Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States’ GNI for financial year 2024 is 0,4812 %.

Legal basis

Council Decision (EU, Euratom) 2020/2053 of 14 December 2020 on the system of own resources of the European Union and repealing Decision 2014/335/EU, Euratom (OJ L 424, 15.12.2020, p. 1), and in particular Article 2(1), point (d), thereof.

Remarks

New Article

The Union guarantee is for borrowings on the capital markets or from financial institutions to provide financial assistance to Ukraine under the Ukraine Facility as well as for loans and other operations granted by financial establishments to Ukraine with the support of the Ukraine Guarantee. The amount of support to Ukraine shall be within the limits provided for in the legal basis.

This article is intended to record any revenue arising from the exercise of rights in connection with a guarantee under Article 16 04 06 and 16 06 02 of the statement of expenditure in Section III ‘Commission’, provided that the revenue has not been deducted from expenditure.

A summary of borrowing-and-lending operations, including debt management, in capital and interest is given in the Annex ‘Borrowing-and-lending operations’ to Section III ‘Commission’.

Legal basis

For the legal basis, see the remarks for Chapter 16 06 of the statement of expenditure in Section III ‘Commission’.

Remarks

New Item

This item is intended to record revenue assigned to the non-repayable support of the Reform and Growth Facility for the Western Balkans.

In accordance with Article 21 of the Financial Regulation, this revenue is to be considered as assigned revenue and gives rise to the entry of additional appropriations on the lines under Chapter 15 03 and Article 15 03 01 of the statement of expenditure in Section III.

Legal basis

For the legal basis, see also remarks for Chapter 15 03 of the statement of expenditure in Section III ‘Commission’.

Remarks

New Article

The Union guarantee is for borrowings on the capital markets or from financial institutions to provide financial assistance to Ukraine under the Ukraine Facility as well as for loans and other operations granted by financial establishments to Ukraine with the support of the Ukraine Guarantee. The amount of support to Ukraine shall be within the limits provided for in the legal basis.

This article is intended to record any revenue arising from the exercise of rights in connection with a guarantee under Article 16 04 06 and 16 06 02 of the statement of expenditure in Section III ‘Commission’, provided that the revenue has not been deducted from expenditure.

A summary of borrowing-and-lending operations, including debt management, in capital and interest is given in the Annex ‘Borrowing-and-lending operations’ to Section III ‘Commission’.

Legal basis

For the legal basis, see the remarks for Chapter 16 06 of the statement of expenditure in Section III ‘Commission’.

Remarks

Appropriations under this chapter are intended to cover expenditure of administrative nature, such as studies, meetings of experts, information and publications directly linked to the achievement of the objectives of the programmes or measures coming under this cluster, and any other expenditure on technical and administrative assistance not involving public authority tasks outsourced by the Commission under ad hoc service contracts.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

Appropriations under this chapter are intended to cover expenditure of an operational nature, such as cooperative projects, directly linked to the achievement of the objectives of the European Defence Fund (EDF) and its predecessor, the European Defence Industrial Development Programme (EDIDP).

In particular, appropriations under this chapter will support the development of actions – understood as the development phase of new products and technologies or the upgrading of existing ones – in the field of defence. The goal of both the EDF and EDIDP is to foster the competitiveness and innovativeness of the European defence technological and industrial base and reach a greater interoperability between Member States’ capabilities, thereby contributing to the Union’s strategic autonomy.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover the funding envisaged under the EDF for collaborative development projects of defence products and technologies consistent with defence capability priorities commonly agreed by Member States within the framework of the Common Foreign and Security Policy, thus contributing to greater efficiency of defence spending within the Union, achieving greater economies of scale, reducing the risk of unnecessary duplication and thereby reducing the fragmentation of defence products and technologies throughout the Union.

The EDF provides support for actions covering both new and upgrades of existing products and technologies where the use of pre-existing information needed to perform the upgrade is not subject, directly or indirectly to a restriction by non-associated third countries or non-associated third-country entities. Eligible actions shall relate to one or more of the following activities:

- activities aiming to create, underpin and improve knowledge, products and technologies, including disruptive technologies, which can achieve significant effects in the area of defence,
- activities aiming to increase interoperability and resilience, including secured production and exchange of data, to master critical defence technologies, to strengthen the security of supply or to enable the effective exploitation of results for defence products and technologies,

- studies, such as feasibility studies to explore the feasibility of new or improved technologies, products, processes, services and solutions,
- the design of a defence product, tangible or intangible component or technology as well as the definition of the technical specifications based on which such design has been developed which may include partial tests for risk reduction in an industrial or representative environment,
- the development of a model of a defence product, tangible or intangible component or technology, which can demonstrate the element's performance in an operational environment (system prototype),
- the testing of a defence product, tangible or intangible component or technology,
- the qualification of a defence product, tangible or intangible component or technology,
- the certification of a defence product, tangible or intangible component or technology,
- the development of technologies or assets increasing efficiency across the life cycle of defence products and technologies.

This appropriation may also cover the expenditure linked to the work of independent experts appointed by the Commission to assist in the evaluation of proposals and to advise on or assist with the monitoring of the implementation of actions carried out. Furthermore, this appropriation may be used to fund the organisation of dissemination activities, matchmaking events and awareness-raising activities, in particular with a view to opening up supply chains to foster the cross-border participation of SMEs.

Remarks

Appropriations under this chapter are intended to cover expenditure of an operational nature, such as collaborative research projects, research activities in disruptive defence technologies and support actions in the defence research sector.

The objective of the European Defence Fund (EDF) for the research window is to support collaborative research that could significantly boost the performance of future defence capabilities throughout the Union, aiming at maximising innovation and introducing new defence products and

technologies, including disruptive ones, and the most efficient use of defence research spending in Europe.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

Remarks

The budget lines included in this chapter mainly constitute the structure for the various guarantees provided by the Union in the framework of financial assistance instruments or mechanisms to Member States and Ukraine. They will enable the Commission to service the debt should one of them default.

In order to honour its obligations, the Commission may draw on its cash resources to service the debt provisionally. In this case, Article 14 of Council Regulation (EU, Euratom) No 609/2014 of 26 May 2014 on the methods and procedure for making available the traditional, VAT and GNI-based own resources and on the measures to meet cash requirements (Recast) (OJ L 168, 7.6.2014, p. 39) applies.

A specific annex in this section gives a summary of borrowing-and-lending operations guaranteed by the general budget, including debt management, in respect of capital and interest.

New Article

The Ukraine Facility is to provide assistance to Ukraine in the form of non-repayable financial support and loans. The loans under the Facility are to constitute financial assistance within the meaning of Article 220(1) of Regulation (EU, Euratom) 2018/1046 and to be covered by the European Union budget guarantee over and above the ceilings of the Multiannual Financial Framework. Consequently, no provisioning for the loans under the Ukraine Facility is to be constituted and, by way of derogation from Article 211(1) of Regulation (EU, Euratom) 2018/1046, no provisioning rate should be set. This item is to enable the Commission, if necessary, to service the debt should Ukraine default.

Equally, this item aims to enable the Commission to cover the credit losses of defaulted operations covered by the Ukraine Guarantee in the circumstance that the constituted provisioning is not sufficient.

Remarks

New Chapter

Appropriations under this chapter are intended to provide predictable financial support to Ukraine over the 2024-2027 period. The Facility will support Ukraine's efforts to sustain macro-financial stability, promote recovery as well as modernise the country whilst implementing key reforms on its EU accession track. The Facility is designed as a flexible instrument adapted to the unprecedented challenges of supporting a country at war and ensuring predictability, transparency, and accountability of the funds.

The maximum resources for the implementation of the Facility are EUR 50 000 000 000 (in current prices) for 2024-2027, of which up to EUR 33 000 000 000 in the form of loans and up to EUR 17 000 000 000 in the form of support other than in the form of loans, which is relevant for expenditure under this chapter. The available support other than in the form of loans in a given year shall not exceed EUR 5 000 000 000, in accordance with the relevant provision of the MFF Regulation. Member States, third countries, international organisations, international financial institutions or other sources may provide additional financial contributions to the Facility. In accordance with Articles 21, 22 and 24 of the Financial Regulation, any assigned revenue entered in the statement of revenue gives rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

New Article

This appropriation is intended to cover the financial support to Ukraine under the framework of the Ukraine Plan. While such support can take the form of loans or grants, or a combination of these,

this article only covers the grant element of the financial assistance under the Pillar I of the Ukraine Facility. Funds will be provided based on the implementation of the Ukraine Plan, which will be underpinned by a set of conditions and a timeline for disbursements agreed with the EU. This Plan will encompass Ukraine’s vision for the recovery, reconstruction and modernisation of the country and for the reforms and investments it intends to undertake as part of its EU accession process. Significant emphasis will be placed on public administration reform, good governance, the rule of law, and sound financial management, including fostering efficient and effective management and control systems and a strong focus on anti-corruption and anti-fraud or any other illegal activity affecting the Union’s financial interests, but also other reforms and approximation to the Union acquis that would underpin the accession process and modernisation of the economy. Funds will be disbursed based on the fulfilment of these conditions.

Article 16 06 02 — Pillar II: Ukraine Investment Framework

Remarks

New Article

Under the Ukraine Investment Framework the Commission is to provide the Union support to Ukraine in the form of budgetary guarantee, financial instruments or blending operations, including technical assistance. This Framework aims to attract and mobilise private and public investments in Ukraine’s recovery and reconstruction, addressing priorities identified in the Ukraine Plan, and supporting its objectives and implementation. It will complement all existing instruments supporting Ukraine, such as budgetary guarantees and blending operations, with the possibility of scaling them up, when conditions allow for it.

Article 16 06 03 — Pillar III: Union accession assistance and support measures

Remarks

New Article

This appropriation provides technical assistance and other supporting measures, including mobilisation of expertise on reforms, support to municipalities, civil society and other forms of bilateral support to design and implement EU accession-related reforms and to foster Ukraine’s administrative capacity, supporting the objectives of the Plan. It may also support other measures aimed at addressing the consequences of the war, for example relating to enforcing international justice. This article will also cover the functioning costs of the Audit Board of the Ukraine Facility (including the remuneration of special advisers, their mission expenses and the institution’s insurance contributions) as well as the interest rate subsidies for the loans provided to Ukraine under Pillar I and under Decision (EU) 2022/1628 and Decision (EU) 2022/1201 and the provisioning of certain specified liabilities related to Union support to Ukraine decided before the establishment of the Ukraine Facility.

Remarks

New Item

This appropriation is intended to support Ukraine’s progressive alignment to Union ‘acquis’ with a view to future Union membership, thereby contributing to mutual stability, security, peace and prosperity. Such support is intended to include strengthening of the rule of law, including the independence of judiciary, democracy, respect of human rights and fundamental freedoms, fight against corruption, reinforcing of the effectiveness of public administration, institutional capacities, decentralisation, and supporting transparency, structural reforms, sectoral policies and good governance at all levels. Such support should also contribute to the implementation of the Plan. This item will also cover support for social partners, civil society and local and regional organisations in Ukraine and other measures that are complementary to EU action, such as accountability mechanisms for Russia’s war of aggression and the functioning of the Audit Board.

Remarks

The aim of this reserve is to cover the European Globalisation Adjustment Fund for Displaced Workers (EGF) so as to enable the Union to demonstrate solidarity towards, and to provide support to people losing their jobs as a result of major structural changes caused by globalisation-related challenges.

The objective of the EGF is to demonstrate solidarity and promote decent and sustainable employment in the Union by offering assistance to workers who have been dismissed because of major restructuring events. Those events can result in particular from globalisation-related challenges, such as changes in world trade patterns, trade disputes, significant changes in the trade relations of the Union or the composition of the internal market and financial or economic crises, the transition to a low-carbon economy, digitisation or automation. The EGF thereby supports displaced workers in returning to decent and sustainable employment as soon as possible. Emphasis is placed on measures that help the most disadvantaged groups.

The maximum annual amount for the EGF is set in the MFF 2021-2027. The methods for entering the appropriations in this reserve and for mobilising the EGF are laid down in point 9 of the Interinstitutional Agreement of 16 December 2020 between the European Parliament, the Council of the European Union and the European Commission on budgetary discipline, on cooperation in budgetary matters and on sound financial management, as well as on new own resources, including a roadmap towards the introduction of new own resources.
