NOTE

From:	General Secretariat of the Council
To:	Working Party on Information Exchange and Data Protection (DAPIX)
No. prev. doc.:	5968/3/14 REV 3
Subject:	Council Decision 2008/615/JHA of 23 June 2008 on the stepping up of cross-border cooperation, particularly in combating terrorism and cross-border-crime, Council Decision 2008/616/JHA of 23 June 2008 on the implementation of Council Decision 2008/615/JHA of 23 June 2008 on the stepping up of cross-border cooperation, particularly in combating terrorism and cross-border-crime ("Prüm Decisions") - statistics and reports on automated data exchange for 2014

1. According to Art. 21 of Council Decision 2008/616/JHA, an evaluation of the application of the data exchange pursuant to Chapter 2 of Decision 2008/615/JHA shall be carried out on a regular basis. To that end, each Member State compiles statistics on the results of automated data exchange to be forwarded annually to the General Secretariat, which will produce a summary overview for the elapsed year, and to the Commission. The General Secretariat provides herewith a compilation of statistics for 2014 concerning the automated exchange of DNA data, of dactyloscopic reference data as well as of Vehicle Registration Data (VRD).
2. The above-mentioned evaluation shall relate to those Member States already applying Decision 2008/615/JHA at the time of the evaluation and shall be carried out with respect to the data categories for which data exchange has started among Member States connected.

Annex I gives an overview on the state of play with regard to the operability of Member States in each data category. On 31 December 2014,

- twenty-one out of twenty-two Member States (BE, BG, CZ, DE, EE, ES, FR, CY, LV, LT, LU, HU, MT, NL, AT, PL, PT, RO, SI, SK, FI, SE) authorised to exchange DNA data were operational;
 - seventeen out of eighteen Member States (BG, CZ, DE, EE, ES, FR, CY, LT, LU, LV, HU, MT, NL, AT, RO, SI, SK, FI) authorised to exchange dactyloscopic reference data were operational;
 - nineteen Member States (BE, BG, DE, EE, ES, FR, CY, LT, LU, HU, MT, NL, AT, PL, RO, SI, SK, FI, SE) authorised to exchange VRD were operational.
3. In line with chapter 4 of the Annex to Council Decision 2008/616/JHA, the models for comparable statistics for each data category were set up by the relevant Council Working Group. The summary overview for 2014 has been produced on the basis of statistics forwarded to the General Secretariat by **12 March 2015**. Annex II - IV set out the results concerning automated exchange of each data category.
4. DAPIX is invited to take note of the attached information on automated data exchange for 2014 and to task experts to discuss where necessary the results at their respective meetings.

DNA

1. For the investigation of criminal offences, operational Member States allow other Member States National Contact Points (NCP) access to reference data in their DNA analysis files. Unidentified profiles are supplied and compared in an automated form with all DNA profiles from other Member States' DNA analysis files' reference data. Should a Member State, as a result of such a comparison, find that any DNA profiles supplied match any of those in its DNA analysis files, it supplies the other Member State's NCP with the reference data with which a match has been found. The subsequent "post-hit" procedure, *i.e.* the supply of further personal data and other information deemed pertinent in case of a match, is governed by national law.
2. At the DAPIX meeting of 2 October 2013, it was agreed that
 - the model used for 2011¹ will continue to apply to DNA match statistics, and
 - the discussion on the outstanding issue of "meaningful" statistics, *i.e.* the drafting of "unfiltered" or "filtered" statistics, the latter meaning that only results that could aid an investigation are presented, would be reported to a further date.
3. The tables below set out the compiled DNA database statistics as delivered by 16 February 2015.

It has to be noted that

- a) in the tables on DNA-database statistics, "stains" are stains which have not yet matched a person in the national DNA-database;
- b) in the tables on match statistics, the "number of matches" include all unique quality 1 and 2 matches obtained with sent DNA profiles;
- c) matches on 6 or 7 loci may also include false positive (= adventitious) matches.

¹ See doc. 14383/12 DAPIX 118

1. Match results for 2014 for Belgium

DNA-database statistics	Stains	Persons	Total
Nr of DNA-profiles in DNA-database on 1 January 2014	34552	27687	62239
Nr of DNA-profiles in DNA-database on 31 December 2014	39187	31320	70507
Nr of unique DNA-profiles sent to other countries	25913	30691	56604
Nr of unique DNA-profiles received from other countries	1021 ^(*)	26 ^(*)	1047 ^(*)

(*) We can only see the profiles which gave a match with our database. So it's only a small fraction of the total number of profiles that France and The Netherlands sent to Belgium.

17. Match results for 2014 for Portugal

DNA-database statistics	Stains	Persons	Total
Nr of DNA-profiles in DNA-database on 1 January 2014	1780	1676	3456
Nr of DNA-profiles in DNA-database on 31 December 2014	1818	3371	5189
Nr of unique DNA-profiles sent to other countries	N/A	N/A	N/A
Nr of unique DNA-profiles received from other countries	N/A	N/A	N/A

No match statistics were provided since Portugal is not yet in production. Legal obstacles having arisen after the Council Decision of 19 July 2011 on the launch of automated data exchange with regard to DNA data in Portugal (2011/472/EU) were not yet solved.

18. Match results for 2014 for Romania

Dactyloscopic data

1. For the prevention and investigation of criminal offences, operational Member States allow other Member States' National Contact Points (NCP) access to reference data in the automated fingerprint identification system, with the power to conduct automated searches by comparing dactyloscopic data. A match of data subsequent to such a comparison is to be confirmed by the requesting Member State. The "post hit"-procedure, i.e. the supply of further personal data and other information related to the reference data in case of such a match, is governed by the national law of the requested Member State.
2. DAPIX agreed on 27 October 2011 on the model for statistics on automated data exchange of dactyloscopic data. The tables below set out the compiled statistics as delivered by Member States with regard to
 - figures per Member States on the outgoing requests,
 - statistics specified by Member State, by year and combined search types³,
 - the number of outgoing requests and the number of verified hits per Member States.

³ See Chapter 2, point 8.3 of the Annex to Council Decision 2008/616/JHA:
TP/TP: ten-print against ten-print
LT/TP: fingerprint latent against ten-print
LP/PP: palmprint latent against palmprint
TP/UL: ten-print against unsolved fingerprint latent
LT/UL: fingerprint latent against unsolved fingerprint latent
PP/ULP: palmprint against unsolved palmprint latent
LP/ULP: palmprint latent against unsolved palmprint latent

Vehicle Registration Data (VRD)

3. For the prevention and investigation of criminal offences and in dealing with other offences coming within the jurisdiction of the courts or the public prosecution service in the searching Member State, as well as in maintaining public security, operational Member States allow other Member States' National Contact Points (NCP) access to national vehicle registration data, with the power to conduct automated searches, i.e. data relating to owners or operators and data relating to vehicles.
4. The DAPIX VRD subgroup agreed on a statistic model for VRD at its meeting of 24 November 2011 and EUCARIS was tasked to develop a mechanism to gather and count statistics.
5. VRD statistics were delivered by the EUCARIS Secretariat for 2014 per service, per month but also totalled for the whole year 2014. The summary underneath sets out the total amount of EUCARIS/Prüm inquiries for 2014 in addition to the amounts of 2012 and 2013.
6. It should be noted that the total amount of inquiries and responses have to be more or less the same. In comparison to 2012 and 2013 the delivery of the data by the Member States was much better but still not flawless. The following problems were encountered in 2014 during the gathering of the statistics:
 - a) Austria did not provide the figures for January, March, May, August, September, November and December;
 - b) Finland did not provide the figures for April;
 - c) Slovakia did not provide the figures for January;
 - d) Sweden did not provide the figures for January up and until August;
 - e) Slovenia did not provide the figures for January, February and March.
 - f) Estonia, Hungary and Malta have been requested by other countries, but did not deliver any statistics themselves yet.
 - g) Germany has several customised clients. These clients still did not deliver inquiries conform to the agreed specifications. Therefore the statistics of Germany can not be correctly interpreted. The issues are known by Germany and Germany (BKA) is working on the solution.

Overview of the total amount of EUCARIS/Prüm-inquiries in 2014
