivocally supports the aims of the proposal for a Regulation concerning the rights of passengers when travelling by sea and inland waterways, which has special importance for shipping countries, such as Greece, particularly insofar as it strengthens and makes more effective the protection of the rights of the large numbers of passengers travelling each year. However, the Hellenic Republic wishes to state that, in its opinion, the proposal for a Regulation should show greater balance between the fundamental rights of passengers, which it protects well, and the legitimate interests of sea carriers (especially small and medium-sized enterprises) which, in certain cases (force majeure, exceptional circumstances), incur excessive costs through no fault of their own. In particular, the Hellenic Republic considers that the exemptions set out in Article 20, and especially in paragraph 3 thereof, should in addition include the obligation to provide accommodation (Article 17(2)) also in the event of extraordinary circumstances such as search and rescue operations, transport of sick persons, incidents involving the safety of the ship and passengers and coverage of emergency transport needs, which are crucial for the effective functioning of the very extensive Greek coastal network. Considering the above, the Hellenic Republic calls on the European Commission to produce, as soon as possible, a study of the potential impact in the Member States and on carriers of transposition and implementation of the proposal for a Regulation.

3037th meeting of the Council of the European Union (TRANSPORT, TELECOMMUNICATIONS AND ENERGY) held in Luxembourg on 15 October 2010 Council position of 15 October 2010 on the Letter of amendment No 1 to the draft general budget of the European Union for the financial year 2011 Declaration on letter of amendment No 1/2011 The Council recalls the great importance that the establishment of the EEAS should be guided by the principle of cost-efficiency aiming towards budget neutrality. The concept of budget neutrality should be seen in the context of resources within the EU budget, including when deciding on any new premises. It expects a report on an efficiency savings/redeployment plan early in 2011 outlining concrete steps to be taken in the short- as well as medium-term to progress towards budget neutrality and should be subject to regular review.	15000/10	Qualified majority	All Member States in favour except: abstention: PL

2010/649/EU: Council Decision of 7 October 2010 on the conclusion of the Agreement between the European Community and the Islamic Republic of Pakistan on the readmission of persons residing without authorisation 5942/10 Joint Declaration by the Council and the Commission on Article 20(3) The Council and the Commission emphasise that the provisions of Article 20(3) are exceptional provisions linked to the context of the negotiations with Pakistan. They do not form a precedent for other negotiations of Community readmission agreements, where the outcome must exclude such a restriction of scope. In addition, these provisions must be interpreted as laying the burden of proof on the parties which invoke them, whose responsibility it will be, in this case, to prove the person's entry into the territory of the requesting State before the entry into force of this Agreement. The effects of Article 20(3), especially with regard to the successful readmission of own nationals excluded from the scope of this Agreement, will be closely monitored, particularly in the Joint Readmission Committee. The Commission, or any Member State concerned, will also be able to refer any significant problems in this area to the competent bodies of the Council so that measures can be taken to resolve them. Declaration by France on the Joint Declaration in relation to Article 8(2) France takes note of the Joint Declaration on Article 8(2) and of the fact that, in the case of a positive reply to a request for readmission addressed by France to Pakistan, it aims to include the issuing of the travel document within the maximum time limit of 30 days. The application of the Joint Declaration thus agreed will have to be closely monitored, particularly in the Joint Readmission Committee. Council Decision on the signing, on behalf of the Union, and provisional application of the Agreement between the European Union and the Government of the Republic of Indonesia on certain aspects of air services 10843/10 Joint Statement by the Council and the Commission Inter alia for pragmatic reasons, it is preferable that the Community alone should conclude the Agreement with the Republic of Indonesia on certain aspects of air services. The same considerations would apply in respect of similar agreements as long as they are concluded in accordance with and within the limits of the mandate on the replacement of certain provisions in existing bilateral agreements adopted by the Council Decision of 5 June 2003. This Decision does not constitute a precedent as to the exercise of the respective competencies of the Community and its Member States in respect of agreements other than those referred to above, such as, for example, agreements of the type envisaged by the Council Decision of 5 June 2003 authorising the Commission to open negotiations with the United States in the field of air transport, which shall be concluded as mixed agreements. This Decision does not create any new Community competences as far as external agreements on air services are concerned, nor does it affect the division of competences between the Community and its Member States. 2010/707/EU: Council Decision of 21 October 2010 on guidelines for the employment policies of the Member States 14338/10 Statement by Cyprus on recital 8 Cyprus fully supports the philosophy enshrined in recital 8 of the Council Decision on the Guidelines for the Employment Policies of the Member States. However, for reasons of principle, Cyprus would like to note for the record that in addition to the various exit strategies referred to in recital 8 of the Decision, there should also be a reference to the need to ensure and safeguard social cohesion through these proposed measures. Cyprus believes that the EU would be true to its mission to act as a guardian of Europe's Social Dimension only by ensuring that while carrying out the most needed fiscal and macroeconomic reforms and enhancing "labour market performance", the need to ensure social cohesion is fully respected. This is essential, in order not only to uphold the role of EPSCO but also to ensure that it has a more prominent role in the governance of the EU 2020 Strategy. Cyprus stands firmly behind any initiative that enhances and strengthens Member States' Social Cohesion and the Union's Social Dimension and, most certainly, the protection of its citizens. This must be an integral part of any effort to achieve sustainable fiscal and macroeconomic reforms. Statement by the Austrian Delegation Austria doubts the budget neutrality of the early retirement measure provided for in Article 9 paragraph 2 of Annex VIII of the Staff Regulations and is furthermore of the opinion that this measure is not an appropriate regular human resources management tool. Austria therefore calls upon the Commission to put forward by the middle of 2011 a legislative proposal to repeal Article 9 paragraph 2 of Annex VIII of the Staff Regulations. Statement by the Commission The Commission emphasises that the report on the early retirement measure presented to the Council does not provide with any figures illustrating the long term perspective as this is not required by the Staff Regulations. Therefore the Commission does not see the grounds on which the Council might presume that the scheme would not be budgetary neutral on the long term. The Commission recalls that only exceptional post-enlargement circumstances have led to the application of a 10% rate every year and that nothing allows to anticipate that this maximum rate will be reached on a systematic basis in the coming years.
