Subject:	Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL establishing a European Union Agency for the Cooperation of Energy Regulators (recast) - General approach

I. INTRODUCTION

On 30 November 2016, the Commission adopted and transmitted to the Council and to the European Parliament the above-mentioned recast proposal which generally updates the already attributed list of tasks for ACER's duties in the field of wholesale market supervision and issues of cross-border relevance. In particular, ACER is proposed to be given more responsibility with respect to the development and implementation of electricity network codes and guidelines, coordination of certain functions related to Regional Security Coordinators and tasks as regards the approval of methods and proposals related to generation adequacy and risk preparedness.

The 'Clean Energy for All Europeans' package was presented at the meeting of the TTE (Energy) Council in December 2016. At the meeting of the TTE (Energy) Council in February 2017, a first exchange of views was held on the package.

Following the completion of the examination of the Impact Assessments of all eight legislative proposals, the detailed examination of the proposals started and the TTE (Energy) Council took note of a progress report¹ in June 2017.

The European Parliament's ITRE Committee has appointed Morten Helveg Petersen (ALDE) as rapporteur and the Parliament adopted its position on 1 March 2018.

II. WORK WITHIN THE COUNCIL PREPARATORY BODIES

The Council Working Party on Energy started its detailed examination of the proposal in July 2017. Following the discussions held at various meetings of the Working Party, the Presidency amended the Commission proposal on several points in order to achieve an acceptable compromise text while taking into account Member States' concerns. Furthermore, the Presidency compromise text generally recalls the exchange of views provided by ministers on the topic "Way forward on ACER Regulation", held at the Informal Meeting of Energy Ministers in Sofia on 18-19 April 2018.

On 1 June 2018, the draft general approach was submitted to the Permanent Representatives Committee. During the Committee meeting, delegations agreed to the text set out in the Annex while arguing for keeping the delicate balance of the Presidency compromise. For the time being, four delegations still hold scrutiny reservations on Article 25 (c) and another delegation introduced a parliamentary reservation.

The recitals have been adapted to the substantive provisions. Changes compared to the Commission proposal are marked **in bold** and deletions with [].

III. CONCLUSION

The TTE (Energy) Council is invited, at its meeting on 11 June 2018, to formally adopt a general approach based on the provisional agreement reached at COREPER on 1st June 2018 concerning the draft Regulation establishing a European Union Agency for the cooperation of energy regulators (ACER), as set out in the Annex.

The general approach would establish the Council's provisional position on this proposal, and form the basis for the preparations of negotiations with the European Parliament.

Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

establishing a European Union Agency for the Cooperation of Energy Regulators (recast)

(Text with EEA relevance)

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union , and in particular Article 194(2) thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee,

Having regard to the opinion of the Committee of the Regions,

Acting in accordance with the ordinary legislative procedure ,

Whereas:

- (1) Regulation (EC) No 713/2009 of the European Parliament and of the Council² has been substantially amended. Since further amendments are to be made, that Regulation should be recast in the interest of clarity.
- (2) The creation of the Agency has manifestly improved coordination between regulators on cross-border issues. Since its creation, the Agency has received new important tasks concerning the monitoring of wholesale markets under Regulation (EU) No 1227/2011 of the European Parliament and of the Council³ and in the field of cross-border energy infrastructure under Regulation (EU) No 347/2013 of the European Parliament and Council⁴.
- (3) It is projected that the need for coordination of national regulatory actions will increase further in the coming years. Europe's energy system is in the middle of its most profound change in decades. More market integration and the change towards more variable electricity production requires increased efforts to coordinate national energy policies with neighbours and to use the opportunities of cross-border electricity trade.
- (4) Experience with the implementation of internal market rules has shown that uncoordinated national action can lead to severe problems for the market, notably in closely interconnected areas where decisions of Member States often have a tangible impact on their neighbours. To achieve the positive effects of the internal electricity market for consumer welfare, security of supply and decarbonisation Member States, and in particular independent national regulators, are required to cooperate on those regulatory measures which have a cross-border effect.

² Regulation (EC) No 713/2009 of the European Parliament and of the Council of 13 July 2009 establishing an Agency for the Cooperation of Energy Regulators (OJ L 211, 14.8.2009, p. 1)

³ Regulation (EU) No 1227/2011 of the European Parliament and of the Council of 25 October 2011 on wholesale energy market integrity and transparency (OJ L 326, 8.12.2011, p. 1).

⁴ Regulation (EU) No 347/2013 of the European Parliament and Council of 17 April 2013 on guidelines for trans-European energy infrastructure and repealing Decision No 1364/2006/EC and amending Regulations (EC) No 713/2009, (EC) No 714/2009 and (EC) No 715/2009 (OJ L 115, 25.4.2013, p. 39).

- (5) Fragmented national state interventions in energy markets constitute an increasing risk to the proper functioning of cross-border electricity markets. The Agency should therefore be given a role in the development of a coordinated European resource adequacy assessment, in close cooperation with the European Network of Transmission System Operators for Electricity ("ENTSO for Electricity"), in order to avoid the problems of fragmented national assessments which follow different uncoordinated methods and do not sufficiently take into account the situation in neighbouring countries. The Agency should also supervise the technical parameters developed by the ENTSO for Electricity for an efficient participation of cross-border capacities and other technical features of capacity mechanisms.
- (6) Security of electricity supply requires a coordinated approach to prepare against unexpected supply crises. The Agency should therefore coordinate national actions related to risk preparedness, in line with [Risk Preparedness Regulation as proposed by COM(2016) 862].
- (7) Due to the close interconnection of the Union electricity grid and the increasing need to cooperate with neighbouring countries to maintain grid stability and integrate large volumes of renewable energies, [] **Regional Security Coordinators** will play an important role for the coordination of transmission system operators. The Agency should guarantee regulatory oversight over the [] **Regional Security Coordinators** where necessary.
- (8) As large parts of new electricity generation will be connected at local level, distribution system operators will play an important role when it comes to operating the European electricity system in a flexible and efficient manner.

- (9) Member States should cooperate closely, eliminating obstacles to cross-border exchanges of electricity and natural gas with a view to achieving the objectives of the Union energy policy. A European Union Agency for the Cooperation of Energy Regulators (the Agency) was established by Regulation (EC) No 713/2009 in order to fill the regulatory gap at Union level and to contribute towards the effective functioning of the internal markets in electricity and natural gas. The Agency enables national regulatory authorities to enhance their cooperation at Union level and participate, on a mutual basis, in the exercise of Union -related functions.
- (10) The Agency should ensure that regulatory functions performed by the national regulatory authorities in accordance with [the recast Electricity Directive as proposed by COM(2016) 864/2] and Directive 2009/73/EC of the European Parliament and of the Council are properly coordinated and, where necessary, completed at Union level. To that end, it is necessary to guarantee the independence of the Agency from electricity and gas producers, transmission and distribution system operators, whether public or private, and consumers and to ensure the conformity of its actions with Union law, its technical and regulatory capacities and its transparency, amenability to democratic control and efficiency.
- (11) The Agency should monitor regional cooperation between transmission system operators in the electricity and gas sectors as well as the execution of the tasks of the ENTSO for Electricity, and the European Network of Transmission System Operators for Gas ("ENTSO for Gas"). The Agency should also monitor the implementation of the tasks of other entities with regulated functions of Union-wide dimension, such as energy exchanges. The involvement of the Agency is essential in order to ensure that the cooperation between transmission system operators and the operation of other entities with Union-wide functions proceeds in an efficient and transparent way for the benefit of the internal markets in electricity and natural gas.

- (12) The Agency should monitor, in cooperation with the Commission, the Member States and relevant national authorities, the internal markets in electricity and natural gas and inform the European Parliament, the Commission and national authorities of its findings where appropriate. Those monitoring tasks of the Agency should not duplicate or hamper monitoring by the Commission or national authorities, in particular national competition authorities.
- (13) The Agency provides an integrated framework which enables national regulatory authorities to participate and cooperate. That framework facilitates the uniform application of the legislation on the internal markets in electricity and natural gas throughout the Union . As regards situations concerning more than one Member State, the Agency has been granted the power to adopt individual decisions. That power should under clearly specified conditions cover technical and regulatory issues which require regional coordination , notably concerning the implementation of network codes and guidelines, cooperation within [] **Regional Security Coordinators**, the regulatory decisions necessary to effectively monitor wholesale market integrity and transparency, decisions concerning electricity and natural gas infrastructure that connects or that might connect at least two Member States and, as a last resort, exemptions from the internal market rules for new electricity interconnectors and new gas infrastructure located in more than one Member State. **Regarding regulatory tasks involving decisions conferred to at least two national regulatory authorities or the Agency, under the network codes and Guidelines pursuant to Articles 55 to 57 of [recast Electricity Regulation as proposed by COM(2016) 861/2] or pursuant to Art. 8 (6) of Regulation (EC) No 715/2009/EC, a procedure guaranteeing an adequate involvement of Member States in the development of network codes and guidelines by the adoption of implementing acts pursuant to Article 5 of Regulation (EU) No 182/2011 of the European Parliament and the Council is a prerequisite for granting these decisions rights to the national regulatory authorities or Agency.**

- (14) The Agency has an important role in developing framework guidelines which are non-binding by nature ("framework guidelines"). Network codes should be in line with those framework guidelines. It is also considered appropriate for the Agency, and consistent with its purpose, to have a role in reviewing draft network codes to ensure that they are in line with the framework guidelines and provide for the necessary degree of harmonisation, before it submits them to the Commission for adoption.
- (15) With the adoption of a set of network codes and guidelines which provide for a stepwise implementation and a further refinement of common regional and Union-wide rules, the role of the Agency in monitoring the implementation of the network codes and guidelines has increased. Effective monitoring of network codes and guidelines is a key function of the Agency and crucial for the implementation of internal market rules.
- (16) From experience with the implementation of network codes and guidelines it has emerged that it is useful to streamline the procedure for the regulatory approval of regional or Union-wide terms and conditions or methodologies to be developed under the guidelines and network codes by submitting them directly to the Agency in order for national regulators, represented in the Board of Regulators, to be able to decide upon them.
- (17) Since the stepwise harmonisation of the Union energy markets involves finding regional solutions regularly as an interim step **and many methods are developed by a limited number of regulatory authorities for a specific region**, it is appropriate to reflect the regional dimension of the internal market and to provide for appropriate governance mechanisms. []

- (18) Since the Agency has an overview of the national regulatory authorities, it should have an advisory role towards the Commission, other Union institutions and national regulatory authorities as regards the issues relating to the purpose for which it was established. It should also be required to inform the Commission where it finds that the cooperation between transmission system operators does not produce the results which are needed or that a national regulatory authority whose decision is not in compliance with the Guidelines does not implement the opinion, recommendation or decision of the Agency appropriately.
- (19) The Agency should also be able to make recommendations to assist regulatory authorities and market players in sharing good practices.
- (20) The Agency should consult interested parties, where appropriate, and provide them with a reasonable opportunity to comment on proposed measures, such as network codes and rules.
- (21) The Agency should contribute to the implementation of the guidelines on trans-European energy networks as laid down in Regulation (EU) No 347/2013 of the European Parliament and of the Council⁵, in particular when providing its opinion on the non-binding Union -wide ten-year network development plans (Union -wide network development plans) in accordance with Article 4 (3) of this Regulation.
- (22) The Agency should contribute to the efforts of enhancing energy security.
- (22a) The Agency may, in specific clearly defined circumstances, adopt individual decisions on issues strictly related to the purpose for which it has been established.**

⁵ Regulation (EU) No 347/2013 of the European Parliament and of the Council of 17 April 2013 on guidelines for trans-European energy infrastructure and repealing Decision No 1364/2006/EC and amending Regulations (EC) No 713/2009, (EC) No 714/2009 and (EC) No 715/2009 (OJ L 115, 25.4.2013, p. 39).

- (23) In order to ensure that the Agency's framework is efficient and coherent with other decentralised agencies, the rules governing the Agency should be aligned to the Common Approach agreed between the European Parliament, the Council of the EU and the European Commission on decentralised agencies⁶. However, insofar as necessary, the structure of the Agency should be adapted to meet the specific needs of energy regulation. In particular, the specific role of the national regulatory authorities needs to be taken fully into account and their independence guaranteed.
- (24) Additional changes to the present Regulation may be envisaged in the future in order to bring the Regulation fully in line with the Common Approach on decentralised agencies. Based on the current needs of energy regulation, deviations from the Common Approach are necessary. This proposal therefore does not prejudice any further amendments to the Founding Regulation of the Agency which the Commission may wish to propose following further evaluation, as provided for in this act or on its own initiative.
- (25) The Administrative Board should have the necessary powers to establish the budget, check its implementation, draw up internal rules, adopt financial regulations and appoint a Director. A rotation system should be used for the renewal of the members of the Administrative Board who are appointed by the Council so as to ensure a balanced participation of Member States over time. The Administrative Board should act independently and objectively in the public interest and should not seek or follow political instructions.

⁶ Joint Statement of the European Parliament, the Council of the EU and the European Commission on decentralised agencies of 19.7.2012.

- (26) The Agency should have the necessary powers to perform its regulatory functions in an efficient, transparent, reasoned and, above all, independent manner. The independence of the Agency from electricity and gas producers and transmission and distribution system operators is not only a key principle of good governance but also a fundamental condition to ensure market confidence. Without prejudice to its members' acting on behalf of their respective national authorities, the Board of Regulators should therefore act independently from any market interest, should avoid conflicts of interests and should not seek or follow instructions or accept recommendations from a government of a Member State, from Union institutions or another public or private entity or person. The decisions of the Board of Regulators should, at the same time, comply with Union law concerning energy, such as the internal energy market, the environment and competition. The Board of Regulators should report its opinions, recommendations and decisions to the Union institutions.
- (27) Where the Agency has decision-making powers, interested parties should, for reasons of procedural economy, be granted a right of appeal to a Board of Appeal, which should be part of the Agency, but independent from its administrative and regulatory structure. In order to guarantee its functioning and full independence, the Board of Appeal should have a separate budget line in the budget of the Agency. In the interest of continuity, the appointment or renewal of the members of the Board of Appeal should allow for partial replacement of the members of the Board of Appeal. The decisions of the Board of Appeal can be subject to appeal before the Court of Justice of the European Union .
- (28) The Agency should exercise its decision-making powers in line with the principles of fair, transparent and reasonable decision-making. All procedural rules of the Agency should be laid down in its rules of procedures.

- (29) The Agency should be mainly financed from the general budget of the Union, by fees and [] by voluntary contributions. In particular, **fees should cover the costs of the Agency for services provided to market participants or entities acting on their behalf enabling them to report data pursuant to Article 8 of Regulation (EU) 1227/2011 in an efficient, effective and safe manner.** The resources currently pooled by regulatory authorities for their cooperation at Union level should continue to be available to the Agency. The Union budgetary procedure should remain applicable as far as any subsidies chargeable to the general budget of the Union are concerned. Moreover, the auditing of accounts should be undertaken by **an independent external auditor** in accordance with Article 107 of Commission Delegated Regulation (EU) No 1271/2013⁷.
- (30) The Agency's budget should be assessed by the budgetary authority on an ongoing basis, with reference to the Agency's workload and performance. The budgetary authority should ensure that the best standards of efficiency are met.

⁷ Commission Delegated Regulation (EU) No 1271/2013 of 30 September 2013 on the framework financial regulation for the bodies referred to in Article 208 of Regulation (EU, Euratom) No 966/2012 of the European Parliament and of the Council (OJ L 328, 7.12.2013, p. 42).

- (31) The Agency should have highly professional staff. In particular, it should benefit from the competence and experience of staff seconded by the national regulatory authorities, the Commission and the Member States. The Staff Regulations of Officials of the European Communities ("the Staff Regulations") and the Conditions of employment of other servants of the European Communities ("the Conditions of Employment"), laid down in Regulation (EEC, Euratom, ECSC) No 259/68⁸ and the rules adopted jointly by the Union institutions for the purpose of applying those regulations should apply to the staff of the Agency. The Administrative Board, in agreement with the Commission, should adopt appropriate implementing rules.
- (32) The regulatory work of the Director and the Board of Regulators pursuant to this Regulation, may be supported by working groups.
- (33) The Agency should apply the general rules regarding public access to documents held by Union bodies. The Administrative Board should establish the practical measures to protect commercially sensitive data and personal data.
- (34) Through the cooperation of national regulators within the Agency it is evident that majority decisions are a key pre-requisite to achieve progress on matters concerning the internal energy market which have significant economic effects in various Member States. National regulators should therefore **continue to vote with a two-thirds majority** within the Board of Regulators. **The Agency should be accountable to the European Parliament, the Council and the Commission.**

⁸ Regulation (EEC, Euratom, ECSC) No 259/68 of the Council of 29 February 1968 laying down the Staff Regulations of Officials and the Conditions of Employment of Other Servants of the European Communities and instituting special measures temporarily applicable to officials of the Commission (OJ L 56, 4.3.1968, p. 1).

- (35) Countries which are not members of the Union should be able to participate in the work of the Agency in accordance with appropriate agreements to be concluded by the Union .
- (37) Since the objectives of this Regulation, namely the participation and cooperation of national regulatory authorities at Union level, cannot be sufficiently achieved by the Member States and can therefore be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union . In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.
- (37a) The seat of the Agency is situated in Ljubljana as provided by Decision 2009/913/EU taken by common agreement between the Representatives of the Governments of Member States on 7 December 2009.**
- (38) The Agency's host Member State should provide the best possible conditions to ensure the smooth and efficient functioning of the Agency, including multilingual, European-oriented schooling and appropriate transport connections **as required by Regulations (EU) No 713/2009 and 863/2016. The Seat Agreement between the Government of the Republic of Slovenia and the Agency for the Cooperation of Energy Regulators which fulfils these requirements together with its implementing arrangements, was concluded on 26 November 2010 and entered into force on 10 January 2011.**
