Joint statement by the Netherlands, Luxembourg, Poland, Italy and Finland

The objectives of this Directive were to enhance the good functioning of the internal market and to stimulate innovation, creativity, investment and production of new content, also in the digital environment. The signatories support these objectives. Digital technologies have radically changed the way content is produced, distributed and accessed. The legislative framework needs to reflect and guide these changes.
However, in our view, the final text of the Directive fails to deliver adequately on the above-mentioned aims. We believe that the Directive in its current form is a step back for the Digital Single Market rather than a step forward.

Most notably we regret that the Directive does not strike the right balance between the protection of right holders and the interests of EU citizens and companies. It therefore risks to hinder innovation rather than promote it and to have a negative impact the competitiveness of the European Digital Single Market.

Furthermore, we feel that the Directive lacks legal clarity, will lead to legal uncertainty for many stakeholders concerned and may encroach upon EU citizens’ rights.

We therefore cannot express our consent with the proposed text of the Directive.

**Statement by Estonia**

Estonia has always supported the objective of the Directive, namely better access to content online, the functioning of key exceptions in the digital and cross-border environment and the better and balanced functioning of the copyright marketplace.

However, Estonia considers that the final text of the Directive does not strike a sufficient balance between different interests in all aspects.

Furthermore, Estonia has recently had parliamentary elections and our new government and parliament have not been able to give their position on the final compromise text.
