of [dd/mm/2023]

**amending Decision 2014/512/CFSP concerning restrictive measures  
in view of Russia's actions destabilising the situation in Ukraine**

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on European Union and in particular Article 29 thereof,

Having regard to the proposal from the High Representative of the Union for Foreign Affairs and Security Policy,

Whereas:

- (1) On 31 July 2014, the Council adopted Decision 2014/512/CFSP <sup>(1)</sup>.
- (2) The Union remains unwavering in its support for Ukraine's sovereignty and territorial integrity.
- (3) In its conclusions of 9 February 2023, the European Council reiterated its resolute condemnation of Russia's war of aggression against Ukraine, which constitutes a manifest violation of the UN Charter. The European Council also reiterated that the Union stands ready to continue to reinforce its restrictive measures against Russia and it stated that anti-circumvention measures will be reinforced.
- (4) In view of the gravity of the situation and in response to Russia's war of aggression against Ukraine, it is appropriate to introduce further restrictive measures.
- (5) In particular, it is appropriate to restrict the possibility to hold any posts in the governing bodies of critical entities, as defined in Directive (EU) 2022/2557 <sup>(2)</sup>, European critical infrastructure, as defined in Council Directive 2008/114/EC <sup>(3)</sup>, and critical infrastructure, as

---

<sup>1</sup> Council Decision 2014/512/CFSP of 31 July 2014 concerning restrictive measures in view of Russia's actions destabilising the situation in Ukraine (OJ L 229, 31.7.2014, p. 13).

<sup>2</sup> Article 2, point (1) of Directive (EU) 2022/2557 of the European Parliament and of the Council of 14 December 2022 on the resilience of critical entities and repealing Council Directive 2008/114/EC (OJ L 333, 27.12.2022, p. 164).

<sup>3</sup> Article 2, point (b), of Council Directive 2008/114/EC of 8 December 2008 on the identification and designation of European critical infrastructures and the assessment of the need to improve their protection (OJ L 345, 23.12.2008, p. 75).

## **HR(2023) 46** *Limited*

defined in Council Directive 2008/114/EC and Directive (EU) 2022/2557 <sup>(4)</sup>. As providers of essential services, critical entities and infrastructures play an indispensable role in the maintenance of vital societal functions or economic activities in the internal market in an increasingly interdependent Union economy. Russia's influence in such entities and infrastructures could jeopardise their well-functioning and ultimately constitute a hazard for the provision of essential services to European citizens.

- (6) The Union framework on critical entities and infrastructures has been set out in Council Directive 2008/114/EC (repealed with effect from 18 October 2024) on the identification and designation of European critical infrastructures and Directive (EU) 2022/2557 on the resilience of critical entities, with the aim of both enhancing the resilience of critical entities in the internal market by harmonised minimum rules and assisting them by means of coherent and dedicated support and supervision measures. According to the current legal framework, this new prohibition to hold any posts in the governing bodies applies to European critical infrastructures and critical infrastructures identified or designated as such under national law, as defined in Council Directive 2008/14/EC, until 18 October 2024. As from 18 October 2024, the prohibition will apply to critical entities and critical infrastructures, as defined in Directive (EU) 2022/2557. Directive (EU) 2022/2557 lays down the obligation for Member States to identify by 17 July 2026 in their national law the critical entities for the sectors and subsectors set out in its annex. Therefore, as from 17 July 2026, all the critical entities identified or designated as such by Member States will be concerned by the prohibition to hold any posts in the governing bodies.
- (7) It is also appropriate to prohibit the provision of gas storage capacity to Russian nationals, natural persons residing in Russia or legal persons or entities established in Russia. Gas storage capacity being a critical asset for the security of supply of gas in the Union, this prohibition is necessary in order to avoid Russia's weaponisation of its gas supply and risks of market manipulation that would be detrimental to the critical energy supply of the Union.
- (8) In order to avoid circumvention and ensure compliance with the prohibition for any non-Russian-registered aircraft which is owned or chartered, or otherwise controlled by any Russian natural or legal person, entity or body from landing in, taking off from, or overflying, the territory of the Union, it is appropriate to introduce an obligation for aircraft operators to notify non-scheduled flights to their competent authorities. The concerned Member State should inform other Member States, the Network Manager and the Commission about such flights.

---

<sup>4</sup> Article 2, point (a), of Council Directive 2008/114/EC of 8 December 2008 on the identification and designation of European critical infrastructures and the assessment of the need to improve their protection (OJ L 345, 23.12.2008, p. 75); Article 2(4) of Directive (EU) 2022/2557 of the European Parliament and of the Council of 14 December 2022 on the resilience of critical entities and repealing Council Directive 2008/114/EC (OJ L 333, 27.12.2022, p. 164).

## HR(2023) 46

### *Limited*

- (9) To minimise the risk of circumvention of sanctions, it is also appropriate to prohibit the transit via the territory of Russia of dual-use goods and technology exported from the Union.
- (10) It is also appropriate to add certain entries to the list of legal persons, entities and bodies set out in Annex IV to Decision 2014/512/CFSP, i.e. the list of entities supporting directly Russia's military and industrial complex in its war of aggression against Ukraine, on whom tighter export restrictions regarding dual-use goods and technology as well as goods and technology which might contribute to the technological enhancement of Russia's defence and security sector are imposed. Taking into account the direct connection between Iranian manufacturers of Unmanned Aerial Vehicles and the Russian military and industrial complex and the concrete risk that certain goods or technology are used for the manufacture of military systems that contribute to Russia's illegal war of aggression against Ukraine, several Iranian entities have been added to such list.
- (11) It is also appropriate to extend the suspension of the broadcasting licences in the Union of Russian media outlets under the permanent control of the Russian leadership, and the prohibition against broadcasting their content.
- (12) The Russian Federation has engaged in a systematic, international campaign of media manipulation and distortion of facts in order to enhance its strategy of destabilisation of its neighbouring countries, and of the Union and its Member States. In particular, the propaganda has repeatedly and consistently targeted European political parties, especially during election periods, as well as civil society, asylum seekers, Russian ethnic minorities, gender minorities, and the functioning of democratic institutions in the Union and its Member States.
- (13) In order to justify and support its aggression against Ukraine, the Russian Federation has engaged in continuous and concerted propaganda actions targeted at civil society in the Union and neighbouring countries, gravely distorting and manipulating facts.
- (14) Those propaganda actions have been channelled through a number of media outlets under the permanent direct or indirect control of the leadership of the Russian Federation. Such actions constitute a significant and direct threat to the Union's public order and security. Those media outlets are essential and instrumental in bringing forward and supporting the aggression against Ukraine, and for the destabilisation of its neighbouring countries.
- (15) In view of the gravity of the situation, and in response to Russia's actions destabilising the situation in Ukraine, it is necessary, consistent with the fundamental rights and freedoms recognised in the Charter of Fundamental Rights, in particular with the right to freedom of expression and information as recognised in Article 11 thereof, to introduce further restrictive measures to suspend the broadcasting activities of such media outlets in the Union, or directed at the Union. The measures should be maintained until the aggression

## **HR(2023) 46** *Limited*

against Ukraine is put to an end, and until the Russian Federation, and its associated media outlets, cease to conduct propaganda actions against the Union and its Member States.

- (16) Consistent with the fundamental rights and freedoms recognised in the Charter of Fundamental Rights, in particular with the right to freedom of expression and information, the freedom to conduct a business and the right to property as recognised in Articles 11, 16 and 17 thereof, those measures do not prevent the media outlets and their staff from carrying out activities in the Union other than broadcasting, such as research and interviews. In particular, those measures do not modify the obligation to respect the rights, freedoms and principles referred to in Article 6 of the Treaty on European Union, including in the Charter of Fundamental Rights, and in Member States' constitutions, within their respective fields of application.
- (17) The Union is committed to avoiding threats to maritime safety. Consequently, it is appropriate to introduce an exemption for EU operators to provide pilot services to vessels in innocent passage as defined by international law and necessary for reasons of maritime safety.
- (18) To ensure legal certainty concerning the treatment of imports, it is also appropriate to provide rule on the release by competent authorities of the Member States of goods which are physically in the Union and were already presented to customs authorities when they become subject to such restrictions. It is also appropriate to authorise Member States to release goods already brought into the Union in the past. This is necessary for the benefit of Union operators which brought those goods into the Union in good faith at a time when they were not yet subject to any import restrictive measures, including when their import was still allowed during a wind-down period. National competent authorities need to ensure that the release of the goods and any payment related thereto comply with the letter and spirit of the Union restrictive measures. Similarly, any decision not to release such goods must comply with the objectives of Decision 2014/512/CFSP and ensure, among others, that the goods are not returned to Russia.
- (19) It is also appropriate to extend the list of partner countries which are applying a set of export control measures substantially equivalent to those set out in Decision 2014/512/CFSP.
- (20) It is also appropriate to introduce or extend certain exemptions or derogations related to certain measures, as well as to make certain technical corrections in the operative text.
- (21) Further action by the Union is needed in order to implement certain measures.
- (22) Decision 2014/512/CFSP should therefore be amended accordingly,
