WORKING DOCUMENT

From:	General Secretariat of the Council
To:	Delegations
No. Cion doc.:	8624/23 + ADD 1- ADD 4
Subject:	Proposal for a DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL amending Council Directives 2001/110/EC relating to honey, 2001/112/EC relating to fruit juices and certain similar products intended for human consumption, 2001/113/EC relating to fruit jams, jellies and marmalades and sweetened chestnut purée intended for human consumption, and 2001/114/EC relating to certain partly or wholly dehydrated preserved milk for human consumption - Four-column table

Delegations will find attached a draft updated four-column table reflecting the state of play on the above-mentioned proposal and containing, in the second and third columns, the European Parliament's and the Council's negotiating positions and, in the fourth column, in the rows marked in green, the text provisionally agreed (the green rows where there is no text in the fourth column are considered to be deleted).

Please note that the European Parliament has not yet approved this draft four-column table as the basis for the negotiations in the trilogue to be held on 30 January. At that meeting rows marked in in yellow and red are to be discussed and hopefully agreed.

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	individual countries of origin, where the honey originates in more than one country.	<i>shown by consumers in the geographical origin of honey, in relation to its characteristics and quality, and the need for complete transparency in this sector, the country or countries of origin, namely where the honey was harvested should appear on the label in the same visual field as the product indication.</i> In light of the reduced size of the packs containing only a single portion of honey (breakfast packs) and the resulting technical difficulties, it is therefore appropriate to exempt those packs from the obligation of listing all individual <i>for such small packs only, where the honey originates in more than one country, it should be possible to indicate the</i> countries of origin, where the honey originates in more than one <i>on the label by using the respective ISO</i> country code.	individual countries of origin, where the honey originates in more than one country.	
Recital 3a				
13a		<i>(3a) The Commission reports on honey counterfeiting from ‘EU coordinated action From the Hives’ and ‘EU coordinated action to deter certain fraudulent practices in the honey sector’</i>	<i>(3a) In the light of the Farm to Fork Strategy’s objective of strengthening consumers in making informed choices, including on the origin of their food, and in the interest to</i>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>highlight that a high percentage of imported honey is suspected of being adulterated and confirm a number of fraud cases in the honey sector, including the use of sugar syrups that are very difficult to detect even with sophisticated analytical methods. Directive 2001/110/EC should empower the Commission to establish appropriate methods of analysis to ensure that honey marketed in the Union complies with the requirements of the legislation. Measures and provisions should be taken to limit the possibilities of fraud, facilitate controls and allow better traceability and analysis of the quality and origin of honey. In this context, the requirements laid down in this Directive to indicate the countries of origin with their respective percentages on the label should also create the preconditions for the implementation of a complete traceability system. Access to detailed and complete information on the origin and composition of the honey would make it easier for the honey analysis laboratories to verify the geographical indication on the honey packaging and to</i>	preserve the efficient functioning of the internal market throughout the Union through a harmonisation of the labelling rules, it is appropriate to revise the rules for honey origin labelling. As a standard rule, it should be provided that the country or countries of origin should be indicated on the label together with the percentage of each origin, in the case of blends, with a tolerance of 5 % for each individual share within the blend, calculated on the basis of the operator's traceability documentation.	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>detect fraud. To ensure accuracy of the information on the country of origin of the honey, the placing on the market should be conditional upon the accuracy of the information provided on the composition of the product. To ensure compliance of products with the requirements set out in this Directive, regular and risk-based checks should be performed by competent authorities of Member States.</i>		
Recital 3b				
13b		<i>(3b) In order to limit as much as possible fraud linked to adulterated products that do not correspond to the designation of ‘honey’, to enable the validation of information provided about the honey’s origin and quality, and to provide utmost transparency, the Union rules on traceability should be supplemented with a minimum of compulsory, harmonised rules and the introduction of a traceability system that ensures the availability of and access to essential information concerning the origin of the honey or honey in a blend, including country of</i>	<i>(3aa) However, in order to ensure certain flexibility, Member States should be allowed to provide that, in the case of honey blends with more than four different countries of origin, it is obligatory to indicate with percentage only the four largest shares. The rest of the countries of origin, as the case may be, should be indicated, as required by the standard rule, in descending order. To further clarify the relationship between the standard rule and the flexibility rule, it is useful to mention that in case of more</i>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>origin, year of production and unique producer identifier, along the supply chain. For honeys produced and imported into the Union, competent authorities of Member States should be able to follow the entire chain back to the harvesting beekeepers or, in the case of imported honeys, to the producer. Those rules should not add to the administrative burden of the producers, but should make it easier for consumers and the supervisory authorities to keep track of the honey's entire journey from harvesting to bottling.</i>	than four countries of origin where the shares of the fifth or further ones are identical to the fourth, it is not possible to indicate only the four largest shares and thus the standard rule applies.	
Recital 3c				
13c		<i>(3c) The term ‘filtered honey’ used in Directive 2001/110/EC tends to be misinterpreted by consumers, who do not distinguish between ultrafiltration and filtration carried out by beekeepers after extracting their honey to remove particles of wax and other foreign matter. To ensure accurate information is available for consumers and the traceability and verifiability of honey authenticity and honey origins, ultrafiltered honey,</i>	(3b) In light of the reduced size of the packs containing only a single portion of honey (breakfast packs) of 30 g or less and the resulting technical difficulties, it is appropriate to allow, in the case of honey blends, that instead of the full name of the countries of origin, a standardised and internationally known code be used, namely the international standard ISO 3166 that defines internationally recognized codes of letters to	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>referred to in Directive 2001/110/EC as ‘filtered honey’, should no longer be allowed to be marketed and labelled as "honey". Ultrafiltration refers to filtration processes using a filter mesh of a size under 100 µm thus removing the majority of the pollen from honey. Since pollen is the key element present in honey used to trace its origin when analysed, the absence of pollen in honey makes it almost impossible to verify the data provided regarding the country or countries of origin of the honey. Ultrafiltration thus alters honey by depriving it of one of its main components and characteristics, and prevents its traceability, thus enabling fraud and misleading indications for consumers. If, when tested, a product marketed as honey presents little or no trace of pollen, it, as well as the batch it is part of, if applicable, should be prohibited from being placed on the market. Annex II to Directive 2001/110/EC should therefore be amended accordingly to specify the level of filtration permitted. Such level should be such as to not significantly alter the density</i>	refer to countries. In particular the two-letter code alpha-2 which is recommended by the International Organization for Standardization as the general-purpose code is appropriate to address the technical difficulties from the reduced packs space mentioned above.	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>and pollen spectrum of the honey, but should be such as to remove most of the foreign matter in the honey.</i>		
Recital 3d				
13d		<i>(3d) Heat treatment above 40°C (± 5°C) causes degradation of certain constituents of honey, and consumers should be enabled to differentiate between honeys that have been degraded by such heat treatments and other honeys. If honey is treated above 40°C (+- 5°C), the term 'heated honey' should therefore appear on the label. In order to control the absence of thermal degradation of honey, a minimum threshold should be set for the presence of invertase in honey, an enzyme that is much more sensitive and degrades very rapidly at high temperatures. Since heating honey can involve modifying its natural properties, it is important to establish a threshold above which baker's honey is considered as overheated in accordance with Directive 2001/110/EC.</i>	(3c) It is necessary to ensure that harmonised methods of analysis are available to verify that honey produced and marketed in the Union complies with Directive 2001/110/EC, as well as is consistent with internationally recognized and validated methods. Implementing powers should therefore be conferred on the Commission as regards developing such uniform methods, in accordance with Article 4(1) of that Directive. Those powers should be exercised in accordance with Regulation (EU) No 182/2011 of the European Parliament and of the Council. It is appropriate to fix a specific deadline for the exercise of those powers.	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Recital 3e				
13e		<i>(3e) Both the definition of honey in Directive 2001/110/EC and that in the Codex Alimentarius clearly specify the work carried out by bees in the hive after they have harvested their crop, which they transform by combining it with specific materials of their own, deposit, dehydrate, store, and leave to ripen in the combs of the hive. Dehydration followed by ripening are operations carried out by the bees. Outside the Union, some countries accept that the work of bees is limited to harvesting nectar secretions from plants or honeydew in the production of honey. Unripe honeys produced in this way have a moisture content well in excess of the 20 % threshold laid down in Directive 2001/110/EC. Operators work with heated vats under a vacuum to limit the boiling temperature of the water in the honey. However, this process degrades the final product, depleting its aromas and enzymes. Directive 2001/110/EC should therefore prohibit that vacuum evaporation process for honeys.</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Recital 3f				
13f		<i>(3f) The commercialisation of honeys that are not naturally matured by bees, most of which are imported from third countries, distorts competition on the Union market. In most cases, this involves vacuum evaporation of the water contained in the honey, which results in a depletion of the aromas naturally present. The rapid and artificial evaporation of water from honey competes with the slow dehumidification process carried out naturally by bees in the hive. Artificial evaporation should therefore be prohibited.</i>		
Recital 3g				
13g		<i>(3g) The definition of honey, as laid down in Directive 2001/110/EC, should be defended at the International Organization for Standardization (ISO), to avoid a definition that would allow low-cost products to be exported under the name of "honey", to the detriment of the quality and stability of the Union</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>honey market and consumer confidence in Union products.</i>		
Recital 4
