Subject:	Proposal for a Regulation of the European Parliament and of the Council laying down measures to strengthen solidarity and capacities in the Union to detect, prepare for and respond to cybersecurity threats and incidents - Revised mandate for negotiations with the European Parliament

I. INTRODUCTION

1. On 18 April 2023, the Commission adopted the proposal for a Regulation of the European Parliament and of the Council laying down measures to strengthen solidarity and capacities in the Union to detect, prepare for and respond to cybersecurity threats and incidents, the “EU Cyber Solidarity Act”. The EU Cybersecurity Strategy adopted in December 2020 mentioned the creation of a European Cyber Shield, reinforcing the cyber threat detection and information sharing capabilities in the European Union. On 8 and 9 March 2022, Ministers of EU Member States in charge of Telecom issues met informally in Nevers and expressed the wish for the EU to fully prepare to face large-scale cyberattacks.

The Council Conclusions of May 2022 on the cyber posture highlighted the need to address gaps in terms of response and preparedness to cyber-attacks, by calling for the Commission to present a proposal on a new Emergency Response Fund for Cybersecurity.

2. The purpose of this proposal is to strengthen the competitive position of industry and service sectors and support their digital transformation. The proposal aims at increasing the resilience of citizens, businesses and entities operating in critical and highly critical sectors against the growing cybersecurity threats with societal and economic impacts. The legal basis is therefore Article 173 TFEU on industry competitiveness as well as Article 322 (1) point (a) TFEU on carry-over rules derogating from the principle of budget annuality. The latter legal basis is necessary in relation to the Cybersecurity Emergency Mechanism. Other objectives of this Regulation are: to strengthen common EU detection and situational awareness of cyber threats and incidents; to reinforce preparedness of critical entities across the EU and strengthen solidarity by developing common response capacities against significant or large-scale cybersecurity incidents, including by making incident response support available for third countries; to enhance Union resilience and contribute to effective response by reviewing and assessing significant or large-scale incidents.
3. In particular, the proposal lays down:
 - The deployment of a pan-European infrastructure of Security Operation Centers (SOCs) (European Cyber Shield) to build and enhance common detection and situational awareness capabilities.
 - The creation of a Cyber Emergency Mechanism to support Member States in preparing for, responding to and immediate recovery from significant and large-scale cybersecurity incidents.
 - The establishment of a European Cybersecurity Incident Review Mechanism to review and assess specific significant or large-scale incidents.

II. STATE OF PLAY OF WORK WITHIN THE COUNCIL PREPARATORY BODIES

4. Under Swedish Presidency the Commission presented the text at the meeting of the Horizontal Working Party on Cyber Issues (HWPCI) on 24 April 2023, and then had thematic presentations on 24 May and 7 June 2023.
5. The Spanish Presidency organised a total of fourteen dedicated HWPCI meetings which resulted in four compromise proposals covering the whole text of the Regulation. On 5 December 2023, the Council took note of the progress made under the Spanish Presidency (15392/23).
6. On 15 December 2023 the Presidency issued a draft mandate which was discussed in the HWPCI on 18 December 2023. In general delegations welcomed this compromise and agreed to submit this proposal, with some further amendments, to the Permanent Representatives Committee in order to receive a mandate to start the negotiations with the European Parliament. On 20 December 2023 the COREPER discussed and approved the mandate to start negotiations with the European Parliament¹. The Belgian Presidency and the European Parliament had 10 technical meetings until 2 February 2024.
7. In the European Parliament, the file was assigned to the Committee on Industry, Research and Energy (ITRE) and MEP Lina Gálvez Muñoz (Group of the Progressive Alliance of Socialists and Democrats, Spain) has been appointed as rapporteur. The adoption of the report in ITRE was on 7 December 2023 and the decision to start the negotiations with the Council was taken in the Plenary on 11 December 2023.
8. The opinion on the Cyber Solidarity Act was adopted by the European Economic and Social Committee on 13 July 2023² and the European Court of Auditors on 5 October 2023³. The European Committee of the Regions (CoR) adopted its opinion on 30 November⁴.

¹ 19669/23

² 12041/23

³ 13841/23

⁴ 16649/23

9. The purpose of this note is to obtain an orientation from COREPER with a view to negotiating and reaching a political agreement with the Parliament at the upcoming trilogue. The Presidency wishes to highlight the following major issues:

1. Prioritization

Article 14 (lines 155a)

Regarding the support from the Reserve, the Council mandate foresees, as one of several criteria to be considered when prioritising among multiple concurrent requests, that higher priority should be given to requests by Member State users, then to requests by Union institutions, bodies and agencies and finally then to requests by DEP-associated third countries. The European Parliament challenges this differentiation. A compromise might be found in guaranteeing through other criteria that Member State users in such cases will have more chances to benefit from the support from the Reserve, which is ultimately financed by Digital Europe Program funds destined to support users and industry within Member States.

2. Procurement from Third Countries' entities

Article 16 (line 181c) and article 19 (line 213a – 213n)

Both co-legislators have identified the need to increase the possibility of trusted providers from certain third countries to participate in the Reserve, but have a divergent approach. The European Parliament would like to introduce the following provision:

“the provider shall be established and shall have its executive management structures in the Union, in an associated country or in a third country that is part to the Government Procurement Agreement in the context of World Trade Organisation (GPA).”

The Presidency will continue to defend the Council mandate as this provision would among others exclude a number of EU partner countries who are not part to the Government Procurement Agreement and as this would imply broader amendments of DEP provisions.

3. External use of the Reserve

Article 17 (lines 186a and 187a)

The Council mandate introduces specific requirements in the procedure to grant access to the Cybersecurity Reserve for DEP-associated third countries, in particular by introducing implementing decisions by the Council. The Presidency will defend the Council mandate as the proposed wording preserves the internal market as the legal basis of the Regulation while ensuring Council involvement given the implications of such access for the Reserve's availability and for relations with third countries. This should also be read together with other provisions on DEP-associated third countries.

4. Information sharing

Article 6 (line 98-100)

The European Parliament desires to specify the level and nature of the information sharing requirements in the Cross-border Hubs, in line with the Commission proposal, in order to guarantee a high level of ambition of these Hubs. The Council mandate specifies that the consortium agreements should define the terms and conditions for information sharing to allow maximum autonomy for the Hubs. A compromise might be found in indicating which elements the consortium agreement could specify in terms of information sharing.

5. Budget: exchange of views

Article 19 (lines 210-211d)

The European Parliament proposes to have a first exchange of views on the budgetary provisions. The provisions introduced by the Commission's proposal to amend the Digital Europe Programme (DEP) are not convincing to the European Parliament. For the Parliament, a more cautious approach is preferred in deciding the reallocation of funds under the programme for the purpose of financing initiatives of the Cyber Solidarity Act as well as a cap for the Cybersecurity Reserve. The Council mandate is in line with the Commission's proposal.

6. Implementing/delegated acts

Article 6(3) (line 105), Article 7(2) (line 109), Article 8(3) (line 113), Article 12(8) (line 136), Article 13(7) (line 147), and Article 20a (lines 232j-o)

The Presidency will continue to defend the Council mandate, which includes a single implementing act in Article 12 (8). The European Parliament wishes to introduce four delegated and one implementing acts in this legislative proposal.

10. Furthermore, the Presidency brings to the attention of Member States that a provisional agreement was reached at technical level on a number of important issues such as:
- Subject matter and objectives (Article 1, lines 51-60, 61b-62)
 - Certain definitions (Article 2, lines 63-64, 66, 67a-72b, 73-75)
 - Deletion of the support by Digital Europe Programme to actions implementing the Cybersecurity Alert System (Article 3 (1), line 79) and introduction of the cooperation with relevant entities (Article 3(2) -a, line 80a)
 - Other aspects of the Cybersecurity Alert System (Article 3, lines 82-86a)
 - Moving Article 4 (2) (line 90) to Article 8a
 - Certain aspects of the Cross-Border Cyber Hubs (Article 5, lines 94, 95, 96a)
 - Consensual elements of the information sharing (Article 6, lines 101, 103, 104 as well as Article 7, lines 107, 107a)
 - One security aspect of information-sharing with other entities within the European Cybersecurity Alert System (Article 8, line 110, 112)

- Funding of the European Cybersecurity Alert System (new Article 8a, lines 113a-d)
- Cyber Emergency Mechanism (Article 9, lines 114-117a)
- Types of Actions (Article 10, lines 118, 119-122)
- Coordinated preparedness testing of entities (Article 11, lines 123, 123b and c, 124a, 125c)
- Establishment of the EU Cybersecurity Reserve (Article 12, lines 126-132, 135)
- Requests for support from the EU Cybersecurity Reserve (Article 13, lines 137-145, 146)
- Implementation of the support from the EU Cybersecurity Reserve (Article 14, lines 148, 150-155, 156-157, 158 a-c, 159 a-c, 160a)
- Coordination with crisis management mechanisms (Article 15, lines 162 -163)
- Trusted Providers (Article 16, lines 166-169, 171-172, 174, 176-179, 181 b, f-h)
- Support to third countries (Article 17, lines 182-186, 187-189)
- Cybersecurity Incident Review Mechanism (Article 18, lines 191, 193a)
- Amendments to Regulation (EU) 2021/694 (Article 19, lines 196-197-201, 203, 205-209, 212, 214-222, 224-225, 227-230)
- Committee procedure (Article 21, lines 233-235)
- Entry into force (Article 22, lines 236-238)
- Annex (lines 244-249, 251-252, 255-256, 258, 260)

11. The Presidency invites delegations to focus on finding compromises regarding the major topics mentioned above, as well as on a number of other issues, which are likely to be part of the final agreement.

III. CONCLUSION

12. The Permanent Representatives Committee is invited to:
- approve the provisional agreement reached at technical level, as set out in the Annex (marked in green);
 - give a mandate to the Presidency to continue negotiations with the European Parliament, on the basis of the compromise texts included in the attached 4-column table;
 - show flexibility regarding some issues described above.
-

Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL laying down measures to strengthen solidarity and capacities in the Union to detect, prepare for and respond to cybersecurity threats and incidents
