NOTE

From:	General Secretariat of the Council
To:	Delegations
Subject:	Proposal for a DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on common rules for the internal markets in renewable and natural gases and in hydrogen (recast)

Delegations will find in the Annex the 4-column table regarding the above-mentioned proposal.

Delegations are invited to submit written comments to the Secretariat energy@consilium.europa.eu, by **23 May, 18:00**. Comments can be included directly in the 4th column, or in a separate document.

Proposal for a DIRECTIVE OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL on common rules for the internal markets in renewable and natural gases and in hydrogen (recast)

13a		<i>(3a) Internal market rules for gaseous fuels need to be aligned with the Union's climate and energy law, in particular, Regulation (EU) 2021/1119 of the</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>European Parliament and of the Council⁵. The legal framework set out by this Directive is therefore amended accordingly.</i></p> <p><i>5. Regulation (EU) 2021/1119 of the European Parliament and of the Council of 30 June 2021 establishing the framework for achieving climate neutrality and amending Regulations (EC) No 401/2009 and (EU) 2018/1999 ('European Climate Law') (OJ L 243, 9.7.2021, p. 1)).</i></p>	PUBLIC	
13b		<p><i>(3b) In response to the hardships and global energy market disruption caused by Russia's unprovoked and unjustified military aggression against Ukraine, and in line with the communication of the Commission of 18 May 2022 'REPowerEU Plan' (the 'REPowerEU Plan'), the Union and the Member States should phase out its dependency on Russian energy imports as soon as possible and well before 2030, because those imports are detrimental to the objectives of the Energy Union, including energy solidarity, to effective functioning</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>of and competition in the internal energy market, as well as to security of energy supply and the essential security interests of the Union and of the Member States.</i>		
13c		<i>(3c) The REPowerEU Plan pledge to phase out Russian gas imports as soon as possible, equalling 155bcm in 2019 and representing 40 % of final fossil gas demand, translates into a higher ambition for the gas savings and the acceleration of the uptake of renewable alternatives, including biomethane, electricity, district heating and cooling, as well as the ramp-up of the European hydrogen market. Taking into account the fact that fossil gas demand in the Union has been rising over the recent years, there is a need to establish governance underpinning that ambition and the Union's independence.</i>

			<p>seen in conjunction with other policy and legislative instruments, notably those proposed under the European Green Deal. Many of these other proposed instruments, such as the extension of the Union's [Emission Trading System, the Effort Sharing Regulation, the Renewable Energy Directive, the Energy Efficiency Directive, the ReFuelEU initiatives and the proposed revision of the Energy Taxation Directive seek to incentivise the decarbonisation of the Union's economy and ensure its remains on a trajectory towards a climate neutral European Union by 2050, as mandated by the European Climate Law]. The main objective of this Directive is however not to incentivise the transition but to enable and facilitate it by ensuring the continuing existence of efficient markets for gases.</p>	
Recital 6				
16	(6) This Directive aims to facilitate the penetration of renewable and low-carbon gases	(6) This Directive aims to facilitate the penetration of renewable gas and low-carbon gas	(6) This Directive aims to facilitate the penetration of renewable and low-carbon gases	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
	into the energy system enabling a shift from fossil gas and to allow these new gases to play an important role towards achieving the EU's 2030 climate objectives and climate neutrality in 2050. The Directive aims also to set up a regulatory framework which enables and incentivises all market participants to take the transitional role of fossil gas into account while planning their activities to avoid lock-in effects and ensure gradual and timely phase-out of fossil gas notably in all relevant industrial sectors and for heating purposes.	into the energy system enabling a shift from fossil gas and to allow <i>such new gas to make their contribution</i> towards achieving the <i>Union's 2030 energy and</i> climate objectives and climate neutrality in 2050, <i>as well as to steering of gaseous molecules towards those applications and sectors that cannot be directly electrified with renewables, with this creating the necessary space for renewables electricity and other thermal renewables for heating and transport purposes.</i> This Directive aims also to set up a regulatory framework which enables and incentivises all market participants to <i>shift away from</i> fossil gas <i>and plan</i> their activities to avoid lock-in effects and ensure gradual and timely phase-out of fossil gas notably in all relevant industrial sectors and for heating purposes.	into the energy system enabling a shift from fossil gas and to allow these new gases to play an important role towards achieving the EU's 2030 climate objectives and climate neutrality in 2050. 16a			(6a) In the trajectory for the European Union to achieve climate neutrality by 2050, energy saving and direct electrification are expected to present the most cost-effective	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			<p>and energy-efficient decarbonisation option in many cases. There will however remain a number of end-use applications where this might not be feasible or have higher costs. In such cases, it may be relevant to use renewable or low-carbon gases and fuels, including biomethane and renewable and low-carbon hydrogen. The incentives created by the European Green Deal Package are thus expected to result in a fundamental change in the structure of energy demand in general and that for gases in particular. For instance, where today natural gas is widely used for space heating purposes, this demand is expected to be met largely by other energy carriers, such as through electrified space heating appliances, in the future. The future use-cases for hydrogen are expected to primarily be in otherwise hard to decarbonise sectors. These include a number of industrial processes, but also transport modes such as long haul heavy duty road transport, aviation and maritime. As the precise decarbonisation trajectories, role of energy</p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			carriers and their use cases will also depend on local starting points, endowments and circumstances, they should not be prescribed in detail. Efficient markets will ensure that, given local endowment and circumstances, consumers incentivised by other policy instruments are empowered to choose the decarbonisation options most suited to their particular use-case.	
16b		<p><i>(6a) The integration of biomethane in the natural gas system supports the Union's climate objectives and helps to diversify the energy supply in line with the REPowerEU Plan. Requests for the grid connection of renewable gas production should be assessed within reasonable time limits and permitting procedures should not be hampered by a lack of administrative capacities. It should be possible to prioritise connection requests for renewable gas production over connection request for the production of</i></p>

		<p><i>production should be guiding the definition of LCF for funding purposes.</i> This would allow deploying a comprehensive <i>Union-wide</i> certification system, covering the whole Union energy mix. Taking into consideration that LCF and LCH are not renewable fuels, their terminology and certification could not be included in the proposal for the revision of Directive (EU) 2018/2001 ■ . Therefore, their inclusion in this Directive fills in this gap. <i>When using the Union Database as single mass balance system for the certification of renewable and low LCF, there should be no physical tracking of the molecules inside the single mass balance system.</i></p> <p><i>11. Commission Delegated Regulation (EU) 2021/2139 of 4 June 2021 supplementing Regulation (EU) 2020/852 of the European Parliament and of the Council by establishing the technical screening criteria for determining the conditions under which an economic activity qualifies as contributing substantially to climate change mitigation or climate change adaptation and for determining whether that economic activity causes no significant harm to any of the other environmental objectives (OJ L 442, 9.12.2021, p. 1).</i> ■ . ■</p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
19a		<p><i>(9a) Although priority should be given to promoting a domestic hydrogen production within the Union, the Union may not be able to produce enough renewable and low-carbon hydrogen to meet its demand. Imports of renewable and low-carbon hydrogen are likely to be necessary for the rapid availability of large quantities of hydrogen catering for the Union's demand, in particular from neighbouring countries and regions such as Norway, Ukraine, North Africa and the Middle East. Therefore, the Commission and the Member states should engage in an open and constructive dialogue in order to establish mutually beneficial cooperation and partnerships with neighbouring regions safeguarding the Union's strategic interests and the energy security of both the Union and its partners. Hydrogen partnerships and intergovernmental agreement with third countries on hydrogen imports should contribute to the creation of clean and new technology markets through the transfer of knowledge and the</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>achievement of the United Nations Sustainable Development goals. A level playing-field, based on equivalent rules or standards in third countries in terms of environmental protection, sustainability and mitigating climate change should be promoted while avoiding negative social or environmental effects, for example the relocation of environmental impacts, including greenhouse gas emissions, any delay in the decarbonisation of energy in third countries, access to energy for local population, threats to the drinking water supply or exploitative working conditions. In that context, hydrogen production and export from third countries should be subject to internationally recognised due diligence principles, such as the United Nations Guiding Principles on Business and Human Rights, the OECD Guidelines for Multinational Enterprises and the OECD Due Diligence Guidance for Responsible Business Conduct (RBC). Hydrogen should become an element of the Union's international cooperation, inter alia within the framework of the</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>International Renewable Energy Agency's (IRENA's) work, research cooperation, climate and energy diplomacy and the European Neighbourhood Policy. The certification and life cycle assessment methodology of LCF should also apply to imports. This would ensure that partner countries can easily identify the Union requirements for LCF to be certified as such, ensure market confidence, and foster transparent imports of LCF. By developing such a methodology, the Union can also take a leading role in developing global standards for LCF certification and strengthen its role as a global climate leader, using its climate diplomacy to develop mutually beneficial cooperation with exporting partners.</i></p>		
19b		<p><i>(9b) Against the background of the EU Hydrogen Strategy and REPowerEU Plan, the Commission should assess in the report whether additional measures such as setting an indicative greenhouse gas</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>intensity reduction target for gas consumed in the Union by 2030 may be necessary to cater for an investment and pathway for further upscaling of renewable gas and low carbon gas across the Union, while taking into account the gradual phase-out of fossil gas and the assumed reduction of demand for gas in sectors other than hard-to-decarbonise sectors where no other more energy and cost-efficient options are available. Such measures could provide predictability to customers, in particular in hard-to-decarbonise sectors, to make the necessary investments to transform their operations. Without prejudice to the prioritisation of the roll-out and uptake of renewable gas, they may also enable different technologies to contribute towards the Union indicative target and the overall Union decarbonisation commitments. Low-carbon gas should be regarded as transitional as long as renewable gas, in particular renewable hydrogen, are a scarce source.</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
19c		<p><i>(9c) Hydrogen corridors as identified in the REPowerEU Plan should be supported by the corresponding dedicated hydrogen infrastructure, including hydrogen networks, hydrogen storage and hydrogen import terminals in order to meet the REPowerEU Plan targets for hydrogen production and imports by 2030. Therefore, the network development plans should identify investment gaps, in particular with regard to ensuring sufficient cross-border capacities which are needed for the establishment of an integrated European hydrogen market enabling hydrogen to move freely across the borders, taking into account the hydrogen storage development and the integration of hydrogen imports.</i></p>		
19d		<p><i>(9d) The definition of hydrogen ready infrastructure and end-use applications should ensure a common approach in Union funding programmes and the revised Climate and Energy state aid guidelines.</i></p>

26	(16) Public interventions in price setting for the supply of natural gas should not lead to direct cross-subsidisation between different categories of customer. According to that principle, price systems must not explicitly make certain categories of customer bear the cost of price interventions that affect other categories of customer.	(16) Public interventions in price setting for the supply of natural gas should not lead to direct cross-subsidisation between different categories of <i>customers</i> . According to that principle, price systems must not explicitly make certain categories of customer bear the cost of price interventions that affect other categories of customer.	(16) Public interventions in price setting for the supply of natural gas should not lead to direct cross-subsidisation between different categories of customer. According to that principle, price systems must not explicitly make certain categories of customer bear the cost of price interventions that affect other categories of customer. Public service obligations in price setting should only concern the supply of natural gas, as households are not expected to use hydrogen for heating purposes on a wide scale. The hydrogen market will mostly concern industry, which do not require such public interventions.	
26a			(16a) Public interventions in price setting for the supply of natural gas constitute, in principle, a market-distortive measure. Such interventions may	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			<p>therefore only be carried out as public service obligations and are subject to specific conditions. Under this Directive regulated prices are possible for energy poor and vulnerable households, including below costs, and, as a transition measure, for households and micro-enterprises. In times of crisis, when wholesale and retail natural gas prices increase significantly, and this is having a negative impact on the wider economy, Member States should be allowed to extend, temporarily, the application of regulated prices also to SMEs. For both households and SMEs, Member States should be temporarily allowed to set regulated prices below costs as long as this does not create distortion between suppliers and suppliers are compensated for the costs of supplying below cost. However, it needs to be ensured that such price regulation is targeted and does not create incentives to increase consumption. Hence, such price regulation should be subject to conditions. Those conditions should be aligned to the</p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			<p>conditions applicable to regulated prices for electricity, set out in [Directive (EU) 2019/944]. To the extent that any such constitute State aid, the provisions concerning such measures are without prejudice to the application of Articles 107 and 108 TFEU. The Council, acting on a proposal from the Commission, should determine by means of an implementing decision when a natural gas price crisis exists. The decision should also specify the validity of that determination, during which the temporary extension of regulated prices applies, which may be for up to one year. Conferring implementing powers on the Council adequately takes into account the political nature of the decision to trigger the extended possibilities for public interventions in price setting for the supply of natural gas which requires a delicate balancing of different policy considerations, as well as the horizontal implications of such a decision for Member States.</p>

140a			<p>(130a) Certain Member States, due to the historical features and levels of maturity of their natural gas markets should have the possibility to derogate from specific rules established in this Directive to prevent unjustified penalization, and to favour an efficient development of natural gas markets in these countries. This specifically applies to Luxembourg, due to its specific market characteristics, and to all those Member States that are not yet connected to the interconnected system of any other Member State or that have not yet received the first commercial supply of their first long-term natural gas supply contract. In order to ensure a uniform application of Union law, derogations for Member States that are not yet connected to the interconnected system of any other Member State or that have not yet received the first commercial supply of their first long-term natural gas supply</p>	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			contract should be of a temporary nature, until those Member States are able to meet higher standards in terms of market opening and interconnectivity with the integrated gas system in the EU. Where such derogation applies, it should also cover any provisions in this Directive that are ancillary to, or that require the prior application of, any of the provisions from which a derogation has been granted.

	<p>specificities of the markets. Market integration may be an opportunity to make best use of infrastructure provided it does not negatively impact neighbouring markets, for instance by increased cross-border tariffs. It is also a chance to increase competition, liquidity and trade to the benefit of the end-consumers in the region, by attracting suppliers which otherwise would not come due to the small market size. Market integration allows also to create bigger zones accessing more supply sources. Such diversification might have an impact on the wholesale market prices, thanks to an improved competition between sources, but may also improve security of supply if there is no remaining internal congestion in the new merged zone. Market integration could be a basis to further support the transformation of the natural gas market, including the deployment of renewable and low-carbon gases. Member States, regulatory authorities and transmission system operators should cooperate to facilitate regional integration.</p>	<p>specificities of the markets. 		<i>mechanisms.</i>		
Article 3(3)				
249	3. Member States shall ensure that no undue barriers exist within the internal market for gases as regards market entry and exit, trading and operation.	3. Member States shall ensure that no undue barriers exist within the internal market for gas as regards market entry and exit, trading and operation.	3. Member States shall ensure that no undue barriers exist within the internal market for gases as regards market entry and exit, trading and operation.	
Article 3(4)				
250	4. Member States shall ensure that energy undertakings are subject to transparent, proportionate and non-discriminatory rules, fees and treatment, in particular with respect to access to wholesale markets, access to data, switching processes and billing regimes and, where applicable, licensing.	4. Member States shall ensure that energy undertakings are subject to transparent, proportionate and non-discriminatory rules, fees and treatment, in particular with regard to connection to the network , access to wholesale markets, access to data, switching processes and billing regimes and, where applicable, licensing.	4. Member States shall ensure that energy undertakings are subject to transparent, proportionate and non-discriminatory rules, fees and treatment, in particular with respect to access to wholesale markets, access to data, switching processes and billing regimes and, where applicable, licensing.	
Article 3(5)				
251	5. Member States shall ensure that market participants from third countries, when operating within the internal market for gases, comply with applicable Union and national law.	5. Member States shall ensure that market participants from third countries, when operating within the internal market for gas , comply with applicable Union and national law.	5. Member States shall ensure that market participants from third countries, when operating within the internal market for gases, comply with applicable Union and national law including in the	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
			fields of environment and safety.	
251a		<p><i>5a. Member States shall ensure a customer-centred and energy efficient approach in the hydrogen market. The use of renewable fuels and low-carbon fuels in the hydrogen network shall be prioritised for industrial customers in hard-to-decarbonise sectors with the highest greenhouse gas abatement potential, where more energy and cost efficient options are not available, including in hard to abate transport, such as maritime and aviation.</i></p>		
251b		<p><i>Article 3a</i> <i>EU indicative greenhouse gas intensity reduction target of the 2030 gas supply</i></p>		
251c		<p><i>1. By ... [6 months of the date of entry into force of this Directive]</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>the Commission shall present a report that investigates the effect of current energy and climate legislation in delivering renewable gas and low- carbon gas especially to end-users in hard-to-decarbonise sectors with the highest greenhouse gas abatement potential where no other more energy and cost- efficient options are available, compatibly with the capacities as identified in the network development plans as set out in Article 51 and distribution network development plans as set out in Article 52b and assess whether further measures at Union level are needed to ensure that sufficient volumes of renewable gas and low- carbon gas come to the market to meet the demand by 2030, while contributing to the intermediate target of reducing net greenhouse gas emissions by at least 55% by 2030, compared to 1990 levels.</i></p>		
251d		<p><i>2. Based on the report, the Commission shall, at the latest 6 months after its publication, where appropriate, put forward a</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>legislative proposal to introduce measures, such as an indicative EU level target for the reduction of the greenhouse gas intensity of gas consumed in the Union by 2030. The use of dedicated hydrogen networks shall be considered. Without prejudice to the prioritisation of renewable gas, the target shall be considered addition to all relevant provisions in Directive [RED II and RED III] and Directive [EED], consistent with all relevant energy and climate legislation and take into account security of supplies and quality requirements for cross-border gas. When calculating the target, the gradual phase-out of fossil gas and the assumed reduction of demand for gas in sectors other than hard-to-decarbonise sectors where no other more energy or cost efficient options are available shall be taken into account. The Commission accompany the proposal with a delegated act specifying the methodology for calculating and certifying the achievement of such target.</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
251e		<p><i>3. The Commission shall also specify the way Member States collectively aim at ensuring that the EU indicative greenhouse gas intensity reduction target is met, also by differentiated sectoral approaches, and how it shall be integrated in their national energy and climate plan.</i></p>

	or any competent authority they designate may also grant authorisations on the same basis for the supply of gases and for wholesale customers.	or any competent authority they designate may also grant authorisations on the same basis for the supply of gas and for wholesale customers.	States or any competent authority they designate may also grant authorisations on the same basis for the supply of gases and for wholesale customers.	
Article 7(2)				
287	2. Where Member States have a system of authorisation, they shall lay down objective and non-discriminatory criteria which shall be met by an undertaking applying for an authorisation to supply gases or to construct and/or operate natural gas facilities, hydrogen production facilities or hydrogen system infrastructure. The non-discriminatory criteria and procedures for the granting of authorisations shall be made public. Member States shall ensure that authorisation procedures for such facilities, infrastructure, pipelines and associated equipment take into account the importance of the project for the internal market for gases where appropriate.	2. Where Member States have a system of authorisation, they shall lay down objective and non-discriminatory criteria, and transparent procedures as referred to in Articles 51(8a) and 52b(2) which shall be met when an undertaking applies for an authorisation to supply gas or to construct and/or operate natural gas facilities, hydrogen production facilities or hydrogen system infrastructure. The non-discriminatory criteria and procedures for the granting of authorisations shall be made publicly available . Member States shall ensure that authorisation procedures for such facilities, infrastructure, pipelines and associated equipment take into account the importance of the project for the internal market for gas where appropriate.	2. Where Member States have a system of authorisation, they shall lay down objective and non-discriminatory criteria which shall be met by an undertaking applying for an authorisation to supply gases or to construct and/or operate natural gas facilities, hydrogen production facilities or hydrogen system infrastructure. The non-discriminatory criteria and procedures for the granting of authorisations shall be made public. Member States shall ensure that authorisation procedures for such facilities, infrastructure, pipelines and associated equipment take into account the importance of the project for the internal market for gases where appropriate.	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
287a			2a. For natural gas suppliers, Member States may assess financial strength and technical capabilities of applicants as a criterion for authorization. Such criterion should be fully transparent and non-discriminatory.	
Article 7(2a)				
287b		2a. Member States shall ensure that any national rules concerning the authorisation procedure referred to in this Article are proportionate and necessary, contribute to the implementation of the energy efficiency first principle and contribute to achieving the Union's climate and energy targets and the Member State's integrated national energy and climate plan as well as to their long-term strategies adopted under Regulation (EU) 2018/1999.

		<i>affected by or at risk of energy poverty and people who live in social housing. Where applicable, Member States shall make the best possible use of funding, including public funding and funding facilities established at Union level, with the aim of removing adverse effects and ensuring a just and inclusive energy transition.</i>		
Article 12				
343	Article 12 Comparison tools	Article 12 Comparison tools	Article 12 Comparison tools for natural gas	
Article 12(1), first subparagraph				
344	1. Member States shall ensure that at least natural gas household customers, and microenterprises, have access, free of charge, to at least one tool comparing the offers of suppliers, including bundled offers. Customers shall be informed of the availability of such tools in or together with their bills or by other means. The tools shall meet at least the following requirements:	1. Member States shall ensure that at least natural gas household customers, small enterprises and microenterprises, have access, free of charge, to at least one tool comparing the offers of suppliers, including bundled offers. Customers shall be informed of the availability of such tools in or together with their bills or by other means. The tools shall meet at least the following requirements:	1. Member States shall ensure that at least natural gas household customers, and microenterprises, with an expected yearly consumption of below 100 000 kWh have access, free of charge, to at least one tool comparing the offers of suppliers, including bundled offers. Customers shall be informed of the availability of such tools in or together with their bills or by other means. The tools shall meet at least the following requirements:

Article 52(1), point (d)				
641a			(d) the information exchanged with hydrogen network operators in neighbouring Member States pursuant to paragraph 2.	
Article 52(2)				
642	2. Hydrogen storage and terminal operators shall provide and exchange all relevant information required for developing the overview with the hydrogen network operators. Hydrogen network operators shall exchange all relevant information required for developing the overview with other hydrogen network operators.	<i>deleted</i>	2. Hydrogen storage and hydrogen terminal operators shall provide and exchange all relevant information required for developing the overview with the hydrogen network operators. Hydrogen network operators shall exchange all relevant information required for developing the overview with other hydrogen network operators, including hydrogen network operators in neighbouring Member States .	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Article 52(3)				
643	3. The regulatory authority shall examine the overview. It shall take the overall energy-economic necessity of the hydrogen network into account in this examination as well as the joint scenario framework developed under Article 51 (2), point e).	<i>deleted</i>	3. The regulatory authority shall examine the overview and make recommendations for amendments to the overview by the hydrogen network operator. It shall take the overall energy-economic necessity of the hydrogen network into account in this examination as well as the joint scenario framework developed under Article 51 (2), point e). With regard to overviews submitted in relation to hydrogen networks benefitting from a derogation pursuant to Article 47 or Article 48, the regulatory authority may abstain from examining the overview and making recommendations for amendments.	
Article 52(4)				
644	4. The regulatory authority shall take the examination of the overview into account in its approval of dedicated charges within the meaning of Article 4 of [recast Gas Regulation as proposed in COM(2021)xxx].	<i>deleted</i>	4. The regulatory authority shall take the examination of the overview into account in its approval of dedicated charges within the meaning of Article 4 of [recast Gas Regulation as proposed in COM(2021) xxx 804].	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
Article 52(5)				
645	5. Hydrogen network operators shall publish on a regular basis a joint report on the development of the hydrogen system based on the overview submitted to the regulatory authority. They shall take the examination of the regulatory authority under paragraph 3 into account.	<i>deleted</i>	5. Hydrogen network operators shall publish every two years on a regular basis a joint report on the development of the hydrogen system based on the overview submitted to the regulatory authority. They shall take the examination and recommendations of the regulatory authority under paragraph 3 into account. The regulatory authority may provide an opinion on the report.	
645a			5a. Until 31 January 2035, and without prejudice to the powers of the regulatory authority to supervise grid access rules, Member States may task another competent authority to examine the overview and to make recommendations for amendments to the overview by the hydrogen network operator to ensure consistency with the integrated national energy and climate plans and its updates.	
Article 52(6)				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
646	6. Member States may decide to apply the requirements pursuant to Article 51 to hydrogen network operators.	<i>deleted</i>	6. Where Member States may decide to apply a system of regulated third party access to hydrogen networks in accordance with paragraph 1 of Article 31, Member States shall apply the requirements pursuant to Article 51 to hydrogen network operators with the exception of those requirements related to Regulation (EU) 2017/1938. Where this is the case, the regulatory authority shall also examine whether the ten-year network development plan submitted by hydrogen network operators is consistent with the Union-wide ten-year network development plan for hydrogen referred to in Article 43 of the [recast Gas Regulation].	
646a			7. Instead of applying this Article, Member States may decide to apply the requirements set out in Article 51 to hydrogen network operators as of [the entry into force of this Directive].	

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
646b		<p><i>Article 52a</i></p> <p><i>Local heating and cooling plans</i></p>		
646c		<p><i>1. Member States shall ensure that their regional and local authorities prepare local heating and cooling plans at least in municipalities having a total population of at least 35 000. Member States shall encourage municipalities with a lower population to prepare such plans. Those plans shall complement the comprehensive heating and cooling assessment in accordance with Article 23(1) of Directive (EU) .../.... Each Members State shall complement the comprehensive heating and cooling assessment with a national strategy aiming to reduce the use of gas for the heating and cooling of buildings on distribution level in line with the integrated national energy and climate plan and its updates, with the integrated national energy climate reports and long-term strategies submitted in accordance with Regulation (EU) 2018/1999</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>and taking into account the availability of more energy and cost-efficient alternatives in accordance with the comprehensive heating and cooling assessment.</i>		
646d		<i>2. The local heating and cooling plans referred to in paragraph 1 shall at least:</i>		
646e		<i>(a) be built upon the local heating and cooling plans referred to in Article 23(6) of Directive (EU) .../...+;</i>		
646f		<i>(b) represent the result of a thorough assessment of a specific area's current and future demand for heating and cooling, including the energy demand of final customers in industry, SMEs, buildings and transport, and analyse the potential of decarbonisation by taking into</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>account local and regional renewable energy sources, including non-gas renewable energy sources and the potential of biomethane based on the regional maps referred to in Article 17a(1) of Regulation [recast Gas Regulation as proposed in COM(2021)xxx], energy savings and energy efficiency measures as well as the potential of system efficiency through sector integration and the capacity for seasonal storage at local or regional level;</i>		
646g		<i>(c) be in line with the national building renovation plan referred to in Article 3 of Directive (EU) .../... , the integrated multilevel mapping and planning and Go-to areas in accordance with Article 15b of Directive (EU) 2018/2001 [amended RED] as well as the joint scenario framework as referred to in Article 51(2), point (e) of this Directive;</i>		
646h				

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>(d) take into account the national strategy referred to in paragraph 1;</i>		
646i		<i>(e) include a strategy that fully considers the strategy referred to in Article 23(6), point (b), of Directive (EU) .../. and is based on points (a) to (d) of this paragraph, which establishes requirements for the infrastructure necessary on distribution level, including decommissioning and repurposing, to meet the current and future demand for heating and cooling of a specific area in the most energy and cost-efficient way and in consistency with the ten-year network development plan developed under Article 5 and implements the priority use of the most energy and cost-efficient sustainable technology in a specific residential area taking into account the building stock, including the potential of high efficiency district heating expansion contributing to emissions reduction from existing buildings;</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
646j		<i>(f) create a reliable timeframe and investment-friendly environment for private and public actors to meet a specific area's heating and cooling needs, including the decommissioning and repurposing of assets, based on that strategy referred to in point (g);</i>		
646k		<i>(g) include a trajectory to achieve the goals of the plans in line with climate neutrality and the monitoring of the progress of implementation of policies and measures identified;</i>		
646l		<i>(h) be prepared with the involvement of all relevant infrastructure operators on distribution level, of at least gas, including hydrogen, electricity and district heating, as well as all relevant regional or local</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>stakeholders and ensure the participation of the public.</i>		
646m		<i>3. Member States shall ensure that all relevant parties, including public and relevant private stakeholders, are given the opportunity to participate in the preparation of local heating and cooling plans, the policies and measures. Member States shall ensure that final customers are fully informed about mandatory fuel switches and alternatives in accordance with Article 11a.</i>		
646n		<i>For that purpose, Member States shall develop recommendations supporting the regional and local authorities to implement policies and measures in renewable energy based heating and cooling at regional and local levels using the potential identified. Member States shall support regional and local authorities to the utmost extent possible by any means including financial support and</i>

		<i>technical support schemes.</i>		
646o		<i>4. Local heating and cooling plans may be implemented jointly by a group of several neighbouring local authorities provided that the geographical and administrative context as well as the heating and cooling infrastructure is appropriate.</i>		
646p		<i>5. The implementation of local heating and cooling plans shall be verified and assessed by a competent authority. Where implementation is considered to be insufficient, on the basis of the trajectory and the monitoring pursuant to paragraph 2, point (g), the competent authority shall propose measures to close the implementation gap.</i>		
646q		<i>Article 52b Distribution network development</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>plans</i>		
646r		<p><i>1. All distribution system operators or hydrogen distribution network operators shall submit a distribution network development plan to the regulatory authority for approval at least every four years in due time for being considered in the drafting of the ten-year network development plans referred to in Article 51. The distribution network development plan shall set out the planned investments for the next five-to-ten years, including main distribution infrastructure which is required to transport renewable gas from new production facilities, as well as the infrastructure which will be decommissioned and repurposed. Distribution system operators and hydrogen distribution network operators that are active in the same regional area may opt to develop one single joint network development plan. Distribution network development plans shall:</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
646s		<i>(a) be aligned with the Member State's integrated national energy and climate plan, national energy and climate report and long-term strategy submitted under Regulation (EU) 2018/1999, and contribute to the achievement of regional and national climate and energy targets for 2030 and 2050;</i>		
646t		<i>(b) be based on relevant strategies referred to in Article 52a(2), point (c) that establish requirements for the infrastructure on distribution level, including parts that may require decommissioning, aiming to reduce the use of gas in buildings in case more energy and cost-efficient sustainable technologies are available;</i>		
646u		<i>(c) be based on reasonable assumptions about the evolution of production, injection, supply and consumption of gas while taking into account the relevant strategies of the local authorities</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>for the heating and cooling of new residential areas as well as requests from final customers to switch fuels;</i>		
646v		<i>(d) be consistent with the ten-year network development plan referred to in Article 51;</i>		
646w		<i>(e) promote priority use of renewable gas and low-carbon gas in hard-to-decarbonise sectors where no other more energy and cost efficient options are available;</i>		
646x		<i>(f) contain all investments, including demand-side solutions not requiring new infrastructure investments, energy storage facilities or other available energy system resources as an alternative to system expansion where doing so is more efficient as well as grid reinforcement for the injection of</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>biomethane; and</i>		
646y		<i>(g) include information on infrastructure that could be decommissioned, where alternatives are available, or repurposed for the transport of hydrogen, including to rapidly deliver hydrogen to end-users in hard-to-decarbonise sectors, which have the highest greenhouse gas emissions abatement potential per tonne of consumed hydrogen and where no other more energy and cost efficient options are available.</i>		
646z		<i>2. The distribution system operator or the hydrogen distribution network operator shall conduct a public consultation on the draft distribution network development plan. The participation is voluntary and all relevant stakeholders shall be invited, including the transmission system operator and hydrogen</i>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>transmission system operator, as well as district heating infrastructure and electricity operators, associations involved in electricity, gas and hydrogen markets, heating and cooling, supply and production undertakings, independent aggregators, demand-response operators, organisations involved in energy efficiency solutions, industrial end-users, energy consumer associations, civil society representatives, research organisations and universities, where appropriate. To ensure early and effective participation, the distribution system operator or the hydrogen distribution network operator shall publish a draft of the network development plan in advance for comments.</i></p>		
646aa		<p><i>3. The distribution system operator or the hydrogen distribution network operator shall make public the results of the consultation processes together with the draft distribution network development plan.</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
646ab		<p><i>4. The regulatory authority shall approve or reject the distribution network plan and may require amendments to the plan, based on its consistency or inconsistency with the requirements of paragraph 1, before making a decision to approve or reject the plan.</i></p>		
646ac		<p><i>5. However, Member States may decide not to apply the obligations set out in paragraphs 1 to 4 to distribution system operator which serve less than 35 000 connected customers by ... [the date of entry into force of this Directive].</i></p>		
646ad		<p><i>6. Where the strategy referred to in Article 52a(2), point (e), or the distribution network development plan developed under this Article identifies that parts of the distribution system may require decommissioning, in particular before the end of their originally</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<p><i>projected useful lifecycle, and will not be repurposed for the transport of hydrogen, Member States shall ensure regulatory guidance from the regulatory authorities and financial support for distribution system operators. Support measures shall take into account security of supply, the affordability of network tariffs and environmental requirements. Complementary, the distribution system operator shall propose interventions to the regulatory authority to equitably allocate the efficient costs of the assets over their remaining lifecycle until they are decommissioned. To that end, the regulatory authority may in coordination with the distribution system operator set up guidelines for a structural approach to the depreciation of assets. Such interventions could include, for example, adjusting the depreciation profile or timeline of the assets. The regulatory authority in coordination with the distribution system operator shall decide whether such assets should be decommissioned before the end of their originally projected useful lifecycle and, if so, whether any of the interventions proposed by the</i></p>		

	Commission Proposal	EP Mandate	Council Mandate	Draft Agreement
		<i>distribution system operator, or any alternative interventions, shall be implemented to equitably allocate the efficient costs of the assets over their remaining lifecycle until decommissioning. The repurposing of assets for the transport of hydrogen in accordance with paragraph 2, point (g), shall be taken into account. The distribution system operator shall implement the interventions decided by the regulatory authority.</i>

Without prejudice to the powers of the national regulator, compliance with the program shall be independently monitored by a compliance officer.	1. Member States shall ensure that transmission system operators establish and implement a compliance programme which sets out the measures taken in order to ensure that discriminatory conduct is excluded, and ensure that the compliance with that programme is adequately monitored. The compliance programme shall set out the specific obligations of employees to meet those objectives. It shall be subject to approval by the regulatory authority. Without prejudice to the powers of the national regulator, compliance with the program shall be independently monitored by a compliance officer.
