Statement by AT

"According to Article 10, Paragraph 3a of the Regulation on European statistics on natural gas and electricity prices and repealing Directive 2008/92/EC, AT understands that Member States will be contacted directly in connection with the negotiations which may designate the corresponding expert short hand.

In AT different institutions are responsible for energy price statistics and, as the corresponding expert needs not necessarily be the national statistical office, it is important to designate the corresponding expert for the negotiations."

Statement by ES

- "1. Spain acknowledges the efforts from the European Commission and the Netherlands EU Presidency with regard to the proposal for a Regulation on natural gas and electricity prices and welcomes the evolution of the text. Nevertheless, we still have some comments that are underlined in this paper.**
- 2. Spain proposes to include in the regulation a specific mention to an implementing methodology with the aim to guarantee a flexible and clear framework for Member States.**

Flexibility is needed as long as price structures and components within Member States reflect the energy policy of each country and, as is the case of Spain, could be different from price data reporting structures or categories established according to the regulation. This is a core issue for us as in Spain the categories of consumers are based on the voltage level of connection to the electricity network and the contracted capacity, while categories in data reporting are based on consumption bands.

- 3. Once approved the new regulation, it would be necessary to adapt the Spanish regulatory framework to the new obligations that are established.**

In this regard, and since Spain is analyzing the possibility of asking for derogation, we propose to include in the text a provision stating that any derogation will come into effect after the adoption of the related implementing act.

- 4. We consider that, in any case, a longer transitional period than the one proposed for the adaption to the new regulation is needed.**
- 5. Spain has other specific comments related to the data and definitions set out in the annexes of the regulation."**
