#### NOTE

From:	Council Security Committee
To:	Coordination Committee for Communication and Information Systems
No. prev. doc.:	14408/19
Subject:	Handling of the information classified RESTREINT UE/EU RESTRICTED in the Council decision-making processes - High level requirements

With doc. 14408/19 the GSC explained how it intends to deploy the new secured system for handling R-UE/EU-R complementary to the acquisition and implementation of the system for the exchange of high classified information (HCI project).

At its meeting on 28 November 2019 the Coordination Committee for Communication and Information Systems (CCCIS) agreed (doc. 14834/19) to seek the input of the Council Security Committee on the high level requirements set out in section III of doc. 14408/19, recalling that "*the Security Committee and its technical bodies will be consulted throughout the project on all security related aspects, including the security requirements given the objective of accrediting the new system in line with the relevant security rules and guidelines*".

The Council Security Committee has analysed doc. 14408/19 and concluded to confirm to the CCCIS that :

***The CSC concurs with the high level requirements included in doc. 14408/19 as long as the provisions of the CSR, and in particular the security accreditation process, are applied to the new system.***

One delegations, without breaking silence, has requested further clarifications (WK 1120/2020) that will have to be addressed in the Security Accreditation Board.
