Objet:	Proposition de règlement du Parlement européen et du Conseil modifiant les annexes IV et V du règlement (UE) 2019/1021 du Parlement européen et du Conseil concernant les polluants organiques persistants - Préparation du trilogue

---

**I INTRODUCTION**

1. La Commission a soumis la proposition visée en objet au Parlement européen et au Conseil le 28 octobre 2021. L'objectif de la révision proposée des annexes IV et V du règlement (UE) 2019/1021 (ci-après dénommée "règlement POP") est de mettre à jour la législation européenne sur les polluants organiques persistants pour prendre en compte les engagements de l'UE au titre de la Convention de Stockholm sur les polluants organiques persistants, ainsi que les nouvelles évolutions technologiques en la matière.

## II. TRAVAUX AU SEIN DU CONSEIL

2. La Commission a présenté sa proposition lors d'une vidéoconférence informelle des membres du groupe "Environnement" le 22 novembre 2021. Le groupe "Environnement" a ensuite examiné en détail la proposition et son analyse d'impact. Une première proposition de compromis a été diffusée le 22 février 2022. Le 11 mars 2022, sur la base de propositions de compromis révisées, le Comité des représentants permanents a donné un mandat à la présidence pour débiter les négociations avec le Parlement européen, afin de parvenir à un accord en première lecture sur ce dossier.
3. Sur la base de ce mandat, la présidence s'est engagée, le 11 mai 2022, dans un premier trilogue avec le Parlement européen. Des réunions techniques tripartites ont eu lieu les 16 et 20 mai 2022.
4. En préparation des négociations avec le Parlement, le groupe "Environnement" a examiné les amendements du Parlement européen lors de ses réunions du 10 et 18 mai 2022. Le 25 mai 2022, le Coreper a donné un mandat révisé à la présidence afin de poursuivre les négociations.
5. Un deuxième trilogue s'est tenu le 31 mai 2022. Des importants progrès ont été faits lors de ce trilogue, qui ont permis un travail technique constructif lors des réunions techniques tripartites des 2 et 9 juin.
6. Le groupe "Environnement" a discuté du progrès des négociations lors de ses réunions du 8 et 10 juin 2022. Sur la base des commentaires des délégations, la présidence a préparé des propositions de compromis, qui figurent à l'annexe du présent document.
7. Les modifications par rapport à la proposition de la Commission sont signalées par des **caractères gras** pour le nouveau texte et par des ~~caractères biffés~~ pour le texte effacé.

### III. PROPOSITIONS DE COMPROMIS DE LA PRÉSIDENTE

8. Dans le but de conclure les négociations lors du troisième trilogue, la présidence propose un paquet de propositions de compromis, qui porte sur toutes les substances qui font l'objet de la révision.
7. En ce qui concerne les dioxines et furanes (PCDD/Fs), d'importantes discussions ont eu lieu lors de la dernière réunion technique et le Parlement a rappelé la dangerosité extrême de ces substances. Dans ce contexte, la présidence propose une valeur limite de compromis qui se situe entre les positions du Conseil et du Parlement, c'est-à-dire de fixer la valeur limite à 5 µg/kg. Afin de montrer de la flexibilité envers le Parlement, la présidence propose également d'ajouter une clause de révision 5 ans après l'entrée en vigueur du Règlement dans le but de diminuer cette valeur limite. En outre, le Parlement a indiqué au niveau technique qu'il serait prêt à accepter de maintenir une disposition transitoire pour les cendres et suies provenant des ménages privés, pour lesquelles la nouvelle valeur limite ne s'appliquera qu'à partir du 1 janvier 2025, afin de permettre aux États membres de collecter des données au cours de cette période transitoire et de les mettre à disposition au plus tard le 1<sup>er</sup> juillet 2024. Cette disposition serait expliquée dans un considérant. La présidence propose aussi d'ajouter une autre disposition transitoire pour les cendres volantes provenant d'unités de biomasse contenant ou contaminées par des dioxines et furanes.
8. De même, la présidence propose pour les polybromodiphényléthers (PBDEs) de maintenir une position similaire à celle présentée à la dernière réunion du Coreper, c'est-à-dire de fixer la valeur limite à 500 mg/kg, et d'ajouter une baisse automatique de la valeur limite à 350 mg/kg, 3 ans après l'entrée en vigueur du Règlement. Afin de parvenir à un accord, la présidence propose d'ajouter une nouvelle baisse automatique de la valeur limite à 200 mg/kg, 5 ans après l'entrée en vigueur du Règlement.

9. Sur l'acide perfluorooctanoïque (PFOA), la présidence propose de ne pas introduire de changement à la position du Conseil sur la valeur limite, car il est considéré que la proposition de la Commission représente déjà la limite de ce qui est réalisable. Cependant, pour trouver un accord avec le Parlement, la présidence propose d'ajouter une clause de révision 5 ans après l'entrée en vigueur du Règlement et d'inclure un nouveau considérant, qui souligne le lien avec les objectifs de la stratégie textile.
10. En ce qui concerne l'hexabromocyclododecane (HBCDD), la présidence propose de maintenir la proposition sur la valeur limite proposée lors du dernier Coreper, qui consiste en une baisse en deux étapes : la fixation de la valeur limite à 500 mg/kg à l'entrée en vigueur du Règlement avec une clause de révision qui entraînerait une baisse à une valeur égale ou inférieure à 200 mg/kg. La seule modification que la présidence suggère pour trouver un accord avec le Parlement est d'ajouter une clause de révision 5 ans après l'entrée en vigueur du Règlement, au lieu de 7 ans.
11. En ce qui concerne les alcane en C10-C13, chloro (paraffines chlorées à chaîne courte) (PCCC), un accord provisoire a été trouvé par la présidence avec le Parlement lors de la réunion technique du 2 juin sur une valeur limite fixée à 1500 mg/kg, soit la valeur proposée par la Commission, et une clause de révision de cette valeur 5 ans après l'entrée en vigueur du Règlement, au lieu de 7 ans.
12. En ce qui concerne l'inclusion l'acide perfluorohexane sulfonique (PFHxS) à l'annexe A de la Convention de Stockholm, la décision de la Conférence des Parties à la Convention d'ajouter cette substance à l'annexe A de la Convention a été prise le 9 juin. Par conséquent, la présidence propose de fixer une limite de 1 mg/kg pour les PFHxS et les sels et de 40 mg/kg pour les composants liés aux PFHxS, valeurs limites qui avaient été préférés par la Commission dans leur étude d'impact, et similaires des valeurs limites pour PFOA. En outre, la présidence suggère d'inclure une clause de révision pour s'assurer que ces nouvelles valeurs limites sont adéquates.

13. Enfin, au sujet des codes déchets figurant à l'annexe V, la présidence avait ajouté un code déchet supplémentaire qui porte sur les terres et pierres afin de donner de la flexibilité aux États membres pour la gestion de terres excavées contenant des POP. L'inclusion dans le code des déchets de la rubrique 17 05 04 (*terres et pierres autres que celles visées à la rubrique 17 05 03*), rencontre des inquiétudes de la part du Parlement et sera discuté au niveau politique.
14. La présidence considère que les propositions de compromis décrites ci-dessus pourront servir de base à un paquet global de compromis avec le Parlement européen. Néanmoins, de la flexibilité supplémentaire pourrait s'avérer nécessaire lors du trilogue. Les délégations sont invitées à indiquer à la présidence les éléments pour lesquels leur position est flexible.

#### IV. CONCLUSION

15. Le Comité des représentants permanents est invité à examiner les propositions de compromis dont le texte figure à l'annexe et à donner un mandat à la présidence pour poursuivre les négociations avec le Parlement européen le 20 juin 2022, sur la base de ce texte, afin de parvenir à un accord en première lecture.
