<sup>1</sup> OJ C , , p. .

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) Experience with the current Anti-Money Laundering and Countering the Financing of Terrorism (AML/CTF) framework, which heavily relies on the national implementation of AML/CFT measures, has disclosed weaknesses not only with regard to the efficient functioning of the AML/CFT framework of the Union but also with regards to integrating international recommendations. Those weaknesses lead to the emergence of new obstacles to the proper functioning of internal market both due to the risks within the internal market as well as external threats facing the internal market.
- (2) Cross-border nature of crime and criminal proceeds endanger Union financial system efforts relating to prevention of money laundering and financing of terrorism. Those efforts have to be tackled at Union level through the creation of an Authority responsible for contributing to the implementation of harmonised rules. In addition, the Authority should pursue a harmonised approach to strengthen the Union's existing AML/CFT preventive framework, and specifically AML supervision and cooperation between FIUs. That approach should reduce divergences in national legislation and supervisory practices and introduce structures that benefit the smooth functioning of the internal market in a determined manner and should, consequently, be based on Article 114 TFEU.

- (3) Therefore, a European Authority for anti-money laundering and countering the financing of terrorism, the Anti-Money Laundering Authority ('the Authority') should be established. The creation of this new Authority is crucial to ensure efficient and adequate supervision of obliged entities **that pose a high risk with regard to Money Laundering/Terrorist Financing (ML/TF)** , strengthening common supervisory approaches for **all other** obliged entities and facilitating joint analyses and cooperation between Financial Investigation Units (FIUs).
- (4) This new instrument is part of a comprehensive package aiming at strengthening the Union's AML/CFT framework. Together, this instrument, Directive [please insert reference – proposal for 6th Anti-Money Laundering Directive], Regulation [please insert reference – proposal for a recast of Regulation (EU) 2015/847] and Regulation [please insert reference – proposal for the Anti-Money Laundering Regulation] will form the legal framework governing the AML/CFT requirements to be met by obliged entities and underpinning the Union's AML/CFT institutional framework.
- (5) To bring AML/CFT supervision to an efficient and uniform level across the Union, it is necessary to provide the Authority with the following powers: direct supervision of a certain number of selected obliged entities of the financial sector, **including crypto-asset service providers**; monitoring, analysis and exchange of information concerning ML/TF risks affecting internal market; coordination and oversight of AML/CFT supervisors of the financial sector; coordination and oversight of AML/CFT supervisors of the non-financial sector, including self-regulatory bodies and the coordination and support of FIUs.

- (6) Combining both direct and indirect supervisory competences over obliged entities, and also functioning as a support and *coordination* mechanism for FIUs, is the most appropriate means of bringing about supervision and cooperation between FIUs at Union level. This should be achieved by creating an Authority which should combine independence and a high level of technical expertise and which should be established in line with the Joint Statement and Common Approach of the European Parliament, the Council of the European Union and the European Commission on decentralised agencies<sup>3</sup>.
- (7) ***The arrangements concerning the seat of the Authority should be laid down in a headquarters agreement between the Authority and the host Member State. The headquarters agreement should stipulate the conditions of establishment of the seat and the advantages conferred by the Member State on the Authority and its staff. The Authority should conclude a headquarters agreement with the host Member State in a timely manner before it begins operations.***

**(7a) *Criteria to be taken into account in order to contribute to the decision making process for choosing the Anti-Money Laundering Authority seat should be the assurance that Authority can be set up on site upon the entry into force of this Regulation, the accessibility of the location and the existence of adequate education facilities for the children of staff members, appropriate access to the labour market, social security and medical care for both children and spouses of staff members as well as geographical balance. In view of the nature of the Anti-Money Laundering Authority tasks and powers, it should be in a place that allows the Authority: to fully execute such tasks and powers; to recruit highly qualified and specialised staff; to offer adequate training opportunities for AML/CFT activities; where relevant, to closely cooperate with Union institutions, bodies and agencies; and in order to avoid reputational risks, to consider how ML/TF risks are adequately addressed in the Member State based on publicly available, relevant and comparable information such as FATF reports. Considering these criteria, the Authority should be located at [...].***

- (8) The powers of the Authority should allow it to improve AML/CFT supervision in the Union in various ways. With respect to selected obliged entities, the Authority should ensure group-wide compliance with the requirements laid down in the AML/CFT framework and any other legally binding Union acts that impose AML/CFT-related obligations on financial institutions. ***With respect to financial supervisors***, the Authority should ***in particular*** carry out periodic reviews to ensure that all financial supervisors ***perform*** their tasks ***adequately***. It should ***also investigate systematic failures of supervision resulting from breaches, non-application or incorrect application of Union law***. With respect to non-financial supervisors, including self-regulatory bodies where appropriate, the Authority should coordinate peer reviews of supervisory standards and practices and request non-financial supervisors to ***ensure the observance*** of AML/CFT requirements ***in their sphere of competence***. ***The Authority should be able to act in cases of potential breaches or non-application of Union law by non-financial supervisors and in case such breaches are not rectified in line with Authority's recommendations, it should issue warnings to the affected counterparties of the relevant non-financial supervisors. The Authority should facilitate the functioning of the AML/CFT supervisory colleges in both the financial and non-financial sectors. Overall, the Authority should contribute to convergence of supervisory practices and promotion of high supervisory standards.*** In addition, the Authority should coordinate ***and support*** the conduct of joint analyses by FIUs ***or request the launch of a joint analyses, and should*** ***make available to FIUs IT and artificial intelligence services to enhance their analysis capabilities*** and tools for secure information sharing, including through hosting of FIU.net.

- (9) With the objective to strengthen AML/CFT rules at Union level and to enhance their clarity while ensuring consistency with international standards and other legislation, it is necessary to establish the coordinating role of the Authority at Union level in relation to all types of obliged entities to assist national supervisors and promote supervisory convergence, in order to increase the efficiency of the implementation of AML/CFT measures, also in the non-financial sector. Consequently, the Authority should be mandated to prepare regulatory technical standards, to adopt guidelines, recommendations and opinions with the aim that where supervision remains at national level, the same supervisory practices and standards apply in principle to all comparable entities. ***In addition, Authority should be tasked with monitoring and measuring the degree of convergence and consistent application of legal requirements and high supervisory standards by supervisory authorities and obliged entities.*** The Authority should be entrusted, due to its highly specialised expertise, with the development of a supervisory methodology, in line with a risk-based approach.

Certain aspects of the methodology, which can incorporate harmonised quantitative benchmarks, such as approaches for classifying the risk profile of obliged entities, ***including its inherent and residual risk***, should be detailed in directly applicable binding regulatory measures – regulatory or implementing technical standards ***factoring ML/TF risks in prudential supervision, in order to ensure effective interaction between prudential and AML/CFT supervision***. Other aspects, which require wider supervisory discretion, such as approaches to assessing internal controls of the obliged entities should be covered by non-binding guidelines, recommendations and opinions of the Authority. The harmonised supervisory methodology should take due account of, and where appropriate, leverage the existing supervisory methodologies relating to other aspects of supervision of the financial sector obliged entities, especially where there is interaction between AML/CFT supervision and prudential supervision. Specifically, the supervisory methodology to be developed by the Authority should be complementary to guidelines and other instruments developed by the European Banking Authority detailing approaches of prudential supervisory authorities with respect to factoring ML/TF risks in prudential supervision, in order to ensure effective interaction between prudential and AML/CFT supervision.

*A harmonised supervisory methodology would enable development of common supervisory tools for interactions with, and data requests from, the obliged entities across the entire supervisory system. The Authority should be able to coordinate the development of such tools, in the form of structured questionnaires, based online or offline, and ultimately integrated into a single platform for interaction with obliged entities and among supervisors within the system. Such platform would not only facilitate supervisory processes and harmonised supervisory approaches but also ensure avoiding duplicative reporting requirements and excessive burden on obliged entities in the process of supervision both at Union as well as national levels.*

- (9a) The extension of criminal offences that are predicate to money laundering to include non-implementation and evasion of targeted financial sanctions requires the development of an understanding of threats and vulnerabilities in that area at the level of obliged entities, supervisors and the Union. In carrying out its supervisory tasks over selected obliged, the Authority should therefore ensure that those entities have in place adequate systems to implement requirements related to targeted financial sanctions. Similarly, given its central role in ensuring an effective supervisory system across the internal market, the Authority should support supervisory convergence in this area to ensure adequate oversight of credit and financial institutions' compliance with requirements related to the implementation of targeted financial sanctions.*

*The information collected through its supervisory and convergence tasks constitutes a resource for the Union's understanding of risks in relation to non-implementation and evasion of targeted financial sanctions, and can contribute to the identification of effective mitigating measures. To this end, the Authority should contribute with its experience and knowledge to the development of the Union supranational risk assessment in relation to non-implementation and evasion of targeted financial sanctions.*

- (10) The Authority should be empowered to develop regulatory technical standards in order to complete the harmonised rulebook established in the [please insert references – proposal for 6th Anti-Money Laundering Directive, Anti-money laundering Regulation and proposal for a recast of Regulation (EU) 2015/847]. The Commission should endorse draft regulatory technical standards by means of delegated acts pursuant to Article 290 TFEU in order to give them binding legal effect. They should be subject to amendment only in very restricted and extraordinary circumstances, since the Authority is the actor in close contact with and knowing best the AML/CFT framework. To ensure a smooth and expeditious adoption process for those standards, the Commission's decision to endorse draft regulatory technical standards should be subject to a time limit.

- (11) The Commission should also be empowered to adopt implementing technical standards by means of implementing acts pursuant to Article 291 TFEU.
- (11a) In the process of developing regulatory technical standards, implementing technical standards, guidelines and recommendations addressed to obliged entities, supervisors or Financial Intelligence units, the Authority should as a rule conduct open public consultations, unless those consultations and analyses are highly disproportionate in relation to the scope and impact of the measures concerned or in relation to the particular urgency of the matter. The public consultations should be conducted in order to analyse the potential related costs and benefits of the new measures and requirements it is introducing, and in order to make sure that all the relevant stakeholders, including other Union bodies whose area of competence may be concerned, have had a chance to provide their input and advice. As the role of the civil society, including academia, investigative journalists, and non-governmental organisations, has proven paramount over the past years in identifying criminal patterns and how the Union AML/CFT framework can be strengthened to prevent criminal misuse of the Union internal market, the Authority should pay particular attention to input provided by civil society. It should ensure appropriate engagement of the civil society and active solicitations of its views during its policy-making process.***

- (12) Since there are no sufficiently effective arrangements to handle AML/CFT incidents involving cross-border aspects, it is necessary to put in place an integrated AML/CFT supervisory system at Union level that ensures consistent high-quality application of the AML/CFT supervisory methodology and promotes efficient cooperation between all relevant competent authorities. For these reasons, the Authority and national AML/CFT supervisory authorities ('supervisory authorities') should constitute an AML/CFT supervisory system. ***The AML/CFT supervisory system should be based on mutual trust and cooperation in good faith, including exchanges of the information and data related to supervision, in order to enable the Authority and supervisory authorities carry out their tasks effectively. This AML/CFT supervisory system*** would benefit supervisory authorities when facing specific challenges, for example vis-à-vis an enhanced AML/CFT risk or due to a lack of resources, as within that system mutual assistance should be possible on request. This could ***also*** involve exchange and secondments of personnel, training activities and exchanges of best practices. Furthermore, the Commission could provide technical support to Member States under Regulation (EU) 2021/240 of the European Parliament and of the Council to promote reforms aimed at reinforcement of the fight against money laundering.<sup>2</sup>

---

<sup>2</sup> Regulation (EU) 2021/240 of the European Parliament and of the Council of 10 February 2021 establishing a Technical Support Instrument (OJ L 57, 18.2.2021, p. 1).

- (13) Considering the important role of thematic reviews in AML/CFT supervision across the Union as they enable to identify and compare the level of exposure to risks and trends in relation to obliged entities under supervision, and that currently supervisors in different Member States do not benefit from these reviews, it is necessary that the Authority identifies national thematic reviews that have a similar scope and time-frame and ensures their coordination at the level of the Union. To avoid situations of possibly conflicting communications with supervised entities, the coordination role of the Authority should be limited to interaction with relevant supervisory authorities, and should not include any direct interaction with non-selected obliged entities. For the same reason, the Authority should explore the possibility of aligning or synchronising the timeframe of the national thematic reviews and facilitate any activities that the relevant supervisory authorities may wish to carry out jointly or similarly.

- (-1) *The efficient usage of data leads to better monitoring and compliance of firms. Therefore, both direct and indirect supervision by the Authority and supervisory authorities of all obliged entities across the system should rely on expeditious access to relevant data and information about the obliged entities themselves and the supervisory actions and measures taken towards them, subject to limited retention periods in accordance with the applicable data protection framework. To that end, and taking into account the confidential and sensitive nature of the information, the Authority should establish a central AML/CFT database with information collected from all supervisory authorities, and should make such information available to any supervisory authority and non-AML/CFT authority within the system when necessary, on a confidential and need-to-know basis. The collected data should also cover the relevant aspects of the withdrawal of authorisation procedures, fit and proper assessments of shareholders and members of individual obliged entities as this will enable relevant authorities to duly consider possible shortcomings of specific entities and individuals that might have materialised in other Member States.*

*The database should also include statistical information about and supervisory authorities and Financial Intelligence Units. All collected data and information would enable effective oversight by the Authority of the proper functioning and effectiveness of the AML/CFT supervisory system. The information from the database would enable the Authority to react in a timely manner to potential weaknesses and cases of non-compliance by non-selected obliged entities. In order to ensure that the database can contain all the relevant information that is across the AML/CFT supervisory system, the supervisory authorities should have the flexibility to submit other categories of data in addition to those directly envisaged by the Regulation. In the same vein, the Authority, while managing the database and analysing the submitted data, would be best placed to identify which additional data points or categories could be requested from supervisory authorities to boost the effectiveness of the database. To enable compiling, storing and using a coherent, structured dataset, it is necessary to further specify the format, procedures, timelines and further details on the scope and nature of the data to be transmitted to the database. For that purpose, AMLA should develop a draft regulatory technical standards and submit them to the Commission. The specifications provided in the standard would determine the appropriate level of detail for specific categories of information expected to be transmitted with respect to various type of supervisory activities or types of obliged entities.*

*The data collected with regard to obliged entities in the non-financial sector should consider the principle of proportionality and the mandate of the Authority in the non-financial sector. Additionally, considering that in the non-financial sector the Authority would introduce the Union level oversight for the first time, and the Directive [OP: please insert reference to AMLD6] requires adjustments in the national institutional framework of supervision which need to be transposed, it is necessary to envisage a sufficient period to prepare the integration of the information from supervisory authorities in the non-financial sector. Specifically, the database should have the non-financial sector data submitted by four years after the entry into force of this Regulation, approximately one year after the deadline for transposition of the Directive. However supervisory authorities in the non-financial sector should be able on a voluntary basis already to submit those data before that date. The personal data processed in the context of the database should be retained for a period of up to 10 years after the date of their collection by the Authority. Such duration of the retention period is strictly necessary and proportionate for the purpose of supervisory activities carried out by the Authority and supervisory authorities.*

*The length of the data retention period ensures that the Authority and supervisory authorities retain access to the necessary information on the risk assessment, business activities, controls in place and breaches of individual obliged entities in order to carry out their duties, which requires them to access case-related information over a longer period of time. Such duration of the retention period is notably necessary since supervisory authorities should take into account, among other factors, the gravity, the duration and the repetitiveness of the breach to determine the level of sanctions or measures to be applied, which requires to analyse case-related information regarding a longer period of reference. Similarly, such duration of the data retention period is also necessary with regard to information resulting from fit-and-proper assessments of shareholders or members of the management in order to ensure that supervisory authorities have sufficient information to assess whether they are of good repute, act with honesty and integrity and possesses the knowledge and expertise necessary to carry out their functions, and to ensure ongoing monitoring of those conditions as required by [AMLD]. Personal data should be deleted where it is no longer necessary to keep them. Considering the purpose of the database and the use of information contained therein by various participants of the AML/CFT supervisory system, it should not contain any data covered by the legal privilege.*

█

- (15) With the objective of ensuring a more effective and less fragmented protection of the Union's financial framework, a limited number of the riskiest obliged entities should be directly supervised by the Authority. As ML/TF risks are not proportional to the size of the supervised entities, other criteria should be applied to identify the most risky entities. In particular, two categories should be considered: high-risk cross-border credit and financial institutions with activity in a significant number of Member States, selected periodically; and, in exceptional cases, any entity whose material breaches of applicable requirements are not sufficiently or in a timely manner addressed by its national supervisor. ***In the latter case, either the Authority or financial supervisors could request a transfer of supervision from national to Union level, with a proper justification. The Commission should examine the requests submitted by the Authority and either approve or reject the transfer by means of an official decision and taking into account the justification submitted. Where the request of transfer comes from the financial supervisors to the Authority and involve voluntary delegation of tasks and powers, it should be up to the Authority to render the decision on the necessity of the transfer, and assume direct supervision of the obliged entity or group in question where it finds that the Union interests and solidity of the AML/CFT system so require. All those entities towards which the Authority would be exercising direct supervisory powers would fall under the category of 'selected obliged entities'.***

- (16) The first category of credit and financial institutions, or groups of such institutions should be assessed every three years, based on a combination of objective criteria related to their cross-border presence and activity, and criteria related to their ML/FT risk profile. Only *credit or financial institutions or groups thereof, which are present in a significant number of Member States, regardless of whether they operate through establishments or under the freedom to provide services in Member States, and for which supervision at Union level would therefore be more adequate, should be included in the selection process.*
- (16a) *The periodic assessment of the risk profile of credit and other financial institutions for the purpose of selection for direct supervision should rely on data to be provided by the national financial supervisors and, for already selected obliged entities, by the Authority. In addition, the Authority should ensure harmonised application of the methodology by financial supervisors and provide coordination of the assessment of the risk profile of entities at group level. An implementing technical standard should precise the respective role of the Authority and the financial supervisors in the assessment process. The Authority should ensure alignment, where appropriate, between the methodology for assessment of risk profile for the purpose of the selection process pursuant to article 12 and the methodology for harmonising the assessment of the inherent and residual risk profiles of obliged entities at national level, to be developed in the regulatory technical standards pursuant to Article 31(2) of Directive [OP: please insert reference to AMLD6].*

- (17) ***Given the current wide diversity of approaches adopted by national authorities to the evaluation of the residual risk profile of obliged entities, the process of regulatory development of a refined and detailed harmonised methodology allowing for assessment of residual risk with comparable outcomes is evolving and should be started on the basis of the work carried out by the European Banking Authority as soon as possible. Therefore the methodology for the categorisation of residual risk to be adopted for the first identification of selected obliged entities may be more straightforward and aimed at harmonising the different diverse approaches applied at national level. The Authority should review the methodology it is to apply every three years, taking account of the evolution of the relevant knowledge.***
- (18) The final selection criterion should warrant a level playing field among directly supervised obliged entities, and to that end, no discretion should be left to the Authority or supervisory authorities in deciding on the list of obliged entities that should be subject to direct supervision. Therefore, where a given assessed obliged entity operates cross-border and falls within the high risk category in accordance with the harmonised methodology , it should be deemed a selected obliged entity.

- (19) To provide transparency and clarity to the relevant institutions, the Authority should publish a list of the selected obliged entities within *six months* of commencement of a selection round, after verifying the correspondence of information provided by the financial supervisors to the cross-border activities criteria and the **■ risk profile** methodology. Therefore it is important that at the beginning of each selection period, the relevant financial supervisors, *and, if necessary, the obliged entities themselves*, provide the Authority with up-to-date statistical information to determine the list of financial institutions eligible for assessment in accordance with the assessment entry criteria relating to their cross-border operations. In this context, the financial supervisors should inform the Authority about the **■ risk profile** category that a financial institution falls into in their jurisdictions in accordance with the methodology laid down in the regulatory technical standards. The Authority should then assume the tasks related to direct supervision *six months* after the publication of the list. That time is needed to appropriately prepare the transfer of supervisory tasks from national to Union level, including the formation of a joint supervisory team, and adopting any relevant working arrangements with the relevant financial supervisors.

- (20) To ensure legal certainty and a level playing field among selected entities, any selected entity should remain under direct supervision of the Authority for at least three years, even if since the moment of selection and in the course of the three years it ceases to meet any of the cross-border activity or risk-related criteria due to e.g. potential *ceasing*, consolidation, expansion or re-allocation of activities carried out via establishments or freedom to provide services. The Authority should also ensure that sufficient time is allocated to preparation by the obliged entities and their supervisory authorities to the transfer of supervision from national to Union level. Therefore, each subsequent selection should commence *twelve* months before the end-date of the three year period of supervision of the previously selected entities.
- (20a) *The Authority should supervise financial sector obliged entities with a high risk profile within the Union, where such entities operate in six Member States through multiple establishments or through the freedom to provide services within the EU. In such cases, supranational supervision by the Authority would bring significant added value compared to fragmented supervision between home and host Member States by eliminating the need for national supervisors of home and host Member States to coordinate and align the measures taken vis-à-vis various parts of the single group. In order to ensure homogeneous supervision of groups and a more granular analysis of the risk of the cross-border entities assessed, the assessment of the ML/TF risk of obliged entities which are part of a group should be always done at the level of the group, resulting in a single group-wide risk score to be considered for the purposes of the selection.*

*The entire group should then be considered as the selected obliged entity. While the exact number of entities that could meet the risk and cross-border activities criteria for direct supervision varies and depends on their business model and money-laundering risk profile at the moment of the assessment, it is necessary to ensure an optimal, progressive and dynamic repartition of competence between the Union and national authorities in the first phase of the existence of the Authority. To ensure a sufficient number and adequate range of types of high risk groups and entities that are supervised at Union level, the Authority should have sufficient resources to simultaneously supervise up to 40 groups and entities at least in the first selection process. In case more than 40 entities would qualify for direct supervision based on their high risk profile, the Authority should select among them the 40 entities operating through the freedom of establishment or the freedom to provide services in the highest number of Member States. In the event that this criterion is not sufficient to select 40 entities, in particular where several obliged entities operate in the same number of Member States – for example, entity number 39, 40 and 41 all operate in the same number of Member States – the Authority should be able to distinguish among them and should select those that have the highest ratio of volume of transactions with third countries to the total volume of transactions.*

*In the steady state of functioning of the Authority, and building on experience with supervision in the first selection process, it would be beneficial for the number of entities under its supervision to increase but also for the Authority to ensure a complete coverage of the internal market under its supervision. To that end, on the one hand, in case more than 40 entities would qualify for direct supervision based on their high risk profile, the Authority could, in consultation with the supervisory authorities, agree supervising a specific different number of entities or groups that is greater than 40. In deciding on the number of selected obliged entities, the Authority should take into account its own resources capacity to allocate or additionally hire the necessary number of supervisory and support staff and should ensure that the increase in the financial and human resources is feasible. At the same time, the complete coverage of the internal market could be ensured by supervising at least one entity in each Member State. To that end, in the Member States where no entities were selected following a regular process, it should be the entity with high risk profile in accordance with the risk methodology designed for the selection process, including the criteria to choose between several entities with the high risk profile.*

- (21) The relevant actors involved in the application of the AML/CFT framework should cooperate with each other in accordance with the duty of sincere cooperation enshrined in the Treaties. In order to ensure that the AML supervisory system composed of the Authority and supervisory authorities functions as an integrated mechanism, and that jurisdiction-specific risks and local supervisory expertise are duly taken into account and well utilised, direct supervision of selected obliged entities should take place in the form of joint supervisory teams **and, where appropriate, dedicated on-site inspection teams**. These teams should be led by a staff member of the Authority coordinating all supervisory activities of the team (*'JST coordinator'*). ***The JST coordinator and other staff members of the Authority allocated to the joint supervisory team should be based at the premises of the Authority but should be able to carry out their day-to-day tasks and supervisory activities in any Member States where the selected obliged entity has its operations. To that end, the financial supervisors should assist in ensuring smooth and flexible working arrangements for all the joint supervisory team members.***

The Authority should be in charge of *the* establishment and composition of the joint supervisory team, and *local supervisor involved in the supervision of the entity* should ensure that a sufficient number of their staff members are appointed to the team, taking into account the risk profile of the selected entity in their jurisdiction, *as well as its overall volume of activity. Each supervisor involved in the supervision of the group should appoint a member to the joint supervisory team. However, in cases where the risk of the obliged entity's activities is low in a particular Member State, the financial supervisor in that Member State should be able to choose, in agreement with the JST coordinator, not to appoint a member to the joint supervisory team. Where no member is appointed to the joint supervisory team, the relevant financial supervisor should still have a contact point for any joint supervisory team matters and responsibilities.*

- (22) To ensure that the Authority can fulfil its supervisory obligations in an efficient manner with regard to selected obliged entities, the Authority should be able to obtain any internal documents and information necessary for the exercise of its tasks and for that purpose have general investigation powers afforded to all supervisory authorities under national administrative law. *To that end, the Authority should be able to address information requests to any natural or legal person belonging to the selected obliged entity, such as an obliged entity itself or any legal person within the obliged entity; employees of the obliged entity and persons in comparable positions, including agents and distributors; external contractors which may be natural or legal persons; or third parties to whom a selected obliged entity has outsourced its activities, which may be natural or legal persons.*

- (23) The Authority should have the power to require actions, internal to the entity, to enhance the compliance of obliged entities with the AML/CFT framework, including reinforcement of internal procedures and changes in the governance structure, going as far as removal of members of the management body, without prejudice to the powers of other relevant supervisory authorities of the same selected entity. Following relevant findings related to non-compliance or partial compliance with applicable requirements by the obliged entity, it should be able to impose specific measures or procedures for particular clients or categories of clients who pose high risks. On-site inspections should be a regular feature of such supervision *and could be performed by dedicated teams*. If a specific type of on-site inspection, *for instance with respect to natural person, where the business premises are the same as person's private residence*, requires an authorisation by the national judicial authority, such authorisation should be applied for by the Authority.
- (24) The Authority should have a full range of supervisory powers in relation to directly supervised entities in order to ensure compliance with applicable requirements. These powers should apply in cases where the selected entity does not meet its requirements, in cases where certain requirements are not likely to be met, as well as in cases where internal *procedures* and controls are not appropriate to ensure sound management of selected obliged entity's ML/FT risks. The exercise of these powers could be done by means of binding decisions addressed to selected individual obliged entities.

(25) In addition to supervisory powers *to impose administrative measures*, and in order to ensure compliance, in *any* cases of █ breaches of directly applicable requirements, the Authority should be able to impose █ pecuniary sanctions on the selected obliged entities. *For serious, repeated or systematic breaches, the Authority should always apply pecuniary sanctions.* Such sanctions should be proportionate and dissuasive, should have both punitive and deterrent effect, and should comply with the principle of ne bis in idem. The maximum amounts of pecuniary sanctions should be in line with those established by [please insert reference – 6<sup>th</sup> Anti-Money Laundering Directive] and available to all supervisory authorities across the Union. The basic amounts of these sanctions should be determined within the limits established by the AML/CFT framework, taking into account the nature of the requirements that have been breached. In order for the Authority to take aggravating or mitigating factors adequately into account, adjustments to the relevant basic amount should be possible. With the objective to achieve a timely change of the damaging business practice, the Executive Board of the Authority should be empowered to impose periodic penalty payments to compel the relevant legal or natural person to cease the relevant conduct.

With the aim to heighten awareness of all obliged entities, by encouraging them to adopt business practices in line with the AML/CFT framework, the *pecuniary* sanctions and penalties should be disclosed. ***The disclosure regime for administrative measures as well as the pecuniary sanctions and periodic penalty payments imposed by the Authority and detailed in this Regulation should be closely aligned with that at national level, as provided by Directive [OP: please insert reference to AMLD6].*** The Court of Justice should have jurisdiction to review the legality of decisions adopted by the Authority, the Council and the Commission, in accordance with Article 263 TFEU, as well as for determining their non-contractual liability.

***(26a) It is important that authorities in charge of overseeing implementation of targeted financial sanctions at national level are timely informed of any violation of such obligation by selected obliged entities. To that end, the Authority may share such information with the financial supervisor in the relevant Member State and instruct it to convey such information to the national authority responsible for overseeing the implementation of those sanctions.***

- (27) For non-selected obliged entities, the AML/CFT supervision is to remain primarily at national level, with national competent authorities retaining full responsibility and accountability for direct supervision. The Authority should be granted adequate indirect supervisory powers to ensure that supervisory actions at national level are consistent and of a high quality across the Union. Therefore, it should carry out assessments of the state of supervisory convergence and publish reports with its findings. It should be empowered to ***adopt follow-up measures in the form of*** guidelines and recommendations, ***including individual recommendations*** addressed to ***financial supervisors as a result of the assessment***, with a view to ensuring harmonised and high level supervisory practices across the Union. ***Individual recommendations could contain suggestions of specific follow-up measures which the financial supervisor is expected to make every effort to comply with. Where a financial supervisor does not implement the follow-up measures, the Authority should take the adequate and necessary steps in accordance with this Regulation.***

- (27a)** *The Authority should also be able to settle disagreements between financial supervisors concerning the measures to be taken towards a non-selected obliged entity in the financial sector. In order to ensure constructive cooperation, the Authority should in the first instance attempt to resolve the dispute through a conciliation phase with a time limit. In the event that it does not achieve the desired results, the Authority should be able to adopt a binding decision requiring those supervisors to take specific action or to refrain from certain action, in order to settle the matter and to ensure compliance with Union law.*
- (27b)** *For the purposes of safeguarding the proper functioning and effectiveness of the AML/CFT supervisory system, the Authority should be able to identify and act in cases of systematic failures of supervision caused by breaches of Union law resulting from non-application or improper application of national measures transposing Union Directives. To that end, and without prejudice to the powers of the European Commission to launch an infringement procedure pursuant to TFEU, the Authority should be able to investigate such possible breaches. Where a breach has been established by the Authority, after informing the supervisor concerned and, where appropriate, giving other financial supervisors the opportunity to provide information on the matter, the Authority could, if it considers it appropriate, issue a recommendation to the supervisor in question, outlining the measures to be taken to rectify the breach. Where the shortcomings identified have not been remedied, the Commission should also be able to issue an opinion requiring the supervisor to comply with the recommendation issued by the Authority.*

(28) Certain obliged entities in the financial sector that do not meet the requirements for regular selection might still have a high inherent *and/or residual risk* profile from the money laundering and terrorism financing perspective, or might take on, change or expand activities that entail high risk, not mitigated with a commensurate level of internal controls, thus leading to *serious, repeated or systematic* breaches of its AML/CFT requirements. If there are indications of possible *serious, repeated or systematic* breaches of applicable AML/CFT requirements, they may be a sign of gross negligence on part of the obliged entity. The supervisory authority should ■ be able to adequately respond to any possible breaches and prevent the risks from materialising and leading to gross negligence of AML/CFT requirements. However, in certain cases a national level response might not be sufficient or timely, especially when there are indications that *serious, repeated or systematic* breaches at the level of the entity have already occurred. In those cases, the Authority should ■ request the local supervisor to take specific measures to remedy the situation, including requesting to issue financial sanctions *or other coercive measures*. To prevent money laundering and terrorism risks from materialising, the deadline for action at national level should be sufficiently short.

- (28a) *The Authority should be notified where the situation of any non-selected obliged entity with regard to its compliance with applicable requirements and its exposure to ML/TF risks deteriorates rapidly and significantly, especially where such deterioration could lead to significant harm to the reputation of several Member States or of the Union as a whole.*
- (29) The Authority should have the opportunity to request a transfer of supervisory tasks and powers relating to a specific obliged entity on its own initiative in case of inaction, **failure or inability** to follow its instructions within the provided deadline. Since the transfer of tasks and powers over an obliged entity without the specific request of the financial supervisor to the Authority would require a discretionary decision on the part of the Authority, the Authority should address a specific request to that end to the Commission. In order for the Commission to be able to take a decision coherent with the framework of the tasks allocated to the Authority within the AML/CFT framework, the request of the Authority should enclose an appropriate justification, and should indicate a precise duration of the reallocation of tasks and powers towards the Authority.

The timeframe for the reallocation of powers should correspond to the time the Authority requires to deal with the risks at entity level, and should not exceed three years. The *Authority should be able to request a prolongation of this timeframe in case the breaches identified have not been addressed. This prolongation should be limited to what is necessary to address those breaches and not exceed 3 years. The Commission should adopt a decision transferring powers and tasks for supervising the entity to the Authority swiftly, and in any case without undue delay. That decision should be communicated to the European Parliament and to the Council.*

- (30) In order to improve supervisory practices in the non-financial sector, the Authority should carry out peer reviews of *non-financial supervisors, which should also include peer reviews of public authorities overseeing self-regulatory bodies. To that end, the Authority should develop the methodological framework for such reviews, including rules to avoid any conflict of interest in the conduct of peer reviews and in the drawing-up of findings, and regarding the consideration to be given to evaluations by international organisations or intergovernmental bodies with competence in the field of preventing money laundering and terrorist financing, when deciding on the planning of peer reviews and on their content.*

*With a view to fostering convergence of supervisory practices, the Authority should publish reports with findings from those peer reviews, including shortcomings and good practices identified; those reports could be accompanied by guidelines or recommendations addressed to the relevant public authorities, including public authorities overseeing self-regulatory bodies. Self-regulatory bodies should be able to participate in peer reviews where they have expressed an interest to do so.*

- (31) *With the objective to increase the efficiency of the implementation of AML/CFT measures also in the non-financial sector, the Authority should also be able to investigate possible breaches or incorrect application of Union law by supervisors in that sector as well as public authorities overseeing self-regulatory bodies. Where the Authority establishes that a breach exists, it should be able to issue a recommendation vis-a-vis the non-financial supervisor or supervisory authority concerned specifying the measures to be taken to rectify it. Where no appropriate action has been taken in response to that recommendation, the Authority should also be able to issue a warning to the relevant counterparties of the supervisory authority or non-financial supervisor. The powers of the Authority to issue such recommendations and warnings are without prejudice to the powers of the Commission to launch infringement procedures against Member States where it detects situation of non-implementation or bad implementation of Union law, in accordance with the powers conferred on it under the Treaties.*

- (31a)** *The Authority should also be able to settle disagreements between non-financial supervisors concerning the measures to be taken towards an obliged entity in the non-financial sector. In order to ensure constructive cooperation, the Authority should attempt to resolve the dispute through a conciliation phase with a time limit. At the end of the conciliation phase, the Authority should issue an opinion on how to settle the matter of disagreement.*
- (31b)** *Considering the cross-border nature of money laundering and terrorist financing, effective and efficient cooperation, information exchange and coordinated action between FIUs are of crucial importance. In order to improve such coordination and cooperation, the Authority should be entrusted with tasks and powers enabling the Authority and the FIUs to jointly constitute an FIUs support and coordination mechanism. To that end, the Authority should have sufficient human, financial and IT resources, which should, where necessary, be organisationally separated from the staff carrying out the tasks relating to the Authority's supervisory activities. The success of the support and coordination mechanism depends on the Authority and the FIUs cooperating in good faith and exchanging all the relevant information required to fulfil their respective tasks. In case of a disagreement between FIUs in relation to cooperation and the exchange of information, the Authority should be informed accordingly and should be able to act as a mediator between the relevant FIUs.*

- (32) In order to analyse suspicious activity affecting multiple jurisdictions, the relevant FIUs that received linked reports should be able to efficiently conduct joint analyses of cases of common interest. To this end, the Authority should be able to propose, *initiate*, coordinate and support with all appropriate means the joint analyses of cross-border suspicious transactions or activities. The joint analyses should be triggered where there is a need to conduct such joint analyses pursuant to the relevant provisions in Union law **and in accordance with the methods and criteria for the selection and prioritisation of cases relevant for the conduct of joint analyses developed by the Authority. The FIUs should make every effort to accept the Authority's invitation to take part in a joint analysis. An FIU that declines to take part in a joint analysis exercise should explain the primary reasons for its refusal to the Authority. Where relevant, these reasons should be provided to the FIU that identified the need to carry out joint analysis.** Upon the explicit consent of the FIUs participating in the joint analyses, the staff of the Authority supporting the conduct of joint analyses should be able to receive and process all necessary data and information, including the data and information pertaining to the analysed cases.

- (32a) *The Authority should be able to request FIUs to initiate joint analysis exercises under specific circumstances where, for example, information has been brought to the attention of the Authority by whistleblowers or investigative journalists or where the joint analysis of complex and cross-border cases would add value. The concerned FIUs should respond to the Authority without delay if they are willing to take part in the joint analysis and should provide reasons if they decide not to participate.***
- (32b) *Identifying links with information held by other agencies, bodies and offices, and by relevant third parties at an early stage is critical to ensure that the most relevant cross-border cases, including those requiring extensive operational analysis, are selected. In this respect, subject to the consent of all FIUs that have indicated their willingness to take part in a joint analysis, the staff of the Authority should be authorised to cross-match, on a hit/no-hit basis, the data of those FIUs with the information made available by other FIUs and Union bodies, offices and agencies, including Europol. The Authority should ensure that the most advanced available state-of-the-art technology, including ‘privacy-enhancing technologies’, is used for the purposes of cross-matching information on a hit/no-hit basis.***

*The ma3tch functionality of the FIU.net system is an example of a solution which enables establishing in real time, in a pseudonymous manner, if a subject is already known by the FIU of another country or by an EU body, office or agency, which avoids the unnecessary processing of personal data. In case of a hit, the Authority should share the information that generated a hit with the FIUs involved in the joint analysis. In case of a hit, the Authority should share the information that triggered the hit with Union bodies, offices and agencies subject to the prior consent by the FIU providing the information.*

*(32b) In order to ensure a fast and efficient set up process for the joint analyses, the Authority should be responsible for the establishment and composition of the joint analysis team and its coordination.*

**(32d) *Effective operational cooperation in cross-border cases between the Authority and other relevant Union bodies is of crucial importance. In order to ensure that, where relevant, the results of joint analyses of cross-border cases are effectively followed up, the Authority should disseminate the results of joint analysis to the European Public Prosecutor's Office (EPPO) and to the European Anti-Fraud Office (OLAF) where the results of the joint analysis exercise indicate that a criminal offence, in respect of which the EPPO and OLAF could exercise their competences, may have been committed. Furthermore, subject to the agreement of all FIUs participating in joint analysis exercises, the Authority should also be able to disseminate the results of joint analyses to Europol and Eurojust where the results of the joint analysis exercises indicate that a criminal offence may have been committed in respect of which Europol and Eurojust could exercise their competences. The Authority should be able to exchange strategic information, such as typologies and risk indicators with the EPPO, OLAF, Europol and Eurojust.***

- (32e) *Pursuant to Article 24 of Council Regulation (EU) 2017/1939<sup>5</sup>, the Authority is to report without undue delay to the EPPO any criminal conduct in respect of which it could exercise its competence in accordance with Article 22 and Article 25(2) and (3) of that Regulation. Pursuant to Article 8 of Regulation 883/2013<sup>6</sup>, the Authority is to transmit to OLAF without delay any information relating to possible cases of fraud, corruption or any other illegal activity affecting the financial interests of the Union. In accordance with the applicable provisions in their founding legal instruments, the EPPO and OLAF should inform the Authority about the steps taken in relation to the information provided and any relevant outcomes.*
- (33) In order to improve the effectiveness of the joint analyses, the Authority should be able to *establish methods and procedures for the conduct of the joint analyses. Based on the feedback provided by the FIUs involved in the joint analyses, the Authority should be able to review their conduct, to identify the lessons learnt. Such reviews* should enable the Authority to issue *follow-up reports and conclusions to be shared with all FIUs, without disclosing confidential or restricted information, with the aim to further refine and improve* the methods and procedures for the conduct of joint analyses, *ultimately leading to improving and promoting the analyses themselves.*

<sup>5</sup> Council Regulation (EU) 2017/1939 of 12 October 2017 implementing enhanced cooperation on the establishment of the European Public Prosecutor's Office ('the EPPO') (OJ L 283, 31.10.2017, p. 1).

<sup>6</sup> Regulation (EU, EURATOM) No 883/2013 of the European Parliament and of the Council of 11 September 2013 concerning investigations conducted by the European Anti-Fraud Office (OLAF) and repealing Regulation (EC) No 1073/1999 of the European Parliament and of the Council and Council Regulation (Euratom) No 1073/1999 (OJ L 248, 18.9.2013, p. 1).

- (34) In order to facilitate and improve cooperation between FIUs and the Authority, including for the purposes *of* conducting joint analyses, the FIUs should **█** delegate one staff member per FIU to the Authority **█**. The national FIU delegates should support the Authority's staff in carrying out all the tasks relating to FIUs, including the conduct of joint analyses and the preparation of threat assessments and strategic analyses of money laundering and terrorist financing threats, risks and methods. ***FIU delegates should be operationally independent and autonomous when carrying out their tasks and duties under this Regulation. They should not seek nor take instructions from Union institutions, bodies, offices or agencies, or from governments or other public or private bodies. Their tasks and duties should be without prejudice to the security and confidentiality rules of FIUs.***
- (34a) ***Apart from the joint analyses, the Authority should encourage and facilitate various forms of mutual assistance between FIUs, including training and staff exchanges in order to improve capacity building and enable the exchange of knowledge and good practices amongst FIUs. The Authority's role in supporting FIUs in their activities grants it a unique position to facilitate access by FIUs to databases and tools that are instrumental to improve the quality of financial intelligence.***

*The Authority should use its position to negotiate, on behalf of all FIUs, contracts with providers of those tools and databases, as well as relevant training for its staff and the staff of FIUs. The Authority should also have a mediation role in cases of disagreement between FIUs. To that end, FIUs should be able to refer disputes related to cooperation, including the exchange information between FIUs, to the Authority for mediation after failing to solve them by means of direct contact and dialogue.*

- (35) The Authority should manage, host, and maintain FIU.net, the dedicated IT system allowing FIUs to cooperate and exchange information amongst each other and, where appropriate, with their counterparts from third countries and third parties. The Authority should *keep the system up-to-date, taking into account the needs expressed by the FIUs.* To this end, the Authority should ensure that at all times the most advanced available state-of-the-art technology is used for the development of the FIU.net, subject to a cost-benefit analysis. *The Authority should rely on third-party service providers only for non-essential tasks. In particular, the Authority should not outsource the hosting and management of FIU.net. The Authority should not have access to the content of the information exchanged within FIU.net, except where it is an intended recipient of such information. In order to be able to send, receive and cross-match information, the Authority should be provided with an operational node in the FIU.net system.*

- (36) In order to establish consistent, efficient and effective supervisory and FIU-related practices and ensure common, uniform and coherent application of Union law, the Authority should be able to issue guidelines and recommendations addressed to all or *a* category of obliged entities and all or a category of supervisory authorities and FIUs. The guidelines and recommendations could be issued pursuant to a specific empowerment in the applicable Union acts, or on the own initiative of the Authority, where there is a need to strengthen the AML/CFT framework at Union level.
- (36a) To provide an optimal assistance to FIUs and thereby increase the effectiveness of the FIU support and coordination mechanism, the Authority and the FIUs should be able to strengthen the effectiveness of FIU activities, identifying and promoting best practices. Peer reviews would be the best instrument to allow an objective assessment of such activities and practices, and therefore the Authority should be tasked with organising such peer reviews, based on methods for their conduct developed centrally by the Authority. To be informative, peer reviews should be comprehensive and cover all relevant aspects of the tasks of the FIUs laid out in Chapter III of Directive [insert reference to 6AMLD].***

*Therefore, they should include, inter alia, the adequacy of the FIUs' resources, the measures implemented to ensure the FIUs' operational independence and autonomy, the measures put in place to protect the security and confidentiality of the information processed by the FIUs, the functions related to receipt of STRs, the functions related to operational and strategic analyses of the FIUs and their dissemination, domestic and cross-border cooperation arrangements and practices of the FIUs. The peer reviews could result in issuance by the Authority of guidelines and recommendations aimed at promoting any identified best practices and addressing any shortcomings.*

- (37) The establishment of a solid governance structure within the Authority is essential for ensuring effective exercise of the tasks granted to the Authority, and for an efficient and objective decision-making process. Due to the complexity and variety of the tasks conferred on the Authority in both the supervision and FIU areas, the decisions cannot be taken by a single governing body, as is often the case in decentralised agencies. Whereas certain types of decisions, such as decisions on adoption of common instruments, need to be taken by representatives of appropriate authorities or FIUs, and respect voting rules of the TFEU, certain other decisions, such as the decisions towards individual selected obliged entities, or individual authorities, require a smaller decision-making body, whose members should be subject to appropriate accountability arrangements. Therefore, the Authority should comprise a General Board, and an Executive Board composed of five full-time independent members and of the Chair of the Authority.

- (38) In order to ensure the relevant expertise, the General Board should have two compositions. For all the decisions on the adoption of acts of general application such as the regulatory and implementing technical standards, guidelines, recommendations, and opinions relating to FIUs, it should be composed of the heads of FIUs of Member States ('General Board in FIU composition'). For the same types of acts related to direct or indirect supervision of financial and non-financial obliged entities, it should be composed of the heads of AML/CFT supervisors which are public authorities ('General Board in supervisory composition'). All parties represented in the General Board should make efforts to limit the turnover of their representatives, in order to ensure continuity of the Board's work. All parties should aim to achieve a *gender* balanced representation ■ on the General Board.
- (39) For a smooth decision making process, the tasks should be clearly divided: the General Board in FIU composition should decide on the relevant measures for FIUs, the General Board in supervisory composition should decide on delegated acts, guidelines and similar measures for obliged entities. The General Board in supervisory composition should also be able to provide, *following procedures to be defined in agreement with the Executive Board, its opinion* to the Executive Board on all draft decisions towards individual selected obliged entities proposed by the Joint Supervisory Teams. In absence of such opinion ■, the decisions should be taken by the Executive Board. Whenever the Executive Board deviates from the *opinion* provided by the General Board in supervisory composition in the final decision, it should explain the reasons thereof in writing.

- (40) For the purposes of voting and taking decisions, each Member State should have one voting representative. Therefore, the heads of public authorities should appoint a permanent representative as the voting member of the General Board in supervisory composition. Alternatively, depending on the subject-matter of the decision or agenda of a given General board meeting, public authorities of a Member State may decide on an ad-hoc representative. The practical arrangements related to decision-making and voting by the General Board members in supervisory composition should be laid down in the Rules of Procedure of the General Board, to be developed by the Authority.
- (40a) *In order to assist the General Board in FIU composition with a preparation of all the relevant decisions under its mandate, it should be supported by a standing committee with a more limited composition. The standing committee should support the work of the General Board in FIU composition and perform its duties solely in the interest of the Union as a whole. It should work in close cooperation with FIU delegates and AMLA staff in charge of tasks related to FIUs, and in full transparency vis-a-vis the General Board in FIU composition.*

- (41) The Chair of the Authority should chair the General Board meetings and have a right to vote when decisions are taken by simple majority. The Commission should be a non-voting member on the General Board. To establish good cooperation with other relevant institutions, the General Board should also be able to admit other non-voting observers, ***in particular the representatives*** of the Single Supervisory Mechanism and of each of the three European Supervisory Authorities (EBA, EIOPA and ESMA) for the General Board in its supervisory composition and Europol, the EPPO and Eurojust for the General Board in its FIU composition, where matters that fall under their respective mandates are discussed or decided upon. ***To ensure that relevant Union authorities and bodies are invited to the meetings where their presence would be required or beneficial, the Rules of Procedure of the General Board should clearly define the circumstances under which the Union institutions, bodies and agencies listed above as well as other observers should be admitted to the meetings. When drafting the relevant parts of the Rules of Procedure, the Authority should agree with the Union institutions, bodies and agencies listed above on the terms and conditions of their participation. Such an agreement is presumed where the terms and conditions for participation are already included in the bilateral working arrangements or MoUs mandated by the present Regulation.*** To allow a smooth ***decision-making*** process, decisions of the General Board should be taken by a simple majority, except for decisions concerning draft regulatory and implementing technical standards, guidelines and recommendations which should be taken by a qualified majority of Member State representatives in accordance with voting rules of the TFEU.

- (42) The governing body of the Authority should be the Executive Board composed of the Chair of the Authority and of five full time members, *including the Vice-Chair, and appointed by the European Parliament and the Council upon a proposal of the* General Board based on the shortlist *of qualified candidates drawn up* by the Commission. With the aim of ensuring a speedy and efficient *decision-making* process, the Executive Board should be in charge of planning and execution of all the tasks of the Authority except where specific decisions are explicitly allocated to the General Board. In order to ensure objectivity and appropriate rapidity of the decision-making process in the area of direct supervision of the selected obliged entities, the Executive Board should take all binding decisions addressed to selected obliged entities. *The representatives of the financial supervisors where the entity is established should be able to attend the deliberation of the Executive Board. In addition, together with a representative of the Commission, the Executive Board should be collectively responsible for the administrative and budgetary decisions of the Authority* .
- (43) To allow for swift decisions, all decisions of the Executive Board, including the *decisions* where the Commission has a right to vote, should be taken by simple majority, with the Chair holding a casting vote in case of a tied vote. To ensure sound financial management of the Authority, *with respect to the decisions where the Commission has a right to vote and the Commission's opinion is deviated from,* the Executive Board **█** should be *able to provide a thorough justification of such deviation.*

- (44) To ensure the independent functioning of the Authority the five Members of the Executive Board and the Chair of the Authority should act independently and in the interest of the Union as a whole. They should behave, both during and after their term of office, with integrity and discretion as regards the acceptance of certain appointments or benefits. To avoid giving any impression that a Member of the Executive Board might use its position as a Member of the Executive Board of the Authority to get a high-ranking appointment in the private sector after his term of office and to prevent any post-public employment conflicts of interests, a cooling-off period for the five Members of the Executive Board, including the Chair of the Authority, should be introduced.
- (45) The Chair of the Authority should be appointed based on objective criteria by the Council after approval by the European Parliament. ***Both the European Parliament as well as the General Board could conduct hearings of the candidates for the position of the Chair shortlisted by the Commission. In order to ensure an informed choice of the best candidate by the European Parliament and the Council and a high degree of transparency in the process of appointment, the General Board could issue a public opinion following its hearings, or transmit its opinion to the European Parliament, the Council, or the Commission. The Chair*** should represent the Authority externally and should report on the execution of Authority's tasks.

- (46) The Executive Director of the Authority should be appointed by the Executive Board based on a shortlist from the Commission. *To enable an optimal choice, the shortlist of candidates to be prepared by the Commission should comprise at least two candidates selected by the Commission based on the grounds of merit and documented high-level administrative, budgetary and management skills, which should be demonstrated by the shortlisted candidates during an open selection procedure.* The Executive Director of the Authority should be a senior administrative official of the Authority, in charge of the day-to-day management of the Authority, and responsible for budget administration, procurement, and recruitment and staffing.
- (46a) *Equality between women and men and diversity are fundamental values of the Union, which it set out to promote across the whole range of Union actions. While progress has been made in these areas over time, more is needed to achieve balanced representation in decision-making, whether at Union or at national level. The Authority's main governing body, the Executive Board, would be collegial and composed of a Chair and five other independent members, while the day-to-day management would be entrusted to an Executive Director.*

*All those persons would be selected on the basis of an open selection procedure primarily guided by individual merit-based criteria. At the same time, collectively the appointments should result in the Authority collegially steered by a group with sufficiently diverse expertise, background and gender balanced representation. Considering that the Commission is tasked with preparation of the shortlists of the candidates for all the aforementioned positions, it should be guided by an imperative to consider the collective outcome of the appointments. Specifically, the shortlisted candidates should allow the appropriate appointing authorities to make the choices ultimately enabling sufficient diversity and gender balance among top management of the Authority.*

- (47) To protect effectively the rights of parties concerned, for reasons of procedural economy and to reduce the burden on the Court of Justice of the European Union, the Authority should provide natural and legal persons with the possibility to request a review of decisions taken under the powers related to direct supervision and conferred on the Authority by this Regulation and addressed to them, or which are of direct and individual concern to them. The independence and objectivity of the decisions taken by the Administrative Board of Review should be, among others, ensured by its composition of five independent and suitably qualified persons. Decisions of the Administrative Board of Review should be in turn appealable before the Court of Justice of the European Union.

- (48) *It is necessary to provide the Authority with the requisite human and financial resources so that it can fulfil the objectives, tasks and responsibilities assigned to it under this Regulation.* To guarantee the proper functioning of the Authority, funding should be provided, *depending on the tasks and functions* by a combination of fees levied on certain obliged entities and a contribution from the Union budget. *To ensure that the Authority can fulfil its tasks as direct and indirect supervisor of obliged entities, an adequate mechanism for the determination and the collection of the fees should be introduced. As regards the fees levied on selected obliged entities and certain non-selected obliged entities, the methodology for their calculation and the process of collection of fees should be developed in a delegated act of the Commission. The fees levied on certain obliged entities should be calculated according to the principle of proportionality and taking into account, in particular, whether the obliged entities have qualified for direct supervision or not, their risk profile and their turn-over. The methodology should be calibrated in a way to ensure that a lower risk profile results in a smaller fee contribution relative to the size of the entity. The contribution from the Union budget is to be decided by the Budgetary Authority through the budgetary procedure. To that end, the Authority should submit to the Commission a statement of estimates. It should also adopt financial rules after consulting the Commission.*

- (50) The rules on establishment and implementation of the budget of the Authority, as well as the presentation of annual accounts of the Authority, should follow the provisions of Commission Delegated Regulation (EU) 2019/715<sup>7</sup> as regards cooperation with the European Public Prosecutor's Office and the effectiveness of the European Anti-Fraud Office investigations.
- (51) In order to prevent and effectively combat internal fraud, corruption or any other illegal activity within the Authority, it should be subject to Regulation (EU, Euratom) No 883/2013 as regards cooperation with the European Public Prosecutor's Office and the effectiveness of the European Anti-Fraud Office investigations. The Authority should accede to Interinstitutional Agreement concerning internal investigations by OLAF, which should be able, to carry out on-the-spot checks within the area of its competence.
- (52) As stated in the Cybersecurity Strategy for the European Union<sup>8</sup>, it is essential to ensure a high level of cyber resilience in all EU institutions, bodies and agencies due to the increasingly hostile threat environment.

The Executive Director must thus ensure appropriate IT risk management, a strong internal IT governance and sufficient IT security funding. *As a rule, at least 10% of the Authority's IT expenditure should be transparently allocated to direct IT security. The contribution to the Computer Emergency Response Team of the European Institutions, Bodies and Agencies (CERT-EU) could be counted in this minimum expenditure requirement. The Authority should work closely with the CERT-EU and report major incidents with 24 hours to CERT EU as well as to the Commission.*

- (53) The Authority should be accountable to both the European Parliament and the Council for the execution of its tasks and implementation of this Regulation. The Chair of the Authority should present a respective report to the European Parliament, the Council and the Commission on a yearly basis.
- (54) The staff of the Authority should be composed of temporary agents, contractual agents and seconded national experts, *including the national delegates placed at the disposition of the Authority by Union FIUs but remaining under the authority of their national FIU*. The Authority, in agreement with the Commission, should adopt the relevant implementing measures in accordance with the arrangements provided for in Article 110 of the Staff Regulations<sup>9</sup>.

- (55) To ensure that confidential information is treated accordingly, all members of the governing bodies of the Authority, all staff of the Authority, including seconded staff and staff placed at the disposition of the Authority, as well as any persons carrying out tasks for the Authority on a contractual basis, should be subject to obligation of professional secrecy, including any confidentiality restrictions and obligations stemming from the relevant provisions of Union legislation, and related to the specific tasks of the Authority. However, confidentiality and professional secrecy obligations should not prevent the Authority from cooperating with, exchanging or disclosing information to other relevant national or Union authorities or bodies, where it is necessary for the performance of their respective tasks and where such cooperation and exchange of information obligations are envisaged in Union law.

(56) Without prejudice to the confidentiality obligations that apply to the Authority's staff and representatives in accordance with the relevant provisions in Union law, the Authority should be subject to Regulation (EC) No 1049/2001 of the European Parliament and of the Council <sup>10</sup>. In line with the confidentiality and professional secrecy restrictions related to supervisory and FIU support and coordination tasks of the Authority, such access should not be extended to confidential information handled by the staff of the Authority. In particular, any operational data or information related to such operational data of the Authority and of the EU FIUs that is *handled by staff* of the Authority due to carrying out the tasks and activities related to support and coordination of FIUs should be deemed as confidential. With regard to supervisory tasks, access to information or data of the Authority, the financial supervisors, or the obliged entities obtained in the process of carrying out the tasks and activities related to direct supervision should in principle also be treated as confidential and not subject to any disclosure. However, confidential information listed that relates to a supervisory procedure can be fully or partially disclosed to the obliged entities which are parties to such supervisory procedure, subject to the legitimate interest of legal and natural persons other than the relevant party, in the protection of their business secrets.

<sup>10</sup> Regulation (EC) No 1049/2001 of the European Parliament and of the Council of 30 May 2001 regarding public access to European Parliament, Council and Commission documents (OJ L 145, 31.5.2001, p. 43).

- (57) Without prejudice to any specific language arrangements that could be adopted within AML supervisory system and with selected obliged entities, Council Regulation No 1<sup>11</sup> should apply to the Authority and any translation services which may be required for the functioning of the Authority should be provided by the Translation Centre for the Bodies of the European Union.
- (58) Without prejudice to the obligations of the Member States and their authorities, the processing of personal data on the basis of this Regulation for the purposes of the prevention of money laundering and terrorist financing should be considered necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the Authority under Article 5 of Regulation (EU) 2018/1725 of the European Parliament and of the Council<sup>12</sup> and Article 6 of Regulation 2016/679 of the European Parliament and of the Council<sup>13</sup>.

---

<sup>11</sup> Council Regulation No 1 determining the languages to be used by the European Economic Community (OJ 17, 6.10.1958, p. 385).

<sup>12</sup> Regulation (EU) 2018/1725 of the European Parliament and of the Council of 23 October 2018 on the protection of natural persons with regard to the processing of personal data by the Union institutions, bodies, offices and agencies and on the free movement of such data, and repealing Regulation (EC) No 45/2001 and Decision No 1247/2002/EC (OJ L 295, 21.11.2018, p. 39).

<sup>13</sup> Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) (OJ L 119, 4.5.2016, p. 1).

*Regulation (EU) No 2018/1725 requires the Commission to consult the European Data Protection Supervisor when preparing delegated or implementing acts that have an impact on the protection of individuals' rights and freedoms with regard to the processing of personal data. This may be the case for regulatory and implementing technical standards to be developed by the Authority. In order to ensure a smooth process for the preparation and adoption of those acts, when the Authority considers that there is an added value in consulting the European Data Protection Supervisor already at the stage of their development, it should inform the Commission thereof and obtain its authorisation to proceed with the consultation.*

*(58a) Reporting of irregularities by employees of obliged entities or groups can provide the Authority with critical information on the overall level of compliance by credit and financial institutions across the Union with AML/CFT requirements. Similarly, reporting by employees of supervisory authorities, self-regulatory bodies performing supervisory functions and FIUs can assist the Authority in its role of ensuring high-quality supervision and supporting the development of effective financial intelligence across the internal market.*

*However, those employees need to have sufficient assurance that their reports will be treated with a high level of confidentiality and that their personal data will not be disclosed under any circumstances. To that end, the Authority should have in place measures to maintain the confidentiality of reports. In establishing its internal rules for the handling of reports concerning possible breaches of AML/CFT rules, the Authority should ensure that reports by employees of selected obliged entities are prioritised and may set out procedures to deal with repetitive reports, high inflows of reports and situations where reports are submitted, which concern breaches that fall outside the Authority's mandate. In addition, persons reporting breaches relating to AML/CFT to the AMLA should qualify for the protection provided under Directive 2019/1937, provided the conditions established therein are fulfilled.*

(59) The Authority should establish cooperative relations with the relevant Union agencies and bodies, including Europol, Eurojust, the EPPO, and the European Supervisory Authorities, namely the European Banking Authority, the European Securities and Markets Authority and the European Insurance and Occupational Pensions Authority. To improve cross-sectoral supervision and a better cooperation between prudential and AML/CFT supervisors, the Authority should also establish cooperative relations with the authorities competent for prudential supervision of financial sector obliged entities, including the European Central Bank with regard to matters relating to the tasks conferred on it by Council Regulation (EU) No 1024/2013<sup>14</sup>, as well as with resolution authorities as defined in Article 3 of Directive (EU) 2014/59/EU of the European Parliament and the Council<sup>15</sup>, designated Deposit Guarantee Schemes authorities as defined in Article 2 (1), point 18 of Directive 2014/49/EU of the European Parliament and the Council<sup>16</sup> ***and competent authorities as defined in Article 3, point (35) of the Regulation (EU) 2023/1114 of the European Parliament and of the Council.***

---

<sup>14</sup> Council Regulation (EU) No 1024/2013 of 15 October 2013 conferring specific tasks on the European Central Bank concerning policies relating to the prudential supervision of credit institutions (OJ L 287, 29.10.2013, p. 63).

<sup>15</sup> Directive 2014/59/EU of the European Parliament and of the Council of 15 May 2014 establishing a framework for the recovery and resolution of credit institutions and investment firms and amending Council Directive 82/891/EEC, and Directives 2001/24/EC, 2002/47/EC, 2004/25/EC, 2005/56/EC, 2007/36/EC, 2011/35/EU, 2012/30/EU and 2013/36/EU, and Regulations (EU) No 1093/2010 and (EU) No 648/2012 of the European Parliament and of the Council (OJ L 173, 12.6.2014, p. 190).

<sup>16</sup> Directive 2014/49/EU of the European Parliament and of the Council of 16 April 2014 on deposit guarantee schemes (OJ L 173, 12.6.2014, p. 149).

To this end, the Authority should be able to conclude agreements or memoranda of understanding with such bodies, including with regard to any information exchange which is necessary for the fulfilment of the respective tasks of the Authority and these bodies. The Authority should make its best efforts to share information with such bodies on their request, within the limits posed by legal constraints, including data protection legislation. In addition, the Authority should enable effective information exchange between all financial supervisors in the AML/CFT supervisory system and the aforementioned authorities, such cooperation and information exchanges should take place in a structured and efficient way.

- (60) ***Partnership for information sharing*** have become increasingly important cooperation and information exchange fora between ***competent authorities and obliged entities in some Member States. Given the Authority's mandate in preventing and detecting money laundering, its predicate offences and terrorist financing, it should be possible for the Authority to set up Partnership for Information Sharing pursuing this goal. Information exchanged within the scope of those Partnerships for Information Sharing should be consistent with the scope of the Authority's mandate.*** Where the Authority would act as direct supervisor of selected obliged entities ***or in support to FIUs*** which are part of a ***Partnership for Information Sharing*** in any Member State, it could be beneficial for the Authority to also participate therein, on conditions determined by the relevant national public authority or authorities that set up such ***Partnership for Information Sharing*** and with their explicit agreement.

- (61) Considering that cooperation between supervisory, administrative and law enforcement authorities is crucial for successful combatting of money laundering and terrorism financing, and certain Union authorities and bodies have specific tasks or mandates in that area, the Authority should make sure that it is able to cooperate with such authorities and bodies, in particular OLAF, Europol, Eurojust, and the EPPO. If there is a need to establish specific working arrangements or conclude Memoranda of Understanding between the Authority and these bodies and authorities, the Authority should be able to do so. The arrangement should be of strategic and technical nature, should not imply sharing of any confidential or operational information in possession of the Authority and should account for tasks already carried out by the other Union institutions, bodies, offices or agencies as regards the prevention of and fight against money laundering and terrorist financing.
- (62) Since both predicate *offences* as well as the crime of money laundering itself often are of global nature, and given that the Union obliged entities also operate with and in third countries, effective cooperation with all the relevant third country authorities in the areas of both supervision and functioning of FIUs are crucial for strengthening the Union AML/CFT framework. Given the Authority's unique combination of direct and indirect supervision and FIU cooperation-related tasks and powers, it should be able to take an active role in such external cooperation arrangements.

Specifically, the Authority should be empowered to develop contacts and enter into administrative arrangements with authorities in third countries that have regulatory, supervisory and FIU-related competences. The Authority's role could be particularly beneficial in cases where the interaction of several Union public authorities and FIUs with third country authorities concerns matters within the scope of the Authority's tasks. In such cases, the Authority should have a leading role in facilitating this interaction.

***(62a) Given its tasks and powers in the field of AML/CFT, the Authority is well placed to support the action of the Commission in international fora, including the Financial Action Task Force, with a view to promoting a united, common, consistent and effective representation of the Union's interests there. Therefore, the Authority should assist the Commission in its activities as member of the FATF, and contribute to the representation of the Union and the defence of its interests in international fora. In view of the importance of the mutual evaluations carried out by the Financial Action Task Force and Moneyval, and where they concern Member States, the staff of the Authority should make themselves available and cooperate with the assessment teams responsible for carrying out evaluations, where needed.***

(63) Since the Authority will have a full range of powers and tasks related to direct and indirect supervision and oversight of all obliged entities, it is necessary that these powers remain consolidated within one Union body, and do not give rise to conflicting competences with other Union bodies. Therefore, the European Banking Authority should not retain its tasks and powers related to anti-money laundering and countering the financing of terrorism *after the present Regulation becomes fully applicable*, and the respective articles in Regulation (EU) No 1093/2010 of the European Parliament and of the Council<sup>17</sup> should be deleted. The resources allocated to the European Banking Authority for the fulfilment of those tasks should be transferred to the Authority. Considering that all three European Supervisory Authorities (EBA, ESMA and EIOPA) will be cooperating with the Authority, and may attend the meetings of the General Board in supervisory composition as observers, the same possibility should be afforded to the Authority in respect of meetings of the Board of Supervisors of the European Supervisory Authorities. In cases where the respective Boards of Supervisors discuss or decide on matters that are relevant for the execution of the Authority's tasks and powers, the Authority should be able to participate in their meetings as an observer.

- (64) The Authority should *assume most of its tasks and powers in accordance with the present Regulation by mid-2025. Direct supervision of selected obliged entities should commence as of 2028*. The methodology shall comprise guidelines, recommendations, ***opinions*** and other measures and instruments as appropriate, including in particular draft regulatory and implementing technical standards, on the basis of the empowerments laid down in the acts referred to in Article 1(2).
2. When developing the supervisory methodology the Authority shall make a distinction between obliged entities, ***including*** on the ***basis of their activities and the type and the nature of money laundering and terrorist financing risks to*** which they ***are exposed***. ***The tools developed by the Authority shall ensure collection of objective and comparable AML/CFT-related data and information from obliged entities and enable efficient and speedy exchange of information between supervisors and the Authority.***

***The Authority shall endeavour to develop these tools as soon as the common supervisory methodology referred to in the first paragraph is in place and applicable across the entire AML/CFT supervisory system.***

3. The methodology shall reflect high supervisory standards at Union level and shall build on relevant international standards and guidance. The Authority shall periodically review and update its supervisory methodology, taking into account the evolution of risks affecting the internal market, ***including risks and trends identified by national law enforcement authorities and FIUs. The methodology shall, to the extent possible, take into account best practices and guidance developed by international standard setters.***

### *Settlement of disagreements between financial supervisors in cross-border situations*

- 1. The Authority may assist financial supervisors in reaching an agreement in accordance with the procedure set out in paragraphs 3 to 5 of this Article at the request of one or more financial supervisors pursuant to Articles 34, 34a, 36 and 39a of Directive [AMLD] or in other instances where a financial supervisor disagrees with the procedure or content of an action, proposed action, or inactivity of another financial supervisor insofar as it affects its own supervisory tasks and responsibilities towards a specific non-selected obliged entity or multiple non-selected obliged entities.*
- 2. In cases other than those covered by Article 34, 36, 34a and 39a of Directive [OP: please insert reference to AMLD], a financial supervisor shall notify the Authority without undue delay that its assistance is required where a provision in Union law requires the financial supervisor to reach an agreement, an arrangement, or other form of established or formalized cooperation relating to supervision of specific non-selected obliged entities with another financial supervisor or supervisors, and either of the following occurs:*

- (a) *the agreement has been reached but has not been effectively applied or adhered to by one of the parties;*
- (b) *a financial supervisor concludes that a disagreement exists, on the basis of objective reasons;*
- (c) *two months have elapsed from the date of receipt by a financial supervisor of a request by the financial supervisor addressing the Authority to take certain action in order to comply with those legislative acts and the requested supervisor has not adopted a decision that satisfies the request.*
3. *The Executive Board shall assess the request and notify the relevant parties whether it considers it justified and intends to act upon it in line with this Article.*
4. *The Authority shall set a time limit for conciliation between the financial supervisors taking into account any relevant time periods specified in Union law and the complexity and urgency of the matter. For the purposes of the conciliation phase, the Authority shall act as a mediator. Where necessary or provided for in the Union law, it shall issue an opinion on how to settle the matter of disagreement.*

5. *Where the financial supervisors fail to reach an agreement during the conciliation phase referred to in paragraph 4, or where they fail to follow the opinion issued by Authority, the Authority may take a decision requiring those supervisors to take specific action, or to refrain from certain action, in order to settle the matter, and to ensure compliance with Union law. The decision of the Authority shall be binding on the financial supervisors. The Authority's decision may require financial supervisors to revoke or amend a decision that they have adopted or to make use of the powers which they have under the relevant Union law.*

*The Authority shall notify the financial supervisors of the conclusion of the procedures under paragraphs 4 and 5 together with, where applicable, its decision taken under paragraph 5.*

1. *Where a financial supervisor has not applied measures laid down in Directive [please insert reference – proposal for 6th Anti-Money Laundering Directive - COM(2021)0423 final] or the provisions of national law transposing that Directive, or has applied measures in a way that appears to be a breach of Union law leading to systematic failures in its supervision which affect multiple obliged entities and undermine the effectiveness of the AML/CFT supervisory system, the Authority shall act in accordance with the powers set out in paragraphs 2, 3 and 4 of this Article.*
2. *The Authority may initiate an investigation of a potential breach of Union law referred to in paragraph 1 on its own initiative where it has an indication of such a breach derived from well-substantiated information collected by the Authority when carrying out its tasks pursuant to this Regulation.*

*The Authority may also investigate an alleged breach or non-application of Union law upon a well-substantiated request of one or more financial supervisors, the European Parliament, or the Commission.*

*Where an investigation has been requested, the Authority shall duly inform the requestor on how it intends to proceed with the case and whether an investigation into an alleged breach is warranted. Prior to deciding to investigate a potential breach of Union law, the Authority shall inform the financial supervisor concerned.*

- 3. The financial supervisor shall, without delay, provide the Authority with all information which the Authority considers necessary for its investigation, including with regard to how the acts referred to in paragraph 1 are applied in accordance with Union law.*
- 4. Where deemed appropriate and necessary, the Authority may also, after having informed the financial supervisor concerned, provide an opportunity to all other financial supervisors to transmit information to it that they deem relevant or address a duly justified and reasoned request for information to any other financial supervisor directly. The addressees of such a request shall, without undue delay, provide the Authority with clear, accurate and complete information.*

5. *The Authority may, no later than six months from the date of initiating its investigation, address a recommendation to the financial supervisor subject to investigation, setting out the action necessary to comply with Union law.*

*Before issuing such a recommendation, the Authority shall engage with the financial supervisor, where it considers such engagement appropriate in order to resolve the systematic failures of supervision resulting in the breach of Union law, in an attempt to reach agreement on the actions necessary for compliance with Union law.*

*The financial supervisor shall, within 10 working days of receipt of the recommendation, inform the Authority of the steps it has taken or intends to take to ensure compliance with Union law.*

6. *Where the financial supervisor has not complied with Union law within one month of the date of receipt of the Authority's recommendation, the Commission may, after having been informed of that fact by the Authority, or on its own initiative, issue a formal opinion requiring the financial supervisor to take the action necessary to comply with Union law. The Commission's formal opinion shall take into account the Authority's recommendation.*

*The Commission shall issue such a formal opinion within three months of the date of adoption of the recommendation. The Commission may extend that period by one month.*

*The Authority and the financial supervisor shall provide the Commission with all necessary information.*

7. *The financial supervisor shall, within 10 working days of receipt of the formal opinion referred to in paragraph 4, inform the Commission and the Authority of the steps it has taken or intends to take to comply with that formal opinion. - (d) the effectiveness and the degree of convergence reached with regard to the enforcement of the provisions adopted in the implementation of Union law, including the *pecuniary* sanctions and administrative measures imposed against persons responsible where those provisions have not been complied with.

4. The Authority shall produce a report setting out the results of the peer review. That peer review report shall be *jointly* prepared by the *staff of the Authority and the relevant staff of the non-financial supervisors involved in the peer review* and adopted by the Executive Board, having received the observations of the General Board in supervisory composition as to the consistency of application of the methodology with other peer review reports. The report shall explain and indicate the follow-up measures that are deemed appropriate, proportionate and necessary as a result of the peer review. Those follow-up measures may be adopted in the form of guidelines and recommendations pursuant to Article 43 and opinions pursuant to Article 44. The non-financial supervisors shall make every effort to comply with any guidelines and recommendations issued, in accordance with Article 43.

6. The Authority shall provide a follow-up report two years after the publication of the peer review report. The follow-up report shall be ***jointly*** prepared by the ***staff of the Authority and the relevant staff of the non-financial supervisors involved in the*** peer review and adopted by the Executive Board, having received the observations of the General Board in supervisory composition on the consistency with other peer review reports. 2. *To that end, the Authority may:*

- (a) suggest the establishment of colleges and the convocation and organisation of college meetings, where such college has not been established although the Authority considers that the money laundering and terrorist financing risks exposure of the obliged entity or group and the scale of its cross-border activities justify the establishment of a college;*

- (c) assist in the organisation of joint supervisory plans and joint on-site or off-site inspections;*

The *supervisor or public authority concerned* shall, within ten working days of receipt of the recommendation, inform the Authority of the steps it has taken or intends to take to *resolve the breach*.

4. Where the *supervisor or public* authority *has not resolved the identified breach referred to in paragraph 3, first subparagraph*, within one month from receipt of the Authority's recommendation, the *Authority shall address a warning detailing the breach(es) and identifying measures to be implemented by the addressees of the warning to mitigate their effects*.

#### Article 33

##### Conduct of joint analyses

1. Where, pursuant to Article 25 of [OP please insert the next number to the AMLD, COM(2021)0423] **and with respect to the criteria referred to in paragraph -1a**, a FIU of a Member State identifies a potential need to conduct a joint analysis with one or several FIUs in other Member States, it shall notify the Authority thereof.

**The Authority shall register all notifications received pursuant to the first subparagraph and assess the relevance of the case in accordance with the methods and criteria referred to in paragraph -1a. Where the Authority assesses that the case is relevant, it shall inform within five days of the initial notification the FIUs in all the relevant Member States and invite them to take part in the joint analysis** . *In case of a hit, the Authority shall share with all FIUs participating in the joint analysis the information that triggered the hit to the extent that the provider of the information authorised its sharing and that the information is necessary for the conduct of the joint analysis.*

*For the purposes of this paragraph, the Authority shall use a system designed for the cross-matching of information relevant for the purposes of preventing money laundering, its predicate offences and terrorist financing in a proportionate manner. That system shall ensure a level of security and confidentiality proportionate to the nature and extent of the information cross-matched. The methods and procedures to be established for the conduct of the joint analyses pursuant to Article 34(1) of this Regulation and the working arrangements to be concluded pursuant to Article 80(2) of this Regulation shall specify the methods for carrying out the cross-matching on the basis of a hit/no-hit system as referred to in the first subparagraph.*

4. *Upon explicit consent of all FIUs participating in the joint analysis and where the results of the joint analysis indicate that there are reasonable grounds to suspect that a criminal offence has been committed in respect of which Eurojust could exercise its competence in accordance with Regulation (EU) 2018/1727, the Authority shall disseminate the results of the joint analyses and any additional relevant information to Eurojust.*
5. *The Authority may exchange strategic and other non-operational information, such as typologies and risk indicators with the EPPO, Europol, Eurojust and OLAF, in the areas within their competence. 3. On the basis of the feedback referred to in paragraph 2, or on its own initiative, the Authority may issue follow-up reports relating to the conduct of joint analyses, including specific suggestions on adjustments regarding the methods and procedures for the conduct of the joint analyses, and conclusions on the outcome of the joint analyses. The follow-up report shall be shared with all FIUs, without disclosing confidential or restricted information on the case. The conclusions and recommendations relating to the conduct of the joint analyses shall be shared with the FIUs that participated in the relevant joint analyses, and with all the other FIUs insofar as these conclusions do not contain confidential or restricted information.
