NOTE

From:	General Secretariat of the Council
To:	Delegations
No. prev. doc.:	8211/26
No. Cion doc.:	17050/25
Subject:	Proposal for a REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL amending Regulations (EC) No 561/2006, (EU) 2018/858, (EU) 2019/2144 and (EU) 2024/1257 of the European Parliament and of the Council as regards the simplification of technical requirements and testing procedures for motor vehicles and repealing Council Directive 70/157/EEC and Regulation No 540/2014 of the European Parliament and of the Council - Presidency compromise text

Delegations will find in the Annex the fourth Presidency compromise text in relation to the above proposal.

Additions to the Commission proposal are indicated in **bold**, deletions are marked as ~~strikethrough~~. Changes compared to the third compromise text are highlighted in **bold underlined**, deletions are marked as ~~strikethrough underlined~~. In Article 2a (new) (Amendments to Regulation (EU) 2019/1242) and in the Annex (Amendments to Regulation (EU) 2024/1257), suggested changes compared to the current text of the Regulations are marked in yellow.

ANNEX

2025/0422 (COD)

Proposal for a

REGULATION OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL

amending Regulations (EC) No 561/2006, (EU) 2018/858, (EU) 2019/2144 and (EU) 2024/1257 of the European Parliament and of the Council as regards the simplification of technical requirements and testing procedures for motor vehicles and repealing ~~Council Directive 70/157/EEC and~~ Regulation No 540/2014 of the European Parliament and of the Council and Council Directive 70/157/EEC

THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Articles 91 and 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee[1],

Having regard to the opinion of the Committee of the Regions[2],

Acting in accordance with the ordinary legislative procedure,

Whereas:

(1) The 2024 Draghi report on European competitiveness[3] highlighted that the number and the complexity of rules risk limiting the room for manoeuvre for Union undertakings and

---

1 OJ C , , p. .
2 OJ C , , p. .
3 https://commission.europa.eu/topics/competitiveness/draghi-report_en

preventing them from remaining competitive. A detailed analysis of Regulations (EC) No 561/2006[4], (EU) 2018/858[5], (EU) 2019/2144[6] and (EU) 2024/1257[7] of the European Parliament and of the Council also pointed to excessive administrative burden and costs associated with the requirements set out therein. Based on those findings, it is appropriate to simplify certain obligations on manufacturers and competent authorities set out ~~in automotive-related legislation~~**therein** and to reduce unnecessary burdens and costs for businesses and authorities, without undermining the protection of the environment and the safety performance of vehicles. **Those Regulations should therefore be amended accordingly.**

PUBLIC

---

4 Regulation (EC) No 561/2006 of the European Parliament and of the Council of 15 March 2006 on the harmonisation of certain social legislation relating to road transport and amending Council Regulations (EEC) No 3821/85 and (EC) No 2135/98 and repealing Council Regulation (EEC) No 3820/85 (OJ L 102, 11.4.2006, p. 1, ELI: http://data.europa.eu/eli/reg/2006/561/oj).

5 Regulation (EU) 2018/858 of the European Parliament and of the Council of 30 May 2018 on the approval and market surveillance of motor vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles, amending Regulations (EC) No 715/2007 and (EC) No 595/2009 and repealing Directive 2007/46/E (OJ L 151, 14.6.2018, p. 1, ELI: http://data.europa.eu/eli/reg/2018/858/oj).

6 Regulation (EU) 2019/2144 of the European Parliament and of the Council of 27 November 2019 on type-approval requirements for motor vehicles and their trailers, and systems, components and separate technical units intended for such vehicles, as regards their general safety and the protection of vehicle occupants and vulnerable road users, amending Regulation (EU) 2018/858 of the European Parliament and of the Council and repealing Regulations (EC) No 78/2009, (EC) No 79/2009 and (EC) No 661/2009 of the European Parliament and of the Council and Commission Regulations (EC) No 631/2009, (EU) No 406/2010, (EU) No 672/2010, (EU) No 1003/2010, (EU) No 1005/2010, (EU) No 1008/2010, (EU) No 1009/2010, (EU) No 19/2011, (EU) No 109/2011, (EU) No 458/2011, (EU) No 65/2012, (EU) No 130/2012, (EU) No 347/2012, (EU) No 351/2012, (EU) No 1230/2012 and (EU) 2015/166 (OJ L 325, 16.12.2019, p. 1, ELI: http://data.europa.eu/eli/reg/2019/2144/oj).

7 Regulation (EU) 2024/1257 of the European Parliament and of the Council of 24 April 2024 on type-approval of motor vehicles and engines and of systems, components and separate technical units intended for such vehicles, with respect to their emissions and battery durability (Euro 7), amending Regulation (EU) 2018/858 of the European Parliament and of the Council and repealing Regulations (EC) No 715/2007 and (EC) No 595/2009 of the European Parliament and of the Council, Commission Regulation (EU) No 582/2011, Commission Regulation (EU) 2017/1151, Commission Regulation (EU) 2017/2400 and Commission Implementing Regulation (EU) 2022/1362 (OJ L, 2024/1257, 8.5.2024, ELI: http://data.europa.eu/eli/reg/2024/1257/oj).

(2) The Industrial Action Plan for the EU automotive sector[8] called for a regulatory simplification package for the automotive industry, by improving coherence and consistency between different regulatory requirements.

(3) Article 114 TFEU is the appropriate legal basis to adopt the measures necessary for the establishment and functioning of the internal market. In addition to Article 114 **of the Treaty on the Functioning of the European Union (TFEU)**~~TFEU~~, this Regulation should have an additional ~~specific~~**legal** basis**, namely Article 91 TFEU,** to cover amendments to Regulation (EC) No 561/2006 that is based on Article 91 TFEU.

(4) While this Regulation ~~is adopted~~**sets out measures necessary** for the establishment and functioning of the internal market, the simplification and streamlining of motor vehicle technical requirements, testing procedures and type-approval rules also support the Union's broader objective of fostering the gradual integration of candidate countries into the Union market. By promoting regulatory convergence, alignment with **Regulations of the** United Nations Economic Commission for Europe (UNECE)~~ Regulations~~ and coherent implementation of the Union acquis, this Regulation contributes to reducing technical barriers to trade, strengthening integrated European automotive value chains and enhancing the resilience and competitiveness of the European automotive ecosystem, without affecting the autonomy of Union law or decision-making.

(5) To improve the working conditions of drivers, road safety and fair competition, Regulations (EC) No 561/2006 and (EU) No 165/2014 of the European Parliament and of the Council[9] require the installation of a tachograph in ~~goods~~ vehicles **used for the transport of goods** with a weight above 3,5 tonnes. However, Article 3(2) of Regulation (EU) No 165/2014 allows Member States to exempt from that requirement the vehicles mentioned in Article 13(1) and (3) of Regulation (EC) No 561/2006.

---

[8] Communication from the Commission to the European Parliament, the Council, the European Economic and Social Committee and the Committee of the Regions: Industrial Action Plan for the European automotive sector (COM(2025) 95 final).

[9] Regulation (EU) No 165/2014 of the European Parliament and of the Council of 4 February 2014 on tachographs in road transport, repealing Council Regulation (EEC) No 3821/85 on recording equipment in road transport and amending Regulation (EC) No 561/2006 of the European Parliament and of the Council on the harmonisation of certain social legislation relating to road transport (OJ L 60, 28.2.2014, p. 1, ELI: http://data.europa.eu/eli/reg/2014/165/oj).

(6) Due to the weight of the battery, ~~battery-electric~~**‡battery-‡electric** light commercial vehicles might exceed a ~~weight~~**mass** of 3,5 tonnes**. ‡Battery-‡electric light commercial vehicles** ~~and~~ are therefore subject to the requirements laid down in Regulations (EC) No 561/2006 and (EU) No 165/2014, even though they have the same payload and use case as light commercial vehicles with an internal combustion engine that are outside the scope of those Regulations. Compliance with the requirements laid down in Regulations (EC) No 561/2006 and (EU) No 165/2014 represents a significant effort for vehicle operators and drivers and slows down the increase in the number of ~~battery-electric~~**‡battery-‡electric** light commercial vehicles.

(7) To reduce ~~unnecessary~~ costs for vehicle manufacturers and operators, many of them being small and medium-sized ~~companies, the requirement of tachograph installation for battery-electric~~**enterprises, it should be possible for ‡battery-‡electric** light commercial vehicles with a ~~weight below~~**mass not exceeding** 4,25 tonnes ~~should be removed~~**and engaged in domestic transport to be exempt from the application of Articles 5 to 9 of Regulation (EC) No 561/2006, and, as a result, also from Regulation (EU) No 165/2014**. **This includes hybrid electric vehicles relying permanently on electric propulsion aided by an auxiliary engine, as their battery weight places them under the same constraint.**

(8) ~~As it is~~**It should be** for the Member States to decide whether to ~~use that exception, the~~**apply this** exemption ~~should only apply to~~**for** electric light commercial vehicles engaged exclusively in domestic transport ~~**or, with the agreement of the Member States concerned, on the territory of another Member State**~~.

(9) To reduce the burden that **the rules on driving times and rest periods, as well as on** the installation and use of a tachograph**, place** ~~places~~ on non-professional drivers driving large motor caravans for non-commercial purposes and the impact that this can have on the demand for such vehicles, ~~national authorities should be able to exempt such~~**those** vehicles and ~~operations from the driving and rest time rules and the use of the tachograph, provided that the objectives referred to in Article 1 of that~~**drivers should be exempt from Regulation (EC) No 561/2006, and as a result also from** Regulation ~~are not jeopardised~~**(EU) No 165/2014**.

(10) Regulation (EU) 2018/858 ~~of the European Parliament and of the Council~~ permits the type-approval of motor vehicles as regards sound level **of motor vehicles and of**~~and~~ Acoustic

Vehicle Alerting Systems **(AVAS)** either through Regulation (EU) No 540/2014 of the European Parliament and of the Council[10] or through the UN Regulations, including **UNECE** Regulations No 138[11], No 51[12], and No 59[13] ~~of the UNECE. That~~**. Those** parallel ~~system~~**systems** risks causing market fragmentation. Moreover, Regulation (EU) No 540/2014 has become obsolete due to a deficit of updates in comparison with ~~the~~**those** three ~~above-mentioned~~ UNECE regulations. To ensure a coherent framework and full alignment with **relevant** UN regulations, Regulation (EU) No 540/2014 should be repealed and Annex II to Regulation (EU) 2018/858 should be amended to only ~~allow~~**require** compliance with the ~~applicable~~**relevant** UN regulations.

(10a) Regulation (EU) 2018/858 should be simplified as regards the procedure for making available on the market, registration, or entry into service of end-of-series vehicles. In particular, the limitations on the number of vehicles that may benefit should be discontinued, and the procedure requiring a request from the manufacturer and a decision by the authority should be replaced by establishing directly in the Regulation whether a vehicle is eligible for registration, based on the manufacturing date. In addition, that simplification is expected to provide clarity in cases where a vehicle is placed on the market in one Member State but intended to be registered in another Member State.

(11) As ~~battery~~ electric vehicle's technology is evolving at a fast pace and the number of electric vehicles on the market is increasing, interoperability between vehicles, the charging infrastructure and the electricity grid is becoming increasingly critical. A

---

10 Regulation (EU) No 540/2014 of the European Parliament and of the Council of 16 April 2014 on the sound level of motor vehicles and of replacement silencing systems, and amending Directive 2007/46/EC and repealing Directive 70/157/EEC (OJ L 158, 27.5.2014, p. 131, ELI: http://data.europa.eu/eli/reg/2014/540/oj)

11 Regulation No 138 of the Economic Commission for Europe of the United Nations (UNECE) — Uniform provisions concerning the approval of Quiet Road Transport Vehicles with regard to their reduced audibility [2017/71] (OJ L 9, 13.1.2017, p. 33, ELI: http://data.europa.eu/eli/reg/2017/71(1)/oj).

12 Regulation No 51 of the Economic Commission for Europe of the United Nations (UNECE) — Uniform provisions concerning the approval of motor vehicles having at least four wheels with regard to their sound emissions [2018/798] (OJ L 138, 4.6.2018, p. 1, ELI: http://data.europa.eu/eli/reg/2018/798/oj).

13 Regulation No 59 of the Economic Commission for Europe of the United Nations (UNECE) — Uniform provisions concerning the approval of replacement silencing systems [2025/844] (OJ L, 2025/844, 30.4.2025, ELI: http://data.europa.eu/eli/reg/2025/844/oj).

harmonised approach to interoperability at Union level is essential to avoid fragmentation of certain technical requirements which are being developed outside of the **Union** vehicle type-approval framework, notably as regards the implementation of the **following** revised Network Codes**:** ~~(~~a network code on demand connection established by Commission Regulation (EU) 2016/1388[14] and a network code on requirements for grid connection of generators established by Commission Regulation (EU) 2016/631[15]~~)~~. Therefore, to ensure ~~battery~~ electric vehicle's harmonised capabilities and enable interoperable vehicle-to-grid services, vehicles will need to meet certain technical requirements. Therefore, to ensure interoperability between vehicles, the charging infrastructure and the electricity grid, the empowerment should be provided in Regulation (EU) 2018/858 for the Commission to set out technical requirements as regards the communication and hardware interface of pure electric vehicles (PEV) and off-vehicle charging hybrid electric vehicles (OVC-HEV) with the recharging infrastructure, the electricity grid and the stationary power systems.

(12) ~~[~~The transition towards a more sustainable road transport has mainly been driven by the growth of sales of premium electric vehicle models. However, to ensure the continuity of ~~this~~**that** transition, it is necessary to make **small** electric vehicles more affordable. Targeted regulatory measures**, such as** ~~(~~longer transitional period for new requirements~~,~~ **and** targeted incentives in the ~~CO2~~**CO_2** vehicle emission standards~~)~~, fiscal ~~(~~**measures,** such as subsidy schemes~~)~~**,** and non-fiscal ~~(~~**benefits,** such as reserved parking space~~)~~ ~~benefits~~, in line with State aid rules, where applicable, can contribute to better affordability of small electric vehicles. However, a legal definition of a small electric vehicle is currently not provided **for** in the **Union vehicle** type-approval framework. Therefore, it is appropriate to introduce a **new** sub-category **of small electric vehicles** under the existing M1 **and N1** vehicle categor**ies**.~~]~~ **The definition of "small electric vehicle" as a sub-category under the M1 and N1 vehicle categories in this Regulation is without prejudice to the definition of zero-emission vehicles or provisions on super credits under Regulation (EU) 2019/631 of the European Parliament and of the Council, or**

---

14 Commission Regulation (EU) 2016/1388 of 17 August 2016 establishing a Network Code on Demand Connection (OJ L 223, 18.8.2016, p. 10, ELI: https://eur-http://data.europa.eu/eli/reg/2016/1388/oj).

15 Commission Regulation (EU) 2016/631 of 14 April 2016 establishing a network code on requirements for grid connection of generators (OJ L 112, 27.4.2016, p. 1, ELI: http://data.europa.eu/eli/reg/2016/631/oj).

low-carbon requirements in the context of public procurement and public support schemes, and, where relevant, consequential changes to provisions on type approval. Therefore, in case of legislative developments in those fields, the Commission should be empowered to reflect them in the type-approval rules by way of delegated acts.

(13) When deciding on application dates of future motor vehicle requirements affecting ~~this new small electric~~**that new** vehicle sub-category, the proportionally higher impact on development costs that new requirements can have on ~~these~~**those** vehicles as compared to heavier and more expensive ones, should be taken into account.

(14) As announced in the Industrial Action Plan for the EU automotive sector, the Commission is to issue a Commission Recommendation with options for incentive schemes that have proven effective in promoting the uptake of zero-emission vehicles and are compliant with competition rules. Recommendations to Member States– for fiscal ~~(i.e.~~**measures, namely** purchase subsidies, tax exemptions~~, road-toll exemption)~~ **and road-toll exemptions,** and non-fiscal ~~(i.e.~~**measures, namely** size-based parking rights allocation~~,~~ **and** dedicated charging infrastructure~~, etc.) measures~~ could be also based on the new ~~vehicle~~ sub-category of small electric ~~cars~~**vehicles**.

(15) Article 3(1) of Council Directive 92/6/EEC[16]~~on the installation and use of speed limitation devices for certain categories of vehicles~~ requires the installation and use of speed limitation devices in vehicles of ~~the category~~**categories** N2 and N3 . Under that Article, such vehicles can be used on the road only if equipped with a speed limitation device. The installation requirement has been integrated into motor vehicle type-approval legislation with Regulation (EU) 2019/2144~~ of the European Parliament and of the Council~~.

(16) Due to the weight of the battery, ~~battery-electric~~**battery-**~~**l**~~**electric** light commercial vehicles might exceed a ~~weight~~**mass** of 3,5 tonnes and are subject to the requirement to be equipped with speed limitation devices although they have the same payload and use case as light commercial vehicles with an internal combustion engine that are outside the scope of ~~the~~ Regulation (EU) 2019/2144. That requirement imposes unnecessary costs on

---

16 Council Directive 92/6/EEC of 10 February 1992 on the installation and use of speed limitation devices for certain categories of motor vehicles in the Community (OJ L 57, 2.3.1992, p. 27, ELI: http://data.europa.eu/eli/dir/1992/6/oj).

vehicle manufacturers and enterprises purchasing such vehicles, slowing down the increase in the number of zero-emission light commercial vehicles **on the road**. It is therefore appropriate to exempt ~~zero-emission~~**[battery-]electric** vehicles of category N2 with maximum ~~technically permissible laden mass between 3,5 and~~**mass of exceeding 3,5 but not exceeding** 4,25 tonnes from the requirement to be equipped with speed limitation devices. **Vehicles in this category already equipped with such a device may have them removed subject to Member States requirements, where appropriate. This includes hybrid electric vehicles relying permanently on electric propulsion aided by an auxiliary engine, as their battery weight places them under the same constraint.**

(16a) **Where a device or a strategy ~~has been approved by the type-approval authority in accordance~~ complies with Regulation (EU) 2024/1257 and the applicable implementing acts, such a device or a strategy does not constitute a manipulation device or manipulation strategy. It is clarified that this does not apply if the device or strategy does not comply with Regulation (EU) 2024/1257 or Regulation (EU) 2018/858 and their implementing acts and delegated acts, for instance where a Market Surveillance Authority has proof of evidence that a manipulation device or strategy does not comply to this regulation and its implementing act. ~~It is clarified that if a manufacturer designs, constructs or assembles vehicles with a device or a strategy that has not been approved by the type-approval authority or that deviates from what was approved by the type-approval authority, such a device or a strategy can constitute a manipulation device or manipulation strategy.~~**

(16b) **It is recalled that it is important to grant Member States, national authorities and economic operators enough time to prepare for the application of the new rules introduced by Regulation (EU) 2024/1257 and the implementing and delegated acts adopted thereunder. Given the specific technical challenges associated with the development and deployment of zero-emission technologies for heavy-duty vehicles and trailers, a longer lead time is appropriate for those vehicle categories. Therefore, it is appropriate to further defer the application of provisions of Regulation (EU) 2024/1257 for new vehicles of category M2, M3, N2 or N3 and trailer of category O3 or O4 to ensure that the relevant industry has sufficient time for the implementation of new requirements. It is recalled that for heavy-duty vehicles and trailers the date of application can be delayed, since the transition to zero-emission vehicles will be**

longer for heavy-duty vehicles. The adoption dates for the corresponding implementing acts should be amended correspondingly.

(16c) According to Regulation (EU) 2024/1257 the approval authority may grant to a vehicle of category N2, that has a maximum mass between 3,5 and 5 tonnes and originates from a type of vehicle of category N1, an emission type-approval if the vehicle meets the requirements for a type of vehicle of category N1 ("Euro 7ext"). Appropriate brake emission limits should be defined for vehicles having received such an emission type-approval.

(17) Manufacturers of category M1 and N1 vehicles are required to perform laboratory tests of engines ~~in low-temperatures~~**at low temperatures** pursuant to Annex V to Regulation (EU) 2024/1257. ~~As the~~ Temperature conditions ~~of~~**for** the laboratory test of low temperature for emissions are covered by the **test of** gaseous ~~pollutant and PN~~**pollutants and particle numbers (PN)** in road testing- Real Driving Emissions~~ test, demonstrating emission compliance at low temperature conditions (at -7 °C) is covered by having to comply to the Real Driving Emissions requirements (from -7 °C to 38 °C)~~. Therefore, to reduce costs for manufacturers related to the specific requirements laid down **in** Annex V to Regulation (EU) 2024/1257, it is appropriate to ~~remove that~~**add a declaration by the manufacturer as an alternative to** dedicated ~~low temperature~~**low-temperature** laboratory ~~requirement as such removal will not compromise environmental standards ensured by the Real Driving Emissions test~~**tests.**

(18) Annex V to Regulation (EU) 2024/1257 requires that, for the engine testing of heavy-duty vehicles, demonstration tests be performed for all applicable fuels within each vehicle type. In order to significantly reduce administrative costs related to those tests without compromising environmental standards, it is appropriate to introduce test requirements at vehicle category level in tables 1, 2, 3, 4, 7 and 8 of ~~that~~ Annex V.

(18a) **In line with Article 14(3) of Regulation (EC) No 715/2007 of the European Parliament and of the Council, the Commission should keep under review the procedures, tests and requirements referred to in Article 5(3) of that Regulation as well as the test cycles used to measure emissions. It is recalled that the review should assess whether these are no longer adequate. In that assessment of adequacy, the Commission should take into account high and fluctuating energy prices stemming from geopolitical**

events, the development of driving behaviour over time, technological advancement, economic and social impacts, consumer behaviour, as well as impacts on the environment and health.

(19) Regulation (EU) 2024/1257 introduces on-board monitoring (OBM) systems and on-board fuel and electric energy consumption monitoring (OBFCM) devices, which are aimed at facilitating real-time compliance checks, harmonisation efforts, lifecycle oversight, reduced testing expenses, and streamlined enforcement measures. In order to efficiently receive, process, and store OBM and OBFCM data**,** it is necessary to clarify that the empowerment of the Commission to adopt implementing ~~measures~~**acts** also covers the adoption of methods and requirements necessary for the monitoring compliance of vehicle types.

(20) To ensure legal clarity following the repeal of Regulation (EU) No 540/2014 that ~~contained~~**contains** a provision repealing Council ~~Regulation 70/157/EEC~~**Directive 70/157/EEC**[17], it is necessary to provide for the repeal of ~~Council~~ Directive 70/157/EEC in this Regulation. To provide manufacturers of vehicles with sufficient time to adjust their production processes, it is appropriate to provide for the transitional period during which vehicles could still be approved in accordance with Regulation (EU) No 540/2014~~,~~**.**

(20a) Directive (EU) 2025/2205[18] extends the scope of vehicles that can be driven with a driving licence of category B or BE to alternatively-fuelled vehicles weighing more than 3,5 tonnes. With the aim to facilitate the uptake of alternatively-fuelled vehicles, it should be clarified that, although a temporal gap in harmonisation may occur in a cross-border context, Member States are not prevented from applying national transposition measures from the point in time when they are adopted.

---

17 Council Directive 70/157/EEC of 6 February 1970 on the approximation of the laws of the Member States relating to the permissible sound level and the exhaust system of motor vehicles (OJ L 42, 23.2.1970, p. 16, ELI: http://data.europa.eu/eli/dir/1970/157/oj).

18 **Directive (EU) 2025/2205 of the European Parliament and of the Council of 22 October 2025 on driving licences, amending Regulation (EU) 2018/1724 of the European Parliament and of the Council and Directive (EU) 2022/2561 of the European Parliament and of the Council, and repealing Directive 2006/126/EC of the European Parliament and of the Council and Commission Regulation (EU) No 383/2012, OJ L, 2025/2205, 5.11.2025.**

(20b) **Since the objectives of this Regulation, namely to amend Regulations which are harmonising motor vehicle legislation or social legislation related to road transport, cannot be sufficiently achieved by the Member States but can rather, by reason of better harmonisation of applicable rules, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives,**

HAVE ADOPTED THIS REGULATION:

Article 1

Amendments to Regulation (EC) No 561/2006

Regulation (EC) No 561/2006 is amended as follows:

(1) **in Article 3, the following point is added:**

'(j) motor caravans, as defined in Part A, point 5.1, of Annex I to Regulation (EU) 2018/858, used exclusively for non-commercial carriage and with a maximum permissible mass exceeding 7,5 tonnes.'

– **(2)** **in** Article 13(1) ~~of Regulation (EC) No 561/2006~~ **the following subparagraph is added**:

~~(1) the following point (fa) is inserted:~~

'~~(fa)~~ **Provided the objectives set out in Article 1 are not prejudiced, a Member State may also grant exceptions from Articles 5 to 9 and make such exceptions subject to individual conditions on its own territory applicable to carriage of goods by** vehicles ~~used for the carriage of goods and~~ propelled **only** by means of electricity, **including vehicles with an auxiliary combustion engine which is not mechanically connected to the drivetrain and used solely for electricity generation**, where the maximum permissible

mass of **the vehicle** ~~which~~, including the mass of a trailer or semi-trailer, exceeds 3,5 tonnes but does not exceed 4,25 tonnes;;'

~~(2) the following point (s) is added:~~

~~'(s) motor caravans, as defined in Part A, point 5.1, of Annex I to Regulation (EU) 2018/858, used exclusively for non-commercial carriage.;'~~

Article 1a

Amendments to Regulation (EU) 2009/595

Regulation (EU) 2009/595 is amended as follows:

(1) Article 5a paragraph 2 is deleted.

(2) Article 5c points (b) and (c) are deleted.

Article 2

Amendments to Regulation (EU) 2018/858

Regulation (EU) 2018/858 is amended as follows:

(-1) in Article 4, paragraph 2, the second subparagraph is replaced by the following:

'The Commission is empowered to adopt delegated acts in accordance with Article 82, amending Annex I in relation to the types of vehicle and types of bodywork to take account of technical progress or amendments to Regulation (EU) 2019/631 of the European Parliament and of the Council or Regulation (EU) 2019/1242 of the European Parliament and of the Council.'

(1) in Article 5, the following paragraph ~~4 is inserted~~**is added**:

'4. The Commission is empowered to adopt delegated acts in accordance with Article 82 supplementing this Regulation by laying down technical requirements as regards the communication and hardware interface of pure electric vehicles (~~PEV~~**PEVs**) and off-vehicle charging hybrid electric vehicles (~~OVC-HEV~~**OVC-HEVs**) with the recharging infrastructure, the electricity grid and the stationary power systems capable of supporting smart and bidirectional charging functionalities.'

PUBLIC

(1a) Article 49 is replaced by the following:

"Article 49

Making available on the market, registration or entry into service of end-of-series vehicles

1. Where a European regulation provides that vehicles which do not comply with certain technical requirements may no longer be made available on the market, registered or put into service at a certain point in time, or that a certificate of conformity issued may therefore be invalidated at a certain point in time, the following additional rules shall apply to the registration of a vehicle concerned:

a) A complete vehicle manufactured up to the date three months before the date of entry into force of the prohibition on registration may still be made available on the market, registered or put into service for a period of 12 months after the entry into force of the prohibition on registration. Thereafter, it may no longer be made available on the market, approved or put into service.

b) A completed vehicle manufactured up to the date three months before the date of entry into force of the prohibition on registration may still be made available on the market, registered or put into service for a period of 18 months after the entry into force of the prohibition on registration. Thereafter, it may no longer be made available on the market, approved or put into service.

2. Where a European regulation provides that vehicles which do not comply with certain technical requirements and have been manufactured up to a certain point in time may still be made available on the market, registered or put into service, that authorisation shall expire for a complete vehicle 12 months after the date of entry into force of the prohibition of registration referred in that regulation and for a completed vehicle 18 months after the date of entry into force of the prohibition of vehicle registration referred in that regulation.

PUBLIC

3. Until the date on which a vehicle is authorised to be registered in accordance with paragraphs 1 and 2, the vehicle concerned may be made available on the market, offered for sale and put into service.

4. Paragraphs 1 to 3 shall apply only to vehicles located in the territory of the European Union which were subject to a valid EU type-approval at the time of their manufacture, but which had not been registered or put into service before that EU type-approval became invalid."

(2) Annexes ~~I~~I and~~I~~ II are amended **as set out** in ~~accordance with~~ Annex II to this Regulation.

(2a) Part B of Annex V is deleted.

Article 2a

Amendments to Regulation (EU) 2019/1242

Regulation (EU) 2019/1242 is amended as follows:

Article 12 is replaced by the following:

Article 12

Real-world CO_2 emissions and energy consumption

1. The Commission shall monitor and assess the real-world representativeness of the CO_2 emissions and energy consumption values determined within the framework of Regulation (EU) 2024/1257.

Furthermore, the Commission shall regularly collect data on the rea world CO_2 emissions and energy consumption of heavy-duty vehicles using on-board fuel and/or energy consumption monitoring devices, starting with new heavy-duty vehicles registered from the date of application of the measures referred to in point (l) of Article 14(3) of Regulation (EU) 2024/1257.

The Commission shall ensure that the public is informed of how that representativeness evolves over time.

PUBLIC

2. For the purpose of paragraph 1 of this Article, the Commission shall ensure that the following parameters relating to real-world CO_2 emissions and energy consumption of heavy-duty vehicles are made available to it at regular intervals, starting from the date of application of the measures referred to in point (l) of Article 14(3) of Regulation (EU) 2024/1257, by manufacturers, national authorities or through direct data transfer from vehicles, as the case may be:

(a) vehicle identification number;

(b) fuel and electric energy consumed;

(c) total distance travelled;

(d) payload;

(e) for externally chargeable hybrid electric heavy-duty vehicles, the fuel and electric energy consumed, and the distance travelled distributed over the different driving modes;

(f) other parameters necessary to ensure that the obligations set out in paragraph 1 of this Article can be met

The Commission shall process the data received under the first subparagraph of this paragraph to create an anonymised and aggregated dataset, including per manufacturer, for the purposes of paragraph 1. The vehicle identification numbers shall be used only for the purpose of that data processing and shall not be retained longer than needed for

that purpose.

3. In order to prevent the real-world emissions gap from growing, the Commission shall, not later than two years and five months following the date of application of the measures referred to in point (l) of Article 14(3) of Regulation (EU) 2024/1257, assess how fuel and energy consumption data may be used to ensure that the vehicle CO_2 emission and energy consumption values determined pursuant to that Regulation remain representative of real-world emissions over time for each manufacturer.

The Commission shall monitor and report annually on how the gap referred to in the first subparagraph evolves, and shall, with a view to preventing an increase in that gap, assess, in 2032, the feasibility of a mechanism to adjust the manufacturer's average specific CO_2

PUBLIC

emissions as of 2035, and, if appropriate, submit a legislative proposal to put such a mechanism in place.

4. The Commission shall adopt, by means of implementing acts, the detailed procedure for collecting and processing the data referred to in paragraph 2 of this Article. Those implementing acts shall be adopted in accordance with the examination procedure referred to in Article 16(2).

Article 3

Amendment to Regulation (EU) 2019/2144

In Article 9 of Regulation (EU) No 2019/2144, the following paragraph 5a is inserted:

'5a. Vehicles of category N_2 propelled by means of electricity, with maximum technically permissible laden mass ~~between 3,5 and~~**exceeding 3,5 tonnes but not exceeding** 4,25 tonnes,– shall not be required to be equipped with speed limitation devices in accordance with UN Regulation No 89.~~.~~'

Article 4

Amendments to Regulation (EU) 2024/1257

Regulation (EU) 2024/1257 is amended as follows:

(-1) Article 4, paragraph 5 is amended as follows:

'5. Manufacturers shall not design, construct and assemble vehicles with manipulation devices or manipulation strategies. Where a device or a strategy ~~has been approved by the type-approval authority in accordance~~ complies with this Regulation and the implementing act referred to in Article 14 (3), points (a) to (c) and Article 14(4), points (s) and (u) thereof, ~~including the relevant documentation thereof,~~ such a device or a strategy shall not constitute a manipulation device or manipulation strategy or a strategy pursuant to Article 13(5) of Regulation (EU) 2018/858. This is without prejudice to market surveillance activities regarding compliance verification.'

(-1a) In Article 7, the following paragraph is inserted:

'2a. Manufacturers shall provide the approval authority with a signed declaration of compliance as regards the durability and the absence of abnormal failure rates of reagent injection system in dynamic conditions under which the reagent specified in type approval freezes and thaws repeatedly. Such systems shall withstand the lifetime requirements in Table 1 of Annex IV.'

(-1b) Article 10 is amended as follows:

(a) Paragraph 6 is replaced by the following:

'6. With effect from ~~29 November 2029~~ 29 May 2030, approval authorities shall, in the case of new types of vehicles of category M2, M3, N2 or N3 and new types of trailers of category O3 or O4 which do not comply with this Regulation, refuse to grant EU emission type-approval or national emission type-approval to such new types of vehicles and trailers on grounds relating to CO2 and pollutant emissions, fuel and electric energy consumption or battery durability.'

(b) Paragraph 7 is replaced by the following:

'7. With effect from ~~29 November 2030~~ 29 May 2031, national authorities shall, in the case of new vehicles of category M2, M3, N2 or N3 and new trailers of category O3 or O4, which do not comply with this Regulation, consider certificates of conformity to be no longer valid for the purposes of registration and shall prohibit the registration, sale or entry into service of such new vehicles and trailers on grounds relating to CO2 and pollutant emissions, fuel and electric energy consumption, energy efficiency or battery durability.'

(-1b) Article 11, paragraph 2 is replaced by the following:

'2. With effect from 29 November 2029, Member States shall prohibit the sale or installation of a system, component or separate technical unit intended to be fitted on a vehicle of category M2, M3, N2 or N3, or on a trailer of category O3 or O4 approved under this Regulation, where the system, component or

PUBLIC

separate technical unit is not type-approved in accordance with this Regulation.'

(1) Article ~~14(4), point (j) is replaced by the following~~**14 is amended as follows**:

(a) Paragraph 3, introductory paragraph is replaced by the following:

'3. The Commission may adopt implementing acts setting out procedures and testing methodologies, administrative provisions, procedures and methodologies for amending and extending emission type-approvals and data access, documentation requirements and templates for emission type-approval, conformity of production, in-service conformity and market surveillance, for all of the following:'

(b) Paragraph 4 is amended as follows:

(i) The introductory paragraph is replaced by the following:

'4. The Commission may adopt implementing acts for the emission type-approval, in-service conformity, conformity of production and market surveillance, to lay down the following:'

(ii) Paragraph 4, point (j) is replaced by the following:

'(j) the methods, requirements and tests, including compliance thresholds, to ensure performance of OBFCM devices, OBD and OBM systems and the sensors of such devices and systems, for off-board communication of data recorded by such devices and systems, including for the purpose of monitoring compliance of vehicle types;;'

(iii) A new point (w) is inserted:

'(w) additional methods to type approve a category M_2, N_2, M_3 or N_3 OVC-HEV vehicle with serial hybrid architecture.'

(d) in paragraph 9, the introductory paragraph is replaced by the following:

'9. By 29 May 2027, the Commission shall adopt, for vehicles of categories M2, M3, N2 and N3, as referred to in paragraph 3, points (b) and (c),

respectively, and their engines, as well as for trailers of categories O3 and O4, the following implementing acts:'

(1a) Article 15 is amended as follows:

(a) paragraph 1 point (c) is replaced by the following:

'(c) where appropriate, setting out emission limits for formaldehyde from vehicles of categories M2, M3, N2 and N3 that are fuelled by fuels of concern, in Table 2 of Annex I, following and based on the review in accordance with Article 18(6);'

(b) paragraph 2 point (a) is replaced by the following:

'(a) amending Annex I or setting out brake particle emission limits in Annex I in line with state-of-the art technologies and, if appropriate, referring to the work performed in the United Nations World Forum for Harmonization of Vehicle Regulations (UN WP.29), including, where relevant, amending Tables 5, 6, 7 and 8 of Annex I, respectively, by providing for different limits or criteria depending on categories of vehicles and powertrain technologies, and, where relevant, allowing for different brake particle emission limits for different powertrain technologies beyond 1 January 2035;'

(1b) in Article 21, the third subparagraph is replaced by the following:

'It shall apply from ~~29 November 2029~~ 29 May 2030 for new types of vehicles of categories M2, M3, N2, N3, O3 and O4 and components, systems and separate technical units intended for vehicles of categories M2, M3, N2, N3, O3 or O4 type-approved under this Regulation and from ~~29 November 2030~~ 29 May 2031 for new vehicles of categories M2, M3, N2, N3, O3 and O4 and components, systems and separate technical units for those vehicles.'

(2) ~~Annex V is~~**Annexes I and V are** amended **as set out** in ~~accordance with~~ Annex I to this Regulation.

PUBLIC

Article 4a

Amendment to Directive (EU) 2025/2205

In Article 29, paragraph 2 is replaced by the following:

"2. By 26 November 2027, Member States shall adopt and publish the measures necessary to comply with Article 9(2), points (j) and (k). They shall immediately inform the Commission thereof.

They shall apply those measures by 26 November 2027.";

Article 5

Repeals

– 1. Regulation (EU) No 540/2014 is repealed.

– 2. Directive 70/157/EEC is repealed with effect from 1 July 2027.

– **3. Regulation (EU) 2025/2161 is repealed.**

– **4. Regulation (EU) 2026/361 is repealed.**

Article 6

Transitional provision

Certificates of conformity for new vehicles produced after [OP: please insert the date of entry into force of this Regulation] and approved before 1 July 2028 in accordance with Regulation (EU) 540/2014 shall continue to be valid for the purposes of Articles 48 and 49 of Regulation (EU) 2018/858.

PUBLIC

Article 7

Entry into force and application

– 1. This Regulation shall enter into force on the twentieth day following that of its publication in the Official Journal of the European Union.

– 2. It shall apply from ~~[on the twentieth day following that of its publication in the Official Journal of the European Union]. However, Articles 3~~**the date of entry into force, with the exception of Article 3 which** shall apply from … [the transposition date ~~in the proposal~~**of the** amending Directive ~~92/6~~**set out in COM 2025/0424 (COD)**]**.**

This Regulation shall be binding in its entirety and directly applicable in all Member States.

ANNEX I

Annexes I and V to Regulation (EU) 2024/1257 are amended as follows:

– **1. in Annex I, the following table is inserted:**

'Table 1bis: Emission limits for the carbon monoxide and hydrocarbon tailpipe emissions at low temperature test for vehicles of categories M_1 and N_1 equipped with a positive ignition (PI) internal combustion engine

Test temperature 266 K (-7 °C)			
Vehicle category	**Class**	**Mass of carbon monoxide (CO) (g/km)**	**Mass of hydrocarbons (HC) (g/km)**
M_1	**-**	**15**	**1,8**
N_1	**I**	**15**	**1,8**
	II	**24**	**2,7**
	III	**30**	**3,2'**

– **1a. in Annex I, the footnote to Table 4 is replaced by the following:**

– **"(*) For N1, Class III vehicles, and Euro 7ext vehicles[1], the applicable limits are as follows: PEV 5 mg/km, OVC-HEV, NOVC-HEV, ECV/FCHV and ICEV 11mg/km";**

– **2.** Annex V ~~to Regulation (EU) 2024/1257~~ is amended as follows:

~~(1)~~**(a)** in table 1, the entry for 'Laboratory test of low temperature for emissions' is ~~deleted;~~**amended as follows:**

'Laboratory test of low temperature for emissions	**Declaration**	**Not required**	**Optional'**

[1] [NOTE : subject to information from the Commission whether brake abrasion of vehicles N2 between 3,5 and 5 tonnes is documented]

‘‘Gaseous pollutants, PN in road testing (RDE) for each fuel and for the applicable vehicle categories (M2, M3, N2 and N3)	**Required demonstration tests for all fuels for which the type-approval is granted per vehicle category and a declaration of compliance for all fuels, all reagents, all payloads and all applicable vehicle categories (*4) (****)**	**Not required**	**Required test on a vehicle with any fuel and on any vehicle category and any payload for all engine types every two years (*5)’;’**

…

‘Correct operation of systems using a consumable reagent and pollution control systems	**Declaration (**)(****)**	**Not required**	**Optional (**)(****)’**

(****) The minimum requirements for alternative reagents included in the manufacturer's declaration of compliance shall be specified in the type-approval information document.

(~~2~~)**(b)** in table 2, the entry for ‘Laboratory test of low temperature for emissions’ is ~~deleted;~~**amended as follows:**

‘Laboratory test of low temperature for emissions	**Declaration**	**Not required**	**Optional’**

~~(3)~~**(c)** in table 3, the entry for ‘Gaseous pollutants, PN in road testing (RDE) for each fuel and for the applicable vehicle categories (M2, M3, N2 and N3)’ is replaced by the following:

‘‘Gaseous pollutants, PN in road testing (RDE) for each fuel and for the applicable vehicle categories (M2, M3, N2 and N3)	Required demonstration tests for all fuels for which the type-approval is granted per vehicle category and a declaration of compliance for all fuels, **all reagents,** all payloads and all applicable vehicle categories (*4) **(****)**	Not required	Required test on a vehicle with any fuel and on any vehicle category and any payload for all engine types every two years (*5)’;’

…

‘Correct operation of systems using a consumable reagent and pollution control systems	**Declaration (**)(****)**	**Not required**	**Optional (**)(****)’**

(****) The minimum requirements for alternative reagents included in the manufacturer's declaration of compliance shall be specified in the type-approval information document.

~~(4)~~**(d)** in table 4, the entry for ‘Gaseous pollutants and PN in road testing (RDE) for each fuel and for the applicable vehicle categories (M2, M3, N2 and N3)’ is replaced by the following:

‘‘Gaseous pollutants and PN in road testing (RDE) for each fuel and for the applicable vehicle categories	Required demonstration tests for all fuels for which the type-approval is granted per vehicle category and a	(See engine requirements)	Required yearly for an adequate number of vehicle categories on any fuel and on any vehicle category covered by	Optional	Required/Optional	Optional’;’

(M2, M3, N2 and N3)	declaration of compliance for all fuels, all payloads and all applicable vehicle categories (*7)		the emission type-approval (*8)			

~~(5)~~**(e)** in table 7, in the entry for 'Gaseous pollutants, PN in road testing (RDE) for each type of fuel and for the applicable vehicle categories (M2, M3, N2 and N3)', the text in the second column is replaced by the following:

'Required demonstration tests for all fuels for which the type-approval is granted per vehicle category and a declaration of compliance for all fuels, all payloads and all applicable vehicle categories'

~~(6)~~**(f)** in table 8, in the entry for 'Gaseous pollutants, PN in road testing (RDE) for each type of fuel and for the applicable vehicle categories (M2, M3, N2 and N3)', the text in second column is replaced by the following:

'Required demonstration tests for all fuels for which the type-approval is granted per vehicle category and a declaration of compliance for all fuels, all payloads and all applicable vehicle categories.'

PUBLIC

ANNEX II

Annexes ~~I~~I and ~~I~~ II to Regulation (EU) 2018/858 are amended as follows:

– (1) ~~I~~in Annex I, Part A, the following point 2.4 is inserted after point 2.3.1.:

'2.4. Small electric vehicle:

2.4.1. Small electric vehicle means a pure electric vehicle that belongs to category M_1, having a length not exceeding 4.2 metres **~~and an electric energy consumption not exceeding [175 Wh/km]~~** **or to category N1, having a length not exceeding 5.0 metres**.

For this subcategory of vehicles, the letter 'E' shall be added as suffix to letter and numeral identifying the vehicle category (M1**, N1**)..~~I~~**'**

– (2) Annex II is amended as follows:

(a) Part I is amended as follows:

(i) the entry for item B14 is replaced by the following:

''B14	Acoustic Vehicle Alerting Systems	UN Regulation No 138 * [01 series of amendments]	X	X	X	X	X	X						';

_____

* Regulation No 138 of the Economic Commission for Europe of the United Nations (UNECE) – Uniform provisions concerning the approval of Quiet Road Transport Vehicles with regard to their reduced audibility [2017/71] (OJ L9, 13.1.2017, ELI: http://data.europa.eu/eli/reg/2017/71(1)/oj)';'

(ii) the entry for item G1 is replaced by the following:

''G1	Sound level	UN Regulation No 51** [03 series of amendments]	X	X	X	X	X	X						
		UN Regulation No 59*** [03 series of amendments]											X	

_____

** Regulation No 51 of the Economic Commission for Europe of the United Nations (UNECE) – Uniform provisions concerning the approval of motor vehicles having at least four wheels with regard to their sound emissions [2018/798] (OJ L 138, 4.6.2018, p.1, ELI: http://data.europa.eu/eli/reg/2018/798/oj)

*** Regulation No 59 of the Economic Commission for Europe of the United Nations (UNECE) – Uniform provisions concerning the approval of replacement silencing systems [2025/844] (OJ L, 2025/844, 30.4.2025, ELI: https://eur-lex.europa.eu/eli/reg/2025/844/oj)';'

(b) Appendix 1 is amended as follows:

(i) Table 1 is amended as follows:

(1) the entry for item B14 is replaced by the following:

''B14	Acoustic Vehicle Alerting Systems	UN Regulation No 138	A	A	A	A';'

(2) the entry for item G1 is replaced by the following:

''G1	Sound level	UN Regulation No 51	A	A	A	A';'

(ii) Table 2 is amended as follows:

(1) the entry for item B14 is replaced by the following:

''B14	Acoustic Vehicle Alerting Systems	UN Regulation No 138	X	X	X	';'

(2) the entry for item G1 is replaced by the following:

''G1	Sound level	UN Regulation No 51	A	A	X (for manual driving mode A (for fully	Test mode necessary. Manufacturer to define how to

					automated driving mode)	perform the test in accordance with the technical justification in agreement with technical service. Highest value measured in manual or/and in autonomous mode shall be considered for type approval. Vehicles having overall sound levels complying with the requirements in paragraph 6.2.8 of UNECE Regulation No 138(1) with a margin of +3 dB(A), are not required to be equipped with Acoustic Vehicle Alerting System (AVAS). The

PUBLIC

						requirements laid down in paragraph 6.2.8 of that Regulation for one-third octave bands and the requirements laid down in paragraph 6.2.3 of that Regulation for the frequency shift as defined in paragraph 2.4 of that Regulation (‘frequency shift’) shall not apply to those vehicles to determine the need for AVAS independent whether the vehicles is driven in manual or autonomous mode during the test. The R point of the driver seat shall be considered to be the lowest R point of the passenger seats in the 1st seat
