1. AMENDMENTS TO COMMISSION PROPOSAL REGARDING NAFO IN ANNEX IC

EXPLANATORY NOTE:

In footnote 1, the amount of 4 224 tonnes is inserted (previously in “pm”).

CHANGES TO ANNEX IC:

- In Annex IC, the fishing opportunities table for redfishes in NAFO 3M is replaced by the following:

Species:	Redfishes <i>Sebastes</i> spp.	Zone:	NAFO 3M (RED/N3M.)
Estonia	1 571	(1)	Analytical TAC
Germany	513	(1)	Article 3 of Regulation (EC) No 847/96 shall not apply
Latvia	1 571	(1)	Article 4 of Regulation (EC) No 847/96 shall not apply
Lithuania	1 571	(1)	
Spain	233	(1)	
Portugal	2 354	(1)	
Union	7 813	(1)	
TAC	8 448	(1)	
(1)	This quota is subject to compliance with the TAC, which is established for this stock for all NAFO Contracting Parties. Within this TAC, no more than the following mid-term limit may be fished before 1 July 2021: 4 224.		

2. AMENDMENTS TO COMMISSION PROPOSAL REGARDING ICCAT

EXPLANATORY NOTE

The Trade and Cooperation Agreement between the EU and the UK (“the TCA”) provisionally entered into force on 1 January 2021.

The TCA sets out in Annex FISH.2C quota shares agreed between the EU and the UK, of what were previously EU shares in these various fisheries. This includes quota shares in four fisheries for ICCAT-regulated stocks: North Atlantic Albacore, Northeast Atlantic Bluefin tuna, North Atlantic Blue shark and North Atlantic Swordfish:

ICCAT Stock	Quota Shares (Percentage split of the former EU’s TAC allocation)	
	EU	UK
Albacore (North Atlantic)	98.48	1.52
Bluefin tuna (Northeast Atlantic)	99.75	0.25
Blue shark (North Atlantic)	99.90	0.10
Swordfish (North Atlantic)	99.99	0.01

This agreement has to be implemented in the EU legislation, through an amendment to the Fishing Opportunities Regulation.

When the UK was part of the European Union, their catches for Eastern and Mediterranean bluefin tuna were exclusively counted against the ‘others quota’, reflecting the by-catches nature of their fishery. It is therefore proposed to transfer the agreed share from this quota and then replenish this quota with contributions of the quota-holder Member States, after applying the relative stability to the quota transferred to UK.

Furthermore, in the Fishing Opportunities Regulation 2021/92, new codes were added in order to allow correct reporting and counting of the catches under quotas for other Member States. An additional reporting code is thus added to quota of “Other” of the fishing opportunities table for White marlin in the Atlantic Ocean: (WHM/ATLANT_AMS).

The amendment to Annex VI reflects the results of the Intersessional meeting of Panel 2 held on 2-5 March 2021. Effort limits for Union fishing vessels in the ICCAT Convention Area are reported through the EU plan based on information provided in the fishing, capacity and farming plans for bluefin tuna communicated by Member States to the Commission, and endorsed by ICCAT during the above Intersessional meeting of Panel 2.

CHANGES TO RECITALS

- The following recitals are added:

“According to Article FISH.13 and Annex FISH.2C of the Trade and Cooperation Agreement between the European Union and the United Kingdom, the Parties have agreed on their respective shares of the TACs for certain stocks in ICCAT. The relevant fishing opportunities tables should be amended to take account of those shares.

“Effort limits for Union fishing vessels in the ICCAT Convention Area are based on information provided in the fishing, capacity and farming plans for bluefin tuna communicated by Member States to the Commission. These effort limits are reported through the EU plan endorsed by ICCAT during the Intersessional meeting of Panel 2 held on 4 and 5 March 2019. They should be established as part of fishing opportunities.”

CHANGES TO ANNEX ID

- In Annex ID, the relevant fishing opportunities tables are replaced by the following:
